**NOTICE OF SUBMISSION OF**
**FINAL REMEDIATION PLAN**

**Dates of Notice: March 24, 2022 and March 31, 2022**

Notice is hereby given by the Petroleum Storage Tank Bureau (PSTB) of the New Mexico Environment Department (NMED) of the submission of a Final Remediation Plan (Plan) as follows:

1. The Plan proposes actions to remediate a release of petroleum or petroleum products into the environment.

2. The release occurred at the Robinson Texaco Site, 217 Paseo del Pueblo Sur, Taos, New Mexico.

3. The Plan proposes to implement injection of Regenesis PetroFix to address residual groundwater contamination at the Robinson Texaco site located at 217 Paseo del Pueblo Sur, Taos, New Mexico. Regenesis PetroFix is a "trap-and-treat" technology which is an activated carbon that will remove hydrocarbons from the dissolved phase by absorbing them onto activated carbon particles resulting in hydrocarbon biodegradation. The remediation goal is to decrease benzene and naphthalene concentrations to below NMWQCC standards eventually leading to a "No Further Action" status.

4. A copy of the Plan can be viewed by interested parties at the NMED PSTB office located at 2905 Rodeo Park Drive East, Building 1, Santa Fe, New Mexico, 87505 or at the NMED Taos field office located at 145 Roy Rd., Suite B, Taos, New Mexico, 87571. Due to policies in place in response to the COVID-19 pandemic, arrangements must be made 48 hours in advance for an in-person viewing of the Plan. Please contact the NMED PSTB project manager, Renee Romero, by telephone at (505) 372-8332 or email at D.Renee.Romero@state.nm.us to arrange a viewing. In addition, the Final Remediation Plan and all applicable data may be viewed at the following website:
