hadia	omari	Dear NMED staff, My name is hadia I am a texan resident, living in kyle and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans and everyone else . I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am just a teenager and want to be able to graduate and start a family without worrying about us running out of water and intense heat. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Hadia "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Mariela	n/a	We need our resources. New Mexico doesn't have a lot of resources if we do continue with this project Jupiter we're gonna end up with less resources. We already are dealing with something like this in New Mexico and then to have a second one build next you're taking away a lot of of their resources that we all need El Paso, Texas, New Mexico it's not fair to us. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
anonymous	anonymous	we need to stop project jupiter, the politicians clearly do not see it yet, but it will destroy our environment and cause big harm to the area close to the data center. it will make it harder for us to reverse the global environmental damage which will lead to an even greater mass extinction than now, for both animals and humans because we do not get enough time for our bodies to adapt to this type of climate. please hear us out and listen when we tell you that we all really need you to take this seriously and cancel project jupiter, for everybodies sake, before it's too late. by approving this project it will be an act of environmental rasism, considering Doña Ana County's bad quality air, not reaching the federal government rules. in addition, the public should be given at least 60 days to comment and review the air quality permit so community members can participate equitably. the air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. if for some reason the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. sincerely, anonymous.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Abigail	Tooley	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you.	1	Merged Document	No				Yes	Yes	Yes					8/17/2026
Anonymous	Anonymous	Dear NMED staff, I live in Lagos, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am an architecture student who studies and has observed the changes of the earth's environment state due to the continous destruction of natural habitats for the creation of centres and other facilities that are detrimental to health of those in near proximity and by extension the overall climate condition of the earth The project's proposed fuel cell powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants. - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology or a centralized waste system has never been tried at this scale. - Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology and to give an additional 60 days to review and comment on the air quality permit so community members can participate equitably.	1	Merged Document	No					Yes	Yes		Yes		Yes	8/17/2026
Audrey	Mattoon, PhD	"New Mexico can not afford to waste the water that we need for life on development designed exclusively to extract from this state. New Mexico has - since long before America was founded - been home to complex urban societies able to survive in our high deserts because of the stewardship and respect for New Mexico's natural water resources. Allowing Project Jupiter to proceed would prove, in a permanent and catastrophic way, that our current society has a death wish. New Mexico needs thoughtful, community-oriented development that creates sustainable prosperity for our state. New Mexico deserves more than Project Jupiter. It deserves more then being treated like an extractive colony for technology oligarchs who neither create prosperity in New Mexico nor respect the state's dignity. I say this as someone who has worked in technology for 15 years. I am no Luddite. The money I spend in my community is earned in this industry. And it is from this vantage that I can safely assure you, no one involved in this project wants what is best for New Mexico.	1	Merged Document	No				Yes							8/17/2026
Anonymous	Anonymous	I am not in support of project Jupiter, it is going to destroy ecosystems, take away resources we need, and it's going to contribute to the already large amount of pollution that we have. Project Jupiter is a problem and it is going to be the reason for mass destruction of ecosystems and communities around it. Project Jupiter needs to be cancelled "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Anika	Takittc	Project Jupiter would be disastrous for our climate and could drain the fresh water supply. Large AI data centers can use up to 5 million gallons of fresh water a day, and considering that Project Jupiter is proposed to be one of the largest data centers in the world, there is no doubt that it would likely exceed this already astonishingly large number. Furthermore, those living near AI data centers have reported unsanitary drinking water as well as loud, nonstop noise coming from the centers. We do not need AI data centers, we need clean water, a clean climate, and comfortable living conditions.	1	Merged Document	No				Yes			Yes	Yes			8/17/2026
Zowie	Gama	I live in Doña Ana County and under no circumstances do I want experimental technology deployed at an unprecedented scale in my backyard. Yucca Growth Infrastructure's gas-powered fuel cell plant is 1,000 times larger than Bloom Energy's biggest existing fuel cell plant. In fact, worldwide, Bloom Energy has developed 1.4 GW of fuel cell technology across more than a thousand locations, yet Yucca Growth Infrastructure is asking for nearly double that (2.46 GW of fuel cells) at a singular location. The largest fuel cell plant in the entire world is more than 30 times smaller than the fuel cell plant under consideration in Santa Teresa. There is absolutely no way to know, with certainty, what the actual pollution levels will be given the tremendous size differential, and thus gap in data, between operational fuel cell plants and this theoretical plant proposed by Yucca Growth Infrastructure. Betting the livability of our county on this unpredictable and unproven plan would be a total capitulation and betrayal of your so-called values: "protects the public health of New Mexicans...by preventing the deterioration of air quality;" "protect and restore the environment...foster a healthy NM for present and future generations" Highly flammable hydrogen under high pressure only needs a microscopic crack to leak out, ignite, explode, and level entire neighborhoods and schools while sending shockwaves into nearby counties. Assuming this risk, an act of gross negligence, at a scale that has never even remotely been demonstrated in practice would be unbelievably careless. These permits must be denied outright. If further deliberation is desired, a public hearing in Santa Teresa is non-negotiable.	1	Merged Document	No					Yes	Yes		Yes		Yes	8/17/2026
Emmanuelle	Anonymous	Je suis une adolescente qui a grandi dans une société déjà condamné au réchauffement climatique et je pense avec aucun doute qu'il est réellement temps de prendre action et de changer avant qu'il ne soit trop tard et l'une des choses les plus importantes est de cesser de gaspiller notre peu d'eau potable restante dans des choses comme le projet Jupiter car oui ce projet peut avoir bien des avantages mais des conséquences environnementales encore plus graves et irréversibles comme par exemple l'utilisation importante d'eau potable	1	Merged Document	No		No	Oppose Non-Substantive								8/17/2026
Julianna	Garza	I am a resident of San Antonio, Texas, and I beg you to have an ounce of humanity and realize that we are all living through the big corporations tearing apart nature when we could all use these resources to help each other live a healthier, happier life. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone, which means the air quality does not meet federal government rules. Please choose people over profit. These people have families, lives, homes, children, and most of all, they have a soul.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Paulo	Rivera	As a resident who contributes creatively to my community. I am gravely concerned about the environmental impact this so called Project Jupiter will have in our natural area. First off, the people were never informed of this agreement which was made behind closed doors with city council members. Second, there is NO time proven analysis that can guarantee there will be no harmful impact on our natural environment. Third, this invasion and assault by foreign corporate entities will only benefit the billionaire class. The bottom line is: Human beings and the ecological system are not meant to be exposed to massive amounts of heat and harmful radiation that this useless plant will generate. This will only lead to an environmental disaster if not stopped by the people and conscientious leaders in our community. I urge you to reconsider and eliminate this extremely hazardous proposal that will only cause irreparable damage to our beautiful environment. Thank you !	1	Merged Document	No		No	Oppose Non-Substantive			Yes					8/17/2026
Sofia	Torres	If the air changes then it gets really hot once it gets really hot then the humidity goes up it's going to be feel like a hundred degrees and people can have seizure so more people are going to be hurt. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026

JACQUIE	CHILTON	This project is a climate disaster and we should we making decisions to help reduce and improve our climate impact not make it worse. Furthermore, these data centres negatively affect the water of surrounding towns and communities making it unsafe and dangerous to drink. They also cause noise pollution.	1		No														
Natalie	DeMarco	We don't want it and we dont need it to live we need our planet to live and data centers and causing animals to be extinct or disappear isnt helping the planet. Stop forcing our planet to die faster when no one else is agreeing to what's happening and instead help our planet. Stop having down trees, stop destroying wildlife and habitats, and stop pushing our earth. Stuff like this is the reason were losing such high temperatures around the world and especially in cold states. NO ONE WANTS ALL THIS CRAP!!! NO ONE WANTS YOUR STUPID PROJECTS. STOP KILLING THE PLANET WITH YOUR SELFISH GREEDY WAYS!!! YOU THE PEOPLE CAUSING THIS WELL ALSO BE AFFECTED BY EARTHS CHANGES AND EARTHQUAKES.	1	Minimal Document	No					Yes		Yes		Yes			8/27/2026
		The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.																	
Ria	NA	We don't need AI. Its helpful in the MEDICAL FIELD I shouldn't be used to talk to us AI BOYFRIENDS! we are already losing CLEAN water. People are dying and losing one of the most important things to live WATER. Project Jupiter just proves people are actually losing their minds. We are actively losing clean water and we are losing animals that have lived for thousands of years and it was all to us this generation we are letting them down!! Why should I be scared for my future? Oh it's fine I know why, ITS BECAUSE WE ARE ACTIVELY GOING CLEAN WATER. I hope this helps. DONT STOP TALKING ABOUT THIS!	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Clara	Wright	This is genuinely the worst idea ever. This is the most disgusting project ever proposed. Rich people make me sick. This will destroy the climate, and ecosystem. When will people wake up to the destruction caused by people who don't give a crap. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes		Yes					8/27/2026
Sam	Bradley	This is downright ridiculous. AI data centers are taking over the world and destroying so many natural resources and polluting the air with emissions and noise. I do not stand with project Jupiter whatsoever and will help with any action aimed towards opposing it. The public need an additional 48 days to review and comment, there needs to be a public forum hosting both English and Spanish speakers, and the air permit needs to be denied. You already know the Dona Ana county is suffering from environmental damage so this will be taken as environmental racism. Beyond disturbing and dystopian that any of these words need to be displayed to those who have more power to control this unholy level of greed.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	This is a terrible idea and a complete waste of communal, agricultural, and environmental resources. The AI bubble is a bubble that will very quickly burst and contributing to this collapse shows the incompetence on the team behind this. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No						Yes	Yes			Yes		8/27/2026
JASON	GORDON	I am Jason, and I'm also really tired of completely unnecessary AI data centers using our already limited supply of water. And I very much don't want global warming to get even worse. I am asking that you deny Yucca Growth Infrastructure's air quality permit, because if it isn't, I'm most likely not going to live to 49.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably.	1	Minimal Document	No					Yes	Yes						8/27/2026
Akhi	Betancourt	I do not believe that we need AI to be opened on these lands, we can live without AI but we cannot live without our planet. Many people around the world have already felt the effects of climate due to AI and with this project that is taking place it will get worse. We need to stop thinking about what billionaires want and instead of what the everyday people want, this is going to affect everyone including the people being part in this project. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No						Yes	Yes			Yes		8/27/2026
Tiana	Guyton	WE DO NOT WANT PROJECT JUPITER!!!! We do not want project Jupiter. There would be no need for such a project. All it would do is take resources from communities that need them. "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No						Yes				Yes		8/27/2026
Jocelyn	Stinson	This project rejects our land and destroys our future as a community. New Mexico is already in a water crisis, and this rebranding of project Jupiter doesn't change the fact that it's using millions of gallons of water. STOP PROJECT JUPITER	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Joshua	Cozen	CLIMATE CONCERNS Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined-Rio Rancho, Albuquerque, Las Cruces, and Santa Fe. The proposed "micro" plant has a 2,460 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second-largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of those grids includes a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. ENVIRONMENTAL JUSTICE Santa Teresa Elementary and High School are located within five miles of this project site. 94% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Tribal governments like the Tohajiilee-Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Dońa Ana county near the site have not been properly notified of this air permit application request. FUEL CELL TECHNOLOGY IS DECEPTIVE Fuel cell technology has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. The Application is based on pollution testing from a very small unit. The testing unit is only 66kw, while the power plant is 37,000 times that size.	1		No						Yes						8/27/2026
Isla	anonymous	Our future is under threat with this proposed air quality permit. A change to fuel cells too such a vast impact on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our ashe and help time reinstatement care would be suffering short of blatant environmental racism. "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No						Yes	Yes			Yes		8/27/2026
Liv	Rai	Project Jupiter will absolutely demolish our earth. Would you rather be alive and thriving or have air and not be able to survive on our earth do the research the chemicals produced by air this is harming our planet. This project needs to stop before it's too late. We have been given earthcoul at for millions of years. Stop being a coward and afraid of what might happen without AI, because it's better than what we already know it's gonna be like earth it. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No						Yes	Yes		Yes	Yes	Yes	8/27/2026
Anonymous	Anonymous	I am asking that you deny Yucca Growth Infrastructure's air quality permit. Think about how much it will affect global warming and climate change as a whole. There's little time to turn back but installing this will only speed up the process. You have the ability to prevent the suffering that many organisms and humans will have to endure. Please help and be the change that is necessary. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Cameron	Watters	We do not need more AI data centers! Not only is it incredibly inconsiderate for our communities that depend on local sources of water and land, but it's also unnecessary. As collecting data for AI usage invades privacy and isn't being utilized enough due to the increasing human drawback from artificial intelligence.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Karmia	smit	As someone who is apart of the younger generation I am scared to grow up knowing what the world has become. Due to huge data centers being built the wildlife is being put under more pressure and stress causing them to die out faster. The water is getting polluted and used till its dried up. We only have one planet and this is how we're treating it. People only care about money until they realize that once our resources are done we cant eat money. Our forests are dying out. Our water is being dried up due to ai. And people still dont care. We have 3 years left till climate changes is irreversible. This is the coldest summer we will have for a long time if we dont stand up and do something about the problem. Stop building data centers. We dont need ai. You're telling people stop thinking for themselves and dumbing them down. the polar bears are suffering due to our actions. This isnt just our planet its the animals too and they were here before us. So stop being selfish fucks and think about how your actions affect others and how it can affect currently young teen. WE ONLY HAVE ONE PLANET. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes		Yes					8/27/2026
Kathryn	Anonymous	Building this data center will cause mass destruction too many animals in the ecosystem as well as producing toxins into the water used for drinking, this will cause mass health problems to humans and could cause the environment to go into stress from the lack of nutrients and clean water. The center will also pollute the atmosphere with chemicals which will cause the air in the surrounding area to become toxic and will slowly increase the death of humans and the ecosystem. At isn't a need, it's ruining and killing our planet. STOP THE BUILDING OF DATA CENTERS. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
caelan	sturtevant	I do not want project jupiter in our state!!!! If it is not needed, what is needed is our animals, our trees, and most importantly our water!! we need a 60day review and comment at air quality. permits denied for air quality application. our residents are being affected, this is inhumane!	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Emma	Corpis	The demand for a data center was and is not needed for the city that resides in New Mexico. Data centers use up a ton of clean water and leaves the residents with the murkiest and most undrinkable water because of a single-use prompt someone decides to put in because they're too lazy to even look it up on google. There is no need for. You are killing everything and everyone. Time will be too late for you to realize unfortunately and you will have suffered the same	1	Minimal Document	No						Yes	Yes					8/27/2026
Claire	Cicciarlo	I am Claire Cicciarlo and I am writing this out urgently to cancel and put a full stop to Project Jupiter. I have been a Florida citizen for almost two decades and over the course the past year, I have seen the devastating impacts that AI data centers have had on our communities. They are compromising and depleting our waters and disrupting the natural environment around it. Our Earth CANNOT take the amount of damage these data centers will do, the state of our environment has already been degraded by mass consumerism, drilling for oil, and the implementation of new condos, resorts, apartments, and we MUST put a stop to this. I urge you to cancel this project for the sake of the Earth and for the sake of our people. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No						Yes						8/27/2026
Anonymous	Anonymous	I find this a major issue, since this will take the land, water, and energy the younger generations will need. If we dont take action now, and we let greedy CEOs take over every single resource, our children will die of starvation, dehydration, or illnesses due to lack of life saving resources. I do not wish death on another generation, so I urge you to not build that data center, as this might be a moment of no return.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Norah	Soloranzo	I am a New Mexico resident and am very concerned about the environmental impact of project Jupiter. The cons and costs of this undertaking seem to heavily outweigh anything that could be gained for the community. I am particularly concerned that bloom energy is being granted these permits with its abysmal history on covering up and ignoring waste and dumping issues. At the very least, bloom should not receive an air quality permit now and the public should be given additional time to review and have a voice in this permitting process.	1	Minimal Document	No						Yes						8/27/2026
Carleen	Sajkowsky	I am vigorously opposed to Yucca Growth Infrastructure building the Inconigniti for Project Jupiters well as Project Jupiter itself. Southern NM is not only suffering from a catastrophic water shortage but we also suffer from poor air quality due to weather inversions, winds and more frequent fires in the region. The proposed fuel cell glut to power Project Jupiter is not only unproven for a project this size but is estimated to put out more pollution per year than Las Cruces and Albuquerque combined if we even were some estimates add Santa Fe. Too little information has been provided by Yucca Growth Infrastructure. Deny this permit and require more information be made available as well as more public meetings for Southern NM residents to respond to this preposterous project.	1	Minimal Document	No										Yes		8/27/2026
Cameron	Lykes	Dear NMED staff, My name is Cameron, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 150 Microgrid in Dońa Ana County. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. Making us not even further behind and make our planet even more vulnerable to climate catastrophes and issues. Also, Santa Teresa Elementary and High School are located within five miles of this project site. 94% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOC. Also, The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Approving this permit would be government-sponsored environmental racism as residents of Dolan Mesa in Ana County are already disproportionately impacted by environmental pollution.	1	Minimal Document	No					Yes		Yes		Yes		Yes	8/27/2026
TAYLOR	ANDERSON	Doing this will put our earth and our natural resources at risk by releasing over 10million tons of carbon dioxide every year. This will erase all of the climate progress made over the past couple years.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Mira	Anonymous	As a young person I explore you to stop this construction. It won't just effect you, but the entire world and generations to come. I want a future on earth and I want my children and their children after them to have futures. Untold ecological damage will be done if you let this come to pass.	1	Minimal Document	No	No	Oppose Non-Substantive		Yes								8/27/2026
		The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."																	
Bee	Lara	We do not want AI data centers! We want to live on a healthy planet. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	these facilities can strain local power grids, water supplies, and daily life.	1	Minimal Document	No						Yes	Yes			Yes		8/27/2026
Alisa	Bridge	I am strongly against the NMED approving the Yucca Growth Infrastructure, LLC air quality permit. This rewritten proposal is no better than the last. The amounts of pollution this data center will create is still horrendously unacceptable from a neighbor's point of view. As an environmental economist, I genuinely cannot stress the importance of conserving our resources and not contributing to technologies that take water from our own people	1	Minimal Document	No						Yes						8/27/2026
rhianna	gerez	I am a lifelong new mexico resident & i am completely against project jupiter. investing about all amounts of money into data centers & ai while continuously ignoring real issues we have in this state (homelessness, water shortage, outdated infrastructure, failures in the education system, etc.) is craziness & cruel. our planet, our beautiful state, & our citizens deserve so much better than some of the world's largest proposed data centers causing more harm than good. any amount of jobs it could potentially create is completely irrelevant to me when data centers have been shown to cause heat surges in surrounding areas, reduce air quality, take up valuable fresh water, increase energy costs for nearby communities, contribute to pointless noise pollution; i could go on. having a large data center in a state whose main river & lake are actively drying up is one of the biggest mistakes i think we could make.	1	Minimal Document	No						Yes	Yes		Yes			8/27/2026
Jessica	Pruett	Im already seeing local farmers and agriculturalists drilling deeper for water that isn't there. I hear them argue about who has rights to what water. Project Jupiter will literally keep millions of gallons of OUR WATER locked away and out of the natural water cycle. We already go most of the year without seeing rain or snow and now even less water will be returned to the earth and throw us further out of balance. Instead of giving months without rainfall we can go years. That's less snowmelt from up north and less water for the people, animals and environment. All for what? Government surveillance? AI shortcuts? I would rather have access to a farm than have to deal with the full out of corporate greed or government overreach. Please for the love of god stop project Jupiter so I can raise my children here in peace. I don't want to leave my home. Nor can I afford to leave. Please see the people that live here. See our culture. See our desert as more than just sand and space to develop.	1	Minimal Document	No						Yes						8/27/2026
Lewis	Fyfe	Project Jupiter is a waste of resources, all it will do is make climate change worse, that land could be used to plant hundreds of trees. So to use it on a data centre is stupid and a waste of money. "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No						Yes						8/27/2026
anonymous	anonymous	Project Jupiter is comically insidious, hiding behind indigenous or natural/arbic names? There's no way everyone is on board with this, everyone I talk to, young and old have complained about the water shortages, and everyone agrees that building data centers here, regardless of how you package them, would not be in the best interest of this land or the lenegis on it, indigenous to it, and relyon it. Coyotes are wandering into the city because they are looking for water. Life will be lost and if this is allowed, it will be another testament to the racism and carelessness this government has for its people. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Dolan Mesa in Ana County are already disproportionately impacted by environmental pollution. For years, Dolan Mesa in Ana County has been called a "sacrifice zone" (wikipedia), this means our air quality does not meet federal government rules.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Solange	Soares	Al data centers in numerous communities have negatively affected humans, animals, and surrounding environment in numerous ways. A center this large would do astronomical damage at a national scale with the potential emissions and resources it requires to run. It is an awful investment. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Talissa	Montoya	Hi! I am apart of the youth of NM! Do not pushthis project into action, we are sparse in water and this project will drain us of clean drinking water for a lot of people here in New Mexico.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Noor	Elsadek	My name is Noor Elsadek. I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 150 Microgrid in Dońa Ana County. The project's proposed fuel cell powered grid is concerning for many reasons. It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject Yucca Growth Infrastructure, LLC's air permit application for the 150 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Noor Elsadek "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No					Yes								8/27/2026
Vi	Icore	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This will affect the health of many that living in the area not to mention the crops that tend to be able to be produced to help feed people The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No						Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026
Fatimata	N'diaye	Project Jupiter is completely uncalled for and not needed. We need to be using our time, money, and efforts to saving the planet not destroying it further. What benefit is this going to have in the long run? I just don't understand why corporations and governments are more than set on ruining things for their citizens and this planet. The permit application needs to be denied and a hearing needs to be held in both English and Spanish and an option to attend virtually, so all the people who will be affected can participate.	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	The climate clock has 3years left until we are unable to turn back, unable to fix our world. Why would it ever be a good idea to build and initiate a building that horribly worsens the world chemical output and well as climate change. There is no control on this, the chemicals outputted will harm people tremendously, this data center is killing ecosystems where it's built, and there's simply no reason for this to be built either way. This center is only a way for people to make money, for profit to be earned, and indoors? I love the world's interest in free tech which should be only companies main priority. Stop this projects motion, help save our planet instead of worsening it's no return. You cannot eat money, you cannot live off of money forever. We need our planet, we need her to be healthy. So build something that helps against climate change/greenhouse gases, use the billions of dollars that will go into this project for something that will help protect our planet. There's no control on what ends the plant, there's zero idea of what this is going to do to our world. There's will be 10 MILLION tons of CO2 gas put into our atmosphere, that will kill us. Kill our planet only for money. As well methane gas is one of the biggest contributors to climate change, world ending climate change, but this company thinks it's a good idea to output large amounts of this into the area. As well as a plant this size is simply not needed, in no world in a plant 3/4s the size of the current biggest needed. That's excessive and doesn't at all take into account the ecosystems around it. STOP THIS PROJECT. SAVE OUR WORLD. -Kori "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dolan Mesa in Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No						Yes	Yes			Yes	Yes	8/27/2026

Anonymous	Anonymous	Data centers such as these are the main contributors to the active degradation of our society and planet. They single handedly deprive communities of clean water and air, for a product that is completely inessential for every aspect of life. The only net positive of these data centers is lining the pockets of one or two CEOs, at the cost of the livelihoods of thousands. These data centers do not only negatively effect their immediate area, the consequences are felt across the world, through climate change and the degradation of many people's mental health. Any sensible global citizen would realize this and do everything in their power to stop the greedy, inhumane shills who still try to justify these senseless monstrosities. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Jessica	Romero	Dear NMED staff, My name is Jessica Romero. I am not a New Mexico resident, but I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Communities in Georgia have already been affected by AI data centers. They serve no one but the rich who want them built and even then, it will only be for a short while. They will poison the community and themselves if this continues. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. People care, please listen. Sincerely, Jessica Romero	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Lark	Sundsmo	This is unconstitutional and a violation of our first amendment rights. The very first right is the pursuit of life and this is poisoning us, the second is liberty and this is a prison of our spiritual rights to our land our attention our society without someone monetizing for their own profit from our very existence, and the third is justice. In principle it is at its foundation the requirement that there is balance and fairness amongst its communities. Citizens United does not usurp our god given rights allowing a corporation more authority over any other citizen. This is our cease and desists. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Kellan	Gerber	We don't need these huge AI projects or AI at all, we evolved over 6 million years and survived until now without it. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Valentina	Ferrada	We don't need more sound, light, land or water pollution, we are already in a state of drought, we can not use the little water we have to cool down machines, the jobs you offer are temporary these sites run with very few employees the rest is all computerized, the people mostly affected by this are in rural areas and of lower income because the land is cheaper to buy, these people already struggle financially we don't need to put them at risk for health issues that we have yet to find out these data centers will cause to them asides from taking their water contaminating their land, and driving away all animals and insects that keep their surrounding areas and plants alive because thousands of machines make noise all day long. And you guys as a company already have a very shady background; we don't trust you with the lives of people and those are the lives you will be affecting with these satay centers.	1	Merged Document	No	[redacted]			Yes		Yes		Yes			8/17/2026
Jillian	Velazquez	I do not want a large data center being built on land meant for nature. Mass deforestation and destruction of our planet is not something I can simply scroll away from and ignore. Carbon footprint and climate change are real and are in action as we speak and building these data centers that use clean drinking water, require mass amounts of energy to run, and are taking the homes of local wildlife are only speeding up the process to our inevitable demise. Please protect this beautiful yet vulnerable planet. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
SARAH	RIVERA	We don't need data centers that use 39 Million gallons of water every day, we are in serious drought where it might be irreversible. I do not support your Jupiter project	1	Merged Document	No	[redacted]			Yes							8/17/2026
Kevin	Chavez Servano	Dear NMED staff, My name is Kevin Chavez Servano. I used to live in New Mexico and am now serving the country on active duty in the Air Force, living in Hawaii, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The land on New Mexico is such a beautiful place and area and homes thousands of wildlife. When I was growing up there the sunsets were my favorite. And it would be a shame to see any of it go away or be ruined by this. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Kevin Chavez Servano	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Kaelyn	Giambrone	Im not gonna sugarcoat anything. I'm scared for what my future holds, I'm 17 as of now and I feel like the world has turned around from where it once was. I don't want to think about if im going to live or not within the next three years, and I can tell you right now this data center is not a necessity, the creator of AI looks at his creation and regrets ever making it, we do not need to make him regret it more. This data center is not detrimental to science and there is no positive that comes out with it. It's an unecessary thing that billionaires want because they are bored. I don't know about you but I don't want to give into their boredom. This message may not be a lot nor will it be read and me leaving this may be a waste of time because who knows if anyone is gonna listen. But I don't want to go outside and not be able to breathe. All because of people with money wanted a new toy to play with and don't realize how much this can hurt not only us but the environment, they may not realize now about how much the environment does for us but without it we have nothing, we are nothing without it. We don't need this data center.. and I'm doing the best I can right now to help. But I don't know if anything will be done. I'm scared for my future. We should be able to get an additional 60 days to review on the air quality permit because we need our voices heard but it should be denied because our earth does not need any more hazardous waste. But if it is denied a hearing will be held in Santa Teresa where a lot of legal battles will happen but we can hopefully make a change.. but if people accept this permit, they need to consider the lives of those who aren't the same as them, who come from different backgrounds and who have different cultures because the residents of Doña Ana County they can be heavily affected.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Zhoey	McEvoy	We can live without data centers, humans lived without ai for decades. We don't need new ai tech coming out every week. It ruins our planet and makes global warming even worse. Stop ai, stop data centers, stop climate change. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	The construction of the Project Jupiter data center will be detrimental to local ecosystems and communities. New Mexico's desert habitat is home to so many crucial plant and animal species. Moreover, a new data center would put further strain on water resources in the area, and pose a risk for noise pollution. The community is overwhelmingly against the construction of this data center. The public should be given an additional 60 days to review and comment on the air quality allowing so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Taya	Handfield	Do not go through with Project Jupiter. We don't need more data centers, we need to be taking care of the environment. Every year its getting hotter and hotter, the air becoming even less breathable, with the way things are going, we will never be able to keep up with our sustainability for future generations. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	It would be incredibly irresponsible and reckless to approve the permits for Project Jupiter. This project will cause irreparable harm for generations to come, for the inhabitants of this land, the plans, the water and the land itself. For such a gargantuan development, there must be an airtight imperative to build it. No such imperative exists for massive AI data centers in the desert,, and everyone watching knows it. Even accounting for emissions reductions compared to the original plans, this project would still emit a horrific amount of pollutants and emissions,, presenting irreparable harm to both human and nonhuman inhabitants of this land. This technology at this scale is unproven. The developing company in question, Bloom Energy, has a history of illegal or improper dumping and transport of materials, which is especially concerning given the toxic chemicals at play here. The emissions, methane gas use, and chemical waste generated by this plant are toxic to all life forms. Cancer causing chemicals like benzene could be leached into the environment. Such reckless and unnecessary developments as this are responsible in part for innumerable cases of cancer in America. Is that what you want for your constituents? Besides being deeply unnecessary, this project is yet another case of environmental racism, as the majority of nearby residents are people of color who are already disproportionately impacted by environmental pollution. Who is this project for? And who do you serve? The air permit should be denied. If it is not denied, a hearing should be held in Santa Teresa, in both English and Spanish, with the opportunity to participate virtually. At minimum, the public should be given and additional 60 days to comment on the permit so all can participate in the review of this momentous — and potentially catastrophic — decision.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Kendall	Boland	The fumes that will be released from project Jupiter will heat up our atmosphere to the point where it will be so hot people may die. It dosent help that at this very moment we're going through a heat wave. Project Jupiter could wipe us out do we really want that? We've lived THOUSANDS of years without ai why do we need it now? We.dont.need.ai. We could be so much better off without all of this ai bullshit, the only ai we could use it the ai that helps teenagers or just anyone in general get through some stuff, that's the only ai we should be using, and if we need help use echoGPT and not chatGPT or just ask someone you know for help. STOP PROJECT JUPITER	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive								8/17/2026
Maria Estela	Pasilla	These technologies will further degrade the quality of life in our region, which is already suffering mounting drought conditions since the Rio Grande was choked off causing the demise of our thriving ecosystem, our canopy of ancient cottonwoods and our agricultural lands. Urbanization has increased the paving of open spaces and water use. Our climate has changed, turning our verdant river valleys into a dusty desert. The joy of growing up close to an enormous river and among the lush natural life that it supports is but a memory for octogenarians like myself; that joy was denied to our children and grandchildren. Irrigation water has become so scarce that pecan groves and fruit trees are no longer sustainable. Dry, dusty conditions are creating unhealthy air quality and spiking respiratory illnesses, especially in our young children and elderly. In addition, the City of El Paso, Texas has drilled deep wells around the county for water utilities, causing water tables to drop farther below the earth. Everywhere, trees are dead and dying. Technologies that require enormous amounts of water, and that emit impurities into the atmosphere have no place in our region. Our earth is scorched enough. The public should have 60 days more to comment on the air quality permit and to participate equitably.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				Yes	8/17/2026
Trina	Witter	I'm writing to ask that you deny the Project Jupiter air quality permit application. Even though they switched to fuel cells they will still be emitting 10M tons of pollutants that are hazardous to human health. That is simply unacceptable in a relation that already has some of the worst air quality in the nation. As a resident of Doña Ana county for over 40 years I've seen how the air quality has become worse and worse from manufacturing and climate change. Particulate matter from dust storms/haboobs, auto emissions from long wait times at the border, and now emissions from hyperscale data centers have long term health effects on residents. Please don't let residents become victims of big tech who are only here to take advantage of residents. Help NM to be a leader in clean green sustainable energy. If it can't be denied please add an extra 60 days so residents can continue to ask questions about Bloom and their fuel cell technology.	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Robert	Keatts	Hello my name is Robert Keatts, I am commenting to show that I am against project Jupiter and I have a very strong distaste towards it. Here is why, Project Jupiter actively endangers the people not to mention the animals. This data center is being built only 5 miles away from 2 schools. The gases and smoke the data center would emit would directly put hundreds of children in danger. Project Jupiter is also actively dumping their waste into the Chihuahuan Desert. Santa Teresa is not a place for dumping waste. It is a community. Project Jupiter has failed to properly warn and inform the tribal governments around where they are building this massive data center. The data center will emit hundreds of thousands of tons of greenhouses gases and toxic waste every year, it will drain our waters supplies. The company behind Project Jupiter has a history of dumping illegal hazardous waste. This is not what is good for our communities, for our people, for our animals, or for our world. I am Robert Keatts, Stop Project Jupiter.	1	Merged Document	No	[redacted]			Yes		Yes			Yes		8/17/2026
na	na	Public Comment on Denial of Yucca Growth Infrastructure's Air Quality Permit To the New Mexico Environment Department (NMED) Air Quality Bureau, I urge you to deny the air quality permit for Yucca Growth Infrastructure's Project Jupiter. This permit would exacerbate the severe air pollution already plaguing our community, particularly in a nonattainment zone ranked 16th worst in the nation for ozone pollution—a failing grade every year since 2000. Adding 10 million tons of carbon dioxide and unquantified toxic emissions to our air is unacceptable and unjust. The health risks are immediate and severe. Extreme heat, worsened by carbon dioxide emissions, has already caused harm in our community, including a child suffering a grand mal seizure due to heat-induced electrolyte imbalances. Outdoor workers, like my family members, face dangerous conditions without shade or rest breaks, and the inability to store life-saving medications like insulin safely. The toxic pollutants from this facility—even at low levels—pose lifelong risks, including permanent brain damage and respiratory diseases. How can we ask families to breathe this air, knowing it could harm our children's health and futures? Additionally, the fuel cell provider has a history of illegally dumping hazardous waste, a practice that risks contaminating our soil, water, and air. Given our county's ongoing illegal dumping epidemic, how can we trust that these systemic failures won't expand to include this project? Fines for illegal dumping cannot undo the damage once it occurs. This permit is not just a procedural decision—it is a moral one. The health and safety of our community must come before corporate profits. Deny this permit immediately to protect our air, water, and future.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes		8/17/2026
Makayla	Racine	I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	1	Merged Document	No	[redacted]				Yes				Yes		8/17/2026
Anena	Anonymous	To start, I do not agree with building a data center in New Mexico. Think about it. The weather is already unbearable. If centers continue to be built, water will be lost, with the remaining sludge, homes will be flooded with bills from the energy being sucked for data centers, a pain-cutting noise will make you want to rip out your own hair, air will suffocate and kill slowly. Imagine this world upon the people. Maybe money sounds good for a moment, but when you really take a good look at the suffering around you, will that thin sheet of green bring joy anymore? You and your future children will live in struggle because of temporary earnings. The people need you, they trust you, and continue to hope you prefer them over billionaires- trillionaires! What does a man gain if he has the whole world in his hands? There are so many great things that can come out of your community if you decide to refuse and prevail over the lust for this project. Please, put the people first before the profit. The community and the children are depending on you. They deserve your support. The world will thank you for the compassion and bravery you have for the people you serve. Continue to hear them out and understand their fear.	1	Merged Document	No	[redacted]			Yes				Yes			8/17/2026
Anonymous	Anonymous	this permit needs to be denied and we the people shall not let it be passed through, most don't have a voice to speak, don't have power to be heard and everything is getting ripped beneath theirs and our feet, this permit has no purpose for a future and is only destroying the earth and bringing us far to close to the inevitable. Given blooms history of illegal dumping, is it crystal clear there is no interest in what's best for the people but only the pockets where the money will fall into, if this permit is not denied, a public hearing should be held, including both in person and virtual and also giving the public 60 more days to review and comment	1	Merged Document	No	[redacted]								Yes	Yes	8/17/2026
Quinn	Vance	Dear NMED staff, My name is Quinn Vance. I am a New Mexico resident, living in Las Vegas, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. What happened to the public hearing the state Air Quality Bureau recommended on the previous applications that the industry has since redacted? NMED should not overlook the overwhelming community concern expressed in the last public comment period, which still applies to this same project. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Quinn Vance	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
ARACELLI	GONZALEZ	I have lived in the Don Ana community for my whole life. This is home, I am lucky to call this place my home. Everyday I see the pecan orchards on my way to school and work. Every summer we jump in the Rio Grande and float down the river. That is home, our home is beautiful and it's our job to protect our home and community. New Mexico has been an amazing state to live in we protect our community members and do our best to succeed. But if a data center is built you're not protecting the people you have promised to protect and serve. You're backing millionaires and billionaires pockets to take advantage of our home. Why is this up for debate? This data center will create temporary jobs for a life long consequences against our community. Our community members won't have water for their families, farms, and livestock. The air quality will drastically become worse and people who live near the center will have their ears pierced by the noise pollution the data center will create. Our community members don't want to back AI, project Jupiter will ruin the beautiful community of Don Ana.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026

William	Unknown	I strongly urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. The technology involved in this permit is untested at this scale, produces large quantities of hazardous, cancerous benzene, and the company providing the technology, Bloom Energy, does not have a history of credibility. This 'microgrid' would produce as much electricity as Albuquerque and Las Cruces combined, and completely undermine our efforts for sustainable green energy. as well as posing serious risks to air quality with untested technology This fuel cell technology has never been used at this scale, and emissions 'data' is based on a single unit running for a short time. This project would use thousands of these fuel cells continuously for months on end, with no emissions monitoring of each cell. This is equivalent of plugging it in and hoping that it's working, and NMED cannot and should not approve an application that relies on wishful thinking. These fuel cells aggregate the low levels of hazardous benzene natural gas, and once collected, those high concentrations of benzene need to be disposed of. Bloom has been involved in at least one lawsuit related to illegal dumping of the benzene their fuel cells produce, and they frequently misrepresent the facts related to their fuel cells in terms of performance, efficiency, reliability, and hazardous waste. It would be well worth NMED's time to review Hindenburg Research's 2019 report on Bloom Energy and investigating their claims before approving this permit. https://hindenburgresearch.com/bloom-energy-a-clean-energy-darling-wilting-to-its-demise/ This is being presented as 'green power', but only in comparison to worst case grid efficiency. There's no mention and no effort towards using solar-wind-battery combinations, which would actually be renewable and have more environmental impact, yet solar-wind-battery generation has been used successfully in other data centers. This permit application **needs** to be rejected. At a minimum a successful permit must include actual monitoring of emissions (particularly for an untested technology such as Blooms fuel cells), a clear and transparent disclosure of hazardous waste and disposal, and efficiency projections based on robust data. This application has none of these features, and poses a risk to the health and well being of my family and my young daughter.	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
CAROLINA	GUTIERREZ	Dear NMED staff, My name is Carolina Gutiérrez. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. It is well known that AI data centers consume large amounts of water and other resources to help upkeep and cool down their servers, however with the increased use of AI in daily life we're already starting to see the toll this is taking on our planet which brings up some concerns about the environmental consequences this poses not only for Nex Mexico's residents but for the entire world. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Carolina Gutiérrez.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026
Vale	n/a	My name is vale. I am a New Mexico resident, living in Carlsbad , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. Project Jupiter's power plant is said to release up to 10 million tons of climate-warming greenhouse gasses every year, this is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. Also the Santa Teresa Elementary and High School are located within five miles of this project site. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs, the Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. if you really cared about the people of New Mexico I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid,If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Sincerely, Vale	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026

Anonymous	Anonymous	Dear NMED staff,						1		No	[redacted]												
		I am in my early 20s and I'm this writing because I am worried about the hazards and dangers that Project Jupiter poses to the citizens, wildlife and, in general, everyone. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. Growing up I've always cared deeply about the environment and the impacts us humans have on our Earth, and with every year, technology is getting more advanced every day, most in a way that harm our environment. With the creation of this mega AI Centre, the impacts will only worsen regardless globally. I am concerned about my future which will only become more and more of a struggle every year because of global warming. And I am sure you are already aware that AI uses tons of water to cool the data centre down. This water is very precious and valuable to many and should be preserved as there's only a certain amount of clean water that we have on this Earth. This project is concerning for many reasons: 1800, it will produce a great amount of greenhouse gas and toxic pollutants. This technology that keeps getting taken advantage of generates toxic waste. The procedure for handling this waste is still not precise. This fast cell technology system hasn't ever been tried at this level. The air of surrounding communities will be heavily impacted by this project. I plead that the NMED reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the departments hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Please take this into consideration, Thank you.																						
Anonymous	Anonymous	This is such a horrendous decision. We don't need AI, we want to live and construction of this data centre and the procedures to manage it greatly damages our climate. Nobody wants to live in a would where going outside is impossible. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No		Yes	Yes	Yes	Yes	Yes	8/27/2026						
Sarah	Taylor	No development should come at the cost of a healthy planet and therefore healthy communities. This will affect EVERYONE negatively. What are we doing. No illegal dumping, stop ignoring community input. New Mexico Environment Department should give the public an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. Emmanuelle	coulombe	In three years, global warming will become irreversible; we have only three years left to change this, and this year marks our last "coolest" summer. Our environment cannot afford to keep deteriorating. The Jupiter project represents a waste of natural resources primarily water and harms the ecosystem; it is not essential for humanity's development. Approving this project would constitute government-sanctioned environmental racism, as the residents of Doña Ana County are already disproportionately affected by environmental pollution. These facets could indeed support infrastructure that help our ecosystem and protect vulnerable people. All that money could help feed families, so why use it to destroy our planet? We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous/abundant/many of	Mirend Document					1		No						Yes	Yes	8/27/2026						
Anonymous	Anonymous	Stop project Jupiter! Stop destroying the only planet we have. I am scared for my future. I want to have children someday and I'd like them to live on a healthy planet! Climate change is REAL!! This only adds fuel to the flame. We do not need it!!!!!! The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Maggie	Wu	I do not support project Jupiter in any way. This is a stolen planet you do not have the right to take our air quality so you can become just a few more billions richer added onto your already thousands of billions. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Trina	Witter	I'm writing to ask that you deny the Project Jupiter air quality permit application. Even though they switched to fuel cells they will still be emitting 10M tons of pollutants that are hazardous to human health. That is simply unacceptable in a rotation that already has some of the worst air quality in the nation. As a resident of Doña Ana county for over 40 years I've seen how the air quality has become worse and worse from manufacturing and climate change. Particulate matter from dust storms/haboobs, auto emissions from longwait times at the border, and now emissions from hyperscale data centers hovering here health effects on residents. Please don't let residents become victims of big tech who are only here to take advantage of residents. Help NM to be a leader in clean green sustainable energy. If it can't be denied please add on extra 45 days so residents can continue to ask questions about Bloom and their fuel cell technology.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Estefany	Broyles	We need to preserve all the natural areas as much as possible. Air quality is part of the natural areas. The more we clear the sky of pollution and reduce pollution the better we will have a good choice to protect ourselves. Company's could care less for the people. It is all about profit. Breathable Air will one day be nonexistent if we don't protect what we currently have. So no to project Jupiter. No to more unnecessary machines that is not environmentally friendly not beneficial to the people/where it will be built! The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No			Yes	Yes	Yes	Yes	Yes	8/27/2026						
Jayden	Mccurry	The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a "sacrificial environment zone" and this means our air quality does not meet federal government rules.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Bella	Sauer	The world doesn't need more data centers. We need to focus on the issues impacting humans and the planet we live on, not improving and empowering the technology that will take our place when we no longer have clean water to drink or clean air to breathe. I am deeply, deeply opposed to Project Jupiter and all infrastructure projects related to supporting it. It is documented that data centers are exceedingly detrimental to the environment. The vast amounts of water, pollute the air, raise temperatures, are noisy, and the list goes on. I do not want a lot of my bills to go up to line the pockets of the few. Our fragile ecosystems will be permanently damaged, farmers will lose no water, and communities will have no water. I will gladly go without AI to preserve our way of life. AI is a choice, but water, electricity, clean air are essential. No more data centers, no more scorching communities and the environment to law in the pockets of the few. Shame on all public officials who are trying to steamroll this through. I demand that the public be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. I demand that the air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. I demand that if the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. And finally, I want the NMED to know that approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Benjamin	Conklin	Project Jupiter, by its nature, is anti-human, anti-history, and anti-future. While on the surface, Project Jupiter and others of its ilk, will claim that human beings will only prosper as a result of their practices, it is obvious to anyone who thinks about the subject for any serious length of time, that people will become dumber, will lose swaths of jobs (eventually), and will fall deeper into becoming vassals of Corporate America (and thus the state). It is anti- history. This land has been occupied by Americans for over 300 years at this point. Ranches and businesses have been started, generations of traditions have been formulated. The land Project Jupiter wishes to destroy is, of course, just land to the big wigs in charge, but for the people you claim to represent, it is home. And more than anything else, it is anti-future. Let me paint a picture: A mom and woman drives to their new job maintaining the land and operations of one of the many data centers that have ruined the land their family once settled. They visited this job because their prestigious career in writing was eliminated in favor of AI language models who can do their job 24hrs a day heart and soul) for a fraction of the cost (only a few thousand gallons of clean drinking water!). They spend 6 hours making a marginal wage in a job they couldn't care less about so they can make ends meet in a country that has been invaded by corporate greed and third world cheap labor. Their homeland is unrecognizable, but at least they have their family. They get home (a home in a neighborhood of 600 identical properties on 1 acre plots the occupants could never imagine owning. They rent from the very employers who confiscated checks.) They check in on their children, who, of course, their mom would love to stay home and raise, but they need two incomes to survive. They see their kids finishing their homework. However, they're not doing the work, they simply plug it into the newest chat engine that they've been convinced to use. It spits out their answer in seconds, they upload their documents to their online portal where their AI instructor grades it. It's an A+! They are 6 students, who, of course, have spent 13 years of education learning nothing at all. But their grades don't matter anyway. What field are they going to get into? Art? Music? Accounting? No. Those are all gone. It's time to roll up your sleeves and follow in your parents' footsteps and maintain the data center grounds. They must work hard to keep their lives afloat. But what kind of life are they living anyway? One of no interest, no artistic prowess, no passion. They are just a cog in the machine to help transform a country their ancestors once recognized as a fresh start for their native people and human civilization as a whole to one where you own nothing, you have no family, you have no community, and dammit you'll be happy about it! Vote no on project Jupiter. Voting yes on this will impact all new resources in a negative way and it's not okay for our community or environment. These data centers will use water that we are already sparse of (i.a. no grande river being almost completely dry). Vote no on this for YOUR community.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Gloria	Abel	We keep saying that WE DO. NOT. WANT. it. Our environment is already on the verge of collapse, and ark we doing is making plans to speed it up. New Mexico Environment Department should give the public an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
DeWitt	Henderson	Las Cruces & El Paso already have some of the worst air quality in the nation, according to CBSNews, Las Cruces Sun News, and other sources. And my own observations over the past couple of years, especially, as it's gotten worse. So more air pollution from #930 source will be further detrimental to people's health in the area. It's affecting me personally.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Anonymous	Anonymous	I am against Project Jupiter, as I believe it will not be beneficial for the future of current and next generations and would speed up global warming drastically. This planet is our only home, we have to take care of it, not ruin it. Next generations will not have a job or stable life if they don't have a safe and healthy world to live in. The plant is dangerous, this fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air. Developers did not propose pollution controls, they estimated the plant's pollution based on tests from a very small unit (only 60 MW) but the power plant they want to build is 317,000 times bigger. A 30% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (carcinogens) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil. Bloom Energy has been fined a total of $1.45 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. Stop Project Jupiter, we cannot ruin the future of our children and our future by ruining the breathing air and environment.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Clyde	Miller	As a lifelong resident of Doña Ana County, I in no way want a large scale gas-powered fuel cell power plant to be built. Our community already struggles with poor air quality and rising temperatures and UV. Building this plant will only make things worse. The community that makes up Doña Ana County is so special and I would like for future generations to continue experiencing and growing the community. The long-term effects from these plants would not allow for that to happen. Additionally, it makes absolutely no sense to build a plant in an area where water is already so scarce. The amount of water these plants will use will significantly affect the availability of water in the county, further impacting this community. Building all of the pipelines needed for these plants would disrupt the natural infrastructure and would result in more risks to polluting the water and the air if any were to fail. Yucca Growth Infrastructure MUST be transparent with the residents of Doña Ana County and stop promoting these plants as an "environmentally safer" alternative. These plants will cause long-term, irreversible damage to this community.	Mirend Document					1		No			Yes	Yes	Yes	Yes	Yes	8/27/2026						
Dante	Paz	As a Doña Ana County resident I fully oppose Project Jupiter because I will be one of thousand's who will be directly affected by the data center. With living just within 6 miles of Project Jupiter my family is at greater risk for the adverse effects and negative impacts a data center of this scale brings with it. We CANNOT put our safe drinking water and clean air at risk for ANY amount of money. Our communities were fine before the data center and will be even better without it. If our leaders really represented and cared about their constituents they were elected to represent they would have never allowed this project to begin with. Our officials should be looking into and consider the data of real scientific studies on the adverse effects of hyper scale data center instead of considering how they can benefit financially from these data centers. The corporations that bring in these data centers have been caught lying about statistics surrounding these data centers in every community they have forced themselves into so by no means should they be trusted. In our drought prone desert region we have been told since I was a kid to conserve water and go green to reduce greenhouse emissions but our elected officials green light a project that does the complete opposite of what we have been told for decades. NOT ONE DROP OF OUR WATER SHOULD BE USED FOR DATA CENTERS. MAKE IT COMES TO DATA CENTERS THE CORKS OUT WHEN THE PRICEY TEN FOLD. Our communities do not need these data centers. We need safe drinking water and clean air for the future generations of our communities. For years I proceed our state on the preservation of our land and resources but have been disappointed by our officials. There is nothing environmentally about a hyper scale data centers. Other counties have seen past the money and put their constituents first I hope our officials do the same. When a project will produce more emissions than our three biggest cities in the state that should be a major concern. For years, Doña Ana County has been called a "sacrificial" zone–it; this means our air quality does not meet federal government rules. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. As a resident of Doña Ana County I strongly urge our officials to fully represent, listen to and stand with their constituents and put an end to the HARMFUL and DECEPTIVE Project Jupiter. - A concerned Doña Ana resident.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Brooklyn	Hartell	My name is Brooklyn. I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. As Data centers are causing too much harm to our water, our land our communities and our environment!	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Florida	Fernandez	Communities and our earth shouldn't be put at risk just for something that humans have been living without for years. A data centers shouldn't be prioritized over the wellbeing of the people people and other living things in the planet. Why should people risk their communities and basic things like water just for the benefit of billionaires? While billionaires have money to be able to live without worry of how to this inevitable climate change there are many people who lose their homes and animals who die and arergoing into extinction. As data centers shouldn't be a priority and a necessity when basic things like water, clean air and species who keep our ecosystems functioning are put in a high risk. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Shayna	Mason	At data centers like Project Jupiter are massive contaminants of both water and energy, which can strain local resources and further contributes the climate crisis. It violates wildlife species and their habitats. This could cause irreversible harm to our ecosystems which can eventually lead to problems like: animal extinction, climate disruptions that will affect nearby species and communities, and not to mention the Doña Ana Ana County already has a failing grade for ozone–which causes asthma attacks, increased risks of respiratory issues and even increased the the risk of premature death. I would love to dive further into why this is a catastrophic decision wanting to happen. I'm highly positive that a lot of research or just seeing the permit is enough to understand why the public and people do not want this. Given what I've said: the public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably AND if the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Thank you, and please reconsider approving this permit. For the future of our generations. -Signed, a fellow 18 year old who does not want data centers or greenhouse gas emissions to be installed on the lands, to prevent climate catastrophe from losing our future.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Lou	Kay	The world will not be a better place if we have more AI. Southern NM will not be a better place if we have Project Jupiter. Even if it could do all the good things they claim it will hurt the environment and will reduce the number of jobs with the AI. Please protect our world, our environment, and our culture. Do not allow Project Jupiter to exist. It will use a tremendous amount of energy if it is allowed to be built. This will cause the release of at least much CO2, leading to even more global warming. Our part of the world will suffer the most out of the entire part of the world and suffer more.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Anonymous	Anonymous	If project Jupiter goes into place, New Mexicans would only continue to suffer due to an even greater depletion of resources. It is an incredibly irresponsible choice for an already struggling environment and population. New Mexico Environment Department should give the public an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Ramiro	Lugo	As a life long resident in Las Cruces/Doña Ana County I value clean air, clean environments conserving family as well as conductive homes where I have contributed taxes not only personally but from my numerous businesses. I adhere to strict guidelines to ensure the safety of my community so should everyone else!!! Even if they have Billions of dollars!!! The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Paola	Diaz	This will ruin the environment more than it already is. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Ethan	Fichtenstick	I don't want my future to be better than it is now and we can all live without AI. Pollution has been a problem for decades why make something that would put off that much carbon pollution. New Mexico Environment Department should give the public an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No						Yes		8/27/2026						
Milena	Lewis	I am absolutely not in support of this data centers and this permit shouldn't be approved. The way that they are sidestepping regulations by using a half baked fuel cell system instead of fully committing to sustainable energy options is disgusting. This community is already water scare enough and allowing a data center while limiting water for residents is hypocritical. Do the right thing for the community and deny this permit	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Hannah	Hannah	We do not need AI, humans have survived so long without it why make us humans and all species of animals extinct. The world if fine without AI. Why not use that area as something else other than a data center, use it as a wildlife reserve or anything other than something that will destroy us. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirend Document					1		No						Yes	Yes	8/27/2026						
David	Rutledge	My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible option moving forward are to deny this air permit or you must hold a public hearing in person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. The yet surrunderstood side effects of all of these types of data centers with their corresponding noise and sight pollution has yet to be assessed adequately. It is very important to determine the actual side effects that will impact the community and the natural wildlife.	Mirend Document					1		No						Yes	Yes	8/27/2026						
Annie	Bringhaus	I was born and raised here in Las Cruces. I do NOT want this project in my home, nor do I want its pollution. We cannot afford this continued destruction to our land, air, and water. We cannot afford more fossils fuels to be burned with the damage that it is already happening to our climate. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. This permit application should be denied. If not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. This is a project brought on by billionaires. This project will NOT bring any benefits our community. I urge you to deny this project. The community does not want this. Deny this project, please.	Mirend Document					1		No			Yes	Yes		Yes	Yes	8/27/2026						
Anonymous	Anonymous	I'm not from New Mexico so you can see, but, why? Why destroying the limited water those communities have? Yes, eventually we need to improve, but it's not necessary to destroy. The air is necessary for our very existence, and with Project Jupiter Data Center our air will be contaminated a lot, and when I say a lot, it's a lot. I'm writing this comment to try my best at supporting those communities in New Mexico and try to stop the construction of the Data Center, but, I can't do it alone, so, we need to unite, we need to understand that, united, we can do it, we need to forget all of our differences and unite like a community, so, good luck to all those people trying their best to stop this project and good luck to all those residents of New Mexico	Mirend Document					1		No			Yes			Yes	Yes	8/27/2026						
Ana	Baxter	Data centers are awful for human physical and mental health, pose hazards to surrounding wildlife, and are destructive to the environment. They not only contribute to noise, air, and water pollution, but they are a direct contributor to climate change. Do not go through with this project, and if there is still question, I request that a public forum be held with supplemental materials for those who do not speak english, and with enough notice (60 days) for all community members to have an equitable chance of participation.	Mirend Document					1		No			Yes	Yes	Yes	Yes	Yes	8/27/2026						

Abigail	Ostic	Our communities are already suffering from a lack of natural resources. You can barely float down the Rio Grande, a pass time that was enjoyed by thousands of New Mexicans a year to cool off during the summer. It is not justifiable to allocate our limited resources to a corporation when the citizens, generations of New Mexicans, continue to suffer from the drought. The agricultural communities, which are integral to our local economy, would also suffer if, in time, they are restricted to fewer resources to the data centers benefit. I find it crucial to add that just because Project Jupiter uses "less water" and "cleaner energy" it does not negate the AMOUNT of energy and water used. You are asking New Mexicans, most who already struggle to provide for their families, to sacrifice their resources for a "better tomorrow". Well, there will be no better tomorrow if there is no clean air, no clean water, and utility costs rise. New Mexico is not a place for a data center. When we value artificial intelligence over human intelligence, human life, and human rights, we have failed as a society. I beg you not to look at the money, not to be greedy. I beg that you look at the bigger picture and the larger effects. Sure, the negatives won't happen all at once...but they WILL happen. New Mexico officials should prioritize community needs over corporate ones. As a born and raised New Mexican, it exhausting seeing the state and even my county break their back for million dollar payouts and not for the best interest of their constituents. Putting an end to Project Jupiter and their lies would be in the state's and environment's best interests.	1		No	[redacted]									
Kaitlyn	Felder	We are in a historic drought here in the middle of the state. South is even more hot and dry. This data center is honestly more of a worse decision than me marrying my abusive ex husband. The air quality already sucks, we have little water, and you are destroying native wildlife. No one asked for this. No one asked for AI. No one wants to pay the price for generations because you wanted to make a buck.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Tommy	Hernandez	I believe that project Jupiter is extremely dangerous and completely unnecessary as it will harm and disturb wildlife and people. The water intake that this center uses is fresh clean water that we drink. I say no to A.I. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Anonymous	Anonymous	Im just going to start this with how unnecessary this data center is, the data center that you all are currently building has so many flaws that i believe aren't being taken into consideration, the high amount of greenhouse gases going to be released is already concerning enough, your building a center in an area that already does not meet national air standards and is already being polluted to its max. Building something that we didn't need or changing how its built or how it's run doesn't change the fact that it still is dangerous for the people living in the area or the elders and children that have fragile health, you are putting thousands of people at risk and are not proving in any way that this data center will be good for anyone even the people who are willing the construction of this data center on, you are bringing more risks to an already fragile environment and world. Thousands of people will and are being impacted by project Jupiter even before its construction began, Rio Grande is already drying up before summer even started and continuing project Jupiter is just bringing on and allowing climate change and global warming to continue its life threatening and environmental impacts on to its max, our world and people can only support so much and continuing construction for project Jupiter would only be selfish and gives people no more reason to trust or believe that adding onto global warming for a data center is good for anyone. Over 47,000 animal species are already being impacted by global warming and have moved from being vulnerable to endangered and you are adding on to this problem and if that data center is done building it will only bring those species from already being endangered to critical endangerment or even extinction, these animals play big roles in our life and the world that currently surrounds us, continuing project Jupiter would only mean that those animals will go extinct and cause even more harm to entire food chains and ecosystems. If that sudden change happens then you are not only endangering those animals and ecosystems but humans that you think rely on that data center. In the end you are harming more them just ecosystems but yourself that "rely" on project Jupiter and the food, water, and air that everything on this planet needs. You may think that building this data center "isnt that serious" but it is, animal species have gone down by more then 50%, droughts and trouble growing crops has tripled and areas struggling to have sufficient amounts of water has also gone down by more then 30%, air pollutants and the amount of CO2 in our atmosphere have gone up by 25%, people struggling with fragile health due to air pollutants is rising especially in new Mexico where project Jupiter is being built. Stop project Jupiter before you do irreversible damage to the world we apparently love.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Samantha	Martinez	We already can't afford to lose good water to a data center, but the air pollution and threat to the area poses a second threat, we need to protect our air as the climate heats and we are more likely to experience changes in weather patterns or bad winds, this will affect not just rural populations but many.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Kiaya	Burfoot	We do not need more data centers using our limited water and further polluting our air. We need to take action to prevent hurting our planet further. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Lourdes	Cazares	I've lived in New Mexico my whole life and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I want to ensure the quality of life for the future generations. We can't leave them a broken home. A broken environment. It breaks my heart when I realize that my younger sister will never enjoy the cold winter snows in New Mexico. Because of the drastic temperature changes I have seen from my childhood to adulthood, I plead that you deny any infrastructures that may damage our precious earth and animals. We cannot be destroying the one place we've always called home for some spare change. Our future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. This has been the hottest summer with El Super Niño threatening various places with extreme heat waves. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How are we supposed to want children knowing we will only birth them to a doomed world? One where they can't breath clean air or drink purified water. What's more is that nothing guarantees that the pollutants will be dumped elsewhere to be found once irreparable damage has been done. This choice will not only impact farmland and nearby communities, but it will also impact your children and the children of your children. You will leave no safe place for your future generations to stand on. It isn't just a concern for New Mexico residents as it is for everyone nationally if this thread continues. Bunkers and private water tanks won't save you when the world is destroyed. When the last tree has fallen, when the rivers are poisoned, when the air is unbreathable, your money won't save you.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Evalina	Javorsky	I do not approve of the world's largest data centre Jupiter being built. Not only would this disproportionately harm indigenous people of the New Mexico Area, but it directly goes against New Mexico's Environment departments mission to protect rather than harm. These are being build everywhere under our noses and the people will not stand down to these lobbyists and CEO's trading our land and clean drinking water for the money lining their pockets. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes			8/17/2026
Adriana	bencomo	My name is adriana I am a New Mexico resident, living in Carlsbad, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. A bigger slap in the face for the NM community is that Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. Also Fuel cell technology hav not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. The Application is based on pollution testing from a very small unit. The testing unit is only 65kw, while the power plant is 37,000 times that size. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the desulf canisters is exempt from air permitting regulations (because there is less than 1000 lbs/yr). I urge the NMEDto outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that reside	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Danielle	Bouchan	I AM AGAINST PROJECT JUPITER! IT DAMAGES OUR ENVIRONMENT AND WE ARE NEARING A SUPER EL NIÑO. THAT MEANS DROUGHTS FOR AN ALREADY WATER SCARCE REGION.	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes	8/17/2026
Anon	Anon	Stop Project Jupiter. I prefer to live in a world where I dont have to hear news about endangered animals or plants, pollution, global warming, etc because of this bumass project. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Dexter	Hafdahl	AI is inherently bad for humanity and Earth. The data centers further commit matricide against the planet that gave us refuge against the cold wastes of outer space and fed us and gave us nutrients and freedom and intelligence. The "art" AI creates is not true art. There was no effort or soul or feeling or thing to communicate. There is no society if it can not spread ideas through art. I live in the continental deciduous forests of North America. It has been very hot out recently. Sometimes too hot to go outside for more than a few minutes. It's not supposed to be this hot and dry.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I am asking that you deny Yucca Growth Infrastructure's air quality permit. The future of not only New Mexico but of the whole country and the rest of the world is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering that will be endured as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to the active and long-time nonattainment zone would be nothing short of blatant environmental racism. The metro area is already 16th worst in the nation for ozone pollution and it has received a failing grade on this air quality standard every single year since 2000. It is unacceptable to invite a new source of hyperscale air pollution when there is already an unresolved problem with contaminated air. The carbon dioxide pollution alone will heat the atmosphere at a much faster pace and promote the formation of even more ground-level ozone. The people and the rest of the world cannot afford more intense heat as global warming keeps rising. We only have 3 years until it hits the 1.5C threshold and there is no reversing the damages of climate change and that point. What will happen then when projects like this help end the human race? In this area, there are already toxic air pollutants which are extremely dangerous–many of them at very low levels. How are people supposed to go out knowing the kind of air they're breathing? Knowing it can cause permanent brain damage or breathing complications. The safety of the community should be worth more than the profits of out-of-state corporations. Furthermore, fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into public landfills, and will someone notice? A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive	Yes		Yes				8/17/2026
Hannah	Werner	My name is Hannah, and I am asking you to deny the air quality permit for Project Jupiter. This massive project will have extensive long-lasting and irreversible impacts on our environment. Data centers of any kind have recorded noise pollution as it is, and the impact on air quality is also deteriorating. I am strongly against this permit, as it will do significantly more harm than any good that Project Jupiter claims it can bring to the community. We need an extension on the public comment period, as well, to enable full access for the community to provide their input on this request. Additionally, if the permit does not get denied, we deserve a public hearing, in both English and Spanish, with online call access available. The people deserve to have their voice heard for such a massive commitment of our environmental resources.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Jean	Rivera	I am a firm believer that Project Jupiter should not take place and the public should be given 60 days to review and comment on the air quality permit so residents can participate. I also believe that, due to Bloom Energy's history of illegal dumping hazardous waste, the permit application should be denied. If the permit is not denied, a hearing should be held in Santa Teresa in both English and Spanish, with an option for participants to attend virtually. Approving this permit would absolutely be environmental racism, , since residents of Doña Ana county are already impacted by the pollution. This project will use the water they need in their communities, and destroy their ecosystem.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Daniel	Cruz	Me and my family are tired of the consistent damage that ai is doing to our planet earth, "project Jupiter" a project we don't need nor we will never need u dare say no water will be needed or be used but are we the people to believe that, no, if we take a moment to look into ai data centers it's mostly runned by our water usage if we were to combine the amount of water ai has used that would be enough to give this whole world a cup of water or more and even if you people don't use our water supply this planet has given us u must be aware the damage that is gonna do imagine all that pollution it will create ur taking space from animals that was meant for them as well climate change will soon ruin this planet if we don't take matters into our own hands and yet all yall care about is a stupid let alone project what good is that gonna do the earth think about the damage it's going to be creating.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Douglas	Geusz	I don't think this data center will effectively control its emissions. Even just the higher draw on the electric grid can create emissions away from the data center itself. I don't think the data center will provide enough benefit to New Mexico to account for its environmental and energy costs. I strongly oppose this development, and the people involved have proven that they intend to skirt regulations and cut corners wherever they can.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Jennifer	Chay-Aguilar	Dear NMED staff, My name is Jennifer . I live in Georgia, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a college student who cares very deeply about what our future will look like!! As the government continues to control what they implement on the people in all places of the nation, it really worries me that many of these government people do not seem to think about the future for the young generation! Money money money and more money seems to be the priority here and clearly money won't keep us alive as the environment deteriorates AND WE ARE THE ONES CAUSING IT. Please reconsider and stop this at once! The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, JENNIFER CHAY-AGUILAR	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
Anonymous	Anonymous	What is the point in having a data center in New Mexico when we don't have a lot of water for our own community as is? This is incredibly detrimental to the locals and I for one do not want to have to deal with further water issues and potential noise complaints along with light pollution.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Harper	Anonymous	We are the first generation of people to experience the hazards of global warming, climate change, and heavy pollution. We are also the last to stop it. Project jupiter will ultimately put a huge amount of carbon dioxide into our air and cause more pollution. The effects of this project will have no benefit for our planet whatsoever. WE CAN LIVE WITHOUT AI!!! What we cannot live without is clean air, fresh water and natural resources that are being destroyed. We need to stop this before the damage we have done will be irreversible. This is my public comment to destroy project jupiter. We are the first generation of people to experience the hazards of global warming, climate change, and heavy pollution. We are also the last to stop it. Project jupiter will ultimately put a huge amount of carbon dioxide into our air and cause more pollution. The effects of this project will have no benefit for our planet whatsoever. WE CAN LIVE WITHOUT AI!!! What we cannot live without is clean air, fresh water and natural resources that are being destroyed. We need to stop this before the damage we have done will be irreversible. This is my public comment to destroy project jupiter.	1	Merged Document	No	[redacted]			Yes		Yes	Yes			8/17/2026
Anonymous	Anonymous	A feul cell plant of this size has NEVER been built before. The damage that will be caused to the environment is unprecedented. The people who populate the surrounding area with be profoundly affected. The public should be given 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit should be denied given Bloom Energy's history of illegally dumping of hazardous waste. If the permit is denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as Residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years Doña Ana County has been called a "nonattainment" zone. This means that the air quality does not meet federal government rules.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Aiden	Heany	we cannot allow further development of any ai data centers, especially ones developed in or around communities that can do nothing to adapt or compensate for the terrible effects these centers due to their lack of funding or information on the subject. Developing any single ai data centers means millions of gallons and megawatts taken away from every day people that is necessary for survival. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Ada	Salazar	As a resident of an already drought-prone area, i firmly protest the existence of data centers. Projects like Project Jupiter will not only destory our environment, but also split apart communities and further the gap between rich and poor areas. If your idea of progressing society economically consists of making lower income areas absolutely inhabitable, then you are bound to run yourself into the ground and ruin our environment completely. How do you expect to gather support and recruit employees if the only people who would ever work for you are people of the working class? What will you do when you have completely polluted communities, destroyed air quality, and effectively ruined the lives of everyone who would ever even think about working for you? For the sake of everyone, including yourselves, do not go through with this project. Deny the air quality permit, allow the communities that you are effecting with this project to give their opinions on it, and actually do your jobs for once. Sincerely, the entire working class and all nearby communities of data centers.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
anonymous	anonymous	The people of this communities health and safety should be worth considerably more than the profits of a mega corporation. Project Jupiter's Fuel Cell Air Quality Permit should not be approved. It prioritizes corporate expansion over public health and environmental responsibility. Although the project is promoted as a cleaner alternative to traditional power generation it would still depend on natural gas. Labeling the project "clean" does not eliminate the reality that it would add new emissions to a region already facing many environmental challenges. Approving another fossil fuel facility sends the wrong message at a time when communities are demanding investments in renewable energy rather than infrastructure that extends dependence on natural gas. Residents deserve clean air, greater transparency, and stronger protections than those offered by the current permit. I am asking that you deny Yucca Growth Infrastructure's air quality permit. Not only for the people in this specific community, but for the safety and health of all of us.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Rachel	Simmons	Hello, The proposed data center Jupiter will have direct negative consequences on the environment and air quality. It is imperative that it's progression is stopped before further damage is caused to the ecosystem. As a person who shares this planet, we cannot afford to have any more data centers. They have been shown to take significantly more than they could ever give and leave the areas around them dried out and destitute. Please oppose this data center.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Anonymous	Anonymous	Bloom Energy's Fuel Cells are not clean energy - no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
Anonymous	Anonymous	STOP ORACLE AND OTHER AI DATA CENTERS FROM DESTROYING OUR PLANET! There are heat waves occuring everywhere right now, overseas in England, New York City, all across the US and where I live here in the States. We need to hold these companies accountable. If they want to put their data centers on our land there needs to be a long and lengthy research process to ensure that they are not polluting our environment. Noise pollution and the use of clean water are very pressing issues when it comes to these data centers and especially a large one would disrupt the ecosystem terribly. We may be celebrating 250 years now, but how will the future generations celebrate the beauty of our nation if it is all dried out and they have splitting headaches from the noise. Please allow for more time for the public to comment on this matter, but also please consider not allowing this behavior to be condoned. Please protect our planet and all the people of New Mexico. Check the credibility of those who you'd be working with, but also the results of other places and the harm these data centers do.	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes	8/17/2026
Camila	de leon	Stop this! You're going to raise the climate more than it already is. And you're trying to tell us this wont harm a thing. This is exactly how you ruin the planet! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes		Yes	Yes			8/17/2026

Gloria	Duran	Hello NMED staff, My name is Gloria Duran. I live in Las Cruces, New Mexico. I am writing to express my concern about the health risks and environmental damage Project Jupiter poses to New Mexicans and our home alike. I hope with my entire being and with the power of our savior Jesus Christ that the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. They are actively targeting our Hispanic and tribal communities with their emissions of NOX, CO2, and VOCs. Why don't they go build in California by Erewhon so celebrities and the rich can breathe these fumes? Oh, well because they have money and can send them elsewhere, like to OUR underfunded and underrepresented communities. BLOOM Energy ruined Pennsylvania and will absolutely decimate what is left in our flower of the desert, Doña Ana county. I am active participant in my community and would hate to see our children all grown up, but suffering in hospitals later in life due to an officials who serve without a conscience. "Others, as most legislators, politicians, lawyers, ministers, and office-holders, serve the state chiefly with their heads; and, as they rarely make any moral distinctions, they are likely to serve the devil, without intending it, as God" (Thoreau). Do not serve the devil. Reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Calling it a microgrid is an understatement of the century considering its MW capacity is 2,462 which almost matches that of the El Paso electric grid that serves my city of Las Cruces 2,900. Please hear the people's voices, we do not want ANY Yucca Growth Infrastructure in New Mexico. Sincerely, Gloria Duran	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes	8/17/2026
Adriel	G	Dear NMED staff, My name is Adriel. I am a New Mexico resident in Bernalillo County, writing to express the unacceptable harm that Project Jupiter poses not only to New Mexicans, but to humankind as a whole. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Right now, across the United States, data centers for generative AI are severely reducing Americans' quality of life. Communities, particularly in underserved areas, are being deprived of potable drinking water because of data centers' outrageous water consumption— and here in New Mexico, in the desert, we cannot afford to further limit our access to clean water. Furthermore, as I write, dozens of countries are experiencing a heatwave directly attributable to anthropogenic climate change. The people of New Mexico, and of the world, deserve responsible environmental stewardship and energy usage, not another data center. The project's proposed fuel cell powered grid would produce a high level of greenhouse gases and toxic pollutants, worsening air quality, exposing New Mexicans to airborne toxins, and worsening our climate change crisis. In addition, this technology generates toxic waste, and the process for handling this waste is still unclear. Proponents of Project Jupiter claim that it would create much-needed jobs; however, the risk implicated in those jobs, in prolonged exposure to toxic waste and airborne particulates, is unacceptable. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. Residents of Doña Ana County are already disproportionately impacted by environmental pollution: approving this permit would expose them to even more pollutants and toxins, which I hope you'll agree is entirely against the mission statement of the NMED. Sincerely, Adriel	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
Linnley	Eldridge	We can live without ai. You can live without making your shitty images, start writing yourself and make your own ideas. You're losing creativity. YOURE ruining OUR earth, and it'll be thanks to you. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes			8/17/2026

Lily	Anonymous	This project needs to stop, these data centres are ruining the Earth and are almost uninhabitable for the population around them. They are taking our clean drinking water, creating insane noise population and are unnecessary. The use of AI has gotten insanely unhealthy, and somethings needs to be done. We need restrictions and we need to stop it while we are ahead. PLEASE STOP PROJECT JUIPITER. Stop climate change. SAVE PUR PLANET AND SAVE PUT HOMES	1	Merged Document	No	[redacted]
Mattison	Bock	Ai should not be taking over the world, especially when all it does is destroy. It causes air pollution, noise pollution, droughts, raises energy costs for poorer citizens, Causes plants to stop growing to the sound vibrations and even has evidence of effecting the fertility of local wildlife, and what is all of this destruction for?! A few job/ (barely even 50) and for people to make ai images of hot girls and steal data. As a citizen, I saw cancel project Jupiter for the future of humanity and for the sake of future generations still having a planet.	1	Merged Document	No	
Anonymous	Anonymous	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone.To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you. This is unnecessary. Don't do this to the environment.	1	Merged Document	No	
Juan	Campos	I am a resident in California and I am worried for my residency here in California. It can lead from one state to another and I want a change because we don't need these data centers to survive but we need the things that the data centers need to survive.	1	Merged Document	No	
Claire	Bernard	I do not live anywhere near where this is being proposed, but I am an advocate for the environment and the wildlife that use it. The community needs to be given a fair chance at fighting this, as they will be most affected by its consequences. The public needs 60 more days to review and comment on the air quality permit so community members can participate equitably. Not only that but it should be denied due to BLOOM's problematic history of illegally dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. It should also have the necessary interpreters in ASL and Mexican sign language. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. America is losing our desert ecosystems at a devastating rate and this could be catastrophic to this areas climate. Desert wildlife is so sensitive to changes that there would be no coming back if this were to be approved.	1	Merged Document	No	
Isabela	Dominguez bello	My family's health and safety should be worth more than the profits of out-of-state greedy corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Merged Document	No	
Anonymous	Anonymous	I am writing as a concerned resident because I believe protecting our environment should come before corporate profit. While technology and economic development are important, they should never come at the cost of our planet, our air quality, and the health of our communities. Climate change is already affecting people across the country, and approving a project that could produce millions of tons of greenhouse gas emissions each year sends the wrong message about our priorities. I am also concerned that this fuel cell technology has never been used at this scale and that there are still unanswered questions about how the toxic waste it generates will be managed safely. Families living nearby deserve clean air, transparency, and confidence that their health will not be put at risk. Future generations should not have to deal with the environmental consequences of decisions made today simply because they are financially beneficial to a private company. For these reasons, I respectfully urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I also ask the department to hold a bilingual public hearing near the Santa Teresa community so residents have the opportunity to fully understand the project and voice their concerns before any decision is made. **Sincerely,** **Anonymous**	1	Merged Document	No	
Emanuel	Holguin	For a city that's already hot as is, with the humidity I wouldn't even want to be outside. For the people of El Paso and Las cruces, we are all one. This goes for anywhere though, these aren't natural resources being put in our environment, and to think of putting it right next to a big city is right is crazy unfair and overly bias, money is not happiness, and thats the main reason to this cause, they don't actually care about the people. It's all about money, not job opportunities. If they really cared they wouldn't be polluting our daily necessities like our air and water that's being used by millions. Our area is being manipulated and controlled by money and greed, last time I checked, we still have rights, and I'm pretty sure polluting and loitering our air and water is illegal.....	1	Merged Document	No	
Pricilla	Lopez	As a born and raised New Mexican, I am strongly against Project Jupiter. This project is not good for the environment for the people and for our state AI data centers take hundreds of gallons of water. We are already in a drought. The real grand is dry. I have lived here my whole life and I've never seen completely dry two times in a Calendar year. Not to mention that AI data centers affect the and will rise temperatures by at least 2°C. We are already a hot state with rising temperatures. We don't need an AI data center adding to that. AI is not ethical and not fit for New Mexico.	1	Merged Document	No	
anonymous	anonymous	project jupiter revised their water usage from 7.2 million gallons per year to 1 million gallons per day. New mexico is facing a water crisis. Also the air is currently under threat because of this massive AI data center. Nearly 500 tons of nitrogen oxides is produced per years if this permit is signed. Nitrogen oxides are one of the main ingredients of smog which can cause heart and lung disease and many other health issues.	1	Merged Document	No	
Hayden	Fox	We don't need AI, we need water and actual trees and life on the planet so our ancestors can continue to take care of the earth Building this data centre will excessively decrease our chances of survival on this planet. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Merged Document	No	
Kadyn	Romo	Project Jupiter will put New Mexico in unnecessary danger. New Mexico is already in a drought building a data center will make our water resources scarce. Las Vegas is already having water troubles due to the fires we are too dry of a state to be adding this center. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	
Rachel	Simmons	Hello, The proposed data center Jupiter will have direct negative consequences on the environment and air quality. They have been shown to take significantly more than they could ever give and leave the areas around them dried out and destitute. Please oppose this data center.	1	Merged Document	No	
Olivia	Council	I am a resident of Bernalillo County and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many friends and loved ones. My neighborhood has plenty of kids that, yes, can be annoying but nevertheless deserve to live in a city with breathable, harmless air. Our futures are threatened by this proposed air quality permit. Changing fuel cells won't mean a thing in the face of 10 million tons carbon dioxide pollution. 10 million??? Wild. We're already the 16th worst metro area IN THE NATION for ozone pollution. Doña Ana, the county that would be most affected, has been labeled a "nonattainment zone" for years. Allowing a company with a history of illegal hazardous waste dumping to set up in a county that is FEDERALLY RECOGNIZED as having poor air quality is government-sponsored discrimination. If the public outcry is ignored and the permit is granted, there needs to be a public hearing in English and Spanish held in Santa Teresa, so the people you're putting these environmental pressures are can look y'all in the face. Project Jupiter can drop as many candy-colored pamphlets on my doorsteps as they want, they go right in the recycling. They can waste paper, but they will not waste our air.	1	Merged Document	No	
Esme	Mar	Fuel cells create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	1	Merged Document	No	
Elizabeth	Jeffers	Hello, I have had great concern over the past few months about the rise of data centers and the detrimental environmental harm they are causing. We only have this one planet and we're killing it. Heavy water usage, greenhouse gases, the strain on the electrical grid, it's all avoidable. We do not need more data centers. We should be protecting and healing our lands. Not sucking the life out of it. I strongly urge you to reconsider Project Jupiter and use your influence for the better of the world and its people. Not just the select few at the top. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Thank you	1	Merged Document	No	
Samantha	Petersen	I'm writing this because I believe we have a choice, and too often we choose convenience over consequence. Project Jupiter is a proposed data center that will consume electricity like a small city, and I'm skeptical of "100% renewable" claims that often mean buying credits rather than actually using clean power. It will also use millions of liters of water for cooling in places where communities and farms already struggle to get enough. On top of that, these projects are announced with grand sustainability promises but no binding commitments, no third-party audits, just press releases. I'm not against technology, but I believe people have a right to know the real cost of the infrastructure they depend on. If built carelessly, Project Jupiter will add to the climate crisis, strain local water resources, and leave behind e-waste and broken promises	1	Merged Document	No	
Anonymous	Anonymous	We want to live. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.	1	Merged Document	No	
Yaser	Al-Khateeb	What do the idiots who are thinking about approving this genuinely think is going to happen if they approve this? You can literally feel the climate change this summer and your first thought is to approve another data center? Are you genuinely incompetent or just brain damaged? This data center ALONE will release 10 million tons of greenhouse gasses, more than the 3 largest cities in NM COMBINED. COMBINED! The difference is people live and work in cities. This generates minimal jobs and provides essentially no economic benefit unlike cities. Additionally, where are you going to get all the electricity to power this data center for? The unproven fuel cell technology that has no garuntee it will work? That generates toxic waste? Or are you going to sacrifice everyone else in the state to power this monster? What about the schools and daycares in the area? Children with developing lungs or staff and minors with respiratory issues? What happens to them? The NMED's mission is to supposedly "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations.". This data center goes against all that. AI doesn't even make money. The loser Sam Altman who started this ai bullshit and open ai is literally bleeding money. There are no reasons for the construction of this data center. If you approve this, you will cause nothing but destruction to NM's ecology and to its people.	1	Merged Document	No	
Anonymous	Anonymous	Why are we trying to contaminate the air more?, we should be trying to stop things as much as possible instead of trying to make it worse, why do you think we were born on Earth? Because it's our home and our only home, and that should be respected especially for the millions and billions of people who DONT want the data centers, we were perfectly fine without them before we can be again. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	
Jose Daniel	Rave Usuga	From the name and address you must have infered that im from outside the united states, and that's right, im from Colombia and i would like to be something like an activist so this little like doing forms againts this type of horrible proyects is a step i must take to accomplish my goal. :) Stop project jupiter The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	
Cali	forrester	I'm from Kincardine Ontario Canada. I may not be immediately directly affected by this but, A.I. is contributing to a large percent of water usage that hurts ecosystems that can be very fragile. A.I data centres already using up many water sources in areas where they are, and with this proposed mega scale project of A.I. centres it's gonna use a lot of water and, personally I don't think it's fair to replace the usage of water going towards real living beings and things and give it all to A.I. robots instead to keep them cool. this will also produce more C02 wich will add to global warming temperatures as well as cost probably millions of dollars that could go towards other more important things	1	Merged Document	No	
Veronique	Moore	The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? Has there been or will there ever be upstream fuel testing of methane gas to anticipate the composition of these fuel cells' emissions? How exactly will NMED enforce emissions standards without direct, long-term, continuous monitoring? Or isolate their deleterious impact on air quality without an accurate assessment of localized pollution? A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC. A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This project will inarguably have massive, potentially devastating climate impact. Without accurate ways of measuring this impact it effectively washes its hands of accountability. If we keep treating our planet like an industrial playground many will die firsthand from droughts, climate events and pollution, others will be taken by the war or disease stemming from it. Not to mention that land ownership is a human concept, other beings that lack this capability have no way to combat what occurs on their shared land. If we create superhuman AI that thinks freely and with alien goals and problem solving methods and capable of sidestepping human safeguards by its very nature, frankly, we will all die. The perpetuation of datacentres is incompatible with life and the window to intervene is closing. I ask that the following be considered: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	
Cydnee	Guilford	Dear NMED staff, I am writing to you because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a young student who has learned extensively about the environment and how it has been recently affected by the A.I Data centers being built across the United States. I am concerned about this A.I Data Center in New Mexico because there have been multiple examples of A.I Data centers polluting the environment around them which has depleted water sources and infected communities near these A.I Data centers. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Cydnee Guilford	1	Merged Document	No	
Anonymous	Anonymous	STOP CONSTRUCTION OF DATA CENTRES! They are destroying our world, using our clean water, contributing to global warming, decreasing air quality, and eliminating nature areas. This needs to stop. It is killing the Earth and hurting all people and animals. Stop construction now and fight to preserve and save our environment. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	
Isabella	Corea	Please take into consideration the mass amounts of suffering not only the people of our communities will face but YOU as an individual will HAVE to go through as well. This isn't "progress" and shouldn't be seen as such. This is only deteriorating our planet and the very little water we have. You have to understand we won't be the only ones suffering. You will too, your family, your friends, we ALL will suffer as the human race. This power plant will equate to 23 atomic bombs in pollution a DAY. ONE DAY. Do you not comprehend how quick that is? Our atmosphere already is burning away as we speak, we do not need to speed up the process of our extinction. The earth will continue to live but we as people will not if we continuously allow these things to be done because you want a little money in your pockets. Truthfully more money is being wasted building these data centers and the usage of them. Please think carefully about the future of our world because truthfully we are already seeing the affects of climate change now, look at how hot is in in Europe. People are dying and this isn't going to help fix anything. We never needed AI before and we don't now, our literacy rates are dropping to new lows, our animals are dying and our water is being wasted for something so stupid. AI has no need in this world when we can think and provide for ourselves. Please understand how important this is. Thank you.	1	Merged Document	No	
Natcely	Cardenas	I recently traveled through new mexico, from dona ana to Colorado, along the way we saw a lot of project Jupiter representatives claiming to have a petition for cleaner water and air. You have to read the fineprint to see its really to help push project Jupiter through, and their representatives are obviously lying. This document and the ones presented by project Jupiter look extremely similar, as a heads up that they are trying very hard to manipulate their plans to go through. I have asthma and breathing problems run in my family. I also happen to be human so clean drinking water is a little necessary to me. Actually a lot necessary i happen to die without it	1	Merged Document	No	
Anonymous	Anonymous	My name is Anonymous. And although I am not a New Mexico resident, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. We all depend on this earth so much and data centers are only going harm it in the long run. I don't know about you, but I want a future, not only for myself but my loved ones and future generations in general. Our planet is already at risk enough with climate change and global warming already showing massive affects, these data centers will further threaten humanity's future. Water shortages are already happening around the world, building centers like this is only going to add to the problem, not reduce it. Our planet's health should 1000% be prioritized over money and technological advancement. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anonymous.	1	Merged Document	No	
Kassie	Friesen	I believe project Jupiter is a horrible idea. I want our Earth to get better so my children can grow up and not worry about this insane and inhumane world. The can still find good and I beg you to find it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	
Mike	Petres	THIS IS BAD FOR OUR ENVIRONMENT! Respectfully, I know people have addictions with AI. But it's destroying our planet and there's nothing we can do about it, or can we? I just wanna say, I know how hard it is to avoid ai, we can switch to ECOGPT instead of Gemini, grok, and chat gpt. These all use more than 39 million gallons of fresh water. It's truly bad. The fuel cells release 10 million tons of carbon dioxide, and that means weather will and can be deadly. We're the last generation to fix climate change and to feel the impact. The rio grande has been drying up even before summer has began! That's how bad it's getting, it's not a heat wave! It's major companies and AI taking advantage of our planet and drying up, but seems like no one cares! these data centers are threatening our communities that depend on the only freshwater we need to survive. REMEMBER, FRESH DRINKING WATER IS LIMITED. We don't need Oracle or AI. Project Jupiter is not needed, these are all mistakes we are making. I will say that humanity will be the end of humanity, it's not safe for us either. We will run out of fresh drinkable water in a few years and global warming will be worse than we have expected. This summer is the coldest it will get, and that's not good at all. No one cares though. I hope that you all realize this is not gonna be helping us or the earth, there's not another planet, no planet B, never will be. Keep submitting these comments and it will cause a little impact now, but now it could be more powerful than we expect it to be. Everyone's losing hope, don't lose it! It's doing something to our planet, it may not be much but there will be more people that are anti-ai! AI will be useless and always will be, teachers use it, and others will to. That doesn't mean that we should use it and follow into their own footsteps and be in their shoes. Their shoes are useless. We can do something about it! It can help everything about the planet! Not much we can do but we can do something. SAVE OUR PLANET! Ai is using pictures of children to make deepfakes and more. It's not only dangerous for our planet but for children. Our earth will dry out more than we can think. We can do something! Please summit one comment! If not, more! It will do everything to people against ai and are anti-ai. Some people have to fight for clean water, and water drying out is already happening. This even causes health risks. I do not want to do a public hearing if this is accepted and not denied. I don't wanna speak as I don't want to be publicly humiliated. So I ask of you respectfully, please do not make me hold a public hearing in Santa Teresa if my permit is accepted. Thank you.	1	Merged Document	No	
Christian	Sarmiento	With the drought in NM and the reduction of our aquifers, it's is irresponsible to allow a data center that will use millions of gallons of water. This was rushed and Doña Ana should pass legislation to ban data centers in our region. These data centers have said they will provide jobs but in other cities the jobs are tied to construction and then once it's built that have software or AI handle the load. If not right out banned, the least that could be done is to allow another 60 days to review the environmental impact this will have in the region and perhaps, if it is passed, to have a guaranteed amount of money that the data will provide in case there's an AI bubble collapse. Also before this is even allowed to happen, why not look into all those skeletons found in Santa Teresa? If the local county can't even hold the people accountable who have placed those decayed bodies there, I doubt they will hold these data centers accountable.	1	Merged Document	No	
Hannah	Witowski	I am a New Mexico resident of over twenty years, and I strongly urge the Environment Department to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. Project Jupiter would have a severely negative impact on our community and our ecosystem, which is already vulnerable and fragile. Their failed greenwashing attempts cannot change the fact that Bloom Energy has an extensive history of illegally storing, transporting, and dumping hazardous waste - the construction of this power plant is guaranteed to contaminate the environment with toxic pollutants and high levels of greenhouse gases, and reducing everyday quality of life	1	Merged Document	No	
Adrianna	Thomas	We need to stop this madness. this is affecting our everyday lives. we don't need ai to survive. it's doing nothing but hurting our planet and crippling people pls let's put and end to this. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	
Micahia	Patterson	This is depressing and deplorable behavior, we don't need it. Children are suffering, the elderly don't have care, war is rampant and people are dying. Who will use this when we are all dead? Who will it cater to? Who will still be alive to use it? The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	
Quinn	Lester	We're already struggling. The entire country is. We don't need AI to live. Data centers are slowly killing us all. The more built the sooner we'll die. Children are already so far behind because of AI and not data centers is just hurting them more. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	
Santiago	Anonymous	This data center is unconstitutional, illegal and directly threatens New Mexicans well beings as much as a terrorist threat. This data center will cause noise pollution, habitat loss, extreme water usage and loss, massive affects on our power grid, and most importantly displaces New Mexicans from their homes. This is a direct threat to New Mexicans safety and will be treated as an act of treason against the people if this continues to go on. We will have no choice but to enact our rights as citizens to protect OUR LAND. Those politicians who work with these devilish corporations will be held accountable as well as anyone else in favor of these domestic terrorists	1	Merged Document	No	
Anonymous	Anonymous	Even though I am not a resident of New Mexico, I still live on this earth and care about the people who live on it with me—and they're building data centres in my town. Generative AI is not needed. It poisons the land and is contributing to the collapse of our climate. Project Jupiter would do nothing but fill the pockets of people who have more money than they could ever spend in their lifetime. Our world is always going to be more valuable than a data centre. Every tree, lake, river, plant, bug, even the tiniest bacteria matter more.	1	Merged Document	No	
Hilary	Dutcher	I am requesting that the New Mexico Environment Department deny the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit. The air quality of this region is already poor; approving this permit and adding the emissions from this project to our environmet will mean that the State of New Mexico has knowingly put the lives of its citizens at risk. The public should have been given an extra 60 days to review and comment on this permit. While I hope that NMED will do right by the citizens of Dona Ana County, I don't have much faith in our governing officials as of late. If the permit is not denied, I would like to request a public hearing so that the NMED staff and leadership can listen to local concerns and explain their reasons for granting the permit.	1	Merged Document	No	
anonymous	anonymous	why would you try and take away water from here when the rio grande dried up before summer? don't take water from where people and animals use to survive. please remember water is limited.	1	Merged Document	No	

Neneh	ba	NO MORE DATA CENTERS, NO MORE DATA CENTERS, NO MORE DATA CENTERS, NO MORE DATA CENTERS, NO MORE DATA CENTERS, NO MORE DATA CENTERS, NO MORE DATA CENTERS, NO MORE DATA CENTERS, NO MORE DATA CENTERS. The public should be given an additional 60 days to review and comment on the air quality permit so everyone can participate equitably! The air quality permit should be denied due to the company's history of environmental violence! If the permit is not denied, a public hearing needs to be held in Santa Teresa in both english and spanish! Approving this permit would be perpetuating structural inequality and racism!!	1	No	Merged Document	[redacted]				Yes	Yes				Yes	8/17/2026
Mikayla	Thompson	AI data centers are dangerous and harmful to our environment. We do not need any kind of structure that will destroy the environment, use up water supplies that people rely on, increase climate temperatures, and create scarcity. This is yet another ploy to line the pockets of the elite and diminish resources for everyone else. We only have one planet it is imperative that we take care of it. Any corporation that says AI data centers are safe and necessary are lying, they do not care about anything other than money.	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
Anonymous	Anonymous	Please don't destroy what earth we have left for entertainment. Water is running out and the drinking water used for ai data centers vanish when used to cool them. Not only that but the noise pollution harm that happens to nearby wildlife and people. We need to protect what's left for our future generation so that we can try to restore what was lost. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Maverick	Anya	I do not want or need project Jupiter. No one needs it. It will gravely affect the environment and cause even further global warming than what we are dealing with right now. The summers are getting hotter with each year, every hot summer you experience is going to be the coldest forever if we keep polluting the air like this. The water is going to be polluted to which puts the nearby residents at risk of so many things.	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
Anonymous	Anonymous	Being a resident of New Mexico I am extremely terrified of the impact this will have on our Earth, our health and the future for our children. We do not need data centers to survive. We need water desperately in this state. To put a data center in the middle of a starving desert seems like the most idiotic choice. Choose peoples livelihoods, not filling your pockets. Please, somebody has to care about us as people.	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
Kala	Komanduri	Quite long, so summarizing: The YGI Microgrid application must be denied because the Microgrid will emit pollutants that would create deadly health risks for community members., The YGI Microgrid application should be denied because it perpetuates global warming.The YGI Microgrid Application should be denied because the building of it would uphold racism	6	Yes	Merged Document	[redacted]					Yes					8/17/2026
Anonymous	Anonymous	Hi, I'm here to leave my comment to stop the Jupiter project. I don't know what else to write, other than I present my support to stop this project that will only cause more harm to the earth and possibly bring very bad consequences to the environment. The project is quite useless, not only because it's for AI, but also because it consumes water in a very worrying way, the same water that many people need and regions that are scarce of it, in addition to the terrible changes it can cause in the environment, which is already happening in a bad State.	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
anonymous	anonymous	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	We do not need any more data centers, or any at all. Just because you won't be here in 5 to 10 years doesn't mean that we won't. Our health (including yours and your families) should be top priority, not some AI that was never needed and could be shut off during a simple power outage. Ask yourself this. WHEN theres no drinking water, where will YOU find water to drink. WHEN you take over lands and fields, where will YOU get your food. Money won't matter anymore if you can't sustain yourself and get the nutrients you need to stay alive. But most importantly, money won't matter when you're dead. You're setting yourself and your FAMILY up for disaster. But most of all, we will have nothing if we don't have clean air. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Ana	Chacon	Dear NMED staff, My name is Ana Chacon. Though I may not live there now, New Mexico is where i was born and raised, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. My family still live there, even if I don't, and the though of them suffering due to unnecessary "developments" that will take way their way of life terrifies me. What water and and land there is exists for the people of New Mexico. To say that the data center would be for the better is to contradict what the New Mexico Environment Department stands for. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Ana Chacon	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026
anonymous	anonymous	They're taking our future from us before we even had a chance to live in it. Every day I fear that the world that I saw when I was a kid won't exist anymore, I'm scared. They shove datacenters, ai and changes down our throat and expect us to accept that this is the way that it is, it doesn't have to be. A world where machines take priority more than life itself, is not a world I want to be a part of. How long will this go, how far are they willing to take this just for the sake of a pretend advancement that is throwing us years back. When will it be enough? When will they be finally satisfied? The life that surrounds us shouldn't be the one paying the price of our own foolishness, humans are the only species that seem so focused on destroying themselves over a system they are the creators of in the first place. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Cynthia	Contreras	I am a resident of Albuquerque, New Mexico but my family has been in the Las Cruces area for several generations. I love this city, and want to see future generations enjoy it as much as I did growing up and visiting here. The health concerns surrounding fuel cells, including but not limited to, hazardous waste, high carbon dioxide release and extreme heat that could damage the land further will make a significant impact on the environment. My family's health and safety should be worth more than the profits of out-of-state corporations. Please consider people over profit. New Mexico does not need this.	1	No	Merged Document	[redacted]				Yes	Yes		Yes	Yes		8/17/2026
Simone	Thuis	I live all the way in the Netherlands but I am scared. Please stop this project, it is going to kill the planet and ruin my future. Europe is already struggling with the heatwaves caused by climate change and freash drinking water is running out. We can not lose more water to data centers or pollute the air more. My future seems scary because of that project. Please stop this and save the earth. I am almost begging you.	1	No	Merged Document	[redacted]			Yes							8/17/2026
Anonymous	Anonymous	Hello, I was just made aware of this project and find it frustrating that I was not made aware of its construction sooner. This data center not only affects the locals, but everyone on our planet. Notice how I said OUR planet? I, and thousands of other people, never signed up for our resources to be drained of 1 million gallons of water a day, and it is completely unnecessary that we need to build a site for something (AI) that we have lived thousands of years without, especially at the cost of the individual wellbeing's of humans and our planet. I am opposed to the construction of Project Jupiter, and believe that the public should be given at least 60 more days to review and comment upon this project. Additionally, the air quality permit should absolutely be denied, and if it isn't, there should be a public hearing in both English and Spanish held in Santa Teresa with an opportunity to participate virtually. This project is further worsening the air quality of the surrounding areas, completely disregarding their physical health. Please do not give Project Jupiter this Air Quality Permit, as they have the potential to create 10 million tons of carbon dioxide that could be emitted into our atmosphere which can cause longer, more intense heatwaves, which leads to severe dehydration, heat stroke, heart attacks, and even premature death. Additionally, Bloom Energy has been fined $1.4 million dollars for illegally storing, transporting, and dumping hazardous waste, so what makes you think they won't do it again? We, the public, did not sign up for this. No one will benefit from this data center in the long run, so please do not give them this permit.	1	No	Merged Document	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Taylor	Nelson	The air quality permit application should be denied due to Bloom energy's history of illegal dumping, and also because Dona Ana county already is impacted by environmental pollution and this permit being approved would make certain the county is subject to even more pollution. Please do not approve it, and if it is not denied, please hold a public hearing in Santa Teresa about it so that more people get a voice.	1	No	Merged Document	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Sohpia	Ahmed	Project Jupiter is a project that will cause irreparable harm to the environment. We are already suffering from climate change and this project will only allow climate change to persist. It'll release 10 million tons of climate-warming greenhouse gasses every year, and void all the progress we have made against climate change in the past two decades. Nobody can make money if there is no world to make money on. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid.	1	No	Merged Document	[redacted]				Yes	Yes					8/17/2026
Emily	Hatfield	To provide more data centers means destroying our natural environment and using up more of resources that cannot be recovered. While freshwater is a renewable resource Humanity is using it far too quickly to be able to have it recover naturally. Please stop Project Jupiter. We will die. People already have. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Rmoni	_	We have lived before Ai. WE were born BEFORE Ai and we can live without it. Ban it before our earth is effected from it, even if we as one weren't effected, our earth will and without it, who are we? You can do this for you, but how long until it affects you too? The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	I'm a young student, and I've lived long enough to witness the damage our hands have inflicted on our planet: fires, pollution, climate change. I've seen forests become just another site of exploitation and pure overproduction, to the point that they can't be allowed to return to their former glory. I know you know, you just don't want to see it, but the damage we've done, the damage you've done, has taken its toll on many others who are completely innocent. And now, I've heard about this project. In all honesty, I firmly believe that this project will only harm us in the long run rather than advance our society. It will be a source of significant greenhouse gas emissions, pollution, and the exploitation of already scarce resources like water. No one should have to suffer the consequences of something they didn't ask for, much less should someone else's land be used to create places like this. I urge the NMED to outright reject YUCCA Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely Anonymous	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026
Anonymous	Anonymous	I am a citizen of the United States of America and I oppose the idea of further polluting our earth; that is why I asking you to deny Yucca Growth Infrastructure's air quality permit. Adding 10 million tons of pollution to our air will only harm us and other living creatures. People do research about air pollution and the data shows that such pollution damages our air quality and quality of life. Implementing a permit that creates an environmental crisis should not be allowed to enact. I will not live in a desolate environment drained of resources for the sake of entertainment; entertainment does not feed us. This will not only kill our environment and exacerbate climate change, but it will harm living beings for the sake of a nonliving, nonessential reason. To have future generations endure such a devastating climate for years to come is only fueling the greed of humans. We will not survive if we allow this to happen. Please, for the sake of all living, do not let the nonliving be the only ones on earth.	1	No	Merged Document	[redacted]				Yes	Yes					8/17/2026
Rachel	Davis	We only have one earth. Fresh water is finite. The rich will die rich and it doesn't matter to them if they have a legacy but the REST OF US would like the human race to continue and not just be a tiny fraction of rich white people who inbreed to extinction. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	Dear NMED staff, While I would like to stay anonymous, I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to not only New Mexicans, but the world at large. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. These heatwaves are detrimental to everyone across the globe, and building a massive A.I Data Center is going to release 10 million more tons of carbon into the atmosphere, polluting the earth at a faster rate, and speeding up global warming. The proposed fuel cell powered grid produces a high level of greenhouse gas and toxic pollutants, including: cancer causing chemicals (benzene), heavy metals (lead, arsenic, chromium), and toxic compounds (sulfur and others). All of these poison the human body, our water, and our soil, and surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology as there are many. We cannot waste our finite resources on A.I! We cannot live on an inhabitable planet.	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Venice	Nguyen	Please don't follow through with this. I am a student and I am watching the effects of data centers and AI usage directly from my home. I have severe asthma. As data centers use up our clean water, the environment gets drier too, affecting air quality. Data centers disrupt nature and wildlife because of the noise and water usage. We are already in a literacy crisis as people are devolving in intelligence, relying on AI chatbots for basic instructions and logic. Please don't take our words for granted. I am a person, someone's child, just like you. I have dreams, and I feel that you aren't hearing your community, that YOU'RE supposed to be a part of. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses on a global scale. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. A 15% "safety margin" was added to the numbers provided by the applicant. Safety margins are not usually added if a company is confident in the accuracy of their pollution estimates. A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid and untrustworthy. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	No	Merged Document	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Anonymous	Anonymous	Se construirem esse data center, vao poluir 2x mais o ar do nosso planeta e acabar com a nossa agua potavel! Não temos outro planeta para viver nem recursos guardados para sempre.	1	No	Merged Document	[redacted]	No	Oppose Non-Substantive	Yes							8/17/2026
Noah	Anonymous	Hello, my name is Noah, I am not from New Mexico however I do live on this earth, and not only will project Jupiter impact the residents near the data center, but me and everyone else on this globe. The effects of this center can possibly be downright catastrophic with how big and impactful it can be, we have seen the negative impact of normal data centers within other cities of the US, so the scale of what this project may do is unimaginable. Not only will it affect the lives of the people living nearby, but also the ecosystem, the environment and the animals Project Jupiters power plant will release more than 10 million tons of climate-warming greenhouse gasses, these gases are incredibly dangerous for causing global warming, acid rain, wildfires, air pollution, health risks and more, this plant will kill the life around it and present a risk to everyone within its radius. There are high schools and Daycares within 5 miles of the site, the sound the center will make will make it difficult for people to focus on school and work, cause auditory damage and disrupt sleep, the air pollution can cause or worsen chronic respiratory illnesses and cause damage to the health. From the water that these people use to drink, bathe and wash clothes and dishes, it will be contaminated with toxic waste such as sulfur and can cause gastrointestinal distress and skin irritation, IF water will be available at all. And these are only a small part of the possible impacts this data centers will cause, this is more dangerous than a nuclear power plant, this is a hazard to anyone and everyone and this should absolutely not be passed. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission.	1	No	Merged Document	[redacted]			Yes	Yes	Yes					8/17/2026
Anonymous	Anonymous	I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate.	1	No	Merged Document	[redacted]							Yes		Yes	8/17/2026
Francis	Dana	I do not support your project of poisoning the air that we all breathe out of. Your company does not need anymore money then it already has. I hope you know that poisoning the air can cause a lot of problems for people and some could possibly die and you would be the part of the problem. Stop whatever you're doing it is enough and the people are sick of the health risks you're causing for the rest of us. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	This air quality permit should be denied given the hazardous environmental impacts it would create. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]				Yes	Yes				Yes	8/17/2026
Abbigail	Tharpe	project jupiter will put so many human lives and wild life lives at risk. we can live without ai, but we can't live without water, we can't live with all the emissions project jupiter will be producing	1	No	Merged Document	[redacted]			Yes	Yes	Yes					8/17/2026
Tessie	H	The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? Has there been or will there ever be upstream fuel testing of methane gas to anticipate the composition of these fuel cells' emissions? How exactly will NMED enforce emissions standards without direct, long-term, continuous monitoring? Or isolate their deleterious impact on air quality without an accurate assessment of localized pollution? This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you.	1	No	Merged Document	[redacted]			Yes	Yes	Yes	Yes	Yes			8/17/2026
Rebecca	Garcia	Dear NMED staff, My name is Rebecca Garcia. I am a life long New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am concerned because I am raising children and I want them to have clean air and access to water for their quality of life. This project will impact their lives far after I am gone and it is not fair. We already have limited water supplies if you look at how the rio grand is practically empty at the moment. This will bit be a good thing for our community now and far into the future. This will impact for years and years and it will not be a good impact. New mexicos children and families deserve better and this project should be denied. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Rebeca Garcia	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026
Sofia	Capparelli	Dear Air Quality Bureau of the New Mexico Environment Department, I humbly request that the Bureau investigate any air quality permits related to the proposed Project Jupiter data center as thoroughly as possible. If the project is unable to clearly demonstrate compliance with all relevant state and federal air quality regulations, then those permits should be denied. The populations, natural resources, and landscapes of New Mexico are distinctive and should be carefully preserved. A large portion of our state is dry, with scarce water supplies, delicate ecosystems, and rural communities that rely on healthy surroundings and pure air. On this scale, industrial activity should be assessed for its cumulative effects on the environment and nearby communities in addition to its direct emissions. I request that the Bureau make sure the following are included in its review: * A thorough evaluation of all emissions of air pollutants, such as greenhouse gases, particulate matter, nitrogen oxides (NOx), and volatile organic compounds. * An review of cumulative impacts from all facilities associated with the project, rather than assessing each source alone. * Independent confirmation of assumptions and emissions modeling. * Taking into account the potential effects of higher emissions on public areas, agricultural operations, wildlife habitat, and local residents. * Complete openness throughout the permitting procedure, including significant chances for public involvement and technical information access. New Mexico is home to diverse ecosystems, working ranches and farms, tribal lands, and public lands that support recreation, tourism, and wildlife. Protecting air quality helps safeguard these resources as well as the health of current and future generations. Economic investment is important, but it should not come at the expense of public health or environmental quality. Projects of this magnitude should be held to the highest environmental standards. If there is uncertainty about the project's ability to meet those standards or prevent significant adverse impacts, I respectfully ask the Bureau to require additional analysis, stronger permit conditions, or deny the permits as appropriate under the law. Thank you for your commitment to protecting New Mexico's air, environment, and the people who call this state home. Sincerely, Sofia Capparelli	1	No	Merged Document	[redacted]			Yes	Yes	Yes					8/17/2026
Chances	Avery	I am NOT okay with project Jupiter going through. You are just willing to ruin the one environment that we have to survive in water is already limited due to AI and you're willing to open one of the biggest data centers which will without a doubt pose life-threatening risks to the rest of the world. Whether it's simply running out of water or just ruining our earth with climate change in all of the pollution that you're putting out into the Earth stop this it's not okay.	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
Callan	Guthrie	Ive heard very bad stuff about this project Jupiter and I believe it needs to be stopped. The whole reason I believe that is because we need water and rivers are drying up because of ai and local communities especially in poverty areas aren't getting the amount of water they need anyway. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Cat	Guzman	This is contributing to the active destruction of the environment in which we live! Other data centers are proven to be poisoning the air, water, and animals. This is targeting not only low income areas but up to middle class. Which are the highesd tax payers. To complete this project is to be against mankind and our future.	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
Sahara	Fiedacan	Although Project Jupiter seems like a good idea by bringing in new jobs to New Mexico, this project harms the environment by taking water that is already scarce. The Rio Grande is at its driest than it has ever been, and Project Jupiter will worsen that. Our people will run out of water for the sake of AI and profits. Project Jupiter is simply incomparable in worth, and the people of New Mexico depend on clean water, which should not belong to AI data centers in the first place.	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
Robin	Lange	Does your community have enough water & power supply already in place to support a data center without negatively impacting the residents? Will an increase in those limited resources to meet the needs of a Data Center have any effect whatsoever on the nearby communities? No increase in water bills? No decrease in water availability and quality? No change in the emissions (both visible and non-visible) to you surrounding communities? Will there be no adverse effects of reduced air quality, water quality, water availability, power availability & power costs on these communities? Will there be no increase of the cost to be alive for those people who live nearby?	1	No	Merged Document	[redacted]			Yes	Yes	Yes					8/17/2026
Ava	Johnson	My name is Ava Johnson, I am a resident of Waynesboro, Ga and I stand against the creation of project Jupiter. Project Jupiter is unethical, it has several negative impacts such as, declining air quality, and declining water. Project Jupiter is a serious threat to the air quality in New Mexico. The fuel cells have the potential to emit up to 10 million tons of carbon monoxide annually. This is a significant impact on the air. This amount of carbon monoxide is detrimental to the environment that we live in. Carbon monoxide prevents methane gas from breaking down which then causes global warming to increase. Carbon monoxide also reacts with volatile organic compounds and nitrogen oxides in the presence of sunlight to produce tropospheric ozone. This ozone acts as a toxic air pollutant that damages plant life, reduces crop yields, and triggers respiratory issues in animals. The toxic gas that Project Jupiter will release has many negative, injurious effects onto the planet. The Rio Grande, which is responsible for 40,000-50,000 acres-feet of water supply for the citizens of New Mexico is in the process of drying up. Data centers are known to take water for there massive cooling systems, up to 5 million gallons. If the Rio Grande completely dries up, there are thousands upon thousands of people who will not have available water for drinking, cleaning, cooking, etc. I, Ava Johnson stand against the creation of project Jupiter. It will cause the air quality to plummet leading to global warming and extreme climate change which we already are experiencing to an extent currently. Project Jupiter also will take millions of gallons of water for its cooling systems causing the nearby water supply to dry up, including the Rio Grande which is in the process already of drying up. The Rio Grande is the main water supply to New Mexico and its water serves millions of people. Project Jupiter will destroy the environment causing millions -- no water access or clean air. Millions of people's health will decline. As the Environment Department you aim for the health of the environment and citizens. Thank you for hearing my voice and many others. I hope you will choose to logic route, being not to move forward with project Jupiter because it causes more harm than good. Thank you.	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes			8/17/2026

Anonymous	Anonymous	I am a resident of Albuquerque, and I am asking that you deny Yucca Growth Infrastructure's air quality permit. Not only do I live here, but so do many of my friends and family. Our future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time non-attainment zone would be nothing short of blatant environmental racism. It's unhealthy and unethical. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. I can barely pay my electricity bills in the summer as it is and the heat wave is negatively impacting people's physical health and well being. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits. We cannot have that.	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes		8/17/2026
Anonymous	Anonymous	AI data centers are extremely dangerous to the well-being of both the Earth and our country. While we are already in a water crisis, AI data centers do nothing except ruined the land that they are placed on and use water resources that we desperately need. Nobody is in support of these we speak against it. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Yelena	Jamie	Please stop this project as it harms a lot of people— not just in that area itself but, also to billions of people worldwide because of how it affects our ecosystems and we are parts of that ecosystem. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	AI data centres are terrible globally for the environment and impact the lives of those living around them. There's absolutely no benefit to adding them. The air quality is impacted, it wastes water, the sound is unbearable, etc. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I have no idea how to write a public comment, as i've never written one before. However, project Jupiter will most likely affect my life too, even if im not a resident of the USA, so i feel like i have to try and do something about it. In fact, projects like this will most likely affect the whole world. And this won't be the last project like this, people are greedy and are going to ask for more the second they get bored of their last project. I kindly ask for the government to not let this project go through. I'm still in highschool, and i already feel like my future is being taken away from me. Drilling in places like this will just make climate change come faster, and that will raise the temperatures around the whole world, making the water level and food prices rise, and bring many species to the brink of extinction. I feel helpless and useless since there is not much that i can do, being under 18 and from a different country, not having even graduated yet. Please, save the future of the next generations, and don't let project Juniper go through. Thank you.	1	Merged Document	No	[redacted]	Yes						8/17/2026
Sophie	Sanchez	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Project jupiter will insanely dry up the earth, it is a climate disaster, and what about the limited, gigantic amounts of water it will consume, the water communities need to survive. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How am I supposed to live my life, have kids, send them to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Is our future truly more important than a data center? The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Kindra	Gregory	As a homeowner, here in Las Cruces, we are concerned about the harsh and permanent impacts that the data center will have on our city and community. We already have water scarcity, high temperatures, and terrible air quality, I'm failing to see how this is going to benefit anyone that is living here, this is going to poison us. Las Cruces is a beautiful place to be, if we take care of it, please don't ruin our land. We ask that you give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Also, the air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Thank you for your time, but more so, thank you for caring.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	Hello, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am scared about my future, I want to have children, but how could I? When I'm old enough and financially stable the world won't be a place to raise a kid, there will be no water, and the temperature will be high, contamination will be at its peak. Our future isn't AI, isn't all the money you will gain, isn't global warming... Our future is life, kids, learning, intelligence, innovation. You say you want to create jobs, but you could use all that money in different purposes, I promise it would be better. I speak from my heart when I say that I really hope that there isn't a future where you can't sleep out of guilt, even if your mattress is money, even your AC is at 23°C, because outside people are dying in the heat wave. I know that we as humanity can do better. Maybe I'm foolish if I try to change your mind... But please. You are hurting our whole world. Money is wonderful, I know, I love it too, but think about it... Is it only an AI center? The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants. • This technology generates toxic waste, and the process for handling this waste is still unclear. • Fuel cell technology or a centralized waste system has never occurred at this scale. • Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes		Yes	8/17/2026
Diana	Del Pozo	I live in Tampa which is a major city in Fl, and i'm going increasingly worried about the effects of AI on our planet. I've heard from many other people that data centers in their area cause extreme noise pollution and harm the environments around them. But besides just hearing about it, there's so much evidence and research to proof how harmful it really is. Truthfully, I'm scared. I don't know what's going to happen if we let things like Project Jupiter to happen.	1	Merged Document	No	[redacted]			Yes	Yes			8/17/2026
bill	green	I am writing to stand against project jupiter. we need to prioritise our one and only earth and not focus on AI data servers that we do not need to survive. we have thrived for generations without the use of AI so why start now when in record time we will not have safe water left. why would we need AI assistance if they have no one to assist. The public needs an additional 60 days to review and comment, the air quality permit application to be denied. if the permit is not denied a public hearing in santa teresa	1	Merged Document	No	[redacted]	Yes	Yes				Yes	8/17/2026
Jennifer	Luna-Martinez	My name is Jennifer Luna, and I am from Tularosa, New Mexico. I am the mother of a one-year-old son who was born in Las Cruces. The thought of my son growing up in a world where AI is prioritized over clean air and healthy communities is heartbreaking. It is absolutely sick that our children are expected to bear the consequences of massive pollution so corporations can power AI data centers. I strongly urge you to reject Yucca Growth Infrastructure, LLC's air permit application. Changing the company's name and calling it a different technology does not change the fact that this project would still produce enormous greenhouse gas emissions, generate hazardous waste, and put New Mexico families at risk. Our communities are not testing grounds for unproven technology, and our children should not have to pay the price for corporate expansion. As a mother, I refuse to accept that this is the future we're building. My son deserves clean air, a safe environment, and leaders who will protect New Mexico instead of approving projects that threaten it. Please reject this permit. Choose New Mexico's children, our health, and our future over corporate profits. Sincerely, Jennifer Luna Tularosa, New Mexico THIS IS THE LAND OF ENCHANTMENT DO BETTER. SAVE THE LAND OF ENCHANTMENT	1	Merged Document	No	[redacted]		Yes	Yes		Yes		8/17/2026
Anonymous	Anonymous	This Jupiter project will not bring any good to anybody. Many states in the west are already in a drought including New Mexico and this will only dry it out more please think of the people. They can't drink money you can't drink money we can't drink money but we can drink water and help reserve what little we have. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Paela	Duvall	Project Jupiter will jeopardize the lives of the people who live in New Mexico, it is disgusting and immoral to put the wants of careless billionaires over the lives of poor innocent people and the world as we know it. Doing this will keep the long standing tradition of treating New Mexico as nothing more than a place to steal from, to take for your own sakes. It's awful to watch this happen and feel helpless about it. Project Jupiter will ruin people's lives if we don't stop it before it's too late. The permit for air quality should be dumped, as Bloom Energy has shown a disregard for people with their past of dumping hazardous waste illegally. And an additional 60 days to review and provide comments on the air quality should be given to allow community members to equally participate.	1	Merged Document	No	[redacted]		Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	An A.I data center, on this grand scale, is absolutely NOT necessary. We ALL are well aware that YOU know the devastating effects this will have on our country, planet, and ecosystem. Please, stop this before our plant is riddled to dust. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I oppose this act/permit because it directly violates the clean air act and would be detrimental to the communites that already struggle for clean water.	1	Merged Document	No	[redacted]	Yes						8/17/2026
Holli	Brogdon	Please stop the progress of Project Jupiter. Be the person to care for other humans and our planet so we can all live with a future in mind. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Eliete	Cassandra	Instead of running away from the problems we have created, we should take responsibility and accountability!! It is not acceptable that we have destroyed what the earth preserved for millenias and destroyed the homes of animals; our ocean are becoming more acidic killing entire ecosystems. The heat waves is killing people animals and more. Wars genocide and hunger is over looked. Do you really think it's okay to just leave behind all of this? NO! we must take action. This is our planet our home. And its our responsibility to take care of it. Please i ask that project jupiter does not take place. Lets work together to make the earth a better place. Watch pocahontas watch the lorax all these movies made to spread awareness and yet you fail to acknowledge that our planet is dying and we are killing and we should be ashamed. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
katherine	martinez	We don't need AI ! we've lived without it. Instead spend this money on charity and save the world from global warming. Our planet and animals are dying because of this!!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Mirka	Blair	This air quality permit request would place undue burden on the people of New Mexico without any clear benefit to the community. The public should be given 60 days to review for adequate time for community engagement. Additionally the environmental and health impacts of this project need to be adequately addressed and the health concerns arise not only from the process itself but the fact that Bloom Energy has a history of dumping hazardous waste illegally. The fact that there is not clear pollution controls is cause for alarm and had to potential to put New Mexicans at risk.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Molly	Mullany	The river is dry in Albuquerque. Elephant Butte is at less than 4% capacity. There has been an increase in wildfires throughout the state. We cannot have this in our state. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Ariadne	Gonzalez Dominguez	I am against this project not only of the insane amounts of water that this center would need, for the space that was taken from the animals that were living in that area, but because of the impact that this will have not only in the community but to the rest of the world. Climate change is a real thing, and it affects every single one being on this world, but apparently is not a fact to the ones in charge of all these projects. I want for future generations an opportunity to a good quality of life which includes free water, a clean air quality, and a chance to go around the world. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Erika	Morales	Project Jupiter will be a grave disaster to our desert ecosystem. As New Mexicans, we pride ourselves with the beauty of this land, which includes wildlife, pollinators, cacti, brushes, clean soil, clean air, and clean water. This land is fragile, our water is scarce and precious. Data centers will rip and destroy this land of it all. We must protect our land from greed. We must shut down data centers. We must prevent them from building in New Mexico. We can stop this. We need to stop project Jupiter. NO TO DATA CENTERS IN NEW MEXICO. NO TO PROJECT JUPITER. PROTECT OUR WATER FROM DATA CENTERS. PROTECT OUR AIR FROM DATA CENTERS	1	Merged Document	No	[redacted]	Yes		Yes				8/17/2026
Addison	Scott	This is terrible, our world is at great risk. I'm only 19 and have personally seen a change in our climate, and I'm honestly scared, of what's to come. I'm worried my everyday life will be altered by climate change, and everyone will look back on events such as Project Jupiter in deep regret if completed. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Lauren	Finkbiner	We need an additional 60 days to review project Jupiter to determine impact and if it benefits the people of New Mexico. We must review energy demand of the center and affect on health of nearby population, particularly the air quality. If the air quality is unacceptable it should NOT be built. Project Jupiter is a waste of resources and disrespectful to nature, our animals and human life. AI is being forced upon us to the detriment of the planet and our only home. Stop this abomination! We do not want SURVEILLANCE CENTERS and HIGHER BILLS AND WATER SCARCITY!!!!!!!!!!!	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	8/17/2026
Maia	Griffith	I am a resident of Albuquerque and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I am 16 years old and for years I have sat in classrooms and learned about New Mexico's history of exploitation, we were used and abused to test new technology like nuclear war heads. I've read about the Navajo Nation and the harm uranium mines brought to their way of life. I remember being thankful that so much of that treatment was in the past but this data center threatens to bring a new age of exploration and pollution. New Mexico has been exploited by outsiders for hundreds of years don't allow that legacy to continue. It is no secret that these exploiters target non-white communities the approval of this permit is just creating another chapter in the long history of environmental racism. Doña Ana County is majority Hispanic and already has struggles with air pollution issues and this data center is just going to make the problem worse. In the past Bloom Energy has ignored our laws that are supposed to help protect people, they illegally dumped hazardous waste just to line the pockets of the people at the top. We shouldn't reward companies that do such things with more permits and opportunities to harm our planet. I am young with my whole life ahead of me and I'm scared that my life and its quality will be damaged or even cut short by the environmental destruction this data center will bring. We are in a time where we should be decreasing Co2 pollution in our atmosphere not using experimental fuel cells to produce more. People over profits reject this application.	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes		8/17/2026
Franchesca	anonymous	Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Aimee	Ashton	I am nowhere near Project Jupiter, however I am very concerned by how much this will affect the locals and its contribution to global warming. From lacking local water supply, to noise pollution, to worsening of air quality, and to releasing emissions that cause the world to be warmer every single year. This project needs to be stop as it's not necessary and only destroying the planet even more. We are losing our natural sources to AI when there's real people who are able to think, be thirsty, feel the effects of the data centres that damage the environment, etc. We do not need more AI data centres, we need to plant more trees. Once the climate clock runs out and it's so much harder to reverse the damage done from human activity, you (the organisers of building data centres and every other greedy company that carelessly pollutes the planet) only have yourself to blame. Please consider this argument and stop this project before we do irreversible damage to earth. The public should be given at least 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied as Bloom Energy has a history of illegally dumping hazardous wastes. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone which means their air quality does not meet federal government rules. A change needs to happen now.	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	Project Jupiter is only going to worsen the world's condition. Currently ice is melting because of global warming because all of the carbon emissions from these big projects. Project jupiter is going amass TONS of limited water. Other countries barely have clean water, now it's being reduced even more. This doesn't help the people. This project is only to garner more money and have a "reason" to raise prices. Stop Project Jupiter!	1	Merged Document	No	[redacted]	Yes	Yes					8/17/2026
Alexia	Gutierrez	Please stop the continuation of project Jupiter. Our Earth is more valuable and precious than all the money AI can give these companies. Birds, trees, bees and natural resources are mostly not renewable, let's take care of them. We CAN live without AI. STOP PROJECT JUPITER. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	Please do not let project jupiter get passed. The negative environmental consequences it will cause are far too dangerous to approve this project. Local communities will be exploited for the resources they survive on, heat emissions will skyrocket, and the limited clean water will be disproportionately taken up to cool this massive data center. The earth is our only home, so please take better care of it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Noah	Anonymous	We have to stop project Jupiter tech billionaires are sacrificing our planet for there personal profits the air quality in New Mexico already doesn't meet national standards and data centers will further worsen it and release toxic chemicals this is our planet we can't drink data say no to project jupiter	1	Merged Document	No	[redacted]		Yes			Yes		8/17/2026
Natasha	Nullius	"Our river is drying, Our crops are dying, Our people aren't thriving. But still, they come to take. Our water was taken, Our dreams mistaken, Our needs voted vacant. But there's still money to make." -Natasha Nullius, 2026 We do not want one more Google, Intel, Amazon, fake giant company that comes in with promises only to take what little we have and the faith of New Mexicans when they inevitably leave. These people buy land that holds a history all its own and that is home to what little wildlife and wild plants that can survive here. We do not have enough to feed all of our children with New Mexican crops on New Mexican farms, nor enough water to sustain those crops, the livestock, the workers, the driller, the influx of snowbirds, the children, and the animals we share these borders with. Please, don't sell out New Mexican futures and hope for Billionare promises and mass produced assurances. No one asked the citizens what they wanted. Not the ones who speak English OR Spanish. No one held a community meeting that was acessible enough for the people who sustain the local economy and who sustain the image of the hearty New Mexican spirit. We need thorough representation, time to learn all of our options, and a vote by all who will be affected directly and indirectly by this affront to our environmental progress and the eyesore of a building theyre wrapping it in. Sincerely, Someone who didn't have to use A.I. to say what's on their heart.	1	Merged Document	No	[redacted]	Yes		Yes			Yes	8/17/2026
Cat	Serafin	Dear NMED staff, My name is Catherine . I am a New Mexico resident, living in Tularosa, NM, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am just a regular person who wants a future filled with an abundance of clean, drinkable water. I am concerned that building a data center in an already dry and barren desert is not a decision made in the surrounding residents favor. It is a decision made by greedy developers who don't care if we run out of water because we all know they will not suffer the same consequences as the less wealthy. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely Catherine S	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes		Yes	8/17/2026
anonymous	anonymous	Dear NMED staff, I am writing this letter because I am worried about the dangers and issues that Project Jupiter could cause to New Mexicans. I am sending this comment to urge the New Mexico Environment Department to deny Yucca Growth Infrastructure, LLC's air permit proposal for the YGI Microgrid in Doña Ana County The project's suggested fuel cell powered grid is a source of concern for lots of reasons: • Project Jupiter's power plant will produce up to 10 million metric tons of climate-warming greenhouse gases annually. This would completely undermine New Mexico's climate goals and reverse most of the progress we've made on climate change over the past two decades • Santa Teresa Elementary and High School are located less than five miles from this project site. 96% of the students at the high school are Hispanic. There are also daycare centers located within a few miles of this site. This represents environmental injustice toward these children, who are highly vulnerable to the health effects of NOX, CO, and VOCs And many other problems that are no less important. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit requests clearly goes against that goal. NMED should give the public an extra 60 days to check out and comment on the application to ensure that everyone can share their thoughts and get included Sincerely, Anna	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes	8/17/2026
Anonymous	Anonymous	We do not need more AI data centers. Its destroying our planet and its becoming unliveable. Shame on the jupiter project and the billionaires as you're actively destroying the earth. We do not need more of this! We need everyone to step up and actually help the planet instead of destroying it further! The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. This summer, my 6 year old suffered a seizure while on the playground at school because the extreme heat affected him. If, and Lord forbid, this project is to happen, we would all die in 8 years or less due to the extreme climate change, we as humans can not adapt to these rapid changes	1	Merged Document	No	[redacted]		Yes	Yes				8/17/2026
Lily	McLen	I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. The amount of damage that this project would inflict not only on the local area but also long term on the planet is astronomically high. A data centre for something that is a leech on the earth like AI is not worth the amount of lives that it will negatively affect. For example, the schools nearby, Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. Accepting Project Jupiter and in extension allowing AI to develop in a society that is not advanced enough to sustain it without dire effects on the earth will stunt many futures, especially of the younger generation. My main concern that we are not ready for this type of development stems from the fact that fuel cell technology is so uncertain, as it has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. Also, the Application is based on pollution testing from a very small unit. The testing unit is only 65kw, while the power plant is 37,000 times that size, which raises the biggest concerns. Toxic waste disposal is another issue seeing as though Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the desulf canisters is exempt from air permitting regulations (because there is less than 1000 lbs/yr). Also, Bloom was fined for improper hazardous waste handling in Pennsylvania and Maryland. In 2020, Bloom was fined $210,000, and then $1,161,000. Is this truly a sign of a trustworthy company? Again I urge you to reject this proposal. Sincerely, Lily McLen	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes	Yes	8/17/2026
Lily	Crudden	We do not want polluted air. The air quality in this area is already not up to standard. If it is polluted more, it will spread and kill all plants, animals and pollute any water source nearby. Climate change is already affecting the world at an alarming rate and this project will only increase the damage that is being done to our planet. No one wants this. Local people are protesting. Why do you not care? Disgrace to humankind. Be better	1	Merged Document	No	[redacted]	Yes	Yes	Yes				8/17/2026

Anonymous	Anonymous	Please do not do this. We need to protect the health of our planet, and our species, as humans. Doing this is further only going to cause problems and convince other companies and other people to do the same. We need to protect our air, our planet, and our people. Not only for now, for this generation, but also for the ones to come. So they don't have to try and clean up our mess. Please consider not harming our world and our future. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air (see tables below sourced directly from p. 150 of Air Permit). The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Donna	Dean	We do not have the water in New Mexico to support this project. It doesn't matter if it's drinking water or not. Our state is dry and burning, the mighty Rio Grande looks like a desert. The jobs do not matter at this point. Please stop this.	1	Merged Document	No	[redacted]			Yes							8/17/2026
Nathan	Gusta	Please do not let this project happen. New Mexico is already in horrible drought, and a data center will quickly poison what water we have left to survive here. Building this project is the worst possible thing that could happen in new mexico right now	1	Merged Document	No	[redacted]			Yes							8/17/2026
Vic	Martinez	Hi, my name is Vic and I ask that you do not approve Project Jupiter as it is using an obscene amount of natural resources we simply do not have, Project Jupiter creates more harm than good; while i understand it crates profit for companies such as Open AI, i ask you to reconsider as it start minimizing your consumer base because people will not be able to use the services you provide in good conscience or will be to displaced or dead to do so, I ask you to think about the people that have lived in Doña Ana county, New Mexico for generations and how you would be taking their homes and entire lives, consider the children who you are robbing of futures. I hope you do what's right and not what profitable, thank you for your attention.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive								8/17/2026
Whitney	Guillory	Dear NMED staff, My name is Whitney Guillory. I am a New Mexico resident, living in Moriarty, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As a third grade teacher, I cannot in good conscience endorse this project. Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Whitney Guillory	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Emily	Hughett	To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time non-attainment zone would be nothing short of blatant environmental racism.The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Kristen	Miranda	Dear NMED staff, My name is Kristen Miranda. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Thank you	1	Merged Document	No	[redacted]					Yes		Yes		Yes	8/17/2026
Anonymous	Anonymous	Stop this. This will heavily impact the future for everyone, the unhealthy amount of fumes, carbon dioxide and water used and excreted is harmful and expedites climate change, something that can't be undone. When the last tree is cut, when the last body of water is contaminated, you'll find you cannot eat money. Not only that but it can harm our body's. Without clean air we cannot breathe. Without water we cannot hydrate. Project Jupiter will likely kill manh. Stop this project	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Anonymous	Anonymous	The project does not help but rather harm the planet that we should be protecting. The money should be sped on bettering the planet and communities not harming. Ai is not needed we humans have the capacity to learn by ourselves and be better than any machine. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Emilija	Gauja	I live in Latvia - a very green country that is constantly having to feel the result of actions made by larger countries. Whether it be the constant threat of Russia or climate change triggered by money centered ambitions such as PROJECT JUPITER. Each year the summers are getting hotter to the point where Latvia's wildlife can't take it. A new temperature record is broken every month. I want to look forward to a future where my kids and grandkids have the possibility to experience true latvian winters and travel abroad to see animals and plants they never even thought existed. An AI data center will never replace the joy of seeing a true rural area, it will never attract tourists like a nature reserve can. The constant noise pollution produced by these centers aswell as the enormous water usage endangers both wildlife and humans. In the long run it is making climate change faster. It is already unbearable in Europe as the heatwave strikes. We have lived thousands of years without AI and survived perfectly. The rise of it in recent years has gives money hungry oligarchs the possibility to expand their wealth, but the people paying the price will be people who can barely afford a living as is. Endangering nature, putting a limited water supply needed for locals at risk and producing carbon emissions in an amount we cannot grasp is just a testiment to how much the upper elite doesn't care about everyone else and the future. That's why I ask to stop PROJECT JUPITER.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026
Nova	anonymous	Project Jupiter hasnt been given a 60 day comment period from the public, bloom is a dangerous company that is known for illegally dumping hazardous waste and Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. The way this data center is going to impact us is not worth it, please reconsider this project	1	Merged Document	No	[redacted]					Yes		Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	Project Jupiter is a death sentence. The sheer amount of pollution just from ONE year will cause irreversible damage in multiple ways. This not only inconveniences the residents, but it is completely unnecessary and unfair. I REFUSE to spent the remaining years of my youth growing up in a world where I cannot breathe. Where I cannot drink clean water. Where I cannot see any local wildlife because they have all died. Where my voice ISN'T HEARD. This commentary needs to be open for at least another 60 days because it's only right to give people time to object this horrific project. We CANNOT eat money. We cannot drink expensive, non renewable oil. I don't care what they believe in, our earth is already a ticking time bomb. Please don't let this pass. I beg of you to consider the people growing up. The elderly who want to enjoy the rest of their stay. At the end of the day it is extremely serious and at the end of the day I don't want the morning and afternoon to be as dark as the night from smog and pollution. It is a basic humanright to stand up for one's opinion. I may be just one comment but I vote NO to project jupitor. A public heating NEEDS to be allowed and included in Spanish as well to give opportunity to all. It's we the people. Not you the greedy	1	Merged Document	No	[redacted]			Yes		Yes				Yes	8/17/2026
Faye	A	Dear NMED staff, My name is Faye, I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's new proposed fuel cell powered grid is still concerning and doesn't change the risks for many reasons: * This technology generates toxic waste, and the process for handling this waste is still unclear. * Fuel cell technology or a centralized waste system has never occurred at this scale. * Surrounding community air will be negatively impacted by this development. * It would still produce a high level of greenhouse gas and toxic pollutants. I would also like add that NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Again, I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. And, I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Faye	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Phuong Nhung	Nguyen	Project Jupiter is the most redundant project proposal ive ever seen. We dont need fucking AI or your surveillance centers, especially when you disrupt any piece of lands, the people's land or the nature land. I didnt grow up preserving as much of water as i could bc i was taught "Water is a finite resources and you cant waste it, there r people right now and generation to come that need it" just so that i grow up and 0.01% population hog it for selfish no good reason while the rest is struggle not to die from extreme drought and heat. This is nothing but a pollution center, the water scarcity, definitely worsen the air quality and gives hundred of million people lung cancer, destroy the land, destroy the environment, not just in New Mexico but around the world, permenantly disrupt the ecosystem there for bring more natural disaster that the people who already the most effected by this pj the more vulnerable.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Caitlin	Rogers	Throughout my high school years I spent my time in FFA giving speeches about how New Mexico's water supply has fallen short again and again and how it has affected our farm use, easing animals, and our water use at home. Now about 3 years out of high school I still feel like i'm shouting for the same things. We need to save our water! Our state is already struggling to get the water we need with the Rio Grande getting drier every summer along with our lakes and creeks. The last thing our state needs is to have our water being used for something that is doomed to collapse in itself. Studies are finding that AI will not truly improve as it's running on its own data , data that already has gaps in its intelligence. These data centers are the opposite of an investment, it's actually will drain us.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Hannah	Loftus	Concerns and opposition, I am writing to express my concern and opposition to the development of the data center, Project Jupiter, in our community. Data centers similar to Project Jupiter emit an average of 10 million metric tons of carbon dioxide annually. This is more than the carbon dioxide emissions of Albuquerque, Santa Fe, and Las Cruces combined, New Mexico's three largest cities. Bloom Energy, the energy provider behind Project Jupiter, has a history of illegally dumping hazardous waste. New Mexico is experiencing dangerously high temperatures, and the continued development and usage of Project Jupiter will only worsen this. The Bloom fuel cells being used for this project operate anywhere between 800 and 1000 degrees Fahrenheit, which will worsen the heat island effect already taking place in the Santa Teresa community. This severe heat island effect would raise the temperature in the neighborhood by at least 3.6 degrees. The residents of Dona Ana County are already disproportionately affected by environmental pollution, such as poor air quality and poor water quality. So, I ask you to please protect our most vulnerable communities and reconsider the approval of the construction of Project Jupiter.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes		8/17/2026
Jenna	Wood	My name is Jenna. I'm turning 19 this year and I just missed many of the opportunities to vote in the main elections in 2024/2025. Everyday I get saddened by that fact because I see things like this occurring in the world. Not only is this data center a bad idea economically with how big the AI bubble is and how close it is to bursting and leaving these data centers with no funding to back it, but also there are so many health and resource related risks. This center is creating health issues for the communities data centers are near and destroying the planet by using finite resources on an unsustainable and unnecessary "resource" . The emissions from the centers leave many communities facing health complications, it fast tracks global warming and leads to more heat related deaths, and it is generating so much constant noise that it effects people's mental healths and causes local wildlife to flee. There is also the issue of how much water that will be needed to fuel a ginormous data centers such as this. The water that these centers use alone contaminates literal tons of drinkable water that could be given to communities in need. However, instead of using that water to help communities with little access to clean water it is being used to cool down data centers like this one and making the water unusable for the future generations. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Jon	Chevere	Though approximations of annual air pollution were provided, the testing used an extremely weak methodology leaving us, ultimately, with pseudoscientific guesses that have large margins of error. Estimated pollution levels for this gas-powered fuel cell plant are based on only three 4-hour pollution tests from a very small unit (only 65 kW). This is a far cry from thousands of sweltering fuel cells operating 24/7 at maximum output in close proximity, all in the scorching heat of our open desert. The lack of rigorous testing at even this small of a scale is lazy and very concerning, especially given that the gas power plant Yucca Growth Infrastructure wants to build is 37,000 times bigger than this unit.	1	Merged Document	No	[redacted]					Yes		Yes			8/17/2026
Avellana	Jackson	I am a concerned citizen asking that you please deny Yucca Growth Infrastructure's air quality. Ai data centers are nothing short of entirely destructive to humans, animals and our ecosystem. The benefits of AI data centers are far outweighed by the drawbacks. The damage created will be irreversible. Humans, animals and our ecosystem will thrive without AI, that is a known fact. However, all of the above are guaranteed to suffer with the surplus of AI data centers being built. The Jupiter data center in New Mexico is one of the largest AI data centers to date and will contribute massively to habitat loss and water loss for miles surrounding it. Is the well being of families, animals and in the grand scheme our society worth the possible financial gain data centers may give? Families, parents, children, our youth, are depending on your integrity. Our survival is in your hands and if more data centers are built, our blood will be too.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Luca	Anonimo	Dear NMED staff, My name is Luca. I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Obviously this project isn't something that most of the people dream about. It's scary how my future can be decided by someone who doesn't even know me. Since I'm really young and, guess what, I want to live a happy life, and I would love my future children to do the same, seeing someone building this is not something I agree with. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Luca	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
anonymous	anonymous	A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC	1	Merged Document	No	[redacted]				Yes		Yes	Yes			8/17/2026
Samantha	Boyne	Building this data center is irresponsible. There was no thought to the people, the land, or the environment about how this would affect everything. It is clear the people do not want this data center in their home yet you still don't listen to the people who will actually have to live with your decision. The public should be given 60 additional days to review and comment on the air quality permit.	1	Merged Document	No	[redacted]				Yes	Yes					8/17/2026
Anonymous	Anonymous	This is extremely harmful to our air quality and environment. Our future is important and saving it one step at a time is important. Each step taken can save our planet from permanent harm and save our future generations from living on an unsustainable planet. This permit needs to be denied in order for our air quality to continue to be stable enough to be able to breathe without worry and without breathing in harmful chemicals and toxins to both animals and humans.	1	Merged Document	No	[redacted]				Yes	Yes			Yes		8/17/2026
anonymous	anonymous	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. Se debe otorgar al público un plazo adicional de 60 días para revisar y comentar sobre el permiso de calidad del aire, a fin de que los miembros de la comunidad puedan participar de manera equitativa. La solicitud del permiso de calidad del aire debe ser rechazada debido al historial de Bloom Energy de tirar desechos peligrosos de forma ilegal. Si el permiso no es rechazado, se debe hacer una audiencia pública en Santa Teresa, tanto en inglés como en español, y con la opción de participar por internet. Aprobar este permiso sería racismo ambiental apoyado por el gobierno, porque la gente del condado de Doña Ana ya sufre demasiado por la contaminación ambiental. Por años, el condado de Doña Ana ha sido llamado una zona de 'incumplimiento'— esto significa que la calidad de nuestro aire no cumple con las reglas del gobierno federal.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Maria	Arkoudi	Although I'm Greek, I'm still against Project Jupiter. (I will just be copy pasting talking points, I'm so sorry I have no time.) Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes		8/17/2026
Emmanuel	Ortiz	I am a resident of El Paso, and am reaching out to implore you to give the public more time to contribute their thoughts and opinions on the air quality permit needed for project jupiter's development. I'm sure you're aware there's a strong opposition from many residents and those in surrounding areas. Granting the permit would be going against the wants and best interests of the people you represent, those who will be most impacted. Bloom energy's documented history of environmental pollution should be enough to deny this permit. However, there's also the added risk of depletion of resources, and a high impact on the region's ecosystem and quality of life. Besides, multiple big tech companies have reported no true impact from their use of AI in their enterprises, with many economists warning the market has overinflated the profitability of this technology. Granting this permit should not be considered, doing so would be an act of government sponsored racism as residents in Doña Ana county are already disproportionately impacted by environmental pollution. If despite these reasons you find it acceptable to grant this permit, allow a public hearing in English and Spanish, with remote accessibility.	1	Merged Document	No	[redacted]				Yes	Yes	Yes			Yes	8/17/2026
Isabella	Mintz	I write to you and your concern as many thousands are also doing because we are pleading for you to not approve this data center. The change of technology doesn't change the negative outcome on the environment and overall living conditions of the human beings who have to inhabit that area our whole planet even AI has been proven time and time again to be destroying our planet, actively at a very rapid rate more rapid than we can do anything about unless we actually start trying and even then it's not guaranteed, but at least it's better than building a world where people. Won't have clean water or suitable living environments we need to make change and we need to do better the approval of this major AI data center will have incredible consequences and possibly undoable completely. We urge you to look at the facts and listen not the money behind it the facts are this is killing our world as we know it rapidly not just our world but us imagine your grandkids your kids growing up in the world where they can't even have drinkable water where they're boiling outside because the temperatures are constantly rising. The rain cycle cannot replace the amount of water. It takes to cool down a data center let alone one at this massive destructive size your positions are to be for the people and what is best and if you approve this AI data center that is actively going against your position. Therefore, you don't deserve it with no disrespect meant however it is true. Don't let those millionaires take what is already been taken so many times from New Mexico constantly used and drained for its resources but never actually given help. This is the time where you can put your foot down and say no more and make a difference and do better for the people who lived there and overall for our country please read this and the other thousands with deep consideration and compassion corporate world doesn't mean that you're not human	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Rachel,	Mapes	I am a native to NM and I am very concerned about Project Jupiter. Any amount of vague "economic benefit" should never outweigh the cost of dumping chemicals, poisoning our air, and stealing our precious water. I am very concerned for the future of our planet and this project will do more irreparable damage to the planet and the people living on it. I urge you to deny this permit. Thank you for your time.	1	Merged Document	No	[redacted]			Yes					Yes		8/17/2026
Angelina	Ortiz	July 2nd 2026 As were approaching summer the rio grande has been dry for almost 4+ weeks now. There's a lot of people that depend on this water to be running. There is also people that use the rio grande river for numerous things. Like fishing, swimming, kayaking, traditional ways in use of the native americans around the rio grande river, and of course crops and fields use the same water. They plants will be affected. With project Jupiter it will not only hurt are water source but are animals the Enchanted land that we New Mexican's call home. There is no need to build the "biggest Ai center" its honestly bogus. What will are children and grandchildren have in the future? WE DON'T NEED AI! These kids and everyone else has a brain that God gave them. they need to academically push There brains to limit. There so much to learn without AI in New Mexico lives	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Fathima	Noufal	Dear NMED staff, My name is Fathima. I am a Saudi Arabian resident, living in Jeddah, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. We have lived thousands of years without AI. We don't need AI now. But we have never lived, nor can we ever live without our earth. I'm a young citizen concerned about the climate change and the deteriorating state of earth. We have evolved too much, but as of now, all these changes are reversible. So, lets halt this. Let's prioritize mother earth over technology and innovation. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Sincerely, Fathima	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	Yes	8/17/2026
Krista	Sherman	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Daebee	Fufa	My name is Daebee Fufa. I am a California resident, living in Cerritos, and I am writing because I am concerned about the risks and harms Project Jupiter poses to us. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. This data center will very likely be detrimental to the surrounding environment, and cause health problems for residents. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Daebee Fufa	1	Merged Document	No	[redacted]					Yes		Yes		Yes	8/17/2026
Anonymous	Anonymous	Hello, I am writing this as a person who is struggling with the effects of the climate change and wants to actually do something to change this because I still believe humanity can make a change this situation. The Government should deny this air permit as soon as possible. It's not only affecting the people around it and the surroundings next to the area but our planet. Even right now we are struggling with extreme heat because of the climate change. If this project comes to life it will release up to 10 million tons of climate warning greenhouse gasses every year. This means that the CO2 pollution alone will heat our atmosphere at a much faster pace. Can you imagine trying to survive in a much worse heat while we already have people dying because of the current heat. This project would erase most of the climate progress we have made in the last two decades. When we run out of time even money can't bring back the beautiful planet we had. Another problem then the greenhouse gases are the water amount they use to cool down their data centers. When we have ai like ChatGPT already using 39 millions of gallons of water every single day. And a bigger project like this would use even more gallons of water leaving us with no more drinkable or useable water. Oh and let's not forget the animals that are about to go extinct. What do you think will happen to animals if we ruin their homes. Is the project happens just like how we would not survive also the animals would not survive. Its because we are ruining beautiful species life's with our own hands. And we know that if we don't have them the ecosystem would collapse but since people think money is much more important then this they still try projects like these. As I said in the beginning I am writing this because I still believe we can change and take action immediately. Small changes are not always small. The impact can be big. Like this we can save our future from those who don't care. I still believe in humanity that we can change stuff. Let's get together and stop this awful project for the environment. For a better future with the animals and our loved ones we should stop these kind of projects especially project Jupiter immediately.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Anonymous	Anonymous	This data centre has a strong potential to do more damage to Doña Ana County, whose air quality already does not meet federal standards and a refusal to consult with them is evidence of government sponsored racism. The public should be given an additional 60 days to review the air quality permit, which they should realistically deny given Bloom Energy's history of dumping hazardous waste.	1	Merged Document	No	[redacted]				Yes				Yes	Yes	8/17/2026
Andrea	Cooper	There is no reason for these data centers when the detrimental impact they are having on the environment is already being seen. They are not benefitting us they are just bringing us closer to not having an earth to inhabit. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
jack	pridmore	We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Harini	Kumar	The future is under threat with this proposed air quality permit. 10 million tons of carbon dioxide pollution into the environment is going to dry up the water that sustains our communities and at the end of the day, that is environmental racism. The residents of this city are breathing some of the most compromised air in the country, and now you expect it to get worse, and for us to stand by. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. I am enrolled in college classes as a high school where I learned about these air pollutants that pose extreme risks at low levels. How can go to school knowing that this is the environment i will live in, which will inevitably ruin my future? My education will mean nothing with permanent brain damage or breathing complications that will stop my life before I can truly start it.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026

Anonymous	Anonymous	Please do not continue with this project. It is very bad for the climate that you "want to save" but releasing carbon dioxide will just make the air quality for the people and CHILDREN living in New Mexico and atmosphere even worse. This planet can't take more of this soon and we only have 3 more years to save it, knowing the individual industry it will probably take you 3 years to build and then it's to late to even do something. AI is so bad for this planet and humanity, we CAN live without it and have for hundreds of years. You are blind to not see the problem in this. Future generations won't live if you do this. I will continue to make my voice heard and speak up because you big people won't do anything and your pathetic "solutions" only makes it worse. There is other ways to get messages to the world then to use AI, you're just lazy and don't want to work 1 month extra to ACTUALLY do something for once. And don't just sit there saying "we don't have time" "there's no money" but you're just shortening it by using AI instead of hundreds of capable minds out there. Also if you THINK for yourself you would realize that the money you are putting in to build this can be used to save the climate in other ways. Then you do have millions of dollars. It is HIGHLY toxic for the planet, animals, humans. EVEN YOU. Yes it effects you to, crazy isn't it. You don't get away from this because you're in the building. The amount of water per day is absolutely insane and not okay at all. All this massive amounts of C02 will make the oceans more sour, heat up and kill habitats and eco systems most of marine animals live in, make your water source worse and we won't have any water to drink because it's so horrible quality. Just THINK for once in your life. You are killing yourself by doing this.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Kathryn	Laintz	Any New Mexican is familiar with the names Las Conchas and Calf Canyon/Hermit's peak in relation to forest fires. These fires collectively, have irreversibly decimated half a million acres in our state. Burns like these are scientifically classified as "Megafires", a term developed to classify unnaturally devastating fires, whose characteristics such as intensity, size, and uncontrollability, are a direct result of climate change. Warmer temperatures, drier seasons, and prolonged drought are directly linked to increased greenhouse gas emissions, decreased rainfall rates and snowpack, and the gradual die off of our forest plant species. Megafires in New Mexico have caused billions of dollars in damage. Destroyed homes, jobs, recreational areas, sacred spaces for our native peoples, and so much more. These fires changed our state forever, and have broken the hearts of countless New Mexicans. I personally fear summers in my state, as we can now never predict whether or not a catastrophic fire like these will happen again due to the now only worsening effects of climate change. No amount of proclaimed growth and financial opportunity promised by project jupiter is worth another NM Megafire. There is no conceivable way millions of tons of greenhouse gas emissions created by a data center will not put our entire state at risk. Lining the pockets of a tech billionaire and assisting Oracle and OpenAI in attempting to dominate the AI industry is not worth placing our entire state at risk. Please listen to the words of people who are writing these comments out of love for New Mexico. I love my beautiful state. I do not wish for a future where there is nothing here left to	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Emily	Freeman	Dear NMED staff, My name is Emily Freeman. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The last thing we need in New Mexico is a data center. We are in a desert, currently in a drought, and the summers are only going to get hotter. The impact this data center will have on the environment and the surrounding communities will be detrimental. Doña Ana county has a rich history, and New Mexican families have been living there for generations. The data center will only cause harm to New Mexicans—affecting the environments, families, and communities who make up the culture and beauty of the state. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Emily Freeman	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes		Yes	8/17/2026
Clodagh	O'Farrell	I am from Ireland and you may think this isn't going to affect me but no it will it's not going to just affect nearby residents but the whole world we have 3 years left to reverse Climate Change or else we are pretty much doomed and you are trying project Jupiter Ai used millions of tons of fresh clean drinking water that is needed for people and ecosystems and you're wasting this all because of your need for more Ai and 10 million tonnes of carbon dioxide is going to destroy this planet.We don't need more ai we need genuine compassion from people when the world is ending and there's no food or water left you can't eat your money	1	Merged Document	No	[redacted]			Yes	Yes					8/17/2026
Ekaterina	n/a	Dear NMED staff, My name is Ekaterina. I am not a New Mexico resident, but I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I live on the other side of the planet, but a project this big will make irreversible damage to our planet as a whole, but especially to New Mexico. The project's proposed fuel cell powered grid is concerning for many reasons: •It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. •Fuel cell technology or a centralized waste system has never occurred at this scale. •Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Ekaterina.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Ava	Engles	Changing the technology does not mean changing the outcome, I do not want Ai to use all of New Mexico clean water, the Rio Grand is already dried up and I do not Ai to use more clean water, project Jupiter is made for millionaires and not everyday people! Keep this Ai data center out of our community!!	1	Merged Document	No	[redacted]			Yes						8/17/2026
Peggy	Schott	We need to either stop with all these data centers or put rules in place that protect our water, air and soil and wildlife. We have one going up here, the city of Cedar Rapids had a group working with them, then they jumped ship looking for a new site because they decided they didn't want to work with them. Utilities are already high enough here and the data center was going to make them worse.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Anonymous	Anonymous	This project is dangerous for the environment, the air, the pollution in general, what you're doing is unnecessary and completely awful. People live on those lands, animal too. The mass is of water is going to ruin our water stock cause first it's not unlimited, the residents around are going to suffer the consequences of that by getting polluted waters by your abusive use of DRINKABLE. More and more people are getting away from AI, are turning to a more nature friendly methods. People are hating AI, more people are getting away from all of these pollution factories. Stop it. We do not want that on our lands. We do not want the consequences of YOUR actions on us. The heatwaves, the ecosystem dying because of what you're doing. The water you're going to us. The natural resources you're destroying with that project. The air quality permit application should be denied and approving this permit would be government-sponsored environmental racism Children live around here, the damages of this project could hurt and even kill not just them but the population! And longer and extreme heat waves will not just affect them but you too by premature deaths! New Mexico doesn't want that, the rest of the world doesn't want that. Nobody does. Stop this project for the survival of our planet and yours. If the heat grows and the ressources are gone, we're doomed. Save yourself by stopping this project, save us.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Farin	Bustos	I do not want any form of any data center in New Mexico! Do not build project Jupiter! There are endangered species of plants and animals that live in that area, project Jupiter will ruin their habits and is illegal! Data centers hurt New Mexican! Stay away!	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive			Yes				8/17/2026
Emma	Thorp	I oppose the construction of Project Jupiter. The southwest is already struggling with the effects of climate change. Outside of the massive amounts of water this project would require, it's annual energy use would have detrimental effects not just on the local scale but worldwide. Do not build Project Jupiter!	1	Merged Document	No	[redacted]			Yes						8/17/2026
Taniyah	Grant	We should not be building a data center that will cause harm to not only the environment close to the center but to the planet itself. AI is not a need it is a want, the planet however, IS INFACT a NEED. Climate change has already been affecting us and our planet and instead of taking action to prevent more damage this plan would make it worse. I doubt the residents located near this proposed data center would agree with it being built. Therefore, I propose that a meeting should be had with the residents that provide them factual information on this project how it can affect them. There should also be a translator present at the meeting so no word gets lost. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. That is the least they are owed in the disheartening attempt to ruin their environment and harm our planet for the greed of AI. I do not agree with Project Jupiter.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	8/17/2026
anonymous	anonymous	the proposed idea will cause health issues for thousands and speed up climate change, leading to the deaths and destruction of thousands more. we can survive in a world without ai, we can survive without data centres. we cannot survive on a planet this broken. there is no second earth	1	Merged Document	No	[redacted]					Yes				8/17/2026
anonymous	anonymous	Hello, I'd like to oppose the idea of 'project Jupiter', as i believe that this will most likely ruin the planet and our ecosystem even more than it is already. My first point is that the power plant will release up to 10 million tons of warming greenhouse gasses - this will contribute to climate change horribly and will singlehandedly erase all the progress we have done to reverse it up until now. Second, this is more greenhouse gas pollution than New Mexico's three largest cities combined - as you may know, that is an incredible amount of pollution and adding onto it is definitely a big mistake. I believe that this planet is already suffering enough, people are already dying from the heat and animal species are going extinct because of climate change - people are actively trying to make the planet a better place, trying to fix the damage and what project Jupiter is doing is the exact opposite - i believe we can survive without AI and many other people share my opinion - we don't need another AI database - it's either that or our only home, the planet that lets us live and the reason as to why we haven't gone extinct so long ago - the Earth. I believe the correct choice is obvious here. Save the planet. Save our home.	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
anonymous	anonymous	i am asking that you deny yucca growth infrastructure air permit as the many people who live here would be in danger and in harm. Not to mention, the carbon dioxide and toxic chemicals will only pollute our world more and more and will SEVERELY impact our future and this generation	1	Merged Document	No	[redacted]				Yes	Yes		Yes		8/17/2026
Katalina	Davis	We literally dont need ai? Do you guys not see how much it is affecting us. Its taking billions of gallons of water a daily, and now this project is a thing! We're tired of ai. We were doing perfectly fine without it. We're corrupting our brains if anything. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Haley	English	Water sustains all life. Water is life. Water is not an infinite resource. The Rio Grande is dry, we're in a multi year extreme drought, and questions are being raised about the sustainability of our current water usage. Because of this it is imperative for our communities to be heard and upheld especially concerning Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. And/or legislation put into place to ban all data centers state wide. There are detrimental effects of allowing Project Jupiter to continue. I spent all last week in downtown Albuquerque talking to Project Jupiter Canvassers. These are not people advocating for anything they care about. Most of them aren't even fully aware of what they're being paid to do. Project Jupiter is preying on our community by paying folks to not be transparent in order to access signatures in their favor. However, I know that when I speak to people about this happening they are outraged and unaware. And that's the only way this could ever get pushed through. By using money to claw their way in. I point this out because it shows that Project Jupiter's only goal in coming here is to use their money to extract from the land and people and to then put more money in their own pockets. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I think our planet deserves to have clean, fresh air. Big corporations need to at least think of their consequences and stop their actions. They're already destroying the lives of underwater creatures, and now they're going after us and other lives on this earth. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I oppose project Jupiter because it's a waste of water resources along with it causing huge amounts of pollution. It's a threat to the ecosystem and will make global warming worse than what it currently is. It's a waste of money to do a project that's just going to pollute the air and water for something that isn't even useful. Worthless data centers like this is going to make it impossible to try and reverse global warming.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Anonymous	Anonymous	New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government . In my opinion this is a very worthy cause that would benefit New Mexico's Environment Department abd help them to make the Environment in New Mexico flourish .	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Dominique	Johnson	We are already in a massive drought in 45 states, in part because of data centers, we do not need a massive one sucking up even more water and causing us even more water problems, air problems, and overall destruction. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. CLIMATE CONCERNS Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The proposed "micro" grid has a 2,462 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. ENVIRONMENTAL JUSTICE Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana county near the site have not been properly notified of this air permit application request. FUEL CELL TECHNOLOGY IS UNCERTAIN Fuel cell technology has not been deployed at this scale. Fuel cell technology has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. The Application is based on pollution testing from a very small unit. The testing unit is only 65kw, while the power plant is 37,000 times that size. TOXIC WASTE Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the desulf canisters is exempt from air permitting regulations (because there is less than 1000 lbs/yr). Bloom was fined for improper hazardous waste handling in Pennsylvania and Maryland. In 2020, Bloom was fined $210,000, and then $1,161,000. GOVERNANCE NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. NMED should not overlook the overwhelming community concern expressed in the last public comment period, which still applies to this same project. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes	8/17/2026
Deborah E.	Mcneill	Project Jupiter, a concept that we don't need in the world, will only aggravate the existing problems and make the situation even worse. With our limited water resources being wasted on AI development, the temperature is alarmingly rising, threatening to ignite forest fires and dropping the world into freezing temperatures, even causing boiling water to freeze in an instant. If Project Jupiter continues, the consequences will be drastic for the planet and the people on it. As a 19-year-old college student, I aspire to live a life free from fear for my future and the future of others. However, as I witness the world's deteriorating state, I believe I I should add to the positive cause instead of the negative and not sit back. Instead of investing in Project Jupiter, I believe we should redirect our efforts towards cleaning up the ozone layer and reversing the damage caused by our past decisions before it becomes irreversible. Many individuals are dedicating their time and energy to combating environmental issues and adopting clean fuel and energy sources to create sustainable solutions, rather than adding to the harm to our planet. It is important that we end Project Jupiter before it is too late for all of us.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Tom	Arthur	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is such a concern for me that despite the fact I live in England and this still will affect me.	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
anonymous	anonymous	We never needed AI before, why is it that now it is the main focus of all the funding in the world when tons of people are suffering from poverty, abuse, hunger, and many more. I encourage all those in favor of this project to remember that this will be detrimental to Earth and consequently to our children's future. This power plant will release 10 million tons of greenhouse gases per year and due to it being an AI data center, it will also affect the water quality of the area around it. If NMED truly is acting in the interest of its community, it should reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Anonymous	Anonymous	This generation, the next generation and all future generations deserve to see the trees and hear the birds and feel the sun on their face. AI is a stain on this world and I get that it has many useful features relevant to many fields, but that doesn't change the fact that AI is contributing to the global climate change issue. Millions of people suffer water scarcity everyday but these useless buildings filled with machines use up tons and tons that can be given to the peope. These data centres take up massive plots of land that can be used for better infrastructure or farmland that can benefit the people. These data centres are ecological deadzones with miles and miles of concrete and asphalt that nothing can survive. Why ruin a whole generation's chances of seeing the beauty of planet Earth all for a quick buck that won't follow you when you die? Why ruin the future generations chances of seeing the beauty of the world all because someone wanted to profit off the Earth? Please hear the pleas of the masses. The world is suffering. There is so much chaos that we cannot breath. Please, please, please listen.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Desiree	Sams	I like many other people in the world hope to one day have a family. I don't want my future children to worry about having water and clean air. I also don't think it's fair that people are paying for these data centers when there are people making millions off dangerous data centers. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Klaudia	Socha	I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities.	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
Zae	Reynolds	Using your system with the methane gas is gonna leak quite a bit of chemicals into the water, air, and land that aren't natrually supposed to be there. If you think back to chemistry you will remember that this isnt just gonna leave or break down, it takes chemicals thousands of years to break down using the half life scale. For future generations they're gonna have to deal with having chemicals in their drinking water, the air they breathe, and all for what? For AI fruit videos kissing. Also the pipelines are gonna destroy the land that a lot of people still rely on to this day, for food like hunting and farming.	1	Merged Document	No	[redacted]			Yes		Yes		Yes		8/17/2026
anonymous	anonymous	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a concerned member of the public. I am submitting this comment because I believe this mega A.I. data center development poses serious, unaddressed risks to public health, air quality, and environmental justice in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants. Project Jupiter's power plant would release up to 10 million tons of climate-warming greenhouse gases every year, more than Albuquerque, Las Cruces, and Santa Fe combined. - This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cells accumulate hazardous contaminants in "desulf canisters," and Bloom Technologies has already been fined over $1.3 million combined in Pennsylvania and Maryland for improper hazardous waste handling. - Fuel cell technology or a centralized waste system has never occurred at this scale. This proposed grid is roughly 1,000 times larger than the largest existing Bloom fuel cell installation, yet the pollution testing behind this application comes from a unit 37,000 times smaller than the proposed plant. - Surrounding communities' air will be negatively impacted by this development. And most importantly, so will our planet. Please just help make the world a better place. Sincerely, A concerned human :)	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes		8/17/2026
Nokubonga	N	This project is bad for the environment. The greenhouse gases it emits will not help climate change and global warming. We want a future for the following generation and the current one as well. It will not benefit anyone expect the rich as they keep getting richer. As it is being built close by to a school the health concerns are huge. It could lead to many injuries and deaths from the gases that are emitted. As well a data centre requires water to cool it down. Scientists are telling us that water is being a scare resource so using 1 million gallons of water per day isn't okay. Around 2 billion people in the world don't have access to clean drinking water and wasting it on something we don't need and haven't asked for is useless and quite wasteful. The ozone layer is just recovering from our doing putting more greenhouse gases into the atmosphere will back track out work	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Em	Anonymous	Project Jupiter is harmful to the enviornment and planet in a serious enough way that it will impact people as far as I am from NM and further. When you bend to the whims of corporations, what do you hope will occur? When the last of our plant life dies, our elderly and children can't hear anything over the overpowering sound of data centers, and people start to fight back, who will they blame? Do not let it be you. Do not participate in the growth of AI, the prioritization of money over humanity. It is more than a reasonable demand that those impacted may be involved in the permission of this data center. Allow the public, in New Mexico and beyond to participate in the decision making. Oracle, its partners, and its executives will not be harmed by the enabling of this super campus. It will be real humans, people who were born and raised in New Mexico. Allow them to be able to have an additional 60 days to review and comment. If simply striking it down is not within the realm of possibility, though that should be the priority especially with Bloom Energy's history with dumping waste, a public hearing MUST be held in Santa Teresa in both English and Spanish, available to participate in virtually.	1	Merged Document	No	[redacted]					Yes		Yes	Yes	8/17/2026
anonymous	anonymous	STOP PROJECT JUPITER !!! Project Jupiter is a horrible, disgusting proposal and will destroy ecosystems and lives. AI is not needed and we are completely fine and capable of living without it. Data Centers are horrible and use up so much water which terribly harms communities. They cause pollution and global warming, contributing to the endangerment of polar bears. This project needs to be stopped. The public should be given an additional 60 days to review and comment on the air quality permit, so that community members can participate equitably. The air quality permit application should be rejected due to Bloom Energy's history of illegally dumping hazardous waste. If the permit is not rejected, a public hearing must be held in Santa Teresa , in both English and Spanish, with the option to participate online. Approving this permit would be government-backed environmental racism , because the people of Doña Ana County already suffer too much from environmental pollution.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
anonymous	anonymous	I would rather leave out who I am or where I am, but I ask that you reject the Yucca Growth Infrastructure's air quality permit. With everything else happening to the earth, I don't think it's a stretch to say rejecting this project is common sense. We, as humans, do not need AI. From personal experience, AI only damages and destroys. Unrestricted access to AI causes students to cheat on tests and assignments, therefore the students become illiterate and feel like they don't have to learn anything, because they rely on AI to do it for them. This permit should be denied as Bloom Energy's history of illegal and hazardous dumping. If this permit is not denied, a public hearing in Santa Teresa, with the option open for the English and Spanish to participate. Thank you,	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Michael	G	I strongly urge the New Mexico Environment Department to deny Project Jupiter. New Mexico is one of the driest states in the nation, and our limited water resources are already under immense pressure from prolonged drought, population growth, and agricultural demands. Approving one of the world's largest AI data center developments places an unnecessary burden on our state's natural resources and risks consequences that future generations will be forced to bear. While the developers have modified portions of the project in response to public criticism, many fundamental questions remain unanswered. Residents deserve complete transparency regarding the project's long-term water consumption, energy requirements, emissions, environmental impacts, and the cumulative effects of future expansion. A project of this magnitude should not move forward while so many uncertainties still exist. Economic development should never come at the expense of public health, environmental sustainability, or responsible stewardship of New Mexico's natural resources. Promises of jobs and investment cannot replace clean air, reliable water supplies, and public trust. The approval process surrounding Project Jupiter has already generated significant public concern, legal challenges, and calls for greater transparency. Rather than rushing to accommodate one of the largest AI infrastructure projects ever proposed, New Mexico should prioritize protecting its residents, its environment, and its long-term future. I respectfully ask the Department to deny the requested permits and require a far more comprehensive environmental review before any further approvals are considered. New Mexico deserves economic development that is transparent, sustainable, and truly in the best interest of its people—not development that asks residents to accept irreversible environmental risks for uncertain long-term benefits	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	8/17/2026
Ollie	anonymous	I've lived in New Mexico all my life and I drive past the Rio Grande almost every day for work. I'm sure almost everyone that lives here can agree they've never seen it that bad in all their time living here. The project is dangerous and the permit should already be denied given Bloom Energy's history of illegal dumping of hazardous waste. If not denied a public hearing needs to be held in Santa Teresa in both Spanish and English and any other accessibility needs. This project is going to produce more air pollution than the environment can handle. Deny the permit. Protect our planet.	1	Merged Document	No	[redacted]			Yes		Yes		Yes	Yes	8/17/2026
Marian Grace	Janaban	I have seen the effects with ai data centers even in it's small scale and this shall destroy all of us. Data centers have been the cause of countless displacements, pollution to the environment, and rapid effects in wildlife animals being harmed in the process. This is unethical and should be further studied rather than be built in this current time and pace. Please reconsider and think of the people. New Mexico has their own rights to protect their own environment and they also have the very right to review and comment on the situation. With the past history of Bloom this needs to be denied air quality permits because of the history of illegal dumping of hazardous waste. If the permit continues to be given there should be a public hearing for the people of Santa Teresa. It's the best interest to always ask the people who live there. - Marian	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Laura	Jaramillo	I ABSOLUTELY am against this horrible idea. Not only because of all the negative environmental impacts, but the shadiness of the entities aggressively and unethically pushing it. They are willing to employ MANY people to swarm residents out in the community just going about their day, and gaslighting them into giving personal information like their names and email addresses. They are then abusing the information to falsify comments on this very site in favor of the project! This is absolutely concerning and absolutely despicable! This says volumes about their character and greed. THIS SHOULD BE INVESTIGATED TO THE FULLEST EXTENT OF THE LAW. Please take their actions as evidence that they have unethical and deceptive intent, and they should NOT be granted the permit nor the permission to destroy our communities. They should not be allowed to further deceive and exploit our state! We as a state have far more to lose from this project than we have to gain. This project is going to devastate our community with all forms of pollution, not only air quality. There will also be noise pollution, as well as every other kind possible. It will displace wildlife, destroy their habitat, and lower property values all along the proposed path, with ripples that affect the whole area. All to line the pockets of out of state billionaires. They aren't building these things in their backyards... think about that for a moment!	1	Merged Document	No	[redacted]				Yes	Yes	Yes			8/17/2026
Anonymous	Anonymous	Approving the permit would absolutely be environmental racism. We dont need more Data centers. What we need land and plants and trees and animals. The public should be given additional time to review the permit and it should ultimately be denied. The air quality alone would suffer greatly, especialy given Bloom Energy's histiry with illegal waste dumping. A public hearing should be held in Santa Teresa. We, the people, deserve a chance to defend our public and wild land spaces	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Nevaeh	Anonymous	Why? Why are you killing us? This is a nightmare we can literally prevent but you're genuinely proposing a climate disaster. Yet you're playing it off with big fancy words and a stupid false future where everything is great. We don't need to be perfect! God forbid i want to be human. We will die but the earth won't. the earth will recover. We will die and we won't be here - YOU won't be here to see it regrow. I want to live. I want to live my life and watch my family grow old. I want to enjoy stupid moments with my family. Yet, for some reason it is selfish. It's selfish for me to want a life not made for efficiency but for being human and for being imperfect. But building this data centre was never for perfection was it? You want control and money and now we are going to pay the price for your cruelty. This is a front and people know it. One day when everything is ruined for us this will come back and bite you. When we are dead or if you survive somehow you will realise your mistakes and it will be too late. At minimum, give the community an additional 60 days to review and comment. If you let this air permit pass you are literally allowing people to inevitably succumb to harm or even death. Please deny it. And if for some forsaken reason it is accepted we demand a hearing in Santa Theresa. Please don't make this mistake.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive			Yes			Yes	8/17/2026
Hemen	G	I really don't want to see this data center being built. It will ruin the wildlife around the area and deplete water that is already limited. It will harm the people and the animals already living there and there's no way people can expect me to believe that this is good. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026

Anonymous	Anonymous	Data Centers pose great risks to our environment and the community. New Mexico is a beautiful state, which collected $8.8B from tourism in 2024. Project Jupiter will tear away from the natural beauty and resources that New Mexico is blessed with. The benefits of the data center cannot outweigh the charm and character that the state was built upon, and that millions every year visit to witness. The New Mexico community already faces a disproportionate amount of enviromental pollution- and to exacerbate that would be a step backwards. Governmental systems were put in place to help support and protect the citizens rights, and to improve safety and living conditions. The approval of this data center would equate to the complete opposite. I urge that the needs of the current citizens and future generations are put first. "Only when the last tree has been cut down, the last fish been caught, and the last stream poisoned, will we realize we cannot eat money."	1	Merged Document	No	[redacted]					Yes						8/17/2026
Tobey	Quitoriani	I don't want project Jupiter to continue because of the amount of carbon emissions the data center will release once it's up and running. The amount of people and places that'll be affected is huge in the long run, I don't want my people or my habitats to be ruined by an AI data center that will not be of proper use to the rest of humanity. I do not know the proper scale of emissions project Jupiter will release into our atmosphere but I know that if this data center is built, it will affect the lives of many, and eventually it will affect me, my family, and my friends, and my community. I don't wanna see this data center built.	1	Merged Document	No	[redacted]				Yes	Yes						8/17/2026
Lijin	A	I am a resident of Egypt and the pollution this project will cause will affect my family's health, our environment and will cause more problems for future generations.	1	Merged Document	No	[redacted]					Yes						8/17/2026
lucia	villegas	El Proyecto Júpiter es una estrategia sucia para sembrar división, desprestigiar a líderes progresistas como Iván Cepeda y manipular la voluntad popular. Detrás de este supuesto 'plan' hay intereses oscuros, financiamiento cuestionable y un intento claro de robarle la voz al pueblo con campañas de desinformación y odio. No permitamos que unos pocos con poder jueguen con nuestra democracia. ¡Exigimos transparencia, ética y respeto por el proceso electoral! Si quieren competir, que sea con ideas, no con mentiras y estrategias criminales. ¡Fuera el Proyecto Júpiter!	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive									8/17/2026
Constance	Barnes	Carbon dioxide emissions of this extreme amount will be extremely harmful. Not to mention the space that data centers take up and the water that they consume. The combined emissions and space will cause the temperatures to go up and will compromise water and land in the surrounding area. Emissions of that degree would have larger scale impact than just the surrounding areas.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
Megan	Reneau	Project Jupiter is fundamentally unacceptable for the world we live in. In New Mexico, we don't have enough resources to host any data center without it being detrimental to the community from water to air. The people running Project Jupiter have no understanding or empathy for the destruction of environments and peoples lives that they cause. All people, namely New Mexicans, deserve an environment that is safe, respected and clean for us to live in. Say, "No," to Project Jupiter in any form, especially for the air quality application given their history of illegal and hazardous dumping. We need an extra 60 days for public review for this, so more people can research and comment on this (likely) environmental catastrophe. If the application isn't denied, there needs to be a public hearing in Santa Teresa (available in English and Spanish) with the option to attend virtually	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026
Anonymous	Anonymous	I don't understand why you want to fast track boiling and destroying the earth if it means you won't be around in 10 years to enjoy the money. If you aren't 100% certain all will be okay as a result of building someone, why even consider it? Have some humanity. Do the right thing. You know New Mexico needs an additional 60 days thinking time. This decision is permanent, an irrational uninformed decision is the last thing we need. You know giving bloom the permit environmental racism sponsored by the government. Doña Ana County has been polluted enough and you think doing this will fly under the radar due to your systematically enforced prejudice, and that's disgusting. At least give it a public hearing, if not, you may as well just dump hazardous waste all over the country. Oh wait, Bloom has already done that. Please, for the love of our planet	1	Merged Document	No	[redacted]					Yes	Yes		Yes	Yes		8/17/2026
Lindsay	Kronmiller	The air quality in southern New Mexico, west Texas and Juarez is already abhorrent. There are too many days where we have warnings. Adding yet another data center to the equation affects far more than the Santa Teresa community you're building in. It affects the whole region. Millions of people. Data centers should not be allowed in the desert where it's too hot too cool them. They shouldn't be allowed in places that already have air quality issues due to the environment and industry across the border that can't be controlled. Please stop this data center for the millions on the area who already suffer from poor air quality. This will only make it worse. Please consider the health and well being of the average person over the wealth of a few.	1	Merged Document	No	[redacted]				Yes	Yes						8/17/2026
briana	lebron	Ai and data centers will destroy our planet as we know it . data centers have the option to use dirty water to cool their systems yet they continue to choose clean drinking water . and what does that say for the reality of new mexico . having this data center will deplete quality of life in many aspects but most importantly air quality .	1	Merged Document	No	[redacted]			Yes	Yes							8/17/2026
Bianca	Opio	I am opposed to project Jupiter. Ai data centers take up too much space, water, and power, for what they're worth. They drastically increase the temperature around them, and make utilities for the people who live close by more expensive. They also pollute the area around them, leaving sediment in the water and spewing toxic gasses in the air. We have bigger problems here in this country and spending money on a data center is wasteful. Clearing out land for a massive ugly data center is a waste of time and resources and I heavily oppose it.	1	Merged Document	No	[redacted]			Yes								8/17/2026
Joshua	Anonymous	Please please PLEASE don't allow for this data center to be built. The many data centers that the world has have clearly shown how damaging they are, just imagine what kind of damage a mega data center would do. Even worse, the air quality where the construction site is is degraded enough already. Why ruin the beauty of nature we were blessed with just for billionaires to ruin it? Do you want us as a society to suffer? Not to mention, $165 BILLION to make this data center a reality? Mind you there's so many other better and more humane ways to spend all that money, like ending world hunger. The list goes on and on. Not only that, but there's so many more ethics to consider with the use of A.I. but in short, it largely limits a lot of creative floe through people. The public, both living in and out of the community, should be given an additional 60 days to review and comment on the air quality permit so community members can participate and have their voices heard. Additionally, the air quality permit application should be denied considering Bloom Energy's history of illegally dumping hazardous waste. If the permit is not denied, a public hearing needs to be held, in both English and Spanish, with an option to participate virtually. Approving this permit would be government backed environmental racism as residents of Doña Ana County are already very negatively impacted by environmental pollution. Once again PLEASE do not let this data center happen.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Kevin	Wilson	I do not support Project Jupiter or ANY Data Center taking up any space in the state of New Mexico. Data Centers do not belong in New Mexico. They pollute the air, water, land endlessly. We've heard horror stories of other places that have been grossly affected negatively. Do not sacrifice our beautiful desert full of vegetation and wildlife for AI Data Centers. We don't need it. Mother Nature needs us to protect her. Otherwise in the end we suffer once the ecology around us dies out. We all know this. Do not approve air permits for Project Jupiter or any Data Center. We need our water! Our wildlife need our water! Our wildlife need our desert! Our wildlife need our air! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026
Daubney	Boland	The air quality permit application should be denied. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]				Yes	Yes						8/17/2026
Blair	Jefferson	Hello, I lived in New Mexico my entire life. It's a beautiful state full of amazing people and climate. However, it's a desert. It's hot. Project Jupiter will only increase the intense heat's New Mexicans already experience. The heat, as is, already cause health issues for many New Mexicans. Furthermore, AI data centers will contribute significantly to the Earth's greenhouse gases, and further warm up not only New Mexico, but the globe. Additionally, AI data centers existing in other states and counties already pose challenges for their civilians. Many of those civilians experience an increase of direct pollution and lack of clean water (or water entirely). The figureheads of data center projects even have the gall to ask citizens to limit their water intake so that it may be used for their establishments. It's unethical and immoral to impose critical danger on New Mexicans without their best interest in mind. It's a shame that the innovation of AI is deemed more important than the wellbeing of New Mexicans. Fully understand these risks, and I sincerely hope this project does not come to exist. I truly believe New Mexico, its climate, and its citizens are worth far more than a data center. New Mexico is our home, there isn't another.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
Ivette	Rodriguez	NO TO DATA CENTER The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]				Yes				Yes	Yes		8/17/2026
Julian	Contreras	NO TO DATA CENTER The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes				Yes	Yes		8/17/2026
Anonymous	Anonymous	I have been living in New Mexico my whole life. I love it here. We have a bright and vibrant culture, beautiful nature, beautiful sunsets. And we have so many indigenous tribes out here. Project Jupiter is a disservice to our people, our land and our joy. Although New Mexico is lovely we are already lacking so many resources and Project Jupiter will only send us more down hill. Project Jupiter will also only be disconnecting us more from our ritual, our tribal materials and the ancestors way of living. Especially with the Tortugas Pueblo, and the Apache tribe located in the Dona Ana county. The air quality permit application for Project Jupiter should be denied given Bloom Energy's history of illegal dumping hazardous waste. Since I am indigenous, I have already seen the effects of land altercations in my family and disconnect to my culture, just as Project Jupiter would do. Since I don't support AI, and I value our land so much, I do not support project Jupiter. Due to these factors we should be given the chance as the public to express our voice and how it would effect us. We should be given the chance to have an additional 60 days to comment on the air quality permit. And if the permit isn't denied we should be given a public hearing held in Santa Teresa, and online in both Spanish and English.	1	Merged Document	No	[redacted]				Yes				Yes	Yes		8/17/2026
Ricardo	Bencomo	I DO NOT SUPPORT. This is terrible for the area that already has a shorts of water. The air quality would be decreased because of all the amount of power required for this facility. They are not welcomed in NM.	1	Merged Document	No	[redacted]			Yes	Yes							8/17/2026
H Saron	Anglon-Coleman	Just say NO to data centers. This will negatively impact the environment, won't give the number of jobs falsely advertised, and will negatively impact at least people's mental health! We need to protect and restore the environment and not just count of employment when our behaviors could make our cities/towns/state inhabitable. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. Data centers would make our air quality worse!	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Julia	Neale	Data centers in our community are not welcome. It is destroying the environment, and will be especially hurtful to our delicate community living in a desert. This is not acceptable, and will destroy wildlife. This will also hurt the health of ALL New Mexicans. The public should receive at leat 60 days to reveiw. Bloom's air quality permit needs to be denied due to its history of waste dumping. If the permit is not denied, there should be a English/Spanish hearing in Santa Teresa. This permit would be government sponsored environmental racism. Doña Ana county already faces subpar air quality, and is disproportionately affected by environmental pollution	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Anonymous	Anonymous	Dear NMED Staff, I choose to remain anonymous, but ai write this because I am concerned for the safety of our world, and of the people. I strongly advise for the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Climate Change has been changing at a drastic rate ever since humans have grown more and more reliant on machinery. Global warming has been harming our world for over a century, and the use of ai has sped up the process. With this powerplant, millions more tons of greenhouse gases will be released each year, doing nothing but adding more harm. This pollution is no small amount, and it will completely wipe out all of New Mexico's climate progress. Additionally, the project site will be built near school's, where children learn. As people, it is our duty to protect educational sites and systems so everyone can get their schooling. While the toxic pollutants are now under "acceptable" level, fuel cell generates hazardous waste. Bloom Energy also has a history of illegally dumping hazardous waste.Fuel cell technology is also not certain, as it has not yet been used at this register. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anonymous	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	Yes		8/17/2026
Maisie	Anonymous	I appose your project plans to create an unnecessary and enormous data centre. Building it would only lead to harsher liveable conditions for humans, animals and mother nature. Ai should not be top priority, its wasting money and incredibly unnecessary. This project will emit greenhouse gasses, overheat the earth, affect drinking water, and many more climate issues. It will drive anyone near away and shows no regard to the people/ wildlife or planet. its a corrupt project based around pure selfishness.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
anonymous	anonymous	I may not live near the data center, but I don't want the environment to get worse. To release 10 million tons of carbon dioxide pollution is outrageous when right now the Earth is barely surviving. Additionally, the amount of unclean water or worse, no consumable water, align with this project construction is really terrible for the locals. I feel like there will be no future if this goes on. I am a kid, I should be worry about school and not this	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
Anonymous	Anonymous	Project Jupiter is a risk to the environment and to those who live nearby. It poses a great threat to our ecosystems and wildlife, and prioritising economic success over health and the environment is purely selfish. This project will disrupt many lives, humans and animals, and should be stopped immediately. Additionally, fulfilling such would mean tonnes of water is wasted, even after the water crisis, further inflicting harm on communities and the wellbeing of the planet. Along with the copious amounts of greenhouse gases that will be pumped into the atmosphere. Project Jupiter is dangerous, and should not be continued.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
Addison	Gaynor	This project you are proposing and starting will ruin your communities. Especially your food chain, with how animals rely on plants and other animals, a data center the size of manhattan will quickly kill then off, endangering them. For your communities it means a lack of food for the people, it also means sicker citizens. With the amount of pollution this data center will produce, citizens, especially children are very likely to contact diseases such as cancer from the production. The amount of water ai is using is causing death and pollution to our sea creatures, which will once again affect our food chain, along with water. Changing the method of how you power it does not change anything as fossil fuels are one of the top ten reasons of global warming, actively killing our planet. With this you're killing the planet. There is no other planet for us to go to. You're putting the entire world at risk with this data center. Just because billionaires are paying for it, does not mean it's right. No one in the right mind would follow through with this solely because billionaires are paying for it. If you do follow through with this, you truly do need a mental evaluation on where your priorities for your communities are.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Reizen Chloe	Ambagan	As a concerned student, watching the push for this harmful project to be put in motion is extremely harrowing. It is unethical and dangerous to release a new source of air pollution into our planet. WHO data show that 99% of people and animals worldwide breathe air that exceeds WHO guideline limits and contains high levels of pollutants, with low- and middle-income countries dying from the highest exposures. Project Jupiter must not be allowed to happen for the wellbeing of our planet and every living thing in it.	1	Merged Document	No	[redacted]					Yes						8/17/2026
Oliver	earnest	I currently am a resident of a small village that is in the suburbs of Chicago, yet the amount of damage that project Jupiter could do will go just beyond locally and will affect people all around the world, worsening climate change issues and could kill off multiple ecosystems because of this. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Anonymous	Anonymous	Do not approve this project! As AI data centers have been rising up, more and more communities have been complaining of noise pollution, water rationing recommendations by their local governments for the benefit of private institutions. This project will further the climate collapse while providing a technology only useful to the shareholders and no one else. Vote no on Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes		8/17/2026
Anonymous	Anonymous	Las personas en Mexico y todo el mundo deben tener el derecho de vivir y contar con un medio ambiente sano, incluyendo las generaciones futuras, si destruimos lo que tenemos el fin de nuestras vidas será malo y el inicio de otras será aún peor, lo peor es el hambre, la sed y la escasez pues con ellas ya no podemos hablar de que hay una calidad de vida, por ello la solicitud del permiso de calidad del aire debe ser rechazada y en el caso contrario se deberá hacer una audiencia pública en Santa Teresa, tanto en inglés como en español, y con la opción de participar por internet para que sepan que las personas sí nos preocupamos por lo que nos va a pasar y no solo por los proyectos que benefician a los otros, porque NO apoyamos el racismo ambiental aunque esté apoyado por el gobierno, en el gobierno debe primar el interés en nosotros, no en nosotros primar el interés del gobierno.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive									8/17/2026
anonymous	anonymous	I do not want to see data centers taking up the beautiful, historic, agricultural land that is in New Mexico. I am also concerned that this data centers will use up drinking water, which would impact every single New Mexicans life negatively. New Mexico does NOT need a data center this large	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Barbara	McGuffey	Please DENY or at minimum DELAY for 60 DAYS the permit approval for Project Jupiter fuel cell technology and hold PUBLIC HEARINGS. This technology has never been implemented at the large scale proposed for Project Jupiter. The full environmental impacts at that scale cannot be known or quantified. Bloom Energy facts provided and past performance cannot be trusted given their history of violations and fines. The PUBLIC deserves further information, independent evaluation by experts in the field, and adequate time for PUBLIC HEARINGS and Comments. I applaud Senators Hamblin, Cervantes, Soules, and Steinborn for championing this issue for the public to request DENY or DELAY	1	Merged Document	No	[redacted]					Yes		Yes		Yes		8/17/2026
Meg	Freyermuth	I firmly oppose the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: 1) Bloom Energy's Fuel Cells are NOT clean energy – no matter what YGI may say! These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. For this to project to occur in an area with already some of the worst air quality in the country would be an egregious failure of responsibility for some of New Mexico's most vulnerable communities and environments. 2) Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico, and the county is consistently one of the poorest in the state. We also lack access to quality health care. This will be detrimental to our community's health. 3) NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. The organizers behind this permit application are engaging in predatory practices to gain supporters across the state, lying to the public about the negative effects this project will have on the state and region as a whole. 4) If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa. We who live in the dictionary affected communities have not been properly heard from or had ample time to understand and fight against this evil project. Thank you for your time.	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes		8/17/2026
Jasmine	Casas Flores	My name is Jasmine Casas Flores and I do not support Project Jupiter. I was approached by teenagers in a Smiths parking lot and was told my email would be used to send more information about the project itself. I never agreed to submit a comment in support of the project nor did I state I agreed with it. There is a massive water crisis in New Mexico that is expected to worsen within the next 25 years. Permitting a Data Center to tap into the little water we have, will be detrimental for everyone in New Mexico. I also have concerns of our electric grid not being able to sustain a project like a data center. I worry about the prices of electricity and water quality for the surrounding communities. I do believe that regardless of how the project plans to power their data center, it will have a negative impact on those communities. I do not believe they are using ethical methods to attain their support for their air permit. For these reasons, I urge the New Mexico Environment Department to decline this project.	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026
Stephanie	Welch	I am submitting this comment myself directly. This comment expresses my personal views. It has not been obtained under false pretenses nor is it being submitted fraudulently, as apparently some public comments on this application have been. The New Mexico Environment Department should deny YGI's application. The planned fuel cells will generate significant nitrogen oxides, carbon monoxide, and volatile organic compounds. These all have harmful health impacts. The permit would require the use of natural gas, which creates significant emissions that are harmful to human health and contribute to increased ozone levels. As a long-time resident of the impacted region, prior to moving to Albuquerque, I have personally seen and experienced how the region already suffers disparate harms in water quality and air quality. Approval of this application would further degrade community health and well-being and further mistreat a region whose rights to a healthy environment have been often ignored.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes				8/17/2026
Jasmine	Casas Flores	This is the comment I received an email for, that I never submitted. I only ever provided my email to the people from Project Jupiter to continue to receive more information. I also never provided my phone number.	3	Merged Document	Yes	[redacted]	Yes									Yes	8/17/2026
Lara	battilocchi	I am a resident of Rome in Italy and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. WE ALL LIVE ON THE SAME PLANET AND THERE IS NO PLANET B. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	Yes		8/17/2026
Anonymous	Anonymous	I do not live in the area that Project Jupiter is being built in, however, I do live on the Earth and it is very plausible for this project to affect the entire planet. Due to the large scale of damage, I strongly believe that Project Jupiter is a project that is harmful to our environment and possibly the entirety of humanity. Firstly, I would like to mention the Climate Clock. The Climate Clock is represents an estimation of how quickly the planet is approaching 1.5°C of global warming. These estimations are based on different sets of data and calculations. The reason why I am mentioning this is because it has estimated 2029 as the year of which the planet will reach the 1.5°C of global warming. That is in three years. This is not just an estimation; it is a countdown of how much time we have left before the planet possibly collapses. Trees, animals, even large populations of civilisation are at risk here. According to Yahoo! News, Training GPT-3 has emitted 500 metric tons of carbon dioxide into the atmosphere. Compared to this, Project Jupiter is estimated to have about 14 million tons of greenhouse gas emission. That is 28000 times more than Training GPT-3. If Project Jupiter is successful, how many years on the Climate Clock would we have left? Two? One? Less than one? As a young student, I understand that my words may have little to no effect on such large events. However, I wish to grow up, and I wish to have a future. I understand that this comment may not reach any place further than a few eyes of others, but I can do nothing but try to fight for the survival of our planet Earth. I apologise for my inabilities to articulate my proper emotions, but I do not want my home and my future happiness to be taken away from me without choice. Project Jupiter will most definitely be more than just a harmful inconvenience, but also a threat to Earth's survival. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Theodore	Taylor	I have no opposition to energy projects or industrial projects that stimulate the economy, however this project will not stimulate the economy. Rather, this project will harm the local economy by mooching off of our local infrastructure, which, by the way, is infrastructure that cannot physically handle the demand that this project requires. Data center construction has already led to sever water and power shortages in other places in the country, including areas with plenty of water. New Mexico does NOT have plenty of water. New Mexico is currently in a drought and can't afford to give up any more water, as nearly 80% is already going to agriculture, giving the remaining 20% away is a DEATH SENTENCE. Everyone will have to leave or die when there is no more water. Please think with your brain instead of your wallet, assuming you haven't already traded the former for the latter. NO DATA CENTERS IN NEW MEXICO.	1	Merged Document	No	[redacted]			Yes								8/17/2026

Anon	Anon	Project Jupiter sounds like a horrible idea. Why can't we use that land for farms or shelters or literally anything that will actually help people. All data centered do is take up space and pollute our air and water. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No															
Heather	Mullen	Mirrored Document The New Mexico Environment Department should deny this application. The planned fuel cells will generate significant nitrogen oxides, carbon monoxide, and volatile organic compounds. These all have harmful health impacts. The permit would require the use of natural gas, which creates significant emissions that are harmful to human health and contribute to increased ozone levels. The region already suffers disproportionate ozone quality and air quality. Approval of this application would further degrade community health and well-being and further mistreat a region whose rights to a healthy environment have been often ignored. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Bernadette	Hardy	Mirrored Document Oppose AI Pit Data Center My name is Bernadette Hardy. I am Jemez pueblo/Diné´aczé, and a resident of Bernalillo County district 3. Currently I live next to KAFB where we witnessed and live with the health impacts of a superfund site/ district 3 has been subject to Jet fuel spills, contaminated air, toxic ground water and toxic soil and now NM is under threat from Data centers! I know this area well where Project Jupiter is being built. Years ago, I attended El Pueo Community College near Wrinn where I lived with my family. This rural area is different but special, the cattle, farms, orchards, and people of San Lorid Pick and surrounding areas do not deserve this. This behemoth data center threatens the fragile eco-systems and life ways of the surrounding communities. The harm outweighs anything Project Jupiter lobbyist have shared with you. We have yet to know the long-term health effects of data centers and that should be concerning to you. Data Centers won't create the promised permanent jobs; research shows that the residents host the hit! Higher electric bills, higher water bills, increased cancer rates and no to mention the toxic produced water that comes from date centers, where will that water go? Research shows property values plummet when a date center is built next to homes. Project Jupiter AI Data Center is not ethical, not environmentally friendly and not fiscally responsible and the people that live there do not want it. Please Oppose Project Jupiter. Thank you. Respectfully, Bernadette Hardy Concerned Protect (505)387-7163 Hardy_bernadette@yahoo.com	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Patrick	McGuffey	Mirrored Document Please DENY or at minimum GREATLY tell DAYS the permit approval for Project Jupiter fuel cell technology and hold PUBLIC HEARINGS. This technology has never been implemented at the large scale proposed for Project Jupiter. The fuel environmental impacts at this scale cannot be known or quantified. Bloom Energy facts provided and past performance cannot be trusted given their history of violations and fines. The PUBLIC deserves further information, independent evaluation by experts in the field, and adequate time for PUBLIC HEARINGS and Comments.	1		No									Yes		Yes				8/27/2026
Sophie	Johnston	Mirrored Document I will admit I don't know much about Project Jupiter, but what I do know is that it is extremely harmful, for both humans and other creatures alike. It will blow up water and space that we need to survive, further driving global warming to a dangerous degree to where we can no longer stop it. I am 18 years old, soon starting college to pursue my dream, if the world continues the way it is now with how we treat the earth, I likely won't get to live out my dreams, or even retire, because I may already be dead before 60 because of the problems global warming will cause. Think of the younger generations, think of your children, their futures that you are stripping away from them because you want more $, more power. Think of humanity The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Mack	Davis	Mirrored Document Our earth is already dying enough. People are struggling and it's already getting into well over 100 degrees in Illinois. This project will release millions of carbon gasses in the world and eventually become irreversible. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. Char	Anonymous	Mirrored Document I live in Australia, but know that the emissions this data centre will put out are detrimental for everyone, even people living across the globe! It is absolutely disgusting these projects are being approved. Do people not care about their children? The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No															
Rylie	Willson	Mirrored Document The construction and use of data centers is a horrible waste of money and water supply. I do not and will not support these AI data centers because they are a failing money grab from the biggest corporations that literally destroy our water supply because they use the most harmful method of cooling possibly just because it's cheaper. Our lives are not cheap. Our planet is not cheap. We need to stop the construction of all of these data centers, and this one is no exception. Going forward with the construction of this is a death sentence to our planet. If you care at all about human lives or our planet, you will stop this AI data center immediately. Don't be a punk ass bitch whose morals can be bought. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Anonymous	Anonymous	Mirrored Document Hello. I wish to stay anonymous, so I will not be giving out any personal information about myself. Still, I wish to be a part of this protest for the world and the people. With all the changes in the world, coming so quickly and unpredictably, I find it hard to believe that anyone out there would not want to be safe from many. But I was wrong, there are in fact a lot of people that are willing to take the risk. This project is a perfect example of this. Everyone (should) knows by now how serious the environmental issues and impact matter is not just one country or two, but everyone equally. If you let this project happen, you will not just be hurting Mexico, but the world around you as well. The ecosystem of our planet is so very delicate, so complex and beautiful...please don't disrupt it. I urge you to not let this happen. Any way of pollution should be avoided at all costs, and no matter how many people will gain jobs or land money with this, it's not worth the risk of Mother Earth finally giving out. There is no second chance, we only have one. Once the limit is reached, there is no going back. Money won't save you, neither will power. Give these people a chance to review. Let them comment on it, let them decide what happens to their land. Specially with all the illegal waste this company has dumped, it should certainly be taking into consideration when approving and discussing the project. I beg of you to not just think about yourself. Yes, the selfish love longer. But well it be worth sticking around with nothing left? All are equal, and everyone should have a voice. Specially the ones affected. It's not too late to turn back, it's not to late to change. If you won't do it for yourself, do it for them. With concerns,_____ The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Anonymous	Anonymous	Mirrored Document I have concerns opposed against Project Jupiter due to it's risks and harms thrown against New Mexico. I'm commenting this in hopes of the New Mexico Environment department to reject Yucca Growth Infrastructure, LLC's air permit application. If said Project gets accepted it'll be concerning as New Mexico's Environment Department has the goal of protecting and restoring the environment for future generations. That will be contradicting and exciting more danger to everyone no matter the age. It's concerned for the health of the hispanic children whose high-school and elementary school is located within five miles of the site. What shall happen to those children if both climate and health will be at risk if said Project is accepted? This project can and will destroy the climate, it'll result to nothing more than a dead earth nobody will survive anymore. It will cause more greenhouse gas pollution than three of New Mexico's largest cities combined. If the permit doesn't get denied, I sincerely ask the department to hold a bilingual hybrid public hearing near the Santa Teresa community so residents can learn of the risks associated with fuel cell technology.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Kalyn	Allen	Mirrored Document My name is Kalyn Allen and I am a lifelong resident of Roswell NM. I am asking that the air quality permit application be denied. For the sake of everything that we know and love. A project of this size, is and will be detrimental to New Mexico. We live in such a dry climate as it is, we already suffer from a water shortage. A data center of this size is genuinely going to take all of our water. Do you all not realize that water is vital for life? It's not just affecting all the residents of New Mexico but it is going to affect the wildlife and nature around us. This is genuinely the worst thing you could possibly do for our state. New Mexico is one of the most painfully beautiful places in the world, it's home to so much beauty and wildlife diversity, this project feels like the death of New Mexico as a whole, how could you let this happen? Not to mention the horrifying health hazards. New Mexico has always had cleaner air compared to many places around us because of how much we value our land and our safety, building this data center is going to literally deteriorate our health and livelihoods. With the emissions that will be released from this, the possibilities of health defects, cancers, illnesses, infections, and more are going to absolutely skyrocket, especially for the natives in the area. You are not immune to all of this, this is also putting YOUR health at risk and you are allowing it to happen. Not only is this unsafe, this is the definition of environmental racism. You choosing to place this infrastructure in Doña Ana County, an ethnically diverse area that already struggles with clean air, is absolutely intentional and you all should feel ashamed of yourselves for letting this happen. We are labeled as the enchanted lands for a reason, please don't destroy our home we are literally begging you. Please just listen to what the people of New Mexico are saying, we are begging you to take us seriously and HEAR US. This is bigger than you realize, this is the end of New Mexico as we know it.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Amanda	Watkins	Mirrored Document I am very concerned about the air quality surrounding the new data center. The fuel cell technology has not been used at this scale before and because of this, we don't know how it will affect air quality. Since the area already fails to meet clean air standards, it would be against the good of the people to add more air pollution to the area. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Yael	Cohen	Mirrored Document Please reject Yucca Growth Infrastructure's air quality permit request for their new fuel cell grid proposal. The proposal goes directly against NMED's responsibility to protect natural resources for current and future generations by allowing this company to emit more greenhouse gasses than New Mexico's three biggest cities combined. As a local landscaper and farmer I am aware of the way climate change is already makes it twice as difficult to grow food here mother to have it used to be. We are experiencing new pests, new diseases, deadly heat and drought, and unlivable working conditions. More greenhouse gas emissions is the last thing we need, and will disproportionately affect the air quality in local hispanic communities of Southern New Mexico who always bear the brunt of negligent pollution. Not to mention the water use and enormous amounts of toxic waste that this project will generate. Caring for New Mexico's land and communities means denying this permit.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Alison	Lanes	Mirrored Document Please reject Projects Jupiter's proposal once again. The fight to keep our communities and land from being further extracted will not end here, but we can continue itwith this rejection. If you feel any sinking of these ongoing proposals wearing you down, please look to us your community for support. We can have each other's backs right now to go slow and go fair to stop further extraction. Please continue your mission to protect and restore the environment, and listen to the communities living in and near these environments. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. This permit carries risks that are too high. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Thank you for your continued commitments to our communities and to the environment.	1		No									Yes	Yes	Yes				
Lila	Kand	Mirrored Document As our climate is already warming up, the last thing we need is more unnecessary data centres that will damage the environment and create less job opportunities. We want a future with life not robots, NOT a! There is no posthreguin as a society from gleid, the only people it helps are already the rich who have no reason to get richer except for greed. Stop this madness and help us create a better future! Please! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
anonymous	anonymous	Mirrored Document We should be concerned about ecology and prevent planet from exhaustion. We are already facing with climate anomalies around world. Lets not forget that humanity's influence is strong on nature. Pollution is poison to not just nature itself, but also to animals both sky, ground and water. Everyone deserves clean air instead of another company draining recourses to kill everything that breathe and live The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. Anonymous	Anonymous	Mirrored Document If you are capitalists you will go through with this. If you care about the earth and its inhabitants, you will not. Choose wisely. You cannot "protect and restore the environment" if what you are proposing would do the complete opposite. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Anonymous	Citizen	Mirrored Document We can live without AI but we can't live without clean water. We are already facing record high temperatures IN THE DESERT. These centers will be a disaster to keep cool in the blazing hot summers that get hotter and hotter with each passing year. We are already asked to conserve water living in the desert. This is not environmentally conscious. What is it is, is building data centers where people have no voice and no power. If these billionaires want these data centers so badly, let them build them in their back yards or on their private islands. Look at the contamination in Hinckley Oh in the 80s (and other contamination sites). These contamination plumes have only gotten bigger and they do not predict to be cleaned up for another 50 years. The land is inhabitable. There is a similar underground plume of toxic chromium that has spread from Los Alamos National Laboratory to Pueblo de San Ildefonso land, that State Environment Department officials announced in 2025. https://nuvonism.com/briefs/san-chromium-plume-spreads-onto-san-ildefonso-pueblo-land-mined-says/ Based on what other communities in the country are facing with these massive data centers, why would you want to usher in these detrimental problems that affect people's quality of life? Pollution and contamination. Cancer clusters. Strain on resources. Soaring costs of energy passed on to poor communities. Decreased water pressure. Noise disturbances. New Mexicans love their green chile and pecan orchards. We can't eat money.	1		No															
Alley	Thurman	Mirrored Document I am a New Mexico resident of 12 years. I've spent my extensive to young adulthood growing and maturing while falling in love with New Mexico, our culture and our environment. Protecting our land, air, the people and creatures that live here is important to myself and my community. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. I didn't learn about this forum for comment until today, the deadline. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana & Otero County are already disproportionately impacted by environmental pollution. This project is DANGEROUS to the health and safety of our residents, wildlife, and overall environment. If this permit is approved the air quality bureau will directly be playing a part in destroying our ecosystems. Please do not allow the destruction to continue. We need to be protecting our land and our air, not polluting.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Kyler	Chee	Mirrored Document This A data center is not needed for New Mexico, it will destroy the environment and use water that New Mexico has limited resource on. Even if it found new ways to be "friendly" to the environment it is very much not needed here or anywhere!	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026
Walker	Thurman	Mirrored Document Protecting our land, air, the people and creatures that live here is important to myself and my community. Debra	Sanderson	Mirrored Document I request that you reject the Yucca Growth Infrastructure's (YGIs) air quality permit application to construct a methane-fueled power plant near Santa Teresa, NM in southern Doña Ana County. I also request that you hold both a public meeting and a formal evidentiary hearing on the application. The bottom line is that pollution from this power plant has the very real potential to harm people and the environment. YGI's pollution will add to the already unhealthy levels of both ozone and nitrogen oxides that New Mexicans are being exposed to in this area, two toxic chemicals that cause harm to our lungs, hearts, and brains, among many other health issues. This damage to air quality will also harm the surrounding ecosystem and ultimately add to the global climate crisis. YGI's power plant will be the single largest source of greenhouse gas emissions in the state of New Mexico, emitting more carbon pollution (20.1 million tons per year!) As proposed, YGI's microgrid is disaster for our environment, and climate. The power plant would threaten the health and imperil the environment of people in New Mexico, Texas, and Mexico. New Mexico is already the fastest heating state in the continental United States. The application violates state and federal air quality laws, and NMED must reject it.	1		No									Yes	Yes	Yes		Yes	Yes	8/27/2026

Kaylin	Mukwende	Dear NMED Staff Climate disaster are happening everywhere in the world. I mean right now the whole of west Africa is experiencing floods from the harsh rains, there's a heatwave happening in Europe. So it is very disheartening to see that this project is even considered as it could hinder any progress we've made over the past few years. Project Jupiter's power plant will release up to 10million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last few decades. Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. Moreover this project could be a total fail, not only in the environmental aspect but also in a financial way. Although it will bring up 4,000 jobs in New Mexico, not only could it harm the health of much more people, it could also just not work as we have ever managed fuel cell technology at this scale. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "dead" catalysts." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the dead canisters is exempt from air permitting regulations (because there is less than 1000 lbs/yr). Bloom was fined for improper hazardous waste handling in Pennsylvania and Maryland. In 2020, Bloom was fined $120,000, and then $5,400,000 NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1		No																	
Baylee	Thurman	Protecting our land, air, the people and creatures that live here is important to myself and my community. Holly	Paz	This proposed data center, and all accompanying infrastructure, should not in any way be permitted here in southern NM. Apart from the noise pollution, extreme energy use (for which WE will pay the cost) and very few actual long-term jobs offered to NM residents, the water costs alone are prohibitive to a state that already has to cope with drought and is quite literally A DESERT. As a taxpayer and lifelong resident of NM, I completely and firmly oppose this permit, and the data center. The brazen lack of regard for our people and our natural environment inherent in this proposal is disgusting.	1		No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Dewos	Anonymous	Dear NMED staff, My name is dewos . I am a New Mexico resident, living in Bloomington Indiana and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid in Doña Ana County. This would not only personally affect me but every person on the planet and it would erase all the progress we've made over the past few decades. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Soon enough people will realize but at that point it will be too late. We need to take action now. Sincerely, Dewos	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Nichole	Harrison	I am writing to express my concern for the public health and the environment of New Mexico. Project Jupiter sounds like nothing more than corporate greed over the interest of the of everyone and everything that inhabits the earth. I plead that people will open their eyes and see what this will truly do, instead of what corporations are telling us is possible with it. If NMED's mission is to "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations.", then allowing this plan to go through goes against everything you stand for. The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air. Developers did not propose pollution controls they estimated the plant's pollution based on tests from a very small unit only 60 kW) but the power plant they want to build is 37,500 times bigger. There are many reasons that this is an awful idea, and I hope that you carefully consider what this will do to Earth and my decisions, because our future is in your hands.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
giorgia	commission e	There is three years before the damage that has been done to planet earth is no longer reversible. Young people and future generations will not get to experience a normal life due to global warming. You're grandchildren and great grandchildren will never experience a normal life if this is not stopped. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Lidya	Megli	Stop project Jupiter The hearing should be held in both English and Spanish, with opportunities to attend virtually.	1		No																
Victor	Mata	Let me be respectful but blunt: in my opinion, any support for Project Jupiter is a blatant betrayal of southern New Mexico. The risks to our air, water, and health far outweigh the benefits the developers are promising. My opposition is based on the project's own filings and on independent reporting: - The power plant would emit roughly 10 million tons of greenhouse gases every year – more than Albuquerque, Las Cruces, and Santa Fe combined. A single facility would erase much of the climate progress New Mexico has made over the last two decades. - The developers' switch from gas turbines to Bloom Energy fuel cells has been marketed as "cleaner," but the plant would still burn natural gas and still produce those emissions. The Center for Biological Diversity has called the change essentially greenwashing. - Bloom's fuel cells concentrate contaminants like benzene into filter canisters that become hazardous waste. The EPA has fined Bloom more than $1 million for mishandling this waste at other sites. - This plant escapes the renewable-energy requirements of New Mexico's Energy Transition Act only because state law exempts "microgrids" – even though this one would outgenerate the state's largest utility. - Santa Teresa and Sunland Park already fail to meet federal air-quality standards. This is a predominantly Hispanic border community, with schools and day cares near the site. I understand that New Mexico is hungry for investment and needs to strengthen its economy – I don't dismiss that. But there are far better alternatives. New Mexico has abundant solar and wind resources, and solar and wind paired with battery storage are now the least expensive source of new electricity. Our state can benefit from investment without becoming the testing ground for one of the largest fossil-fueled data-center power plants in the country– especially while we are still fighting for clean, reliable drinking water.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026	No	Choose - Non-Substantive				
Elise	Bourque	I may not be a resend of the affected state, but as a Canadian, I will still feel the effects of the accelerated heating the data center will bring. Wild fires are already disastrous whit the current climate, they will only get worse as the planet heats up. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Minimal Document	No					Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026						
Anonymous	Anonymous	To whom it may concern Writing anonymously, I am still a resident of the planet earth and I have rights to be heard. Project Jupiter is a major concern for the planet, but specifically for the Santa Teresa community. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Ruthie	Hackson	Completing and approving this project under the guise of good air quality would be government-sponsored environmental racism. The air quality permit application should be denied and a public hearing needs to be held in Santa Teresa. Projects that would impact a community for generations should always be presented to the people for comment and decision. Communities should not be sold out to the highest bidder or shareholder for monetary gains. Especially when those individuals do not reside or participate in said Community. STOP LETTING INDIVIDUALS WHO DON'T CARE FOR YOUR PEOPLE PAY YOU OUT AND WALK ALL made what	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Ebenzeit	Aguilar	Please stop destroying our sacred lands. I don't understand how Project Jupiter have any consideration of our communities they know we're a drought state going through one our worst the river is dried up for god sakes. Unless our government is lying to us and there is water to waste but a precious liquid like water should not be taken for granted Please don't bring project jupiter I promise you you won't be here for	1	Minimal Document	No					Yes	Yes		Yes	Yes		8/27/2026						
Anonymous	Anonymous	Dear NMED staff, I'm concerned about the new project "Project Jupiter". It will cause lots of health issues and air pollution if the data center will be built. I am certain that us, humans, do not need more data centres, and especially huge ones like this one. We are damaging our earth with pollution, plastic waste, trash and so much more. We are wasting water so fast that we will run out of clean drinking water in a couple of years. This is a serious concern for us and for the future generations. Project Jupiter will build the largest AI data center ever and will not benefit us as much as we think. Our water, air, and will be effected in bad ways. The energy used in the data centre with cause heat to fasten the climate rising. It will ruin the progress that we made with trying to stop climate warming. This is not a good idea to build such enormous building for AI. We once lived without it, so why do we need such huge data centres built in lots of states and countries? Please think this through because you clearly haven't grasped what will happen if this huge data center is built. This will not be good. We are already facing huge problems in the world due to climate warming, so why are we trying to promote it. If this project is stopped, we still still have hope to help our earth and us. You, me, our families, friends, animals, the entire earth will face consequences at our careless actions and decisions. We need to stop this project, we already did enough damage to our earth Buman can't even fix entirely. I hope my message will reach the right people and I hope my voice and choices will be heard and understand. I only have for the best for all of us, not only me. I strongly believe that we can help our planet, help us and help others. I hope my and other people's voices will help you to open your eyes, to help you see and understand the consequences of our actions. Open your eyes, see the problems that come with AI data centers being built. I wouldn't be writing this message if I was Not Concerned for our own health and our planet's future and health. Thank you for reading my message, for hearing my thoughts and my voice. I hope we can protect what little we have left of our wonderful earth. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Ali	Banks	The creation of a data center in New Mexico is fundamentally both ignorant and completely disregarding human life. Building a data center in an area that is already struggling with the resources of the land and should a cruise can only be seen as nothing more than an intentional plot to drone out and remove the "unlucky". There are no statements that put this data center into good faith, it is an impossibly sick building plan no matter how much you speak of "innovation". Life without AI was perfectly fine, there is zero reason to continue consuming our finite resources on this earth because you feel the need to hire pockets of the rich for a project that failed at launch. The obvious adverse effects this would have on the already poor air quality are impossible to continue away from, this is an issue that will continue to plague us long after we die and the next generation will have to breathe in the poisoned air and deal with horrible conditions all in the name of "innovation". The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Amelia	Gatterman	I've grown up in New Mexico and love it more than anything. The creation of this data center will destroy our environment and the natural beauty we know and love. Our state needs more environmental recourses and if we really want to create new jobs, we'd create better opportunities for New Mexico children after high school.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Anonymous	Anonymous	We already don't have enough water for humanity, given that many rural areas in south america and africa and asia have access to clean water if water at all. We don't need anyone taking europes or north americas water as well. Climate it just getting worse and we won't do shit to help. As much as AI can be beneficial, in the hands of mega cooperations and the cartmen max level lab still is bad. The "benefits" of AI don't outweigh the costs and damages, and they most of the time, don't come ethically. They exploited the weakest and poorest first now they're comming for the middle class, and let me tell you, I highly doubt that the rich will stop when they reject your offer. Do I need to remind you that the richer richer majorities are being funded by the government to excide against a racial minority? The public, the common working public should get to decide over this in additional 60days, and if they are in their right state of mind they will see that goes the part, the air quality permit should not be permitted. At last if public hearing must be held and it should be in english AND MOST IMPORTANTLY SPANISH cuz undoubtly many citizens are not aware of the issue. Stop this cycle of tyranny. Fuck AI. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026	No	Choose - Non-Substantive				
Hanks	Ruka	The Trump administration's cause will cause a major damage to the environment, leaving us with nothing but money, well we cannot eat money and animals cannot eat money. It is up to us to take a stand against this ridiculous project, we must preserve the natural habitats for the next generations, it is up to us to save the earth because no one is willing to take a stand, no one is willing to fight for what's right. Fuck the trump administration The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						
Tahlee	Major	Project Jupiter is going to have a severe and negative impact on our environment, including our air quality and water supply that is already poor). This project is going to come at the cost of public and environmental health. I DO NOT support Project Jupiter, and I hope the permit DOES NOT get approved. I demand that the public is given at least another 60 days to review and comment, and a public hearing if the permit is approved	1	Minimal Document	No					Yes	Yes		Yes	Yes		8/27/2026						
Jocelyn	O'Hilton	Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. We don't need more data centers. We need our energy costs low, water for all residents and bees for pollination of our food. Blubrie are risking data centers to bee deaths. How will residents have water if the plant is using 5 million gallons of water per day? These gas powered plants are just furthering greenhouse emissions & climate change. What good is AI if we are suffering from the data centers? They say it might save cancer, but they aren't using it for that purpose. It's being used for chat bots. Please keep data centers out of New Mexico. This is all for the wealthy to profit at the expense of the lower and middle class. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	1		No																		
Anonymous	Anonymous	I am a current resident of New Mexico and have lived here my entire life. I ask that you guys please don't let project jupiter be built. The fact that this project even got approved is ridiculous, NM is already going through a drought, and now they want to build a data center here??? That money could be going towards helping NM be a better place to live in, helping with homelessness, or literally any other problems we are facing right now. The amount of air pollution this center would cause yearly (10 million tons) should be enough to look at and not allow this to happen. There are schools and daycares not even 30 miles away from the data center, kids that could get sick from the harmful emissions that the center will be releasing. We don't need something like this built here, At does nothing but harm to the environment and provides no positive impact whatsoever. All this will do is provide more and more issues for NM residents, especially the residents of Santa Teresa. PLEASE STOP BUILDING DATA CENTERS. NMED should give the public 60 days of additional time to review and comment on the application to ensure everyone can meaningfully comment and participate. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Minimal Document	No					Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026						
Anastacia	Hendricks	I am a resident of New Mexico and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I am speaking solely in my capacity as a private citizen and state resident. I am deeply concerned regarding the construction and operation of Project Jupiter for several reasons, including the levels of pollution that it seeks to release into our state and community, its water usage in a gravely water scarce state, and its power requirements. All of these externalities will be borne by the residents of New Mexico. We do not want Data Centers here. We want healthy and sustainable air, water, and power. Project Jupiter's aggressive and potentially illegal campaign to obtain fuel community buy-in should be enough of a red flag. Project Jupiter's aims are shameful, as are the local government's attempts to sell the next generation of New Mexicans down the river. I strongly oppose this permit for Project Jupiter. Additional asks: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026						
Ray	Romero	I oppose the granting of any permit that would enable Project Jupiter to become operational. The costs of the project, including its negative effect on our air quality caused by its power source, will far exceed any benefit to Doña Ana County, the state of New Mexico, or the nation. I respectfully request that the NMED deny the permit.	1		No					Yes	Yes		Yes	Yes		8/27/2026						
Ruby-Belle	Shingleton	We, the people, strongly oppose "Project Jupiter", and its plan to build a data centre–especially within a rural and fickle ecosystem. This proposed data centre will bring immense amounts of pollution to the area, causing catastrophic damages. Please consider the immediate but also long-term effects that these structures have on a local and global scale. You cannot in good conscience, plan and execute mass destruction as you are planning to do. You do not own our planet, and you cannot have the ability to destroy it.	1	Minimal Document	No					Yes						8/27/2026						
Emily	Howes	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes	Yes		Yes	Yes		8/27/2026						
Chiara	Quadrini	I am an Italian citizen and even though I may live hundreds of kilometers away from where Project Jupiter is taking place, and yet the magnitude of the damage this operation will bring forces me to take action, even as far as I am. I want to secure myself and my little sister a decent lifestyle in the future, knowing that she too will be safe and secure, whit a fair chance to life and prosperity. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nourishment zone would be nothing short of blatant environmental racism. We are already breathing some of the most compromised air in the history of humanity itself. It is unacceptable to invite a new source of hyperacute air pollution into existence. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–both many of them at very low levels. How am I supposed to build myself a future, knowing that I may never get to see it through? Knowing an itself can cause permanent brain damage or breathing complications before I have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous waste material, and I won't stand for it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes	8/27/2026						

[redacted]

Kristyn Anonymous Dear NMED staff, My name is Kristyn. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. As an advocate for the environment, I am deeply concerned as Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last few decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined (Albuquerque, Las Cruces, and Santa Fe. Additionally, the proposed "micro" grid has a 2,662 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces), and the entire PNM grid is about 2,700 megawatts. Each of these grids includes a substantial amount of renewable energy sources and each of these grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. There is also concern for those living nearby. Santa Teresa Elementary and High School are located within five miles of this project site. 98% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. Plus, the Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Thirdly, Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana County near the site have not been properly notified of this air permit application request. The project proposes fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. ● NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. | | No | [redacted] | | | | | | |

Anonymous Anonymous CLIMATE CONCERNS ● Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. ● This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. ● The proposed "micro" grid has a 2,662 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces), and the entire PNM grid is about 2,700 megawatts. Each of these grids includes a substantial amount of renewable energy sources and each of these grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. ENVIRONMENTAL JUSTICE ● Santa Teresa Elementary and High School are located within five miles of this project site. 98% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. ● The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. ● Tribal governments like Tortugas Pueblo , Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana County near the site have not been properly notified of this air permit application request. FUEL CELL TECHNOLOGY &LINDERSTAND ● Fuel cell technology has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. ● This application is based on pollution being from a very small unit. The testing unit is only 65kw, while the power plant is 37,000 times that size.

TOXICWASTE ● Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "sleuth canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the sleuth canisters is exempt from air permitting regulations (because there is less than 100Ib/day). ● Bloom was fined for improper hazardous waste handling in Pennsylvania and Maryland. In 2020, Bloom was fined $120,000, and then $5,340,000. ECONOMICIMPACTS ● NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations" Granting these permit applications is a direct contradiction to that mission. ● What happened to the public hearing the state Air Quality Bureau recommended on the previous applications that the industry has since redacted? NMED should not overlook the overwhelming community concern expressed in the last public comment period, which still applies to this same project. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. ● NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. | | No | [redacted] | | | | | | |

Iykie Stump Dear NMED staff, | | No | [redacted] | | | | | | |

My name is Iykie Stump. I live in Alamogordo, moving to Las Cruces soon, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County.

New Mexico is a beautiful state. Our beauty is often dismissed, as people can't believe desert could be as gorgeous as it is. The proposed development would destroy a large section of our desert, while polluting our air and undoing all the environmental progress we as a state have worked on.

This state is the one I've been proud to call home. I wouldn't want to be anywhere else, but these developments terrify me, as I don't want to see our wonderful home so detrimentally poisoned by these types of pollutants.

I'm severely asthmatic, and this sort of pollution can be so detrimental for those of us with any type of lung issue as well. If these plans are built, it will make people sick.

Furthermore, the project's proposed fuel cell powered grid is concerning for many reasons:
- It would still produce a high level of greenhouse gas and toxic pollutants.
- This technology generates toxic waste, and the process for handling this waste is still unclear.
- Fuel cell technology or a centralized waste system has never been tried at this scale.
- Surrounding communities' air will be severely impacted by this development.

Jane brown I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Our children deserve a healthy environment, and this project would be detrimental to that. We don't need anymore data centers, in fact, we don't need them at all. We can live without AI, but what we can't live without is clean air, water, and a healthy environment, everything project jupiter will be taking away.

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Margaret Coli Dear NMED staff, My name is Margaret Coli. I am an Oklahoma resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans as fellow Americans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. These gasses affect not just your state but neighboring states and also our country as a dangerous trajectory of destroying our environment and increasing global temperatures. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants • This technology generates toxic waste, and the process for handling this waste is still unclear. • Fuel cell technology or a centralized waste system has never occurred at this scale. • Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Margaret Coli | | | | | | | | | |

Rachel Wolf I am writing to express my strong opposition toward the Yucca Infrastructure Microgrid Air Quality Construction permit. After reading much research concerning fuel cells and the greenhouse gases they emit (more than Albuquerque, Santa Fe, and Las Cruces combined) it seems extremely clear that this project would exacerbate the current climate crisis and endanger the health of those living nearby. These centers also require an enormous amount of water and power to operate. The state is currently in a devastating drought and the power grid is already pushed the brink as people employ swamp coolers to cool their homes in a steadily warming climate. With these realities in mind, it is absurd to think that local politicians would permit such extravagant exploitation of these dwindling resources. There is also abundant research indicating that data centers (placed in predominantly poor neighborhoods and rural areas across the country) pollute the air and water of neighboring communities. All for no tangible benefit. If the issue is job creation, the state would do better to invest in renewable energy and the myriad jobs that would be required for green infrastructure. | | No | [redacted] | | | | | | |

Anonymous Anonymous "These companies are claiming that this shift to fuel cells is because they care about the community's concerns. In reality, this shift makes it easier for them to bypass outdated state regulation and advance their plan as quickly as possible." This is so completely acceptable. It's beyond hurting wildlife it's killing it and making it not feasible for them as well as other things like fossil waste, pollution, and many others that are killing our beloved earth. It could kill us and our loved ones, we wouldn't be able to eat or drink anything if it's in our water. Does that not prove anything? Thats it's unsafe? Then I really wouldn't know what else would other than a drastic bomb, this is quite similar to the nuclear one it's bomb actually. Thats how bad it is. | | No | [redacted] | | | | | | |

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Lidia Anonymous Dear NMED staff, My name is Lidia. I am a New Mexico resident, living in Spain, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. I am currently a student who is very concerned for this project as it will affect, not only my future, but the future of millions of people and species in this area and around the world. We are currently living one of the worst eras of climate change and this project will only worsen things. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Lidia | | | | | | | | | |

Anonymous Anonymous Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. Santa Teresa Elementary and High School are located within five miles of this project site. 98% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. | | No | [redacted] | | | | | | |

Carmen Anonymous Shameful. Absolutely abhorrent. You're killing us and the earth for an extra dollar. That won't serve you. You'll die just like we will. Hopeless, hungry, thirsty. You're not unique because you're rich. You won't be protected when your bodyguards have died in the heat or detected. You pathetic, good for nothing money grabbers! We won't forgive you, nor will we forget!

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Alex Paz To whom it may concern, please deny Yucca Growth Infrastructure LLC any and all permits they request. The people of New Mexico DO NOT want this data center. It is becoming increasingly apparent how detrimental data centers are to the environment. In which they are placed. We the people of New Mexico do not want our land contaminated or our water wasted. Whatever they have told you about the "worthlessness" of the data center is a lie. This data center will use unethical amounts of both power and water and will severely weaken the ecosystem of this great state. Please have a spine, have courage, and do what you know is the right thing; deny this permit. If you allow this permit, you are betraying the state of New Mexico, which you serve. | | | | | | | | | |

Samantha Rigg Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. We don't need AI to live!

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Anonymous Anonymous Aria doing nothing but make our society worse, and our people more stupid, and it's destroying our planet in the process. There is no room in our world for this slop. Building this plant is a disservice and a disgrace to our very existence. This will ruin the lives of countless individuals for countless years.

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Rogelio Gutierrez Aria destroying the environment, and negatively affecting people's mental health and capacity to think for themselves. It was advertised as something that would allow humans to work less while AI facilitated their jobs, now it has been out for years and so far it's only purpose has been for mature, generating false information, sexual content (often regarding content that would otherwise be illegal), cheating/plagiarism, and just downright incorrect and inconsistent answers to even basic questions. Now we must work more to pay for someone else's electricity bill, so they can shove down this "tool" no one asked for. We are in a desert state, water is scarce and the days are very hot as it is. We pride our states in our diverse communities and environments, rushing for AI turns these both as AI uses an insane amount of water (which the desert isn't known for having) and causes immense heatwaves and sound pollution that affect our quality of life and that of the animals. AI is a surveillance tool, nothing else but Big Brother incarnate, why would we give up our freedom of privacy to receive conditions that are worse off than how bad things are already? NO AI. NO PROJECT JUPITER. NO BLACKROCK OR PRIVATE EQUITIES | | | | | | | | | |

Adel bengo Project Jupiter's building plan is bigger than anyplant they've built before. 1000 times larger than any previous project, and is calculated to produce massive dangerous amounts of hazardous waste, AND has a history of illegally storing, dumping and transporting hazardous waste! How is this project not going to be totally out of control? Who is really checking and regulating such activity that will cause such a large carbon footprint?

The consumption of water to be able to power this is also just unrealistic, will be in danger when it's already a scarcity in this state

Emiliano Espinoza this is gonna help kill us and the ecosystem around us, the chemicals getting released annually aren't ju affecting us but affecting the nature and wild life. no bueno.

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Anna Hamelin I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana county near the site have not been properly notified of this air permit application request. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "sleuth canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the sleuth canisters is exempt from air permitting regulations (because there is less than 100Ib/day). NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. | | No | [redacted] | | | | | | |

Sakhar Almusrea We need to understand that we only have ONE planet, this project could not only kill a portion of it but it could also inspire other companies to do the same until we basically live in a desolate wasteland Stop Project Jupiter

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Emi Iubag The climate is an very destuptoring im 15 and i know much more/gen most teenagers in my age, thus project can be detrimental and be the last nail in the coffin fr wildlife and the environment

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Anonymous Anonymous If it can harm the environment or the earth itself then stop it immediately, please. there's a lot going on in the world rn, there's even a genocide happening in Palestine, Sudan, Congo, Nigeria etc.... the environment is suffering and we must stop it or else we wouldn't have a place we can call a home, and it's the earth. so, stop the project, please.

stop hurting the environment, that's all.

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Jayden Miranda As data center that will take up so much land. Harming animals and plants. But it's not just that. The pollution of water the data center uses has enough wastes to give NM communities cancer. The air pollution is enough to kill. Enough is enough put an end to ai data centers that do more harm than good.

Cayagua Montalbo This project is a disaster for the environment, we have to protect the earth, but also local population who will inevitably suffer consequences from this project. Please, stop this, we don't need AI.

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Judy Rudes I am a resident of New Mexico and I am asking that you deny Yucca Growth Infrastructure's air quality permit. You are hurting people. This decision ensures that hurt will outlast you and your politics. Promises of jobs and bouncing economies cannot compensate for this hurt. You need to be human and you need to recognize the humanity in the people you are hurting. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Laura Trivedi I am a student born in germany who has great concerns, that project jupiter is a horrible idea and should be stopped. We prioritize bio bio (get it but when there is no more drinking water and no more shade shielding you from the rising Temperatures because you chopped down all trees to make space for your data centers, I ask you, how will you survive? You can't eat and drink money or build a shelter out of crypto so please be humane and stop destroying our planet and its resources for other humans. You can be wealthy in other ways, this is not a longterm solution.

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Usana Unknown Not only will this pollute our environment but it will also affect our most precious resource, water. No local person wants this and this will not generate more jobs for us. Keep this out of our state. We should be protecting our lands not destroying them.

Anthony vail I am a South African citizen who has dreams of travelling the world and seeing all that it has to offer, but this project, alongside many others that provide zero benefits to us as a species is actively preventing my dreams and aspirations from being accomplished. Not to mention the irreversible impact that this will have on the global climate if the project is approved. We don't need data centers to survive, and in 10 or so years when AI is obsolete, they will say there abandoned and useless. I heavily oppose this project.

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Bernice Gutierrez I register a resounding negative opinion to the Project Jupiter air permit. Air you can see is ruins good thing but in Dona Ana County. Safety first should be the guiding principle especially for our children. Asthma is one of the most common chronic diseases in New Mexico. According to the NM Department of Health between 2000 and 2017, the number of those suffering from asthma jumped 28%. Before decisions that could affect our citizens is made, a public hearing should be held in order for the public to have input as to what their wishes are.

Reagan Hynes The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone.

Grayson Fleming We have to stop using ai and building these data centers to protect many different communities that live in the U.S building this data center will cause damage like we've never seen before

The public should be given an additional 60 days to review and comment on the air quality permit so no community members can participate equitably.
The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.
If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Elvira	Esparza Bencomo	I am against Project Jupiter. The negative impact to the community are too great to over look. The amount of water, enery, and emissions from such a large facility will damage NM even more. Why would a company build in the desert if they need water that the state doesn't. The air quality will be greatly reduced because they are going to be using an untested, unproven method after their original plan was protested against. Keep NM beautiful. Keep the air breathable. NO TO PROJECT JUPITER The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Abigail	Romines	This whole project should be denied, but for now, we all need the air quality permit to be denied and went away with. If that doesn't happen, a public hearing should be held in Saint Teresa with ability for both Spanish and English translations. If this permit is approved, it's blatant racism. Government sponsored racism. Do you understand how horrible that sounds? The air quality is already not up to standards and this project will just make it worse, and worse. No matter the new kind of tech, no matter all of it, the people will still be suffering. Think about the water usage, the greenhouse gases effecting the world if this goes forward. The waste flowing into the water, food and plants of the communities. The cancer causing chemicals. The air is already bad, this will make it purely cruel and unnecessary to the people made to live here. Don't go forward with this, deny the permit, save the communities.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Venus	Muñoz -Hernandez	I would just like to say that I am extremely displeased with the idea of having a massive data center built here in my state and I would like to ask that you deny the air quality permit for Yucca Growth Infrastructure. This project will not only contribute even more to the air pollution issue that we have going on, but it will continue to drain the finite amount of water that we have in our aquifer each day. What's going to happen when that water is completely depleted? The permit should also be denied because of Bloom Energy's history of illegally dumping hazardous waste, which is dangerous and careless and harms community members who are already disproportionately impacted by environmental pollution. The pollution from this project will cause our atmosphere to heat up even more, which will have consequences for EVERYONE. My parents work outside every day without shade, and they have experienced the effects of our atmosphere heating up. They constantly have to be sure to take breaks and hydrate to be sure that they don't pass out. There have been a couple of times that they have nearly passed out from the heat. I myself work outside sometimes and I have also nearly passed out from heat exhaustion two or three times. And I'm sure many others have also experienced the same. Lastly, I want to finish off by saying that I would like to live a long and healthy life, and I wish the same for my family, friends, and everyone who lives in New Mexico. This project would greatly impact our quality of life, whether it be directly or indirectly. Our future is under threat. I am again asking that you deny this air permit immediately. If it is not denied, then there should be a public hearing held in Santa Teresa, in Spanish and English, with the option to join virtually. The public should also be given an extra 60 days to review and comment on the air quality permit so that all residents can provide their input equally. The health of the citizens is a million times more important than the profits of large corporations. Thank you.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Zachary	Borders	Though I am not a resident, and would not be impacted by Project Jupiter, and am still appalled at the environmental impact this will have on the environment. The population of the communities near Project Jupiter should be given an additional 60 days to review the air quality of their home. Given Bloom Energy's history of causing environmental hazards, the air quality permit application should be denied. If the permit isn't denied, there should at least be a hearing in Santa Teresa. Approving the permit anyway would contribute to harming the residents of Doña Ana County through environmental impact. These demands should be held in order for the local communities to have their say in the environmental upheaval that Project Jupiter will have on their home. Thank you for listening.	1	Merged Document	No	[redacted]		Yes	Yes				Yes	8/17/2026
Abel	Willow	As a resident of Ottawa, Ontario, looking down at this project, I see many ways this is going to impact the nearby communities. This data centre will destroy ecosystems and families. Please reconsider the irreparable damage you are about to cause. We will not stay silent, even around the world. Some more things to consider: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Mara	Crane	STOP PROJECT JUPITER. I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. STOP PROJECT JUPITER	1	Merged Document	No	[redacted]		Yes	Yes					8/17/2026
Anonymous	Anonymous	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am concerned because of what data centers do to the environment, it's not good and it needs to stop. I'm 16 years old, and I don't want my future to be tainted because we as a society destroyed the world that is our one and only home. I want our planet and its future to remain safe, and data centers like this one will destroy that future, for everyone. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]		Yes	Yes		Yes		Yes	8/17/2026
Caryss	Hathorne	No billionaires project should supersede the will of the people. We are crying out to you to stop the madness stealing our water and polluting our air. Our ancient traditions, our native plants are unique in the world and will be destroyed if the data centers are permitted to exist. We already struggle with air pollution when the fires turn the sky red every year. Prevent Bloom the opportunity to have this permit as they have been irresponsible with it in the past and will cause pollution because they being they can get away with it. We already see the effects in the farms and in the drinking water but add to that the drain on our water resources that would be these projects, and our state will inevitably burn. It will be our forests and towns, our campgrounds and parks, our farmland and rivers gone. The first to be affected as always are the rural communities especially reservations and pueblos; do you want to continue the systemic oppression of these peoples or will you stand up for them and all of us? Stop this project immediately or we will be facing the end of New Mexico. It is not too dire to say that every one of us including the council members making these decisions and their families will be devastated by the wrong choice in this scenario. Do better by us and give us a fighting chance at a future.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Alonso	Herrera De Los Santos	The El Paso - Las Cruces metropolitan area consists of over 1 million people. 1 million people whose entire existence in this area is possible because of resources like water and clean air. With an already exceedingly hot climate that is creating a risk to water, a data center will be the nail in the coffin to eliminating possible habitation of the natives to this area and will eliminate any future growth. By allowing this data center to proceed with being built without creating any infrastructure for it to be operable in isolation without having to be connected to infrastructure that we in this area use, one million lives will be tragically impacted. People WILL be impacted and will most likely die from adverse effects cause by water and air pollution as a result of how demanding data centers are, and especially how demanding this one will be. This massive impact will only result in about 50 non-professional, low-paying long-term jobs, and about 5 professional jobs that will be occupied by people outside the area. You are seriously a sick human to think that this is good in any way for an area that is already in a sensitive environment. I hope getting paid to vote yes on this project was worth destroying an entire region of this beautiful country.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Raul	Daood	I am a resident of New Mexico and have been all my life. I am asking that you do everything you can to stop project Jupiter. This is not for the people in any way. It doesn't take much effort to see that this is for the tech monopolies to deepen then pockets and grow their power. They have already broken laws in New Mexico and it's the state government's job to protect these lands and people. First allow an additional 60 days to review and comment on the air quality permit so the communities this is actually going to impact can participate equitably. This should not be the choice of politicians who would likely be receiving financial compensation to pass this permit. The Air quality permit should be denied as bloom energy as already been shown to be illegally dumping hazardous waste in other circumstances. We are the land and it is our duty to protect it, because that interest of the land is our own self interest. If we allow them to poison the land, we are poisoning ourself and the future generations. If this permit is not denied, a hearing must be held in Santa Teresa, in both English and Spanish, with the option for virtual attendance. We must have this trial accessible to the public so this decisions are not made behind closed doors by people who prioritize their personal gains over the health and care of our communities. Residents of Doña Ana County are already disproportionately impacted by environmental pollution and to allow project Jupiter to continue is government funded racism and corruption. The air quality already doesn't meet federal requirements and regulations. Please, if you love this land and its people and hope to save our Mother Earth and ourselves. It starts here with you. Do not sell out our futures and families for the gain of private equity firms and tech giants who do not value our deepest commitment towards this beautiful delicate home we call Earth. She has provided for us and now we must protect her.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Nadia	Acosta	I am a resident of North Las Vegas, Nevada and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism.	1	Merged Document	No	[redacted]		Yes	Yes		Yes			8/17/2026
Joshua	Carter	This project will waste the already scarce water in the area, you must stop this project!	1	Merged Document	No	[redacted]	Yes							8/17/2026
Hannah	Cole	To Whom It May Concern, I am writing in strong opposition to Project Jupiter in Doña Ana County, New Mexico. While this project is being presented as an economic opportunity, I do not believe the proposed benefits outweigh the long-term risks to our region. Doña Ana County and Southern New Mexico do not have unlimited resources. We live in a desert. Water is already one of our most precious and strained resources, and many communities in our region still struggle with reliable access to clean, safe water. It is deeply troubling to consider bringing in a massive industrial data center project when basic water security has not been solved for the people who already live here. The same concern applies to energy. Whether the project uses the public electric grid directly or relies on a separate microgrid, the energy demands of a project this large are enormous. Our region should not be asked to carry the environmental, infrastructure, air quality, land-use, and long-term resource burden of powering artificial intelligence operations for some of the largest corporations in the world. The number of permanent local jobs promised does not justify the scale of this project. Temporary construction jobs are not the same as long-term, stable employment for local families. Even the permanent jobs being discussed are not enough to balance the potential strain on our water, air, energy systems, roads, public services, and quality of life. A project of this magnitude should bring extraordinary and guaranteed public benefit. Instead, the community is being asked to accept extraordinary risk. I am also concerned about the lack of transparency and the way the project has continued to change as public concern has grown. When a project's water use, power source, emissions, and infrastructure plans continue to shift, the public cannot meaningfully evaluate what is actually being approved. Doña Ana County residents deserve clear, independent, enforceable information before any further permits, incentives, or approvals are granted. This is not opposition to technology or economic development. It is opposition to the wrong project in the wrong place, at the wrong scale, without adequate protection for the people, water, land, air, and future of Southern New Mexico. Our region should be investing in sustainable industries that strengthen local communities without exhausting the resources we all depend on. We should not sacrifice our water security, air quality, land, and public trust for a project whose benefits are uncertain and whose burdens may be carried by generations of New Mexicans. I respectfully urge decision-makers to deny, pause, or reconsider all approvals and permits related to Project Jupiter until full independent environmental, water, energy, public health, and economic impact studies are completed and made available to the public. Any project of this size must be judged not by corporate promises, but by enforceable protections for the people of Doña Ana County.	2	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes			Yes	8/17/2026
Anonymous	Anonymous	I deeply oppose the construction of Project Jupiter. Building this data center is a severe offense to the health of the air, water, and ecosystem (humans and animals included) around it. The advancement of technology is moot if we continue to destroy our only home, and ultimately create a future where life on Earth cannot exist. I don't believe the credibility of anyone working on Project Jupiter and their claims that this move is truly for the benefit of humanity because they do not realize the reality of having a data center in your neighborhood. I urge very single person on this project to try living in the neighborhood of an existing data center for ONE CONTINOUS MONTH. Experience the unclean water that drips slowly out of the taps. Experience the noise and air pollution. Experience the increased cost of living due to having to purchase extra resources (such as clean bottled water) just to survive.	1	Merged Document	No	[redacted]	Yes		Yes		Yes			8/17/2026
Lindsay	Stomp	My family has lived in New Mexico for several generations. The heat waves that we are receiving every summer have become more and more blistering every year, lasting longer, and remaining substantially hotter when they do. My parents don't remember a time growing up where the Rio Grande was dried up for weeks at a time. In my lifetime, it comes with little fanfare. Because of this, I ask you to deny the Yucca Growth Infrastructure's air quality permits. New Mexico does not need more pollution. Project Jupiter is expected to release 10 million tons of carbon pollution into our airs, and therefore, into surrounding fragile environments, in addition to taking up hundreds of thousands of gallons of water that surrounding communities could benefit from receiving instead. Additionally, in communities that already live near data centers across the United States, many complain of constant humming noise that disrupts the ecosystem, drops in water pressure in surrounding suburban households, unknown smog coming from chimneys leeching pollutants into the air with no response from the companies themselves, and unclean tap water. These data centers may claim that they will leave no impact on surrounding communities, but how will we guarantee this is true? How will we guarantee the safety of Doña Ana County residents, when Doña Ana County has already been labelled as a "nonattainment zone", and therefore already do not meet several air quality regulations. Furthermore, Bloom Energy already has a history of illegally dumping hazardous waste. In such a fragile environment, how could this waste impact our biodiversity, or at worst, at what risk could this leave if this waste seeps into our precious groundwater? Our infrastructure for making sure our people have access to clean water in this state is already fragile. Think to a decade ago, when communities in northern New Mexico who relied on the Animas River were terrified that a precious water source had been taken from them. The public should be given an additional 60 days to review and comment on this air quality permit. The people of Doña Ana County deserve the chance to let their voices be heard, and if the permit is not denied, there needs to be a public hearing held in Santa Teresa, in both English and Spanish, to further allow the community to speak on this matter. When looking at this permit, ask yourself, do the benefits outweigh the risks on the community? Why should Doña Ana County residents suffer from this government-sponsored environmental destruction and racism. If Doña Ana County already struggles to meet federal government rules on air quality, how does Project Jupiter serve to make it any better? The simple fact is that it won't. Even with the money that Project Jupiter pledges to give to surrounding communities, there is still the strong estimation that it will produce ten million tons of carbon dioxide. Ten million tons, released into the atmosphere and into the air of surrounding communities. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you. Project Jupiter does not exist in a vacuum. Its environmental damage will be overwhelmingly negative, and it risks our most vulnerable in the process. To reiterate, a data center as large as Project Jupiter does not yet exist, nor does data for its environmental damage exist either. We are risking our communities for something that we have no proof will be safe for our residents to live beside. It is not worth the risk. Deny Project Jupiter's air quality permits, or guarantee harm to its surrounding communities and environment.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes		8/17/2026
Hannah	Cole	I am a resident of Dona Ana County and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. I live in Southern Doña Ana County and under no circumstances do I want experimental technology deployed at an unprecedented scale in my backyard. Yucca Growth Infrastructure's gas-powered fuel cell plant is 1,000 times larger than Bloom Energy's biggest existing fuel cell plant. In fact, worldwide, Bloom Energy has developed 1.4 GW of fuel cell technology across more than a thousand locations, yet Yucca Growth Infrastructure is asking for nearly double that (2.46 GW of fuel cells) at a singular location. The largest fuel cell plant in the entire world is more than 30 times smaller than the fuel cell plant under consideration in Santa Teresa. There is absolutely no way to know, with certainty, what the actual pollution levels will be given the tremendous size differential, and thus gap in data, between operational fuel cell plants and this theoretical plant proposed by Yucca Growth Infrastructure. Betting the livability of our county on this unpredictable and unproven plan would be a total capitulation and betrayal of your so-called values: "protects the public health of New Mexicans…by preventing the deterioration of air quality;" "protect and restore the environment…foster a healthy NM for present and future generations" Though approximations of annual air pollution were provided, the testing used an extremely weak methodology leaving us, ultimately, with pseudoscientific guesses that have large margins of error. Estimated	3	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
anonymous	anonymous	Hello! I am a student from Europe and i am against project Jupiter, i hope they give the public 60 more days to review and comment on it, a public hearing to be set in Santa Teresa in both english and spanish. I believe approving the permit would be government sponsored racism and should not be allowed. Given the history of this company with it's frankly disturbing illegal waste dumping it's extremely worrying to not have the community's interest in mind. Thank you for reading my comment.	1	Merged Document	No	[redacted]						Yes	Yes	8/17/2026
Shaikha	Unknown	Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Nancy	Araujo	From the deepest depths of my heart and soul—we as a society, we as the people of Mother Earth DO NOT need these data centers to be built, even formulated. $165 billion of harmful metal and plastic will not solve any world problem. YOU are deciding the fate of humanity in our near future by making all of these data centers. Citizens of this Earth are dying everyday, yet somehow money is going towards throwing our water in the trash. We are not able to DRINK data. We do NOT need AI. I stand against AI and the awful "opportunities" these data centers are striving to achieve. Hear our voices, hear our stand. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Zakk	Scott	I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. As much as the construction of the AI data plant will "supply jobs," said jobs are entirely temporary. The company wants to supply jobs to workers for the AI data plant, but the company's end goal is that AI will replace many, many jobs. That is not the only lie the AI company has convinced you to believe. The microgrid will emit 161.2 tons/year of CO and 124 tons/year of VOCs near existing EPA non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.6°F in a sweltering desert climate, threatening vulnerable populations, most importantly, our New Mexico children and elderly, who we need to make up a community. If children are the future, they need to be alive to contribute. YGI can not take over our state, our safety, and our New Mexico beauty. NMED, please reject this permit. Sincerely, Zakk Scott.	1	Merged Document	No	[redacted]		Yes	Yes					8/17/2026
Joseph	Burchett	I strongly urge the NMED to deny this air quality permit. For one, this is yet another attempt at deception by Project Jupiter. As a Doña Ana county resident, I attended local town hall events, etc., to learn more information directly from the developers. Unfortunately, the public and civil leaders alike have been met with hugely consequential omissions every step of the way, largely surrounding the unprecedented amounts of power required for the data center. Water usage estimates, for example, focused on the 'office building', where the computer systems would be housed. Nothing about the unfathomable-capacity new power plant needed to power it all. As it turns out, the plant would produce over 10 million tons of greenhouse gases per year, 3x the entire El Paso Electric emissions in 2024! We are still yet to get an honest estimate of actual water usage for the microgrid. In other words, the environmental impact of 3-4 businesses will exceed that of the company providing power to 500,000 customers. While some high-paying jobs are promised, this entirely rests on a heavily inflated AI market that many economic analysts see as a bubble. Three days ago, I encountered a nice person in a Project Jupiter t-shirt while leaving the grocery store. I was told that they were collecting public input, so I gladly provided my perspective as well as my contact information. This info was going to be relayed onto the state and I was to receive a confirmation email to make sure I was the one to submit it. I never received such an email and, of course, my comment did not appear here upon checking.	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Barbara	Lewis	I do not support Project Jupiter, which I believe creates significant concerns for the environment, air quality, and water usage. Greenhouse gases are expected to be emitted in huge quantities, an act that is atrocious given the extreme weather the country is already experiencing this year due to climate change. The project would only contribute to the problem. And the project will have major water usage, which is unconscionable in NM, a state that consistently has severe drought conditions. Please do not let this project harm New Mexico's environment.	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Cipri	Salazar	I am a resident of Albuquerque, NM I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want my family, my nieces and nephews knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How can anyone enjoy the outdoors. Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed information. Air quality is just the tip of the iceberg when it's comes to concerns with this project. Water quality is also a big issue. New Mexico has been in a drought and with the implementation of this project it will surely cause issues and escalate the drought further in less time.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes		8/17/2026
Kevin	Sanchez	Dear NMED Staff, My name is Kevin Sanchez, and I live in Santa Fe, New Mexico. I am writing to express my concern regarding the risks that Project Jupiter poses to New Mexicans and to respectfully urge the New Mexico Environment Department to deny Yucca Growth Infrastructure, LLC's air permit application for the proposed YGI Microgrid in Doña Ana County. While Project Jupiter has been promoted for its economic benefits, I believe New Mexico has an opportunity to pursue a stronger alternative. Chris Lyons, the applicant and property owner for the Project Jupiter zoning approval, already controls a significant amount of land in Santa Teresa. This presents a unique opportunity to power the project with large-scale renewable energy infrastructure rather than an emissions-producing fuel-cell microgrid. Such an approach could create lasting workforce opportunities, strengthen New Mexico's energy future, and better protect public health, air quality, and the environment while advancing the state's long-term clean energy goals. The proposed fuel-cell microgrid would emit carbon dioxide and other air pollutants while relying on technology at an unprecedented scale that would also generate hazardous waste requiring long-term management. Recent scientific research has linked elevated carbon dioxide exposure to measurable changes in human blood chemistry, increased oxidative stress, and cognitive effects. As the agency charged with protecting New Mexico's air quality and public health, I urge NMED to carefully consider these potential impacts on surrounding communities when evaluating this permit. New Mexico has committed to expanding renewable electricity through the Energy Transition Act. Project Jupiter presents an opportunity to advance those goals while supporting long-term economic development through cleaner infrastructure rather than investing in a system that will continue producing emissions for decades. If the permit is not denied, I respectfully request that NMED hold a bilingual public hearing in or near the Santa Teresa community, with a virtual participation option, so residents, neighboring Tribal governments, and other stakeholders have a meaningful opportunity to participate in this decision. Thank you for your time and consideration. Kevin Sanchez	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026

Victoria	Anonymous	Dear NMED staff, My name is Victoria. I am a not resident of New Mexico but I am still writing to you because I am concerned about the risks and harms Project Jupiter poses to New Mexicans or the world in general. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am someone who has eczema. Heat waves/ climate change affects me a lot, because my eczema breaks out and sometimes can be so bad I can't even walk. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Victoria	1	Merged Document	No	[redacted]			Yes	Yes		Yes		Yes		8/17/2026
Anonymous	Anonymous	Dear NMED staff, I am not a New Mexico resident, but I have family there and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I believe it is our duty as humans and citizens to protect the nature we depend on. The heatwave that has affected so many of us this year shows the incredible dangerous impact climate change is already having. The concept of further contributing to the issue through a data center is absurd. I have family living in New Mexico and many of them would be negatively impacted by letting this project go through. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]			Yes	Yes		Yes		Yes		8/17/2026
Anonymous	Anonymous	We do not need or want data centers! The Rio Grande is running low. People need water more than they need the convenience of AI. People need uncontaminated air to breathe! Sure, initially, there will be jobs, but what job is worth destroying our children's futures? We don't want to live in the convenience of now, we want to ensure a brighter future for our children. What happens when water runs out and the air is polluted. People with the ability to, will move. What happens when everything is up and running and AI can now take over your job? More people will move. Then what happens to those who don't have the means to move? Our beautiful state will suffer. The initial gain is not worth what will come. Our economy will be destroyed and people will die. Our environment will suffer. Ecological systems destroyed. AI, unregulated, is destroying our future. It is making us dumb and lazy. We are losing creativity and motivation. If AI takes over, our future and our children's future is a wasteland. We don't want Project Jupiter!	1	Merged Document	No	[redacted]		Yes		Yes						8/17/2026
Jennifer	Braun	I am very concerned about the effects project Jupiter will have on New Mexico. I just moved to Las Cruces from FL and love this state so much already. Building data centers, no matter how "clean" they are, produces pollution in the form of noise, light, and space. Our state is so beautiful and no one wants to see these things taking up space in the beautiful vastness of the state.	1	Merged Document	No	[redacted]				Yes		Yes				8/17/2026
Asher	McCann	I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. As much as the construction of the AI data plant will "supply jobs," said jobs are entirely temporary. The company wants to supply jobs to workers for the AI data plant, but the company's end goal is that AI will replace many, many jobs. That is not the only lie the AI company has convinced you to believe. The microgrid will emit 161.2 tons/year of CO and 124 tons/year of VOCs near existing EPA non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.6°F in a sweltering desert climate, threatening vulnerable populations, most importantly, our New Mexico children and elderly, who we need to make up a community. Anonymous	Anonymous	I am writing to urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. The public should be given an additional 60 days to review and comment on the air quality permit so that community members can participate equitably. Even prior to the current AI and data center boom, New Mexico's ecosystems have been jeopardized by pollutants, contamination of air and water, and periods of water scarcity. This year, the Rio Grande ran dry earlier and for longer than I have witnessed it in the past. Last year I scooped handfuls of endangered silvery minnows with my hands from drying puddles to the few still-flowing streams in the river bed. This year, I saw no silvery minnows, bats or beavers. On the dried river last week, I saw the skeletons of fish. I saw the sun-dried carcass of a baby soft shelled turtle. Today, it is all dried sand. New Mexican people and their ecosystems and waterways do not need the further strain of excess water use, pollution and contamination. I urge you to deny the air quality application, especially given Bloom Energy's history of dumping hazardous waste illegally. If the permit is not denied, a public hearing needs to be held in Santa Teresa, with an option to participate virtually. Approving this permit would be willfully enabling government-sponsored environmental racism, as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]		Yes	Yes	Yes			Yes	Yes		8/17/2026
Adrian	Valles	Please do not go forward with the Jupiter project or any data center endeavors. There are great environmental repercussions, the Rio Grande is already bone dry, and Texas is taking our water as it is too. The pollution it creates are not worth what these things are used for. People make child porn and other horrible things with AI and we will be hosting that on our land. There are no regulations for AI that actually hold companies and anyone turning a profit off of polluting our air and water, and killing animals in the environment. New Mexico has a history of being an outlet for pollutants and experimentation that has harmed our people- we must not continue the same mistakes. Aside from all this, you will be investing in a technology that is in a KNOWN bubble that will burst sometime soon. You will also be investing in a technology that is ruining critical thinking, media literacy, and human connection. AI is controlled by a few people who get to decide what is allowed to be fed into it. That is to say a few people are deciding what information gets to be known, an can manipulate it however they want. You can look at the example in which grock was changed to constantly talk about a "white genocide" in South Africa as a current event. However, it was something that never took place. The US president and many others believe it to be true. You will be a part of this legacy if you go forward with the project. I ask NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. At the very least the public should be given an additional 60 days to review and comment on the air quality permit so that community members can participate equitably.	1	Merged Document	No	[redacted]		Yes	Yes	Yes				Yes		8/17/2026
Dan	Gillispie	Over the Excel Size Limit	11	Merged Document	Yes	[redacted]	Yes								Yes	8/17/2026
Angela	Anonymous	I want to express my disapproval for this project. This project will do nothing to benefit the community or local environment in the long run. This project being built would be environmental racism affecting a community already struggling. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	1	Merged Document	No	[redacted]			Yes	Yes			Yes			8/17/2026
Anonymous	Anonymous	I oppose Project Jupiter, if we all grew up without ai, we can continue living without ai. This project is doing many harms to both the locals and the environment, how is ai supposed to help us if they're already destroying our homes. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Debra	Leyndyke	Project Jupiter will be a nightmare for a state already classified as being in "water extinction". The fuel cells will send millions of tons of greenhouse gasses into our air. The jobs will disappear quickly after ai takes over. I do NOT want this is my backyard. Keep New Mexican's citizens' interests higher tha. That of the billionaires who will profit from this fiasco.	1	Merged Document	No	[redacted]		Yes	Yes			Yes				8/17/2026
Anonymous	Anonymous	I am asking you deny the proposed data center. There will be 14 million tons of greenhouse gases annually. This affects the air quality and puts lots of pollution. There will also be an enormous use of water. The campus would include 4 data center facilities. Filling 4 data centers requires about 10 million gallons of water and on going consumption would be 7.2 million gallons of water every year that it's operating. The project would use a daily average of 20,000 gallons of water when up-and-running and 60,000 gallons a day maximum. CRRUA said it produced an average of 2.6 million gallons of water daily. Residents lack trust of Sunland Park and Santa Teresa towards the project developers stems from the fact people have lived with low-quality drinking water supplied by CRRUA. Even if the water has been improved there was still a short notice and untrust	1	Merged Document	No	[redacted]		Yes	Yes	Yes						8/17/2026
Sophia	Yazzie	I am a resident of Albuquerque New Mexico and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I wish for my people and I to continue living here with lasting recourses. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Anonymous	Anonymous	I am submitting this comment to urge the New Mexico Environment Department to REJECT Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: It will produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development, alongside toxic waste possibly being improperly handled. Not only will this project severely affect the environment and citizens of New Mexico, it will also affect the entire planet. It is important that we prioritize the environment and the wellbeing of citizens	1	Merged Document	No	[redacted]			Yes	Yes		Yes				8/17/2026
Anonymous	Anonymous	I live in Nebraska and even though I know the direct effects of this fuel plant won't affect me, I would still like to bring to mind that in some ways the local and global population would be negatively affected due to its construction. The main issue is the air pollution. Bringing more toxic elements into the air would result in many negative health conditions in people some of which being an increase in respiratory illnesses, birth defects, life threatening cancer at any age and so on. This would severely decrease quality of life for many people living in New Mexico and eventually people everywhere else in the world as the pollutants spread through the atmosphere. This is one reason why Bloom Energy's application should be denied. Another reason is to consider who would be affected. This project is the largest fuel plant for a data center created by Bloom Energy and it is located in an area with a high population of Hispanic people. It would specifically affect a large population of people with dark skin. This would continue to promote racism by slowly creating a safer environment for racism. As a country that celebrates freedom for all, creating a place for racism and discrimination should not be allowed or even considered. Should this permit not be denied despite the proof of negative outcomes and clear racial motivations, there should be a hearing in Santa Teresa both in English and Spanish, with the ability to attend virtually to provide more people with the opportunity to express their own opinions and ideas about this project. Finally this permit should be delayed by another 60 days to give the public more time to leave their comments and ideas on this project. Personally I had no idea of the existence of this project until today, which is 4 days before the deadline for submissions. If I was not informed of this project until today, there are definitely way more people who have also not been informed of this project at all. For the maximum amount of people having their voice heard, this project should be delayed another 60 days.	1	Merged Document	No	[redacted]				Yes				Yes		8/17/2026
Mary	Hendrickson	I write the NM Environmental Department to request that you deny permits for their microgrid. We live in an air shed shared with Texas and Chihuahua. We already deal with high levels of ozone. Adding this level of additional pollutants to our air will sicken thousands more with asthma, and other chronic respiratory diseases. Of course it would also add more greenhouse gases when we as a state passed laws to move away from reliance on fossil fuels in our Energy Transition Act. Project Jupiter's water use, noise and air pollution would make Doña Ana County a sacrifice zone for the benefit of billionaires living in other states. That's immoral. Numerous entities in and out of government have shoved Project Jupiter down the throats of Doña Ana County residents despite significant pushback. The Environmental Department can stand up for us and others in the air shed. Deny their permits. It's the right thing to do legally and morally.	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes				8/17/2026
Joy	Lightfoot	Strong Opposition to Project Jupiter / Demand for Transparency and Accountability I am writing to express my strong opposition to the proposed Project Jupiter data center in southern New Mexico. While economic development is important, it should not come at the expense of our public health, our already strained natural resources, and the public's fundamental right to transparency. There are several severe issues regarding this project that compel me to oppose it: • Environmental and Water Strain: We cannot drink data. The proposed hyperscale AI data center threatens to consume precious groundwater in our drought-stricken desert. Furthermore, relying on natural gas and fuel cells for power will result in tens of millions of tons of greenhouse gases annually, severely impacting regional air quality and ozone levels. • Lack of Transparency and Public Engagement: The process surrounding Project Jupiter has been marred by a lack of public transparency. The execution of secret, non-disclosure agreements by government agencies and the ongoing lawsuits regarding violations of open meeting and public records laws are unacceptable. The public deserves a clear, open, and legally compliant process that is made fully available in both English and Spanish. • Contradictory and Misleading Practices: There is immense confusion surrounding the project's true footprint, with job number estimates fluctuating wildly. Furthermore, the disturbing reports that local residents' names were used on letters of support without their consent severely undermine any trust in the developers' community outreach efforts. I urge you to halt the fast-tracking of this project, enforce strict environmental and cleanenergy compliance, and prioritize the release of all hidden documents and agreements related to the development. I look forward to your response detailing how you plan to protect the interests and natural	2	Merged Document	Yes	[redacted]		Yes	Yes	Yes	Yes	Yes		Yes		8/17/2026

I urge you to halt the fast-tracking of this project, enforce strict environmental and clean-energy compliance, and prioritize the release of all hidden documents and agreements related to the development. I look forward to your response detailing how you plan to protect the interests and natural resources of New Mexican residents. Sincerely, Joy Lightfoot	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes	Yes		Yes		8/17/2026
Charlene	Debus	I am urging NMED to REJECT Yucca Growth Infrastructure's application for an air permit to power a massive AI data center in Dona Ana County. This latest proposal to fuel Project Jupiter is no less concerning than their previous air permit application. Their proposed use of Bloom solid oxide fuel cells seems completely irresponsible, especially given this project's track record of straight-up lying and distorting facts about the actual research and testing they have done and plan on doing to monitor compliance with environmental standards. The people of Santa Teresa are already suffering due to our poor air quality and sheer amount of southwestern heat, which has worsened over time thanks to climate change, and I have zero confidence, evidence, or trust that the manner in which this project will be fueled is going to do anything that even attempts to lessen that impact. This microgrid will be SIXTY TIMES bigger than the current largest operation using bloom solid oxide fuel cells. Do we really want our county, already seriously suffering from heat and awful air quality, to be the guinea pigs for what is likely going to be a poorly monitored microgrid with immense negative impacts on some of our most vulnerable residents? Bloom super oxide fuel cells emit an insane amount of carbon dioxide, in addition to carbon monoxide, and will create a heat island in what is already a really hot desert. We already have comparatively poor health outcomes, but our residents will suffer with the drastic and permanent increase in respiratory illnesses this microgrid will bring. Are we willing to sink in the amount of money and health infrastructure that will be needed to respond to our residents' sudden increase in health problems? Is it worth it for the chance to be a guinea pig for this project?	1	Merged Document	No	[redacted]		Yes	Yes			Yes				8/17/2026
Derrick	Pacheco	This air permit should not be granted. This is ASARCO 2.0. The borderland from Horizon to Sunland is a polluted mess as it is; simply take a drive from Las Cruces across El Paso to see for yourself how bad the air quality has gotten. The news regarding the Project Jupiter canvassers and the signatures submitted not matching the wishes of the signee should also be taken into account. Any corporation trying to game the system should be scrutinized even more than your standard application. We have a history of allowing these extractive industries into NM with no recourse and now we're facing a water bankruptcy. Time for things to change or we'll have nothing left to fight for.	1	Merged Document	No	[redacted]		Yes	Yes							8/17/2026
Lindley	Hornsby	This concerned community member is pleading to NMED to DENY the air quality permit submitted by yucca growth infrastructure. Fuel cell technology is an experimental form of energy production; the public health risks of implementing this type of energy generation exceeds any economic benefit. New Mexico has long been a sacrifice zone and in 2026 we should know better than to experiment with our communities lives for the profit of an out of state company. NMED, please protect the community members of southern Dona Ana, El Paso and Chihuahua, MX — all of whom are under the purview of this project's impact. I appreciate your service to our state and chosen responsibility to keep everyone safe and healthy.	1	Merged Document	No	[redacted]			Yes			Yes				8/17/2026
Rachel	Saunders	I vehemently oppose the construction of this data center in Dona Ana County. The environmental impacts on air, water, and soil quality alone are enough to stop this construction. But evidence from data centers in other states has shown they only extract resources without adding any tangible value, drive up water and electricity costs, and negatively impact the health and quality of life of local communities. Project Jupiter will devastate the Santa Teresa community. Do not approve the Air Quality permits.	1	Merged Document	No	[redacted]		Yes	Yes			Yes				8/17/2026
Irvin	Martinez	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local sincerely Irvin Martinez	1	Merged Document	No	[redacted]		Yes								8/17/2026
John	Wilks, III	I oppose permitting of the hyper scale data center commonly known as Project Jupiter. Bloom Solid Oxide Fuel Cells have never been deployed at the scale proposed and the company's track record and inadequate pollution testing protocol make all estimates provided in the application suspect. The proposed design-2,275 individual fuel cells, each with its own stack and no integrated controls for regulated pollutants-does not provide realistic mechanism to verify compliance or facilitate enforcement of pollution standards. Air pollution testing provided as part of the application was inadequate and cannot be relied upon for factual results. Solid Oxide Fuel ICells emits hazardous air pollutants, extreme heat, and hazardous waste streams that applicant fail to account for. Carbon dioxide overload is a significant and growing public health hazard. The addition of 10 million tons of CO2 emissions annually will have significant adverse health impacts for local communities and for all biota.//The newly greenwashed Project Jupiter air permit application must be rejected, or at the very least, be subjected to a public hearing to investigate community impacts.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes		8/17/2026
Anna	Gay	I am writing to express my strong opposition to the proposed Project Jupiter data center in southern New Mexico. Economic development should not come at the expense of public health, our limited water resources, or a transparent public process. I urge you to oppose this project for the following reasons: Water and Environmental Impacts: The proposed hyperscale AI data center would place significant demands on scarce groundwater in an already drought-stricken region. Its reliance on natural gas and fuel cells would also generate substantial greenhouse gas emissions and worsen regional air quality. Lack of Transparency: The project has been advanced through secretive processes, including non-disclosure agreements and ongoing litigation over alleged violations of open meetings and public records laws. All project documents should be released publicly in both English and Spanish. Misleading Public Outreach: Conflicting claims about the project's size and job creation have undermined public confidence. I also request an independent third-party audit of all public comments submitted in support of the project, as there have been substantiated reports that canvassers hired by the project submitted comments on behalf of residents who explicitly opposed the project or had expressed neutral views. Accountability: Community engagement must be accurate, transparent, and conducted with informed consent—not through deceptive or misleading practices. I urge you to halt the fast-tracking of this project, require full environmental review and clean energy compliance, release all project-related agreements and documents, and ensure an independent review of the public comment process. Thank you for your consideration. I look forward to your response outlining how you will protect New Mexico's communities, water resources, and the integrity of the public decision-making process.	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes	Yes		Yes		8/17/2026

Katherine	Young	It appears that the State of NM is working in haste to support the needs of Project Jupiter without properly investigating the environmental and human health cost. The purpose of NMED is to assure health for all NM residents present and future. However, it appears this proposal is pushing forward despite knowing the water usage of this data center and the air contaminants. To push this forward without proper public knowledge is criminal and disrespectful to our citizens. I personally have not seen a single invite to any informative legislature regarding Project Jupiter. Additionally, Dona ana county is already not meeting federal air quality regulations and we are in a severe drought. This proposal requests to increase that disparity. I request denial for this permit given the potential environmental detriment of the methane gas fuel cell; something that has never been built or used in our area and will likely add chemical contaminants to our environment. If this proposal is not denied, a public hearing must be held in Santa Theresa with an option to participate virtually.	1		No	[redacted]								
Jessica	Alsup	I am writing in opposition to approving the air quality permit for the Jupiter Project/Yucca Growth Infrastructure LLC. Multiple sources, studies, and examples show the extreme environmental harm these types of data centers cause. The pollution created by this particular data center outpaces the pollution created by the cities of Albuquerque, Santa Fe, and La Cruces combined. Further, Project Jupiter has allegedly been falsely using New Mexican citizen's names to support their cause, paying online influencers to spread misinformation, and has been paying for ads that omit important facts about the impact of this data center. These unethical practices speak to how this company does its business, and any information they give to satisfy this application should be highly scrutinized and outright rejected. The State of New Mexico should be doing everything in its power to prevent the completion of this project, and therefore this application must be denied.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes		Yes	8/17/2026
iusti	remer-thamert	i am deeply concerned at the possibility of Project Jupiter proceeding and wholly opposed to this or any data center being constructed in New Mexico. while they are paying many people to canvas, creating many misleading ads about how they will care for water and public infrastructure and create jobs, at best they will offer some short term jobs and then leave a devastating long term impact on our aquifer and community. they are a dangerous company that will hurt our state in the long term if allowed to proceed, as has been the case in other water limited communities where data centers have been constructed.	1	Merged Document	No	[redacted]		Yes	Yes					8/17/2026
Geneva	Harstine	Hi, I'm writing as a lifelong NM resident to express my strong opposition to Project Jupiter, and to ask that you REJECT the LLC-YGI Microgrid Air Quality Construction Permit Application from Yucca Growth Infrastructure. New Mexicans need clean water and air, not AI infrastructure that will primarily create value for the already wealthy, and increasingly fuels surveillance, violation of intellectual property through nonconsensual use of artist's work, and crimes against humanity - see Project Lavender, Gospel, and Where's Daddy, all used in Israel's genocide against the Palestinian people. Google's Project Nimbus empowered the same genocidal state with AI, and recently contracted with CBP to bring these tools to our southern border. What the people of Gaza have been subjected to is absolutely horrifying, and I don't want it for anyone, much less my neighbors and people who are chasing the American dream. In addition, our state's water situation is highly concerning, even without siphoning off our most precious resource to cool a hyper scale facility such as the one proposed. Between multiple Superfund sites, and our river going dry for the third year in a row, we simply cannot afford it. 30 decent-paying long term jobs are not a fair trade for the massive heat ouputs, air pollution equivalent to our 3 largest cities, and harm to our already threatened water supply. I find the disingenuous use of social media influencers as hired propaganda, and false attribution of people's names in support to be deeply offensive, and a clear indicator that the architects of this project do not respect our residents. Thank you for your service to public health.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Addison	Mueller	I strongly oppose this project. The amount of water required for this project is not sustainable for the people living in the Rio Grande Basin or other arid regions. The air quality in the greater Las Cruces/ El Paso area is already one of the worst areas in North America, why would we add to this issue? The long-term cost to the community and the public outside of Las Cruces is too great. This project does not provide any benefits but to a few wealthy individuals who are already living above their means.	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes				8/17/2026
Eric	Haney	I urge you to deny the air quality permit application for Yucca Growth Infrastructure. My children deserve to grow up with clean air and drinking water in the same county. We are in the middle of an extreme heat wave due to climate change. It is unconscionable to approve a plan that would dwarf the CO2 emissions of the residents of the county. What pollution controls are in place? How did the developers arrive at the numbers on their permit if there has been no plant close to this size? What are the safeguards for our health and our children's health if these estimates are incorrect? The emission estimates of the plan as has been submitted are already unacceptable. There is too much at stake in the uncertainty of the reality of the project. The mission statement of your department says that your mission is to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations. How are you sure that this will ensure a healthy and prosperous New Mexico for future generations? You cite four tenets to uphold this mission: Science: "Using the best available science to inform our decision-making in protecting public health and the environment." What rigorous, independent science has gone into the claims of this permit? Innovation: "Employing creative engineering and technological solutions to address environmental challenges." If Project Jupiter claims that its new permit reduces the carbon emissions by 67% and NOx emissions by 92% as they claim, why can't a $165 Billion project fund a completely carbon neutral energy solution? Collaboration: "Engaging communities and interested stakeholders in environmental decision-making outcomes." How many letters have you received showing that the vast majority of the community does not want this project? How many letters that were not paid for by Project Jupiter have been submitted in support of this project? Compliance: "Ensuring meaningful compliance with state regulations and permits; leveling the playing field through enforcement." What assurances does the community have that this project will meet state regulations? What plan is in place if it doesn't? Reject this permit.	1	Merged Document	No	[redacted]	Yes	Yes						8/17/2026
Tamara	Trejo-Perez	I oppose this facility because it poses a threat to our aquifer and endangers our safety.	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes				8/17/2026
Zachary	Hulme	I'm writing to express my dismay that this development has gotten this far, it is patently obvious to the most casual of observers that this will benefit only the developers themselves, and cost every resident of this state. We don't need to pollution, we don't have the water, we have better uses for the land, the sacrifices for a few short term construction jobs and a longer employment for a small handful of people is not worth it. Also they've made clear what sort of trust they should be granted with the shameful tactics employed by their PR firm, no doubt they will claim they had no knowledge and are not responsible for the actions of their contractors. What an insult to the people of New Mexico, at a bare minimum the developers and anyone associated with them should be barred for perpetuity from ever doing business within our state, ideally they should be fined into the red and made to rehab the land they've already torn up. With a willingness to commit this illegal behaviour the idea that they will keep any promise made to us about how they will operate their data center, they jobs they would provide, and the resources they will consume is laughable. Furthermore: I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa. Thank you for your time	2	Merged Document	No	[redacted]	Yes							8/17/2026
Laura	Brainard	Comment on the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Laura Brainard July 6, 2026 To the New Mexico Environment Department, Air Quality Bureau: I am a New Mexico resident, and I am writing to ask you to deny the air quality construction permit application for the Yucca Growth Infrastructure (YGI) Microgrid, the power plant for Project Jupiter, near Santa Teresa in Doña Ana County. The application asks the state to allow a 2,462-megawatt gas-fed fuel cell plant to run 8,760 hours a year, non-stop, next to homes and a high school in Santa Teresa. By the company's own emissions tables, it would release roughly 161 tons of carbon monoxide, 124 tons of smog-forming VOCs, 75 tons of fine particulates (PM2.5), and 37 tons of nitrogen oxides every year, along with about 10.1 million tons of greenhouse gases, more than two million cars' worth of climate pollution from a single site. The plan provides for zero pollution control measures and no carbon capture: no scrubbers, catalytic controls, nothing. In my opinion, the plan appears to be designed to dodge scrutiny, which is what this company appears to keep doing; as with splitting the plan into two permits to dodge limits in their first try. And are they stealing non-consenting signatures to create pretend supporters? You need to investigate the signatures. Are you asking enough questions? Is there a chance of understatement? Instead of spending millions on media spin, that money should be spent on pollution controls and transparency. Clean engineering needs to be part of the plan. Because the permit application is with the air quality department the permit application does not look at near-term or long-term effects on the county and local residents on water, waste heat, light pollution, round the clock noise, dust, airborne particulates, plus the construction impacts of diesel truck traffic emissions and congestion. By itself, the plan ought to be rejected and this application terminated solely because the pollutant numbers are staggering, does not consider current air quality conditions of the county, it will effect the state's own air quality objectives and contiguous populations, and they have no intention or plan to mitigate the well documented issues and harms this could unleash. The paltry promise of a handful of jobs is not going to make up for the long-term costs this project will inflict. Please tell Project Jupiter and its partners to pack it in and leave because they lack the transparency credibility, ethics, or integrity New Mexican law makers, residents, visitors, and neighboring states deserve and demand. I ask: Please deny the permit and hold the in-person hearing in Santa Teresa, in English and Spanish and online, so the people who will breathe this air and feel its impacts can be heard.	4	Merged Document	Yes	[redacted]	Yes	Yes	Yes	Yes	Yes		Yes	8/17/2026
Stephanie	Lewis	I am very against this data center please do not allow it. It will use water we don't have and significantly reduce the air quality and increase emissions astronomically I am not okay with this at all.	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes	Yes		Yes	8/17/2026
Paul	Swanson	This is a terrible idea for our watersheds. I am opposed to this project do not want to risk the complete depleting of our aquifers. The data shows the short-sightedness of such endeavors for the local economy and the massive downside to our natural resources. We do not need this project to move forward.	1	Merged Document	No	[redacted]	Yes	Yes						8/17/2026
Katherine	Young	It appears that the State of NM is working in haste to support the needs of Project Jupiter without properly investigating the environmental and human health cost. The purpose of NMED is to assure health for all NM residents present and future. However, it appears this proposal is pushing forward despite knowing the water usage of this data center and the air contaminants. To push this forward without proper public knowledge is criminal and disrespectful to our citizens. I personally have not seen a single invite to any informative legislature regarding Project Jupiter. Additionally, Dona ana county is already not meeting federal air quality regulations and we are in a severe drought. This proposal requests to increase that disparity. I request denial for this permit given the potential environmental detriment of the methane gas fuel cell; something that has never been built or used in our area and will likely add chemical contaminants to our environment. If this proposal is not denied, a public hearing must be held in Santa Theresa with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes							8/17/2026
Domonic	Jimenez	Project Jupiter is an ecological disaster waiting to happen. The impacts it will have on our air, water and public health will deplete and already stressed community. I am strongly opposed to the creation of this data center and all data centers in this region. If developers wish to continue then the city, county, and state should let the public vote on it. Host a ballot measure that every citizen votes for.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes		Yes	8/17/2026
Elizabeth	Gallagher	I am opposed to YGI receiving approval for an air quality permit, along with all construction associated with this project. I have seen that the projections for emissions are more than the cities of Las Cruces and Albuquerque combined. This is absurd. Climate change and climate catastrophes are one of the biggest worries that I have. I want the children in my life, that live in this state, to have a future where they can breathe clean air, drink clean water, and know that the adults before them made decisions to protect them. We are in historic drought conditions, the Rio Grande is dry, and it is absurd to consider building a data center that uses so much water in New Mexico. We need the water for people, animals, plants, and life in general in the desert - not fueling a data center! I do not want to see our aquifer being depleted even more than it already has been. Please, do not approve this air quality permit or any subsequent work on this project.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Pigeon	Colombo	Reject the air quality permits. We need more time for communities to measure the impacts, an additional 60 day would be good. We need to recognize Bloom Energy has been an environmental hazard before and that this would put residents in Dona Ana county at further health risk. Project Jupiter is sending in fake comments in support and that's gravely alarming too. This needs to be stopped. No to project Jupiter, No to data centers.	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Margherita	Selicato	I am a resident in Italy, and I ask that this data centre is not built. As a woman and artist living in the age of AI, I wish to see it subdue rather than grow. These data centres not only will make an already dangerous tool in the wrong hands even more powerful, but they will physically harm the people close to its location. It would be a physical and psychological harm, as the deterioration of air quality and natural beauty around the area would damage people's physical and mental health. We have to protect the future generations, and while AI is masqueraded as progress that will help our children, its expansion is actively harming them. I ask the authorities to do what is right to protect those under their care and not build this data centre. They will thank you, your children will thank you, and you will be on the right side of history. It's important to leave our children the safest and cleanest world we can, and the building of this data centre is doing the opposite. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste- this is not an organization to be trusted with our safety. Please include the public in this decision with a public hearing both in English and Spanish and an option to attend virtually. Everyone must be allowed to make an informed decision.	1	Merged Document	No	[redacted]		Yes	Yes					8/17/2026
Linda	Hall	The public that this project will affect, was never given the opportunity to know in advance what this project is and how it will affect our community and the resources that it is going to take away from the people who live here. There should be at least a 60 day moratorium on any building or developing of this property until there is sufficient investigation by city council, by county commission, and by the people who live in this area. The city Council and the county commission should NOT move forward with any voting on this project or construction in this area without proper presentation to the people who live here and the time and consideration of the public, including a public vote on whether this project should move forward or be canceled completely. Although AI, and all it stands for presents some advancements in all sectors, there are many drawbacks. The use of public water and electricity without public representation and opinion being even considered is a travesty of justice and there seems to be some collusion and payoffs taking place behind closed doors, that are profit for the few and the people in our area will pay the price in so many ways. The representatives who were elected to reflect the needs of their constituents, have not taken into account those needs, nor given the public the opportunity to study and understand all the ramifications building these centers in our area will mean. I believe it is time to let the people speak and perhaps a change in our representation is due.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Cathy	O'Neill	I was born and raised in southern NM. I'm also a soil scientist who worked for USDA in Las Cruces in the '90s. We didn't have enough water for pecan trees and keeping aquatic animals in the Rio Grande THEN. A data center is the last thing a desert needs in the year 2026, when water shortages have only grown more dire. There's no justification for this kind of capitalistic, extractive nonsense. My entire extended family still lives in southern New Mexico and will be adversely affected by data centers. Whatever pros there might be are irrelevant when you look at the cons which include destroying our one natural resource that is already over-exploited and headed toward extinction if the system doesn't change immediately. The people who have lived there for millennia will be forced to evacuate or die, rendering those data centers and their meager jobs completely moot. And I haven't even touched on the subject of air!	1	Merged Document	No	[redacted]	Yes				Yes			8/17/2026
Anonymous	Anonymous	I am a resident of Albuquerque and have lived here my whole life. I have watched the Rio grande go from an actual river, to a sad dry existence. I have felt the summer go from sometimes reaching 90 to consistently making it to 100 plus for multiple days. Throughout all of that it has become apparent that our state is in no condition for anything like a data center. The last thing we need is a massive building that drains more water than we already don't have. It doesn't matter what "water resources saving" method they have presented. We simply don't have enough water as it is. As well, that promise of "thousands of jobs" is simply temporary, and is such a misleading statement. When we all know that the jobs will only last the construction because why else are they making a data center. Clearly so that they don't have to continually pay real humans a proper wage instead. It's simply baffling that no matter the data for how unprofitable ai is the continual push for said data centers is, they are still pushing for one. If you do this, you should be prepared for the consequences. The public will not take this decision lightly and tensions over our basic resources are high. If you think that humans and other living breathing beings in New Mexico are less deserving of water then you're wrong. Everyone has a right to their basic needs and to threaten water is morally bankrupt.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Melissa	Shepard	The lies and propaganda being spread by those behind Project Jupiter simply cannot be believed. The majority of studies being done on similar projects as well as projections for Project Jupiter show that the impact on the surrounding communities will be devastating. To believe that this data center will somehow avoid the negative impacts that every other data center has already inflicted on human lives is absolute madness. We simply cannot afford to let ourselves be manipulated by corporate greed. This data center is bad for our people, bad for our environment, and bad for New Mexico. If this monstrosity is built, we will be dealing with the catastrophic effects for generations to come. We will look back at this moment as the point where we could have changed direction and saved ourselves. I strongly oppose this and all future attempts by those seeking to build data centers in New Mexico. Our health and safety and prosperity are not for sale.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Sara Isabel	Ruiz Flores	I write to express my disagreement with project Jupiter. I highly refuse to support a project that is going against the environment, that is going to consume most of the water in New Mexico. I have to remind you that we live in a DESERT. Technology should never detriment the environment and the landscape of the people that live and work in New Mexico. As a biologist, I will always talk about the benefits of preserving the environment, and the project Jupiter is completely the opposite. I hope data centers never make it, they benefit no one.	1	Merged Document	No	[redacted]			Yes					8/17/2026
Elizabeth	Sanderson	I am writing to express my disapproval and lack of support for Project Jupiter, which I believe would be a significant detriment for all New Mexicans. Project Jupiter would be taxing on local infrastructure, contribute to water shortages in an area already affected by climate change and drought, and produce very few long-term benefits. The number of permanent jobs created by this project is minimal. The project creates significant risk to the environment, including to animal habitat and water quality. I urge the New Mexico Environment Department to deny this project. -Liz Sanderson	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Andres	Esquivel	I am against Project Jupiter, and I strongly urge the NMED to deny this permit. Bloom Energy has had a history of illegally dumping hazard waste, and accepting their permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Additionally, the public should be given an additional 60 days to review and comment on the air quality permit. As Oracle has been feeding this public comment using peoples names without permission, this would be helpful to correct the record. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Thank you for your time, please deny them this permit and let's not allow Project Jupiter to become a reality.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
				Merged Document		[redacted]		Yes	Yes			Yes	Yes	8/17/2026

Cara	Webster	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. In particular, it will create jobs and better utilize vacant land.	1		No	[redacted]																	
Nani	Chacon	I am writing to oppose project Jupiter amid concerns for air quality and environmental degradation. New Mexico is a fragile eco system that cannot support this type of infrastructure in our , water or land	1	Minimal Document	No	[redacted]	Yes	Support Non-Substantive															8/27/2026
Kat	Porter	The permit needs to be denied. We are already past the point of no return on many climate change actions. Further desecration of the land will only result in loss of life. Additionally, the environmental racism of building water-hoarding data centers in Black and Brown communities is staggering. Hell Project Jupiter.	1	Minimal Document	No						Yes	Yes	Yes										8/27/2026
Sandra	Lawson	This project is short-sighted and effects a rural community in a negative way. The air pollution and water usage are risks to a fragile environment. The people in the local area will not benefit; no huge job growth will occur. This company will drain already limited resources from the surrounding community and also disproportionately affect the local population with noise and air pollution and draining local water resources. It's large footprint will negatively affect wildlife in the area. Even those of us living in larger towns know that when one part of NM suffers it has negative effects on the whole state. The use of methane gas has to power the site negatively effects air quality. Stop project Jupiter and allow for public comment that will be heard. There is no up side for the local community or the state from this data center. Also increased energy prices will affect people! The land is not 'empty' and the resources are not for sale!	1	Minimal Document	No						Yes		Yes										8/27/2026
Meechell	Duran	I am absolutely against a data center! We don't need greedy companies coming into our beautiful state and gut our land and use our precious resources to make a profit. New Mexico is not for sale!!! Keep our air and water safe!!! Do not approve the permit!!! The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana y Ana County.	1	Minimal Document	No						Yes	Yes	Yes		Yes								8/27/2026
Claire	Blume	Project Jupiter and other AI data centers liken t are a burden on the ecosystem and hardworking citizens' tax dollars. The rapid proliferation of AI data centers can put enormous strain on local and regional resource burdens that many communities are not fully accounting for or prepared to handle. A study by the Houston Advanced Research Center (HARC) and the University of Houston found that data centers in Texas will use 49 billion gallons of water in 2026, and as much as 399 billion gallons in 2030. That would be equivalent to drawing down the largest reservoir in the USMonticello's 57,000-acre Lake Meadbasin by more than 50 feet in a year. Even if you are using reclaimed or recycled water, it is no longer returning to the base flow of rivers and streams, having severe ecological impacts and supply issues. There are less water intensive ways to cool data centers, including closed-loop water systems, which require more electricity, and immersion cooling, in which servers are submerged in a bath of liquid, such as a synthetic oil, that conducts heat but not electricity. Immersion cooling also enables denser server installations but is not yet widely used, largely due to cost. Data centers are among the reasons ratepayers nationwide have seen their electric bills increase at twice the rate of inflation in the past year. Part of that is the new infrastructure data centers will require, such as new power plants, transmission lines, or other investments. Those costs, as well as ongoing grid maintenance and upgrades, are typically shared by all electric customers in a service area through charges added to utility bills. I understand the desire to tap into a growing industry and reap the benefits of AI and the economic growth it brings. According to the U.S. Drought Monitor, New Mexico is experiencing severe to extreme drought across the state as of July 2, 2026. Building a data center will push us over the edge into ecological collapse for wildlife and communities, especially those living on reservations. Continuing with this data center will not only kill and harm future generations of New Mexicans, but it will also harm our local indigenous wildlife beyond repair. Please consider all the devastating effects this data center will have on the community and wildlife, both present and future.	1	Minimal Document	No						Yes	Yes	Yes		Yes	Yes							8/27/2026
Savanah	Bell	Approving this plant and the air quality permit would be allowing toxic chemicals to pollute the air. The plant will generate poisonous, hazardous waste that would harm not just the environment but the people. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given the history of Bloom Energy illegally dumping hazardous waste. If the permit is not denied, then a public hearing needs to be held in Santa Teresa, in both Spanish and English, with the option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana y Ana County are already disproportionately impacted by environmental pollution.	1	Minimal Document	No						Yes	Yes	Yes		Yes								8/27/2026
Joshua	Santana	This data center is unwanted by the majority of people in the region. Big and large data centers are being rejected by the majority of U.S. citizens. This will have devastating consequences for the air and water quality in an already drought prone area. These effects will outlast any financial benefit that may occur. New Mexico raised me and my family and the data center is not worth it.	1	Minimal Document	No							Yes	Yes		Yes	Yes							8/27/2026
STEVE	MILLER	I oppose Project Jupiter and am super concerned about our aquifer being depleted by the data industry. Please do not allow this to happen in our already dry state. I'm also nervous that bots have been used to speak in favor of the project. All but one of the comments I viewed have identical text string numbers that are supposed to make the community feel good about this project. Thank you, Steve Miller PS I am an actual human	1	Minimal Document	No						Yes												8/27/2026
Chris	Preciado Ubalton	This project is dooming my community by destroying its water source, polluting the air systems and spiking electricity costs. I don't want them here.	1	Minimal Document	No						Yes		Yes										8/27/2026
David	Hart	Please see our comment letter and supporting documents (attached).	7	Minimal Document	Yes						Yes				Yes								8/27/2026
Demetrius	Johnson	My name is Demetrius Johnson. I live in Rio Rancho, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 159 Microgrid in Doña Ana County. I am an enrolled member of the Navajo Nation and have called Albuquerque/Rio Rancho home for over 2 decades. I am also a recent graduate of the University of New Mexico with a Bachelor of Science in Electrical Engineering. From what I know as an Indigenous person to the Southwest region of the United States, and as a scientist, I know when technology is neither beneficial to humanity nor the environment, ecosystem, and non-human beings. As I've heard from my own people, and the Pueblo Peoples who are Indigenous to this land, we are not in an extreme drought, but a more dire PERPETUAL drought. As I write this public comment, the Rio Grande is bone dry as it has been the last few summers — a drastically different view from when I was growing up. We cannot afford to be sending water to cool data centers, nor building energy infrastructure to support such projects. NO TO DATA CENTERS AND SUPPORTING INFRASTRUCTURE. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants. • This technology generates toxic waste, and the process for handling this waste is still unclear. • Fuel cell technology or a centralized waste system has never been tried at this scale. • Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 159 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely,	2	Minimal Document	Yes														Yes				8/27/2026
Lane	Harris	New Mexico has a strong heritage and responsibility of stewardship of the land. We do not want this data center. We do not want more strain on our already precious water supply. Stop this project. Cancel development. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana y Ana County.	1	Minimal Document	No						Yes	Yes	Yes		Yes		Yes						8/27/2026
Jason	Espinoza	[redacted]	9	Minimal Document	Yes						Yes	Yes	Yes			Yes	Yes						8/27/2026
Suzanne	DePuth	Data centers are dangerous and largely unfeeted, but what we DO know is that they use huge amounts of water and energy and create noise of dangerous levels to creatures human and otherwise. They are NOT a good thing. Any destroy for more than anything their artificial intelligence gathering could ever create. STOP this data center from happening NOW! It is set that part of the country frequently and ascii to be pressed in its natural state. In NM production of one of these centers was stopped dead in its tracks. STOP THIS ONE TOO. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana y Ana County.	1	Minimal Document	No		Yes													Yes				8/27/2026
Jennifer	Hartman	Against proposed data center because of impact to our water supply and energy demands	1	Minimal Document	No						Yes	Yes	Yes		Yes	Yes	Yes						8/27/2026
Christian	Jackson	I am commenting today to ask the Air Quality board to revisit the permit and extend for 60 days to allow revision. The permit should be denied, one of the groups involved has already been fined for improper management of toxic/caustic waste. New Mexico deserves better. Project Jupiter has repeatedly been dishonest about the resources it will require and impact and should not be trusted with the states land and resources. Data centers are continually being built in poor communities and perpetuating environmental racism.	1	Minimal Document	No						Yes		Yes										8/27/2026
Anthony	Tassaff	I am against the issuance of a permit. As a nearby resident of Doña Ana County I am deeply concerned about the impact of the proposed so-called micro grid. There is nothing "micro" about this proposal, a data center that would be amongst the largest in the country. It would polute the air at a scale larger than the rest of the county combined, waste millions of gallons of ground water, and will drastically increase energy prices in the region. Deny Yucca Growth Infrastructure a permit.	1	Minimal Document	No							Yes	Yes		Yes	Yes							8/27/2026
Terri	Hansen	This project will emit more air pollution than Los Cruces, Albuquerque, Santa Fe combined. They are using untested technology at the scale requested. Our communities are being used as guinea pigs for outside entities. Please deny this application.	1	Minimal Document	No						Yes		Yes										8/27/2026
Ronda	Gilliland-Lopez	Members of the Board, On behalf of the Mechanical Contractors Association of New Mexico and the Sheet Metal & Air Conditioning Contractors of New Mexico, we write in strong support of Project Jupiter's air quality permit applications. Our member contractors design, install, and maintain the mechanical, HVAC, piping, and sheet metal systems that power New Mexico's hospitals, advanced manufacturing facilities, refineries, data infrastructure, and commercial buildings. We understand that major industrial investments do more than create construction activity, they shape regional economies for decades. Project Jupiter represents one of the most significant economic development opportunities in southern New Mexico in recent years. The anticipated 4,000 construction jobs during the build phase and 1,000 permanent, well-paying jobs once operational will generate substantial economic ripple effects across Doña Ana County and beyond. Projects of this scale drive demand not only for skilled construction services, but also for local suppliers, engineering firms, equipment distributors, transportation providers, and small businesses that support large capital projects. From a contractor perspective, long-term capital investment is what allows New Mexico firms to grow responsibly and sustainably. When projects like Jupiter move forward, our locally-owned contractors invest in new equipment, expand payrolls, strengthen safety programs, increase bonding capacity, and deepen partnerships with workforce training programs. This builds durable in-state capacity rather than relying on out-of-state firms — keeping tax revenue, expertise, and reinvestment rooted here at home. We are particularly encouraged by the project's "Doña Ana First" hiring strategy and the $1.5 million Education Fund to support workforce training and partnerships with local schools and colleges. Strong economic development requires a reliable talent pipeline. When capital investment is paired with intentional workforce development, New Mexico	2	Minimal Document	Yes									Yes									8/27/2026
Chloe	Thurman	Protecting our land, air, the people and creatures that live here is important to myself and my community. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. I didn't learn about this forum for comment until today, the deadline. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana y Ana County are already disproportionately impacted by environmental pollution.	1	Minimal Document	No								Yes		Yes								8/27/2026
Anonymous	Anonymous	This project is DANGEROUS to the health and safety of our residents, wildlife, and overall environment. If this permit is approved the air quality bureau will directly be playing a part in destroying our ecosystems. I have called New Mexico home for 5 years and love it dearly. Please do not allow the destruction to These centers are such a waste of resources. There are small towns in NM that are struggling to provide it's residents with water and water is so scarce. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally burning this waste and hiding it for several years. This company will literally repeat its bad habits, illegally dump dangerous and radioactive chemicals into our public landfills, and we'll just have to wait until somebody notices? The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana y Ana County.	1	Minimal Document	No							Yes	Yes		Yes	Yes							8/27/2026
Mariah	Montgomery	[redacted]	1	Minimal Document	No						Yes	Yes	Yes		Yes	Yes	Yes						8/27/2026
Kai	Hogan	While I do not live in New Mexico, more less America, I do not want more AI Data centres to take up more water, ecosystem, and animal life than they already have stolen. The pollution and air quality could be catastrophic to the people in the area. Children will grow up breathing in toxic fumes, people will live in fear of what may happen next. What if this fails? What if everyone gets hurt in the process due to negligence and a rush to finish the project?	1	Minimal Document	No						Yes	Yes			Yes	Yes							8/27/2026
Amy	Louise	Please do not approve permits. Approving the permits would impact air quality immensely. It would be more than the pollution of the 2 largest cities in NM. There is already air quality issues in southern NM due to El Paso and Mexico. Also NM is in a long term drought. The rivers, streams, and aquifers are going dry. The reservoirs are at record lows. We need the water for our cities, wildlife, rivers, streams, farms, and reservoirs. Data centers have no business coming to NM. Also, there are major concerns about our culture, public lands, wildlife, light pollution and noise. Even in locations where there is adequate water, cities do not want Data centers. There should be guardrails in place before anymore Data centers are built. They also increase utility bills. Please do not approve the permits for this massive data center that would negatively affect NM. Respectively, Amy Louise, retired Civil Engineer.	1	Minimal Document	No						Yes	Yes	Yes										8/27/2026
[redacted]		[redacted]		Minimal Document							Yes	Yes	Yes		Yes								8/27/2026

Jeremy	Bentsides	As a canvassing professional I read about the forgery of public comments of canvassers so this abuse of integrity should in itself lead to the denying of the permits along with environmental damage the data centers would cause. If the permits are not denied there should at least be a public hearing.	1	No	[redacted]																
Cynthia	Pelaia	To whom it may concern, I strongly oppose project Jupiter here in the northern Chihuahua desert where a human life has existed for at least 25,000 years. Project Jupiter serves the economic interests of the elites and not the political and environmental interests of all the peoples of this land. I call on a moratorium of all work on the construction of the ill conceived mega data center. Thank you for your consideration. Dr. Cynthia Pelaia	1	No	[redacted]							Yes			Yes		8/17/2026				
Veronica	Rebelo	I am a canvassing professional and the way comments were collected is unacceptable, the permits should be denied or at least a public meeting should be held.	1	No	Amended Document					No	Closure Non-Substantive			Yes				8/17/2026			
Jocelyn	Salaz	The Rio Grande is dry and we live in a desert. We are in no condition to accept water usage that doesn't provide food and resources for people that also creates heat, noise and pollution. I strongly oppose project Jupiter.	1	No	Amended Document											Yes		8/17/2026			
Michael	Potter	I'm genuinely impressed with how littlewater this data center is going to utilize. I did a lot of installs for the Union at the Facebook data center in Los Lunas New Mexico they projected up to 800 households worth of potable water annually. This project projects 400times less than the Local data centers. I support you setting the golden standard! I am writing to express my supportfor Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,000 project-supported jobs. Furthermore, Project Jupiter has committed $60 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $4.4million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, Michael Potter	Amended Document							Yes		Yes		Yes				8/17/2026			
Julia	Soares	I am writing as a resident of Las Cruces requesting that NMED deny Yucca Growth Infrastructure's air quality permit. Project Jupiter has been allowed to racetc construction with not nearly enough community feedback or oversight. Residents of Doña Ana County like myself fear that we will be left "holding the bag" if this short-sighted project both environmentally and financially. I am particularly concerned about the impacts this project will have on our air quality, which already meets significant improvement. This project will release millions of tons of carbon dioxide pollution. The proposed construction also has no toxic pollution monitoring on the vast majority of the proposed exhaust stacks. Children will be attending school within a mile of this proposed project. I urge NMED to please listen to the real residents of the county (and not the copy-paste submissions purchased by those who will profit from this project) and deny this permit. It is your job to protect New Mexicans. Do not allow this company to further degrade our air quality and raise our temperatures. Do not throw away our air and water on a short-sighted cash grab.	1	No	[redacted]							Yes		Yes				8/17/2026			
Rocío||Lily	Romero	EL AIRE Y EL AGUA. Queremos una junta pública paraescuchar||y que nos expliquen porque el condado paraluchar por todo estos requisitos sin consultar con la comunidad.	2	Yes	Amended Document									Yes	Yes	Yes			8/17/2026			
Vanessa	Spinazola	I am a New Mexico resident and I oppose Project Jupiter and urge you to deny the permit. This project will use far too much water during a drought and contributes to the speed at which it continues unregulated. At the very least, the comment period should be extended 60 days with increased access and assistance to Spanish speakers, like a bilingual public hearing.	1	No	Amended Document					No	Closure Non-Substantive			Yes				8/17/2026			
Linda	Mattox	Project Jupiter turbines / fuel cells for power will give offtoxic emissions, known (methane, carbon dioxide) plus unknown and noise. Increasing surface temperatures, that will make climate change, worse for future generations. 2 States will be effected Texas tax. Texas 45 Pass get rid of Assign due to air pollution years ago. I testified on the requested Air Permit	1	No	Amended Document									Yes			Yes		8/17/2026			
Grace	Cormona-Yong	Please do not build this data center. We are already in a historic drought and we cannot afford to waste this much more water. It would also harm the community around the center. You say it would create jobs but at what cost?	1	No	Amended Document								Yes	Yes	Yes	Yes			8/17/2026			
Bradley	Baker	Please reject, I am concerned that this project doesn't do enough to limit the impacts it will have to our air quality and doesn't have sufficient checks in place to monitor. The amount of damage this will lead to will be unprecedented and completely predictable. Please think of the children, our future, and the planet.	1	No	[redacted]								Yes						8/17/2026			
Elizabeth	Gutierrez	I grew up in New Mexico and attended New Mexico public schools, New Mexico State University and the University of New Mexico law school. I practiced law in Las Cruces and have lived in Doña Ana County for over fifty years. I am extremely concerned about the emissions that will be discharged by Project Jupiter, especially the nitrogen oxides that have caused so many of us, including me, to develop asthma. Please meet your responsibility to protect New Mexico residents from large emissions of pollutants, including your scheduling a public hearing for all issues and evidence to be fully presented. Thank you.	Amended Document									Yes	Yes			Yes		8/17/2026			
Maria	Sotelo||Soto	Yo no quiero permitir porque contamina el medio ambiente. Que nos dejen saber y explicar todo el doña||ya que nos va hacer. Queremos una junta pública||a para todos los ciudadanos porque nos escondan muchas cosas que tenemos el puebo tiene que saber. Queremos agua limpia porque nos quieren dar mas agua sucia que tenemos.	2	Yes	Amended Document									Yes	Yes				8/17/2026			
		Se debe otorgar al público||un plazo adicional de 60 días||para para revisar y comentar sobre el permiso de calidad del aire, a fin de que los miembros de la comunidad puedan participar de manera equitativa. La solicitud del permiso de calidad del aire debe ser rechazada debido al historial de Bloom Energy de tirar desechos peligrosos de forma ilegal. Si el permiso no es rechazado, se deberíacelebrar una audiencia pública||pública en Santa Teresa, tanto en inglés||como en español||, y con la opción||de participar por internet. Aprobar este permiso sería||una injusticia ambiental apoyada por el gobierno, porque la gente del condado de Doña||Ana ya sufre demasiado por la contaminación||ambiental.																		
Annette	Ciapponi	I am a real really concerned human who opposes the Jupiter Project because it uses much more water than its ecosystem can support, with no benefit to anyone but its investors. Please STOP this project now.	1	No	Amended Document					No	Closure Non-Substantive			Yes				8/17/2026			
Archie	Fabian		4	Yes	Amended Document									Yes		Yes		8/17/2026			
Gisela	Barroso	We are living in a time of destruction, one day everyone will notice that the world and the beautiful animals that surround us cease to exists and it'll be all our faults. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Amended Document					No	Support Non-Substantive							8/17/2026	Comments from YGI's attorneys		
Erika	Wilson	The government and related agencies are here to support the environment and people who live here. In NM, that has been blatantly ignored in the name of capitalism and corporate interests and this is a fact blocks to harm every person, animal and plant here in the state. This tends to concentrate in already impacted communities as this is exactly what would happen with this permit in relation to the Doña||Ana county inhabitants. This is environmental racism and it is not subtle. Among a myriad of other reasons, this air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Bloom Energy needs a NEW one now. This is your chance.	Amended Document									Yes	Yes		Yes	Yes		8/17/2026			
Samara	Ware	Us humans can live without it. These data centers will not help humanity as one wants us to believe it will. Taking up any clean drinking water, destroying habitats of native animals, releasing carbon dioxide in the air, isn't helpful. We as humans need to realize that we aren't the only ones on this planet. We aren't the only ones who live here. The animals, plants, insects, no matter how big or small our planet matters. Killing our planet just for the sake our "humanity" isn't good. Our generation and the generations after us need a clean, healthy world to live in. Not a barren wasteland with animals they'll never get to see. We need to live the Earth as it has loved us. We need to protect the land, our animals, and the air. It's not only about Earth, but humans our selves. We are poisoning ourselves with the poor air quality due to data centers already. Yet it will only worsen with these constructions if this data center is built.	1	No	[redacted]							Yes	Yes	Yes								
Vivian	P	I am a resident of Milwaukee, Wisconsin and I am asking that you deny Yucca Growth Infrastructure's air quality permit. Being a resident of a midwest state, we are experiencing climate change first hand every winter, winter are no longer the same, summer are no longer the same, climate change is actively changing everyone lives, and to add 10 million tons of carbon dioxide pollution will make a tremendous change for the worst.	1	No	Amended Document										Yes	Yes			8/17/2026			
Danny	Lopez	I do not support this project. New Mexico is in the midst of one of the most extreme droughts in its history. There is ample evidence that in addition to emitting pollutants, data centers require a tremendous amount of water. This is water that our state does not have. This fact is irrefutable and our leaders and elected officials know this to be true. If this project is allowed to proceed, it is clear that they do not have the best interests of our land and people in mind. I hope they choose to do the right thing and say no to Project Jupiter.	1	No	Amended Document										Yes	Yes			8/17/2026			
Atlas	Kudaz	İlkcredit,indirbulundum ülkemiz,nüya zarar vericek bir projeye karşıyım. Al olmadan da yeşanabilir ama temiz hava ya da ilkcredit,içmek temiz su olmadan yaşanamaz. O yüzden ben bu projeye karşıyım. Bu projeye karşıyım. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña||Ana County are already disproportionately impacted by environmental pollution	Amended Document									Yes						8/17/2026			
Amaryllis	Anonymous	PROJECT JUPITER IS A CLIMATE DISASTER!!! Developers want us to trust that building one of the biggest proposed data centers in the world, wouldn't terrorize the clean waters our communities depend on to survive. Public comments like this will be our only chance to stop it! The public should be given 60days to fully understand the gravity of this situation, AND COMMENT ON IT! The air quality permit NEEDS to be denied considering Bloom Energy's illegal history. If this permit is not denied then should be a public hearing in Santa Theresa in both in English and Spanish with an option to get involved virtually. We as a human race will go extinct due to human caused climate change if we go on with Project Jupiter. We CANNOT let greed destroy us and future generations to come IF THERE ISANY!	1	No	Amended Document								Yes	Yes	Yes		Yes		8/17/2026			
Teresa	Campbell	Project Jupiter must NOT be allowed in Doña||Ana County, or New Mexico! #1 We are the driest in severe persistent drought and do not have the water required to properly support the functioning of a data center. #2 Bloom Energy has a history of dumping hazardous waste. We want to ensure no contamination of soil, air or water occurs, and this is unavoidable with data centers. #3 Resulting air emissions of various chemicals and particulates that would further degrade our air quality which already is often hazardous to people like myself with COPD and the people with asthma like many children who I cared, as a school nurse for, in ANDSERN schools. #4 Excessive noise is unacceptable to both the population and the wild landlivesystem. #5 The promise of jobs has proven to be wildly false, initially a good number but very few permanent jobs. #6 The public needs reliable studies to be publicly shared with the voters who should have a say whatcomes into our region. This project is clouded by history of misleading the public and likely lying intentionally.	1	No	Amended Document								Yes	Yes	Yes		Yes		8/17/2026			
Anonymous	Anonymous	I am writing to ask the New Mexico Environment Department's Air Quality Bureau to deny Yucca Growth Infrastructure's air quality permit application. Project Jupiter is not just one isolated development. It is part of a larger wave of data center projects being proposed across New Mexico. Approving this permit could set a dangerous precedent and make it increasingly difficult for communities to challenge similar projects in the future. They say it is easier to give something than to take it away. Once permits are granted, facilities are built, and pollution becomes part of our daily lives, reversing those decisions becomes extremely difficult. That is why the Air Quality Bureau must act before the damage is done. Our communities should not be forced to bear increased air pollution and environmental risks so private companies can increase their profits. New Mexico residents deserve clean air, meaningful public participation, transparency, and government agencies that put public health and environmental protection ahead of corporate interests. I am deeply concerned that approving this permit will encourage even more large-scale data center developments across New Mexico, placing additional burdens on our air, water, energy resources, and communities. At some point, state agencies must say that enough is enough. Please do not continue sacrificing our communities for private profit. Listen to the people who live here and who will have to live with the long-term consequences of these decisions. I respectfully urge the Air Quality Bureau and the New Mexico Environment Department to deny Yucca Growth Infrastructure's air quality permit application and protect the health, environment, and future of New Mexico communities.	1	No	Amended Document								Yes	Yes	Yes		Yes	Yes		8/17/2026			
Briana	Perez	New Mexico is a very dry state as it is, and generative ai consumes a lot of water that could be used for much better purposes. The Rio Grande is dryingup, with the flow curving close to a complete halt. When I was a child the lakes and rivers were full, but now wherever you go there is droughts and empty lakes. Elephant butte having gone below with just a few week difference having a dramatic decrease in water levels. I believe that we need to redistribute our water. I believe there are other locations that also need water such as our reservations, but that is for you guys to oversee. Please protect our wildlife and our bosque. New Mexico is known for being a desert, but we have a beautiful bosque next to the Rio. Without water it will not look the same as it does now. We have seen time and time again that the communities next to these data centers have bonked water and over all negatively impact them. The air quality will also be dramatically affected, and not for the better as you know. You know this will negatively affect our ecosystem, I am sure you all have been told, but please take it into consideration once more. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña||Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Amended Document								Yes	Yes	Yes		Yes		8/17/2026			
Christopher	Ollison		3	Yes	Amended Document									Yes	Yes	Yes		8/17/2026			
Victoria	Esquibel	I strongly oppose any data center being built in NM, including Project Jupiter. We do not have the water for this.	1	No	Amended Document					Yes							Yes	8/17/2026	Comments from YGI's contractor		
Lisa	Valleroy-Ojeng	I am concerned about the implications for this project. I am worried about the pollution and how this will impact our environment and the wellbeing of our community. I grew up here. Our county deserves better. Please do not go forward with Project Jupiter.	1	No	Amended Document								Yes					8/17/2026			
Bryan	Roman	I am writing to express my supportfor Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,000 project-supported jobs. Furthermore, Project Jupiter has committed $60 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $4.4million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Hi so I'm not very fond about this project for many environmental reasons such it prob wasting what little fresh watter we have left not to mention the extreme heat that can be caused especially with how hot it's been in recent years I grew up here all my life and it def wasn't this hot!!! Sincerely, Bryan Roman	Amended Document									Yes			Yes			8/17/2026			
Elizabeth	Anichini	I strongly oppose the issuance of air quality permits for Project Jupiter. New Mexico is already experiencing the impacts of worsening drought, extreme heat, and a growing water crisis. This project would place an enormous additional burden on our region's limited water resources at a time when every gallon matters for our communities, agriculture, and ecosystems. Industrial development of this scale should not come at the expense of our long-term water security. The projected emissions associated with this project are also deeply concerning. If approved, Project Jupiter would dramatically increase greenhouse gas and air pollutant emissions in New Mexico, undermining efforts to protect public health and address climate change. Our communities deserve better, particularly those that have already borne the impacts of decades of oil and gas development.New Mexico should not be expected to absorb yet another major source of pollution. Equally troubling has been the lack of transparency throughout this process. Decisions with consequences of this magnitude require meaningful public engagement, clear disclosure of impacts, and genuine opportunities for affected communities to participate before permits are issued. That standard has not been met. For too long, New Mexico has been treated as a sacrifice zone where extractive industries profit while local communities bear the environmental, health, and economic costs. We deserve clean air, protected water resources, and an economy that invests in sustainable, community-centered development rather than expanding pollution. I urge the permitting agency to deny these air quality permits and require a full, transparent evaluation of the project's cumulative impacts on air quality, water resources, public health, and environmental justice before any further action is considered.	1	No	[redacted]								Yes	Yes	Yes		Yes		8/17/2026			
Sadie	Zender	many rich residents had their names falsely used in support of this project. making political choices for others is a crime. building structures based on falsified data created by bots is a crime. and finally, how dare you overlook data centers	1	No	Amended Document					Yes					Yes			8/17/2026			

Isaiah	Zemke	On behalf of SMART Sheet Metal Workers Local Union 49, I am writing in support of the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County. SMART Local 49 proudly represents more than 1,000 highly skilled sheet metal workers across New Mexico and West Texas. Our members fabricate, install, test, maintain, and service the HVAC, ventilation, architectural, welding, and mechanical systems that keep commercial buildings, industrial facilities, schools, hospitals, and critical infrastructure operating safely and efficiently. We are committed to creating economic security and career opportunities for our members through world-class apprenticeship training, safe workplaces, and a lifetime of professional development. Projects like Project Jupiter represent exactly the type of investment that creates meaningful opportunities for skilled tradespeople. Large-scale industrial facilities require highly trained sheet metal workers throughout construction and into long-term operations. From advanced HVAC systems and precision fabrication to air handling, ventilation, and mechanical systems, our members possess the skills necessary to build the complex infrastructure that modern facilities demand. Equally important, projects of this size strengthen New Mexico's construction workforce for years to come. They provide contractors with the confidence to hire additional apprentices, expand training programs, invest in new technologies, and create career pathways that allow young people to build successful futures in the skilled trades. These are family-supporting careers that provide competitive wages, strong benefits, retirement security, and opportunities for advancement—allowing New Mexicans to remain in the communities they call home while building the infrastructure that powers our state's future. SMART Local 49 believes that New Mexico should continue investing in the workforce that will build the next generation of infrastructure. As advanced manufacturing, energy projects, technology facilities, and industrial development continue to expand, so too does the need for highly trained craft professionals. Our apprenticeship and continuing education programs are designed to ensure that New Mexico has the skilled workforce necessary to meet those demands while sustaining the highest		2		Yes																				
Michelle	Murray	I shall be moving to Las Cruces New Mexico soon and I don't look forward to air pollution from solid waste fuel cells in addition to diminished availability of water due to Project Jupiter.		1		No																			
Charlie	Parker	Why are you building a data center when we don't have enough water for our communities? Would anyone from this company live next to it? What happens when all the construction jobs are gone? Which billionaires are making money off of this at the environment's and citizens' expense (assuming the pay to play and extreme subsidies as is usual in most other data center construction)?	Mirsted Document	1		No						Yes		Yes		Yes								8/27/2026
Anonymous	Anonymous	I will preface by saying that I am not an expert. But I am know for a fact that I am so tired of hearing how our country is continuously ruining in our environment when it is becoming increasingly clear that climate change is real and happening faster than ever because of our actions. I hear from countless people that we do not it and we must definitely do not want data centers. So why does it continue to shoved down our throats? I want every single person behind this project to think for one second. Place money and power aside and for once, think about the impacts this will have. I'm so scared about our future the world that we will leave behind for generations who didn't ask for these problems. I don't really have much else to say so I will leave the following for you to consider: - The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. - The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. - If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. - Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a "sacrifice zone" by many residents and activists, this means our air quality does not meet federal government rules.	Mirsted Document	1		No						Yes		Yes		Yes								8/27/2026
Chaney	Howe	We are facing catastrophic and irreversible climate change. AI data centers are proven to contribute to this. They poison our air. They suck up all of our water. The Rio Grande is already dry. The only people who will benefit from a data center in Dona Ana county are sociopathic Epstein-class billionaire pedophiles and their wretched accomplices. As a sixteen-year New Mexico resident and former outdoor educator I am vehemently opposed to any and all AI data center construction on our lands. I implore you to deny any permitting for Yucca Growth Infrastructure, LLC for the good of New Mexico, the planet, and the air all humanity.	Mirsted Document	1		No						Yes		Yes				Yes		Yes				8/27/2026
Amber	Reyes	I highly oppose the construction of this data center. New Mexico is already facing a water crisis, the Rio grande is drying up, we're facing higher than average temperatures. A data center would only exponentially increase these issues. For the safety and health of New Mexicans and this state, this cannot be built.	Mirsted Document	1		No						Yes		Yes		Yes								8/27/2026
James	Kanet	To the NMED Air Quality Bureau, Permitting Section: I am a resident and business owner in Doña Ana County. I am submitting this comment to urge the Department to deny YGI's Application and, at minimum, to hold a public hearing in Santa Teresa conducted in both English and Spanish before any further action. The Application is incomplete, rests on unrepresentative data, and appears structured to evade the permitting tier its true emissions require. My specific objections: 1. The emissions estimates are not credible. YGI's VOC and CO factors derive from a single two-day test (December 16 and 17, 2025) of one Wärtsilä 18.7 MW 18-cylinder engine. The Application itself admits that this result is not representative of standard scale, over time, or across cell degradation. CARB's BACT standard for CO from fuel cells is 0.1 lb/MWh ($ basis). Roughly ten times YGI's claimed 0.013 lb/MWh. If the real-world factor is even 40% higher than claimed—0.02 lb/MWh, the facility exceeds the 250 TPY PSD major-source threshold under 20.2.74, 7.A(1)(1) NMAC. The Department should not accept self-generated factors from a single unrepresentative test. 2. Startup and black-start emissions are reported as zero ($ basis), which is not physically possible. Bloom solid-oxide fuel cells require diesel generators for cold start ("black start") and after maintenance. At a rate 189 MW Bloom installations in West Jordan, Utah, black start-managed eight diesel engines projected at 66.3 TPY NOx and 108.9 TPY CO. YGI's facility is ~2.65 MW ($ basis), roughly 28 times larger ($ basis), yet lists zero SUM emissions and provides no construction-duration startup analysis. This alone can push CO past the PSD threshold and must be quantified before the Application is deemed complete. 3. Formaldehyde is claimed at zero using a test method that cannot detect it. YGI relies on a TO-15 canister method, which does not include formaldehyde as a target analyte, and a CARB certification covering only NOx, CO, and VOC. Formaldehyde is the primary cancer risk driver for gas-fired generation and is a listed HAP under EPA AP-42 Section 3.1. YGI also provides no toxic air pollutant (TAP) modeling whatsoever. A "zero" that comes from not testing is not a finding ($ basis). It is a gap, and it undertakes the facility's true health risk. 4. This is a PSD major source and should be permitted as one. Beyond the threshold exceedances above, a fossil-fuel-fired electric generating facility with heat input for this order (roughly 40x the 250 MMBtu/hr trigger) fits the boiler source criteria at the 100 TPY threshold under 20.2.74, 7.A(1)(1) and 20.2.70.300(D)(1) NMAC. YGI's stated 324.65 TPY VOC and 391.21 TPY CO already clear 100 TPY. Permitting as emerging technology or "minor" simply because the regulations predate them is a major source escape PSD and Title V review. 5. YGI improperly holds the data center out of regulation entirely. The Application asserts that because the microgrid supplies the adjacent data center, "the data center ... will not require a permit and will have no regulated emissions sources." The Department should reject this. The developer cannot exempt an entire hyperscale facility from Clean Air Act and AQCA review by attaching it to a power-plant application. 6. The greenhouse gas load is irreconcilable with state policy. At YGI's own figures the facility emits over 91.3 million tons of CO_2 per year ($ basis), more than Albuquerque and Las Cruces combined ($ basis), against New Mexico's goal of cutting statewide emissions 45% below 2005 levels by 2030. With no ambient standard for GHGs in place, the Department should, at minimum, require the Environmental Improvement Board to establish a GHG framework before permitting a source of this magnitude. 7. Cumulative burden and environmental justice. Santa Teresa and Sunland Park already sit in the 80th ($ basis) to 100th percentile on EPA's ozone ($ index, border air ozone nonattainment area, and have endured a precautionary drinking water crisis for years. YGI's Local Info from this facility are ozone precursors that will reach in the region's intense sun and heat. Adding a major pollution source to an already overburdened, ~66% Hispanic community is exactly the disproportionate impact the AQCA, [NMSA 1978 ($ basis) 74-2-5.1(H)], and Title VI direct the Department to prevent. 8. The public-involvement record is being silenced. NMED's Public Involvement Plan states there is "no history of public involvement" because "the YGI Microgrid is a new facility." That is inaccurate. YGI is the	Mirsted Document	2		No						Yes		Yes		Yes								8/27/2026
Elisa	McGovern	There is simply not enough water (even for a supposed closed system) in NM, never mind in Doña Ana County. Do you want a surveillance center or green cloth? Do you want pollution or clean air? It shall not enough for you down there or did you want extra heat from a massive computer system? The people MAD to talk this up are idiots. They don't care about New Mexico or its people, they just take a paycheck to sell us a shoot. This is not a boon for NM. It's a curse. Do the right thing, and stop this before it kills us all.	Mirsted Document	1		No						Yes		Yes		Yes		Yes						8/27/2026
Glen	Thamert	New Mexico and ALL its People need WATER - Not Lies. Residents everywhere in New Mexico - esp. in southern NM - are vulnerable NOW !!! The Rio Grande has little water ... Hatch Chile & Pecans NEED WATER !	Mirsted Document	2		Yes						Yes		Yes										8/27/2026
Cameron	Maughan	I believe this permit should be denied. From the beginning of this process, the public has largely been left out. It was rushed through the county commission without proper due diligence and the process has been shrouded in secrecy. This was by design. Data brokers from data centers are hugely unpopular and damaging to their surrounding environment. More oversight and review needs to take place before any permits are given. I hope the state makes the right choice and denies this permit request.	Mirsted Document	1		No						Yes												8/27/2026
Irene	Rodriguez	"Yo Basta" con todo este de Jupiter. Por ridículo, nuestra agua está acabada; they mat, no pienses en el dinero, piensa en el futuro de nuestros hijos. Ya Basta! No Jupiter Data: "Agregar 40 días a la publicación de mi solicitud y a mi comentario para solicitud de permiso de calidad de aire. Se debe otorgar al público más un plazo adicional de 45 días a la que se pueda participar de manera equitativa. La solicitud del permiso de calidad del aire debe ser rechazada debido al historial de Bloom Energy de tirar desechos peligrosos de forma ilegal. Si el permiso no es rechazado, se debe hacer una audiencia pública pública en Santa Teresa, tanto en inglés como en español, y con la opción a votar de participar por internet. Aprobar este permiso sería aceptar racismo ambiental apoyado por el gobierno, porque la gente del condado de Doña Ana ya sufre demasiado por la contaminación atmosférica ambiental.	Mirsted Document	2		Yes						No	Oppose Non-Substantive			Yes								8/27/2026
Rebekah	Pose	I would like to strongly express my concerns about the proposed Project Jupiter data center. I am a member of Doña Ana County, and I am appalled by the propaganda that has circulated throughout the State. No slogan or protest will ever portray the severity of the environmental crisis the United States is currently experiencing at the hands of unaffiliated corporate entities, profiting from the cruelty industry. The corruption of this project is consistently proven by the vague ads and hi-roll footage of a field and water. This has nothing to do with the energy and water consumption this project will cost. This is more than a lifelong struggle against the corrupt bribery of public officials to serve personal interests rather than those of the current population and their future generations. What Yucca does not want is the same corporations that promote this project are the ones that facilitate echo chambers of false information, platforms tied to the same ground as decades of research performed by educated scientists. These corporations depend on their preconceived notions of Doña Ana County, that wasting dollar bills in the faces of people they believe have no dignity will turn the other way and give into the predatory nature of investing a massively scaled data center in the name of our best interest in economic development. There are no guarantees in these job projections, and it shows a real lack of care towards the citizens and the community to lie only to push this incredibly harmful agenda. Please hear the cries of our Earth; our world and ecosystem exist beyond the confines of city, county, state, and country lines. This proposed project will cause detrimental harm to everything and everyone regardless of geographic location. The beings on our planet do not deserve this scale of preventable destruction. Sincerely, Rebekah Pose	Mirsted Document	1		No						No	Oppose Non-Substantive	Yes										8/27/2026
Raul	Hernandez	I am concerned about the potential effects this projects could have on the health of residents and on the value of our homes. Clean air is essential for our families, especially for children, older adults, and those who with chronic conditions. I ask that the New Mexico Environmental Department carefully evaluate the impact of their decisions. The residents deserve transparency and a voice. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirsted Document	2		Yes						Yes		Yes										8/27/2026
Alison	Haddad	I vehemently oppose project Jupiter as it places an enormous burden on our limited natural resources. Moreover, I have significant concerns, not only about water consumption and quantity, but also about environmental and noise pollution. The lack of transparency on the impact of this data center and empty promises of their canvassing and social media propaganda leave the people of Doña Ana county at great risk. The local community will bear the long-term consequences, while the economic gains will not be reinvested back in the community. We are the land of enchantment and I plead with you to keep it that way for future generations.	Mirsted Document	1		No						Yes		Yes				Yes		Yes				8/27/2026
Grace	Abler	I do not support Project Jupiter on the grounds that the project will be extremely detrimentally to the community members of New Mexico. This data center will massively increase the level of pollutants that are put into the air, ensuring that Project Jupiter will have negative health impacts on residents of Santa Teresa and surrounding areas. The health and safety of our neighbors should always be afforded a number one priority. Beyond the air quality degradation that this project is sure to produce, it will also use a huge amount of water in a state where that precious resource is already so scare. The Rio Grande is dry in so many places throughout our state, moving forward with the project is entirely irresponsible and would be a devastating mismanagement of resources. I strongly urge NMED to deny this permit or a larger effort to halt Project Jupiter from being built.	Mirsted Document	1		No						Yes		Yes		Yes				Yes				8/27/2026
Christopher	Bilicek	The data shows that conversion to fuel cell technology is Not enough to reduce emissions to an acceptable standard. Given that emissions by this project alone would be near all that NM produces annually, you must not approve this permit. This project stands against the very ethos of New Mexico and environmental stewardship and poses a very real threat to the wellbeing of Doña Ana County residents.	Mirsted Document	1		No						Yes		Yes										8/27/2026
Karen	Montoya					Yes						Yes				Yes								8/27/2026
Ryan	Snider	The operation of the data center will raise the temperature in the general area by ten degrees Fahrenheit. Do you want to allow that?		1		No						No	Blank											8/27/2026
Kelley	Fetter	To Whom It May Concern: Working in environmental compliance provides a unique perspective on how large projects are planned, permitted, and built responsibly. At EDPC, our team works with developers, engineers, contractors, and regulatory agencies throughout New Mexico to help projects meet environmental requirements while protecting natural resources and supporting responsible development. From that perspective, I am writing in support of the air quality permit application for the Bloom Energy fuel cells that will power Project Jupiter in Doña Ana County. Successful infrastructure projects begin with thoughtful planning. Based on the information that has been made available, Project Jupiter has incorporated advanced technologies and infrastructure strategies intended to support reliable operations while minimizing impacts on public systems. The proposed Bloom Energy fuel cells are a key part of that approach, providing dependable on-site power generation that allows the facility to operate independently of the regional electric grid. Projects that invest in resilient infrastructure from the outset are often better positioned to operate efficiently over the long term. Reliable on-site energy generation supports operational continuity while reducing reliance on existing grid infrastructure, reflecting the type of comprehensive planning that is increasingly important for large industrial and technology facilities. From our experience supporting projects across New Mexico, responsible development also means creating lasting benefits for communities. Investments of this scale support engineers, environmental professionals, contractors, skilled trades, and numerous local businesses that contribute throughout the planning, construction, and operational life of a project. When projects are developed with careful planning and commitment to compliance, those benefits can extend well beyond the project site. Project Jupiter represents an opportunity to demonstrate how advanced infrastructure and responsible environmental planning can work together to support economic growth. For these reasons, I respectfully urge 2 the Department to approve the air quality permit application for the Bloom Energy fuel cells supporting Project Jupiter.	Mirsted Document	2		No						No	Oppose Non-Substantive											8/27/2026
Alex	Yonkovig	I have a hard time expressing enough vehement disapproval of Project Jupiter and its presence in the borderlands - morally, environmentally, and based on evidence, science, and research. There is a reason that scientists, environmentalists, and land stewards are pushing back on this project's continued expansion, and I am hopeful that these public comments will show how disastrous the community believes this project to be. New Mexico is a state that has sought to govern and protects its land from predators - I hope it continues to do so with the rejection of this permit, and listens to the voices of those who are sending a	Mirsted Document	1		No						Yes		Yes		Yes		Yes						8/27/2026
Jaclyn	Apodaca	To Whom It May Concern, Project Jupiter will harm residents of Doña Ana County and will have widespread consequences for the entire state of New Mexico. During a historic drought, the fact that this project is even being considered is a slap in the face to New Mexicans. Oracle and OpenAI have spent big money trying to rebrand and greenwash this project, by saying potable water will only be used for office/admin needs, and that Project Jupiter will use non-potable water. New Mexicans are not dumb. We know that non-potable water is essential to our communities continuing to live and thrive like it is the way we grow crops, nourish our flora, and support our wildlife. We also know that water is not the only way to cool data centers (which it is simply the least expensive for the operation (but the most expensive for the most affected residents/us). In reality, Project Jupiter's water usage is estimated to be nearly one million gallons per day. New Mexicans understand that agua es vida and this is a price we simply cannot afford to pay. Aside from water usage, the effects of data centers are largely negative for surrounding communities: The energy demands the site will require will further strain on our powergrids, thus decreasing stability and increasing prices for New Mexicans. The generators and cooling units create a constant buzz (louder than 85 decibels) for surrounding communities thus creating inescapable noise pollution. The 24/7 security lighting creates constant and disruptive light pollution for surrounding residents, wildlife and our skies. The job creation that is touted is grossly overstated, with permanent operational job opportunities increasing by only 29-50 local jobs per city. Not to mention that only 20% of construction workers currently working on the project are New Mexicans. Furthermore, with the amount of harm this project does to the community and state, Oracle and OpenAI should be injecting billions of dollars into the community. Instead, local leaders have agreed to let these trillion dollar companies off with ~$600M worth of targeted local reinvestment strategies. And what is the benefit to New Mexicans? Studies show that the recent increase in construction of data centers is not even to support generative AI, email, social media and other digital activities, but to accommodate the surge in of government/Department of Homeland Security surveillance! Why are New Mexicans subsidizing the industrial data core for billionaires and tribunicians? This project is for the benefit of few at the cost of many. We cannot drink data. We cannot water our crops with data. We cannot nurture our wildlife with data. We cannot sacrifice the health and well-being of our most vulnerable communities to subsidize data collection and wealth accumulation of the world's oligarchs.	Mirsted Document	4		Yes						No	Oppose Non-Substantive			Yes								8/27/2026
Mary	Nimtow	The New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations," and the NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." I believe an additional 45 days should be granted for review and comment of the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing should be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of color in Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a "sacrifice zone" by many residents and activists, this means our air quality does not meet federal government rules.	Mirsted Document	1		No						Yes		Yes		Yes		Yes		Yes				8/27/2026

Maya	Paul	Dear New Mexico Environment Department, My name is Maya Paul, and I live in Santa Fe, New Mexico. I am writing to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the proposed 100 Microgrid in Doña Ana County. As someone who believes that public institutions exist to safeguard the long-term health of our communities, I am deeply concerned that this project asks New Mexicans to assume substantial environmental and public health risks in exchange for uncertain private benefits. Decisions of this magnitude should be guided by whether they advance the broader public interest and the mission of the Environment Department to protect present and future generations. Changing the project's name and replacing one technology with another does not change the underlying reality. The proposed facility would still emit enormous quantities of greenhouse gases while introducing fuel cell technology at a scale that has never been demonstrated in practice. I am also troubled by the project's environmental justice implications. Communities near Santa Teresa, including schools, childcare facilities, and Tribal communities with ties to the surrounding lands, deserve meaningful participation in decisions that could affect their air quality and long-term health. New Mexico has made important progress toward addressing climate change, and approving a project capable of producing millions of tons of greenhouse gas emissions each year would undermine those efforts. We should not sacrifice decades of environmental progress for a project whose claimed benefits remain uncertain while its environmental costs are substantial. As someone who has experienced firsthand how environmental and public health issues can profoundly shape quality of life, I believe we have an obligation to apply the precautionary principle when the potential consequences are so significant. Once pollution is released and infrastructure of this scale is built, the impacts cannot simply be undone. Responsible governance requires looking beyond short-term economic promises and considering the lasting effects on the people who will live with these decisions for generations. For these reasons, I urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application. If the Department does not reject the application, I ask that it provide at least 60 additional days for public review and hold a bilingual, hybrid public hearing in or near Santa Teresa so that affected residents have a meaningful opportunity to participate in this process. Thank you for your consideration and for your commitment to protecting New Mexico's environment and public health.		1		No	[redacted]													
Marcela	Fourzan	To the New Mexico Environmental Department: I am writing to express my support for the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for Project Jupiter. Southern New Mexico has worked hard to attract transformational investment, and I believe projects like this represent an opportunity to strengthen our economy while creating meaningful careers for local residents. Major investments do much more than create jobs at a single facility. They generate opportunities for contractors, suppliers, restaurants, retailers, and countless other small businesses that support a growing regional economy. I appreciate the thoughtful work that has gone into this project and respectfully ask the Board to approve the requested air quality permits. Sincerely, Marcela Fourzan marcela@station-house.com		2		Yes	[redacted]	Yes	Yes		Yes		Yes								
Juliette	Constanto	We should not be using our community water that all families depend on for our bodies and the natural world. These companies cannot be set here because those who live here understand and see in the river as of June 2026 that we have no water to give. Do not let them take our children's water. -Juliette	[redacted] Document	1		No		Yes	Yes	Yes								8/27/2026
Richard	Aguilar	Members of the Environmental Improvement Board: On behalf of the Las Cruces Hispanic Chamber of Commerce, I am writing to express our enthusiastic support for Project Jupiter and to respectfully urge the New Mexico Environment Department (NMED) to approve its pending air quality permit. As an organization dedicated to promoting business development, job creation, and economic prosperity in our community, we recognize Project Jupiter as a transformative, once-in-a-generation opportunity that will bring billions of dollars in private capital investment to our region. For the Hispanic Chamber and our members, this project represents a potential driver for local economic equity. It will create thousands of good-paying, union-affiliated construction jobs along with dozens of highly skilled, permanent operational positions upon completion of the campus. Project Jupiter's commitment to partnering with local universities and trade schools for workforce training also ensures that our diverse local workforce is prepared to succeed in the clean energy economy. Beyond employment, the project will significantly expand our local tax base, generating vital revenue to help fund essential public services that our families rely on, including local schools, infrastructure upgrades, and emergency services. We are also encouraged by Project Jupiter's commitment to environmental stewardship, including its switch to using hydrogen fuel cells instead of natural gas to power the campus while protecting the air quality in our community. Project Jupiter is also designed with advanced water-recycling technologies to minimize its overall water consumption. This responsible approach ensures that we can foster a robust clean energy economy without placing an unsustainable burden on our shared water supply. Project Jupiter is the future of sustainable economic mobility for Southern New Mexico. We strongly encourage NMED to approve the air quality permit and support this vital		1		Yes		Yes												
Isabel	Dorbin	To whom it may concern, I am a resident of New Mexico and I am extremely concerned about the impacts that allowing this permit would have for our entire state. We do not have enough water as is, adding a facility that requires vast amounts of water will hurt our futures by not providing water for our crops and for the wildlife. Additionally, the strain on our power grid will impact everyone across the state. This data center is could drive up prices of electricity and use our water for what gain? To produce some AI cat video? I do not believe this benefits New Mexicans and that is very clear from the beginning of how this LLC has treated our Indigenous people by using Acoma for the name, which thankfully they have now changed. Additionally, there have been reports that names of New Mexicans are being used to support the data center, who NEVER supported it. This raises serious concerns about their practices and how they treat both our citizens and how they will treat our land. I was born in New Mexico and I intend to die here along with the other countless generations of my family who have been blessed to do the same. However, I will not be able to do that if the land and are polluted. Please do not allow this development to happen for my sake and for the sake of our children. -Isabel	[redacted] Document	1		No		Yes	Yes	Yes	Yes									
Robert	Worford	I urge you to deny the air quality permit application for Yucca Growth Infrastructure. I am a retired teacher, have lived in Las Cruces all my life, and believe that our environment here needs to be protected. So I bought solar panels 17 years ago to reduce my individual carbon footprint, and the planned data center's emissions would dwarf the CO2 emissions of the residents of the county. I think the process needs to be slowed down so that the residents of Doña Ana County have the opportunity to have their many questions answered. What pollution controls are in place? How did the developers arrive at the numbers on their permit? there has been no plant close to this size? What are the safeguards for our health and our children's health if these estimates are incorrect? The emissions estimates of the plan as have been submitted are already unacceptable. There is too much at stake in the uncertainty of the reality of the project. Let's do this right. Let's build the initial infrastructure from renewable energy resources like solar and wind, and then phase in the data center. In social media I have seen a great deal of money spent in support of Project Jupiter. I hope that you will listen to more than the money. A friend's daughter and former student of mine sent me the link to make this entry and included this in her letter which I would like to quote directly: "The mission statement of your department says that your mission is to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations. How are you sure that this will ensure a healthy and prosperous New Mexico for future generations? You cite four tenets to uphold this mission: Science: "Using the best available science to inform our decision-making in protecting public health and the environment." What rigorous, independent science has gone into the claims of this permit? Innovation: "Employing creative engineering and technological solutions to address environmental challenges." If Project Jupiter claims that its new permit reduces the carbon emissions by 67% and NOx emissions by 97 % as they claim, why can't a $3.6dn Bitcoin project fund a completely carbon neutral energy solution? Collaboration: "Engaging communities and interested stakeholders in environmental decision-making outcomes." How many letters have you received showing that the vast majority of the community does not want this project? How many letters that were not paid for by Project Jupiter have been submitted in support of this project? Compliance: "Ensuring meaningful compliance with state regulations and permits; leveling the playing field through enforcement." What assurances does the community have that this project will meet state regulations? What plans is in place if it doesn't? Reject this permit."	[redacted] Document	1		No		Yes	Yes	Yes	Yes									
Tyler	Evans	Project Jupiter is a terrible plan that will decimate the community and the state that I love. The water allocation will increase and the taxpaying citizens will be left to foot the bill. Citizens do NOT want data centers in their backyard to have their water poisoned, their air polluted, and their electricity bills raised to accommodate a billionaire who just can never have enough. The average American sees through the whole charade at this point. We know the governments trying to build a total surveillance state similar to China. Large-scale data centers like this one are a major stepping stone to that end goal. We will not allow it.	[redacted] Document	1		No		Yes	Yes	Yes										
Joe	Remuzie	People are fed up with this nonsense. You should truly nip this in the bud before people start to take matters into their own hands. I would urge the elected officials to heed the warning of their constituents. It has spread far and wide. We are awake. I don't feel that Project Jupiter should move forward. The energy consumption of these data centers will negatively impact the residents of our region. I also feel that they are not being honest and forthcoming regarding the water consumption needed for the long term of a facility like this.	[redacted] Document	1		No		Yes			Yes									
Geo	P	I am very against this data center please do not allow it. It will use water we don't have and significantly reduce the air quality and increase emissions astronomically! I am not okay with this at all.	[redacted] Document	1		No		Yes		Yes									
Rodolfo	Bajios	As a fellow community member, I would like to emphasize the importance of preserving our natural resources. Water quality and air quality. We live in an arid , sand and dust laden environment. We don't need additional pollutants, adding to our daily struggles . We as a community should strive to go more of a greener fuels. I oppose any sort of data center, and or its use of fossil and non regenerative fuel sources. Need to work on cleaning up carbon, not reducing more to the environment.	[redacted] Document	1		No		Yes	Yes											
Daniel	Lones	Further destruction of our natural resources and infrastructure, with little proven benefit to our state, country, or culture. We are a water starved state that will feel the brunt of climate change in a very short amount of time. Focusing on sprawling data centers vs billionaires can get richer is one of the biggest gifts of our time.	[redacted] Document	1		No		Yes	Yes	Yes									
Benjamin	Ramos	As a resident of Albuquerque I am asking you to deny any and all permits associated with Project Jupiter or any other data center proposed. These projects are extremely harmful and will bring no benefits to the community while driving up residents energy costs, polluting our air with millions of tons of CO2 and toxic emissions and wasting our already limited water. We are already seeing unprecedented heatwaves due to greenhouse gasses and the last thing we should allow is a project as wasteful and polluting as this. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	[redacted] Document	1		No		Yes												
Susan	Lewis	[redacted] Document	1		No		Yes	Yes	Yes				Yes	Yes					
Buzz	Davis	[redacted] Document	1		No		Yes												
Laura	Shank	[redacted] Document	1		No					Yes	Yes								
Agustin#237; n	Montoya	[redacted] Document	1		No		Yes												
Tim	Buxton	Please, do not move forward with this project. Surely the clean air and drinking water that your grandchildren need is far more crucial than another tech stream an project "bringing temporary jobs" that will [redacted] Document	1		No		Yes	Yes											
Alennie	Roldan	I am a Student Doctor and Resident of Dona Ana county and I am asking that you deny Yucca Growth Infrastructure's air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. The other toxic air pollutants are extremely dangerous and each, many of them are very low levels. Many of these pollutants can cause irreversible health damage, including and not limited to: childhood asthma, multiorgan damage to the liver, kidney, and brain, as well as increased risk of cancers such as leukemia and lymphomas. Dona Ana currently faces a critical shortage of healthcare professionals and does not have the adequate infrastructure to support the hundreds if not thousands of new Mexicans whose health will be impacted by the development of Project Jupiter for generations to come. In order to protect the health and well being of current and future New Mexicans, it is imperative that you deny this air permit or hold a public hearing in-person in Santa Teresa with a component for virtual participation. Monies and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	[redacted] Document	1		No		Yes	Yes		Yes									
Sarah	Hoglund	I oppose Project Jupiter to the fullest extent. This data center will devastate our land, water and communities. The Rio Grande is already dry in Albuquerque. The waters will be poisoned and depleted in Doña Ana and Otero. The profit to the short term gains in comparison to the long term destruction of life itself, including you and anyone trying to push this project forward. Your children and grandchildren children will suffer along with the rest of ours. Please do not go forward with project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	[redacted] Document	1		No		Yes	Yes	Yes				Yes	Yes					
Jorge	Soto	Members of the Board: Please accept this comment in support of Project Jupiter. New Mexico has all the ingredients necessary to compete for advanced industries—our workforce, our energy resources, our location, and our entrepreneurial spirit. Projects like Project Jupiter help demonstrate that our state is prepared to welcome new investment while maintaining high environmental standards. I believe this project will provide meaningful opportunities for workers, local businesses, and future generations of New Mexicans.	[redacted] Document	1		Yes														
Margarita	Ortega y Gortez	Project Jupiter is a multilmeal threat to our community's water, air, and land. Data centers in many communities present major noise and light pollution issues and degrade air quality at levels that are unprecedented. Here in NM, we already are experiencing a critical level of drought (just head out to the Rio Grande) that indicates how inappropriate it is to host an extractive operation such as Project Jupiter. It's clear that the mega corporations making this deal do not have a true interest in considering the wellbeing of our community, or they'd cease this project immediately. It's clear that the research doesn't substantiate this type of project and this is a rush job to extract as much energy as possible for a quick buck before the climate totally collapses for us in NM. Please stop this from moving forward- for the best interest of our community.	[redacted] Document	1		No	No	Oasoce Non-Substitutive			Yes									
Klarissa	Albrecht	I DO NOT SUPPORT PROJECT JUPITER. New Mexico does not need a massive data center using our precious water and polluting our lands. It is yet another instance of environmental racism, Doña Ana county being primarily inhabited by non-white individuals. The project's claim that they will use "non-potable" water is merely a distracting phrase. Water is water. It's a precious resource that New Mexico can't afford to squander on a data center. We do not need more of these centers. The U.S. already has more than anywhere else in the world, and they are almost always built against the wishes of the community of everyday people they inhabit. The promise of jobs benefiting the community is a farce- at best a gross exaggeration. The majority of jobs created are not the blue-collar jobs the community would benefit from. NO DATA CENTERS IN DOÑA ANA COUNTY OR ANYWHERE ELSE IN NEW MEXICO.	[redacted] Document	1		No		Yes	Yes		Yes									
Sebastian	Ortega	Dear Chair and Members of the NMED: I respectfully support the air quality permit applications for Project Jupiter. Economic development is about more than today's jobs. It is about creating opportunities for young people to remain in New Mexico, helping small businesses grow, and strengthening communities for decades to come. Investments of this size have ripple effects that benefit suppliers, service providers, contractors, and families throughout the region. I appreciate your consideration and encourage approval of the permits. Sebastian Ortega sbo@flc.net	[redacted] Document	2		Yes			Yes		Yes									

Brian	Bea	I'm writing to share my support for Project Jupiter and what it could mean for our community. This project brings a real chance for economic growth in Dona Ana County. It's expected to create 4,000 construction jobs and 1,500 ongoing jobs a big deal for local families and businesses. On top of that, Project Jupiter is putting real money into the community: $50 million to repair and upgrade our local water systems, $360 million going directly to schools, infrastructure, and local services, and $6.9 million toward workforce development, the Boys and Girls Club of Las Cruces, clean drinking water, our community college, and habitat restoration. Opportunities like this don't come around often, and I think it'll make a real difference for Dona Ana County for years to come. I hope the New Mexico Environment Department will approve this project. Sincerely, Brian Bea	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Irene	Carbajal	I believe that eventually you still have a lot of energy going out as an output that I am against the project but you also need to describe the sciences to determine where exactly you're using your fuel cells what's being produced what's being taken out if it is non-potable water or potable water that we use but in New Mexico we do appreciate the lack of water in certain areas.	1	Merged Document	No				Yes				Yes				8/17/2026
Jade	Waskow	Hello, My name is Jade Waskow. I am a life long resident of New Mexico and I am writing because I am deeply worried about the irrevocable harm to the air, land, water, and health of the communities that will be caused by Project Jupiter. Because of this I am urging the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning to me because: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. It is essential that we protect the scarce resources that we have in this state not just for ourselves but for future generations. We need investments in our communities with partners interested in sustainable growth that benefits the people who already live here. Not ones looking to quickly extract wealth regardless of who it hurts or the damage that it causes. Please stand with the communities who will be most impacted for generations by rejecting YUCCA Yucca Growth Infrastructure, LLC's air permit application and hold a hearing for the surrounding communities so they can have all of the information and truly inform the podcast. Thank you!	1	Merged Document	No				Yes	Yes	Yes		Yes				8/17/2026
Cd	Meier	Per the mission statement of the NMED and Air Quality Bureau to protect our environment and the public health, I ask that the Project Jupiter permits be denied altogether. If nothing else, I ask that at minimum you give the public additional time to review and comment on the air quality permit. Given the past actions of those behind Project Jupiter, I am opposed to approval of the permit. These companies have not been transparent and have provided misinformation and disinformation to the public about this project. Name changes, illegal dumping, switches in the plans, no planning for pollution controls - how can you trust anything you are being told? The claims to offer jobs and money to the community (bribes) are temporary and short-sighted. Those who have given the go-ahead to this project did so without sufficient community input, in closed meetings (illegal) and had no right to do so. Other communities across the nation have not benefited from data centers, in fact the opposite has occurred, from increased noise, air and water pollution to increased expenses for community members. This doesn't even address the damage to the environment - the plants and animals being displaced and permanently harmed by the construction of these centers. The supposed benefits of the data centers are miniscule compared to the costs and irreversible damage that will be borne by the surrounding communities and environment. This is unacceptable. Building this data center would be a monumental mistake, and I again ask that the permits be DENIED. This entire project must be scrapped. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Thank you for your consideration.	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes	Yes		8/17/2026
Kyle	Reese	I would like to go outside and be able to breathe without a gas mask in 100 degrees hot summers of New Mexico. I think it would of the best interest to not put up the ai center where a lot of capital is spent for young adults to get education degrees. It will make them seek other colleges and a loss of potential profit for the state.	1	Merged Document	No						Yes						8/17/2026
Jen	DePaolo	I am writing to oppose the Jupiter project data center in New Mexico. Water is life, and New Mexico's Aquifer and watershed are already over taxed, depleted, and poorly managed. We need to conserve and steward our water for basic needs for all who live here and depend on it. We also need to conserve energy and better steward land use here in the land of enchantment. For this and other reasons I oppose the construction of a Data center here. Thank you for your time.	1	Merged Document	No				Yes								8/17/2026
German	Saenz	To the Board: Re: Yucca Growth Infrastructure Air Quality Permit Project Jupiter represents the type of investment that can help diversify New Mexico's economy while creating opportunities for skilled workers across many different industries. As our state continues attracting advanced technology projects, we should continue supporting responsible development that creates careers, expands local tax bases, and encourages additional investment in surrounding communities. I believe Project Jupiter can accomplish those goals, and I respectfully support approval of the requested permits	1	Merged Document	Yes		No	Oppose Non-Substantive		Yes							8/17/2026
Juan	Pablo	New Mexico Environment Board Members: I wanted to take a moment to express my support for Project Jupiter. Southern New Mexico has tremendous potential, and projects like this help unlock new opportunities for businesses and families alike. From construction and engineering to local suppliers and service providers, the economic benefits of a major investment extend far beyond the project itself. I believe this project can help strengthen the region for years to come and respectfully ask that you approve the air quality permit applications. Juan Pablo	2	Merged Document	Yes					Yes	Yes						8/17/2026
Bethany	Hillson	Project Jupiter is a multilevel threat to our community's water, air, and land. Data centers in many communities present major noise and light pollution issues and degrade air quality at levels that are unprecedented. Here in NM, we already are experiencing a critical level of drought (just head out to the Rio Grande) that indicates how inappropriate it is to host an extractive operation such as Project Jupiter. It's clear that the mega corporations making this deal go thru have no interest in considering the wellbeing of our community, or they'd cease this project immediately. Paul	Kinzelman	I am very concerned about the use of water by the proposed data center. I do not think this concern has been adequately addressed yet. Please delay the data center until it has been addressed.	1	Merged Document	No				Yes								8/17/2026
Mayela	Ramirez	There needs to be more communication with the citizens of New Mexico about this project.	1	Merged Document	No		No	Non-Substantive									8/17/2026
Daniel	Garcia	AI data centers are a horrible drain on environmental resources- using ridiculous amounts of water and producing pollution like crazy. Having these despicable monstrosities in a location as fragile as the desert ecosystem is madness! Look past momentary enrichment and greed to the sustainable future that doesn't involve destroying the beautiful NM desert. As a native of Las Cruces who has lived in the PNW for decades the wide open spaces and natural beauty of southern NM is totally unique. Don't ruin your way of life for some ridiculous tech trend - don't sell your soul for shiny new buildings - realize how special your place in the world is and protect it. D Garcia	1	Merged Document	No				Yes		Yes						8/17/2026
Steven	Branoff		3	Merged Document	Yes		Yes									Yes	8/17/2026
Rene	Macias	Dear Members of the Board: I support Project Jupiter because I believe New Mexico should continue attracting companies willing to make long-term investments in our communities. Responsible projects create opportunities for local workers, encourage workforce training, and provide confidence for other businesses considering investment in our state. I appreciate the work that has gone into this project and respectfully support approval of the requested air quality permits. Thank you for your consideration	1	Merged Document	Yes					Yes							8/17/2026
Myra	Lang	The air quality construction permit must be denied. Our desert — including our air! — exists in a delicate balance already impacted by climate change. To force an AI data center, and all its grievous impacts, on a community tgat does not want it is a grave dereliction of duty. The one thing existing data centers in multiple states have in common are the gross, "unforeseen" impacts on the environment of the nearby communities. Southern New Mexico *already* seeing climate-related impacts on our air quality. Please do not hasten the demise of this vibrant community. The permit must be denied.	1	Merged Document	No					Yes	Yes						8/17/2026
beth	gutelius	I urge the NMED to REJECT this application as it endangers New Mexico's air and water resources. The permit would allow greenhouse emissions that top those of NM's largest cities combined: 13 million tons of greenhouse gas emissions annually. That is an unacceptable risk to our communities.	1	Merged Document	No				Yes	Yes							8/17/2026
will	mitas	Lining pockets while the planet burns to a crisp seems to be the way of the world right now. Its really sad to think that new mexico would join suit. This data center is not going to help communities, like they claim. It'll help a couple individuals in the pursuit to further leech money from the masses. I find it quite telling, reading thru all the comments being submitted here, that those in favor of this farce are copy/pasting a prewritten, generic response while those opposed are giving heartfelt, earnest, original opinions as to why this data center is a terrible idea. Those who can think and articulate, vs those who cannot do more than parrot. And who can say if those parroted responses are even coming from actual human beings. Maybe its just bots mass submitting to water down the actual popular sentiment. This data center is a terrible idea in the desert and everyone knows it. Who needs all of this data anyways and what is it being used for? Please think about our futures on this planet. Sincerely, Will mitas	1	Merged Document	No				Yes		Yes						8/17/2026
Andrés	Corral	To the New Mexico Environment Department: Thank you for the opportunity to submit this comment. Project Jupiter has the potential to become one of the most significant economic development projects in Southern New Mexico. Investments of this magnitude create opportunities for skilled trades, engineers, transportation companies, local vendors, restaurants, hotels, and numerous small businesses that support a growing economy. Those benefits can be felt well beyond the project site and continue for many years. I respectfully support approval of the air quality permit applications. Andres Corral R.	2	Merged Document	Yes					Yes	Yes						8/17/2026
Javier	Olivas	I heard about this program before but I was not really informed untill now. I think its good that it uses less water I just want to know whats going to happen with the rio grand.	1	Merged Document	No				Yes								8/17/2026
John	Rawlings	Please deny this application... it is clearly a threat to our environment and our way of life. Our people deserve to live in a place where they wont become sick from the bad air and water that the data center and the microgrids will bring. The people who live here deserve better transparency from the people in charge about these companies and their relationships to them. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes		8/17/2026
Danielle	Beacham	The Yucca Growth Infrastructure, LLC should NOT be approved for an air quality permitting action for the YGI Microgrid without clear and substantial impact research conducted on both the water and environmental pollutants. Project Jupiter and the Yucca Growth Infrastructure LLC have been operating in ways that keeps the public in the dark and not at the forefront of the decisions being made. Moratoriums on all Data Center projects NOW!	1	Merged Document	No				Yes	Yes	Yes						8/17/2026
Patrick	Caulfield	The lack of transparency and possible impacts on the community tells me this is no good except for the developer (Oracle). I do not understand how the Dona Ana County Commissioners stepped up on this with public hearing and complete disclosure of the terms on the agreement.	1	Merged Document	No						Yes				Yes		8/17/2026
Consuelo	Salazar	Good idea, should also consider making other source of transportation to and from desolate counties such as Guadalupe county. Many people struggle travel between Santa Rosa due to lack of transportation and resources. Sincerely,	1	Merged Document	No		No	Non-Substantive									8/17/2026
Leslie	FloresFlores FloresFlores Flores	Dear Environment Department Board Members, I respectfully submit this comment in support of the air quality permit applications for Project Jupiter. New Mexico has a unique opportunity to become a leader in advanced technology and digital infrastructure. Projects like this create high-quality jobs while also supporting countless businesses that provide materials, equipment, transportation, engineering, and professional services. I believe this investment will have lasting benefits for Southern New Mexico and respectfully encourage approval of the requested permits. Thank you	1	Merged Document	Yes					Yes	Yes						8/17/2026
Paul	Stokes	Until data centers, including this one, show that they do not use significant amounts of water, and they are powered by renewable energy, they should not receive permits.	1	Merged Document	No				Yes								8/17/2026

Bailey	Orwell	To Whom It May Concern, I oppose Project Jupiter because this choice is about more than money. It's about our home and our future. New Mexico is not empty land. Doña Ana County has families, farms, animals, small businesses, and people who have lived here for many years. This place is important. I am not against new technology. I know artificial intelligence will be part of the future. I am not against new ideas or new jobs. But big companies should not make plans that leave local people with all the problems if something goes wrong. Large companies often promise jobs and money. They ask us to trust their plans and trust that everything will work out. But if things do not go as planned, the people who live here are the ones who deal with it. That is not fair. People say this project will bring jobs. Jobs matter, but they should not be the only reason to say yes. We still do not know how many real full-time jobs will go to New Mexico residents. Good growth should make a community stronger. It should protect our land and water. It should listen to the people who already live here. We should not lower our standards just because a company has a lot of money. I am also worried about what this decision teaches us. If we approve huge projects without clear answers about water, the environment, or public trust, we send the message that money is more important than people. That is not how good decisions should be made. Companies should have to prove they deserve permission. Real progress is not just big buildings or big investments. Real progress means healthy communities, safe natural resources, and leaders people can trust. In the future, people will not judge us by how fast we approved projects. They will judge us by whether we protected our home. For these reasons, I ask you to reject Project Jupiter. Sincerely,	1		No	[redacted]																			
Jess	Dube	I am a resident of clarenville, NL Canada. Do NOT let this go ahead. Climate change will continue to get worse until there is nothing left, including us. Save the animals and save yourself and have some common sense! Do NOT let this decision get past! The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No		Yes		Yes																8/27/2026
eunice	kim	Say no to 'Project Jupiter' Data centers poison the land and people surrounding it while using critical resources better left for ecological balance and responsible human community use. Ask yourself: who does it truly benefit to build and have data centers? Short term gains/ profits while aiding and abetting corporations and billionaires does not scale or translate to true community and environmental benefits for generations to come. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	1	Minimal Document	No		Yes		Yes				Yes	Yes											8/27/2026
Anonymous	Anonymous	Dear New Mexico Environment Department Air Quality Bureau, This new application for a permit should be denied because project Jupiter is projected to pollute more than New Mexico's three largest cities combined. I have a dear friends and family who would be impacted as well as greater community. It is incredibly important that we consider the legacy that we are leaving and that we remember that others will remember our choices and what we do or do not do in times like these. Yes we are allowed to be imperfect, but if we know better, we become obligated to do better. I would argue that your department knows better and so thus have a duty to all human beings, to the animal kingdom, and to the greater natural world, to heed that duty and to act upon it. The public should be given an additional 60 days to review and comment on this new air quality permit because it would be equitable. Having the deadline on a Monday following a holiday weekend, when many people are working and attending to their responsibilities, is not equitable. The air quality permit should be denied with the acknowledgment of Bloom Energy's history of illegally dumping hazardous waste, such as in Delaware. If the air quality permit is not denied, a wholly/adult public/ebmitted public hearing needs to be held in Santa Teresa, in both Spanish and English, with an option to attend virtually. Approving this permit would be environmental racism and would contribute to the growing inequality in our society. Your department is enabled with making choices that can have far greater effects and as such, need to take into account New Mexico's history as a sacrificial zone for industry, and also engineering consciousness with how to make things right for today and for tomorrow. Thank you for listening. I sincerely	1	Minimal Document	No		Yes		Yes				Yes	Yes											8/27/2026
Francisco	Arroyo	Dear Members of the Environmental Board, Please accept this comment in support of Project Jupiter. Throughout New Mexico, communities are working to attract employers that provide stable, family-supporting jobs. Investments like Project Jupiter help build confidence in our economy and encourage additional businesses to consider New Mexico as a place to invest. Those opportunities ultimately benefit workers, local governments, schools, and small businesses throughout the region. For these reasons, I respectfully request approval of the requested air quality permits.	1	Minimal Document					Yes				Yes	Yes											8/27/2026
Marlette	Gomez	I strongly oppose Project Jupiter. Our state is going through a severe DROUGHT. Data centers are notoriously resource-heavy, and independent findings indicate this establishment will place an unsustainable burden on our critical water supplies. Data centers use hundreds of millions of gallons of water to cool. It jeopardizes the water quality, agriculture, and residential future of the entire valley and other New Mexican residents. We cannot afford to exchange our most vital natural resource for corporate profits. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Minimal Document	No		Yes		Yes				Yes	Yes											8/27/2026
Anonymous	Anonymous	For years, Doña Ana County has been called a "nonattainment" area and such, this means our air quality does not meet federal government rules. I'm writing to oppose the Yucca Growth Infrastructure project and ask that you deny the air quality permit. The risks to human health posed by this proposed project, in terms of pollution, waste, and climate change impacts, are significant and unacceptable. The community of Dona Ana County already faces poor air quality and shouldn't be forced to endure more for out of state corporate interests. This permit needs to be denied. At the very least though the public should receive60 additional days to review and comment on the permit request. If somehow the permit isn't denied, public hearings must take place Santa Teresa, in both English and Spanish, with an option to participate virtually. Do the right thing and protect our air, health, and local community, not corporate greed.	1	Minimal Document	No		Yes	Yes	Yes				Yes	Yes											8/27/2026
Rafael	Rios	Dear Members of the Board: Project Jupiter represents more than a single facility—it represents an investment in the future of Southern New Mexico. Large projects generate work for contractors, engineers, equipment suppliers, transportation companies, and many other local businesses. Those economic benefits help strengthen communities while creating opportunities that can last for generations. I respectfully support approval of the requested air quality permit applications. Thank you for your consideration. Rafael Rios	2	Minimal Document	Yes				Yes	Yes				Yes											8/27/2026
Sarah A.	Silva	Members of the Environmental Improvement Board, As a community organizer, I've led efforts to build public support for change, like raising the minimum wage in Las Cruces. I know what a credible campaign looks like. It's clear to me that Oracle's effort to win approval of an air quality permit to operate a massive power plant for Project Jupiter lacks integrity. Many New Mexicans have spoken out about positive comments being submitted to the N.M. Environment Department in their names that they did not approve. They include Albuquerque City Councilor Tammy Fiebelkorn. This is unacceptable. That is one reason I oppose Yucca Growth Infrastructure LLC's air quality permit application for Project Jupiter in Santa Teresa. But it's hardly the only reason. Project Jupiter proposes to use Bloom Energy fuel cells and asks for permission to emit more than 10 million tons of greenhouse gasses into our air every year. While that's a 28 percent reduction from their previous plan for power generation, the innovation and access to financing that this industry has demonstrated indicates they have the capacity to do better. I was fortunate to spend the Fourth of July holiday weekend in the mountains. I woke up Saturday morning to the smell of smoke from the nearby Socorro Fire, which is burning out of control in the Gila National Forest. It was a stark reminder of the urgency caused by the ongoing climate collapse we have created. Project Jupiter's water use will be low, if the developers behind it keep their promises. That's a good thing. While I understand the project's need for a massive and stable power source, we need the developers to commit to technologies that also keep emissions as low as possible. Their current air quality permit application does not do that. While they are legally bound by their agreements with Doña Ana County to make Project Jupiter net-zero carbon by 2068, we need the path to net-zero carbon to begin the moment Project Jupiter goes online & doesn't, which could be months away, if they meet their goals. I want Yucca Growth Infrastructure to withdraw this application and come back with a new power plan that reduces emissions further by including a renewable energy component like solar. There is plenty of land adjacent to Project Jupiter where an array can be built. If the developers refuse to withdraw this application, I am urging you, the members of the Environmental Improvement Board, to deny it.	4	Minimal Document	No		Yes		Yes																8/27/2026
Rachel	Ridgway	It has been proven in other states how noisy, wasteful (water/energy), and toxic data centers are for the environment. We won't be able benefit or drink the money that will be made from the construction and operation of project Jupiter. Short term, small job growth is not a good enough reason to sacrifice our states water, health, and environmental longevity.	1	Minimal Document	No		Yes	Yes	Yes			Yes												8/27/2026
Adriatica	Da Silva	Dear NMED, My name is Adriatica Da Silva, and am writing on behalf of Youth United for Climate Crisis Action. We are a state-wide group of young people fighting for a livable climate and our future. We are writing to urge you to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting this permit violates NMED's mission "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." This project would disproportionately impact BIPOC communities in the surrounding area, and leave us younger generations with the responsibility of cleaning up Project Jupiter's ecologically disastrous mess. YUCCA is deeply concerned with Project Jupiter's plan to power this facility with Bloom Energy's Solid Oxide Fuel Cells. This technology is unprecedented and unproven at such a scale. The largest operating Bloom installation is a 60 MW facility and this facility in Santa Teresa would be 40 times larger than that. Scaling this technology to a mega-utility application remains unproven, and presents hazardous risks to communities already experiencing poor air quality. As young people, we urge NMED to take a stand against the severe climate and health impacts that this proposed "microgrid" poses. YGI will emit 940.2 thousand tons of CO2 and 330 tons/year of VOCs near existing 69% non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.44deg F in a sweltering desert climate, threatening vulnerable populations. Moreover, the emissions data the companies provided cannot be trusted. It is based on testing of a single, 66 kW unit four times for four hours. Extrapolating data from a unit 37,879 times smaller than the proposed plant capacity - and adjusting it with an arbitrary 30% safety margin. Why should we trust their calculations based on assumptions? Communities in southern Doña Ana County are already facing hotter and hotter days due to climate change, unhealthy levels of air pollution, and grow water issues. The last thing it needs is a mega-fuel cell powered at data center. NMED must be bold enough to reject this YGI permit application, or at the very least schedule a formal, bilingual public hearing in the Santa Teresa area to fully investigate the risks. Regardless of your state agency's process, YUCCA remains steadfast in its fight for a livable climate and future beyond fossil-fuels. Respectfully, Adriatica Da Silva YUCCA Director	1	Minimal Document	No		Yes		Yes																8/27/2026
Rachel	Taylor	The air quality permit application should be denied. Approving this application would be government sponsored environmental racism	1	Minimal Document	No		Yes	Yes	Yes			Yes		Yes										8/27/2026
Laura	Stokes	The long-term environmental harm to the community and the state overrides any short term benefits to the community. The real beneficiary is the corporation at the expense of the citizens. Please do not let this go forward.	1	Minimal Document	No				Yes	Yes														8/27/2026
Elizabeth	Gamboa	This comment is to request the denial of the permit submitted by the Yucca Growth Infrastructure, LLC. The air quality of our area has been getting worse and worse as time goes on. This micro grid will add a significant amount more of pollution. The approval will cause dangerous air quality levels to the communities in the area, triggering an increase of chronic respiratory diseases. For those of us already living with chronic respiratory diseases, the approval will affect our quality of life and shorten our lifespan. So, please deny this permit. Reference: Jiang XQ, Mei XD, Feng D. Air pollution and chronic airway diseases: what should people know and do? J Thorac Dis. 2016 Jan;8(1):E31-40. doi: 10.3978/j.issn.2072-1439.2016.01.30. Anonymous	Anonymous	I am a resident of Albuquerque New Mexico and I don't want any us data centers built here. I am concerned with the matter of water shortage, water and air pollutants, and damage to local ecosystems. Project Jupiter would be detrimental to our health, our ecosystem, and our climate as a whole. We are already at a lack of water but this project would take more water than our climate can supply, this would be government-sponsored environmental racism. People living here would not have access to clean water if the data center is built. Our climate crisis would be accelerated by the implementation of more and more data centers and fossil-fuelled efforts. I am therefore unable to support	1	Minimal Document	No				Yes																8/27/2026
Karen	Potski	As President of Picacho Mountain, I am pleased to submit these comments in support of the air quality permit applications filed by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County. At Picacho Mountain, our mission is centered on creating exceptional communities where people can live, work, and enjoy a high quality of life throughout every stage of life. Successful communities are not built through housing alone—they are built by creating an environment where employers invest, families choose to stay, and residents have access to meaningful career opportunities close to home. From that perspective, Project Jupiter represents an important opportunity for Southern New Mexico. Communities grow stronger when they are able to attract employers that provide stable, high-quality jobs. Those investments support not only the workers employed by the project itself, but also the businesses, restaurants, retailers, healthcare providers, schools, and service industries that benefit from a growing local economy. As residential developers, we understand that economic development and housing development go hand in hand. Families are more likely to purchase homes and invest in their communities when they have confidence in the local economy and the availability of long-term employment. Likewise, employers seeking to expand look for communities that offer quality neighborhoods, recreational amenities, and a strong sense of place. These relationships reinforce one another and help create sustainable, vibrant communities. Southern New Mexico continues to be one of the state's most promising regions for growth. Investments like Project Jupiter help strengthen that momentum by encouraging additional private investment, expanding opportunities for local businesses, and enhancing the overall attractiveness of the region for future employers and residents alike. At the same time, responsible growth requires responsible planning. We believe development should respect the environment, engage the community, and comply with New Mexico's environmental standards. A transparent, science-based permitting process provides the appropriate framework for ensuring projects are developed responsibly while allowing communities to realize the benefits of thoughtful investment. We are encouraged by Project	2	Minimal Document	Yes				Yes																8/27/2026
Sergio	Franco	To the New Mexico Environment Department As New Mexico continues growing, we need projects that create opportunity while maintaining responsible environmental standards. Project Jupiter has the potential to attract additional investment, strengthen our workforce, and expand economic opportunity throughout Doña Ana County. I appreciate the time and effort that has gone into this permitting process and respectfully encourage approval of the project.	1	Minimal Document	Yes																				8/27/2026
Morrigan	Manns	I oppose the creation of Project Jupiter. I do not believe it's worth the resources it would take from our wildlife and citizens. I strongly urge you to reconsider this decision. There has been very bad transparency between these companies and the people who live in the area. This permit should be denied for the health and safety of the people who live there, and there needs to be better transparency for the people. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No				No	Support Non-Substantive			Yes												8/27/2026
Nienke	Means	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community but will you be providing job opportunities to non-existent Means	1	Minimal Document	No				Yes	Yes			Yes	Yes										8/27/2026
Mayra	Castillo	Dear Chair and Members of the Board - I believe New Mexico's greatest resource is its people. Projects like Project Jupiter create opportunities for those people by supporting good-paying jobs, encouraging workforce development, and strengthening local economies. These investments also benefit the many businesses that provide goods and services throughout the region. I respectfully support approval of the requested air quality permits and appreciate your thoughtful review	1	Minimal Document	Yes				No	Support Non-Substantive														8/27/2026
Laura	Stanhelkin	This permit should not be approved. Our State should not support this billion dollar project for which we would not see any benefits, only additional pollution and water stress. New Mexico will not benefit long-term. A few thousand construction jobs will not be a "significant investment" in our community. Instead, this project will only stress our drought/climate more. Look around the country - these grids are destroying communities. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. Ending the public comment window the day after a holiday weekend is not equitable. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be environmental racism and would contribute to the growing inequality in our society. Your department is enabled with making choices that can have far greater effects and as such, need to take into account New Mexico's history as a sacrificial zone for industry, and also engineering consciousness with how to make things right for today and for tomorrow. Thank you for listening. I sincerely	1	Minimal Document	No				Yes																8/27/2026

Trey	Crain	I know it contaminates the water quality. Trey crain	1		No	[redacted]																
Victor	Diaz	How are they gonna clean the water and what are they gonna do with the toxins in the water	1	Minimal Document	No							Yes										8/27/2026
Nivetha	Means	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community but will you be providing job opportunities to non-existent felons	1	Minimal Document	No							Yes										8/27/2026
Robert	Pollak	As Founder and Chief Executive Officer of Community Builders International (CBI), I am pleased to offer my support for the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County. For decades, Community Builders International has worked alongside communities, businesses, and public-sector partners to create places where people want to live, work, invest, and raise their families. Our work has reinforced a simple principle: successful communities are built through thoughtful planning, strong partnerships, and sustained private investment. Economic opportunity is one of the fundamental building blocks of healthy, vibrant communities. From that perspective, Project Jupiter represents more than a single development project. It represents an opportunity to strengthen Southern New Mexico's long-term economic foundation. Investments within major scale create momentum that extends far beyond the project site, supporting local businesses, creating employment opportunities, attracting additional private investment, and encouraging the infrastructure improvements necessary to accommodate future growth. Community development is about much more than constructing buildings or expanding infrastructure. It is about creating places where families have confidence in their future, where businesses choose to invest, and where young people can envision building careers without leaving the communities they call home. Projects that generate quality jobs and diversify local economies contribute directly to those objectives by strengthening the communities that surround them. Throughout our work, we have seen firsthand how transformational investments create positive ripple effects across an entire region. They encourage new housing, support commercial development, expand retail and service opportunities, improve community amenities, and create a stronger tax base that allows local governments to invest in roads, parks, public safety, and other essential services. These outcomes help build communities that are more resilient, more attractive to employers, and better positioned for long-term success. Equally important, successful community development requires balancing growth with [redacted]	2	Minimal Document	Yes	No	Support Non-Substantive											8/27/2026
Genevieve	Kenyk	I do not agree with any data base going up especially in New Mexico. Our water here is already depleting at a concerning rate. We do not need a data center to contribute to that even more. We need to focus on community and the issues we already have.	1	Minimal Document	No							Yes	Yes			Yes						8/27/2026
Natalia	Quiroz	I urge the New Mexico Environment Department to reject this permit. Project Jupiter will be detrimental to the environment and communities surrounding it. If approved, the project will emit millions of metric tons of CO2 emissions a year. Not to mention the marketing campaign and canvassing done by Oracle is also predatory and full of misinformation. We cannot accept this.	1	Minimal Document	No							Yes										8/27/2026
Helen	Stuck	Data Centers have minimal benefit to our area/region. They could potentially severely impact us environmentally by taxing our essential resources w/water and air quality, affordable energy and quality of life. The drain on our resources would produce an environment that could not sustain the essential needs of life in this desert land. I ask you to deny this application which would adversely effect the air quality of our community.	1	Minimal Document	No								Yes	Yes								8/27/2026
Charlotte	Lewis	I am writing to voice my strong opposition to the proposed permit. Yucca Growth Infrastructure is planning to install polluting natural gas fuel cells that will contribute to poor air quality and health outcomes for our communities. The submitting company has attempted to obfuscate the true effects of these fuel cells. Furthermore, their subsidiaries have been cited in the past for illegally dumping waste. The project as a whole is opposed by the people of New Mexico, and the builders are avoiding true public comment and attempting to subvert the people's will. I strongly oppose the issuing of this permit. They need to answer public comment about the nature of the project and waste management plans before this can be considered.	1	Minimal Document	No							Yes	Yes	Yes								8/27/2026
Hannah	Chaney	I staunchly stand against any construction of project Jupiter. Our water supply, animal habitats and wellbeing of the community will ALWAYS be more important than profit. We need to have better transparency from these companies who are trying to extract more from the environment for their own gain. Please deny this air permit so that the people of these communities can continue to breathe. The public should be given an additional 45 days to review and comment on the air quality permit to a community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	[redacted]	No								Yes	Yes		Yes	Yes					8/27/2026
Steve	Boyles	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $80 million to help repair, upgrade, and improve local water systems, $380 million in direct support for schools, infrastructure, and local services; and $4.4 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. If we absolutely need it for national defense sit for it but its just for making AI cat videos then the environment impact is to high. Maybe you should think of using renewable resources such as solar, and wind, New Mexico had plenty of wind and sun! Sincerely, Steve Boyles	1	Minimal Document	No							Yes	Yes	Yes		Yes	Yes					8/27/2026
Lizeth	Arras de Velasquez	Dear Members of the Environmental Improvement Board, I respectfully support the air quality permit applications for Project Jupiter. This investment has the potential to create opportunities that extend far beyond the project site. From skilled trades and construction to local restaurants, retailers, suppliers, and service providers, the economic impact of a project like this reaches across an entire region. I believe Southern New Mexico is well positioned for this opportunity, and I respectfully encourage the Board to approve the requested permits. [redacted]	1	Minimal Document	Yes							Yes		Yes								8/27/2026
NANCY	ZASTUDIL	I am writing to urge the New Mexico Environmental Department to DENY YES's permit application for Project Jupiter in Doña Ana County. We are currently seeing temperatures increase rapidly and dramatically across the world due to human-caused greenhouse gases. Here at home, the Rio Grande is dry in Albuquerque due to water mismanagement and increasing temperatures and evaporation because of climate change. This data center will further stress the region's scarce water resources because it will require millions of gallons of water that would otherwise be available to residents for drinking, cooking, growing food and gardening, and bathing. Further, Project Jupiter's Bloom Energy Solid Oxide Fuel Cells are not clean energy—they rely on dirty fossil fuels (natural gas) and the data center is projected to add at least 10 million tons of greenhouse gases emission per year, spewing out harmful air pollutants and unknown amounts of hazardous waste. This will add tremendously to the already significant ozone pollution in DAC. Further, Bloom has been cited by the US EPA for illegally dumping into the community's landfill, further contaminating the land. Project Jupiter developers have repeatedly kept information from the public and are now under scrutiny for submitting supportive comments without commenters' consent or knowledge, as reported by the local press. Additionally, Doña Ana County staff have reported to the DAC Commission that Project Jupiter developers have failed to comply with quarterly jobs reporting. Project Jupiter is exactly what New Mexico does not need. I urge the New Mexico Environment Department to reject this project. Sincerely,	1	Minimal Document	Yes							Yes	Yes									8/27/2026
Steve	Boyles	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Cari	Peterson	Project Jupiter as currently planned will use solid oxide fuel cells for the conversion of LNG into electrical power. This approach will produce electrical power with a price point that is approximately 3 times more than the PNM'e price point of wind, or solar generation. Geothermal can generate a price point that is approximately 50% the price point of LNG. NM has enormous potential for solar, wind and geothermal electrical generation. It is farcical, that NM should ignore these local sources of clean, affordable and abundant power in favor of a dirty and expensive LNG fuel solution. The economics do not support the power solution that has been chosen to operate Project Jupiter. The enormous polluting effect of LNG usage will not benefit the people of NM and will further increase the State's mean temperature thus causing more energy consumption for heat pump operation, in the form of air conditioning and refrigeration. The foolishness of the proposed LNG solution in light of our abundant clean local power potential which is readily available for development can only be explained in terms of a "carpet-bagger" mentality that benefits out of state energy companies at the expense of the citizens of New Mexico.	1	Minimal Document	No							Yes	Yes									8/27/2026
Laura	Duran	As a longtime resident of our beautiful Southern New Mexico, for West Southern TX, beautiful Rio Grande Valley, I am VERY much opposed to the use of our resources to generate this proposed project. It will, by its very nature, not only consume those resources but generate unwanted by-products such as noise, traffic, and surveillance (to name only 3, there are more!). New Mexico is a beautiful place. Corporations want to come in and define our land per agent. It is my first belief that to site center in Southern New Mexico is the BEST CHOICE. Southern New Mexico's greatest assets is its open land, vast starry skies, and LIMITED WATER. Not its capacity to become an industrial corridor for massive data centers! In a region where every drop of water matters, approving a resource-intensive data complex sends the wrong messages on so many levels about our priorities in this area and our future. Family, friends, farming and community are Southern New Mexico's hallmark priorities and you will destroy a sector of each with the data center project! Not every "empty" piece of land is just waiting to be developed by those entities with the deep pockets!! That is not good stewardship of the land we were given to care for!	1	Minimal Document	No								Yes			Yes						8/27/2026
M	Martin	The entire SW region of the US is in the midst of a record drought. Groundwater is declining, rivers are drying up. The Rio Grande is running dry by the time it reaches Albuquerque. Regardless of what their spiteful TV ads say, the "Project Jupiter" data center will consume more water than New Mexico can replace. Don't let this disastrous endeavor go any further.	1	Minimal Document	No							Yes				Yes					8/27/2026
Lorenzo	Garcia	Members of the Environmental Improvement Board, As a certified water operator, I understand the importance of balancing economic growth with responsible stewardship of New Mexico's limited water resources. That balance is one of the primary reasons I support the approval of the air quality permits for Project Jupiter. When large industrial projects are proposed, water use is often one of the first concerns raised. After reviewing the updated plans for Project Jupiter, I believe the project has taken meaningful steps to reduce those concerns. By replacing conventional combustion turbines with Bloom Energy's solid-oxide fuel cell technology, the project will dramatically reduce air emissions while using only a fraction of the water traditionally required for power generation. Equally important is Project Jupiter's commitment to invest $80 million to improve the local water utility system serving the surrounding community. Investments of this size help strengthen aging infrastructure, improve system reliability, and create lasting benefits that extend well beyond a single development project. Improvements to water infrastructure benefit existing residents, future customers, and the long-term sustainability of the region. Reliable infrastructure extends beyond water alone. Producing electricity on-site through advanced fuel cell technology reduces pressure on New Mexico's electric grid while providing dependable power for critical operations. Combining cleaner energy production with waterefficient technology demonstrates that economic development and environmental responsibility can move forward together. Project Jupiter represents an opportunity to bring high-quality jobs, private investment, and infrastructure improvements to southern New Mexico while incorporating technology that substantially lowers emissions and conserves one of our state's most valuable resources. In my view, this project establishes a strong example of how responsible development should be approached. For these reasons, I respectfully encourage the Environmental Improvement Board to approve the air quality permits for Project Jupiter. Thank you for your consideration and your continued service to the people of New Mexico.	3	Minimal Document	Yes							Yes	Yes	Yes		Yes						8/27/2026
Janeth	Hernández Ibáñez	To the Environmental Improvement Board: I appreciate the opportunity to submit this comment in support of Project Jupiter. New Mexico has spent years working to attract employers that offer long-term careers and diversify our economy. I believe this project represents another step in that direction. Major investments like this don't just benefit one company, they create opportunities for construction workers, suppliers, local businesses, and the communities that support them. I respectfully encourage the Board to approve the requested air quality permit applications. Janeth Hernández Ibáñez	1	Minimal Document	Yes							Yes	Yes	Yes		Yes						8/27/2026
Gerry	Stuck	Data Centers have minimal benefit to our area/region. They could potentially severely impact us environmentally by taxing our essential resources w/water and air quality, affordable energy and quality of life. The drain on our resources would produce an environment that could not sustain the essential needs of life in this desert land. I ask you to deny this application which would adversely effect the air quality of our community.	1	Minimal Document	No								Yes	Yes								8/27/2026
Madeleine	Elarose	I am writing to urge the New Mexico Environment Department to deny Project Jupiter's permit. As data centers pose detrimental environmental impacts to health of our communities and the land we call home. I am deeply concerned about the health repercussions that individuals and families in southern NM could face as a result of Project Jupiter, all so that out-of-state corporations can make a profit.Evidently, it's egregious. The sheer amount of natural resources, like our water, to run Project Jupiter is unacceptable, and risks being contaminated for future generations. In a region already have drought and climate change-related temperature increases, we need to defend the land and the communities who live here from seedy corporate interests.	1	Minimal Document	No							Yes	Yes	Yes								8/27/2026
				Minimal Document								Yes		Yes								8/27/2026

Lane	Andress	Protect the Air Quality and clarity in New Mexico. Please deny Air Quality Construction Permit Application 10833 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. More solid data and information is clearly needed. As this stands now it will not meet the longer air quality goals that New Mexico has set. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest operating Bloom installation is a 20 MW facility - 40 times smaller than what is proposed here. Scaling this technology to a mega-utility application remains entirely unproven. * Suspect Estimates & Inadequate Testing: The emissions data provided is based on testing of a single, 65-kW unit four times for four hours. Extrapolating data from a unit 317 kW times smaller than the proposed plant capacity - and adjusting it with an arbitrary 15% safety margin - fails to provide credible empirical evidence. The emissions data provided by the company cannot be trusted. * Enforcement Impossibility: The design routes 2,275 individual cells through separate stacks with no add-on pollution control mechanisms or integrated continuous monitoring for particulate matter, VOCs, or shifting CO2 intensity. NMED cannot practically enforce compliance under 20.2.72.220 NMAC across thousands of individual, degrading units. * Severe Public Health & Environmental Impacts: The microgrid will emit 361.2 tons/year of CO and 32 tons/year of VOCs near existing EPA non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.66 deg F in a sweltering desert climate, threatening vulnerable populations. Furthermore, concentrating 10M metric tons of climate-warming CO2 into 27k acres - exceeding the combined emissions of Albuquerque, Santa Fe, and Las Cruces - creates localized health risks. Emerging 2025 & 2026 research links elevated CO2 levels to permanent changes in human blood chemistry, oxidative stress, and cognitive decline. Because CO2 sensitivity exists on a normal spectrum, even minor baseline increases can induce anxiety and panic attacks in sensitive individuals. Viable alternatives exist. The June 2025 Lazard Levelized Cost of Energy Report confirms that renewables are the lowest-cost resources to deploy and tech leaders are already powering massive data centers using	2		No	[redacted]																	
Glenn	Wilde	A two page document explaining why YGI's air permit is incomplete and not ready for full consideration until updated. Jeff	Owens	I oppose the construction of this data center. In a state already struggling with water shortages, this project will only consume vast amounts of water. It will also expel tons of greenhouse gasses. In an age of ever-increasing surveillance, this project aims to collect even more of our data, something we often don't get a chance to consent to.	1	No	Mirrored Document										Yes	Yes						8/27/2026
Melissa	Lagarreta	New Mexico Environmental Department Attention: Environmental Improvement Board Project Jupiter represents an opportunity for Southern New Mexico to continue building a stronger and more diverse economy. Investments at this scale bring new opportunities for businesses, skilled workers, and future generations. I appreciate the careful review this project has received and respectfully ask the Board to	1	Yes	Mirrored Document								Yes	Yes								8/27/2026
Toni	R	We the people of New Mexico demand a further investigation into Project Jupiters impact on air quality and water in our communities	1	No	Mirrored Document	Yes	Support Non-Substantive							Yes								8/27/2026
Josh	Agenbroad	I oppose Project Jupiter as proposed. I spend half the year in Las Cruces so already know that the air quality in Doña Ana County is not great, noticeably worse the other parts of the state. The fuel cell backup plan is unproven at this scale. If the fuel cells underperform, there's no confidence the developer won't fall back on higher-emission generation. Water in this region is already overallocated. Even setting aside agriculture's larger share of the problem, we shouldn't be adding new large-scale demand before existing shortfalls are addressed, especially when future water availability here is uncertain. The claimed benefits don't hold up against these risks. Once built, the permanent jobs and local economic impact will be small relative to the project's scale — a handful of people benefit while New Mexicans are left holding long-term costs in air quality, electricity rates, and water. The one-time payments being offered ($360M for schools/infrastructure, $50M for water systems, etc.) sound large in isolation, but spread over the decades-long lifetime of a project this size, they're a small fraction of the ongoing costs residents will bear. I work in energy/tech innovation and use AI daily, and I still don't see the upside justifying this. I'm also troubled by the process here. Project specs have shifted repeatedly — water estimates changed, and the power plan flipped from gas turbines to fuel cells — making it hard for the public to evaluate what's actually being approved. An out-of-state group ran an ad campaign supporting the project and is now being sued by the NM State Ethics Commission for undisclosed lobbying. That kind of behind-the-scenes maneuvering to manufacture support should give some pause. I'm also concerned about timing: the current AI infrastructure buildout may be a bubble, and it's unclear what happens to these commitments if backers face financial pressure and look to cut costs. Let other regions with more water and grid capacity host these data centers — we can still benefit from the technology without committing long term to the local costs of hosting it. Please deny the pending approvals. Send a message that New Mexico can't be so easily manipulated and sold for outside interests.	1	No	Mirrored Document								Yes	Yes	Yes							8/27/2026
Austin	Martin-Gates	My family and I are not okay with this project. We are shocked and disgusted at the shady practices of project Jupiter; we are not okay with having this threat to our communities health, air, and water, further, we are furious that the community has been ignored and even antagonistically silenced by corrupt representatives. New Mexicans are owed clarity on how this project will be held accountable for the damage it will do. This project is Poison for our community and we do not want it here.	1	No	Mirrored Document								Yes	Yes	Yes		Yes					8/27/2026
Emily	Heiner	As a born-and-raised Las Cruces who has returned to live here as an adult, I am opposed to Project Jupiter. I am familiar with the environmental effects of data centers that have already been built around the world, and I don't have any reason to believe that Project Jupiter will be different. We need to prioritize our air quality and not add unnecessarily to our emissions and jeopardize community respiratory health for what will end up being only a small number of permanent jobs. Additionally, Project Jupiter threatens our local water supply, and will increase noise pollution. Please do not approve any further permits for Project Jupiter.	1	No	Mirrored Document								Yes		Yes							8/27/2026
Jacqueline	Olivas	NM has ample sources of renewable energy. I oppose this permitting action due to the proposed use of fossil fuels, and the project in general due to both energy and water usage.	1	No	Mirrored Document								Yes	Yes	Yes		Yes					8/27/2026
Alexis	Mendoza	To the Environmental Improvement Board Members: One of the best ways to strengthen our communities is by creating opportunities for people to live and work where they grew up. Projects that bring new investment and create quality jobs help accomplish that goal. Project Jupiter has the potential to make a meaningful contribution to Southern New Mexico's future, and I respectfully ask that the Board approve the requested air quality permit applications. Alexis Mendoza	2	Yes	Mirrored Document								Yes									8/27/2026
Felicia	Montoya	I am writing to say I am against this permit. Clean air is a right we all deserve. Please do not approve it! I was born and raised in New Mexico and I love this state. But it makes me angry how many times we have been used. Big companies come here, take what they want, and leave us with the mess. Look at what uranium mining did to us, families even Grants and on the Navajo Nation are still sick. Their water is still poisoned. Our own families were downwind of the Trinity bomb test and nobody ever made that right. It is always the same story. They promise us jobs and money. Then they leave and we are stuck with dirty air, dirty water, and sick kids. Now this data center wants to come in and do it all over again. The papers say it would put out 10 million tons of greenhouse gases every year! That's crazy!! That is more than Albuquerque, Las Cruces and Santa Fe put together. And they want to put it right next to Sunland Park and Santa Teresa, where people already breathe some of the worst air in the state. That is not right. Kids with asthma and the elderly are the ones who will pay for this. And what about our water? We live in a desert. We barely have enough water for our own families, our gardens, our farms. The river runs dry. Everyone I know is trying to save water and now a giant computer center wants to come use our water to cool their machines? For a company that is not even from here? We do not have the water! Please stand up for us this time. Do not let this be one more time New Mexico gets taken advantage of. Our air, water and health matter MUCH more than their money. Please deny this permit. And please hold a public meeting (in English and Spanish) so that the community can be heard. Thank you, Felicia	1	No	Mirrored Document									Yes	Yes							8/27/2026
Dana and Jeremy	Pulliam	I am writing to submit my formal comment regarding the pending air quality permit application for Bloom Energy. NMED's stated mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." Furthermore, the Air Quality Bureau is tasked with protecting public health and preventing the deterioration of our air quality. To uphold these essential commitments, I urge the Bureau to consider the following critical points regarding this permit: Request for Extension: The public must be given an additional 60 days to review and comment on this air quality permit. A brief timeline limits community engagement, and an extension is required so community members can participate equitably. Permit Denial Based on Track Record: This air quality permit application should be denied completely, given Bloom Energy's history of illegally dumping hazardous waste. Requirement for a Public Hearing: If the permit is not outright denied, NMED must host a formal public hearing. This hearing needs to be held locally in Santa Teresa, conducted in both English and Spanish, and includes a fully accessible option to participate virtually. Environmental Racism Concerns: Approving this permit would constitute government-sponsored environmental racism. The residents of Doña Ana County are already disproportionately impacted by severe environmental pollution. No Inducement Bonus: For years, Doña Ana County has been designated as a "nonattainment" zone. This means our local air quality already fails to meet federal government health and safety rules. Adding further emissions to an	1	No	Mirrored Document								Yes	Yes	Yes			Yes				8/27/2026
Lisa	Hines	We do not have the water to support data centers in this state. Water is for people and wildlife, not data centers. And now it is being exposed that Project Jupiter is submitting false comments to this site. Shame on you.	1	No	Mirrored Document									Yes	Yes			Yes	Yes			8/27/2026
Kate	Leung	I am a resident of NM and I am opposed to this permit. I am opposed to allowing data centers and out of state projects to use precious NM environmental resources. I am troubled by the aggressive and manipulative advertising tactics associated with this permit and with Project Jupiter. This permit should not be granted.	1	No	Mirrored Document								Yes		Yes							8/27/2026

Landon	Morrison	It's good jobs, but the water and the traffic will be bad.	1	No	Mirrored Document								Yes		Yes							8/27/2026
Glenn	Wilde	Please review this comment and forward to the FAA or the appropriate airspace regulator. Careful engineering analysis reveals that aircraft will need to navigate around this project's heat plume to avoid unsafe flying conditions. While this comment is about a type of "air quality", it is likely outside of the „Direct„ domain of NMED. Yet I found NO REVIEW PROCESS FOR PERMITS INVOLVING AIR TRAFFIC SAFETY. Currently there is a federally designated low altitude airway immediately over the Project Jupiter construction site. This should be evaluated, ideally before the construction permit is approved. Given the lack of defined process for reviewing new thermal impacts on aviation, NMED, as the primary permitting agency, has a responsibility to inform the appropriate government agencies. Details are in the attached PDF.	3	Yes	Mirrored Document								Yes									8/27/2026
Michael	Saccone	Dear NMED staff, My name is Dr Michael Saccone. I lived and worked in Santa Fe for 4 years, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I left professional, AI adjacent research to teach high school. This project is one of dozens of data centers that will be remotely operated or left to disrepair over the coming years as AI hype dies off. Their "financial commitments" are in lieu of taxation in many cases, a clever accounting trick to "gift" the county millions of dollars while still taking a backseat. Open AI and Oracle don't have the benchmarks of New Mexicans at heart and are poised to siphon their revenue away from the people whose air and water they are polluting. Our generations to come do not need these projects. The kids I work with are being forced into a grim future they never asked for. When the Rio Grande runs dry forever, they will take little solace in the size of the economic investment their grandparents accepted as a bribe. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants. • This technology generates toxic waste, and the process for handling this waste is still unclear. • fuel cell technology or a centralized waste system has never been tried at this scale. • Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YGICA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Dr Michael Saccone	1	No	Mirrored Document								Yes									8/27/2026

Sandra	Graves	Just concerned about the water usage in a Our area.	1	No	Mirrored Document								Yes									8/27/2026
JM	Carter	I am writing to express my absolute objection to Project Jupiter, which I believe poses significant and lasting threats to our community. While proponents point to short-term job creation, the reality is that Project Jupiter will place an unsustainable strain on Doña Ana County's infrastructure, environment, and public resources. Furthermore, the financial packages being offered including the promised funds for schools, infrastructure, and local organizations like the Boys and Girls Clubare nothing more than corporate buy-offs designed to mask the permanent damage this project will inflict. No amount of funding can compensate for the massive depletion and endangerment of our precious local water systems and natural habitats. Our community's future and our natural resources are not for sale. We do not need Project Jupiter, and we do not want it here in New Mexico. Sincerely, JM	1	No	Mirrored Document								Yes		Yes							8/27/2026

Chelsea	Neil	I feel like they are rushing the public to agreeto this and more research needs to be done to understand the impact.	1		No														
Yussef	Lockett	I oppose the proposed AI data center in Santa Teresa because I am concerned about its potential impact on our community. I believe projects of this scale should prioritize protecting local water resources, minimizing air pollution, and ensuring the health and safety of nearby residents, especially children and schools. I ask that this permit be denied until there has been a thorough, transparent review of its environmental and public health impacts and the community's concerns have been fully addressed. The public should be given an additional 60 days to review and commenton the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed atresidents of Doña Ana County.	1	Mirrored Document	No	No	Ozzone Non-Substantive		Yes							8/27/2026

Melissa	Hawk	What kind of stupid attempts to put a data center that requires a massive amount of water to cool it in one of the driest places in the USA? There are PEOPLE who live here. AND wildlife that are dependent on a LIMITED SHRINKING water table! We burn the fire Grande for most of the year and you want to siphon off more water?! MINDLESS...IDIOTS. FATUOUS, FAT HEADED, OUT OF TOUCH fuckwits is who. Just your heads out your asses, and use the logic and critical thinking skills the gods gave a cockroach.	1	Mirrored Document	No			Yes											8/27/2026
Paul	Wallace	There's plenty of water and I believe this will be aterts work. It's an excellent idea and I agree they shouldn't use our drinking water, if they can reuse it it's a good idea.	1	Mirrored Document	No			Yes		Yes									8/27/2026
Bevans	Huggins	Data centers use too much water and take power away from people	1	Mirrored Document	No			Yes											8/27/2026
Mary	Baker	I am writing to express my strong aversion to project jupiter. I DO NOT SUPPORT Project Jupiter, which I believe will significant damage water rights, and will not benefit our community as "projected" , will not benefit our landscape, or our people! Project Jupiter is estimated to bring substantial economic growth to Dona Ana County, key word, estimated. But it really, we will be utilizing tons of water and damage our DELICATE eco system all for cooling some dumb computers. WE DON'T want AI in NM. Take it some place else! WE DONT want its anticipated* 4,000 construction jobs and 1,000 project-supported jobs, we don't need your money!!! These are not guarantees, They are meant to entice your judgements. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems, that it plans on using solely, and not benefiting anyone. The $360 million in direct support for schools, infrastructure, and local services, and the $5 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, is just a ruse to look good on paper. We already have clean drinking water, and we DO NOT need Protect Jupiter at all. I urge the New Mexico Environment Departmentto NOT approve this impor project. It would be a disservice to the entirety of NM and what our beautiful lands stand for. I am fighting against this project and it's misleading information meant to "sell" us on an idea that will inevitably destroy NM land, taken limited ** water resources from our communities, and trade respect, environmental concerns, and the right of the people, for what? The all might dollar? Money is never worth nature, it's not worth our water resources, it's the worst decision NM will ever make of you allow Project Jupiter to continue. I urge you to hear us, and to make the right decision, vote against Project Jupiter! For NM's future! Sincerely, Mary Elizabeth Baker	1	Mirrored Document	No			Yes		Yes									8/27/2026
Isaac	Zion	Data centers need more oversight and thought of long lasting effects. Public goods such as water need public approval. Isaac Zion	1	Mirrored Document	No			Yes		Yes									8/27/2026
Cameron	Olson	Our community does not support this project, and the damage it will cause to our local environment and quality of life. This ecosystem is already in a vulnerable state due to consistent droughts, and taking from our aquifers and water table for cooling at this facility, will only further worsen already unsustainable drought conditions. The high levels of dust stemming from the dry conditions here, as well as the strong winds already contribute to poor air quality, a data center's exhaust will only serve to worsen these issues, while putting off massive amounts of heat. We also have an unstable power grid, and that would be greatly exacerbated by a massive data center using far more power than the entire city itself. All of these problems are readily apparent to many members of this community, causing massive public backlash to this project, and in return, we are getting a few jobs for a select group of people (which I happen to even be a part of as a computer technologies major). This is not the proper environment or community for a data center of this scale. Please listen to the community and do not approve any part of this "project jupiter".	1	Mirrored Document	No			Yes		Yes									8/27/2026
Madison	Seib	I believe that project jupiter is setting to cause more harm to not only Las Cruces, but the planet as a whole. It disrupts ecosystems, social spaces, as well as ruining our air. Adding this to promote technology can be done in different ways that aren't going to harm the world that we live on. Instead of looking for economic boosts, think about the damage that will occur to our future.	1	Mirrored Document	No			Yes	Yes	Yes									8/27/2026
Ivan	Carrillo	Members of the Environmental Improvement Board - Project Jupiter represents the kind of investment that helps communities prepare for the future. It creates opportunities for today's workforcewhile encouraging the next generation to pursue careers here in New Mexico. I believe responsible development and environmental stewardship can work together, and I respectfully support approval of the air quality permit applications. Thank you for your consideration. Ivan Carrillo	2	Mirrored Document	No	Yes	Ozzone Non-Substantive												8/27/2026
Holly	Mata	As a NM resident, I urge you to deny the application as submitted. The public - especially people living in Doña Ana County and the borderland - should have additional time to review this application. There have not been enough meaningful opportunities to participate in public hearings in English and in Spanish, and community members deserve to have public hearings in person and virtually. There are so many unanswered questions, and too few clear answers. People in Doña Ana County are already unjustly exposed to high levels of air pollution, and permitting the extremely high levels of pollution generated by	1	Mirrored Document	No				Yes	Yes									8/27/2026
Glenn	Wilde	This air permit is unprecedented in size and scope. I urge NMED to consider that their decisions will impact numerous follow-on applications, for the same fuel cell technology at this large scale, in other states and potentially again in New Mexico. For the sake of people around the world, suffering from the ever expanding severe weather consequences of climate change, please use all tools at your disposal to minimize	1	Mirrored Document	No					Yes									8/27/2026
Dorothy	Lennox	As a life long NM resident, I am explicitly AGAINST the construction of a data center in my state, AGAINST Project Jupiter, and AGAINST the racist location selection of the proposed site. I am demanding atleast a 60 day delay for this project so residents have more time to provide feedback. Thank you for your consideration	1	Mirrored Document	No							Yes							8/27/2026
Carlos	Sosa	Why is this so difficult? Why are there so many bots posting bot like comments? Why aren't more citizens concerned? Well, literally exactly like Lane A said... Protect the Air Quality and clarity in New Mexico. Please deny Air Quality Construction Permit Application 10803 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana Ana County. More solid data and information is clearly needed. As this stands now it will not meet the longer air quality goals that New Mexico has set. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design * Unprecedented, Unproven Scale: YGI proposes using 2,270 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest operating Bloom installation in U.S. (DFW) facility - 60 times smaller than what is proposed here. Scaling this technology to a mega-utility application remains entirely unproven. * Suspect Emissions & Inadequate Testing: The emissions data provided is based on testing of a single, 60-kW unit four times for four hours. Extrapolating data from a unit 37,917times smaller than the proposed plant capacity - and adjusting it with an arbitrary 20% safety margin - fails to provide credible empirical evidence. The emissions data provided by the company cannot be trusted. * Enforcement Impossibility: The design routes 2,275 individual cells through separate stacks with no add-on pollution control mechanisms or integrated continuous monitoring for particulate matter, VOCs, or sh/ting CO2 intensity. NMED cannot practically enforce compliance under 20.2.72.200	1	Mirrored Document	No														8/27/2026
James	Wolcott	I am writing to express my concerns about Project Jupiter, which I believe requires further evaluation and public information. - What is trashed industrial non-potable water and what is its source? - Project Jupiter will use on-site power generation supported by Bloom Energy fuel cells. What does supported by mean? * What are the inputs and outputs of the Bloom Energy fuel cells? How do the outputs affect the local environment, especially air quality? * If given an permit approval, how will NMED monitor the project and what will happen if the project goes out of compliance? I urge the New Mexico Environment Departmentto conduct and publish further detailed evaluation of Project Jupiter before permits are awarded. Sincerely, James Wolcott	1	Mirrored Document	No				Yes	Yes	Yes			Yes					8/27/2026
Alexis	Muniz	This is going to cause water shortage to many farmers	1	Mirrored Document	No			Yes	Yes	Yes		Yes							8/27/2026
Greg	Hughes	I am writing to express my opposition for Project Jupiter, which I believe offers significant harm for our community. Our energy and water resources will be impacted and our roads and other infrastructure as well. Our police and emergency services will be impacted as well. Project Jupiter is poised to bring substantial economic growth and all its problems to Dona Ana County. It is anticipated to create 4,000 temporary construction jobs and 1,000 project-supported temporary and/or outside jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $5 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. And why would they do all this if shess not going to be harmful to our county and homes and mostly rural way of life?? I urge the New Mexico Environment Departmentto not approve this energy and water hog unnecessary project. Sincerely, Gregory M. Hughes	1	Mirrored Document	No			Yes	Yes	Yes									8/27/2026

		I write to express Kiewit's support for Project Jupiter and encourage the New Mexico Environment Department (NMED) to approve the proposed air permit for this important project. Project Jupiter represents a significant investment in Doña Ana County that will create jobs, strengthen infrastructure, and deliver lasting community benefits. The project is expected to create approximately 4,000 construction jobs and support an estimated 1,300 ongoing jobs with prioritization on local hiring. According to public announcements, the project also includes a commitment of $360 million in direct support for schools, infrastructure and local services; $50 million to repair, upgrade and improve local water systems; and $5.4 million in additional community investments. Stated focus areas for such investments include workforce development initiatives, clean drinking water, habitat restoration, and targeted support for both the Boys & Girls Club of Las Cruces and the Doña Ana Community College. With the recent determination that the project intends to utilize Bloom Energy fuel cells to fully power the data center campus, a significant reduction in nitrogen oxide emissions is now expected compared to the original project design. In addition, because the project will generate power on site rather than relying on the local electrical grid, it should have no impact on local electricity rates or broader grid stability. Project Jupiter represents a meaningful opportunity to support economic growth, workforce development, and long-term investment in Doña Ana County. Kiewit respectfully encourages NMED to approve the proposed air permit and help advance this important project.																	
Michael	Martinez	Concerned about impact on ground levels given the restrictions to river water already. Because of the data center	1	Mirend Document No										Yes	Yes	Yes		Yes	8/27/2026
Aiden	Castillo	I have concerns about the water usage	1	Mirend Document No										Yes		Yes			8/27/2026
Mike	Ross	I am writing to say that I think Project Jupiter has the potential to bring good things to New Mexico, but I am concerned about the usage of natural gases and fossil fuels. I know the new energy cells that are going to be implemented lower the emissions, but is there anything that can lower it even further? Sincerely, Mike Ross	1	Mirend Document No										Yes					8/27/2026
David	Brown	Please do not grant permission for any part of this project to go any further. This project is predicted to create as much pollution as Albuquerque and Las Cruces combined. Along with the water this project is scheduled to use, we're looking at an ecological disaster. Corporate leadership has already stated that the AI industry is more important than humanity itself. We are coming to a turning point in human history. Please choose humanity over corporate profit.	1	Mirend Document No										Yes					8/27/2026
Viktoria	Avaliotis	Hello, I moved to New Mexico from the East Coast because I fell in love with the culture and natural beauty of this land. It would be a great disservice to this state to allow a data center to be built here and pollute the magical land of enchantment. This land belongs to the native tribes and are sacred to the culture here. It is not just to destroy this. Sincerely, Viktoria Avaliotis	1	Mirend Document No										Yes		Yes			8/27/2026
Maeve	Kilroy	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community as opposed to alternative data projects. I have strong concerns about sound and environment pollution and I would support this project, only if mitigation measures are done to prevent the sound impacts on local communities and wildlife Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,300 project-supported jobs. Furthermore, Project Jupiter has committed $360 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $5.4 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project, with addressed concerns to local communities. Sincerely, Maeve Kilroy	1	Mirend Document No									No	Oooooo Non-Substantive					8/27/2026
3864230pha se	Luchini	I absolutely do not support this project. The people behind this do not truly care what the community wants. They are using methods to get their way without regard for what people want and need. Seems like they want to use water to coop their machines. There are alternatives that dont use water. They just care about profit and even the cheap alternative which passes the long-term cost on to us. I urge the New Mexico Environment Department to not approve this important project. Sincerely, 3864xxxphone luchini	1	Mirend Document No										Yes		Yes			8/27/2026
Mary	Schwartz	I am writing to express my opposition for Project Jupiter, which I believe offers significant benefits for our community. We dont have the water and electricity. I urge the New Mexico Environment Department to oppose this awful project. Sincerely, Mary Schwartz	1	Mirend Document No										Yes		Yes			8/27/2026
Ilse	Tolentino	I am writing to express my opposition to project Jupiter. The media famine is experiencing water shortages and our community is in a drought prone area. Projects like these will increase water run off, increase noise not suitable for nature and increase temperatures in our area. It will desertate our community no matter how much money it puts in the pockets of people in power it will only hurtthe working class Sincerely Ilse Tolentino	1	Mirend Document No										Yes		Yes		Yes	8/27/2026
Nick	Richardson	Too much water usage for this region.	1	Mirend Document No										Yes				Yes	8/27/2026
Tony	Lara	It's a very bad idea it's too much water being used already I'm a farmer I need my water I urge the New Mexico Environment Department to approve this important project. Sincerely, Tony Lara	1	Mirend Document No										Yes					8/27/2026
Leonard	Romero	On the flip side? Where are you going to retrieve the water from? How much will you use daily? Weekly monthly, yearly?The under ground water table? Rio Grande? The millions you are paying for construction? Helping schools? Jobs? How many. The reduction needed to be hired? What happens after construction? 4000 jobs gone? $360million for schools? Every year? Or spread out over 40 years? What will the cost be to run yearly? How are you going produce your own power? The water issue is the most important question!!! In the state voting on this opportunity?! really do hope they deny you. You should try overseas in the rainy part of the world.????? How will you repair? Upgrade? Improve our vital water infrastructure?? What resources are you offering for schools? Services programs? Please respond? Convince me that it's good for new Mexico? I want the positive& negative impact. Don't bull shold me with a sales pitch or political shit. Be transparent. Sincerely, Leonard Romero Leonard R	1	Mirend Document No										Yes		Yes			8/27/2026
Phillip	Himel	To NMED public comment recording Staff... I live in Southern New Mexico, I realize this project looks like may appear as an economic godsend... But I believe the scale of the project is out of proportion to the available resources of the region. Land area is abundant...but that is not critical to its long term human community needs such as water. Water is key for the city and towns for dwelling and agriculture purposes... We can't eat data center product. I believe more study is needed... I believe that outside corporations promising outcomes benefitting the existing communities that can "too good to be true" are likely to be less than fulfilling of those promises... There is the possible increase of greenhouse gases and heat island effects that are equivalent to 3 new Mexico cities combined... That effects us regionally, and globally... All this investment, and Roswell can't get airline flight service to more than Dallas...we need new energy production and Transportation paradigm shift... Not data centers.	1	Mirend Document No										Yes		Yes			8/27/2026
Miller	Devenney	They're already out enough water. We live in a desert.	1	Mirend Document No										Yes	Yes	Yes			8/27/2026
Greggory	Chavez	I have concerns about the development in the area and getting enough information out about whats actually happening. I would like to see some real numbers.	1	Mirend Document No										Yes					8/27/2026
Jennifer	Thompson	I don't want this data center and no one who lives here wants this shit. Fuck Otero, fuck your AI fascist surveillance state, and fuck the corrupt, crooked bastard motherfuckers who, in secret and behind closed doors, agreed to this. Yeah, let's put a data center in an economically depressed desert area, where water is already a scare and vital resource, so the local populace has no water and sees their utility bills exponentially increase to pay for the massive power usage this data center will need. Fuck all this AI bullshit. No more data centers and let's shut down the ones already operating. People over profits.	1	Mirend Document No									Yes					Yes	8/27/2026
Sandy	Dunaway	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,300 project-supported jobs. Furthermore, Project Jupiter has committed $360 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $5.4 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I think an honest attempt has been made to satisfy environmental concerns and with that in mind, I will support economic growth in this capacity. The caveat is that if this good faith attempt is not real or backed out of, I will retrieve my support. I urge the New Mexico Environment Department to approve this important project. Sincerely, Sandy Dunaway	1	Mirend Document No										Yes					8/27/2026
Adam	Harb	I do not support any aspect of Project Jupiter. It has been forced upon this citizenry by authorities who have been bought out, it sacrifices our incredibly fragile water system for no benefit to the citizens of New Mexico, if allowed to continue, the project will lead to ozone pollution, environmental devastation, exploitation of our state's dwindling water resources, and an insult to our people. I reject fully the project's lies that it can create any significant amount of jobs, even if it could, this is labor that collectively harms the health of our state and its citizenry. I will continue to be vocal against the project, I will continue to refuse any political support to candidates that let this project continue, and I will continue to publicly shame both its deceitful and deceived advocates.	1	Mirend Document No										Yes		Yes			8/27/2026
Samuel	Sustaita	I would be willing to support Project Jupiter if they commit to using recycled undrinkable water in order to cool their systems Samuel	1	Mirend Document No										Yes	Yes	Yes			8/27/2026
Bob	Guzonski	Overall I think we need to be looking into AI but the pace for this project is moving to quickly, and its not being totally open to the community, we need to slow down to make sure we dont make a mess of the environment. Sincerely, Bob G	1	Mirend Document No										Yes					8/27/2026

Max	Velazquez	To the New Mexico Environmental Improvement Board – Project Jupiter is exactly the kind of investment that can help diversify New Mexico's economy while creating quality employment opportunities. Communities benefit when projects generate work for local contractors, expand opportunities for skilled trades, and encourage additional private investment. I believe Southern New Mexico is well positioned for this project and respectfully support approval of the requested air quality permit.	1	Yes													
Tony	Brown	Mirrored Document I am writing to express my disapproval for Project Jupiter, which I believe offers significant challenges and difficulties for our community. Project Jupiter uses water we dont have, cause hearing and body ache from the constant humming of the equipment and the blight on the beautiful desert landscaping. I urge the New Mexico Environment Departments to deny this project. Sincerely Tony Alan Brown	1	No							Yes	Yes	Yes				8/27/2026
Steven	Foldy	Mirrored Document Would like to see how big the project is going to be and had concerns about the water usage and wants it to be explained easier to dumb it down so it's easier to understand. More explanation on how the water usage is going to be used and where are they getting it exactly from	1	No							Yes	Yes					8/27/2026
John	Smith	Mirrored Document I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. How much green houses is this going to make in km I urge the New Mexico Environment Departments to approve this important message Sincerely, John Smith	1	No							Yes						8/27/2026
Nathan	Holden	Mirrored Document It would be cool if the data center provided some kind of community facing services like being a VPN provider. I always have to create a VPN in Denver or Dallas, but it would be cool if I could create servers in Albuquerque. There are expensive providers here but nothing truly self-service and with good pricing like vultr. The providers here make you submit a contact form. Sincerely, Nathan	1	No						No	Oooose Non-Substantive		Yes				8/27/2026
John	Kitzinger	Mirrored Document I am writing to express my support for Project Jupiter - If AND ONLY IF -it can produce it's own electricity without producing tons of greenhouse gases. As I understand it, the current plan is to use Bloom Energy fuel cells. However, these still output a substantial, albeit lower, amount of carbon dioxide - one of the major greenhouse gases. I believe the project can do better than that. Sincerely, John Kitzinger	1	No						No	Non-Substantive						8/27/2026
Taj	Holliday	Mirrored Document I oppose this permit. Data centers around the US have been erected with promises of local economic growth, but every such project has not only failed to meet its promises, but actively harmed nearby communities. Water & electricity bill prices increase for the vast demands of data centers, nearby residents are forced to suffer through harmful air and sonic pollution, and all New Mexico gains are a few jobs which are given to non-locals. Furthermore, as has been demonstrated innumerably many times by now, the profits of Project Jupiter will most certainly be passed down to billionaires who will never step foot in New Mexico. It's also telling that the people behind Project Jupiter have opted to spend large sums of money on advertising and dirty tricks. By now it is well documented that those behind Project Jupiter have forged unaware people's names onto letters of support, and this is on top of incessant commercials and canvassing campaigns. It's clear that they are trying to manufacture consent on this project against the interests of the citizens of New Mexico. Recently I've also noticed that many (at least here, perhaps hundreds or thousands) comments submitted to this permit are word-for-word identical, which should at the very least cause some suspicion. In all, I believe this project and its organizers are staunchly against the best interests of New Mexico, and are doing all they can to pass this permit knowing that it is designed to violently extract profit from our	Mirrored Document								Yes		Yes		Yes		8/27/2026
Deana	Hite	As a resident of Dona Ana county, I emphatically disagree with the approval of this construction. Please do NOT allow this to ruin our local air. Keep in mind that NM is prone to winds that can bring smoke all around the state. These emissions will not be irrelevant to that! This is a hazard to all of us in the area and I do not approve. There is no benefit to this construction that will ever escape the hurt we have done to our area if this is allowed to be built.	1	No							Yes		Yes		Yes		8/27/2026
Erica	Davis	Mirrored Document I have concerns about the ecological impact on a fragile environment. While it's encouraging to hear some of the proposed changes, I'd like to hear reassurances from an independent source. Sincerely,	1	No							Yes						8/27/2026
Matt	Early	Mirrored Document I do not support any AI data centers being built. There is no way they will not drain our electricity or our water. AI does very little for Joe Citizen and gives money to the rich. Why would they even want to put computers that run hot in a desert where it will be hard to keep said computers cool enough to continue operation? Everything about AI smells of desperation and manipulation. If this isn't a giant Ponzi scheme then why would they want to put a bunch of computers in the desert?	1	No									Yes				8/27/2026
Mark	Brunette	Mirrored Document I don't believe we have the water to do that if they want to build they need to build a desalination plant as part of their construction I urge the New Mexico Environment Departments to not approve this important project. Sincerely, Mark Brunette	1	No							Yes			Yes			8/27/2026
Alfonso	Martinez	Mirrored Document Dear Environmental Improvement Board Members, IBEW local 611 represents thousands of skilled electrical workers across New Mexico and has a long history of training and supporting workers in utilities, construction, telecommunications, broadcasting, and manufacturing. Through our apprenticeship training program, we ensure that members are equipped with the critical skills needed for modern construction and infrastructure work. I am writing to express IBEW Local 611's support for the air quality permits submitted by Yucca Growth Infrastructure, LLC for Project Jupiter in Dona Ana County. Major infrastructure projects such as Project Jupiter are a critical piece of strengthening job opportunities for union tradespeople and stimulating our statewide economy. Large-scale development projects, especially those involving complex facilities and advanced infrastructure, require the talents of a well-trained, safety-focused union workforce. These are the skilled workers who build and install critical systems and ensure that every element of construction meets rigorous standards of safety and quality. Project Jupiter's potential to create sustained demand for this skilled workforce translates to meaningful career opportunities for New Mexicans, with family-supporting wages and long-term benefits including healthcare and retirement. IBEW Local 611's core value is excellence. Our commitment to the highest standards in the electrical industry is unwavering. We ensure superior workmanship, promote safety, professionalism, and excellence on every job. To that end, IBEW invests heavily in apprenticeship and training programs to prepare workers for this kind of work. We believe that building well-planned, responsibly executed projects contributes to both economic and community strength. When projects move forward with clear regulatory compliance and best-available technologies, it reinforces confidence among workers, contractors, and the broader building trades community. In the near-term, Project Jupiter is creating jobs and in contributing to workforce growth. Another indirect benefit is that this project demonstrates to other developers that New Mexico is a viable place to invest in large, technically demanding facilities. Responsible permitting coupled with strong labor participation helps ensure that economic growth translates into long-term opportunities for local workers, their families, and our communities. For these reasons, IBEW Local 611 supports the approval of Project Jupiter's application for an air quality permit. We appreciate the Environmental Improvement Board's service and careful evaluation of this important matter.	2	Yes							Yes		Yes				8/27/2026
Luis Antonio	Lira	Mirrored Document Dear Members of the Board, Thank you for considering public comments regarding Project Jupiter. This project represents more than a single investment - it reflects confidence in New Mexico's workforce, businesses, and communities. Investments of this size create opportunities across many sectors of the economy while helping position our state for future growth. I respectfully encourage approval of the project's air quality permits. Luis Antonio Lira	2	Yes							Yes	Yes	Yes				8/27/2026
James	Cormier	Mirrored Document Water consumption estimates provided by Oracle must be verified by an external agent. Sincerely, James Cormier	1	No							Yes						8/27/2026
Grant	Schaffele	Mirrored Document I find myself opposed to the AI Datacenter projects within New Mexico as the actual use of AI may not be sufficient across the community population. Aside from the jobs created to manage and create the Datacenter, I find that this will create diminishing returns on actual benefit the NM population will experience, compared to the revenue it will generate for larger companies which do not truly integrate and support these communities. I find that unless there is a significant way to promote the well-being of New Mexicans in environmental and economic factors, which I doubt considering the history of other AI data centers, my opinion will not change. Our community needs to come first in the short and long term and this is an unsustainable practice Sincerely,	1	No							Yes						8/27/2026
Claire	Shuky	Mirrored Document I do not believe the Project Jupiter outcomes serve the population in such a severe drought. Though they promise jobs, limited jobs will actually be produced for the average New Mexican rather than big tech Sincerely, Claire Shuky	1	No						No	Oooose Non-Substantive		Yes				8/27/2026
Tasia	Smithgee	Mirrored Document The trust and accountability really comes into question when a private subsidy wants to built a data center here. The initial water usage plan was excessive and now that they received public backlash, they say it won't take that much water and have come up with a recycling plan. I don't really have faith in that since that wasn't the initial plan in the first place. Who can say that won't change in the future? Sincerely, Tasia	1	No							Yes						8/27/2026
Gus	Gonzalez	Mirrored Document I have heard they use a lot of water and am skeptical of the cost to environment. Hopefully they do what they say they will do as far as the improvements to their plans.	1	No							Yes						8/27/2026
Elizabeth	Leung	Mirrored Document As a New Mexico resident, I am strongly opposed to this permit. I am opposed to letting data centers and out of state projects companies use precious NM environmental resources and am concerned by the environmental impacts on our state's residents. I am also troubled by the aggressive and manipulative advertising tactics that Project Jupiter has been using in association with this permit and am asking that the	1	No							Yes	Yes					8/27/2026
Ken	Faulkner	Mirrored Document Please do not build it here the water issue here we live in a water deprived area think I urge the New Mexico Environment Departments to not approve this important project. Sincerely, Ken Faulkner	1	No						No			Yes				8/27/2026
Vanessa	Peele	Mirrored Document Please visit this permit and the potential damages to the land and to the people who will disastrously be impacted by this decision. Please extend this another 60 days while revisiting.	1	No							Yes	Yes					8/27/2026
KC	Washburn	Mirrored Document I am writing to express my opposition for Project Jupiter, which I believe offers nothing but strife and destruction for the community. Project Jupiter is poised to bring substantial resource decline to Doña Ana County. It is anticipated to use entirely too much water in a community and biome that is already in severe drought, which would be made worse by diverting our already precious river and water tables to this unnecessary, undesired, backfilled-rent project, that no one that I know personally is in support of. I urge the New Mexico Environment Departments to decline this project, and to shelve this conversation all-in-unison. We cannot drink data, and we cannot give up our beautiful natural landscape for this project, regardless of whatever promises the project promises. Economics are not more important than land and money will only corrupt and destroy our home. Please, act and vote with integrity. Preserve our home, keep the land, air, and water clean. Our future cannot support this gross demolition of the southwest for greed. We will vote out any that support this heinous misallocation of trust. Sincerely, KC Washburn	1	No								Yes			Yes		8/27/2026

Joe	Remacle	I am writing to express my opposition to Project Jupiter. The environmental impact and water usage and it's impact have not been adequately explored. Sincerely, Joe Remacle	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026	
Elizabeth	Bennett	Hello NM Environmental Department. I am writing to express my extreme concern with which the matter of Project Jupiter power supply has been handled. My primary concern is that there has been no environmental impact study done on the potential harm of the fuel cell technology, which as I understand will be the largest fuel cell operation to date. I would rather not suffer the consequences of such a grand experiement especially without any forewarning of how we may be impacted. I also understand the fuel cell technology emits large quantities of CO2 which we are all aware is an air pollutant contributing to the dramatic propulsion of climate change. It is so irresponsible to allow major corporations to circumvent data driven environmental regulation. It is also my understanding that Project Jupiter parent company Oracle has spend loads of money trying to influence public opinion, including hiring canvassers who have been documented filing false comments on behalf of individuals without their knowledge. This is a clear manipulation of the process that this body should investigate. Please uphold your duty as a department charged with the protection of our environment.	1	Merged Document	No	[redacted]				Yes	Yes		Yes			8/17/2026	
Derek	Branch	I am very concerned about the water usage of Project Jupiter, and would not want it built in New Mexico	1	Merged Document	No	[redacted]			Yes							8/17/2026	
Gus	Gonzalez	Long-term I believe itll be more detrimental to the state that it would be beneficial. But I think its great that its bringing jobs to the state. I just dont know if its gonna be beneficial to the environment. Rey Magana	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive			Yes					8/17/2026	
John	Morris	I am writing to express my deepest non-support for Project Jupiter, which I believe offers no significant benefits for our community. Project Jupiter is poised to bring nothing but wasted aquifer, promises of jobs that are unrealistic, $50 million to never help any of us to help repair anything, $360 million in direct support for schools, infrastructure, and local services that none of us will ever see, and an empty promise of $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration? What a crock. This is all a LIE. Shame on all of you. I urge the New Mexico Environment Department to fight against this heat sink that will bring air, water, heat and noise pollution on a grand scale to our already fragile desert ecosystem. NO ONE WANTS THIS HERE. Sincerely, John Morris	1	Merged Document	No	[redacted]			Yes		Yes		Yes			8/17/2026	
ELIZABETH	Thomson	I am writing to express my disgust for Project Jupiter. It would be a tragedy for New Mexico if this is approved. They lied in their original statement and continue to lie. Our beautiful New Mexico skies and land will be damaged. The extravagant water use is unthinkable. We are in a severe drought, with scientific experts warning it will only worsen. The Oglala aquifer is being depleted. We cant use data to quench our thirst, hydrate our domestic or wild animals and birds, or grow food. I urge the New Mexico Environment Department to kill this travesty!	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026	
Ethan	Campbell	Good afternoon, My name is Ethan Campbell, I wasborn andraised here in Dona Ana County. I am writing to you today to ask that you please stop building, cancel your contracts, and relocate your operation somewhere outside of New Mexico. I largely feel that Project Jupiter was not put up for public vote and was approved by a board of county commissioners who didn't factor in the best interests of the people who actually live here. I did not ask for generative AI, I didn't ask for tech companies to control themajority of wealth and power in the United States, I didn't ask for a datacenter to be built, and most importantly I did not vote for it. I never got a say,I contacted thecounty commissioners and they went ahead with the plan anyway. I have lived here my entire life, and I think you probably looked at New Mexico, but more specifically southern New Mexico as a wide open space ready for development. It is not. We are a simplepeople, who have been here forliterally 21,000 years. This state is a beautiful ecological marvel,you know thewhole "Land of Enchantment" thing. I understand that the federal government has tested bombs here, flown experimental aircraft here, and stored nuclear waste here. But those decisions will leave behind long lasting effects that people in my community will not fully understand in our lifetimes. You know somewhere in the back of your head that your data center will do the same. Please take a second and consider that you are trading short term profits for my home, and nobody asked me. Money isn't worth a thing if there is nothing left to buy. It is not too late to do the right thing! Please cancel what is in place and go somewhere else. Sincerely, Ethan Campbell	1	Merged Document	No	[redacted]					Yes	Yes				8/17/2026	
Tommy	Melendrez	My concerns and thoughts about is just further educating the community. Regarding how the environmental concerns will be addressed.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive			Yes					8/17/2026	
Glenn	Landers	I am writing to express my opposition to Project Jupiter, which I believe offers no significant benefits to our community. Project Jupiter will not bring substantial economic growth to Doña Ana County. and will deplete vital water supplies. Claims that Jupiter will provide $360 million in direct support for schools, infrastructure, and local services, and $6.9 million to fund workforce development initiatives have absolutely nothing to do with the air permit, even if they are to be believed. The project will emit tons of harmful air pollutants and 10 million tons of greenhouse gases each year. It need to be stopped I urge the New Mexico Environment Department to disapprove this permit. I also urge NMED to hold a public hearing on this -application because of the great public interest. Sincerely, Glenn Landers	1	Merged Document	No	[redacted]			Yes	Yes	Yes				Yes	8/17/2026	
Henry	Lenry	The Rio Grande is dying out. The water that has sustained our people, our cultures, the wildlife that has lives and should live for thousands of years is dying out. The world that our children, grandchildren and whatever descendants we may have is going to be nothing but a dry, barren wasteland of sand and bones. And for what? So people that have never seen a day in our lives can spend resources that they would never have to touch otherwise had it not been to make a profit? This was the warmest winter we have ever had in our lifetimes. Temperatures hardly reached below 40 when just a few years back we would spend at least a week in the low 20s. Not to mention the rampant lies, and how they refuse to allow anyone who openly opposes them in the room. Lying about the hours of their meetings. Purposefully leaving pages of information blank so that way they "technically" don't have data on how harmful their data center will be. But the public already knows. We understand that a location using 20,000 gallons of water was a problem when we all struggle to have water in the first place. But one million gallons of water? Anyone would view that as an attempt at mass extinction of the local population. Now, I've already made this too long, but there is one more thing I would like to add. In one of the meetings, the team behind project Jupiter openly admitted to using part of their 165 million dollars to bribe the people in charge of keeping New Mexico safe. They said they would return with the numbers of how much they used to bribe the government of New Mexico. They have not returned with those numbers.	1	Merged Document	No	[redacted]			Yes						Yes	8/17/2026	
Stay	Out	Project Jupiters unwillingness to cooperate or even communicate with the community its extracting from is bad business and shows the lack of respect they have for us. Even before the building is up, they dont have majority NM construction workers on site. Going on site youll see rows and rows of TX plates. What about the emergency well that had to be dug? What other emergencies will come up??? Project Jupiter is shady and its tenants have long time records of stating that their drive is profit. Get the hell out of our community.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive								8/17/2026	
Mark	Mercer	I am writing to express my extreme opposition for Project Jupiter, which will be detrimental for our community as a whole. Project Jupiter is poised to bring noise pollution, huge increases in energy costs, all while it poisons the air, soil, and water in Doña Ana County and El Paso, TX. It is going to create severe economiic hardship as El Paso Electric is proposing raising our residential utility rates by 50%. Furthermore, the talking points that Project Jupiter will: * $50 million to help repair, upgrade, and improve local water systems; * $360 million in direct support for schools, infrastructure, and local services; * $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. ...is ridiculous corporate propaganda that no one with a shred of intelligence believes. The only people who want this data center are the corrupt billionaire oligarch ruling class. In every single location where there is a data center, there have been immense, adverse financial costs to the community and harmful environmental impacts which cannot and should not be ignored. The notion that Project Jupiter is somehow different, benign, and will improve Dona Ana County and nearby El Paso, TX is utter fantasy and nonsense. I urge the New Mexico Environment Department to terminate and cancel this abomination because it will only bring harm and ruin to our area. Sincerely, Mark Mercer Las Cruces, NM	1	Merged Document	No	[redacted]			Yes		Yes		Yes			8/17/2026	
Manny	Sanchez	To the Members of the Board: As Chairman of the Doña Ana County Board of Commissioners, I am writing to express my strong support for Project Jupiter. This project represents a significant opportunity to strengthen our local economy, expand career opportunities, and invest in critical community infrastructure. Having grown up in Anthony, New Mexico, and El Paso, Texas—the Borderlands I proudly call home—I understand firsthand the challenge of finding high-paying, career-oriented employment in our region. With the support of my family, I earned admission to the Massachusetts Institute of Technology to study Mechanical Engineering. After graduation, however, I was unable to find opportunities in my field close to home and spent more than a decade away before returning to Doña Ana County. For the past seven years, I have proudly represented District 5 on the County Commission. Throughout that time, I have worked to create opportunities that allow future generations to build successful careers and raise their families here, rather than being forced to leave in search of opportunity. Project Jupiter advances that goal. Project Jupiter will create high-quality jobs to support both the data center and its associated power infrastructure. It will also deliver substantial community investments, including approximately $360 million over 30 years through Payments in Lieu of Taxes (PILOTs), $50 million for repairs and upgrades to local water systems, and $6.9 million in direct support for schools, public services, and infrastructure. These benefits do not include the gross receipts tax revenues expected during construction or the additional economic activity generated for local businesses. At a time when economic growth is slowing across New Mexico, Project Jupiter provides Doña Ana County with an opportunity to strengthen its economic future. Doña Ana County Government • 845 N. Motel Blvd., Las Cruces, NM 88007 • (575) 647-7200 After reviewing the proposal before the Board, I am encouraged by the project's evolution and the environmental improvements incorporated into the current plan. Our region has experienced challenges related to ozone and particulate matter, and the transition from gas turbines to fuel	2	Merged Document	Yes	[redacted]			Yes	Yes	Yes					8/17/2026	Dona Ana County Chairman's comments
Yvonne	Carr	I just want to know if you will make CRRUA provide clean water for the community because so far, we are getting killed slowly with arsenic in the water along with other poisons amd chemicals.	1	Merged Document	No	[redacted]			Yes					Yes		8/17/2026	
Cameron	Murphy	New Mexico Environment Department Air Quality Bureau – Permitting Section Re: Yucca Growth Infrastructure, LLC (YGI) Microgrid Air Quality Construction Permit Application I am submitting this comment as a New Mexico resident in opposition to the air quality construction permit application filed by Yucca Growth Infrastructure, LLC to power the Project Jupiter data center campus in Doña Ana County. This application replaces YGI's prior proposal for gas-fired turbines with solid oxide fuel cells. While the fuel cell proposal is projected to reduce emissions from the original plan's roughly 14 million tons of greenhouse gases per year, the revised figure of approximately 10.1 million tons annually still exceeds the combined greenhouse gas emissions of Albuquerque, Las Cruces, and Santa Fe. This is not a solution to the project's climate impact. It is a smaller version of the same problem. The fuel cell technology proposed here is commercially established at smaller scale, but this project would deploy it at 2.45 gigawatts, a scale with no precedent anywhere in the world. NMED should not treat manufacturer claims about performance at this unprecedented scale as a substitute for independently verified data. While water discharge falls outside the Air Quality Bureau's authority, NMED as an agency should take note of a directly relevant precedent. Earlier this year, Cheyenne, Wyoming's Board of Public Utilities suspended acceptance of industrial wastewater from a Meta data center campus after a rare bacterium, traced to the facility's closed-loop server cooling fill-and-flush process, disrupted two municipal water reclamation plants and forced the reuse system offline for months. Bloom Energy's fuel cells do not require water for cooling, but the data center's own server infrastructure will, regardless of how its electricity is generated. I ask that NMED's Ground Water Quality Bureau be made aware of this application and the Cheyenne precedent, and that the department coordinate internally to ensure this risk is assessed before construction, not after a comparable incident occurs in Doña Ana County. Doña Ana County already carries a disproportionate share of New Mexico's air pollution burden. The area around this project fails to meet federal air quality standards, and residents in Sunland Park and Santa Teresa already live with the health consequences of nearby extractive and industrial activity. Adding a facility of this scale to that same airshed, without a full environmental review, compounds an existing injustice rather than correcting it. I ask NMED to: 1. Deny this permit application as submitted.	2	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026	
David	Wren	I am writing to express my disdain for Project Jupiter, which I believe offers ZERO benefits for our community and will in fact wreak havoc on our existing infrastructure and fragile wildlife environment, not to mention potential health problems and the already strained water resources. Project Jupiter is based on the same misinformation used by other Data Center proposals. These centers have already caused many irreversible disasters wherever they have been implimented. I urge those backing this fiasco to read and research the factual information AGAINST these centers and indeed to question the NEED for them. The United States already has more Data Centers than any other country. Why further endanger our wildlife, environmental resources and personal health with yet ANOTHER SURVEILLANCE FACILITY, while they are being SHUT DOWN nationwide? I also urge the New Mexico Environment Department to DISAPPROVE this potentially disasterous project, dangerous to our environment, our wildlife habitat and water resources AND, the latest concern, PERSONAL HEALTH ISSUES for those being exposed to the detrimental by-products of this harmful environment. Thank you in advance for seeing how harmful this project WILL BE for Dona Ana County and New Mexico and halting plans to continue this problem-causing undertaking. Sincerely, David E. Wren	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026	

Rita	Zevallos	Although the data center has committed not to use potable drinking water, it is still using water that is necessary for the survival of the ecosystem that our independence relies on. The Rio Grande River ran entirely dry last year, with dead fish in the riverbank. It is very low this year already (July 2026). The river sustains a structural part of the ecosystem (if you visit you will see) as well as provides sustainable independence for small farms and ranches especially in the reservations, we are talking about nonpotable water here, drinking water is not the only concern, ...obviously..... Comparing the water usage to the water usage of 9 households seems logical on the surface, but is not actually comparable because human households and humans living also participate in the water cycle (returning), and data centers do not. This comparison also serves to make it sound like it is not that much being siphoned, but you really don't know how much siphoning is critical when we are talking about a desert.	1	No	Merged Document	[redacted]	Yes		Yes					8/17/2026
Jane	Himes	Ai centers need to be in places with lots of water and a cold climate like North Dakota or some where near the Mississippi River, or the north pole or artic	1	No	Merged Document		Yes							8/17/2026
Nicholas	Danford	I'm worried about the environmental impact of the data centers. The possible adverse health effects of people in the direct area. The fact that they use more water than entire neighborhoods. The jobs are nice. But if there's no community in the area after a few years, then what was the point?	1	No	Merged Document		Yes		Yes					8/17/2026
JM	Comer	I am writing to express my absolute objection to Project Jupiter, which I believe poses significant and lasting threats to our community. While proponents point to short-term job creation, the reality is that Project Jupiter will place an unsustainable strain on Dona Ana Countys infrastructure, environment, and public resources. Furthermore, the financial packages being offeredincluding the promised funds for schools, infrastructure, and local organizations like the Boys and Girls Clubare nothing more than corporate buy-offs designed to mask the permanent damage this project will inflict. No amount of funding can compensate for the massive depletion and endangerment of our precious local water systems and natural habitats. Our community's future and our natural resources are not for sale. We do not need Project Jupiter, and we do not want it here in New Mexico. Sincerely, JM	1	No	Merged Document		Yes		Yes					8/17/2026
Amy	Dickens	I have concerns about water usage. Water should be conserved	1	No	Merged Document		Yes							8/17/2026
Katrina	Fritz	The California Hydrogen Business Council submits these comments in support of the abovereferenced construction permit application and requests that the Department record our written interest in this matter pursuant to 20.2.72.206 NMAC. We write as a coalition of companies and experts who collectively bring decades of expertise and hands-on experience in stationary fuel cells and distributed generation technology deployment. Solid-oxide fuel cell ("SOFC") technology is extensively tested, independently certified, and deployed at commercial scale in multiple regions, with emission characteristics substantially lower emissions from combustion-based generation. Based on the public record and widely available technical information for this class of technology, the application appears to provide data relevant to the findings the Department must evaluate under applicable requirements. The project is expected to supply electricity to a critical load with lower associated air-quality impacts than the natural-gas turbines originally proposed for this site.1 I. Fuel cell systems are non-combustion, clean energy generation technology. II. Fuel cell systems are tested and independently certified. III. Fuel cells are among the oldest continuously developed electrochemical technologies. IV. The commercial platform proposed for this site has a seventeen-year operating record. V. Fuel cell technology is deployed at scale across the globe and proven to be resilient. VI. The project's emissions profile differs materially from the natural-gas combustion turbines originally proposed. VII. The record supports each of the required findings.	6	Yes	Merged Document			Yes	Yes		Yes			8/17/2026
Myra	Bernard	This project is still not being transparent in its new advertising push about the water usage and carbon emissions resulting from this data center. I am glad the development has taken initiative towards lowering its water and energy usage and its impacts on community resources, but there has still been no environmental impact assessment and intentional limits to transparency all throughout the process. People do not want these!!!! Stop pushing them on the public.	1	No	Merged Document		Yes	Yes	Yes				Yes	8/17/2026
Daniel	Hernandez	I am writing to express my ANNOYANCE and ANIMOSITY for Project Jupiter, I believe this project is disguised to offer significant benefits for our community, but in reality is just a cover up for our personal data being sold to open ai and oracle. Making only CEOs like Larry J Ellison and Sam Alton benefiting mainly from this, I dont stand for this ! Larry and Sam are both major donors to Israel, a genocidal state. Therefore I stand against Israel and I stand against Larry and Sam. Project Jupiter is poised to bring substantial economic growth to Dona Ana County but in reality this will just destroy the future of our habitat, native plants and animals. We the public do not CARE of the anticipated 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, We the public do not CARE that Project Jupiter wants to to commit $50 million to help repair, upgrade, and improve local water systems because in reality this still doesnt take away the fact this company will sell our personal data to a genocidal state. $360 million is a BRIBE and this isnt even remotely normal to do ! No matter if its intended to help the community it is still disguised as a bribe for the purpose that the community forgets the overall point that this data center will only work for the soul purpose to gather locals and more peoples personal data to send back to ceos like LARRY AND SAM . WHICH WE DO NOT CARE ABOUT !!! I urge the New Mexico Environment Department to DENY this project ! Sincerely, DANIEL ANTONIO HERNANDEZ	1	No	Merged Document		Yes		Yes					8/17/2026
Jonathan	Juarez	Dear New Mexico Environment Department, My name is Jonathan Juárez. I am 23 years old, a member of the Pueblo of Laguna, and a resident of Albuquerque. My family has called what is now New Mexico home for more than thirty generations. Over 50 years ago, my grandfather was forced to relocate our family from our ancestral village after uranium mining devastated the land where my family had lived in relationship with the land since time immemorial. That history is not separate from this permit. It is the reason I am writing today. For generations, New Mexican communities have been told that environmental destruction is the price of "progress." We have watched corporations extract from our land, poison our water, pollute our air, and leave our communities to bear the consequences while they reap the profits. Project Jupiter and AI resource grabs are simply the newest chapter in a long history of New Mexico being treated as a resource colony for the rest of the country. My family has already lived through the consequences of government choosing corporate promises over the health and well-being of our communities. We are still living with those consequences today. That history is why I urge the Department to evaluate this application with the highest possible level of scrutiny. The environmental impacts of this project are staggering. Public reporting and information provided by state officials indicate the project could require nearly one million gallons of water every single day at a time when New Mexico faces worsening drought, declining aquifers, and long-term water insecurity. Whether that water is classified as potable or non-potable does not change the reality that water is a finite resource in the Chihuahuan Desert. Every gallon diverted to power artificial intelligence is a gallon that cannot sustain our communities, our farmers, our acequias, our wildlife, and future generations of New Mexicans. The proposed pollution is equally alarming. Even under the revised permit application, Project Jupiter remains a massive fossil fuel-powered industrial development. The facility is expected to emit approximately 10 million tons of greenhouse gases every year, more than hundreds of thousands of homes in Albuquerque and Las Cruces combined, while continuing to release nitrogen oxides, carbon monoxide, volatile organic compounds and other pollutants that threaten public health. Bloom's fuel cells are still powered by natural gas. They are not "clean energy," regardless of how they are marketed. They continue to generate harmful air pollution while producing hazardous solid waste. Bloom Energy has previously been cited by the United States Environmental Protection Agency for illegally disposing of hazardous waste. NMED should require full disclosure of Bloom Energy's environmental	3	No	Merged Document		Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Dawn	Franco	Today I am documenting my public comment in opposition to project Jupiter. I am a local, Las Cruces resident. I am a New Mexican and my family has been here for years and generations. I completely oppose project Jupiter. Whether it's the water usage, pollution, lack of transparency, lack of accountability and misinformation, I am completely opposed. No data centers in Las Cruces, no data centers in Dona Ana County, no data centers in New Mexico. The economic opportunities are merely a front and the information has been manipulated. I don't believe that decent jobs will be created from project Jupiter. It has already been proven that AI is damaging the working class and that AI is slowly replacing the working class. I do not wish to have a data center that will further cause this harm in Dona Ana county, I do not want a data center that will further perpetuate this harm in Las Cruces. Everything about Project Jupiter, I absolutely oppose, especially the county and the commissioners with their NDA nonsense. I hope this project will be shut down, and I hope the Doña Ana County commissioners will be held to full accountability for their lack of transparency, and their behind-the-scenes deals. I also hope Meta will face accountability and some sort of repercussion for all the misinformation. Thank you I oppose project Jupiter, the end.	1	No	Merged Document		Yes		Yes				Yes	8/17/2026
Alex	Merchlinsky	The construction of an AI data center in our area will have a clear and tangible negative impact on water availability, air quality, noise pollution, and local ecosystems. While I recognize that sacrifices to these systems can be justified, I see no way in which this project will provide any real benefit to our local community, the country, or the world. Any financial investment in our area is, in my opinion, far outweighed by the reduction quality of life for people and wildlife, and the destruction of natural lands that similar projects have demonstrably caused wherever they are undertaken. Furthermore, this project is wildly unpopular within the local community, as I'm sure has already been made clear to city councillors and other local policymakers. These policymakers have an obligation to represent the interests of their constituents over corporate interests or their own financial gain. I strongly oppose any process that will allow this project to continue, and I hope that local officials will fulfill their duty of acting in the interests of the general public and prevent this project from being completed.	1	No	Merged Document		Yes	Yes	Yes		Yes			8/17/2026
Ricardo	Luna	I would like Project Jupiter to publish the jobs report they are legally required to file. How else can we track how many New Mexicans are working for Project Jupiter?	1	No	Merged Document					Yes				8/17/2026
Dave	anonymous	I support approval of the YGI Microgrid Air Quality Construction (Jupiter Project air permit), provided it meets all applicable state and federal air quality standards. The project has the potential to bring economic growth and jobs to the Las Cruces area while remaining subject to ongoing monitoring and compliance requirements that protect public health and the environment.	1	No	Merged Document			Yes	Yes					8/17/2026
Anonymous	Anonymous	I reside in Grants, NM, its near the main city, Albuquerque. If these data centers pop up we won't be able to adapt to these negative changes that Project Jupiter would have if they go along and develop Project Jupiter. They will bleed this desert dry, I am Navajo, I have family that live on the Navajo Nation that got effected by mining companies, they had no way of clean water and they still dont. They have to hall water from there local water tank. It's a big problem that elders in the reservation face. So I wouldn't want New Mexico to suffer from Project Jupiter from there selfishness to succeed in dominating the A.I. race. I would want to live in New Mexico with no problems. But sadly there is if the developers succeed in making Project Jupiter happen. I am still at a young age, I can speak for the future. I don't want these companies to destroy the land that I want to preserve. That my ancestors worked hard to preserve, but sadly your hurting the land we are supposed to cherish, I am Navajo I speak for my people when I say I don't want our land and people to suffer from these types of actions that are gonna effect our future. I hope that these people know whats right and whats wrong, but they don't. They wanna be greedy and destroy this land, that's beautiful just becauses theres empty land doesn't mean that you have to make a profit off of it. Project Jupiter needs to be stopped. To protect and persevere New Mexicans and the Indigenous people communities and to restore the environment thay we live in. I am young, I am apart of the future so I want New Mexico to have a better chance at staying the way it is healthy and thriving for the present and the future coming up. I don't want to have health risks for this new proposal of a fuel cell plant thats never been done. Its scary and frightening to be honest, if Project Jupiter builds up. But I am not gonna be a coward, I am gonna speak up for whats going on in my beloved state.	1	No	Merged Document		Yes		Yes		Yes			8/17/2026
Jacob	Evenson	Members of the Environmental Improvement Board, We submit these comments on behalf of Boilermakers Local 627 and Local 4 in support of the air quality permit applications filed by Acoma, LLC for Project Jupiter in Doña Ana County. Our organizations represent highly skilled union craftspeople who build, operate, and maintain critical infrastructure across the Southwest. Boilermakers are trained to the highest safety and technical standards, and our members have extensive experience constructing and servicing energy, industrial, and advanced infrastructure facilities that must operate safely, efficiently, and in full compliance with environmental regulations. From a labor perspective, Project Jupiter represents a substantial opportunity for working families in New Mexico and the broader region. Large-scale projects of this magnitude require a skilled, well-trained workforce capable of executing complex construction and long-term operational responsibilities. Project Jupiter's scope creates sustained demand for union labor, including welders, pipefitters, mechanics, and operators whose training emphasizes safety, precision, and environmental compliance. These are not temporary or speculative benefits, they are real jobs with real wages that support households, local businesses, and communities. Equally important is the role these projects play in sustaining apprenticeship and training programs. Projects like Project Jupiter provide the on-the-job training opportunities that allow apprentices to advance, gain certifications, and build lifelong careers in the trades. That pipeline is essential to meeting future workforce needs and ensuring that New Mexico has the skilled labor necessary to support both existing industries and emerging technologies. Our members also understand firsthand the importance of environmental responsibility. Union labor is deeply invested in doing work the right way, safely, responsibly, and in compliance with all applicable standards. Air quality permitting that is grounded in sound science and best-available control technologies ensures that facilities operate responsibly while allowing skilled workers to do their jobs. A clear, consistent permitting process benefits workers, communities, and regulators alike. Project Jupiter's design, including the use of advanced microgrid systems and modern emissions controls, reflects the type of infrastructure investment that aligns reliability, environmental performance, and workforce opportunity. Just as importantly, the project's independent power systems help avoid shifting costs onto local ratepayers, protecting the very communities where our members live and work. For union workers, certainty matters. When projects that meet regulatory requirements are allowed to move forward, it provides confidence that investment will translate into jobs, training, and long-term	2	Yes	Merged Document			Yes	Yes				Yes	8/17/2026
Sheryl	Mizicko	I do not support Project Jupiter, which offers no significant benefits for our community and which will destroy the minuscule resources we have such as the lack of water. I urge the New Mexico Environment Department to not approve this project just to make billionaires richer on the backs of the American people Sincerely, Sheryl Mizicko	1	No	Merged Document		Yes		Yes					8/17/2026
Damon	Mcginn	NO DATA CENTERS IN THE WATER-STARVED SOUTHWEST! What are we thinking? The development here is enough. Unless we find a way to get incoming population to bring water or pay into a fund to figure out how to bring water from their water-rich areas that people are moving from, the sliver of the seasonal rio grande will be gone. The aquifer too. I just drove past the amistad resivoir. That's real time evidence of why these data centers can NOT be built in the southwest.	1	No	Merged Document		Yes							8/17/2026
Lisa	Carlson	I'm a concerned citizen of Dona Ana County. We are in a water crisis and strongly feel that water should be used for food and humans.	1	No	Merged Document		Yes		Yes					8/17/2026
Dhyana	Martinez	Community members have been denied the fair opportunity to properly participate in the discussions. The air quality permit should be denied for the protection of New Mexico.	1	No	Merged Document			Yes						8/17/2026
Kyrie	Greathouse	I would be in support if an independent third party could prove the water claims and usage projections around the project to be accurate. I'm currently not in support because it sounds like a wish and not something with a basis in the reality of current water and energy usages for other data centers. Sincerely,	1	No	Merged Document		Yes							8/17/2026

Michelle	Vasquez	I don't want it here. Water usage. Power. Property taxes	1	No	[redacted]														
Jeremy	Salisbury	I am writing to express my concern and general opposition to Project Jupiter, as it is already in violation energy usage promises, has failed to be transparent in any dealings, is an economic gamble that will likely cost many resources while at best contributing a handful of jobs, and is backed by corporations that do not have New Mexico's best interests at heart. Sincerely, Jeremy Salisbury	Mirrored Document 1	No				Yes											8/27/2026
Sheila	Hatch	Some hesitations about what project Jupiter will do too our water, and putting a strain on our electrical grid, the environment in new Mexico is one of our precious resources and I would like them protected.	Mirrored Document 1	No		No	Oppose Non-Substantive												8/27/2026
Bailey	Hunt	Definitely wary of data centers in general. I have a strong moral issue with collecting data both actively and passively without individuals direct consent. Especially when used for AI and Machine Learning. Bailey Hunt	Mirrored Document 1	No				Yes		Yes									8/27/2026
Sheila	Hatch	Some hesitations about what project Jupiter will do too our water, and putting a strain on our electrical grid, the environment in new Mexico is one of our precious resources and I would like them protected.	[redacted] 1	No		[redacted]													
Charles	Freye	I am skeptical but if they have very controlled water use, no excessive noise, and they can provide their own power I am fine with it. Sincerely, Charles Freye	Mirrored Document 1	No				Yes		Yes									8/27/2026
Gary	Warren	I have some concerns about my farm,I've seen my water go down over many years, water is very valuable to our community	Mirrored Document 1	No				Yes				Yes							8/27/2026
Richard	Miller	I think that dependent on the application of data centers they can be useful for creating jobs, however if data centers store privacy data or utilize AI using personal information it can be problematic.	Mirrored Document 1	No				Yes											8/27/2026

Allan	Borges	I am writing to express my support for project Jupiter. I heard some good things about the closed loop system, but would want some more information about how exactly that will work and if there are other facilities that use this technology and how they have fared and how much of their water they have actually retrieved over the years. Sincerely, Allan Borges	Mirrored Document 1	No		No	Oppose Non-Substantive												8/27/2026
Abigail	Grasath	"My name is Abigail Grasath and I am a PhD candidate in the Biology Department at the University of New Mexico. I study the negative impacts that pollution has on an environment, particularly native plants and soil microbes, and how we can utilize bioremediation efforts to clean up contaminated sites. I know all too well the history New Mexico has with environmental pollution and how marginalized communities have been disproportionately affected. This has gone on for too long. People in New Mexico have been working for decades to clean up the contamination that has already occurred in this state. It disgusts me that there are actively companies to further extract, pollute, and damage our land, though is enough. Project Jupiter is not for the people, it is for the rich who see New Mexico as a throw away state to continue to over extract and pollute. The people of New Mexico do not want this. I have yet to come across any educated person who supports Project Jupiter. This initiative needs to be stopped. In support of everyone fighting to stop Project Jupiter, I have these simple asks: - The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. - The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. - If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. STOP PROJECT JUPITER NOW!"	Mirrored Document 1	No				Yes											8/27/2026
Duncan	McGraw	I am writing to express my opposition to Project Jupiter for many reasons. - The water required to cool the servers needs to be very pure, which is already in shortage here - Heat pump cooling systems don't require water to operate - The CO2 emissions are 30million metric tons, surpassing Albuquerque, Santa Fe and Las Cruces combined - At stress from artists and creatives to produce content - Doña Ana Co. county already has problems with accessing drinking water and environmental pollution. For these reasons, I cannot support this project.	Mirrored Document 1	No					Yes	Yes			Yes	Yes					8/27/2026
Joy	Stotts	The resources and water, etc. are already stretched thin and the area is already a dry area. On top of that the emissions are going to harm the area and wildlife.	Mirrored Document 1	No				Yes	Yes	Yes									8/27/2026
Max	Smith	I very strongly oppose the construction of the data center in Dona Ana County, which will have extremely negative environmental effects on the quality of air, water and soil. Such a data center will also drive up water and electricity costs for local communities, and worsen their health and quality of life, all for no good reason, as there will be no real value gained from this data center. Project Jupiter is horrendous, and to approve it shows a disgusting lack of concern for the lives of most people and the environment, especially in the Santa Teresa community. Do not approve the Air Quality Permits.	Mirrored Document 1	No				Yes		Yes									8/27/2026
Barbara	Wisoff	Please shut down permanently Project Jupiter. No for the air permit application because Project Jupiter would be climate disaster and have negative health impacts for nearby and far away communities. The wind blows pollutants and they settle in the ground and affect widespread areas. I am 69 years old and have asthma and particulate allergies. My toddler age grandchildren live in Albuquerque and I want them to have a future here to look forward to. Data centers don't belong in desert states. Our water supply would be stolen by any data center. Jupiter's false advertising and fraudulent comments in support of the project are criminal and evidence of their illegal behavior. They cannot be regulated and they don't belong here. The NM Sovereign Fund of over $73 Billion can well afford to prevent corporations from stealing our water, land and health.	Mirrored Document 1	No				Yes	Yes	Yes		Yes							8/27/2026
Theo	Keeley-LeClaire	I am strongly opposed to Yucca Growth's application for new air source permits in Doña Ana county, which is already in nonattainment for air quality issues. As a resident of Albuquerque, which received a grade of F from the American Lung Association for its air quality, I have experienced firsthand the effects of poor air quality on my health and those around me. Adding to a point source of this size to a community already struggling with poor air quality is irresponsible. Furthermore, Bloom Energy has never built a fuel cell plant even close to this size before - which significantly increases the risks that the facility will emit more pollution than anticipated. This risk, and the known risks posed by the various pollutants and the heat which will be emitted by the facility, are excessive. They should not be born by the people of Doña Ana County without their informed and explicit consent. It is time for us to stop green lighting individual facilities and start to consider the cumulative impacts of air pollution, water pollution, poverty, and heat stress on health. I know many people struggling with long term health impacts related to the air they have no choice but to breathe - Doña Ana county doesn't deserve this. No one does. Give the residents of Doña Ana county a real chance to weigh in on this application by extending the comment period and holding a public meeting in Santa Teresa. Better yet, deny the permit application and live up to NMED's duty to protect our health and the health of our environment.	Mirrored Document 1	No				Yes		Yes									8/27/2026
Angela	Sheridan	I am writing to express my concern for Project Jupiter, which I believe does not offer significant benefits for our community. I am strongly against any with ai. Due to security reasons and privacy concerns. I urge the New Mexico Environment Department to not approve this. Sincerely, Angela Sheridan	Mirrored Document 1	No				Yes	Yes	Yes		Yes			Yes				8/27/2026
Angela	Sheridan	I am writing to express my concern for Project Jupiter, which I believe does not offer significant benefits for our community. I am strongly against any with ai. Na	Na	I am writing to express my questions for Project Jupiter, which I believe are taking water from the agriculture and the land usage that New Mexico needs. You keep saying this doesn't take drinking water. That's not our concern. Our concern is you are taking agriculture and water that this land needs. Now, please respond to that situation which is more important than almost anything. Be open and honest about this because you are not doing so. If you don't understand the dire situation that New Mexico is in with our drought, you do not deserve to use our water for any reason. So tell us what your position is on this. Don't beat around the bush. You can't ignite the drinking water but you do use the water that agriculture and the land of New Mexico needs. I urge the New Mexico Environment Department to review this project. Sincerely, M K	Mirrored Document 1		No					Yes		Yes				8/27/2026
Grant	Schethke	I find myself opposed to the AI Datacenter projects within New Mexico as the actual use of AI may not be sufficient across the community population. Aside from the jobs created to manage and create the Datacenter, I find that this will create diminishing returns on what benefit the NM population will experience, compared to the revenue it will generate for larger companies which do not truly integrate and support these communities. I find that unless there is a significant way to promote the well-being of New Mexicans in environmental and economic factors, which I doubt considering the history of other AI data centers, my opinion will not change. Our community needs to come first in the short and long term and this is an unsustainable practice Sincerely,	Mirrored Document 1		No					Yes		Yes				8/27/2026
Olivia	Mcelory	I don't want this in my city it's bad they're going to take out water that we barley have I do not support at all keep it away I urge the New Mexico Environment Department to not approve this important project. Glenn	Landers	The NMED needs to deny the permit application for Yucca Growth Infrastructure's proposed fuel cell installation to support the Jupiter data center in Dona Ana County. To support this view I offer the following comments. There are fatal errors in the permit application The permit application contains two significant factual errors misrepresented the project and that may have served to suppress public comment. First, The application misidentifies the owner of the Facility as Yucca Growth Infrastructure, LLC. The owner should be listed as Dona Ana County. This is significant in that the public may not understand the County's role in this development, specifically that whatever is permitted will be, for the duration of the IRB, the property of the County. Consequently, there is the potential for the County to acquire liability for the project should it be abandoned and provisions have not been made or funds are not available for the safe shutdown and disposal of waste associated with the project. There is significant peril involved with this as the fuel cells will likely be considered hazardous waste. Thus, misidentifying the owner of the facility as anyone other than the County masks the liability taxpayer's of Dona Ana County may acquire if for any reason the project is abandoned. This potential liability needs to be made explicit in the application be identifying the true owner, Dona Ana County. Otherwise taxpayers will not recognize the importance of commenting on the application. For this reason, the application must be corrected and re-noticed. The second factual error is in regard to the section about Title V applicability. The application says there are no pueblos within 50 miles of the project. Ysleta Del Sur is in fact a federally recognized pueblo within 50 miles of Project Jupiter. This failure to identify a pueblo within 50 miles of the project has the effect of disenfranchising members of Ysleta Del Sur, as it gives the impression they are not in an area affected by the permit. Tribal allies in New Mexico may also be deceived about the impact this permit will have on their brothers and sisters who are members of the Pueblo and so not recognize the importance of submitting comments. The application needs to be corrected and re-noticed. There are significant deficiencies with regard to enforceability The application lists 2275 individual fuel cells, each with its own separate stack to vent emissions. The application indicates there are no controls and no emissions monitors on any of these stacks. This raises the question of how compliance with emission limits can be enforced. Requiring monitors on 2275 individual stacks is perhaps impractical. But if the stacks were aggregated into a single stack, or some reasonable number of stacks, then monitoring would be entirely practical. And, if owners necessary, as the facility will eventually be required to obtain a Title V permit that requires enforceability of emissions limitations. The application is unclear in whether its emission limitations that are not enforceable as a practical matter and should not be issued in its current form. Furthermore the municipal charges an	Mirrored Document 2		No					Yes		Yes				8/27/2026

Bobby	Gallegos	I am opposed because of the water usage and the credibility they provided of the water usage Bobby gallegos	1	No	[redacted]														
Emily	Mateo	My name is Emily. I was born and raised in Albuquerque and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the Y01 Microgrid in Doña Ana County. As a lifelong resident of New Mexico, it's become an increasing concern that those in power continue to be susceptible to power and greed over understanding the basic science behind the climate catastrophe and the will of the people, especially our indigenous community who is loudly against any and all construction of data centers nation wide. It's THEIR land and always will be. The project's proposed fuel cell powered grid is concerning for many reasons: · It would still produce a high level of greenhouse gas and toxic pollutants. · This technology generates toxic waste, and the process for handling this waste is still unclear. · Fuel cell technology or a centralized waste system has never been tried at this scale. · Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the Y01 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Emily	1	No	Mirrored Document	Yes					8/27/2026
Santiago	Garcia	Worried about water usage, emissions and the traffic.	1	No	Mirrored Document		Yes	Yes		Yes		Yes		8/27/2026
Gus	Gonzalez	Undecided, needs to be more transparency from the developers and company techs.	1	No	Mirrored Document	Yes	Yes							8/27/2026
Jean	Kerdock	Deny these permit applications. Project Jupiter would harm Doña Ana and the state of New Mexico. The only ones who'd benefit are the developers and their bank accounts. Project Jupiter, if allowed to proceed, will use a million gallons of water just to get started. It will emit more pollution than NM's three largest cities combined. It will use experimental technology on an unprecedented scale that will create an unknown amount of hazardous waste. The developers cannot be trusted. Please don't allow this to proceed. Please stop it. Please deny their permit applications. New Mexico does not need a hyperscale AI data	1	No	Mirrored Document						Yes			8/27/2026
Sylvia	Buettikos	I just came from Michawaka Indiana. Great job there from those data center folks (Google/Microsoft). Water quality has diminished. Extreme power needed and diverted there. What you have promised here may be the start but will certainly not be the end. You WILL use more water and energy. You will NOT create as many jobs in the long term as promised. Our environment will be negatively impacted and damaged irreparably.	1	No	[redacted]														
Tsuga	Olcavin	Hello, I'm writing to urge you to DENY this fuel cell air quality permit for Yucca Growth Infrastructure. Such a large data center threatens our water supply and air quality, plus would produce more GHG emissions than Las Cruces, Albuquerque and Santa Fe combined. I respectfully ask you to deny this permit to protect our right to life and to ensure the future of our children who will bear the brunt of irresponsible energy and water usage unless we do something about it right now. No new data centers in New Mexico, especially none so large as Project Jupiter. I ask that you give the public an extra 60 days to review and comment on this project since it would have catastrophic impacts on our lives if it moves forward. I further ask for you to hold a public hearing so that the public can be better informed about this project since it has not been well publicized in our media. This is a basic proceedings that need to be adhered to in a democratic society. I hope you will stand on the right side of history and deny a permit to Project Jupiter. We are sick and tired of seeing our land and water parceled off to the highest bidders without any regard to the environment or people who live close by. It behooves you as the New Mexico Department of the Environment to live up to your name and defend our environment for the sake of humanity and the natural world. As we're seeing record high temperatures that are literally killing people in the U.S. and Europe, we need to take a serious look at our emissions and eliminate unnecessary sources of pollution, such as Project Jupiter and other AI data centers. It is our nation's 250th celebration of independence, let's declare independence from fossil fuels and AI data centers. I support Alexandria Ocasio-Cortez as she introduces legislature to ban new data centers, do you?	1	No	Mirrored Document	Yes		Yes						8/27/2026

Gus	Gonzalez	Opposed still have concerns about the use of too much water	1	No	Mirrored Document		Yes							8/27/2026
Jessica	Mikesell	I strongly oppose the construction of a data center this close to my home. When I first learned about this project I was unsure of what the impacts would be, and spent a lot of time reading reports and personal accounts from other communities near large data centers. It has become clear to me that even though many of these projects promise only minimal impacts on air quality, water use, and other factors, they are very seldom actually followed through on. It would be a tragedy to compromise local natural resources for something so unnecessary and that would bring so little value to the community. The small number of jobs it could bring are not nearly enough to offset all the other negative impacts that WILL come from having a data center built in this region. With the amount of dust and wind we already have compromising air quality at certain times of year, it would be irresponsible to potentially make it even worse for the community who lives here.	1	No	Mirrored Document	Yes								8/27/2026
ELIZABETH	Thomson	I am writing to express my disgust for Project Jupiter. It would be a tragedy for New Mexico if this is approved. They lied in their original statement and continue to lie. Our beautiful New Mexico skies and land will be damaged. The extravagant water use is unthinkable. We are in a severe drought, with scientific experts warning it will only worsen. The rigidus aquifer is being depleted. We cant use data to quench our thirst, hydrate our diametric or wild animals and birds, or grow food. I urge the New Mexico Environment Department to kill this travesty!	1	No	Mirrored Document	Yes	Yes	Yes	Yes					8/27/2026
Miranda	Rivera	I am writing to express that I am strongly AGAINST Project Jupiter. It harms our environment particularly having to do with WATER. our Rio grande is dried up in a majority of southern stretches where normally we should have water and I cannot imagine there is enough water to support a data center. It harms our community and increases rent for locals. NO DATA CENTER. I urge the New Mexico Environment Department to DISAPPROVE this project. Sincerely, Miranda Rivera	1	No	Mirrored Document	Yes		Yes						8/27/2026
Wendy	Shipley	I am writing to express my repulsion for Project Jupiter, which I believe offers significant damage to water and environmental issues for our community. Project Jupiter is poised to bring subpar and taxpayer subsidized economic growth to Doña Ana County. It proposes to create 6,000 construction jobs and 1,300 project-supported jobs. Furthermore, Project Jupiter has professed to provide $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $4.4 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. These same lies have been told to multiple communities, and we do not believe the propaganda. I urge the New Mexico Environment Department to deny this disastrous project. Sincerely, Wendy Shipley	1	No	Mirrored Document	Yes		Yes						8/27/2026
Shailyn	Williams	I am writing to express my OBJECTION for Project Jupiter, which I believe offers only negative outcomes for our community. The Rio Grande is dry, we have no need for large scale data centers attempting to suck away our resources. New Mexicans can all agree that this project is harmful and will not be sustainable for our community. I urge the New Mexico Environment Department to STOP this project at any cost necessary. Sincerely, Shailyn Williams	1	No	Mirrored Document	Yes		Yes						8/27/2026
Arturo	Castellanos	I urge you to STOP all present and future Data Centers. I personally do not want or need another data center. Our environment is already over taxed by industry. Place a moratorium on all projects until a FULL environmental review is completed by a reputable contractor and appointed by the by the taxpayers of the county. Sincerely, Arturo Castellanos	1	No	Mirrored Document	Yes		Yes						8/27/2026
Nicolas	Ayllon	I am against this project because its environmental impact is not clear, would negatively impact water resources, and is not transparent to the public.	1	No	Mirrored Document			Yes	Yes					8/27/2026
Tommy	Melendrez	My concerns and thoughts about is just further educating the community. Regarding how the environmental concerns will be addressed.	1	No	Mirrored Document	Yes		Yes						8/27/2026
Mervyn	Tilden	In February 2026, more than 4000 public comments opposing air permits for the massive fossil fueled "microgrids" planned to power Project Jupiter were collected from New Mexico residents. In response to that overwhelming public opposition, Project Jupiter backers pivoted to a new fossil fuel solution. They now plan to power their hyperscale data center with Bloom Energy's Solid Oxide Fuel Cells and have a applied for a new air permit under the name Yucca Growth Infrastructure (Y02). The greenwashing is strong with this one and very misleading with false information. How do these Solid Oxide Fuel Cells work? Like the original proposal, the plant depends on methane gas, using an electrochemical process rather than combustion to convert the gas into energy, waste heat, and yes, a projected 30 million metric tons of climate polluting carbon dioxide. That's more than 20 billion pounds. More than the EPA and PNM electric grid combined. 300 more than the total emissions of Albuquerque, Las Cruces and Santa Fe put together, making a mockery of New Mexico's emissions reduction goals and erasing all the progress that has been made over two decades. I join the thousands who are also calling on the New Mexico Air Quality Bureau to reject this monstrosity because of the following: Bloom Solid Oxide Fuel Cells have never been deployed at the scale proposed and the company's track record and inadequate pollution testing protocol make all estimates provided in the application suspect. To grant a permit based on, essentially, wishful thinking, is grossly irresponsible. Though several large projects have been announced with much fanfare, the largest existing Bloom Energy Solid Oxide Fuel Cell (SOFC) installation actually in operation is a 48-megawatt (MW) deployment in South Korea. That is sixty times smaller than what is being proposed for Project Jupiter. The proposed design - 2376 individual fuel cells, each with its own stack and its integrated controls for regulated pollutants - does not provide a realistic mechanism to verify compliance or facilitate enforcement of pollution standards. Without continuous, long-term monitoring protocols capable of measuring localized particulate matter, volatile organic compounds (VOCs), and nitrite (CO) intensely per unit of energy under peak loads, any pollution mitigation claims represent theoretical best-case scenarios rather than dependable empirical projections. It is unclear how NMED could monitor compliance and enforce standards on 2376 individual units that do not include any control mechanisms. Air pollutant testing provided as part of the application was inadequate and cannot be relied upon for factual results. The air pollutant estimates provided in Bloom Energy's applications are highly suspect due to a systemic lack of rigorous, real-world testing protocols for large-scale deployments. The estimated pollution from each Bloom Energy Server reported in the application are based on testing conducted on a single Bloom cell completed in four tests of four hours each under ideal conditions. That unit generates 37.8MW times two energy than the total generator capacity they are proposing at Project Jupiter. With 2376 individual stacks, even small variations in performance could mean wildly variable actual emissions. This variability will be exacerbated when units are operated under real-world conditions, with variable feed-gas inputs, widely fluctuating temperatures that could exceed the maximum 1232kelvin, if operating temperature, and rapid degradation as a result of continuous operation.	3	No	Mirrored Document	Yes		Yes						8/27/2026
Yvonne	Carr	I just want to know if you will make CIRRUS provide clean water for the community because so far, we are getting killed slowly with arsenic in the water along with other poisons and chemicals.	1	No	Mirrored Document		Yes	Yes	Yes	Yes	Yes	Yes		8/27/2026

Jason	Anderson	I am writing to oppose Project Jupiter. Data centers consume an extraordinate amount of resources (water, electricity) and create heat and noise pollution for our environment. I urge the New Mexico Environment Department to deny this project. Sincerely, Jason Anderson		1		No													
Anonymous	Anonymous	I reside in Grants, NM, its near the main city, Albuquerque. If these data centers pop up we won't be able to adapt to these negative changes that Project Jupiter would have if they go along and develop Project Jupiter. They will bleed this desert dry, I am Navajo, I have family that live on the Navajo Nation that got effected by mining companies, they had no way of clean water and they still dont. They have to haul water from there local water tank. It's a big problem that elders in the reservation face. So I wouldn't want New Mexico to suffer from Project Jupiter from there withdraws to succeed in dominating the A.I. race. I would want to live in New Mexico with no problems. But sadly there is if the developers succeed in making Project Jupiter happen. I am still at a young age, I can speak for the future. I don't want these companies to destroy the land that I want to preserve. That my ancestors worked hard to preserve, but sadly your hurting the land we are supposed to cherish, I am Navajo I speaks for my people when I say I don't want our land and people to suffer from these types of actions that are gonna effect our future. I hope that these people know whats right and whats wrong, but they don't. They wanna be greedy and destroy this land, that's beautiful just because theres empty land doesn't mean that you have to make a profit off of it. Project Jupiter needs to be stopped. To protect and persevere New Mexicans and the Indigenous people communities and to restore the environment they we live in. I am young, I am apart of the future so I want New Mexico to have a a better chance at staying the way it is healthy and thriving for the present and the future coming up. I don't want to have health risks for this new proposal of a fuel cell plant thats never been done. Its scary and frightening to be honest, if Project Jupiter builds up, But I am not gonna be a coward, I am gonna speak up for whats going on in my beloved state.	Mirsind Document 1	No				Yes		Yes		Yes			8/27/2026
Nicholas	Dunford	I'm worried about the environmental impacts of the data centers. The possible adverse health effects of people in the direct area. The fact that they use more water than entire neighborhoods. The jobs are nice. But if there's no community in the area after a few years, then what was the point?	Mirsind Document 1	No				Yes		Yes		Yes							8/27/2026
Eric	Gibson	I am writing to express no support for Project Jupiter, which I believe ofers significant impact for the community and New Mexico. Project Jupiter is poised to bring substantial water depletion to Doña Ana County, New Mexico, Texas and Mexico. I urge the New Mexico Environment Department to deny this project. Sincerely, Eric Gibson	Mirsind Document 1	No				Yes		Yes										8/27/2026

Just like moons and like suns, With the certainty of tides, Just like hopes springing high, Still I'll rise.	Mirsind Document 2	No				Yes		Yes										8/27/2026
		Did you want to see me broken? Bowed head and lowered eyes? Shoulders falling down like teardrops, Weakened by my soulful cries? Does my haughtiness offend you? Don't you take it awful hard [illegible] laugh like I've got gold mines																	
Rach	Arny	Submitted Via Email and NMED's Comment Portal New Mexico Environmental Department Air Quality Bureau Permits Section 330 Camino de los Marquez, Suite 1 Santa Fe, NM 87505 July 6, 2026 Re: Comments on Yucca Growth Infrastructure, LLC-193 Microgrid Air Quality Construction Permit Application Dear Air Quality Bureau Permitting Team: Conservation Voters New Mexico Education Fund submits these comments in response to Yucca Growth Infrastructure, LLC-193's microgrid air quality construction permit application. We respectfully urge the Air Quality Bureau to deny the application. As a statewide non-profit committed to protecting New Mexico's air, land, water, and communities, we are gravely concerned about the volume of emissions that this project will produce and the associated public health, environmental, and climate impacts on communities in Doña Ana County and beyond. As was publicly reported in Source NM, Yucca Growth's gas powered fuel cell microgrid project is estimated to produce 10 million tons of greenhouse gas emissions per year. This is roughly equivalent to the carbon emissions produced by 2.3 million gasoline-powered passenger vehicles over the course of a year. For comparison, there are approximately 2 million vehicles currently registered in New Mexico. The carbon emissions from Yucca's proposed microgrid exceed the combined emissions from every single registered vehicle in New Mexico over a year. Emissions on this scale jeopardize the health of communities now and in the future and risk derailing New Mexico's commitment to achieving net zero emissions as enshrined in the 2019 Energy Transition Act. By exacerbating climate change, greenhouse gas emissions threaten the future survival and wellbeing of New Mexicans.	Mirsind Document 4	Yes					Yes		Yes					8/27/2026
Dhyana	Martinez	Community members have been denied the fair opportunity to properly participate in the discussions. The air quality permit should be denied for the protection of New Mexico.	Mirsind Document 1	No				Yes	Yes	Yes	Yes	Yes							8/27/2026
Thara	Lachuga	I am writing to express that I am AGAINST Project Jupiter, which I believe will ruin New Mexico. We live in a desert and water is already a huge issue for our state. Yesterday I spoke with a representative from the organization ORCSA and gave my information to include as NOT supporting Project Jupiter. I wanted to respond again myself to ensure that my correct response is recorded and passed on to New Mexico Legislators. I urge the New Mexico Environment Department NOT to approve Project Jupiter Sincerely, Thara R. Lachuga 505-238-2266	Mirsind Document 1	No					Yes							8/27/2026

Sal	Nost	I am writing to express my disapproval for Project Jupiter. Oracle was created by Larry Ellison in the 1970s for the CIA, which has been invading our privacy. Oracle has also been collecting data and using it to train AI defense systems, used by Israel in its genocide in Gaza. He has lied before and he will do it again. Where exactly is the money coming from? What are fuel cells? And why should we believe he won't leave the county in a worse off place than before? By supporting this project, we are supporting the genocide of a people. I hope this doesn't happen.	Mirsind Document 1	No				Yes				Yes							8/27/2026
Alexandra	Peterson	As a member of the public concerned about the lack of transparency throughout this project, and the clear risk that this plant has to air and water pollution, I wish state the following: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the unprecedented heat over the last few years has not demonstrated the need for the reduction in air pollution, I don't know what will. New Mexico does not need or want this, nor will it benefit its citizens.	[illegible] 1	No								Yes				[illegible]
Harper	Morgan	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.	[illegible] 1	No				Yes	Yes	Yes		Yes	Yes						[illegible]
Deidra	Garcia	I am concerned with the water usage of data centers	Mirsind Document 1	No					Yes				Yes						8/27/2026
Elijah	Lewis	I am writing to express my voice and feeling new Mexico and surrounding states have been struggling with water shortage and fresh clean resourceful water how would this data center effect our water supply and the future generation we can't simply keep thinking of the now and us our previous generations have done it and look where it got us, how does this factory benefit our state and water and environment Sincerely, Elijah lewis	Mirsind Document 1	No				Yes											8/27/2026
Jessica	Isaington	This is obviously be I mean think of the ruined ecosystems and all the water used. we've been just fine without big data centers and AI has done nothing but make us dumber I can see no real reason to release huge amounts of carbon into the atmosphere and waste our limited amount of drinking water, the planet is already on fire, if this builds its gonna be more hellish than it already is	Mirsind Document 1	No				Yes		Yes									8/27/2026
Lisa	Carlson	I'm a concerned citizen of Dona Ana County. We are in a water crisis and strongly feel that water should be used for food and humans.	Mirsind Document 1	No				Yes											8/27/2026
yahya	Hadad	Most people do not support AI data centers. Including this one, this AI data center will be more harm than good. And a lot of jobs coming from the Arizona center is only temporary for construction. If completed this AI data center will take more jobs than I could have ever given in return. This doesnt even go into environmental cons like how carbon emissions will be through the roof in the area ruining the air quality. Or even with minimal water usage with the size of the AI data center this could prove disastrous for the community and the climate. I do not support this ai data center please do what you can to stop this from being built!	Mirsind Document 1	No				Yes		Yes									8/27/2026
Abigail	Grasmith	My name is Abigail Grasmith and I am a PhD candidate in the Biology Department at the University of New Mexico. I study the negative impacts that pollution has on an environment, particularly native plants and soil microbes, and how we can utilize bioremediation efforts to clean up contaminated sites. I know all too well the history New Mexico has with environmental pollution and how marginalized communities have been disproportionately affected. This has gone on for too long. People in New Mexico have been working for decades to clean up the contamination that has already occurred in this state. It disgusts me that there are active proposals to further extract, pollute, and damage our land. Enough is enough. Project Jupiter is not for the people, it is for the rich who see New Mexico as a throw away state to continue to over extract and pollute. The people of New Mexico do not want this. I have yet to come across any educated person who supports Project Jupiter. This initiative needs to be stopped. In support of everyone fighting to stop Project Jupiter, I have three simple asks: - The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. - The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. - If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. STOP PROJECT JUPITER NOW!	Mirsind Document 1	No				Yes	Yes	Yes		Yes	Yes						8/27/2026

Deborah	Granger	I am writing TO TELL Project Jupiter YOU ARE FUCKED AND EVIL DEMONS FROM HELL BUT THEY WILL PROBABLY ONLY BE READ BY AI AND THEN YOU WILL USE MY INFORMATION TO SAY I SUPPORT YOU WHICH I DO NOT AND WILL DO ANYTHING TO MAKE SURE YOU STAY OUT OF NM GO SOMEWHERE THERE IS WATER YOU EVIL ASSHOLES! HOW DARE YOU? JUST BECAUSE THE POPULATION IS POOR AND MOSTLY NATIVE OR MEXICAN YOU THINK UNDER TRUMP YOU CAN GET AWAY WITH MURDER WHICH IS WHAT YOUR DATA CENTER WILL DO WE LIKE OUR FREEDOM IN THIS COUNTRY EVEN IF PEOPLE ARE STILL TOO BRAINWASHED WITH YOUR PROPAGANDA TO UNDERSTAND WHAT YOU DO TO THE ANIMALS THAT LIVE AROUND THE GROUNDS YOU KILL AND MAKE A TOXIC MESS FOR CENTURIES FOR YOU OWN GREED GREED GREED GREED GREED GREEDY FUCKS END UP IN HELL AND THAT IS WHAT I AM WISHING FOR YOU WHEN YOUR KARMA COMES HOME. MOST OF THE TIME KARMA KILLS YOUR CHILDREN BUT WHAT DO YOU CARE? YOU EVIL DEMONS! YOU WILL BE FOUND OUT AND YOU WILL BE STOPPED IF BY ANYTHING BY GOD THEMSELVES! YOU LIE YOU KNOW YOU USE MORE WATER THAN YOU ARE SAYING AND YOU KNOW THAT EVERYWHERE YOU BUTCHER PUT YOUR FOOTPRINT AND I AM WISHING ALL OF YOU WOULD DIE FOR THE LIES AND EVIL SCAMS YOU ARE PULLING ON THE AMERICAN PUBLIC! YOU THINK YOU ARE TOO BIG AND TOO RICH TO GO TO JAIL AND TOO BIG AND TOO RICH TO NO SUFFER KARMA.	2		No										
Larry	John	I am writing this to say fuck a lot! We dont need that and youre taking away beautiful land and dont lie and say that youre not using water. Youd emit ten million tons of carbon dioxide EVERY YEAR. Thats too much. Just stop this thing all together.	Mirrored Document 1		No				Yes		Yes				8/27/2026
Mariah	Humphrey	Against the data centers due to water use.	Mirrored Document 1		No				Yes	Yes					8/27/2026
Theo	Keeley-LeClaire	I am strongly opposed to Yucca Growth's application for new air source permits in Doña Ana county, which is already in noncattainment for air quality issues. As a resident of Albuquerque, which received a grade of F from the American Lung Association for its air quality, I have experienced firsthand the effects of poor air quality on my health and those around me. Adding to a point source of this scale to a community already struggling with poor air quality is insane. Furthermore, Bloom Energy has never built a fuel cell plant even close to this size before - which significantly increases the risks that the facility will emit more pollution than anticipated. This risk, and the known risks posed by the various pollutants and thermal which will be emitted by the facility, are excessive. They should not be born by the people of Doña Ana county without their informed and explicit consent. It is time for us to stop green lighting individual facilities and start to consider the cumulative impacts of air pollution, water pollution, poverty, and heat stress on health.	Mirrored Document 1		No				Yes							8/27/2026
Debra	Nuna	I know many people struggling with long term health impacts related to the air they have no choice but to breathe - Doña Ana county doesn't deserve this. No one does. Give the residents of Doña Ana county a real chance to weigh in on this application by extending the comment period and holding a public meeting in Santa Teresa. Better yet, deny the permit application and tier up to NMED's duty to protect our	Mirrored Document 1		No				Yes	Yes	Yes	Yes	Yes		8/27/2026

Robert	Cioccio	I write against this Data center , due to tracking possibility, and concerns about the security of personal data	1	No															
Ivan Aragon	Copica	I am writing to express my absolute disapproval of Project Jupiter. I believe it only brings harm to the community, climate wise, and socially. Almost it will offer 100 jobs with no guarantee any of them will go towards New Mexicans. It's only set to increase energy costs, and destroy our already limited water supply. The quality of water will suffer for it. Areas around the country from California, Arkansas, and others with data are already seeing these devastating effects to necessary infrastructure. This is an absolute no our community and I should have never been approved in the first place. No air purifier will make this okay. It also shows New Mexico is primed and ready to be ravaged by corporate bodies with enough money to get what they want. I urge the New Mexico Environment Department to disapprove this project. Sincerely, Ivan Aragon	1	No	Mirrored Document			Yes	Oppose Non-Substantive							8/27/2026
Ann L	Hall	The air quality permit by Yucca Growth Infrastructure should be denied. The "micro grid" that they are planning to build is a way for them to forego following laws in New Mexico and bypassing the Public Regulation Commission. Their microgrid is 3 times bigger than all the electricity generated by PNM and should follow all New Mexico laws including the Energy Transition Act. New Mexicans deserve to have business that follow the law and that protect New Mexicans air, land and water. Please deny the the air quality permit.	1	No	Mirrored Document			Yes		Yes									8/27/2026
Beverly Jimmerson	Jimmerson	We do not need a data center in nm. We have thousands more than china, data centers are pollutants. Using tons of water not being able to spare. I am writing to express my concerns for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,000 project-supported jobs. Furthermore, Project Jupiter has committed $80 million to help repair, upgrade, and improve local water systems, $380 million in direct support for schools, infrastructure, and local services, and $6 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, Beverly Jimmerson Jimmerson	1	No	Mirrored Document			Yes		Yes		Yes							8/27/2026
Brian	Moffat	I am not writing a prewritten support. But I do support the project. As an electrician I see the need is there for power and this is going to be the future. Project Jupiter uses what I feel is the best, in terms of least impact to the environment, power generation. You don't see problems with solar or wind farms with the wildlife, and it takes up a relatively small footprint for ground wildlife. This project has a net benefit to the people while still taking our wildlife into account. We all need to figure out a way to live on this planet together and I believe this project helps us walk the line between both extremes of the arguments for each side.	1	No	Mirrored Document			Yes		Yes									8/27/2026
Honor	Proctnow	I would like to stand against project jupiter as it would significantly affect our already declining environment. It would affect our air quality along with worsening the drought we are already in. The world does not need another data center.	1	No	Mirrored Document					Yes									8/27/2026
Patricia	Foschi	I was stopped on the street and polled by Yucca Growth Infrastructure who asked me for my opinion on Project Jupiter. I said I was undecided. Instead of recording that response, they recorded that I was in favor of the project. If this is their usual behavior, there are a lot of false-positive responses being recorded. I am outraged by this behavior and, consequently, I am stating here that I AM OPPOSED TO PROJECT JUPITER. I urge the NM Environment Department to NOT APPROVE this project.	1	No	Mirrored Document			Yes	Yes	Yes									8/27/2026
Tamra	Bluebe	I am writing to strongly oppose this project. While proponents often cite vague economic benefits, the reality is that these massive facilities impose disproportionate costs on our community. I oppose this project for three critical reasons: Strain on Infrastructure & Utilities: Data centers are incredibly power- and water-intensive. Allowing this facility will strain our local power grid, increase the risk of outages, and potentially drive up electricity rates for everyday families. Environmental & Noise Pollution: Continuous cooling operations and diesel backup generators create an incessant, low-frequency hum alongside potential emissions and water contamination risks. This represents a significant degradation of our local environment and quality of life. Low Community ROI: Despite the massive footprint and required infrastructure, data centers offer very few long-term, permanent jobs compared to other industrial or commercial developments. The local tax revenue gained does not justify the burden placed on our community's resources. I urge you to oppose this project and deny the permit. Thank you for your time and for protecting the interests of our community.	1	No	Mirrored Document						Yes									8/27/2026
Bruno	Ramos	Water usage is my biggest concerne	1	No	Mirrored Document			Yes	Yes	Yes		Yes							8/27/2026
Megan	Apodaca	New Mexicans deserve transparency on aspects that will affect their quality of life and Yucca Growth Infrastructure LLC has neglected to take New Mexicans opinions, their concerns, and safety into consideration. We already live in a drought and in an area with negative air quality, a development such as Project Jupiter will only exacerbate these features. New Mexicans deserve a healthy environment to exist in and Project Jupiter will not contribute to this. There is no proof that the proposed economic prosperity and benefit employees here, as outsourcing these jobs to individuals outside of NM is always a possibility. New Mexicans, regardless of political affiliation, have a love of the land and say NO to Project Jupiter.	1	No	Mirrored Document			Yes											8/27/2026
Juliana	Hernandez	I am writing to express my OPPOSITION for project jupiter. This project and its coordination have disregarded the community of Sunland Park and Santa Teresa. This project will bring pollution, disrupt the environment and degrade the quality of life for thousands of New Mexicans who have ALREADY been dealing with inadequate water in the area. Promises of money should not be at the front of this decision. New Mexico is NOT poor and we need to protect once another from outsiders who come to exploit our resources. I urge the New Mexico Environment Department to reject the Yucca Growth Infrastructure, LLC-155 Microgrid Air Quality Construction Permit Application.	1	No	Mirrored Document			Yes	Yes	Yes			Yes						8/27/2026
Susan	Hartline	No Trut Absust We dot have water to support it there are other ways to cool the facilities.	1	No	Mirrored Document			Yes	Yes	Yes									8/27/2026
Traci	Laney	I am writing to express my opposition to Project Jupiter and to urge the New Mexico Environment Department to carefully consider its long-term environmental and community impacts before granting approval. While supporters emphasize the promise of temporary construction jobs, project-supported employment, and financial investments, these benefits should not outweigh the potential risks to our region's limited natural resources. Economic incentives and community donations do not eliminate or compensate for potential impacts to groundwater, air quality, public health, or the long-term sustainability of Doña Ana County. The project's advertised commitments—including funding for water systems, schools, infrastructure, workforce development, and community organizations—are welcome investments, but they should not be viewed as substitutes for strong environmental protections. Community contributions cannot offset irreversible environmental damage if contamination or resource depletion occurs. Our region already faces significant water challenges. Any project with the potential to increase water demand or threaten water quality deserves the highest level of scrutiny. The New Mexico Environment Department's responsibility is to protect New Mexico's natural resources and the health of its residents, not to weigh environmental protection against financial incentives. For these reasons, I respectfully urge the New Mexico Environment Department to deny approval of Project Jupiter unless it can be demonstrated through independent scientific analysis that the project will not adversely affect our water resources, environment, or the long-term well-being of our community.	1	No	Mirrored Document			Yes											8/27/2026
Katherine	Page	I demand the extension of the permit to allow the communities voices to be heard regarding Project Jupiter. New Mexicans deserve transparency on anything that will affect our quality of life. Yucca Growth Infrastructure LLC has neglected to take New Mexicans opinions, their concerns, and safety into consideration. We already live in a serious drought and in an area with negative air quality. Project Jupiter will only exacerbate these issues. New Mexicans deserve a healthy environment to exist in and Project Jupiter will not create this. New Mexicans, regardless of political affiliation, have a love of the land and say NO to Project Jupiter.	1	No	Mirrored Document			Yes	Yes	Yes									8/27/2026
Amy	Dickens	I have concerns about water usage. Water should be conserved	1	No	Mirrored Document			Yes	Yes	Yes			Yes						8/27/2026
Kathleen	Tingley	As someone who visits the area on a semi regular basis, this building should never be built, let alone be granted an air quality permit. There is zero reason to pollute the air- there are ways to build which does not need an air quality permit. This is an example of the good people in the county being taken advantage of and lasting effects on the community- both the lasting air quality and the quality of life that occurs with living next to a data center. As a visitor who will not visit the area if the data center is built, I know I am not alone in my conviction.	1	No	Mirrored Document			Yes											8/27/2026
Wendy	Taylor	I am strongly opposed to Project Jupiter for the reasons listed below!!! Developers behind Project Jupiter have asked state environment officials to sign off on their plans to emit more greenhouse gases than the state's two largest cities combined, and to generate as much electricity as the state's largest power company. Project Jupiter could emit more than 5.6 million tons of greenhouse gases per year. By comparison, Albuquerque and Las Cruces emit a combined 4.7 million metric tons of greenhouse gases annually, according to both cities' climate action plans. The applications also say developers seek to install 50 turbines to annually generate about as much electricity as PNM. Developers filed two applications, one for a "west microgrid" and one for an "east microgrid." A microgrid is a self-reliant energy grid that doesn't need to draw power from a larger utility, like PNM or El Paso Electric. For months, plans have made it clear that developers want to build natural gas generating stations for Project Jupiter's microgrids, prompting concerns from residents and lawmakers that the data centers won't comply with the state's landmark clean energy law, which requires utilities to use 50% renewable energy by 2030, 80% by 2040 and 100% by 2045. The applications show that together, the microgrids will emit nearly 900 tons per yr of nitrogen oxides, an important ingredient in contributing to ozone.	1	No	Mirrored Document					Yes									8/27/2026
JM	Comer	I am writing to express my absolute objection to Project Jupiter, which I believe poses significant and lasting threats to our community. While proponents point to short-term job creation, the reality is that Project Jupiter will place an unsustainable strain on Doña Ana County's infrastructure, environment, and public resources. Furthermore, the financial packages being offered including the promised funds for schools, infrastructure, and local organizations like the Boys and Girls Clubare nothing more than corporate buy-offs designed to mask the permanent damage this project will inflict. No amount of funding can compensate for the massive depletion and endangerment of our precious local water systems and natural habitats. Our community's future and our natural resources are not for sale. We do not need Project Jupiter, and we do not want it here in New Mexico. Sincerely, JM	1	No	Mirrored Document			Yes	Yes	Yes		Yes							8/27/2026
Ann	Lacy	NMEnvironmental Department, You have heard these facts before - for the reason they are overwhelming evidence for denying Project Jupiter. We are in the beginnings of an intense climate change and need to preserve our resources to the max as we head into diminished water supplies, intense heat build up along with more massive wildfires, and huge storms with flooding. We not only need to conserve but use our resources to develop clean energy to cut greenhouse gases. The time is now. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The proposed "micro" grid has a 2,860 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of these grids include a substantial amount of renewable energy sources and each of these grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. ENVIRONMENTAL JUSTICE Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana County near the site have not been properly notified of this air permit application request. FUEL CELL TECHNOLOGY IS UNDERTRIED Fuel cell technology has not been deployed at this scale. This is 40 times larger than the largest existing Bloom fuel cell installation. The Approach is based on pollution testing from a very small unit. The testing unit is only 65kw, while the power plant is 37,376 times that size. TOXICWASTE Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the desulf canisters is exempt from air permitting regulations (because there is less than 100tn/a/yr). Bloom was fined for improper hazardous waste handling in Pennsylvania and Maryland. In 2020, Bloom was fined $250,000, and then $1,141,000. Zoey	Veldhouse	I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest operating Bloom installation is a 40 MW facility - 60 times smaller than what is proposed here. Scaling this technology to a mega-utility application remains entirely unproven. * Suspect Estimates & Inadequate Testing: The emissions data provided is based on testing of a single, 65 kW unit four times for four hours. Extrapolating data from a unit 37,876 times smaller than the proposed plant capacity - and adjusting it with an arbitrary 15% safety margin - fails to provide credible empirical evidence. The emissions data provided by the company cannot be trusted. * Enforcement Impossibility: The design routes 2,275 individual cells through separate stacks with no add-on pollution control mechanisms or integrated continuous monitoring for particulate matter, VOCs, or shifting CO2 intensity. NMED cannot practically enforce compliance under 20.2.72.210 NMAC across thousands of individual, degrading units. * Severe Public Health & Environmental Impacts: The microgrid will emit 161.2 tons/year of CO and 124 tons/year of VOCs near existing EPA non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.6°F in a sweltering desert climate, threatening vulnerable populations. Furthermore, concentrating 10M metric tons of climate-warming CO2 into 275 acres - exceeding the combined emissions of Albuquerque, Santa Fe, and Las Cruces - creates localized health risks. Emerging 2025–2026 research links elevated CO2 levels to permanent changes in human blood chemistry, oxidative stress, and cognitive decline. Because CO2 sensitivity exists on a normal spectrum, even minor baseline increases can induce anxiety and panic attacks in sensitive individuals.	2		No	[redacted]										
Orlando	Martinez	Members of the Environmental Improvement Board, On behalf of the Albuquerque Metropolitan Arroyo Flood Control Authority (AMAFCA), we respectfully submit these comments in support of the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County. AMAFCA was created by the New Mexico Legislature in 1963 with the responsibility to protect people and property from flooding and minimize damage through the planning, design, construction, and maintenance of flood control infrastructure throughout the Albuquerque metropolitan area. We build and maintain channels, dams, arroyos, and stormwater facilities that also serve to improve water quality and protect environmental resources. Although AMAFCA's core mission is focused on flood mitigation and drainage infrastructure, our work underscores an important principle that also applies to large infrastructure development statewide: responsible planning, environmental stewardship, and thoughtful integration of public works with community and natural systems are essential to long-term resilience. Projects in all sectors — whether flood control, transportation, advanced industry, or technology — benefit when they are designed and permitted in ways that prioritize public health, environmental quality, and predictable outcomes. Air quality standards are critical to protecting community well-being, particularly in growing regions where new economic activity can influence local conditions. A transparent, sciencebased permitting process ensures that development moves forward in compliance with regulatory safeguards while allowing responsible projects to contribute to economic opportunity. AMAFCA supports such processes because they align with the objectives of protecting human health and the environment — outcomes we pursue every day through our stormwater quality initiatives and infrastructure planning. 2 Project Jupiter presents an opportunity for significant investment in Southern New Mexico that can enhance regional economic stability, workforce development, and long-term community capacity. From the standpoint of public infrastructure planning and environmental protection,	2	Merged Document	Yes	[redacted]			Yes	Yes	Yes	Yes	Yes		Yes	8/17/2026
Tina	Cordova	After working on the issue of overexposure to radiation from the Trinity bomb one thing I've learned is that when there is a major unplanned environmental consequence of these large-scale industries it is often catastrophic and no one comes back to clean up the mess. The State of New Mexico must consider the worst possible outcome and consider that as it goes about issuing permits for this type of large-scale industrial project. The past is a good predictor of the future and historically industry has never cleaned up the environmental damage they've created. They've left the people of New Mexico carrying the	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Leslie	Giner	Hi NMED staff, My name is Leslie. I have lived here all of my life, and throughout it I have come to love my city and my state. Although, it isn't always the best, it is home. As someone who's lived here their whole life, I've seen the decline of the city, especially Albuquerque and have acknowledged that severe changes need to be made in order to better it; building a power plant isn't one of them. For the past two ish years, I believe, we have been in a drought or near drought conditions. Within the last six months the Rio Grande has completely dried up. I know people keep saying, "oh, it does that. It'll come back later" but if this power plant gets approved, it won't. This power plant may not affect our water reserves directly, but it does affect our climate and climate affects our water, the amount of precipitation we get, the weather, migration patterns, mating patterns, and agriculture; all of which are extremely important for New Mexico. For the past 60 years scientists have been warning the public of the climate crisis, and as our nations continue to become more and more industrialized, it's gotten worse. We have about 3 years to start reversing climate change before the effects are even more detrimental than they already are. If this power plant gets built, 10 million tons of green house gasses will be produced every year. Not only is this harrowing for the environment it is also harrowing for the surrounding communities. For instance, the elementary school and high school that are located within 5 miles of the project site. The children and teenagers in these schools are vulnerable to the health risks of said green house gasses, (Nitrogen Oxides, Carbon Monoxide etc.) as well as the residents who live near the site. It will impact these residents horribly and will leave them with a number of health conditions. Not to mention the injustice you will enact on them because of it. If this plant gets approved, where will the toxic waste from the fuel cells go? In our communities or at least not far from them. New Mexico has beautiful agriculture, scenery and wildlife. If we allow this power plant to happen, all of New Mexico's beauty will be sullied by the waste that they plan to dispose of (most likely) in our communities. If NMED allows this power plant to be built, their entire message and reason for existing is for nothing. Their mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations". If they allow Project Jupiter to be built, not only are they hypocrites, but they are enacting an injustice to all New Mexico communities and the land itself. I love this state and the city I live in, and seeing someone trying to propose a project that will do more harm than good to the entire state is angering. We have so many issues that need to be fixed within it and instead they're promoting something that will have irrevocable consequences and add more damage to the already existing issues. If NMED and our state's government truly cares about our land and its people, please reject the proposal. We do not need this, nor do we want it. Sincerely,	1	Merged Document	No	[redacted]					Yes					8/17/2026
Benjamin	Cordova	I oppose Air Quality Permit No. 10883 for Yucca Growth Infrastructure, LLC and the YGI Microgrid project. I do not want this facility sited in my area because of the environmental burden it will place on nearby residents and the surrounding community. The notice shows substantial emissions of CO, VOCs, PM10, PM2.5, NOx, total HAPs, and more than 75,000 tons per year of CO2e, and I believe those impacts are not justified for this location. I am also concerned about cumulative effects, including noise, heat, and any water or other discharges associated with the project, and I ask NMED to scrutinize whether the permit conditions are truly enforceable and protective. Please require the strongest possible emissions limits, monitoring, reporting, and operating restrictions, and deny the permit if those protections are not sufficient to protect public health and the environment I request that NMED consider the full community impact of this project, including potential ozone-related impacts from VOC emissions, and not rely only on a narrow review of modeled compliance. For these	1	Merged Document	No	[redacted]			Yes		Yes		Yes			8/17/2026
Zack	Lance	New Mexico does not have the water to spare for more data centers. New Mexico does not have the infrastructure to support these facilities, when our recourses are already too scare to feed, clothe and house NEW MEXICANS themselves! We need our water more than we need temporary construction jobs	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes			8/17/2026
Joe	Lambert	To whom it may concern; I am somebody who has been active in information technology as an educator for 40 years. I see the great need for New Mexico to find means to increase access to technology for the citizens of our state. However, this project comes at a time where it is clear, no policy framework exists to regulate the use of artificial intelligence in our schools, our homes, our civic life. Without that, we are simply allowing the richest and most powerful companies buy us off with projects that undoubtedly add to our states income and resources, but put us in the position as accomplices in their activities for which their is almost no accountability. Come back in five years when we have AI Oversight at the Federal, State and Local level, and then we can consider projects like this. I strenuously oppose this project's appoval.	1	Merged Document	No	[redacted]			Yes							8/17/2026
Los Jardines	Institute	Dear New Mexico Air Quality Bureau, On behalf of Los Jardines Institute, we urge you to give the public an additional 60 days to review and comment, deny the Air Quality Construction Permit 10883 for Yucca Growth Infrastructure Microgrid in southern Doña Ana County, and hold a bilingual public hearing. You all hold the institutional responsibility to protect our scarce water resources and the public health of Mexicano, Hispano, and Indigenous communities that will be impacted by Project Jupiter. If Project Jupiter continues, it will be a clear example of environmental racism, especially given Bloomberg's fuel cell microgrid's emissions will continue to pollute our communities with over 10 million tons of CO2. We once again want to remind you that communities on the borderlands have been historically sacrificed for the state's so-called "innovation." These are the same communities that have not had access to clean potable drinking water for years. We cannot prioritize water access and energy demand for Project Jupiter, a project that is neither needed nor wanted. Most importantly, we request that you, as an agency, do your due diligence. Hold a bilingual public hearings in Santa Teresa, with virtual access, and distribute documentation in Spanish and English to ensure the public can respond to the department's analysis. Project Jupiter works against the state's climate goals, further contributing to overall air pollution and harming the health of New Mexicans statewide. At Los Jardines, we supported Bernalillo County's Health, Equity, and Environmental Impacts Regulation because of unregulated emissions harming working communities of color across Albuquerque, specifically Mountainview and the South Valley. At the moment, the state does not have proper air quality regulations or departmental capacity to ensure oversight and enforcement of our air quality and the protection of our public health, as your department has stated time and time again. Granted permits for the YGI microgrid application will not only be a reckless decision, but a costly one for our communities. Deny YGI's microgrid air quality permits, hold bilingual hearings, ensure public engagement is intentional by granting an additional 60 day public review process, and protect our health and environment. Do not permit the sacrifice of our people and our lands. Sincerely, Los Jardines Institute	1	Merged Document	No	[redacted]				Yes						8/17/2026
John-Wesley	Hanson	I don't want it in my community. The proposed economic growth is overstated and not worth the natural resource burden in my community.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes		Yes	8/17/2026
Lillian	McDonald	Hi folks, The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Doña Ana County has historically experienced poor air quality due to a confluence of environmental factors, including aridification of the surrounding area, dust, and oil/gas extraction. It is critical that we as a collective in New Mexico support and advocate for this community that is historically and contemporarily experiencing environmental racism. It is unacceptable, for the health and wellbeing of Doña Ana County and its residents, to provide this air permit for Project Jupiter and provide them any leeway in their development, particularly as farmers, communities, and New Mexicans suffer from drought, poor water management, and degradation of the ecosystems that support us.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive								8/17/2026
Daniel	Strongwater	Dear NMED staff, Project Jupiter poses significant risks to New Mexicans—it is sure to harm our access to clean air, water and climate. I implore you to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I worked at Apple in California for over a decade before moving to NM to raise my children among family and saw first hand the unintended consequences of tech that promised to improve the lives of millions, but has caused so much digital addition and issues with social media. This project is rife with unknowns, including the impact of unproven fuel cells that have a short history of use, and in that history have proven to require significantly more fossil fuel inputs than originally disclosed resulting in greater pollution, water use and degraded air quality. Further, an installation on this scale has NEVER been attempted. It's just too risky, and something the community of New Mexico is clearly vehemently opposed to. The companies behind this development are looking for a place to exploit for their gain. It cannot be New Mexico. Make the right choice and reject this development proposal Thank you, Daniel	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Sydrae	Sanchez	I am opposed to project Jupiter and I hope the NMED rejects these air permits. What makes anyone think that this project will be any different than the other water guzzling, air and sound polluting data centers that have popped up around the country? At some point, we have to think about the actual health of our community over some cash in the pockets of a few.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026
Andrew	Bramble	Dear NMED staff, My name is Andrew Bramble. I live in Cerrillos NM. I've followed Project Jupiter since propaganda for the project began infesting my social media feed. NMED should reject Yucca Growth Infrastructure, LLC's application for an air quality permit for the YGI Microgrid. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. The YGI Microgrid will release million of tons of climate-warming greenhouse gasses each year. It will also generate enormous amounts of hazardous waste. All this within a few miles of Santa Teresa schools. Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana county near the site have not been properly notified of this air permit application request. Again, this is contrary to NMED's mission statement. I urge NMED to reject Yucca Growth Infrastructure, LLC's application. Thank you, Andrew Bramble	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Somah	Haaland	Please stop knowingly putting the residents and the nature of our beautiful state at risk, only to financially benefit people who don't live here. We are not a sacrifice zone. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]				Yes	Yes			Yes		8/17/2026
Alaina	Szostkowski	New Mexico Environment Department Air Quality Bureau – Permitting Section 325 Camino de los Marquez, Ste. 1 Santa Fe, NM 87505 Re: Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application Dear NMED, My name is Alaina Szostkowski and I am a resident of Santa Fe in Santa Fe County. I am writing to stand with my fellow New Mexicans in Doña Ana County in opposition to the construction of the Project Jupiter data center campus. Across the state, residents and lawmakers alike have expressed deep concerns about the environmental health impacts associated with data center construction, and I share their concerns about the risks and harms Project Jupiter poses to all New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As an educator, I have seen firsthand the negative impacts of increased AI technology on the social-emotional health, motivation and learning of our young people. I am also deeply concerned about the future of our lands and waters and protecting them for the health of future generations. The massive environmental impacts of data centers are well known (https://www.lincolninst.edu/publications/land-lines-magazine/articles/land-water-impacts-data-centers/), and Project Jupiter is no exception in terms of its power needs. While the project's website claims that it will not impact utility bills or water resources in the region due to generating its own power on a "closed loop system," water is still required as an initial input and there are still power and environmental costs associated with a massive construction project such as this one. Aside from my intrinsic opposition to data centers, I also have concerns about the lack of transparency and public input throughout this process. Not only has the company behind Project Jupiter changed its name and withdrawn previous permit applications because of public opposition, but it has also continued to change proposed energy sources and provide vague claims about the environmental costs and economic benefits (https://www.organmountainnews.com/project-jupiter-senators-listening-session-august-2026/). The current proposal to use fuel cell technology is concerning for many reasons: it still produces high levels of greenhouse gasses and toxic pollutants (the website mentions a 92% reduction in NOx but does not say anything about CO2); there is not a clear process for handling waste; fuel cell technology has not often been tested at the proposed scale; and there are still air quality impacts for surrounding communities like Santa Teresa.	2	Merged Document	No	[redacted]					Yes					8/17/2026
Vanessa	Alarid	Members of the Environmental Improvement Board, I am writing in support of the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County. As a business owner, public affairs professional, and member of the Mesilla Valley Economic Development Alliance (MVEDA) Board of Directors, I have spent much of my career working to strengthen Southern New Mexico's economy by supporting policies and projects that create opportunity for businesses, workers, and families. Economic development is about much more than recruiting companies—it is about creating the conditions that allow our communities to thrive for generations. Project Jupiter represents one of those opportunities. The future of New Mexico depends upon our ability to attract industries that offer high-quality jobs, strengthen our workforce, and encourage our young people to build their futures here at home. For too long, many of our brightest students have felt they needed to leave New Mexico to pursue meaningful careers. We should be creating an economy that gives them every reason to stay. Data centers and other advanced technology projects create opportunities well beyond the facility itself. They generate demand for skilled trades, engineering, information technology, construction, logistics, professional services, and countless local businesses that support a growing economy. They also encourage partnerships with educational institutions and workforce training programs, helping prepare the next generation of New Mexicans for careers in industries that will continue growing for decades. As someone who works closely with businesses throughout Southern New Mexico, I also understand the importance of creating an environment where companies are confident investing in our communities. Large-scale investments send a strong message that New Mexico is open for business and capable of competing for projects that bring long-term economic value. Those investments often become catalysts for additional employers, new entrepreneurs, expanded	2	Merged Document	Yes	[redacted]			Yes	Yes	Yes	Yes	Yes		Yes	8/17/2026
				Merged Document						Yes	Yes				Yes	8/17/2026

Edward	ASHMEAD III	I strongly oppose the entire Jupiter project, as there is no way New Mexico can afford to expend the kind of water the project will require, nor can Mother Earth afford the kind of pollution this project will emit. These data centers need to be placed in parts of the world where water is abundant and with regulations in place so that full-scale renewable energy is utilized and monitored for enforcement.	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes					8/17/2026
Annalisa	Starke	I am a resident of Tijeras, New Mexico which is a small town outside of Albuquerque, New Mexico. In the past 4 years I've been working in a community orientated field and the one thing I see daily are people. Last year the summer was so hot we had people coming in just to get out of the sun, even when it was cloudy it was too hot. A drastic change from when I was a child living in the same village. A data center in New Mexico will push those levels higher. They're already predicted to be higher this year and higher again next. Carbon dioxide has proven time and time again that is causes the temperature of the earth to rise. I hear ambulances passing my home, my work and my vehicle daily due to high temperature sending people into heat related seizures. It was never like this when I was young and with no restrictions on pollutants, like this data center, it will only get worse. New Mexico as a state was unsettlable for generations as it was hard to find water for even wells. Our Rio Grande in nearly dry, a data center uses millions of gallons of water to cool it. In a desert state, there are few places to get that much water. That will cause more communities to suffer, especially those nearest to Project Jupiter. That is added to the high altitude our state sits at in general. Pollutants have to travel less distance to reach our ozone layer. We have a much higher responsibility to protect our air quality because of that. I sincerely ask my state representatives, is a data center really worth the harm you will cause to not just our state but also our people? The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. The people of Dona Ana County should have a say in such a large project that would effect their community and way of life. Should this permit not be denied there should be a hearing provided - in English and Spanish - for community members to participate and state their concerns.	1	Merged Document	No	[redacted]		Yes	Yes				Yes			8/17/2026
Rachel	Colean	Dear Secretary and staff, Please schedule a public hearing on the Jupiter application. The applicants are flooding our public zone with disingenuous PR and have been illegally misrepresenting citizen's views. New Mexicans need you to stand firm in protecting the public interest. Jupiter is not in the public interest either short term or long term. Just the air permit proposal itself is insanely disqualifying. This is from a social media post by Mitchell Freedman from this morning: I agree wholeheartedly that New Mexico has a better path forward than letting these outside mega-corporations abuse us. "There are much more visionary policies progressives support which would more successfully diversify our state's economy, starting with robust infrastructure development to allow small communities throughout the state to be connected to each other. This is called preparing for success while giving jobs to so many here who will gain great skills. This would be concurrent with water policies that help first and foremost ranchers/farmers save and recycle their water (they use 70% of the water, folks, not your five minute shower)...It's just about helping others who are connected to the rest of us. We who live in suburban/urban areas can show we truly care about the lives of rural New Mexico by helping them directly through mass transit development and water conservation programs. Not private prisons. Not energy and water eating, and noise polluting, AI data centers. Not more missile plants. This State's physical beauty can be preserved with the type of development that helps humans and the creatures with whom we share this space." Please support the people you are sworn to serve by treating this application with the utmost due diligence, including by holding a public hearing, and enforcing the governor's Climate Action Plan and ozone limits. Sincerely Rachel Coleman Albuquerque	1	Merged Document	No	[redacted]		Yes		Yes		Yes		Yes		8/17/2026
Marcia	deChadenedes	Dear NMED staff, My name is Marcia Dechadenedes, I am a resident of Santa Fe and have been a property owner in Sierra County and Santa Fe County for the last 25 years. I am deeply concerned with the Project Jupiter undertaking presently underway. This company has demonstrated its disregard for the law and public interest by changing its name after being turned down the first time, falsely representing elected officials advocacy for their project, and worst of all suppressing the harm to settings, communities, and the environment. Their disclosure of impacts are limited and unrealistic. Their attempts to meet the interests of non-English speaking residents are nonexistent. Tribes and Pueblos in the area have not been properly informed and engaged in the clearance of this activity. I myself am a retired land management professional and I have many times witnessed industries obfuscating their interests and impacts, and this is a classic case. No one wants to experience the damage the greenhouse gases and pollutants associated with fuel cell technology. The sound, alone, of these centers seriously impairs life quality for humans and other desert dwelling animals. I urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Thank you for this opportunity to comment! Marcia deChadenedes	1	Merged Document	No	[redacted]			Yes	Yes		Yes				8/17/2026
Pablo	Marquez	In support because the money is very much needed, we need more resources here in NM. It could help in housing and more shelters that also accommodate therapy animals, also invest in programs that don't give up on struggling individuals so easily. Sincerely, Pablo Marquez	1	Merged Document	No	[redacted]				Yes						8/17/2026
Anthony	Montoya	New Mexico cannot support a big data center as we already have enough issues with water as it is. It's not worth it.	1	Merged Document	No	[redacted]		Yes								8/17/2026
Zachary	Ramsey	I was approached by a canvasser outside of Walgreens off Lomas and Carlisle in Abq NM. The canvasser asked if I would support protecting the water rights which I agreed to. As I was leaving I noticed he was wearing a project jupiter shirt. So i think i agreed to something related to Project Jupiter. If that was the case, I strongly oppose project jupiter and dont believe a data center in New Mexico and/or surrounding states will benefit anyone aside from large corporations. We hardly have enough water as is. I support AI but data centers in areas experiencing severe droughts should not be supported.	1	Merged Document	No	[redacted]		Yes								8/17/2026
Billy	Dytzel	Any data center that is to be built in NM should be powered fully by renewable sources, and should not use any of our citizens water to run it. Water is for the people, not companies! The reduced air quality in the area that this project would create is extremely troubling. The benefits of the project do NOT outweigh the costs. Reject this proposal.	1	Merged Document	No	[redacted]		Yes	Yes							8/17/2026
Marcy	Scott	I am strongly opposed to granting the air quality permit for the Yucca Growth Infrastructure Microgrid. Living along the southern Rio Grande as a Dona Ana County resident for more than two decades, my family has been shocked to see firsthand of how quickly the pervasive extreme drought and lack of year round flow in the river has severely shrunk the water table of the Mesilla Valley and desiccated once thriving native vegetation and habitat for wildlife. We already struggle to keep our intentionally drought-tolerant landscape alive, and believe that the substantial stresses Project Jupiter will put on our fragile water supply and related energy demands will severely impact all county residents, both near to the project area and beyond. The actual facts offered by the developers throughout this process so far have been elusive, misleading, and constantly mutating and I believe that much more true fact-finding and truth-telling is urgently needed before any more permits are granted. Thank you for your consideration. Marcy Scott Las Cruces	1	Merged Document	No	[redacted]		Yes	Yes	Yes						8/17/2026
Mariel	Nanasi		36	Merged Document	Yes	[redacted]	Yes								Yes	8/17/2026
Azriela	Thom	I am a New Mexico resident and I am writing because I am concerned about the risks and harm that Project Jupiter will pose for New Mexicans. I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Dona Ana County. Granting a permit to emit over 10 million metric tons of CO_2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. I am a young adult and the building of this data center here has the potential to affect me and my loved ones for decades. AI is not a necessity, so why are we wasting our water, clean air, environment, and quality of life on a data center to keep it going? I fear for the kind of life, or lack thereof, we will have to face if this data center is built. We only get one Earth, and if we continue to treat it in this way, it will no longer be able to sustain us. Where does it stop? This data center? The next one? Our resources are not infinite, and while we are still facing issues with the climate crisis, deforestation, poverty, world hunger, a lack of clean water for all, and so much more it would be remiss to toss in another issue for us to eventually deal with. Instead of thinking about the money this might bring us, we must think about the lasting affects this data center will have on our state and its people. The application relies on an unproven, unregulatable, and inadequately tested design: - Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest operating Bloom installation is a 40 MW facility - 60 times smaller than what is proposed here. Scaling this technology to a mega-utility application remains entirely unproven. - Suspect Estimates & Inadequate Testing: The emissions data provided is based on testing of a single, 65 kW unit four times for four hours. Extrapolating data from a unit 37,876 times smaller than the proposed plant capacity - and adjusting it with an arbitrary 15% safety margin - fails to provide credible empirical evidence. The emissions data provided by the company cannot be trusted. - Enforcement Impossibility: The design routes 2,275 individual cells through separate stacks with no add-on pollution control mechanisms or integrated continuous monitoring for particulate matter, VOCs, or shifting CO_2 intensity. NMED cannot practically enforce compliance under 20.2.72.210 NMAC across thousands of individual, degrading units. - Severe Public Health & Environmental Impacts: The microgrid will emit 161.2 tons/year of CO and 124 tons/year of VOCs near existing EPA non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.6 degrees Fahrenheit in a sweltering desert climate, threatening vulnerable populations. Furthermore, concentrating 10M metric tons of climate-warming CO_2 into 275 acres - exceeding the combined emissions of Albuquerque, Santa Fe, and Las Cruces - creates localized health risks. Emerging 2025-2026 research links elevated CO_2 levels to permanent changes in human blood chemistry, oxidative stress, and cognitive decline. Because CO_2 sensitivity exists on a normal spectrum, even minor baseline increases can induce anxiety and panic attacks in sensitive individuals. YGI must not be allowed to greenwash a fossil-fueled plant that erases New Mexico's climate progress. I urge the NMED to outright reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I implore the department to hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology and to investigate these severe community impacts.	2	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes	Yes		Yes		8/17/2026
Robert	Delahanty	I am writing to express my non support for Project Jupiter, I believe the project is being pushed forward too fast and without public approval. I also think the water usage is a big issue that needs to be addressed. Sincerely,	1	Merged Document	No	[redacted]		Yes								8/17/2026
Nicole	MacPhee	I am a wildlife biologist and botanist with extensive experience working for federal agencies and the private sector. I presently work in compliance for construction and development. Although I am aware that this is an application for an air quality permit and not a land use authorization permit, I strongly urge NMED to reject this application and not approve this permit. We have seen how air quality is affected by data center outputs countless times in other states who do not have the water crisis we are currently suffering. In addition to air pollution from general operations, it is a known fact that data center consumption of water is astronomically more than casual use, which not only affects our water supply (and thus our human rights), but the quantity of water available to the environment. Air quality issues are directly influenced by the presence of water in the landscape, impacting the stabilization of soils via perennial vegetation. New Mexico is one of the most speciose states for vegetation and this region in particular safeguards numerous desert plant species that cannot be found anywhere else in the world. I understand we can't stop the land clearing, but you have a choice to make on whether this permit is approved. You know it's unethical and you know the people don't want this. Reject it. Represent us, the plants, the animals, and the very air we all breathe like you are supposed to. Do not succumb to corporate interests.	1	Merged Document	No	[redacted]		Yes	Yes	Yes						8/17/2026
Kelly	Cockrell	I am against Project Jupiter and am asking that you not approve the air quality permit that YGI has applied for. Please extend the commenting for another 60 days so the public can understand the what's at stake. I myself witnessed a woman hired by YGI at an ABQ bus stop asking people to sign a paper giving their opinion and it was disingenuous because the documents were being falsified in favor of the project. Our state is suffering from massive drought and we cannot afford to provide any more water to give to these data centers. Tell them to got to states that have much more water. Please do not provide YGI with this permit. Thank you	1	Merged Document	No	[redacted]		Yes	Yes					Yes		8/17/2026
Stella	Bucklin	Hello I am Stella and I live in area code 87123 and I strongly oppose Project Jupiter. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. Not to mention the health effects it would have on the schools right next to the site, mostly full of Hispanic children. I am urging you to please reconsider the construction of AI data centers on New Mexican land. Please consider our future generations health and livelihood.	1	Merged Document	No	[redacted]			Yes	Yes						8/17/2026
David	Marble	Let's be honest. Non of us need another data center, and we live in the desert. Beginning construction on this project would be the worst idea for New Mexicans. We are already under extreme water restrictions, and the local government just keeps trying to break the law to.get this data center in. Why are they in such a rush? I jave already voted for officials to block this project and I will continue to support elected officials that are looking out for the citizens best interest, instead of lining their own pockets.	1	Merged Document	No	[redacted]		Yes								8/17/2026
Lora	Sturm	I have major concerns about the environmental impact of this company's proposed enormous natural gas emissions potential, and the use of Bloom Energy's solid oxide fuel cells, known to create hazardous waste for which there is a history of poor disposal practices. Furthermore, it seems incredibly irresponsible to build something that requires so much water in our state when our water is already so scarce. Finally, the placement in Doña Ana county is unfair to the residents who already experience disproportionate pollution.	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes	Yes			8/17/2026
Eric	Enriquez				Yes	[redacted]	Yes								Yes	8/17/2026
Conner	Griswold	Project Jupiter will dangerously strain our already troubled water system, with gas power plants potentially consuming nearly 1 million gallons per day, emitting over 14 million tons of greenhouse gases annually, more than Albuquerque and Las Cruces combined. We cannot afford to gamble our finite water and clean air on this project.	1	Merged Document	No	[redacted]		Yes	Yes	Yes						8/17/2026
Maria	Burciaga	As a City Councilor for District 5 in Sunland Park, I am constantly thinking about how our community can create lasting opportunities for the people who call Sunland Park home. Families here value hard work, family traditions, and the culture that makes our border region so unique. They want their children to have good options without having to leave the place where they grew up. That is why I am writing in support of the air quality permit applications for Project Jupiter. Project Jupiter offers the kind of economic opportunity that can strengthen a community for generations. The thousands of construction jobs and the many long term roles that follow would provide steady, wellpaying employment for residents. When people have stable, well paying jobs, they can support their families, keep up with household needs, and enjoy a better quality of life. These jobs also help keep families together, giving young adults a reason to build their future in Sunland Park rather than moving away. Education and workforce development are equally important. The project's commitment to partnering with local schools, workforce programs, and higher education institutions will help prepare our youth for the careers growing in our region. When young people can access training and find meaningful work in their own community, they gain confidence, purpose, and a sense of belonging. This directly supports our long term goals for empowering youth and creating pathways that honor our culture and traditions. also appreciate that the project funds its own infrastructure, including power and water systems. This responsible planning ensures that growth does not place additional burdens on local families, and that new development supports rather than strains our shared resources. Sunland Park families deserve opportunities that allow them to thrive without having to compromise the values that make our community special. Project Jupiter can help us build a stronger economy while protecting our quality of life and supporting the next generation. Thank you for your time and consideration.	1	Merged Document	Yes	[redacted]		Yes	Yes							8/17/2026
Chris	Martín	NO on Yucca Growth Infrastructure Air Quality permit, a.k.a. "Project Jupiter". There is NOT ENOUGH WATER to support this. Consumers are put on flow-restrictors and watering schedules to conserve water, but then NM is considering opening the sluices for Oracle/Project Juniper? We are having record heat and drought, but are thinking about adding this veritable furnace to our desert? No. Water can't be replaced. Please DO NOT APPROVE this permit. Thank you. Chris Martín	1	Merged Document	No	[redacted]		Yes	Yes							8/17/2026
Sergio	Hernandez	Sergio Hernandez NO on Yucca Growth Infrastructure Air Quality permit, a.k.a. "Project Jupiter". There is NOT ENOUGH WATER to support this. Consumers are put on flow-restrictors and watering schedules to conserve water, but then NM is considering opening the sluices for Oracle/Project Juniper? We are having record heat and drought, but are thinking about adding this veritable furnace to our desert? No. Water can't be replaced. Please DO NOT APPROVE this permit. Thank you.	1	Merged Document	No	[redacted]		Yes	Yes							8/17/2026
Marina	Butler	Bloom Energy's air quality permit should be denied. Doña Ana County is full of vibrant community members that deserve clean air. That county is already disproportionately affected by environmental pollution and Bloom Energy is known to dump hazardous waste that harms communities. If this permit is not denied, the public deserves an additional 60 days to comment on the permit in order to protect our beloved communities. A public hearing needs to be held in Santa Theresa in English and Spanish, with options to attend virtually so that community members can participate. Thank you.	1	Merged Document	No	[redacted]			Yes	Yes			Yes	Yes		8/17/2026

Logan	Adams	I am a son of Las Cruces, New Mexico, born, raised and living here my entire life, and I write here today to implore NMED to deny this application. The amounts and types of emissions that will be be created as a result of approving the permit, the same emissions that will be pumped into our skies and sucked into our lungs with every breath we take for the decades to come, are nothing short of egregious. Over 10 million tons worth per year, and for what? To line the pockets of out-of-state trillion-dollar companies? NMED's mission, YOUR MISSION who receives these comments, "is to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations". Making the ultra-rich richer at any cost does not make New Mexico's present or future generations prosper. To the contrary, when companies extract what they wish from us be it air quality, water, our workers, our sovereignty, our people's ability to participate in civil government and see their needs represented in it, it is always a direct attack on that prosperous future. If you wish to honor that mission, if its words mean anything at all to you, you must find the backbone to tell Bloom and Project Jupiter no. You must shrug off the pressure being placed upon your shoulders from the governor and those state officers intent to sell out New Mexico's people. You must tell the truth, that this application's approval will harm our health and our lands and that it must be stopped. If you wish to comply with your own mission, you must deny this application. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. But will you do the right thing?	1	Merged Document	No	[redacted]			Yes	Yes	Yes				Yes	8/17/2026
Francine	Byers	Dear New Mexico Environment Department (NMED) Permitting Staff, I am writing to formally object to the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for the proposed Project Jupiter microgrid. This project represents an unacceptable risk to our environment, our public health, and our long-term regional stability. I strongly oppose this project and urge NMED to reject these permits for the following reasons: Massive Emissions & Air Pollution - The proposed natural gas-powered fuel cell microgrid will release millions of tons of carbon dioxide annually, along with hazardous air pollutants like nitrogen oxides and carbon monoxide. This is a severe threat to our air quality and a step backward for New Mexico's climate goals. Severe Water Strain - Constructing a massive AI data center campus in the Chihuahuan Desert poses a catastrophic drain on our already limited and precious water resources. Corporate Subsidies at Public Expense - Utility-backed data centers of this scale threaten to drive up energy rates for everyday New Mexicans, essentially forcing local communities to subsidize private tech infrastructure. Lack of Accountability - The developers' track record shows unauthorized use of New Mexico residents' names to generate fake supportive comments. This shows their massive disregard for community input and transparency.	1	Merged Document	No				Yes	Yes	Yes		Yes		Yes	8/17/2026
Louis	Scuderi	I see no benefit for people who live here to approve this application. Air quality has already noticeably decreased due to industrial activities and YGI Microgrid appears to provide no benefit. Even if it did, there appears to be no reason whatever to approve this.	1	Merged Document	No					Yes						8/17/2026
Jibreel	Muhammad	New Mexico is already in a terrible drought, and the Rio Grande river is dried up all of the way through Albuquerque. These data centers will use up our already-scarce water, and drive up energy prices for everyone, and its incredibly shortsighted to allow another in our state right now. We should be demanding that these data centers produce their own electricity by building more power infrastructure, and not allow them to touch a single drop of our water.	1	Merged Document	No				Yes				Yes			8/17/2026
Liz	Speckledrock	Good Afternoon, I am writing to express my OPPOSITION to Project Jupiter. Once again the many will suffer for the benefit of the few. This Data Center will produce more greenhouse gasses then the largest cities in the state and consume massive amount of fresh water. All the jobs that are promised from this project are temporary, but the damage will last for generations. I am urging you to please reconsider the construction of this AI data center in southern New Mexico	1	Merged Document	No				Yes	Yes						8/17/2026
Louie	Alvarado	We need more transparency about how and why they are being used?	1	Merged Document	No										Yes	8/17/2026
Fellow	New Mexican	I am writing to express my disdain for Project Jupiter, which I believe offers little to no benefits for our community. Project Jupiter, despite making claims that it won't, will likely drive up energy costs, leading to an affordability crisis, and drain New Mexico's water supply by using the same amount of water it takes to provide for a small town. It will provide short-term jobs in the form of construction, which will not be sustainable once the building is complete. It has been proven that data centers are incredibly harmful to the environment, including noise pollution, which will drive away local wildlife. I urge the New Mexico Environment Department to reject this project. Sincerely, A Fellow New Mexican	1	Merged Document	No				Yes		Yes		Yes			8/17/2026
We	The people	I am writing to express my non support for Project Jupiter, which I believe offers significant downfall for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. All for the purpose of a "data center", which in turn, violates your privacy rights. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 MILLION in direct support for schools, (which will be used as a selling point), infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to disapprove this important project. It's violating our privacy rights. What is the need for a "data center",? so the government can keep tabs on you. Sincerely, We the people	1	Merged Document	No				Yes		Yes					8/17/2026
Rosario	Gonzales	I'm writting to express my displeasure at the proposal of project jumper, the air quality it will affect, the lack of water and overall health concerns for my community. I encourage the cease and desist of any future development and planning.	1	Merged Document	No				Yes	Yes	Yes					8/17/2026
Gloria	Mastic	I am NOT in support of the data center for various reasons. First of all it was approved WITHOUT the vote or approval of the people, the local residents. It has been proven that these centers waste our water and electricity and raise the cost of these necessities for the locals. They also produce air pollution and noise pollution. All these things are detrimental to the environment and the population. NO to Data Centers!	1	Merged Document	No				Yes		Yes		Yes			8/17/2026
Thara	Lechuga	I am writing to express that I am AGAINST Project Jupiter, which I believe will ruin New Mexico. We live in a desert and water is already a huge issue for our state. Yesterday I spoke with a representative from the organization ORICLE and gave my information to include as NOT supporting Project Jupiter. I wanted to respond again myself to ensure that my correct response is recoded and passed on to New Mexico Legislators. I urge the New Mexico Environment Department NOT to approve Project Jupiter Sincerely, Thara K Lechuga 505-234-2334	1	Merged Document	No				Yes		Yes					8/17/2026
Thomas	Muniz	I am not in support of any Jupiter project and what resources they need to be active and useful I do not agree with the water consumption with the energy that is produced and the heat for local residents and wildlife project Jupiter is not welcome in New Mexico please go somewhere underwater like the ocean or somewhere else but we do not need the jobs will not be created for local people because they are going to be Way out of reach and it the the local education will not benefit and and jobs will go down because labor will be powered by ai and AI would be taking jobs away from people so I am in no support for this project at all it hurts New Mexico it hurts humanity but I hope you guys are doing well and make better choices with projects in New Mexico because this one we cannot afford to have.	1	Merged Document	No				Yes		Yes					8/17/2026
Sol	Noir	I am writing to express my disapproval for Project Jupiter. Oracle was created by Larry Ellison in the 1970s for the CIA, which has been invading our privacy. Oracle has also been collecting data and using it to train AI defense systems, used by Israel in its genocide in Gaza. He has lied before and he will do it again. Where exactly is the money coming from? What are fuel cells? And why should we believe he wont leave the county in a worse off place than before? By supporting this project, we are supporting the genocide of a people. I hope this doesnt happen.	1	Merged Document	No								Yes			8/17/2026
Mark	jarner	I oppose project Jupiter because of the vast amounts of water it will use and the air pollution it will cause! Sincerely, Mark Jarner	1	Merged Document	No				Yes		Yes					8/17/2026
Chloe	Kendall	Im writing this message in opposition of Project Jupiter. A single AI center uses as much electricity as 80,000 homes. When you say that the prices of the electrical bills will not rise for people in New Mexico, it is just simply not true. The building of this data center will continue to contribute the destruction of our environment. You are actively harming the people who not only live in New Mexico, but America in general. We do not need AI to live, it is not a necessity like water, food, and shelter. America does not NEED more data centers to fuel the use of things like AI.	1	Merged Document	No				Yes		Yes		Yes			8/17/2026
Ashley	Rivera	I am writing to express my OPPOSITION for project jupiter. This project and its coordinators have disregarded the community of Sunland Park and Santa Teresa. This project will bring pollution, disrupt the environment and depreciate the quality of life for thousands of New Mexicans who have ALREADY been dealing with inadequate water in the area. Promises of money should not be at the front of this decision. New Mexico is NOT poor and we need to protect one another from outsiders who come to exploit our resources. I urge the New Mexico Environment Department to reject the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application	1	Merged Document	No				Yes	Yes	Yes					8/17/2026
Anonymous	Anonymous	Concerned about water: lots of water consumption and water containimation. High use of electricity. Lots of land.	1	Merged Document	No				Yes				Yes			8/17/2026
Jacob	Chirin	I am opposed to Project Jupiter. This seems like yet another case of a large corporation strong-arming a small municipality into an offer too good to be true. First, on water: The closed loop system is only mostly closed, and while it does use non-potable, industrial water, that's still water. As I'm writing this the Rio Grande has run dry (Again) and by the forecasts we're in for one of the hottest summers on record. (Again) Second, on power: The fuel cell setup tying in to the local grid is a nice idea, but you know what's nicer? Solar and/or Wind. New Mexico has some of the best places on the planet for it, with vast deaths of sparsely populated land	1	Merged Document	No				Yes				Yes			8/17/2026
Andre	Walker	Economic development should not come at the expense of our water supply and public health. We need investments that protect our natural resources and ensure a sustainable future for southern New Mexico. YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	1	Merged Document	No				Yes		Yes		Yes		Yes	8/17/2026
Marisa	Thompson	I urge NMED to deny the Yucca Growth Infrastructure (YGI) Microgrid Air Quality Construction Permit, or at minimum require a full public hearing and the most rigorous environmental review possible with ample time for full, transparent consideration and public input. Recent reporting has raised serious concerns about the project's cumulative air pollution impacts, greenhouse gas emissions, and whether permit applications have been structured in ways that minimize regulatory scrutiny. Doña Ana County already struggles with ozone pollution, and approving another major emissions source without comprehensive review would put public health at unnecessary risk. New Mexico should not compromise clean air protections for a project of this scale. While this permit addresses air quality, it cannot be separated from the broader consequences of supporting one of the largest proposed AI data center developments in the country, like water use and pollution. Please prioritize transparency, independent analysis, and the long-term health of our communities over expedited permitting.	1	Merged Document	No				Yes	Yes	Yes	Yes			Yes	8/17/2026
Michael	Carrie	I got a pamphlet with a link supporting project Jupiter outside a Walgreens off of Rinconada in Las Cruces Nm. They wanted me to send a form letter parroting their BS. I DO NOT SUPPORT PROJECT JUPITER. Nearly every community that has taken in a data center has regretted it and the 'thousands of jobs' they say will come here will only be here during construction. It is the worst kind of infrastructure that makes energy prices higher for everyone for little benefit to the community. Their promises of it using 'only two homes a day' worth of water is clearly BS, in three years when the cards become obsolete the data center will become useless, and all of that supposes that this whole ponzi scheme of an industry doesn't collapse tomorrow. To say that it looks like a bubble is a massive understatement! This is a horrible idea and any research into it at the locations of other data centers will prove my point. Thank you for reading my rant, be careful about astroturfing campaigns from Project Jupiter, and I hope whoever reads this has a good day. Sincerely, Michael Carrie	1	Merged Document	No				Yes							8/17/2026
Madison	Manning	Itsap a good idea but if it's going to effect our environment I feel it wouldn't help.	1	Merged Document	No						Yes					8/17/2026
Bailey	Hunt	Definitely wary of data centers in general. I have a strong moral issue with collecting data both actively and passively without individuals direct consent. Especially when used for AI and Machine Learning. Bailey Hunt	1	Merged Document	No		No	Oppose Non-Substantive								8/17/2026

Jose	Lopez	I'm concerned on the water usage and the electricity usage.	1	No	[redacted]														
Bailey	Hunt	Definitely wary of data centers in general. I have a strong moral issue with collecting data both actively and passively without individuals direct consent. Especially when used for AI and Machine Learning. Bailey Hunt	Mirrored Document 1	No								Yes			Yes			8/27/2026
Tina	Kachele	My name is Tina Kachele. I live in Albuquerque, and I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I urge the New Mexico Environment Department to REJECT Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid in Doña Ana County. I am a 26-year resident of Albuquerque. I raised my daughter here and I plan to live here for many years to come. Moreover, I am a concerned community member who has already seen the impacts of climate change, poorly planned development, and loss of natural resources (especially WATER) to New Mexicans, especially those who live in underserved and under-resourced areas of our state. The project's proposed fuel cell powered grid is concerning for many reasons: – It would still produce a high level of greenhouse gas and toxic pollutants. – The technology generates toxic waste, and the process for handling the waste is still unclear. – Fuel cell technology or a centralized waste system has never been tried at this scale. – Surrounding communities' air will be severely impacted by this development. I urge the NMED to REJECT YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Thank you for hearing my concerns. Sincerely, Tina Kachele Albuquerque	Mirrored Document 1	No		No	Oppose Non-Substantive							8/27/2026
Blanca	Hernandez	As a New Mexican, I strongly urge the New Mexico Environment Department to hold a public hearing on Project Jupiter and deny this air permit application. New Mexico should not become a sacrifice zone for massive corporations seeking to profit while our communities bear the pollution, public health risks, and long-term environmental consequences. Replacing gas turbines with "methane fuel cells" does not resolve the fundamental concerns about the enormous scale and impact of this project. Economic development should serve New Mexicans, not come at our expense. Our air, water, health, and climate are public resources, not bargaining chips for corporate interests. New Mexicans deserve transparency, accountability, and a meaningful voice in decisions that will shape our communities for generations. Hold a public hearing, require the highest standards of environmental and public health analysis, and deny this permit.	Mirrored Document 1	No				Yes	Yes	Yes	Yes	Yes	8/27/2026
Viktoria	Avalotis	Hello, I moved to New Mexico from the East Coast because I fell in love with the culture and natural beauty of this land. It would be a great disservice to this state to allow a data center to be built here and pollute the magical land of enchantment. This land belongs to the native tribes and are sacred to the culture here. It is not just to destroy this. Sincerely, Viktoria Avalotis	Mirrored Document 1	No				Yes		Yes	Yes	Yes	8/27/2026
Connie	Albert	The data center would utilize more energy and water and with our limited resources. In this the best use of what we have left to survive. We need water for the people. While technology is in demand we have to figure out a better way than a data center.	Mirrored Document 1	No		No	Oppose Non-Substantive							8/27/2026
Angela	Sheridan	I am writing to express my concern for Project Jupiter, which I believe does not offer significant benefits for our community. I am strongly against any with ai. Due to security reasons and privacy concerns. I urge the New Mexico Environment Department to not approve this. Sincerely, Angela Sheridan	Mirrored Document 1	No				Yes						8/27/2026
Garrett	White	Im worried about the environmental and water pollutions for the state.	Mirrored Document 1	No						Yes								8/27/2026
Molly	Booker	I soundly and completely oppose the construction of the data center referred to as "Project Jupiter." Under the current construction plans, and due to litigation in other states where other data centers have caused irreparable harm to water systems, and all estimates for the consumption of public utilities for this single business, I think all permits associated with this proposal should be denied.	Mirrored Document 1	No				Yes		Yes								8/27/2026
C.J.	White	Project Jupiter's data centers demand unnecessary amounts of drinking water from a state and region already facing water shortages. The Rio Grande has already dried up here in Albuquerque, and yet these AI companies are interested in taking even more water even further down stream. Do not let this project go through for the sake of not only Doña Ana and its surrounding counties, but for New Mexico and our neighboring states both in the US and our friends across the river in Mexico	Mirrored Document 1	No				Yes										8/27/2026
Sarah	Sexson	I am writing to express my opposition for Project Jupiter, which I believe offers significant risks for our community and environment. I have also come to learn of the shady tactics used by volunteers on this project, who submitted a comment of support on my behalf without my knowledge after I expressed opposition to this and all data center projects. I urge the New Mexico Environment Department to reject this project. Sincerely, Sarah Sexson	Mirrored Document 1	No				Yes										8/27/2026
Beverly Jimmerson	Jimmerson	We do not need a data center in nm. We have thousands more than china, data centers are pollutants. Using tons of water not being able to spare. I am writing to express my concerns for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,300 project-supported jobs. Furthermore, Project Jupiter has committed $90 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, Beverly Jimmerson Jimmerson	Mirrored Document 1	No							Yes							8/27/2026
Steven	Foidy	Would like to see how big the project is going to be and had concerns about the water usage and wants it to be explained easier to dumb it down so it's easier to understand.	Mirrored Document 1	No				Yes		Yes								8/27/2026
Mariano	Chavez	I am writing to express my concern for the water usage in a high drought environment Sincerely, Mariano	[redacted] 1	No				Yes										[redacted]
Bob	Guarnieri	Overall I think we need to be looking into AI but the pace for this project is moving to quickly, and its not being totally open to the community, we need to slow down to make sure we dont make a mess of the environment. Sincerely, Bob G	Mirrored Document 1	No				Yes		Yes								8/27/2026
Dawn	Arizova	Project Jupiter is a terrible thing that will endanger the health and well being of the people and animals of NM. I strongly oppose this proposed project as I am concerned that the developers are not being transparent about how badly this will affect our vulnerable community. WE DO NOT HAVE ENOUGH WATER TO SUPPORT THIS. THE PROMISED JOBS WILL GO TO NON NEW MEXICANS. THERE ARE STUDIED NEGATIVE HEALTH EFFECTS FROM LIVING CLOSE TO DATA CENTERS. SAY NO NEW MEXICO! signed, Dawn Arizova	Mirrored Document 1	No							Yes						8/27/2026
Lisa	Aguilar	As a New Mexico resident, I oppose both this permit for microgrid construction and Project Jupiter data center completely. This endeavor asks too much of our state water and land resources. And after construction, it has no concrete deliverables for the citizens of this state, who will bear all the lifetime costs of its existence. Those costs are very expensive in every realm: financial, environmental and physiological. The proposed project's carbon dioxide emissions alone are outrageous to ask us to live with - the emissions pollution equivalent of all the largest cities in New Mexico combined. We the citizens of New Mexico have no reason to believe we will benefit from this, yet we are asked to assume all the risk of the project's failures. Those risks to our future residents (the precious air quality (already often endangered) and the risks to our physical bodies from the pollution caused by the enormous scale of this unproven project. Simply : this project only takes from New Mexicans and gives back to us nothing we can even use. I would never accept such a deal in my everyday life, so I don't understand why the state of New Mexico would consider such a bad exchange. Respectfully, I ask you to deny this permit and the project from going forward and hurting New Mexicans. Thank you for reading. Best, Lisa Aguilar	Mirrored Document 1	No				Yes		Yes								8/27/2026
Patrick	Gendron	Concerned about water waste and the money going into the programs	Mirrored Document 1	No				Yes	Yes	Yes								8/27/2026
Michelle	Valdovinos	I submit this comment in opposition to Air Quality Construction Permit Application 10833 proposed by Yucca Growth Infrastructure (YGI) in southern Doña Ana County. This application is based on technology that has never been deployed at the scale proposed and includes projected pollution totals based on inadequate emissions testing procedures that cannot be relied on for factual results and it proposes a design that does not provide avenues for verifiable and accurate emissions testing and enforcement. In addition, the amount of jobs claiming to be provided to the community is a gross exaggeration as many of these jobs will be given to those currently living outside of the county and state. I urge you as a citizen that cares deeply for this county, this state, and it's limited resources, we don't need this mega-corporation polluting our air & water.	Mirrored Document 1	No				Yes										8/27/2026
Robynn	Dixon	I am not in support of another AI data center In NM . I am concerned about the affects of AI in every walk of life, resources, legal ramifications of using AI in meetings, all potential professions that will be, not possibly be affected by AI's affects on tomorrow's youth. I am concerned about AI's Sincerely, R. Dixon	Mirrored Document 1	No				Yes	Yes	Yes	Yes							8/27/2026
Lorenzo	Ledesma	The public comments are after the fact and there is a concern the our border town and states of water use and our droughts. Our farmers need the water use. Will this recycle water harm the agriculture in our community. And there are concerns about population growth. I urge the New Mexico Environment Department to look into this important project. Sincerely, Lorenzo Lorenzo	Mirrored Document 1	No									Yes					8/27/2026
Ken	Faulkner	Please do not build it here the water issue here we live in a water deprived area think I urge the New Mexico Environment Department to not approve this important project. Sincerely, Ken Faulkner	Mirrored Document 1	No				Yes		Yes								8/27/2026
[redacted]			Mirrored Document					Yes		Yes								8/27/2026

Andrew	Ramirez	I think it's a great idea but I also think the rail runner should extended to other counties it is no currently accessible. People should be able to benefit all over the state especially to commute for work opportunities. Sincerely, Bryan Korrastinsky	1		No	[redacted]									
Bobby	Gallegos	I am opposed because of the water usage and the credebility they provided of the water usage Bobby gallegos	1	Merged Document	No	[redacted]	No	Non-Substantive							8/17/2026
Gus	Gonzalez	They are against the data center due to concerns on the water being used	1	Merged Document	No	[redacted]			Yes						8/17/2026
Gus	Gonzalez	No to data centers that arent looking to contribute additional community guarantees of beneficial services in neighboring areas. Taxes alone doesnt suffice. Guaranteed minimum permanent jobs, not temporary. No excess water usage. Closed loop system.	1	Merged Document	No	[redacted]			Yes						8/17/2026
Shailyn	Williams	I am writing to express my DISTAIN for Project Jupiter, which I believe offers only negative outcomes for our community. The Rio Grande is dry, we have no need for large scale data centers attempting to suck away our resources. New Mexicans can all agree that this project is harmful and will not be sustainable for our community. I urge the New Mexico Environment Department to STOP this project at any cost necessary. Sincerely, Shailyn Williams	1	Merged Document	No	[redacted]			Yes						8/17/2026
James	Mar	As a resident and citizen of New Mexico I am 100% against using our limited resources to support a data center. With the ongoing drought and uncertainty over future weather patterns it is imprudent to support these type of resource intensive projects regardless of potential tax income. No to Yucca Growth Infrastructure.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Azeb	Assefa	My name is Azeb. I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Dona Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants. - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology or a centralized waste system has never occurred at this scale. - Surrounding communities' air will be negatively impacted by this development. The amount of carbon this data center would release in one year alone is more than that released in the three biggest cities in New Mexico combined, which is utterly ridiculous and will undo our efforts to reduce carbon emissions over the past couple decades. I urge the NMED to outright reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]			Yes						8/17/2026
Savanna	Nguyen	Dear NMED staff, My name is Savanna Nguyen. I live in North Carolina, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I may not live in New Mexico to be affected by these policies, but I have friends that do and I care deeply about their wellbeing, along with their family as well. With Project Jupiter, there would not be any benefits for the wellbeing of those who live in affected areas, producing greenhouse gases, toxic waste with no proper methods on how to handle and dispose of it properly. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Savanna Nguyen.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Zoe	Meyrand	My name and information is definitely being used to say I approve of project Jupiter with the automated message TWICE! but I DO NOT WANT PROJECT JUPITER. IT WILL HARM OUR BREATHING AIR NOT ONLY FOR HUMANS BUT FOR OUR WILDLIFE AND LIVESTOCK. DATA CENTERS HAVE ALSO BEEN KNOWN TO LET OFF 24/7 NOISE THAT CAN BE HEARD UP TO 2 MILES AWAY. DO I REALLY HAVE TO LIST OUT FACTS EVERYONES KNOWS IN ORDER TO BE HEARD? THE GOVERNMENT DOES NOT CARE ABOUT THE SOULS OF THE PEOPLE WHO LIVE HERE AND THE BLOOD, SWEAT AND TEARS THEY'VE LOST TO ENSURE THEIR FAMILY STAYS ALIVE. WHAT ELSE CAN WE ENDURE? WE ARE A DRY DESERT THAT RELIES ON GROUND WATER, IT DOES NOT REPLENISH ITSELF FAST ENOUGH FOR OUR USAGE NOW, IMAGINE THE DAMAGE THAT WILL HAPPEN WHEN THIS DATA CENTER IS APPROVED? THE ELEPHANT BUTTE AND RIO GRANDE ALREADY STRUGGLE WITH WATER. DONA ANA COUNTY AVERAGES 40-50 DAYS OF RAIN A YEAR. I DO NOT CARE IF IT WILL CREATE THOUSANDS OF JOBS. BILLIONAIRES ALREADY HAVE THE MONEY AND ASSETS TO CREATE HUNDREDS OF THOUSANDS OF JOBS BUT THEY HARBOR THE MONEY AND WEALTH ALL TO THEMSELVES AND PROJECT JUPITER WILL ONLY FILL THEIR POCKETS WITH MORE MONEY WHILE WE THE PEOPLE STILL SUFFER TO PUT FOOD ON THE TABLE! WILL ANYONE READ THIS OR WILL MY WORDS BE TYPED IN VAIN. WHY WONT ANYONE HEAR OUR CRIES!!!! SAY NO TO THE AIR PERMIT SAY NO TO PROJECT JUPITER!!! PLEASE!	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Thomas	Muniz	I'm writing a second comment on this. Website to make sure that my message wasn't changed. Or that there was something added once I left the tablet and that person using it. I am in no support of you guys being in Santa Teresa. I don't want data centers in New Mexico. You guys use up way too much resources. You guys create way too much heat and you guys make way too much noise, and we need less data centers and tracking centers. Please look for another place. I am not in support of the Jupiter project. And I am sending a second email just to make sure My information hasn't been reused or changed. You guys do not have permission to use my email or any information about me. Just my response to you guys being in southern new mexico.Please get out	1	Merged Document	No	[redacted]			Yes		Yes		Yes		8/17/2026
Locke	Locke	I just ran into canvassers walking around downtown Albuquerque handing out pamphlets with misinformation on Project Jupiter. I scanned their QR code and it took me to this site where there was a pre-written comment describing the misinformation. Project Jupiter would be terrible for the state of New Mexico. It would use millions of gallons of water and emit more pollution than NMs three largest cities combined. Deny all of their permit applications.	1	Merged Document	No	[redacted]							Yes		8/17/2026
Sol	Noir	I am writing to express my disapproval for Project Jupiter. Oracle was created by Larry Ellison in the 1970s for the CIA, which has been invading our privacy. Oracle has also been collecting data and using it to train AI defense systems, used by Israel in its genocide in Gaza. He has lied before and he will do it again. Where exactly is the money coming from? What are fuel cells? And why should we believe he wont leave the county in a worse off place than before? By supporting this project, we are supporting the genocide of a people. I hope this doesnt happen.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Rebecca	Mar	As a resident of New Mexico, I am against using our limited resources to support a data center in New Mexico. We have limited water in this state and it should go to our people and our agriculture, not a data center. I am 100% against Yucca Growth Infrastructure.	1	Merged Document	No	[redacted]							Yes		8/17/2026
Abigail	Wood	I am writing because I do NOT support this project. As a resident of New Mexico we cannot destroy dessert life, nor should we expend our water sources for AI. The amount of water needed keeps changing, and the green house gasses that will be expelled would pose a threat to the dessert life. I oppose this data center and everything is stands for. Abigail wood	1	Merged Document	No	[redacted]			Yes						8/17/2026
Deidra	Garcia	I am concerned with the water usage of data centers	1	Merged Document	No	[redacted]			Yes						8/17/2026
Thomas	Muniz	I am not in support of any Jupiter project and what resources they need to be active and useful I do not agree with the water consumption with the energy that is produced and the heat for local residents and wildlife project Jupiter is not welcome in New Mexico please go somewhere underwater like the ocean or somewhere else but we do not need the jobs will not be created for local people because they are going to be Way out of reach and it the the local education will not benefit and and jobs will go down because labor will be powered by ai and AI would be taking jobs away from people so I am in no support for this project at all it hurts New Mexico it hurts humanity but I hope you guys are doing well and make better choices with projects in New Mexico because this one we cannot afford to have.	1	Merged Document	No	[redacted]			Yes						8/17/2026
Ricardo	Luna	I would like Project Jupiter to publish the jobs report they are legally required to file. How else can we track how many New Mexicans are working for Project Jupiter?	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Modesto	Vasquez	I don't want it here. Water usage. Power. Property taxes	1	Merged Document	No	[redacted]						Yes			8/17/2026
Sabrina	Verdoza Rivera	We do not want this data center in our desert. One person affected by poor air quality and noise pollution is one person too many. There are several schools very close to Project Jupiter along with many families that live nearby and they deserve to live a life free of pollutants. They deserve access to clean air and water. Project Jupiter you have got to go!!!!!!!!!!!!!	1	Merged Document	No	[redacted]			Yes						8/17/2026
Shawn	Hayden	This is going to be a resource sucker, you need to generate your own electricity, provide your own water resource, this isnt going to bring as many jobs as you all say. This isnt going to be a beehive like you make it out to be. Once its constructed it runs on its own! I was a systems engineer for 20 year I know!!! Sincerely, Shawn Hayden	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes		8/17/2026
Jose	Lopez	I'm concerned on the water usage and the electricity usage.	1	Merged Document	No	[redacted]			Yes				Yes		8/17/2026
Mary	Schimmel	Our state doesn't have the water needed to support this project. The impact to our communities would be overwhelmingly negative. Please do not approve Project Jupiter.	1	Merged Document	No	[redacted]			Yes				Yes		8/17/2026
Renee	Barron	Project jupiter takes massive amounts of water that we don't have and share with Texas and Mexico and the rio grande.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026

Bernice	Ortiz	That the data center can be built without that much water,new Mexico has a short and we don't need that.		1	No									
			Merged Document						Yes					8/17/2026
Al	Zhu	I am writing in vehement opposition to a data center being built. The ecological damage and likely health effects to humans both concern me deeply. Data centers consume water that our aquifers, rivers, even municipal water supplies cannot spare in a desert. The infrasound and pollution caused by data centers also harm people, including workers and the people who live nearby. I do not support this application in any way		1	No									
			Merged Document						Yes		Yes			8/17/2026
Vincent	Leaper	I feel data centers are used for illegal surveillance and use to violate our rights to illegally deter crime		1	No									
			Merged Document				No	Oppose Non-Substantive						8/17/2026
Joaquin	Montoya	I reject the proposal of Project Jupiter. This proposal would place a large new industrial burden on southern New Mexico at a time when our region already faces serious long-term constraints on water, infrastructure, and environmental resilience. Even if the project uses some non-potable water and closed-loop cooling, it would still create new industrial demand, require major supporting infrastructure, and rely in part on fossil-fuel-based energy systems. I am also deeply concerned by the scale of the public subsidies and tax benefits being offered, which shift substantial risk to the community without clear, enforceable guarantees that local residents will receive proportional long-term benefits. Economic development should strengthen our region without compromising scarce resources or giving away too much public leverage. For these reasons, I ask that Project Jupiter be denied and that the County instead prioritize development that is transparent, sustainable, and truly in the long-term public interest. Joaquin Montoya		1	No									
			Merged Document						Yes		Yes	Yes		8/17/2026
Gus	Gonzalez	I am concerned that the data centers are being used for surveillance of private citizens. And that the government will use our information against us using these Data Centers. Daniel Evans		1	No

			Merged Document						Yes		Yes			8/17/2026
Tony	Brown	I am writing to express my disapproval for Project Jupiter, which I believe offers significant challenges and difficulties for our community. Project Jupiter uses water we dont have, cause hearing and body achs from the constant humming of the equipment and the blight on the beautiful desert landscaping. I urge the New Mexico Environment Department to deny this project. Sincerely Tony Alan Brown		1	No									
			Merged Document						Yes		Yes			8/17/2026
Jet	Traverso	I'm writing to urge NMED to deny this air quality permit. We do not need data centers polluting our air and water. This group has already been fined for mishandling hazardous waste. This is our home and our children deserve to grow up with plentiful clean water and fresh air. Please deny this, or at least extend it so our neighbors can adequately weigh in. Thank you for your time.		1	No									
			Merged Document						Yes	Yes			Yes	8/17/2026
Vanessa	Cordero	I am writing to express my concerns for our community. Project Jupiter will bring nothing good to Doña Ana County. Our water is already scarce, our farmers and community need water and all this project will bring is pollution to our water and environment. You try to green wash it by offering clean drinking water to our community and habitat restoration when all we need is to keep data centers out of here and not create problems! I urge the New Mexico Environment Department to deny this horrible project. Sincerely, Vanessa Cordero		1	No									
			Merged Document						Yes		Yes			8/17/2026
Mark	Eustuace	I support it with the idea of improving infrastructure but as a Native American, I would like to remind the planners and those in charge, that this is still Mother EARTH and anything you do to her, she will do back to us, much worse. Sincerely, Mark Eustuace		1	No									
			Merged Document				No	Oppose Non-Substantive						8/17/2026
Dawn	Azizova	Project Jupiter is a terrible thing that will endanger the heath and well being of the people and animals of NM. I strongly oppose this proposed project as I am concerned that the developers are not being transparent about how badly this will affect our vulnerable community. WE DO NOT HAVE ENOUGH WATER TO SUPPORT THIS. THE PROMISED JOBS WILL GO TO NON NEW MEXICANS. THERE ARE STUDIED NEGATIVE HEALTH EFFECTS FROM LIVING CLOSE TO DATA CENTERS. SAY NO NEW MEXICO! signed, Dawn Azizova		1	No									
			Merged Document						Yes		Yes			8/17/2026
Prentiss	Elder	I am writing to submit my disapproval of the project. As an environmental scientist the impact is to great for such a fragile eco system of the desert of new Mexico.		1	No									
			Merged Document								Yes			8/17/2026
Samantha	Montoya	I absolutely reject Project Jupiter. Project Jupiter will let out 10 million metric tons of carbon dioxide a year. More than any metro area in the state. At a time when climate change is affecting the world more than ever, this will have detrimental effects on public health and environmental consequences. New Mexicans know that we have limited resources as well. The Rio Grande has run dry this summer and we need water for the people and agricultural, not to cool down heat generated by the plant. Even if a system is generated with non potable water, the heat plume generated by the center will have a negative effect on an area that is easily passes 100 degrees a day during the summer. Please reject Project Jupiter and support transparent sustainable projects that will support the community.		1	No									
			Merged Document						Yes	Yes	Yes			8/17/2026
Rafael	Reyes	I am writing to express my disapproval with the AI data center. AI data centers will not improve life for New Mexicans in the slightest. From damages to the environment, putting people out of jobs, excess water use, it is clear the technology isn't in the hands of the people. It is in the hands of corporations who want nothing more than to give us less.		1	No									
			Merged Document						Yes		Yes			8/17/2026

John	Stearns	too much water even if it is reused it lowers the water table in the Rio grande valley. Also the use of natural gas is destructive	1		No														
Gus	Gonzalez	The last thing our desert needs is data centers. Please take them somewhere elsewhere they are not experiencing a drought and a massive need for water	1	Mirrored Document	No												Yes		8/27/2026
Mira	Oconnell	I have concerns about the center - I feel that water is a resource that we cannot loose - if the water use for this program is no impactful that should be better communicated and better education. I'm not a proponent at this point.	1	Mirrored Document	No												Yes		8/27/2026
Jessica	Hernandez	I am writing to express my concern about Project Jupiter, which I believe will negatively effect our community. We as citizens should have been given a vote on whether or not we supported the project and our elected officials should have listened to the majority vote. This will negatively effect us due to environmental issues and will be costly to NM residents in the long term. . We only have one Earth and we should take better care of our biome. Jessica Hernandez	1	Mirrored Document	No												Yes	Yes	8/27/2026
Damian	Sinsler	I would like to remind the perspective owners of this data center that your privatization of information and human resources is demonstrable and polluting. I do not believe your claims about not contacting water. I do not want you harvesting data Sincerely, Damian Sinsler	1	Mirrored Document	No													Yes	8/27/2026
Erica	Vasquez	I am NOT IN FAVOR of Project Jupiter. Dona Ana County needs to address the water issues in ore area 100% before moving onto another project that will impact water usage in the area. The Dona Ana County Commission, with exception of Susana Chaparro, have ignored the pleas of the community to correct potable water issues in the area. The County Commission made an emotional not logical vote to approve the project. The dollars the project will supposedly bring to the area impaired the logical judgement of the Commission by driving their fear of losing revenue for the area if they did not pass the resolution with in the time frame the Management of the project dictated. The DA county commission has failed the community. Sincerely, Erica Vasquez	1	Mirrored Document	No												Yes	Yes	8/27/2026
Carina	Berard	I have concerns about water usage and feel that these have not been addressed. I also want to know how they will ensure that NM residents get jobs and not just construction jobs. What will training look like. At this time I am opposed to this project and will vote against every official who had a hand in this dishonest attack on our resources. I urge the New Mexico Environment Departments to not approve this important project. Sincerely, Carina Berard	1	Mirrored Document	No												Yes	Yes	8/27/2026
David	Heimer	I am writing to express my opposition to Project Jupiter, which I believe will result in significant harm to our community. Project Jupiter is poised to bring substantial pollution to Doña Ana County. It is anticipated to consume large amounts of our water and contribute to the poisoning of our air. Furthermore, Project Jupiter has committed millions of dollars to misleading local residents into supporting its plan without honestly presenting it in public forums. It is nice of them to offer bribes of $360 million in direct support for schools, infrastructure, and social services, and $6.4 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration, but all of this needs to be weighed against the likely deleterious impact on our environment and our community. I urge the New Mexico Environment Departments to reject this dangerous project. Sincerely, David Heimer There, I fixed it.	1	Mirrored Document	No												Yes	Yes	8/27/2026
Lorenzo	Ledesma	The public comments are after the fact and there is a concern the our border town and states of water use and our droughts. Our farmers need the water use. Will this require water harm the agriculture in our community. And there are concerns about population growth. I urge the New Mexico Environment Departments look into this important project. Sincerely, Lorenzo Lorenzo	1	Mirrored Document	No												Yes	Yes	8/27/2026
Raziel	Senkettu	I do not support this data center. All the claims on this website are lies except the creation of jobs. Although they are TEMPORARY jobs. Once construction is completed it will offer nothing to the local community. It will only serve to increase electricity and or water bills. Even if this is a waterless facility it requires more electricity to achieve the same cooling efficiency as water. This operation is being funded by OpenAI and Oracle which have never to this point held the wellbeing of the public in their interest. They are separating themselves from the project because they know that their names would garner less support. This website should be illegal with how openly they lie.	1	Mirrored Document	No												Yes	Yes	8/27/2026
Ricardo	Luna	Hi, project jupiter lost my support when it was unable to state how much water it will consume at steady-state operation for the data center, power generation, and any other long-lasting operations related to project jupiter. I wish this didn't seem so shady. Using the sod farmer's water rights just points to corruption. Please feel free to reach out to me if you can offer a number that project jupiter can commit to. Thanks, Ricardo Luna	1	Mirrored Document	No												Yes	Yes	8/27/2026
Gus	Gonzalez	The project and data centers are being misrepresented. They are not transparent with the full truth of what is going on. Water is more important than people Blandy Montaña Mexico	1	Mirrored Document	No												Yes		8/27/2026
David	Wren	I am writing to express my disdain for Project Jupiter, which I believe offers ZERO benefits for our community and will in fact wreak havoc on our existing infrastructure and fragile wildlife environment, not to mention potential health problems and the already strained water resources. Project Jupiter is based on the same misinformation used by other Data Center proposals. These centers have already caused many irreversible disasters wherever they have been implemented. I urge those backing this fiasco to read and research the factual information AGAINST these centers and indeed to question the NEED for them. The United States already has more Data Centers than any other country. Why further endanger our wildlife, environmental resources and personal health with yet ANOTHER SUPERFLUOUS FACILITY, while they are being SHUT DOWN in surrounding countries? I also urge the New Mexico Environment Department to DISAPPROVE this potentially disastrous project, dangerous to our environment, our wildlife habitat and water resources AND, the latest concern, PERSONAL HEALTH ISSUES for those being exposed to the detrimental by-products of this harmful environment. Thank you in advance for seeing how harmful this project WILL BE for Dona Ana County and New Mexico and halting plans to continue this problem-causing undertaking. Sincerely, David E. Wren	1	Mirrored Document	No												Yes		8/27/2026
Georgia	Cotrell	I'm writing to express my complete and utter repudiation of Project Jupiter. Project Jupiter purports to bring economic growth to Doña Ana County. While it is expected to create 4,000 construction jobs and 1,500 project-supported jobs, this would come with an abominable price-tag: * MILLIONS OF TONS OF CO2 EMISSIONS * BILLIONS OF TONS OF WATER ...and this latter, in a county—Santa Ana, NM—that receives 9-9 inches of rainfall annually. I urge the New Mexico Environment Departments to DISAPPROVE this repellent project. Sincerely, —Georgia Cotrell PS: The Oscura Corporation funds Project Jupiter, and has young people outside grocery stores in Corrales, NM, explaining how Project Jupiter is going to bring jobs to Santa Ana. That's how Silicon Valley rolls, folks—still continuing to paint the phony-baloney rainbow future while the planets drying up by the minute...	1	Mirrored Document	No												Yes	Yes	8/27/2026
Gus	Gonzalez	Project Jupiter is going to be a scourge on the environment and I have read studies that contradict the water, saving efforts that are being pushed in the media so I have concerns about the environmental factors that are involved	1		No												Yes	Yes	8/27/2026
Matthew	Sheppard	I believe that project Jupiter is a negative thing due to the fact that we already have a lack of water in the desert and project Jupiter is going to be using a lot of water to power their facility as well an increase our electric rates even if they say they aren't they will be and I just don't see it as something that the people approve of so it shouldn't be pushed through just for a pure moneygain on the companies I think we need more public opinions to decide something that is happening in our backyard. I urge the New Mexico Environment Departments to not approve this important project. Sincerely, Matt	1	Mirrored Document	No												Yes	Yes	8/27/2026
Bobby	Gallegos	I am opposed because of the water usage and the credibility they provided of the water usage Bobby gallegos	1	Mirrored Document	No												Yes	Yes	8/27/2026
Taz	Martinez	Contributing the money but shouldn't be allowed to separate money for just these ideas but have extension to educate and supply and improve facilities for the public for those in need and the general public such as public facilities that are supposed to be provided and maintained by the city/county/state. Sincerely, Bruce Lorenzo - Coleman	1	Mirrored Document	No												Yes		8/27/2026
Jonathon	Brown	As long as this doesn't deplete our aquafier water and give us a long term sustainable return on investment then this sounds like a good thing.	1	Mirrored Document	No													Yes	8/27/2026
Sabrina	Verduzco Rivera	We do not want this data center in our desert. One person affected by poor air quality and noise pollution is one person too many. There are several schools very close to Project Jupiter along with many families that live nearby and they deserve to live a life free of pollutants. They deserve access to clean air and water. Project Jupiter you have got to go!!!!!!!!!!! I also do not appreciate the lack of transparency and tactics being used by Oracle. The misinformation and lack of the full story is appalling. Get out of our home!	1	Mirrored Document	No												Yes		8/27/2026
Michelle	Stevens	I am in opposition of Project Jupiter in Dona Ana County. My concerns are rooted in long-term impacts of large-scale industrial development on New Mexico's environment, water resources and communities. New Mexico is already facing severe water challenges, and projects that require significant amounts of water for cooling and operations can place additional strain on limited groundwater supplies that are essential for families, agriculture, wildlife, and future generations. New Mexico should prioritize investments that create permanent, community-centered jobs and support the health, sustainability, and resilience of our communities rather than approving projects that risk turning our state into a sacrifice zone for corporate interests. I am also concern with the false comments submitted in support of Project Jupiter as well as people who have been hired out of state at $25/hour to obtain signatures. We do not know if these signatures are accurate as community members have been expressing their rushes are falsely used to support Project Jupiter. New Mexico is my home where I grew up, where I am raising my family. Since 2005, I have partnered with organizations and schools in Dona Ana County and through this work I have witnessed the strength, resilience, and care that exists within the Dona Ana County community. It is up to all of us to come together, protect one another, and advocate for decisions that prioritize the health, safety, and future of our communities. It is up to us to ensure Project Jupiter does not pass because it would be at the expense of our water, environment, and the well-being of the people who call Dona Ana County home.	1	Mirrored Document	No												Yes	Yes	8/27/2026

Sarah	Ricci	I'm writing directly to you because I think you should hear this clearly. You are building a hyperscale data center in a desert with a broken water system. Elephant Butte Lake is at 13% capacity. The regional utility serving your site has failed arsenic tests and is currently being sued by the state. And you need nearly one million gallons of water a day. Your natural gas microgrid appears to exploit a loophole in New Mexico's Energy Transition Act: the law designed to move this state away from exactly the kind of energy you're planning to use. You told county commissioners to approve $565 billion in bonds the same day or you'd leave. They did. Residents shouted "Recall" from the audience. That's not a community welcoming you. That's a community that was given no choice. Doña Ana Arca County has colonias without paved roads. One in four children lives in poverty. You're offering $360 million in tax payments spread over 30 years against a $565 billion investment. You can do the math on what that's worth. This is the wrong project in the wrong place, and the people who live there know it. Shame on you. Whoever you are reading this, you're a part of the problem. Quit your job. You are an asshole.	1		No																			
John	Lee	I am writing to express my objection to Project Jupiter, which I believe is a terrible idea. Project Jupiter is poised to destroy Doña Ana Arca County. It is anticipated to use more water per year than all of Albuquerque. Are you people crazy? Never let this happen, in any community anywhere. It is bad for the environment, and will be another abuse of all your data privacy. Just like Nick cameras are destroying your privacy. Just say no to this insanity. I urge the New Mexico Environment Department to not approve such a terrible project. Sincerely, John Lee	Mirrored Document	1	No					Yes													8/27/2026
Lorraine	Montez	We do NOT Project Jupiter in Dona Ana County, or anywhere else in New Mexico! AI Data Centers are vastly damaging to the environment matter what Project Jupiter's marketing department scripts in its videos. We do NOT want AI centers to bring economic growth. We want long-term solutions that do not involve damaging our already delicate desert environment. We want you to think in the long-term not just about easy $$$$$ and MONEY. Do NOT be gifted by Project Jupiter, it doesn't pay your salary, YOU WORK FOR US THE TAXPAYERS. I urge the New Mexico Environment Department/NOT to approve this heinous, greedy, environmentally damaging gift. Sincerely, Lorraine Montez	Mirrored Document	1	No					Yes		Yes											8/27/2026
Nick	M	What would you be approving, exactly? Do you have iron-clad proof that Project Jupiter will not affect air quality in any significant way? There doesn't seem to be sufficient evidence that this will not affect air quality, other than proponents of Project Jupiter just saying it won't. That goes for the entire environmental footprint—and public health impact—of this facility. This does not seem to be in the best interest of our state. This seems like AI companies rushing to build and "figure out the rest later." Press pause on Project Jupiter. Wait until there's ample proof that this is a net positive for Doña Ana County and New Mexico. Please. No potential short-term gain is worth the potential long-term cost of this. Please think about the surrounding community —and about the data center case studies you've seen up to this point. The risk is too great.	Mirrored Document	1	No							Yes											8/27/2026
Zoe	Burke	I vehemently oppose Project Jupiter. It will cause untold ecological damage in our already fragile state and statistics have shown will worsen the current severe drought and constant heatwave. This company is also severely lacking in transparency in its plans and the actual impact on our communities; additionally, until the data center moratorium passes or not, progress should not be made on ANY such projects and it's quite telling that this is being rushed.	Mirrored Document	1	No					Yes		Yes											8/27/2026
Mikaela	Smith	I completely oppose the Jupiter Project. This project would release no less than 12 million tons of green house gas emissions a year. I, as a member of this community and resident breathing in this state's air value clean air far more than Al. Not to mention the water usage of this project would have a devastating impact on our already struggling state. There is no contingency in the contract for construction for in state companies. So the argument for new jobs to the people is a false selling point.	Mirrored Document	1	No					Yes		Yes					Yes						8/27/2026
Albert P.	Taylor	The air quality permit application should be denied given Bloom Energy's history of illegal [illegible]	Mirrored Document	1	No					Yes	Yes	Yes	Yes		Yes	Yes							8/27/2026
Rebecca	Woodbury	I do not support building a data center in Santa Teresa!! Project Jupiter could emit more than 1d million tons of greenhouse gases per year. By comparison, Albuquerque and Las Cruces emit a combined 6.7 million metric tons of greenhouse gases annually. I am alarmed not only by the entire Project Jupiter ordeal, of which this permit for Yucca Growth Infrastructure is part of, I am livid that this organization is skirting the regulations to force this project through AND they seem to be faking supporters to stack the deck (see attached file). This is abhorrent. All of these "support" letters (they all have the same copy) should be disregarded and this permit should not be approved.	Mirrored Document	2	Yes							Yes											8/27/2026
Celestina	Moncha	I am against project Jupiter and believe the permit should be denied, at the very least the permit should be revisited and the public comment time extended to allow folks who haven't commented timely to do so. The project not only perpetuates environmental racism by being built in a predominantly brown county of NM but one of the groups involved is already being fined for mismanagement of biohazard waste and our river is already dried up. We don't need this.	Mirrored Document	1	No							Yes											8/27/2026
Arturo	Terrazas	To Whom it May Concern, I submit these comments as my humble request that the New Mexico Environment Department rejects the Air Quality Construction Permit for Yucca Growth Infrastructure LLC. As the Department is aware, this permit is being submitted in an effort to construct and implement fuel cells to provide power for a group of four data centers in southern Doña Ana county. And, as the Department is also aware, it is estimated the pollutants emitted by this plant will be more than all the air pollutants in Albuquerque and Las Cruces combined. Currently, we suffer from air pollution created from metropolitan areas which we have no ability to regulate. El Paso, Texas and Ciudad Juarez, Mexico. While a state-line and international border divides our communities, it does not protect our families from the air pollution created by several million people next door. Now, if Yucca has their way, we will have an additional 10 million tons of greenhouse gases filling our lungs along with the smog from our neighbors. It would not be hyperbolic to claim that if this permit is granted, this area could have the worst air pollution on the southern U.S. border. It should also be stated that these types of fuels cells have never been built and used for this purpose before. This would be the first time a facility like data centers would be provided power using them and we have no idea how the fuel cells will perform or what other impacts we could face due to their construction and utilization I implore you, on behalf of not only myself, and my family, but also on behalf of my neighbors, please do not grant this permit. From the beginning, no one has made any real effort to engage the community in any discussions about this project. Many of us only found out about it when our local county commission announced it would be considering issuing bonds to allow it to be constructed. Not one individual who actually lives in this area and would be directly affected by the construction of these data centers has been part of the decision-making process. We have no one in power defending our health or safety. Please, do not allow us to be poisoned by a	Mirrored Document	1	Yes					Yes		Yes											8/27/2026
William	Hutton	Yucca Growth Infrastructure is proposing a 2.4MW gas-powered fuel cell plant—nearly double the total fuel cell capacity Bloom Energy has installed across more than 1,000 sites worldwide. It would also be more than 30 times larger than the largest operating fuel cell plant anywhere in the world. A project like this size has no real-world precedent, and there is no reliable way to predict its actual emissions or operational impacts. That uncertainty alone should require far greater scrutiny. The emissions estimates submitted by the applicant are based on just three four-hour tests of a single 440 kW unit. Those results are being used to estimate emissions for a facility roughly 27,000 times larger, operating continuously in Southern New Mexico's extreme desert conditions. That is not a sufficient scientific basis for approving a project of this magnitude. The applicant also added a 20% "safety margin" to its emissions estimates, which raises questions about confidence in the underlying data. Even small errors become significant when multiplied across tens of thousands of fuel cells. The public deserves accurate, enforceable data—not assumptions. There are also unanswered questions about equipment failures, aging systems, and emergency response. This facility would rely on large volumes of high-pressure hydrogen and natural gas, and the risks associated with a project of this unprecedented size have not been adequately demonstrated or addressed. For these reasons, I urge the commitee to deny these permits. At a minimum, any further consideration should include a public hearing in Santa Teresa and a thorough, transparent review supported by reliable data rather than speculative estimates.	Mirrored Document	1	No							Yes											8/27/2026
Joseph	Savage	We need to see more places to kick back in the shade... actually Bhoy ones designated for us that are on the streets ... and actually porta potty out here as well. And I support the project.	Mirrored Document	1	No							Yes											8/27/2026
Matthew	Taylor	I do not want a data center in Santa Teresa. The microgrids will emit nearly 900tons per year of nitrogen oxides, an important ingredient in contributing to ozone. Individually, one microgrid is listed at 269.97 tons per year and the other at 238.9.	Mirrored Document	1	No				No	Support Non-Substantive											8/27/2026
Amber	Roy	Project Jupiter could emit more than 1d million tons of greenhouse gases per year. By comparison, Albuquerque and Las Cruces emit a combined 6.7million metric tons of greenhouse gases annually. There are plausible fuel systems that can be alternative to the current system outlined. Cutting down on the water to the center that would already use a plentiful thurlen in a desert cannot spare. We do not need a non-essential plant or center that will disrupt our stressed communities that need fresh water.	Mirrored Document	1	No							Yes	Yes										8/27/2026
Shawn	Hayden	This is going to be a resource sucker, you need to generate your own electricity, provide your own water resource, this isnt going to bring as many jobs as you all say. This isnt going to be a beehive like you make it out to be. Once its constructed it runs on its own! I was a systems engineer for 20 year I know!!! Sincerely, Shawn Hayden	Mirrored Document	1	No					Yes		Yes											8/27/2026
Reese	Barros	Project jupiter takes massive amounts of water that we don't have and share with Texas and Mexico and the rio grande.	Mirrored Document	1	No					Yes				Yes							8/27/2026
3éba ne	Luchini	I absolutely do not support this project. The people behind this do not truly care what the community wants. They are using methods to get their way without regard for what people want and need. Seems like they want to use water to coop their machines. There are alternatives that dont use water. They just care about profit and wan the cheap alternative which passes the long term cost on to us. I urge the New Mexico Environment Department to not approve this important project. Sincerely, 3ébaneJephane luchini	Mirrored Document	1	No					Yes													8/27/2026
Vincent	Leeper	I feel data centers are used for illegal surveillance and use to violate our rights to illegally deter crime	Mirrored Document	1	No					Yes		Yes											8/27/2026
Joaquin	Montoya	I reject the proposal of Project Jupiter. This proposal would place a large new industrial burden on southern New Mexico at a time when our region already faces serious long-term constraints on water, infrastructure, and environmental resilience. Even if the project uses some non-potable water and closed-loop cooling, it would still create new industrial demand, require major supporting infrastructure, and rely in part on fossil fuel-based energy systems. I am also deeply concerned with the scale of the public subsidies and tax benefits being offered. This shifts substantial risk to the community without clear, enforceable guarantees that local residents will receive proportional long-term benefits. Economic development should strengthen our region without compromising scarce resources or giving away too much public leverage. For these reasons, I ask that Project Jupiter be denied and that the County instead prioritize development that is transparent, sustainable, and truly in the long-term public interest. Joaquin Montoya	Mirrored Document	1	No																		8/27/2026
Joaquin	Montoya	I formally reject the proposal of Project Jupiter. This proposal would place a large new industrial burden on southern New Mexico during a time when our region already faces serious long term constraints on water, infrastructure, and environmental resilience. Even if the project uses some "non-potable water and closed-loop cooling", it would still create new industrial demand, require major supporting infrastructure, and rely in part on fossil fuel based energy systems. I am also deeply concerned with the scale of the public subsidies and tax benefits being offered. This shifts substantial risk to the community without clear, enforceable guarantees that local residents will receive proportional long term benefits. I believe economic development should strengthen our region and not compromising scarce resources or giving away too much public leverage. For these reasons, I ask that Project Jupiter be denied and that the County instead prioritize development that is transparent with the community, sustainable, and truly in the long-term public interest.	Mirrored Document	1	No					Yes		Yes	Yes										8/27/2026
Dorothy	Barclay	I don't want a data center built in our area. The microgrids will emit nearly 900tons per year of nitrogen oxides, an important ingredient in contributing to ozone. Individually, one microgrid is listed at 269.97 tons per year and the other at 238.9.	Mirrored Document	1	No					Yes		Yes	Yes								8/27/2026
Prentiss	Elder	I am writing to submit my disapproval of the project. As an environmental scientist the impact is to great for such a fragile eco system of the desert of new Mexico.	Mirrored Document	1	No							Yes									8/27/2026
			Mirrored Document									Yes									8/27/2026

Gus	Gonzalez	I am concerned that the data centers are being used for surveillance of private citizens. And that the government will use our information against us using these Data Centers. Daniel Evans	1		No	[redacted]													
Leonard	Romero	On the flip side! Where are you going to retrieve the water from? How much will you use daily? Weekly, monthly? The under ground water table? Rio Grande? The millions you are paying for construction? Helping schools? Jobs? How many. Thre education needed to be hired? What happens after construction? 4000 jobs gone? $80 million for schools? Every year? Or spread out over 40 years? What will the cost be to run yearly? How are you going produce your own power? The water issue is the most important question!!! Is the state voting on this opportunity?! really do hope they deny you. You should try overseas in the rainy parts of the world.!!!!!? How will you repair? Upgrade? Improve our old water infrastructure?? What resources are you offering for schools? Services programs? Please respond? Convince me that it's good for new Mexico? I want the positive & negative impact. Don't bull shit me with a sales pitch or political shit. Be transparent. Sincerely, Leonard Romero Leonard R	1	Mirrored Document	No		No		Oooooo Non-Substantive								8/27/2026
Brianna	Da	I am writing to express my LACK of support for Project Jupiter, which I believe poses many threats to New Mexicans and all of the US. Project Jupiter brings many threats including water usage, water contamination, continued Support of AI (which is contrary to intellectual property and sets itself up to be an idol of worship). I urge the New Mexico Environment Department to PUT AN END TO this project IMMEDIATELY. Sincerely, Concerned Christian	1	Mirrored Document	No				Yes		Yes						8/27/2026
Maryann	Pribilla	uses to much water and has to much noise very bad for pure environment	1	Mirrored Document	No				Yes		Yes						8/27/2026
Loretta	Rothstein	Im concerned about water usage	1	Mirrored Document	No				Yes		Yes						8/27/2026
Tony	Brown	I am writing to express my disapproval for Project Jupiter, which I believe offers significant challenges and difficulties for our community. Project Jupiter uses water we dont have, cause hearing and body ache from the constant humming of the equipment and the blight on the beautiful desert landscaping. I urge the New Mexico Environment Department to deny this project. Sincerely Tony Alan Brown	1	Mirrored Document	No				Yes								8/27/2026
Carol	Courtney	I am quite concerned about the excessive amount of air pollution (e.g. hazardous emissions) that will be generated by this project. The burning of natural gas at this level would lower air quality in the region. I believe that we, New Mexicans, deserve clean air and a healthy environment this I urge you NOT to allow this permit.	1	Mirrored Document	No				Yes		Yes						8/27/2026
Vanessa	Cordero	I am writing to express my concerns for our community. Project Jupiter will bring nothing good to Doña Ana County. Our water is already scarce, our farmers and community need water and all this project will bring is pollution to our water and environment. You try to green wash it by offering clean drinking water to our community and habitat restoration when all we need is to keep data centers out of here and not create problems! I urge the New Mexico Environment Department to deny this horrible project. Sincerely, Vanessa Cordero	1	Mirrored Document	No					Yes	Yes						8/27/2026
Prentiss	Elder	I am writing to submit my disapproval of the project. As an environmental scientist the impact is to great for such a fragile eco system of the desert of new Mexico.	1	Mirrored Document	No				Yes		Yes						8/27/2026
Samantha	Montoya	I absolutely reject Project Jupiter. Project Jupiter will let out 10 million metric tons of carbon dioxide a year. More than any metro area in the state. At a time when climate change is affecting the world more than ever, this will have detrimental effects on public health and environmental consequences. New Mexicans know that we have limited resources as well. The Rio Grande has run dry this summer and we need water for the people and agriculture, not to cool down heat generated by the plant. Even if a system is generated with non potable water, the heat plume generated by the center will have a negative effect on an area that is easily passes 100 degrees a day during the summer. Please reject Project Jupiter and support transparent sustainable projects that will support the community.	1	Mirrored Document	No						Yes						8/27/2026
John	Stearns	too much water even if it is reused it lowers the water table in the Rio grande valley. Also the use of natural gas is destructive	1	Mirrored Document	No				Yes	Yes	Yes						8/27/2026
Gus	Gonzalez	The last thing our desert needs is data centers. Please take them somewhere elsewhere they are not experiencing a drought and a massive need for water	1	Mirrored Document	No				Yes								8/27/2026
Jessica	Hernandez	I am writing to express my concern about Project Jupiter, which I believe will negatively effect our community. We as citizens should have been given a vote on whether or not we supported the project and our elected officials should have listened to the majority vote. This will negatively effect us due to environmental issues and will be costly to NM residents in the long term. . We only have one Earth and we should take better care of our home. Jessica Hernandez	1	Mirrored Document	No				Yes								8/27/2026
Mira	Oconnell	I have concerns about the center - I feel that water is a resource that we cannot loose - if the water use for this program is no impactful that should be better communicated and better education. I'm not a proponent at this point.	1	Mirrored Document	No						Yes						8/27/2026
Erica	Vasquez	I am NOT IN FAVOR of Project Jupiter. Dona Ana County needs to address the water issues in are area 100% before moving onto another project that will impact water usage in the area. The Dona Ana County Commission, with exception of Susana Chaparro, have ignored the pleas of the community to correct potable water issues in the area. The County Commission made an emotional not logical vote to approve the project. The dotsm the project will supposedly bring to the area impaired the logical judgement of the Commission by driving their fear of loosing revenue for the area if they did not pass the resolution with in the time frame the Management of the project dictated. The DA county commission has failed the community. Sincerely, Erica Vasquez	1	Mirrored Document	No				Yes		Yes						8/27/2026
Damian	Strieder	I would like to remind the perspective owners of this data center that your privatization of information and human resources is democratizable and polluting. I do not believe your claims about not contacting water. I do not want you harvesting data Sincerely, Damian Strieder	1	Mirrored Document	No				Yes		Yes						8/27/2026
Lorenzo	Ledesma	The public comments are after the fact and there is a concern the our border town and states of water use and our droughts. Our farmers need the water use. Will this recycle water harm the agriculture in our community. And there are concerns about population growth. I urge the New Mexico Environment Department to look into this important project. Sincerely, Lorenzo Lorenzo	1	Mirrored Document	No				Yes		Yes						8/27/2026
Razel	Senketsu	I do not support this data center. All the claims on this website are low except the creation of jobs. Although they are TEMPORARY jobs. Once construction is completed will offer nothing to the local community. It will only serve to increase electricity and/or water bills. Even if this is a waterless facility it requires more electricity to achieve the same cooling efficiency as water. This operation is being funded by Openai and Oracle which have never to this point had the wellbeing of the public in their interest. They are separating themselves from the project because they know that their names would garner less support. This website should be illegal with how openly they lie.	1	Mirrored Document	No				Yes		Yes						8/27/2026
Alex	Fernandez	I want to start off by saying that All Data Centers are widely opposed by democrats, republicans, and independents. Project Jupiter failed to submit reports about jobs, missing two deadlines. The emissions that will be emitted from the center go against the environmental path NM is headed in. We need to conserve our water and this development will waste the little water we need to conserve. Yucca Growth Infrastructure LLC is lying through a disinformation campaign to residents how this will "bring water and jobs" to our state. There are multiple independent and renown journalists working towns with AI data centers. It's been found in these places that pre- and post-data center the color of the water changes, it brings no major influx jobs or economic benefits, and causes major greenhouse gas emissions, increased heat, major noise pollution, and significant loss of water. New Mexicans by and large know the truth. We know the truth that Yucca Growth Infrastructure and Project Jupiter's disinformation campaign with paid canvassers and paid partnerships with social media influencers is nefarious and not good for the environment or residents of the community. With such mass public opposition all they can do is lie and hope that deception wins. As a 36th generation New Mexican and lifelong resident I strongly opposed this AI data center project. We don't want a diluted version of the project. We don't want the project at all.	1	Mirrored Document	No				Yes					Yes			8/27/2026
Georgia	Cottell	I'm writing to express my complete and utter repudiation of Project Jupiter. Project Jupiter purports to bring economic growth to Doña Ana & Otero Area County. While it is expected to create 6,000 construction jobs and 1,500 project-supported jobs, this would come with an abominable price-tag: * MILLIONS OF TONS OF CO2 EMISSIONS * BILLIONS OF TONS OF WATER ...and this latter, in a county -Santa Ana, NM -that receives 9-9 inches of rainfall annually. I urge the New Mexico Environment Department to DISAPPROVE this repellent project. Sincerely, -- Georgia Cottell PS: The Oracle Corporation funds Project Jupiter, and has young people outside grocery stores in Corrales, NM, explaining how Project Jupiter is going to bring jobs to Santa Ana. That's how Silicon Valley rolls, folks—still continuing to paint the phony-baloney rainbow future while the planets drying up by the minute...	1	Mirrored Document	No				Yes	Yes	Yes	Yes	Yes				8/27/2026
Gus	Gonzalez	The project and data centers are being misrepresented. They are not transparent with the full truth of what is going on. Water is more important than people Brandy Montaldo&co	1	Mirrored Document	No				Yes	Yes	Yes						8/27/2026
				Mirrored Document					Yes								8/27/2026

Gus	Gonzalez	Project Jupiter is going to be a scourge on the environment and I have read studies that contradict the water, saving efforts that are being pushed in the media so I have concerns about the environmental factors that are involved	1		No														
Ricardo	Luna	Hi, project jupiter lost my support when it was unable to state how much water it will consume at steady-state operation for the data center, power generation, and any other long-lasting operations related to project jupiter. I wish this didn't seem so shady. Using the sod farmer's water rights just points to corruption. Please feel free to reach out to me if you can offer a number that project jupiter can commit to. Thanks, Ricardo Luna	1	Mirrored Document	No								Yes		Yes				8/27/2026
Matthew	Sheppard	I believe that project Jupiter is a negative thing due to the fact that we already have a lack of water in the desert and project Jupiter is going to be using a lot of water to power their facility as well an increase our electric rates even if they say they aren't they will be and I just don't see it as something that the people approve of so it shouldn't be pushed through just for a pure moneygain on the companies I think we need more public opinions to decide something that is happening in our backyard I urge the New Mexico Environment Department to not approve this important project. Sincerely, Matt	1	Mirrored Document	No								Yes						8/27/2026
Bobby	Gallegos	I am opposed because of the water usage and the credibility they provided of the water usage Bobby gallegos	1	Mirrored Document	No								Yes		Yes				8/27/2026
Jonathon	Brown	As long as this doesn't deplete our aquafier water and give us a long term sustainable return on investment then this sounds like a good thing.	1	Mirrored Document	No								Yes						8/27/2026
Taz	Martinez	Contributing the money but shouldn't be allowed to separate money for just these ideas but have extension to educate and supply and improve facilities for the public for those in need and the general public such as public facilities that are supposed to be provided and maintained by the city/county/state. Sincerely, Bruce Lorenzo - Coleman	1	Mirrored Document	No								Yes						8/27/2026
David	Wren	I am writing to express my disdain for Project Jupiter, which I believe offers ZERO benefits for our community and will in fact wreak havoc on our existing infrastructure and fragile wildlife environment, not to mention potential health problems and the already strained water resources. Project Jupiter is based on the same misinformation used by other Data Center proposals. These centers have already caused many irreversible disasters wherever they have been implemented. I urge those backing this fiasco to read and research the factual information AGAINST these centers and indeed to question the NEED for them. The United States already has more Data Centers than any other country. Why further endanger our wildlife, environmental resources and personal health with yet ANOTHER SURVEILLANCE FACILITY, while they are being SHUT DOWN nationwide? I also urge the New Mexico Environment Department to DISAPPROVE this potentially disastrous project, dangerous to our environment, our wildlife habitat and water resources AND, the latent concern, PERSONAL HEALTH ISSUES for those being exposed to the detrimental by-products of this harmful environment. Thank you in advance for seeing how harmful this project WILL BE for Dona Ana County and New Mexico and halting plans to continue this problem-causing undertaking. Sincerely, David E. Wren	1	Mirrored Document	No												Yes		8/27/2026
Sarah	Ricci	I'm writing directly to you because I think you should hear this clearly. You are building a hyperscale data center in a desert with a broken water system. Elephant Butte Lake is at 12% capacity. The region's utility serving your site has failed arsenic tests and is currently being sued by the state. And you need nearly one million gallons of water a day. Your natural gas microgrid appears to exploit a loophole in New Mexico's Energy Transition Act: the law designed to move this state away from exactly the kind of energy you're planning to use. You told county commissioners to approve $585 billion in bonds the same day or you'd leave. They did. Residents shouted "Recall" from the audience. That's not a community welcoming you. That's a community that was given no choice. Doña Ana County has colonias without paved roads. One in four children lives in poverty. You're offering $360 million in tax payments spread over 30 years against a $585 billion investment. You can do the math on what that's worth. This is the wrong project in the wrong place, and the people who live there know it. Shame on you. Whoever you are reading this, you're a part of the problem. Quit your job. You are an asshole.	1	Mirrored Document	No								Yes		Yes				8/27/2026
Lorraine	Montez	We do NOT Project Jupiter in Dona Ana County, or anywhere else in New Mexico! AI Data Centers are vastly damaging to the environment matter what Project Jupiter's marketing department scripts in its videos. We do NOT want AI centers to bring economic growth. We want long-term solutions that do not involve damaging our already delicate desert environment. We want you to think in the long-term not just about easy GREED and MONEY. Do NOT be gifted by Project Jupiter, it doesn't pay your salary, YOU WORK FOR US THE TAXPAYERS. I urge the New Mexico Environment Department NOT to approve this heinous, greedy, environmentally damaging gift. Sincerely, Lorraine Montez	1	Mirrored Document	No								Yes						8/27/2026
Robert	Rodriguez	I'm strongly opposed to construction of data center and data center-related projects here in New Mexico. For one, the promises of benefits that it might bring are not credible - where and how are these job numbers coming from? Beyond initial construction, how many long-term jobs would it really sustain? Secondly, the amount of resources (water, electricity, public infrastructure and support) these projects demand would exceed what we can support and harm the public overall. We are already seeing record low water flow in our rivers and sustained heatwaves making utilities expensive for the average citizen. Finally, other towns which have had data centers built nearby have encountered issues such as noise and light pollution (in addition to the above-mentioned utilities), so how would this be any different for us? This construction would only be a significant net negative to all residents.	1	Mirrored Document	No										Yes				8/27/2026
Katy	Gross	I strongly oppose Project Jupiter and the nefarious ways they have been promoting the project. This project will have negative impacts on the environment, for both water and air quality, and I believe will negatively impact not just the surrounding communities in Doña Ana county but for all New Mexicans. Please do what is in the best interest of New Mexicans and reject this permit.	1	Mirrored Document	No								Yes		Yes		Yes		8/27/2026
Doug	Palermo	Neutral but concerned about the water	1	Mirrored Document	No								Yes	Yes	Yes				8/27/2026
Jose	Lopez	I'm concerned on the water usage and the electricity usage.	1	Mirrored Document	No								Yes						8/27/2026
Mariah	Humphrey	Against the data centers due to water use.	1	Mirrored Document	No								Yes				Yes		8/27/2026
Rob	Obrien	Have concerns about water usage	1	Mirrored Document	No								Yes						8/27/2026
CR	Howell	Our community strongly urges the NMED to deny Air Quality Construction Permit Application 128631 for Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design. Please uphold the laws of this State to protect our Environment and quality of life. I am not a PNM commenter. I am a concerned citizen that cares about all of the people in New Mexico.	1	Mirrored Document	No								Yes						8/27/2026
Shawn	Hayden	This is going to be a measure sucker, you need to generate your own electricity, provide your own water resource, this isnt going to bring as many jobs as you all say. This isn't going to be a beehive like you make it out to be. Once its constructed it runs on its own! I was a systems engineer for 20 years I know!!! Sincerely, Shawn Hayden	1	Mirrored Document	No									Yes	Yes				8/27/2026
Jacob	Chinn	I am opposed to Project Jupiter. This seems like yet another case of a large corporation strong-arming a small municipality into an offer too good to be true. First, on water: The closed loop system is only mostly closed, and white it does use non-potable, industrial water, that's still water. As I'm writing this the Rio Grande has run dry (Again) and by the forecasts we're in for one of the hottest summers on record. (Again) Second, on power: The fuel cell setup tying in to the local grid is a nice idea, but you know what's nicer? Solar and/or Wind. New Mexico has some of the best places on the planet for it, with vast deaths of sparsely populated land.	1	Mirrored Document	No								Yes				Yes		8/27/2026
Bernice	Ortiz	That the data center can be built without that much water,new Mexico has a short and we don't need that.	1	Mirrored Document	No								Yes				Yes		8/27/2026
Bailey	Hunt	Definitely wary of data centers in general. I have a strong moral issue with collecting data both actively and passively without individuals direct consent. Especially when used for AI and Machine Learning. Bailey Hunt	1	Mirrored Document	No								Yes						8/27/2026
Tony	Brown	I am writing to express my disapproval for Project Jupiter, which I believe offers significant challenges and difficulties for our community. Project Jupiter uses water we dont have, cause hearing and body ache from the constant humming of the equipment and the blight on the beautiful desert landscaping. I urge the New Mexico Environment Department to deny this project. Sincerely Tony Alan Brown	1	Mirrored Document	No							No	Oppose Non-Substantive						8/27/2026
Dawn	Arizona	Project Jupiter is a terrible thing that will endanger the health and well being of the people and animals of NM. I strongly oppose this proposed project as I am concerned that the developers are not being transparent about how badly this will affect our vulnerable community. WE DO NOT HAVE ENOUGH WATER TO SUPPORT THIS. THE PROMISED JOBS WILL GO TO NON NEW MEXICANS. THERE ARE STUDIES INDICATING HEALTH EFFECTS FROM LIVING CLOSE TO DATA CENTERS. SAY NO NOW! PERIOD!!! signed, Dawn Arizona	1	Mirrored Document	No								Yes		Yes				8/27/2026
				Mirrored Document									Yes		Yes				8/27/2026

Mariano	Chavez	I am writing to express my concern for the water usage in a high drought environment Sincerely, Mariano	1		No	[redacted]											
Cynthia	Jones	Please deny this permit. We cannot let project Jupiter continue to move forward on any way. What good will ever come of putting a water-cooled heat generator in the middle of a near-waterless heat generator? The desert is no place for a data center. Why are we letting someone pay us mere pennies to do nothing but destroy our beautiful home??	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Mark	Eustuace	I support it with the idea of improving infrastructure but as a Native American, I would like to remind the planners and those in charge, that this is still Mother EARTH and anything you do to her, she will do back to us, much worse. Sincerely, Mark Eustuace	1	Merged Document	No	[redacted]			Yes								8/17/2026
Xanthe	Miller	NMED should deny YGI's application for an air quality permit. Bloom Energy and YGI are trying to hide the true impacts of this project. The fuel cells used generate large amounts of NOX, carbon monoxide and volatile organic compounds which harm human and ecosystem health. These fuel cells are not "clean energy," as the company claims. Hazardous solid waste will also be generated that will need to be mitigated by NMED and with public funds. Dona Ana County already experiences more environmental pollution than many other parts of the state. The public should be given 60 days more to review and submit comments on this application. This is the only way to be sure that everyone affected is able to participate.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive									8/17/2026
Ricky	Davis	I feel like more information is needed for data centers in southwest due to water concerns. Not pro or con at this time still gathering information. Ricky Davis	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes		8/17/2026
Dex	Zapien	I, much like most of the community, am strongly against the construction of data center infrastructure in Doña Ana county and the state of New Mexico as a whole. Short-term economic growth does not outweigh the long-term consequences of leasing our land and resources to the highest bidder while setting the wellbeing of the community aside. Our state needs to prioritize enriching the health of its communities and its residents instead of the economy and corporations. We as a people have been continuously disregarded and ignored throughout the history of this state and Project Jupiter is just the next way we are being poisoned for the sake of the powerful.	1	Merged Document	No	[redacted]			Yes								8/17/2026
David	Henner	I am writing to express my opposition to Project Jupiter, which I believe will result in significant harm to our community. Project Jupiter is poised to bring substantial pollution to Doña Ana County. It is anticipated to consume large amounts of our water and contribute to the poisoning of our air. Furthermore, Project Jupiter has committed millions of dollars to misleading local residents into supporting its plan without honestly presenting it in public forums. It is nice of them to offer bribes of $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration, but all of this needs to be weighed against the likely deleterious impact on our environment and our community. I urge the New Mexico Environment Department to reject this dangerous project. Sincerely, David Henner There, I fixed it.	1	Merged Document	No	[redacted]					Yes						8/17/2026
Carina	Berard	I have concerns about water usage and feel that these have not been addressed. I also want to know how they will ensure that NM residents get jobs and not just construction jobs. What will training look like. At this time I am apposed to this project and will vote against every official who had a hand in this dishonest attack on our resources. I urge the New Mexico Environment Department to not approve this important project. Sincerely, Carina Berard	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Sarah	Aguirre	I oppose the YGI Microgrid and this project. The environmental impact of a project of such scale could be devastating. It will severely strain the already precious resources of water and energy in southern NM. Doña Ana county and its residents have very little to gain from this and a lot to lose.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Colin	Cox	Please see attached comments	42	Merged Document	Yes	[redacted]			Yes		Yes						8/17/2026
Ricardo	Luna	Hi, project jupiter lost my support when it was unable to state how much water it will consume at steady-state operation for the data center, power generation, and any other long-lasting operations related to project jupiter. I wish this didn't seem so shady. Using the sod farmer's water rights just points to corruption. Please feel free to reach out to me if you can offer a number that project jupiter can commit to. Thanks, Ricardo Luna	1	Merged Document	No	[redacted]	Yes									Yes	8/17/2026
John	Lee	I am writing to express my objection to Project Jupiter, which I believe is a terrible idea. Project Jupiter is poised to destroy Doña Ana County. It is anticipated to use more water per year than all of Albuquerque. Are you people crazy? Never let this happen, in any community anywhere. It is bad for the environment, and will be another abuse of all your data privacy. Just like flock cameras are destroying your privacy. Just say no to this insanity. I urge the New Mexico Environment Department to not approve such a terrible project. Sincerely, John Lee	1	Merged Document	No	[redacted]			Yes								8/17/2026
Kathryn	Bosley	The deceitful campaign used by Project Jupiter to produce false supporters should be enough to convince anyone with a shred of ethics to deny their permit. Frankly, the company should be investigated for feigning public support. Data centers are viewed as a scourge by the public, and local governments across the country have denied the will of the people by ignoring their outcry. No number of sustainability justifications will change that fact.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Lucas	Garcia	I'm a concerned NM resident and am commenting in opposition to approval for the YGI Air Quality permit application. YGI's proposal is not sound or safe for Doña Ana county, and their design carries significant environmental risks for both the local community and the wider ecosystem. Its financial promises are 1) not worth the risk of long term environmental damage and 2) do not represent lasting job growth for the county's residents. There are viable alternatives that are more thoroughly tested. It is also notable that YGI is spending considerable amounts of money to influence the public all over NM, which suggests that their motives for insisting on this approach do NOT prioritize Doña Ana county. Additionally, there is some concern that NMED will not be able to meaningfully enforce its own regulations under YGI's current approach. Approving this permit at this juncture would circumvent the department's regulatory mandate, and jeopardize the health and safety of residents. I strongly urge NMED to deny this permit.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive									8/17/2026
Jonathan	Kohlhorst	I'd rather this project be put on hold until its environmental impacts can be properly assessed and the questions surrounding the project are answered clearly and in full. For instance, the hydrogen fuel cells for the center are projected to produce more greenhouse gases than our three largest cities combined, but the cells are instead touted as a clean alternative to gas turbines, downplaying their actual impact . The county vote was also seemingly rushed with little chance for public discussion and comment. This, combined with manufactured consent efforts observed here in Santa Fe, does not instill much confidence in any claims or promises made by the company. I am overall opposed to the data center's construction. -Jonathan	1	Merged Document	No	[redacted]				Yes	Yes	Yes					8/17/2026
Michelle	Biel	New Mexico and the South West is under a severe drought. It is reckless to place a data center that can cause possibly irreparable damage to the area, ground water and to the people in the surrounding area. Please stop this.	1	Merged Document	No	[redacted]				Yes	Yes		Yes				8/17/2026
Emily	Pedone	I am writing to strongly oppose this project. It will not bring meaningful benefit to our area and there has been lots of data for projects like this being ultimately harmful for the areas they are installed in. We are already in a precarious position with water and natural resources, and this will contribute to the problem. Please do not allow this to move forward.	1	Merged Document	No	[redacted]			Yes								8/17/2026
Alex	Bearzi	My name is Alex Bearzi. I am a New Mexico resident for the last 39 years of my life. I am a UNM graduate, and a licensed electrician in the state. I have worked on data centers in New Mexico, at the Los Lunas facebook site, as well as other projects in other states. I feel compelled to voice my opposition to this data center in Dona Ana county moving forward. At every turn, we see more data that indicates the environmental harm being done by these projects. While most of the impact being assessed has been centered on the water consumption and its pollution thereof; these centers also drastically change the climate around them due to the heat generated. I have no doubt that in time we will learn that these data centers also irrevocably damage the air and climate they are in...long after they have been built and operated. One study of a Vantage Data center in Virginia shows preliminary data suggesting that the county has had to absorb an additional 50-90 million dollars in health care costs due to the impact of the data center in their community. I do not want to see New Mexico further damaged by the reckless consumption and greed of these tech firms who have no stake or interest in the communities they are looking to build in. Please, deny this application, and any others that facilitate the exploitation of our state and children's' futures for the short term profit of mega corporations.	1	Merged Document	No	[redacted]			Yes								8/17/2026
Joseph	Whitney	I am writing to express my objection to Project Jupiter, which I believe is a significant detriment to the health and welfare of our community and environment. Project Jupiter is all about lining the pockets of politicians eager to dismiss the will of the people. We dont want it, despite Gov. Lujans despicable pandering for personal gain. I urge the New Mexico Environment Department to deny this dangerous and unacceptable project.	1	Merged Document	Yes	[redacted]			Yes		Yes						8/17/2026
Douglas	Campbell	Project Jupiter will not bring the jobs and money promised to the area. Most earnings will move out of state immediately and Dona Ana County will only have more air pollution, higher temperatures, and less water. Don't sell out citizens for short term gains and long term negative consequences.	1	Merged Document	No	[redacted]					Yes						8/17/2026
Bryana	Olmeda	As a field botanist, who has spent the past 4 years specializing and observing Chihuahuan Desert plants in New Mexico, specifically in the Bureau of Land Management, Las Cruces District, I am opposed to any permitting for Yucca Growth Infrastructure. This data center will negatively impact air quality, and use a substantial amount of water in an area that is already experiencing immense drought driven by climate change. The pollutants (both air and noise) produced by data centers negatively impact the land and people around them, primarily in low income neighborhoods of color. I have studied how the dwindling amount of water and extreme heat waves have negatively impacted the quality of life, for plants, and people. Project Jupiter will exacerbate these issues. Air and water are not resources, they are a necessity for life. Project Jupiter will not help this community and I do not support it.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Julianna	McDonald	The jupiter data center would destroy the air quality in NM, releasing more greenhouse gasses than NMs largest cities, ABQ and Las Cruses combined. This project would cause unimaginable destruction to our state and poison our communities. DO NOT GO FORWARD WITH PROJECT JUPITER.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes				8/17/2026
Amber	Diego	I do not want a data center in NM. I remember what ASARCO did to El Paso. If a data center can promise/prove that it will actually benefit the environment and leave no trace (not the same as buying credit like coal plants do), then the independent scientists should verify data center plans and assure the public it is safe. It is not safe in its current form at all. Permits should not be allowed in its current form.	1	Merged Document	No	[redacted]				Yes							8/17/2026
Anonymous	Anonymous	No one wants a data center here. They ruin the environment and affect not only the animals but the people living in the area. We need clean water!! Not dirty water that comes from these data centers. NO DATA CENTER! There aren't even any job opportunities with it. One of the biggest data centers in the world only has TWELVE people running it. HOW IS THAT JOB OPPORTUNITY FOR ANY COMMUNITY??? The Rio Grande is already dry and so much wildlife are dying because of it. We don't need a Data Center taking any of the remaining water we NEED for DRINKING.	1	Merged Document	No	[redacted]					Yes						8/17/2026
Sierra	H.	As someone who cares deeply about the desert around us, the quality of our water and our air, the wildlife, and the mental health of our neighbors I am deeply opposed to Project Jupiter and its very presence in our state. These data centers have proven time and time again to worsen water levels and water quality, draining our already too low water tables and rivers. They create constant noise, light, and air pollution that will kill off our wildlife and increase the risks of chronic illnesses to those who live anywhere near the center.l through its emmissons and noise levels. Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses - a projected 10 million tons of carbon dioxide. Even the construction and general maintenance of the center will be destructive to the community, especially with these companies having histories of dumping hazardous waste. This hazardous waste includes heavy metals, toxic compounds like sulfur, and chemical runoff that will seep into the earth and take decades if not centuries to fully errode. These companies do not care about the quality of life in New Mexico, they do not care about our natural spaces, they do not care about our economic growth, they do not care about this state. They see our lands as their own to do whatever they want with impunity, where they will then conveniently leave the moment something goes wrong. I strongly urge the Air Quality Bureau and the Environmental Department as a whole to reject the bids of STACK Infrastructure, Bloom Energy, BorderPlex Digital Assets, Acoma LLC, Yucca Growth Infrastructure, LLC, and any future companies that wish to risk permanent damage to our environment for the sake of data centers.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
GP	NM	The Green Party of New Mexico (GPNM) opposes the granting of a permit allowing microgrid construction and operation in Doña Ana County. Yucca Growth Infrastructure, LLC (YGI) proposes to use natural gas to energize the proposed data center via Bloom Energy solid oxide fuel cells (SOFCs). These fuel cells significantly reduce multiple known harmful emissions from natural gas combustion; however, carbon dioxide is still an issue, particularly with Bloom Energy's history of making false claims on emissions from its SOFCs. Further, desulfurization canisters within the fuel cells capture the sulfur added as a safety feature to the purchased natural gas. Other pollutants, such as benzene, are also captured. Media must be replaced within the canister when it is spent, i. e., has reached absorption capacity. Projections of sulfur dioxide emission likely assume continuous operation of unspent canisters. Please assess for how this will be monitored and managed. Further, there must be an accounting of what will be done with the spent canisters. While this particular permit may concern itself only with emissions into the air; the New Mexico Environment Department has an obligation to see that the disposal of spent canisters doesn't simply transfer pollutants from the air to land or water. Here is a link to a recently compiled list of failings and falsehoods by Bloom Energy over more than a decade and as recently as 2026: https://rhinocerosmedia.org/bloom-contradictions/ Just because an applicant says something is true doesn't mean that it is.	2	Merged Document	Yes	[redacted]			Yes	Yes	Yes		Yes	Yes			8/17/2026
Jessica	Lopez-Harder	I am writing to oppose the approval of the air permit requested by Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so all community members can participate equitably. Many of the community members who will be most affected by this have only recently learned about the detrimental effects that Project Jupiter will have on their livelihoods and the environment. Furthermore, Bloom Energy's past record of illegal dumping of hazardous waste should concern us all. Santa Teresa and Sunland Park are home to a largely Hispanic/Latino low-income population, many of whom are monolingual Spanish speakers. I fear that the people behind Project Jupiter see this community as disposable and irrelevant. Otherwise they would not be proposing to create so much damage to them and the place they call home. The damages of data centers in other low-income communities have been well-documented and it is shameful that our leaders are not doing more to stop this. I encourage the Department to deny this air quality permit application and, if it cannot be denied, I urge you to have a public hearing in Santa Teresa, in both English and Spanish, with an option to participate virtually. I have been appalled at the lengths that PJ has gone to garner "support" for their cause, going as far as purposefully creating false comments on this platform under the names of real unsuspecting citizens. Approving this permit would be government-sponsored environmental racism as the residents of Doña Ana County are already disproportionately impacted by environmental pollution. While I may currently reside in Las Cruces, I grew up in Sunland Park and understand first-hand the environmental racism that many there are still facing. My mother and sister still live in the area and have not been able to drink tap water in over a decade. They have to buy filtered water to drink and cook with because CRRUA has been recklessly incompetent at best and purposefully endangering the citizens at worst. Just this past week, my sister noticed that her water pressure has changed. She lives near the PJ construction site in Santa Teresa. It has been documented that people that live near data centers have experienced changes in their water pressure because of the demands that the data centers place on existing infrastructure. If this is happening now, I fear what will occur as this center nears completion and begins operating. Our community and resources are worth protecting. I hope we can all come together to do the right thing: deny this air permit and retract any support for Project Jupiter and any other data centers in New Mexico. Thank you for your time and consideration.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes				8/17/2026
				Merged Document					Yes	Yes	Yes			Yes	Yes		8/17/2026

RACHEL	MANN	SAY NO TO DATA CENTERS! They use up so much water (that we don't have), and pollute the ground and air surrounding it. It will not only be a detriment for the ecosystem, but also to those that live in nearby communities!	1	Merged Document	No	[redacted]	Yes							8/17/2026
Ruben	Vasquez	Against because of limited water sources we are going to deplete it.	1	Merged Document	No	[redacted]	Yes							8/17/2026
Ron	Fitzherbert	I respectfully urge the New Mexico Environment Department to deny, or at a minimum delay, issuance of this permit until the applicant has fully demonstrated that the project will not adversely impact air quality or public health. Although the applicant describes the proposed microgrid as an improvement over previously proposed technologies, the fact remains that this is a new fossil fuel-powered energy facility intended to support an extremely large data center. The Department should require complete, transparent, and independently verifiable analyses of the project's emissions, cumulative air quality impacts, greenhouse gas emissions, hazardous waste generation, and any reasonably foreseeable future expansion before approving the permit. The applicant's revised proposal supersedes earlier applications, making careful scrutiny even more important. (ResourceSpace) In addition, this project raises broader concerns regarding cumulative impacts on surrounding communities. Air permitting should not evaluate emissions in isolation if the microgrid is an integral part of a much larger development. The Department should consider whether the permit appropriately accounts for the overall environmental footprint associated with supporting the adjacent data center and whether additional review is warranted. Community members have already raised concerns regarding cumulative impacts, environmental justice, and the completeness of the application. (New Mexico Environmental Law Center) New Mexico has an obligation to protect the health of its residents and the quality of its air. Where significant uncertainty exists regarding long-term emissions, public health impacts, or cumulative environmental effects, the prudent course is to require additional information rather than issue a permit that may later prove inadequate. For these reasons, I respectfully request that NMED deny this permit unless and until the applicant has clearly demonstrated that the proposed facility complies with all applicable air quality standards,	1	Merged Document	No	[redacted]		Yes	Yes			Yes		8/17/2026
Anonymous	Anonymous	Need more information & accountability re: air quality permit issued and to be monitored - public - especially in immediate area - must be listened to, consulted AND must agree to be affected by this facility and its business, from construction phase thruboperations!	1	Merged Document	No	[redacted]		Yes						8/17/2026
Kate	Laswell	Dear staff of the NMED, I write to you to strongly urge you outright deny this proposal. I hope you realize that so many of the comments in support of this project are falsified by the companies behind this project using bots (or actual people possibly, but I doubt it). Open your eyes. Tons of comments, submitted in chunks at the exact same time, with the same exact message, over and over. Some couldn't even be bothered to spell the name of the place they are trying to destroy correctly. "Doa Ana." Are you serious? They know they aren't getting support but they are desperate to hunker down in our state so they may pollute our air, drain away our water, and put men, women, and children at the risk of death for the sake of money. This is disgusting. It is clear that no residents of New Mexico want this AI data center, yet here we are, using an unreliable comment section that has no meaningful verification for whether comments are GENUINE or not, getting flooded by false support. How is this allowed? how are they able to continue this, even AFTER being caught falsifying comments of support using real people's information without their consent, and facing lawsuits for it? This is insulting, disgusting, and evil. Realize it. If at this time you will not outright reject project jupiter, the public should be given a further 60 days in order to further comment on this matter. Use a more credible system of comments while you're at it. Sincerely, Kate Laswell	1	Merged Document	No	[redacted]	Yes				Yes		Yes	8/17/2026
Lynea	Watson	The increase amount of Data centers is going to create multiple problems such as ; technical issues with air pollution estimates, health impacts of air pollution & hazardous waste. The world is bad as it is with everything. Building a data center on a reservation where it is very scarce on food, electricity and health. Building a Data center there is only disrespectful to the community who reside there. For the sake of the people, animals, wildlife, air pollution, every single thing that has life. don't build it	1	Merged Document	No	[redacted]			Yes		Yes	Yes		8/17/2026
Katie	Hart	I am commenting in strong opposition to Project Jupiter and all data centers. We can already see the awful effects of climate change in New Mexico with hotter and more humid summers, plus higher danger of wild fires and subsequent flooding. We cannot afford to increase our risk of air pollution, water shortages, or other destructive climate impacts, which disproportionately affect poor communities. The Rio Grande is completely dry...the effects are already devastating. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If you will not outright reject this project and permit, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Don't sell out New Mexicans for short term gains - please consider the long term negative consequences	1	Merged Document	No	[redacted]	Yes	Yes	Yes				Yes	8/17/2026
Sabrina	Van Why	As a citizen of Dona Ana county I am requesting the air quality permit for project Jupiter be denied. The community should have been given 60 days to review and comment. The company does not have a great track record of being good stewards of the environment; we MUST hold them accountable and ensure no loopholes. Our environment, our home, is too fragile and precious to ruin for this did center.	1	Merged Document	No	[redacted]		Yes	Yes				Yes	8/17/2026
Catalina	Ambriz	The fact that there's the amount of pushback from this project and yet there is still a foolish push to put a data center that will require massive amounts of water that should be used for people, land, and animal is disgusting amongst so many other things. We, the people of New Mexico, are vehemently against the proposition of this project. Those who are in charge who are so quick to consider selling off our precious, beautiful land for a quick paycheck should be disgusted with themselves. Project Jupiter keeps making claims that they can't even back up. One thing is for sure, our future generations will rely on maintaining the ecological systems in place over a handful of temporary jobs. More specifically focusing on air quality, the data center will raise temperatures in nearby surrounding areas within a 5 degree radius. The environmental impact of this project will have a detrimental effect on the future of New Mexicans. WE DONT WANT IT STOP TRYING TO PUSH IT DOWN OUR THROATS. The weather outside is unbearably hot and the Rio grande is bone dry, in what world does it make ANY SENSE to put a data center that requires so much water in the DESERT during years of record levels of DROUGHT.	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Daniella	Montanez	I am writing in decent of building YGI Micro-Grid, Project Jupiter, and any future micro grids for data centers. I believe based on current statistics we have collected on similar projects, data centers can cause catastrophic damage to local communities with harmful noise production and the depletion of the water table in an already drought stricken area. This data center will add to the already compounding harm to the overall environment. These data centers are also poised to replace more jobs in the long term than they are currently creating. I urge the New Mexico Environmental Department to vote against continued construction on Project Jupiter and consider the full environmental impact this project will have on the whole state of New Mexico. Thank you for your time, Daniella Montanez	1	Merged Document	No	[redacted]	Yes		Yes		Yes			8/17/2026
Gabrielle	Rael	The public deserves at least 60 days to continue to comment on this project. The air quality permit should be denied in light Blooms history of dumping. The exploitation of the New Mexico's people and land is unacceptable. Building one of the largest data centers in the world in a already overburdened community will continue to perpetuate environmental racism. The people of Dona Ana, New Mexico and the Earth will only be harmed by project Jupiter. Please protect us and our future.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Nora	Martinez	I firmly oppose any maintenance of the microgrid, especially when dangerous greenhouse gas emissions are falsely portrayed as minimal when they grossly exceed acceptable levels.	1	Merged Document	No	[redacted]		Yes						8/17/2026
ANONYMOUS	ANONYMOUS	"I have a chronic respiratory problem. In 2025, there were 11 days in Dona Ana County where the air quality rating, according to airnow.gov, was in the Unhealthy range. Even on days that were rated Moderate, the dust in the air was so thick that I couldn't see the Organ Mountains. I stayed inside all of those days, a prisoner of the collective failure of State and Federal agencies to enforce the current laws and regs that were passed to protect my health. The project is too big for our state infrastructure to meet the demands for monitoring and enforcement. The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How exactly will NMED enforce emissions standards without direct, long-term, continuous monitoring when none are proposed? This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC. I desperately request that the permit be denied. If air quality deteriorates, I will move from the county to benefit my health. The county will no longer benefit from my taxes nor my contributions to civic organizations."	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes			8/17/2026
Julie	Shuler-Misra	This plan is such a catastrophically bad idea that I can't believe we've even gotten this far with it. We don't have the water, we can't afford the CO2 emissions. Who's going to benefit, because it surely won't be the people of New Mexico today or in the future. Say no to this terrible plan that is mortgaging our future for the benefit of some rich people.	1	Merged Document	No	[redacted]	Yes	Yes						8/17/2026
Alma	Bearzi	NM does not have the capacity for a project of this magnitude, much less in the driest part of the state.	1	Merged Document	No	[redacted]	Yes							8/17/2026
Hayley	Harper	I am a resident of Albuquerque, NM and I am staunchly against bringing large scale AI data centers into our communities, where lack of water US already a primary concern as we brace for climate change and finite resources. New Mexico has long been subjected to the effects of nuclear energy, oil and gas, and other environmental extractions— its people often abandoned in the aftermath with the consequences. I urge state leaders to listen to the people, we cannot become a sacrifice zone for big tech. Our beautiful state and communities deserve better.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Sylvia	Dorsey	I do not support this project. The environmental impact of this project would be devastating. It will severely strain our already limited water and energy sources. This project will have no long term benefit to the community or to the state. New Mexico cannot support any more data centers.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Paulene	Cordova	Our state is already in a drought, and prone to wildfires. Sucking water from farmlands, people and already precious life forces for an unnecessary data center is the antithesis to New Mexico's way of life. Leave the precious, untouched land and what little water we have left alone. We have also never fully addressed the silver mines in Pecos and nuclear testing site in the south that already is affecting our population. We don't need more toxic chemicals harming our communities.	1	Merged Document	No	[redacted]	Yes					Yes		8/17/2026
Jennifer	Lamborn	"I am a resident of Grant County, NM, and I am asking that you deny Yucca Growth Infrastructure's air quality permit. We are adjacent to Dona Ana County, and I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the impacts we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. We have no reason to believe they will be responsible now. Further, a fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. At the very least, the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Respectfully, Jennifer Lamborn Silver City"	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026
anonymous	anonymous	"Please save our river, we need to figure out ways to make sure the water stays flowing and enough for our communities; human and other beings living with us, the fish, the insects, arachnids, the bugs, the snails, the frogs, toads, the porcupines, the possums, the raccoons, the skunks, the squirrels, the mice, the bears, the cougars, coyotes, foxes, the lizards, snakes, the beavers and more, the plants and underground land that deserve to not be treated with just 'oh it's a desert, let's xeriscape' when in reality we're a valley where they would get the river water they needed to sustain survive and thrive if not for us. we were doing better with saving local species like the cutthroat trout populations; but now 'it's okay to let the river run dry we're saving the water for the towns'???? but are the people that need it seeing that water? it's not okay. and it's not just about us 'we have the land' yes, but that's not the only resource this project is asking of us. 'it will bring in jobs' yes but mostly only short term, while it hurts the lungs and hydration of the peoples and land around it. southern new mexico has dealt with enough adverse health effects already from outside parties the last few generations is it true the that they have previous past of illegally dumping hazardous waste? that should be an automatic no in the first place it keeps coming out that these companies on the project are being deceptive, the thing with the public comments and names being used but comments being twisted to be pro for the project when people are saying 'that's not what i said' needs to be investigated. especially if it's being used as a petition to approve permits idk if it is but i was told growing up that falsifying poll/petition participants answers when used for government things was illegal but even if it's not it needs to be officially looked into if it is used in any way to sway y'all's opinions it's one thing to be transparent about what they're "doing but if they're purposefully deceiving us and the public then they don't have New Mexico's nor our surrounding areas' hearts, health, economy, or futures in mind nor in their hearts if our comments so far haven't been enough please allow New Mexico (and maybe even El Paso/surrounding areas) more time to make our voices heard"	1	Merged Document	No	[redacted]	Yes		Yes			Yes		8/17/2026
David	Baake	On behalf of the Rio Grande Chapter of the Sierra Club, we write to respectfully offer additional technical comments on the above-referenced permit application ("Application") for Project Jupiter's Power Plant (the "Project"). We join comments that Center for Biological Diversity, et al., are filing today, in full. These comments discuss an additional reason the permit application should be denied: Bloom Energy (Bloom), the company that makes the fuel cells the Applicant wants to use in its power plant, has identified two ways to substantially reduce emissions from its fuel cells. The first option is to use exhaust gas from its fuel cells to generate hot water, steam, or chilled water. The second option is carbon capture and sequestration (CCS). Bloom states that its "fuel cell platform is inherently suited" for CCS, because the waste stream is nearly pure CO2. Although a 100% renewable option would be far superior, any applicant that proposes to use fossil fuels must analyze every possible method for mitigating its climate impact. The Applicant failed to identify pollution control strategies identified by its own manufacturer. Accordingly, the application must be denied. See the attachment for the full comment. Respectfully, David Baake Counsel for the Rio Grande Chapter of the Sierra Club	16	Merged Document	Yes	[redacted]	Yes	Yes	Yes		Yes			8/17/2026
Hannah	Widner	My name is Hannah Widner; and as a lifelong resident of Doña Ana county I am strongly opposed to the approval of an air quality construction permit for the Yucca Growth Infrastructure, LLC. Air quality concerns have long plagued Doña Ana county and the surrounding Borderlands metropolitan areas. I believe that the approval of this permit would undermine the efforts our communities have taken to reduce pollution and improve air quality within our region. Increased pollution from the development of this microgrid would have a negative impact on the health and wellbeing of Doña Ana county residents, many of whom struggle with access to affordable healthcare. I do not believe that any potential economic gains from the project will be worth the sacrifice of the air we all share. Should this permit be granted, I fear that a few well connected individuals will enrich themselves at the expense of the health of our community. I urge you to reject the approval of this permit, along with future permit requests relating to the development of data centers in Southern New Mexico. Please do not sacrifice our community for the prospect of profit.	1	Merged Document	No	[redacted]		Yes	Yes					8/17/2026
Nicole	Waltermire	As a long-time resident of Southern New Mexico and the parent of a child who sees a breathing specialist, I vehemently oppose the Yucca Growth Infrastructure LLC Fuel Cell Air Quality Permit at Project Jupiter. My brother used to work for Bloom Energy, so at first, I was pleased to hear that Project Jupiter had withdrawn its original air permit application and had pivoted to a plan to use fuel cell technology to create and supply data center electricity. A deceptively cheerful public relations campaign has infiltrated our local media, promising that Project Jupiter will deliver clean water and green energy for our communities. However, the reality is that this campaign is a shameful greenwashing scam. Fuel cells are not the solution we need when faced with data centers' insatiable appetites for electricity. The proposed fuel cells, which have never been deployed at the scale proposed, will use methane gas to generate electricity, releasing a projected 10 million metric tons of polluting carbon dioxide, or more than the PNM and EPE electric grids combined. This is simply unacceptable. The Microgrids Oversight Act, sponsored this year by Southern New Mexico legislators, would have held private energy microgrids to the same standard as the public utilities under New Mexico's Energy Transition Act. Preventing private energy sources from bypassing state renewable energy standards is simply common sense. This piece of legislation might have passed had we had a longer legislative session this year, and we will be fighting hard for data center regulation in future legislative sessions. Nothing less than a commitment to power these monstrous centers with truly green and renewable energy will suffice. I urge the Air Quality Bureau to reject this application for an air permit and protect our families and communities from polluting and exploitative data	2	Merged Document	Yes	[redacted]	Yes	Yes	Yes		Yes			8/17/2026
Heather	Cowan	I grew up in las cruces and still visit family and friends there often. Please deny any and all permits for this project and for any future data centers, AI projects/companies, large scale servers - any construction where the water use will go to machinery instead of people and food. No more pollution! Save our water.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Sen. Harold	Pope Jr.	The New Mexico Environment Department must reject the air quality permit for Project Jupiter. Our communities should not have to sacrifice clean air, public health, and precious natural resources for a project that raises serious concerns about pollution, energy consumption, and long-term environmental impacts. New Mexicans deserve transparency, accountability, and development that puts people and our environment first. We have a responsibility to protect the air our children breathe and to ensure that no project moves forward unless it can demonstrate that it will not harm our communities or worsen the climate crisis. I urge the New Mexico Environment Department to listen to the concerns of residents, environmental advocates, and local leaders and deny the air quality permit for Project Jupiter. The health of our communities and the future of our state are too important to compromise.	1	Merged Document	No	[redacted]		Yes	Yes				Yes	8/17/2026

Tracy	Winslow	I urge the Board not to approve this air quality construction permit for a new data center in Las Cruces. Building large data centers in the desert is irresponsible and short-sighted. Southern New Mexico is already facing severe water scarcity, and communities along the Rio Grande cannot afford another industrial facility that will increase pressure on our air, water, and energy systems. Even if this application is technically about air quality, the Board should consider the broader environmental burden placed on residents, farmers, wildlife, and future generations. New Mexico should not sacrifice scarce desert resources for data center expansion. Please deny this application.	1		No	[redacted]													
gregory	Sandoval	Project Jupiter's microgrids will result in destructive environmental and climate impacts, worsen ozone pollution and violate community health standards in a region where the people will suffer health impacts directly related to the emissions from this facility.	1	Mirrored Document	No		Yes	Yes	Yes									8/27/2026	
Kathleen	Fuchs	I am opposed to Project Jupiter. New Mexico is already suffering the effects of climate change. Drought and increasing temperatures are already impacting our land, our waterways, and our air quality. Huge data centers are only making the climate crisis worse	1	Mirrored Document	No			Yes	Yes									8/27/2026	
Lee	Wilson	Dear NMED staff, My name is Lee Wilson. I live in Santa Fe, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 9.9 MW Microgrid in Doña Ana County. I currently volunteer with Santa Fe Conservation Trust were we build and maintain trails for public use. We also rehabilitate trust lands by planting native grasses and trees while removing invasive species. The gigantic fuel cell/data center is in direct opposition to my values and those of us concerned about our limited natural resources and maintenance of clean water and air. The project's proposed fuel cell powered grid is concerning for many reasons: * It would still produce a high level of greenhouse gas and toxic pollutants. * This technology generates toxic waste, and the process for handling this waste is still unclear. * Fuel cell technology or a centralized waste system has never been tried at this scale. * Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 9.9 MW Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Lee Wilson	1	Mirrored Document	No			Yes	Yes									8/27/2026	
H	C.	The Yucca Growth Infrastructure will take and ruin the already limited environmental resources we have. We are running out of water and we cannot live without water or air. New Mexican lives are worth so much more than a data center.	1	[redacted]	No			Yes	Yes	Yes		Yes						[redacted]	
Dante	Archuleta	Do not allow a data center in NM. Straining a desert's resources in a drought and in the face of climate change is irresponsible to the citizens who live and raise families here	1	Mirrored Document	No			Yes		Yes								8/27/2026	
Jacob	Jacob	New Mexico, in the midst of a decades long drought, doesn't need another source of pollution nor doesn't it need another means of draining our water. We as a state have been explored enough. Please, reconsider the long term ramifications on our already finished environment. The pro-data center ads are not working on New Mexico's citizens. Despite companies viewing us as barren, we understand how beautiful and precious our state is and how it should remain.	1	Mirrored Document	No			Yes										8/27/2026	
J	K	Adding this to an already stressed air quality area, in addition to other existing and proposed systems in the region will inevitably impact the residents and wildlife negatively. Requesting you deny this permit.	1	Mirrored Document	No			Yes		Yes								8/27/2026	
Kimmurie	Obiodara	Dear NMED, I am writing to you to urge you to deny project jupiter and all proposals associated with it. At this point, this comment section is a complete joke. These corrupient disgusting companies are not getting the support the want, so they are resorting, once again, to leave mass amounts of artificial comments claiming support of the project. Bloom Energy has a criminal past, there is next to no actual information about this project (though it does not take a genius to know that the massive amounts of pollutants produced, which they refuse to actually meaningfully expand or comment on, will seriously harm residents, including innocent children. This will very well end up killing many people. Reject Project Jupiter. Sincerely, [redacted]	1	Mirrored Document	No			Yes	Yes									8/27/2026	
Tenika	Ibias-Gonzalez	As a south valley resident and co-owner of a business who profits from moving heavy equipment for infrastructure and new developments, I stand strongly opposed to granting this permit. The long term health and wellbeing of my children and community far outweighs any short term financial gain of any business owner. As a nurse who works with disparate populations, the exploitative nature of this project is clear and the repercussions will last for generations. I implore you, please do not approve this permit.	1	Mirrored Document	No		Yes									Yes		8/27/2026	
Jared	Conahan	As a lifelong New Mexican I urge the NMED to reject this proposal. The state is already greatly suffering the effects of human-caused climate change; we do not need another facility feigning environmental concern and pumping out carbon emissions, as these facilities most certainly will. Their building of data centers and infrastructure support them in this land must be avoided at all costs. Going ahead with these plans will cost the New Mexican people far more than any profit these businesses care to dream up. Our resources are beyond strained, and we will not gain anything worthwhile by permitting these businesses to further pollute the natural beauty of our home.	1	Mirrored Document	No				Yes									8/27/2026	
Jessica	Aguirre	I urge the New Mexico Environment to reject the Yucca Growth Infrastructure, LLC 9.9 Microgrid Air Quality Construction Permit Application. The short term economical benefit to a very small minority, is not worth the potentially devastating environmental and health impacts. Project Jupiter will have on the community. Data centers cause electricity costs to rise and residents will be the ones footing the bill. Water is already a scarce resource in the desert, and it does not need to be further depleted for the economical gain of a tech company. Data centers in other cities have provided little to no benefits in the way of minimal employment opportunities, and hardly any tax revenue, not to mention the pollution! Please put your community first, and reject this permit.	1	Mirrored Document	No				Yes	Yes									8/27/2026	
Daniel	Roper	I strongly oppose the Yucca Growth Infrastructure, LLC 9.9 Microgrid Air Quality Construction Permit Application. While fuel cells are comparatively clean in emission of fine particulates, they are in no way "green" as they are powered by fossil fuels and emit large amounts of CO2 - this at a time when we should be reducing CO2 emissions. Add to this Project Jupiter's enormous demand for electricity (more than half of a city like Las Cruces) for a technology that brings relatively few permanent jobs and has shown itself to offer little to the average citizen, and the cost in environmental damage is clearly not worth it. Please reject the Yucca Growth Infrastructure, LLC 9.9 Microgrid Air Quality Construction Permit Application. Please do not sell out New Mexico.	1	Mirrored Document	No		Yes	Yes	Yes		Yes								8/27/2026	
Christian	Erwin	I oppose any and all data centers being built in New Mexico, we are in a desert and currently experiencing a drought, a data center would be disastrous for our community.	1	Mirrored Document	No				Yes	Yes		Yes						8/27/2026	
Yvonne	Mosses	I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC 9.9 Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy — no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	1	Mirrored Document	No		Yes											8/27/2026	
Amanda	Bass	As a resident of New Mexico I feel very strongly that this application should be denied. We need to protect our air quality, precious water, and all of our limited resources in New Mexico. We need to prioritize the use of resources for industries that benefit New Mexico residents in ways that make our future (and our children's future) sustainable. This data center is not a priority and will actively harm our residents by further depleting already limited resources. Data Centers are not needed here and will not benefit the state except by draining its deserts resources to it.	1	Mirrored Document	No				Yes	Yes		Yes		Yes				8/27/2026	
Aayesha	Montano	I am against Project Jupiter. Project Jupiter harms New Mexico. Project Jupiter releases hazardous pollutants such as nitrous oxide and carbon monoxide into New Mexico's air. Project Jupiter's greenhouse gas emissions would exceed in polluting New Mexico's air by current greenhouse emissions created by New Mexico's largest cities Santa Fe, Albuquerque, and Las Cruces. Project Jupiter harms our communities, our environment, our water, and our ecosystems. I am against Project Jupiter.	1	Mirrored Document	No				Yes	Yes								8/27/2026	
Natasha	Parker	I am in complete opposition to the Yucca Growth Infrastructure, LLC 9.9 Microgrid Air Quality Construction Permit Application. Please deny this application as YGI failed to include all relevant information about Bloom Energy's problematic history, and Bloom Energy's Fuel Cells are not clean energy as the fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. Microgrid facilities like this one result in continued environmental racism in Doña Ana county and Southern NM overall. NMED is required to make sure that no group of people bears a disproportionate share of negative environmental consequences. Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico, and this cannot continue for our well-being as a state. No more data centers.	1	Mirrored Document	No				Yes	Yes								8/27/2026	
Kathe	Stark	Please do not approve the permit. there have been so many lies told, so many closed door meetings out of view of the public, and our air quality in addition to water and electrical needs of this community, many of whom are poor, need to be considered as a priority over the billionaires looking to exploit New Mexico once again.	1	Mirrored Document	No				Yes	Yes		Yes						8/27/2026	
Paula	Seaton	NM Environment Department, Air Quality Bureau The air quality permit application for the Project Jupiter Data Center projects that air emissions will exceed the combined emissions of Albuquerque and Las Cruces. Project Jupiter is being built in Santa Teresa, NM, on the edge of the Sunland Park non-attainment zone where ozone levels created by volatile organic gasses and other pollutants violate EPA standards. Residents of Santa Teresa (families from the center of Sunland Park) and Sunland Park are mostly of Mexican or Hispanic heritage and with a lower than average US median income. These populations deserve and are legally entitled to the protection of the state of New Mexico and, specifically, by its Air Quality Bureau, in regard to their health and quality of life. There is no study of the possible cumulative health effects of this project plus existing polluting projects in the area. Please keep our state of New Mexico as clean as possible including our air quality which improves New Mexicans lives and deny the application for an air quality permit for Project Jupiter.	1	Mirrored Document	No				Yes	Yes				Yes				8/27/2026	
Phillip	Graves	To the staff of the NMED, I am writing to strongly urge that you reject the Yucca Growth Infrastructure, LLC 9.9 Microgrid Air Quality Construction Permit Application. The exploitative nature of this project is clear and the repercussions will last for generations. Not to mention the falsified comments of support flooding this comment area, which is meant for genuine replies. In truth, nobody but those who will profit from this project and the harm it brings want it to be accepted. New Mexico does not need or want Al Data Centers. Furthermore, with Bloom Energy having such an exploitative and illegal history, there is no reason to trust the vague information given about the waste this Data Center will produce and how it will be managed. I implore you to reject Project Jupiter and everything associated with it. Sincerely, [redacted]	1	Mirrored Document	No				Yes	Yes								8/27/2026	
Hoka	Skenandore	Project Jupiter made it's first mistake by assuming it would be able to add an unwanted data center to a desert that already has limited water for many communities. The next mistake was attempting to name the project after a local indigenous festival, who called this disaster out. There have been multiple reports of underhanded tactics to gain support for this unneeded and unwanted, problematic project. The impact on local communities will never be offset by temporary jobs, nor by increased power usage and pollution, to say nothing of the water wasted, even with the false promise of clean energy. New Mexicans don't want this, I don't want this, and I don't want the environmental impacts to hurt future generations. I adamantly oppose this project.	1	Mirrored Document	No				Yes									8/27/2026	
Liam	Covey-Shannon	I am diametrically opposed to the Yucca Growth Infrastructure, LLC 9.9 Microgrid Air Quality Construction Permit Application, as it was submitted with false claims regarding the volume of greenhouse gases produced and the quality review created with the proposed action. It is reprehensible that approving this application as it is represented to start. Approving this proposed action will cause undue and completely avoidable damage to the fragile desert ecosystem, the surrounding communities, and our climate at large. I do not support the consideration for this application and for the good of New Mexicans and the Southwest as whole, must be revoked.	1	Mirrored Document	No				Yes		Yes	Yes						8/27/2026	
Crystal	Almeida	As someone who as asthma, clean air is a strong priority for me. Everyone should have the right to unpolluted air. Project Jupiter does not align with these values. New Mexican citizens do not want their home to be techno-ian industries play ground. It has been proven in many other states already that citizens do not need or want Al data centers to be built in their homelands. To build project Jupiter will be to go against the will of the people. This will be another example of wasted tax payer money.	1	Mirrored Document	No				Yes									8/27/2026	
Sheila	A hekse	I am writing to submit my strong objection to this entire disastrous project. Our beautiful state cannot withstand the damage to our precious resources that would incur should Project Jupiter be allowed to continue to move forward. In addition, it would also be wonderful if the misleading advertising being done to promote Project Jupiter was disallowed.	1	Mirrored Document	No					Yes								8/27/2026	
Jane	Baechle	Project Jupiter represents an environmental disaster for Dona Ana County and New Mexico. There is no benefit to NM residents to projects which use large quantities of scarce and dwindling supplies of water and pollute the air.	1	Mirrored Document	No		Yes									Yes		8/27/2026	
Rachel	Hickerson	Joining the voices of many, many neighbors near and far, I urge the NMED to deny this permit application for the YGI Microgrid. Our Rio is dry and our valleys already have poor air quality, blown in from increasing fires, blowing dust, and pollution. The requesting company has not provided sufficient or credible data to back their claims, and have recently launched a campaign to gather signatures in bad faith. They cannot be trusted. New Mexico deserves better. New Mexico deserves sincere, future-forward energy solutions that serve our people and these lands for generations to come. This application is not it.	1	Mirrored Document	No				Yes		Yes							8/27/2026	
Matthew	Harder	This permit should be denied as it will be harmful to all those living in the area. The negative effects of air quality near gas power plants have been well proven with nitrous oxides and particulate matter hurting anyone downwind, but this microgrid will be worse even than those as the electricity demand for the data center will be constant and the gas generators will need to be run all the time. I fail to see how this microgrid which will burn enough gas to power a significant portion of New Mexico could not have an effect on the local population in Santa Teresa and Sunland Park similar to what teh has been to the people of Memphis. Bloom Energy have proven themselves not to be trustworthy with a history of illegal dumping, and now are given the opportunity to dump pollutants into the air.	1	Mirrored Document	No				Yes									8/27/2026	
Andrew	Johnson-Schmit	The Southwest is already having water resource issues that will be near impossible to meet in the years ahead because of the historic drought and increasing effects of global warming. This project is unnecessary, makes the current calamitous situation worse and is clearly not in the best interests of people in this region. Shut down this project now!	1	Mirrored Document	No				Yes	Yes		Yes	Yes					8/27/2026	
				Mirrored Document		[redacted]			Yes									8/27/2026	

Alexandra	Hess	I'm a lifelong New Mexico resident who cares deeply about these lands and about the well-being of all who call them home. I'm also a public health researcher and attorney, and I spend my time working to understand the connection between governmental actions and their impacts on population health. I'm personally devastated by the impending plans of erecting a data center in my neighbors' backyard, and I don't believe the proposed changes to this permit application go nearly far enough to address the concerns of those who could be the negative externalities of this data center. This amended application for air quality permit does little to address the concerns residents have already voiced, and the proposed changes make only marginal differences to what will be astronomical and disastrous CO2 emissions. New Mexicans can see through the ad campaigns and PR remediation. Project Jupiter's plans are still categorically unsustainable and harmful to the health and well-being of Doña Ana county residents and beyond. Nothing about this project has been fair or transparent, and lawmakers should be wary of signing away the rights and health of their constituents. New Mexicans are no stranger to the deleterious effects of pollution, and we are fed up. For generations, residents have had to fight for clean-up of contaminated waters and for governmental compensation from radiation exposure that they had no ability to consent to. Project Jupiter will carry on this harmful legacy, exacerbating the depletion and pollution of already strained resources in our state, contaminating air and using the limited water we still have, with little evidence suggesting that the project will meaningfully create jobs that will sustain the lives of those who also have to deal with its negative consequences again.Shame on it. New Mexicans deserve sustainable industries, clean air and water, and most importantly, a say in what happens to their lands. NO to this wholly insufficient permit application. NO to Project Jupiter.	1		No															
Chavonne	Harroun	As a longtime resident of New Mexico I feel very strongly that this application should be denied. We need to protect our air quality, precious water, and all of our limited resources in New Mexico. We need to prioritize the use of resources for industries that benefit New Mexico residents in ways that make our future (and our children's future) sustainable. This data center is not a priority and will actively harm our residents by further depleting already limited resources. Data Centers are not needed here and will not benefit the state enough to devote resources to it.	Minimal Document	1		No		Yes	Yes	Yes									8/27/2026
Kyle	Garrick	I am submitting this comment to express my opposition of YGI's Application. I implore you to also reject the Yucca Growth Infrastructure, LLC YGI Microgrid Air Quality Construction Permit Application. YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. YGI's Application should be denied by NMED because they have falsified comments of support using both real individual's information without their consent -facing legal troubles for doing so- and the mass submission of bottled comments. Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana & Otero County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. NMED should give the public 60 days of additional time to review and comment on the application to ensure everyone can meaningfully comment and participate. If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa so that all individuals may participate equally. Sincerely, Kyle "Gus" Garrick	Minimal Document	1		No		Yes	Yes										8/27/2026
Farah	Karim	I am submitting this comment to express my strong opposition of YGI's Application. I implore you to also reject the Yucca Growth Infrastructure, LLC YGI Microgrid Air Quality Construction Permit Application. YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. YGI's Application should be denied by NMED because they have falsified comments of support using both real individual's information without their consent -facing legal troubles for doing so- and the mass submission of bottled comments. Kevin	Woodburn	This will be the third comment I have submitted, one of them a twist on the comment supplied by Project Jupiter themselves and the other simply stating "Please leave". I, and everyone else I know personally, want Project Jupiter out. Not just them, but all data centers. Any person sitting in office that votes in support of Jupiter will find themselves voted out, I can almost guarantee that. They will become a pariah. The natural beauty of this state will be horrendously scarred by this heinous, destructive, disgusting project. There is no amount of money that will make it okay, there is no promise that Jupiter will keep. This data center will be the death of this county. One of the largest draws of this area, to everyone out of state that I have spoken with, is it's natural beauty and accessibility. Putting down a data center will ruin this, and will ruin the local ecology. Look at how other data centers have changed the areas they're around. Water quality drops despite promises they won't, endless sound, immense power draws, unlawful security surveillance. This data center will drive many out of this area, and it will be the fault of all who support it. Do the right thing, and don't let the money blind you. Get this vile, inhumane, ugly thing out of our state.	Minimal Document	1		No		Yes		Yes									8/27/2026
Alex	Keller	Dear NMED, I am submitting this comment to express my opposition of YGI's Application. I strongly urge you to also reject the Yucca Growth Infrastructure, LLC YGI Microgrid Air Quality Construction Permit Application. YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history, including the illegal dumping of hazardous waste, which will be produced in large amounts by the proposed Data Center. YGI's Application should be denied by NMED because they have falsified comments of support using both real individual's information without their consent -facing legal troubles for doing so- and the mass submission of bottled comments. Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. Dolores	Lara	To Whom It May Concern, Project Jupiter would be deeply destructive to our New Mexican communities and environment. The proposed location for Project Jupiter is in a community that has been fighting for clean drinking water. The project would pollute the air and skies of Southern New Mexico for generations. I am tired of the ads and propaganda being pursed by Project Jupiter that overstate the amount of jobs that will be created and don't give accurate information about the pollutants that will flow into our communities. As a retired teacher, I know how important healthy starts are to children and young people in our communities. Our families need clean environments to thrive. [illegible]	Minimal Document	1		No		Yes		Yes		Yes	Yes	Yes					8/27/2026
Brad	Louis	The New Mexico Environment Department must reject the air quality permit for Project Jupiter. Our communities should not have to sacrifice clean air, public health, and precious natural resources for a project that raises serious concerns about pollution, energy consumption, and long-term environmental impacts. New Mexicans deserve transparency, accountability, and development that puts people and our environment first. We have a responsibility to protect the air our children breathe and to ensure that no project moves forward unless it can demonstrate that it will not harm our communities or worsen the climate crisis. I urge the New Mexico Environment Department to listen to the concerns of residents, environmental advocates, and local leaders and deny the air quality permit for Project Jupiter. The health of our communities and the future of our state depend on responsible	Minimal Document	1		No		Yes	Yes	Yes									8/27/2026
Brianna	Santillanes	This is a massive project that will forever change the trajectory of New Mexico's future, its environment, and its livability for its residents. We already have ample evidence of the devastating consequences these kinds of mega data centers have on the communities they are in. This is the last thing the state needs as we already face drought and poverty.	Minimal Document	1		No		Yes	Yes				Yes				8/27/2026
Bill	Guerra-Addington	Dear New Mexico environment department, I live near Sunland Park Drive in El Paso, Texas just a few miles from Project Jupiter in the desert near Sunland Park, New Mexico. I am opposed to this project and have deep air quality concerns regarding the natural gas fuel cell microgrid plants proposed by Open AI cort Oracle. There are significant unsustainable freshwater use concerns as well for this facility. I urge the New Mexico environment department to deny both air permits. For years. the environmental protection agency designated both El Paso and Sunland Park, NM in a non-attainment zone. In addition, there are serious and environmental justice concerns, placing this plant in an economically distressed area made up of primarily people of Mexican origin. This massive facility could very well increase the ambient air temperature up to 10 to 15 degrees for people living in Sunland Park, Santa Theresa, and those of us living on the west side of El Paso. People living in Anapra, Chihuahua Mexico are also affected by this project, making it a binational air quality concern. Project Jupiter's fuel cells would use massive amounts of natural gas a.k.a. methane that would come from the proposed Green Chile gas pipeline. Using natural gas for energy generation creates air pollution affecting climate change disruption and the health of residents living in the region. I urge the New Mexico environment department to deny these air permits. It would pollute the equivalent of air pollution generated by Albuquerque and Las Cruces energy generation combined. This project is a human health and safety risk for the people and Doña Ana County and El Paso, Texas. Please give the people of Sunland Park some relief from their already burdened historic air and water pollution from the former ASARCO copper and lead smelter, the huge Camino Real landfill, and other sources. Sunland Park is in a low area near the river where air pollution and contaminants gather and settle. Thank you for your consideration in this important matter affecting southwestern New Mexico, El Paso, and Ciduddad Juarez. Respectfully submitted, Bill Guerra-Addington	Minimal Document	1		No		Yes		Yes									8/27/2026
Simon	Riley	I am submitting this comment to express my opposition of YGI's Application. I demand you to also reject the Yucca Growth Infrastructure, LLC YGI Microgrid Air Quality Construction Permit Application. YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history, including their habit of illegally disposing of hazardous waste. Conveniently, that same hazardous waste will be produced massively by the proposed data center. YGI's Application should be denied by NMED because they have falsified comments of support using both real individual's information without their consent -facing legal troubles for doing so- and the mass submission of bottled comments. Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. Isabella	Lanier	Installing a data center here in New Mexico is insanely cruel to the people that live here. We are already struggling as it is with our limited resources and giving them all to a data center is not going to benefit us at ALL. We deserve clean air, and we deserve clean water, NOT to have our land and resources taken to support a project that is going to do more harm than good.	Minimal Document	1		No		Yes	Yes		Yes	Yes	Yes					8/27/2026
Daniel	Kim	This entire project has been deceptively represented to officials and the public, and has no merit. It will be damaging to air and water quality, and must be denied.	Minimal Document	1		No		Yes										8/27/2026
Joshua	Wallace	As I understand, the microgrid that would be enabled by this permit will have carbon dioxide emissions on par with that from both of New Mexico's biggest cities. These cities have well over half a million residents, and tons of businesses within them. Hundreds of thousands find employment within that level of CO2 emission. The proposed micro grid would power a data center that, compared to these two cities, produces almost no jobs (since construction is complete) and produces almost nothing for New Mexico, but instead exports data out of our state with very little financial benefit for us. If we are going to allow that much additional pollution in our state, we have to get something out of it that's worth it. I ask that you reject this permit.	Minimal Document	1		No		Yes											8/27/2026
Eva	Kettler	New Mexican habitat should be preserved. The data center is a threat to our bird population and other species special to New Mexico and Doña Ana county. Not to even mention the threat it had on our water, which is already being threatened by climate crisis. Propaganda about Project Jupiter data center should not be allowed, because it is deceiving to the public, offering jobs that are not guaranteed. We should be a state that leads the way in saying no to infrastructure that damages the land and the people that inhabit that land.	Minimal Document	1		No		Yes	Yes										8/27/2026
Madison	Emund	Do no todo tro! The Rio Grande is DRY! We have no water to spare! The water we have is for the crops, for people to drink, for the river to be full again. I cannot believe that we went from a prospective green energy revolution to the rapid development and implementation of a new, unnecessary technology that tugs a resource necessary for all living beings on this Earth. Data centers are irrelevant. Don't be this.	Minimal Document	1		No		Yes											8/27/2026
Sharon	James	I urge the NMED to deny Air Quality Construction Permit Application 10833 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 18 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities.	Minimal Document	3		Yes		Yes											8/27/2026

Rachel	Hendrix	Please deny the air quality permits for Yucca Growth Infrastructure, LLC. This project does nothing to benefit New Mexico and only endangers NM citizens in the long run. Water resources should be carefully conserved instead of used for data centers that don't care about community. We do not have the water this.	1		No												
Martha	Patterson	New Mexico already lives in both a drought and water debt. Building a massive data center will only exacerbate these already existing issues. The people who suffer the most from these choices are neighbors to all of us. We've seen the impact on communities previous data centers have made, as well as how detrimental these impacts have been on those residents. Building Project Jupiter negatively affects every resident of New Mexico, and is not necessary to achieve more economic growth when other options exist.	Minimal Document 1		No				Yes	Yes							8/27/2026
Lizbeth	Sanchez	I am writing to VEHEMENTLY OPPOSE this project. It is unbelievable that in the driest part of the country, where water is practically non-existent (have you seen the Rio Grande lately???), there is this ridiculous proposal to build a facility that will waste almost 1 MILLION GALLONS of water just to start it up, along with producing more greenhouse gas emissions than Albuquerque and Rio Rancho combined. Please consider the lives of New Mexicans - there is no way a few hundred "jobs" will make up for the inevitable permanent damage to this beautiful state and future generations if this project moves forward.	Minimal Document 1		No				Yes	Yes							8/27/2026
Rachel	Hendrix	Please deny the air quality permits for Yucca Growth Infrastructure, LLC. This project does nothing to benefit New Mexico and only endangers NM citizens in the long run. Water resources should be carefully conserved instead of used for data centers that don't care about community. We do not have the water this.	Minimal Document 1		No				Yes	Yes							8/27/2026
Lorenzo	Alba, Jr.	July 1, 2026 New Mexico Environmental Improvement Board c/o New Mexico Environment Department 1190 St. Francis Drive, Suite N4050 Santa Fe, NM 87505 Re: Public Comment on Support of Air Quality Permit Applications for Project Jupiter (Yucca Growth Infrastructure) Members of the Environmental Improvement Board: I am writing to express my support for the air quality permit applications submitted by Yucca Growth Infrastructure for Project Jupiter and to share the perspective of a community-based organization that has already seen the positive effects of this partnership. I serve as the Executive Director of Casa de Peregrinos, a nonprofit organization dedicated to addressing food insecurity and supporting families throughout Doña Ana Area County. We are one of New Mexico's, if not the, largest mutual food pantry organization, serving one out of seven residents in the county. Casa de Peregrinos works every day with families who are struggling to make ends meet. Many of the individuals we serve are working parents, seniors on fixed incomes, and children whose families are doing their best in a challenging economic environment. For us, community partnerships are not abstract concepts —they directly translate into meals on the table and stability for families who need it most. It has certainly been encouraging to see the engagement Project Jupiter has demonstrated in our community. Through a food distribution partnership, Project Jupiter helped Casa de Peregrinos provide food to approximately 6,000 of our neighbors in Doña Ana Area County. This support made an immediate and meaningful difference. This is collaborative impact at its very best. I am a firm believer that with economic development, there is also the great responsibility of community development. Economic development and community well-being are deeply connected. When communities have access to good jobs, stable wages, and long-term opportunities, families are better positioned to thrive. At the same time, projects that recognize the importance of giving back help strengthen the social fabric that makes communities resilient. From our perspective, Project Jupiter understands that balance and its importance.	Minimal Document 4	Yes					Yes	Yes							8/27/2026
Ben	Brennan	I am writing in firm opposition to the Yucca Growth Infrastructure, LLC Y59 Microgrid Air Quality Construction Permit Application. Considering that this project is estimated to emit more greenhouse gases than two of the state's largest cities combined, it would be abhorrent if this project were to be approved. This also comes at a crucial time in New Mexican history, where drought is no drastic, the Rio Grande is bone dry. Such a venture would be taking away resources from already struggling communities. Please take these public comments into consideration, as Project Jupiter would have devastating environmental impacts on New Mexico.	Minimal Document 1		No					Yes	Yes						8/27/2026
Ashley	Wegele	I am against approving the air quality permit application for Yucca Growth Infrastructure. "Project Jupiter" is one of the last things our state needs. Air quality is already poor due to ozone, wildfire smoke, and other pollutants throughout the year. Water is a scarce resource that is becoming more so every year. Even if one did actually in support of AI - the rapid increase of ultra large data centers being proposed is highly suspect given that our current level of AI functioning with the infrastructure already in place seems to be sufficient. What good is any of this when we are all too sick to use it or the water is finally all gone?	Minimal Document 1		No				Yes	Yes	Yes						8/27/2026
William	Seward	A data center would put a strain on already scarce water resources and consume exorbitant amounts of electricity. This construction is not in the best interest of New Mexicans and should be stopped.	Minimal Document 1		No				Yes	Yes							8/27/2026
Marisa	Brostoff	I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. Furthermore, concentrating 10M metric tons of climate-warming CO2 into 2% acres - exceeding the combined emissions of Albuquerque, Santa Fe, and Las Cruces - creates localized health risks. Emerging 2026–2026 research links elevated CO2 levels to permanent changes in human blood chemistry, oxidative stress, and cognitive decline. Because CO2 sensitivity exists on a normal spectrum, even minor baseline increases can induce anxiety and panic attacks in sensitive individuals."	Minimal Document 1		No							Yes						8/27/2026
Riley	McGlocklin	As a permanent resident of the beautiful state of New Mexico, I vehemently oppose the considerations of the construction permit application filed by Yucca Growth Infrastructure, LLC. The purpose of the project does not warrant the immense environmental cost to an already resource-burdened state. On the basis of the projected negative impact to public health of the surrounding communities, as well as the lack of proof that increased emissions and utility usage will not directly affect the residents of New Mexico, I demand the denial of this application for the sake of the future of New Mexico and its people.	Minimal Document 1		No					Yes	Yes						8/27/2026
Kashka	Cohen	I'm riding to let you know I do not approve of project Jupiter in any way shape or form. New Mexico's air quality is already poor and we should be looking into ways to improve our quality of our air rather than permit another company to make it worse. I have asthma and for 40% of the year I have to take breathing treatments with a nebulizer due to the air quality. New Mexico is already difficult to live in with the water restrictions and low air quality. We do not have enough resources to allow project Jupiter to be fulfilled.	Minimal Document 1		No					Yes	Yes						8/27/2026
Olivia	Soto	I am against the proposed data center because the effects of climate change are already placing significant stress on Albuquerque's natural resources and way of life. The Rio Grande has experienced low water levels due to ongoing water demands, including agricultural use, and a large data center would place even greater pressure on our limited water supply. As a result, the river could continue to decline, making it even less likely to flow consistently in the future. Constructing a data center would disrupt natural habitats for local plants and wildlife, further altering New Mexico's environment. As climate change continues to intensify, we are already seeing more extreme weather, prolonged droughts, and an increase in wildfires. Adding another resource-intensive development could worsen these environmental challenges and have lasting impacts on the region.	Minimal Document 1		No				Yes	Yes	Yes						8/27/2026
Maribeth	Harvey	I oppose Project Jupiter's current air quality permit application. I am writing to say this, this, this is no many submissions giving repeated and also multiple varied facts about the possibilities and likelihoods of many as yet unmanaged potential dangers of the application for Project Jumper as it stands now. These need to be addressed in a way that has yet to be had. There's been some unbelievable changes, but given where the lacrosse, incomplete Project Juniper contracts started out, the residents for around need and deserve much more than that. And even if the penalties or restitution were to be triggered and found to be legitimate offers, they aren't well enough defined or adequate to what might turn out to be terrible losses of health, environmental well-being, and/or basic survival- physical or economical - that could be loosed and not retrievable. A close neighbor told me about an interview several days back in Old Mesilla by a young man wearing a Project Jupiter T-shirt and wanting to go through a survey with her. At the end of their time together, he said a pleasant thanks and goodbye. ...and she realized he hadn't taken any notes of her considerable concerns about Project Jupiter. She hadn't heard of folks who have been discovering that their negative reviews collected by such seeming employees of Project Jupiter were later entered on the portal as positive reviews - but you have been hearing of those, and this has surely entered your considerations. Even this far along for us all, it's clear one side is trying to overwhelm fair process. You were tried and continue being paid to do your best for the state and people of New Mexico: we look to you for that. In keeping with Rep. Sarah Silva's recent letter to you on this subject, I demand reduced emissions and the inclusion of a renewable energy component in Project Jupiter's power generation plans.	Minimal Document 1		No				Yes	Yes							8/27/2026
Victoria	Lovato-Montoya	We should be redistributing funds to our local community development in schools, homeless advocation, drug overdose preventions, healthcare, affordable housing, and social systems. The Rio Grande is the dryest it has ever been. We are looking to protect New Mexico as people who oppose due to instances such as this. We oppose to protect the land of New Mexico from data centers that have been shown to affect wildlife, the environment, pollution, and more. Please do not approve this. We fiercely oppose this project due to this intention of protection and preservation.	Minimal Document 1		No					Yes	Yes	Yes					8/27/2026
April	Cox	I'm absolutely opposed to pursuing any project when our water systems are already under great stress just to sustain the bare minimum of life. Why would we waste our time and energy and resources on a project that will bring no lasting or longterm benefit to our community. It will only increase the heat, make our air quality even worse, and have a lasting detrimental effect on our health here in New Mexico.	Minimal Document 1		No				Yes		Yes						8/27/2026
Olivea	Rojas-Rey	Deny Project Jupiter air permits! Hazardous waste and water contamination/depletion are huge concerns!	Minimal Document 1		No				Yes	Yes	Yes						8/27/2026
Tabitha	Lara	I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. Furthermore, concentrating 10M metric tons of climate-warming CO2 into 2% acres - exceeding the combined emissions of Albuquerque, Santa Fe, and Las Cruces - creates localized health risks. Emerging 2026–2026 research links elevated CO2 levels to permanent changes in human blood chemistry, oxidative stress, and cognitive decline. Because CO2 sensitivity exists on a normal spectrum, even minor baseline increases can induce anxiety and panic attacks in sensitive individuals."	Minimal Document 1		No				Yes				Yes					8/27/2026
Paul	Jackson	I am submitting this comment to express my extreme opposition of YGI's Application. I urge you to also reject the Yucca Growth Infrastructure, LLC Y59 Microgrid Air Quality Construction Permit Application. YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. New Mexico does not want companies with criminal records hustering down here to deploy their factory of gunk and garbage. It would be astounding in the even many possible to allow YGI to continue with their proposal with their dishonesty regarding this subject. YGI's Application should be denied by NMED because they have falsified comments of support using both real individual's information without their consent -facing legal troubles for doing so- and the mass submission of bottled comments. Bloom Energy's Fuel Cells are not clean energy. These fuel cells generate significant NOX, SO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. These hazardous wastes will be in close vicinity to schools and residential areas where children are living and will have their lives put at risk for the sake of making the rich richer. Disgustingly astounding, once more, that this is a certainty of YGI's application. Permitting any microgrid facility will result in a clear example of environmental racism, and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana Area County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. Shocking, once more, that YGI is willing to put so many people at risk for some more money in their already full pockets. NMED should give the public 60 days of additional time to review and comment on the application to ensure everyone can meaningfully comment and participate. If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in person and virtually, in Santa Teresa so that all individuals may participate equally.	Minimal Document 1		No					Yes	Yes							8/27/2026
Lindsay	Lewen	Please see attached comments.	Minimal Document 3		Yes					Yes	Yes		Yes	Yes	Yes			8/27/2026
Deniza	Cadena	To Whom It May Concern, My name is Deniza Cadena. I am a generational New Mexican who was born and raised in the Mesilla Valley and now living in Albuquerque's South Valley. I am asking the New Mexico Environment Department (NMED) to reject Yucca Growth Infrastructure, LLC's air quality permits. In Albuquerque our precious river bed and surrounding Bosque are completely dry. Our New Mexico decision makers and the New Mexico Environment Department need to be focused on how we can mitigate the harms of climate change. Project Jupiter is being framed as economic development. Our families and communities can't afford to resource a data center that would drain environmental resources that are dwindling at unprecedented rates. As a long time reproductive justice advocate, I know that soil and other pollutants have profound impacts on pregnancy outcomes, reproductive healthcare, and generally our health. This administration has claimed to be advocates of reproductive health. If we believe in healthy families, we must support our first environments with clean air. What happens to the environment happens to our bodies and communities. Please deny Yucca Growth Infrastructure, LLC's air quality permits.	Minimal Document 1		No											Yes		8/27/2026
Briana	Gonzales	Project Jupiter and the like are using every unfair tactic to make it seem like New Mexicans want new data centers. The same centers that have increased pollution, climate heat, and waste disaster. New Mexicans wanes are being used falsely to resource favor for these centers which again should automatically disqualify them from anything. We don't need data centers we need to protect what little water, air, and wildlife we have left as well as our future and family's future. The companies don't care about us in the long term so we must do it. No data centers in New Mexico.	Minimal Document 1		No				Yes	Yes	Yes						8/27/2026
Alyssa	Lucero	I do not want project Jupiter or any other data center to be built in new Mexico. I am concerned what this would do to our environment and to our communities. We are already running low on water, already lack local jobs, and already are facing climate crisis. We do not need an ai data center to worsen this.	Minimal Document 1		No				Yes		Yes						8/27/2026
Kezia	Sanders	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	Minimal Document 1		No				Yes		Yes						8/27/2026
Christiane	Cuse	I am writing to express my opposition to Project Jupiter, which I believe will emit too much CO2. Project Jupiter is poised to emit more ozone-poison into the atmosphere than Albuquerque, Las Cruces and Santa Fe combined. I urge the New Mexico Environment Department to forbid this important project. Sincerely, Christiane Cuse	Minimal Document 1		No					Yes				Yes				
											Yes						

Shelby	Wiseman	I vehemently detest project Jupiter. This company and others like it have been widely known to lie, cheat and steal their way into building their data centers. This project in no way would benefit any New Mexican. We are constantly already in a water crisis. I worry what my nieces and nephews might be left with in 50 years long after project Jupiter has squeezed everything they can from us. These jobs are temporary and will not push NM forward, once the building is gone what jobs remain? These facilities are well known to be LOUD 24/7 disrupting people and wildlife alike. They are also known to NOT be capable of a "closed loop system" and they will bleed us dry. There are many states that are suing based on that alone. Please think about the long run. Our state is beautiful but also struggling and does not deserve to be used and thrown away for our resources. We are better than this gimmick.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Clinton	Christison	In C NM, this endeavor is not in the best interest of the consumers of the power grid. This system will cause many to suffer power surges, brown and blackouts and probably drive the cost of electric and water power to surge above reasonable and affordable levels. I disagree with this move.	1	Merged Document	No	[redacted]	Yes							8/17/2026
Shelby	Coen	This project is the antithesis of protecting New Mexican public health and the future health of generations to come. All community members I have spoken to in my daily life are in opposition to the propaganda being fed to New Mexicans by corporations. It is critical that our representatives communicate the public's resounding dissent to this project, if they do not they will without a doubt lose our support and therefore access to public serving political roles in our state. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Steve	Montanez	As a local business owner in Dona Ana County I'm writing to express my strong support for Project Jupiter. For businesses like mine, Project Jupiter promises a significant economic boost, creating 4,000 good-paying construction jobs, followed by 1,500 project-supported positions, that will increase local spending across the community and support small businesses like ours. Project Jupiter's commitment to investing millions in Dona Ana Countys schools, infrastructure, and local services will also help businesses attract and retain talent while strengthening our local economy and customer base. I strongly encourage the New Mexico Environment Department to approve this project. Sincerely, Steve Montanez	1	Merged Document	No	[redacted]			Yes					8/17/2026
Michelle	Melendez	I am a real New Mexican - not tricked into giving my email so it could be used by Oracle. I oppose the Yucca Growth Infrastructure construction permit. They have been deceitful, dishonest and shady AF. They keep changing their plan, are not being transparent, and are trying to influence a public process through pouring money into a public misinformation campaign. There are no real jobs- only pollution and a water-wasting whale of a fake project meant to make money for shareholders. Vote no!! Protect New Mexico!	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Silvia	Stenitzer	Dear NMED staff, My name is Silvia Stenitzer. I live in Santa Fe, NM, and I am writing to voice my deep concern and great anxiety about the risks and harms Project Jupiter poses to New Mexicans. I urge you in my name and the name of our children and grandchildren, that you, the New Mexico Environment Department, reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I urge you to act in good conscience and for the well-being of humans and nature, but not GREED and DESTRUCTION. You are mandated by us the people of New Mexico and you are the department of environment. PROTECT OUR ENVIRONMENT! The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject the Jupiter Project!!! We have to be responsible for our land, not just exploiting and destroying our Earth! PLEASE! I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Silvia Stenitzer	1	Merged Document	No	[redacted]		Yes	Yes		Yes		Yes	8/17/2026
Nan	Pec	I am writing from Colorado, because a data center anywhere is a threat to people everywhere, the Colorado river basin is in imminent danger of collapse if we pull more water out and this year we have no water to give, data centers take more than a fair share and pollute what remains before giving anything back, AI is a threat to humanity and must be regulated, no one wants another data center. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Soleil	Burgess	I strongly oppose. This permit should be denied. Not only has one of the groups involved already been cited with fines for biohazardous waste mismanagement, this is just perpetuating environmental racism by putting these data centers in predominately brown and poor areas. This is not what the New Mexico community needs.	1	Merged Document	No	[redacted]			Yes			Yes		8/17/2026
Ann	Cashman	As a Borderlands resident and someone who wants to continue the rest of my years living here, I can't condone the actions behind what shady deals and the sheer recklessness behind our local government officials it is to let Project Jupiter destroy this beautiful place we call home. I originally was born in a place where our water was so polluted it is now known as the cancer belt. I will not stand idly by as Project Jupiter plans to do the same to the air we breathe and the water we drink. Project Jupiter wants to use fuel cell technology to create and supply electricity to the data centers. These fuel cells use methane gas that will require miles of new pipeline. Even without leaks, the fuels cells will release 10 million tons of carbon dioxide, as well as myriad other hazardous chemicals and compounds into our land, air, and water. This pollution isn't only harmful to wildlife and plants, it's also incredibly harmful to human health. If we want life to continue here in the Chihuahuan Desert, we cannot have Project Jupiter here.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes		8/17/2026
Judy	Scarbrough	I am opposed to accepting the application of Yucca Growth Infrastructure, LLC. for the air quality construction permit. Data centers require an enormous amount of energy to power them. On-site (and off-site) power sources emit carbon dioxide fueling climate warming emissions. On-site power sources will generate fine particulate matter that risk the health and well-being of New Mexicans near and far; these particulates travel unpredictably. Additionally, it seems an unwise decision to place a massive water-guzzling data center in a desert in the midst of a long-term drought. I do not believe the economic benefits to New Mexico outweigh the risks to the health and well-being of our people and our planet. Sincerely, Judy Scarbrough	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Beverly	Carrasco	No data centers!!! The environmental make-up of this region is challenged with low water supply and air quality concerns with borderlands and oil field. The advertisement of Project Jupiter is misleading. Targeting rural areas with lower socioeconomic population is exploitation!!! Deny the permit and deny Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Christopher	Currie	I, as a resident and local vehemently oppose any and all proposals for data center construction or operation in the state of New Mexico. Further more I believe we should vote out any and all state representatives that have undermined the public to push these projects through. To put it bluntly WE HAVE NO WATER and the desert is not an empty place for your toxic waste. Not only do we not want the data centers we do not want what they provide. Please leave New Mexico and never come back. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Kimberly	McKinstry	Kimberly McKinstry As a permanent resident of the beautiful state of New Mexico, I vehemently oppose the consideration of the construction permit application filed by Yucca Growth Infrastructure, LLC. The purpose of the project does not warrant the immense environmental cost to an already resource-burdened state. On the basis of the projected negative impact to public health of the surrounding communities, as well as the lack of proof that increased emissions and utility usage will not directly affect the residents of New Mexico, I demand the denial of this application for the sake of the future of New Mexico and its people.	1	Merged Document	No	[redacted]		Yes	Yes					8/17/2026
Christine	Dobbin	Before you can even begin to consider this air quality permit, I urge this body to thoroughly educate themselves and reflect on the blatantly compromised processes that have brought us here. In fact, legal and ethical failures are the only consistent outcomes delivered by this project and its associates thus far. I hope you can even slightly imagine what this same behavior would mean when accompanying the privatized development of an experimental fuel cell plant of unprecedented scale. We know these deceptive practices are common among massive, out-of-state corporations and institutionalized within Doña Ana County and the state government. The decisions you make surrounding this air quality permit will clearly demonstrate whether this body functions as an independent regulatory authority or a charade entrenched in the very political favor that brought this community health disaster to your desks. Do you know why the department and bureau's mission statements contain the words 'healthy' and 'public health'? Surely you are aware that, fundamentally, environmental contamination undermines human health at best and eviscerates livability at worst– at least that which is humane and dignified. Calculated complacency has left southern Doña Ana County with decades of poor air quality. Consistently ranking in the top 20 most ozone-polluted areas of the country has brought us higher rates of neonatal complications, childhood asthma, and premature death. To even contemplate forcing more pollution into our lungs when you have been so silent about ongoing suffering– so much of which is quite literally in your control– is unbelievable. My HOME– my FAMILY– sits less than 7 miles away from this proposed operation. We have already had high ozone days which trap people indoors with the advice of 'keep the evaporative cooler off' in the midst of blistering heat. You are deciding whether people in my community will live or die because of frivolous hazards that are 100% PREVENTABLE. Given the applicants' insufficient testing and the technology's complete lack of reliable evidence exhibiting lifetime safety risks or efficiency at a scale that is even remotely close to what is proposed here, the applicants' pollution estimates are certainly the floor of what they will emit. It is an insult to our intelligence and homegrown education to expect us to believe that this theoretical monstrosity and its corporate handlers will respect the boundaries of these rough approximations. Let's remind ourselves of how anemic NM oil & gas regulation is in practice, particularly in terms of illegal venting and undisclosed spills. You are fully aware of ongoing and egregious oversight failures driven by strategic funding choices. With the knowledge that this is a deeply ingrained, statewide status quo at the earliest stages of reform, allowing this permit to move any further would make you complicit in generations of unescapable harm. You know full well that the denial of this air permit is one of the only leverage points our community has to protect ourselves from expedited exploitation. If you do not stop it here, at the gateway of the very air we breathe and cannot run away from, let alone live without, you are signaling to every predatory corporation in the nation and the world that our agencies are hollow and our health is for sale. The impact of your decision will long outlast you– it can loom over and darken even your greatest accomplishments or cement your integrity in time. If the local, community-based opposition is not enough to indicate the weight of this decision, the choices made by relevant corporations to commit identity theft and fraud via this very comment portal and violate the Open Meetings Act, Inspection of Public Records Act, Lobbyist Regulation Act, and statutory IRB and LEDA application and grantee mandates, should. If, for a moment, we ignore the fraudulent comments, I already see more than double that of the first permit. That is growing support for our community and growing fear on the part of the project's handlers. The	2	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026
Ben	Graham	Re-branding a company must not allow it to escape the consequences of lying for the same goals. Previous applications for these same power plants were riddled with "errors" and blatant lies disconnected from any physical reality. The air quality across southern New Mexico has steadily declined over the last decades. Adding a significant pollution source even closer will only worsen the situation and poses significant threat to our population. The fact that none of the owners of YGI will be willing to live downwind of the power plants should provided all the evidence needed to the harm that will be caused.	1	Merged Document	No	[redacted]		Yes	Yes					8/17/2026
Nikolaus	Anonymous	I do not consent to the construction of a data center which will jeopardize the air and water quality for myself and the people who inhabit this region. I do not accept an attack on our quality of life. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Roberta	Ortega	I am writing to express my opposition to the proposed Project Jupiter data center. I believe this project raises significant concerns that deserve careful consideration before any approvals are granted. First, the project's expected water consumption could place additional stress on local water resources. Second, the data center's energy requirements are likely to be substantial. Additionally, the public deserves complete transparency regarding the project's environmental impacts, projected utility usage, emergency backup systems, and any public incentives or tax abatements associated with the development. Thank you for considering my comments and for protecting the interests of our communities.	1	Merged Document	No	[redacted]	Yes		Yes				Yes	8/17/2026
Marina	Fountain	I am submitting this comment to share my strong opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. A report provided by Hindenburg Research has indicated the nature of the Bloom Energy company and its systems in other states which have higher emissions than they initially indicated [1]. This report was used in a court case (Jacob v. Bloom Energy Corporation) in Delaware where a shareholder of the Bloom Energy company was demanding an inspection of Bloom's books and records following the analysis of the Hindenburg report on the company [2]. In this case the court concluded granting Jacob limited inspection rights as Bloom's Form 8-K form rebuttal to the Hindenburg report as the form stated that there was an accounting error, giving some credibility to Jacob's concerns on the company's financial reporting [2]. Additionally, the EPA probed and fined the company over its handling of potentially hazardous waste from their solid fuel cells in Delaware which ran on natural gas in 2020 [3]. In fact, the company has a trend of downplaying the hazardous waste, including this year [3]. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. The amount of greenhouse gases that would be produced is still above the emissions of New Mexico's biggest cities combined despite the fact that the fuel cells will emit about 2 million tons less in emissions than the original gas turbines at about 13 million, according to Bloom Energy's own Doña Ana County website [4]. This does not match the state's push for green and renewable energy as stated by the Energy Transition Act, which has "...set a statewide renewable energy standard of 50 percent by 2030 for New Mexico investor-owned utilities and rural electric cooperatives" [5]. Even the Office for Renewable Energy has a track record for renewable energy as touted by the Office's own state website [6]. However, this project's fuel source is the opposite of what the state's own legislation has set for moving away from nonrenewable and CO2 emitting energy sources. The natural gas powered, fuel cell micro-grid as proposed is almost a completed contrast to other energy projects such as the SunZia and the Iberdrola "El Cabo" projects [6]. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences [7, 8]. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Above all, the lack of information including the energy source the fuel cells use to residents in the city where the center will be located and nearby cities is not appreciated and should be taken into account when reviewing the application.	2	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	Though the tech they are presenting as fuel cell tech (in my research) does claim to emit only water, there are many types of fuel cell tech available. Applying for permit for fuel cell tech does not, in itself, tell us what type of tech is being used. For sake of argument, let's use Hydrogen cell tech. Yes according to the research, water is the emission. But it doesn't address the energy emitted by this hugely exothermic chemical reaction of hydrogen bonding w oxygen. Nor does it address WHERE the fuel (hydrogen) will come from, how it will be transported, stored and safety protocols, if indeed this is what type of fuel cell is being used. Not to mention that fossil fuel is required to obtain pure hydrogen. Pure hydrogen deposits are very rare in pure form, very rare. They are acquired from compounds that must be broken to acquire pure form. To get this an extremely high amount of CO2 is emitted to get pure hydrogen. There are just too many questions that surround this application. To give the public the nice nice PR propaganda that it is zero emissions is misleading and too simple. There are too many questions that I really don't believe the public will ever know and that those politicians that are privy just don't understand. Like how nuclear energy was touted as safe and clean, we found out how delicate maintaining it can be and the danger it poses to the public and environment. We don't know what effects this "clean emission fuel cells" will have in the future to our health and environment. Either way, the water that will be emitted will not be enough to replace the water from our reserves and water table that is needed to be used to cool the cells. I submit my response as a pushback of the fuel cell clean air permit. Too many questions. Use of our already water deprived reserves. And unknown long term dangers to our people and environment. I ask that the public should be given an additional 60 days to review and comment on the air quality permit. Asking for experts, unbiased, to help the public understand the tech jargon used so we can see past the public image being promoted by the project leaders. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Dona Ana county has long been considered a non attainment zone, not meeting federal standards. So why now is Dona Ana an optimal area? I personally feel this permit should be denied considering Bloom Energy's history of illegal dumping hazardous waste. This was associated with solid oxide fuel cells which produce toxic waste that include chromium. Bloom has been called a "large quantity generator of hazardous waste" by the EPA. If Bloom plans to use solid oxide fuel cells, as used in other projects, we can count on high CO2 emissions among other known toxins. Considering that the EPA itself labeled it as a hazardous waste generator, I recommend denial of the permit. Where are their plans to safely and securely hold waste production? Their past has shown that they simply dumped in landfills. I implore that the permit be denied. If not denied, I request public hearing be set in Santa Teresa w expert s to be available to counter the project propaganda. I ask for both English and Spanish and virtual to allow all to provide input. This is an invasion of our land for a data center being built for a surveillance to support the racial agenda of this current administration.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Richelle	Paoli	Project Jupiter will have devastating effects on local environment and resources. At the very least, implement a moratorium like Santa Fe has done so more research can be done on the impacts. Thank you for taking the time to read my comment.	1	Merged Document	No	[redacted]			Yes					8/17/2026
Tasnim	Clarke	The air quality permit should be denied to do Bloom Energy's history of illegal dumping. If the permit is not denied there should be a hearing held in Santa Teresa, in English and Spanish, so that the residents that will be the people directly affected can be heard. It is environmental racism to push through permits just in the interest of profit and without the communities approval.	1	Merged Document	No	[redacted]		Yes	Yes			Yes		8/17/2026
Alissa	salazar	The amount of proposed pollution suggested by project jupiter is unacceptable. Our air quality is very important in New Mexico. I would like a public hearing so we can actually play have our say on this.	1	Merged Document	No	[redacted]		Yes	Yes				Yes	8/17/2026

Malia	Hanawalt	My name is Malia Trujillo Hanawalt. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a proud Northern New Mexican whose family has sustainably lived off this land for generations. I want the same for myself, my future lineage, but most importantly for my community. We have rightfully been deemed the "Land of Enchantment" with our ecologic diversity blessing us with astonishing landscapes and environments, completely unique to our state. NMED, your claimed mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." By granting these permit applications, you are directly harming New Mexicans and betraying your promise to protect our enchanting lands. The Chihuahuan Desert borderlands of Doña Ana county, Tortugas Pueblo, Ysleta del Sur, and surrounding Pueblo communities are not a dumping grounds for Project Jupiter's developments. Our land does not deserve to be polluted with toxic waste. Our communities are counting on your protection based on the mission you promise to us. I am a recent graduate of the University of New Mexico with a Bachelor of Science in Biology in which I have studied our environment and how all environmental factors directly impact our health. It does not take a degree in higher education to understand that the YGI Microgrid can only harm our communities. I am asking you to think outside of yourself. Think outside of monetary gain. Think as someone who cares about the wellbeing of your fellow New Mexicans. Our land and our health should not be sacrificed for fuel cell technology experimentation. This will not let New Mexicans prosper. The project's proposed fuel cell powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants. - This technology generates toxic waste, and the process for handling this waste is still	2	Merged Document	Yes	[redacted]				Yes	Yes		Yes	Yes	Yes	8/17/2026
Patricia	Willson	There needs to be a moratorium on data center construction until the ramifications are better understood. Lowest snowpack on record. Hottest June on record. Massive flooding in the east right now. Do not approve the permit for this project! And yes, I am not a bot.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive								8/17/2026
Alissa	salazar	The amount of proposed pollution suggested by project jupiter is unacceptable. Our air quality is very important in New Mexico. I would like a public hearing so we can actually have our say on this.	1	Merged Document	No	[redacted]				Yes	Yes				Yes	8/17/2026
Claudia	Monnett	This permit should be denied. Data centers use outrageous amounts of electricity and water, electricity and water that New Mexico needs. Among many other drought related issues, New Mexico's forests are dying faster than at any time on record. In 2025, the state mapped 209,000 acres of trees killed by bark beetles and other insects, which was more than a 200% increase over the year before, according to a newly released report from the New Mexico Forestry Division. And the main impetus for that arboreal death was the state's dwindling water supply. At the beginning of January 2025, 35% of the state was in moderate drought and 20% in severe drought," the report read. "By the end of December 2025, 71% of the state was in moderate drought and 52% was in severe drought. And Project Jupiter is projected to use 1 million gallons of water per DAY in our severely drought stricken state. Data centers are horrible for the environment in any state, but New Mexico in particular has zero margin for error with our water. Deny this permit and tell big tech no, you can't keep stealing from citizens.	1	Merged Document	No	[redacted]			Yes		Yes	Yes	Yes			8/17/2026
Lynnae	M.	I oppose project Jupiter and the construction of the fuel cell generator. Not only will it contaminate all of our natural resources, take water that we already do not have and poison the people of new mexico. But it will take away from the beauty that is new mexico. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Ben	Herrera	Such installments of data centers and other permits allowing the pollution in our state should not be allowed given the current state of global warming and the communal harming that data centers bring to the people around them. There is no need to harm the climate further especially with another data center to provide very few jobs for the surrounding area and make the communities near such data centers suffer. These data centers do not care about people and the climate that they are drastically hurting. Community leaders should do everything in their power to ensure such data centers are not built given the insane access of them that have already been built. People do not deserve to suffer for the profit of a large corporation!	1	Merged Document	No	[redacted]					Yes					8/17/2026
Zachary	Aquino	I strongly oppose Project Jupiter. This company, and others like it, has a documented history of lying, cheating, and stealing to build its data centers. This project offers zero real benefit to New Mexicans. We're already in the middle of a constant water crisis, and I fear what my nieces and nephews will inherit 50 years from now, after Project Jupiter has drained everything it can from us. The jobs it brings are temporary and won't move New Mexico forward once construction ends, what's left? These facilities are notoriously loud, running 24/7, disrupting both communities and wildlife. They're also proven incapable of operating a true "closed loop system" they will bleed us dry. Several states are already suing on that basis alone. Please consider the long-term. Our state is beautiful, but it's also struggling and it doesn't deserve to be used and discarded for its resources. We're better than this cheap gimmick.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
John	MacTavish	I am opposed to Project Jupiter, and I call upon NMED to outright reject this proposal and application. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. Not to mention, solid hazardous waste will also be produced by this data center. Considering Bloom Energy's poor history of illegally disposing hazardous waste, among other things, gives every reason as to why NMED should reject this application. The amount of pollution will be extremely damaging to the health of the women, men, and children who inhabit New Mexico. The massive amount of sound pollution will do the same. It will destroy the health of many, and for many it will be irreparable. The repercussions of allowing this project to become reality will be next to irreversible and will haunt the land and its people for many generations to come. Nobody in New Mexico wants this monstrosity of a data center here, nor do we harbor any respect for those with power who may allow it to exist. In any case, they will likely lose the support of those who allowed them to be there in power in the first place. Do not allow the adults and children of now and the future suffer just so that these companies can make continue to stuff their rotting pockets. With as much respect as you'll deserve after making your decision, -John S. MacTavish	1	Merged Document	No	[redacted]				Yes	Yes			Yes		8/17/2026
ROY G.	DILF	NO DATA CENTERS IN NEW MEXICO NOW OR EVER This project was never needed, and I hope with all these comments you can truly see how unwanted this has always been. From all walks of life, people internationally are begging for a complete moratorium of these data centers. And to scale in, the one common ground the people of Dona Ana have, is the want for Project Jupiter's moratorium. There are a myriad of other things that could have been invested in and bettered the community. If there was a genuine want to provide for the us, then we would see it done by making affordable and quality housing for those in Dona Ana. Or by giving actual job opportunities to the citizens of this county, not made up numbers and empty promises with what this Data Center will provide. Or better yet protecting our local artist and their work that makes New Mexico cultured and relevant, or even more so the people who make up this amazing state, by limiting generative ai usage--due to it's surveillance qualities and history of stealing art. This data center will not provide a drip for this community, and will in turn suck us dry. These made up statistics the commissioners have been peddled and are attempting to push on the people of Dona Ana and New Mexico are a being illuminated. Something to this magnitude should have first been put to a vote. Or at the very least thought out more, especially with all the back tracking that's been done by the commissioners with what is in the 1500 page document. Now we are seeing a new air permit being submitted. It is the obligation of our elected officials to have done their due diligence with these permits and factors that will impact their citizens.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Alysia	Sufrin	This permit and the entire project reek of corruption. This level of emissions would undo all of our climate and carbon goals. DENY THIS PERMIT!!! Doña Ana is my home, I have nowhere else to go. I'm not alone. This project perpetuates a history of using NM as a testing ground for unproven technologies. This is environmental racism. This project will bring LESS jobs to Doña Ana than LCPS, just ONE school district in the county, besides that it only brings pollution and destruction of our resources. Right next to SEVERAL SCHOOLS? ? ? SAVE US!!! DENY THE PERMIT!!!	1	Merged Document	No	[redacted]				Yes	Yes					8/17/2026
Mykayla	Trujillo Hanawalt	My name is Mykayla Trujillo Hanawalt. I am a resident of Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As someone fortunate enough to have grown up throughout Northern New Mexico, I consider my home to be one of the world's most beautiful places. From the mountains to the mesas, the fresh air, flora and fauna, the seasons, culture, food, and at the root of it all, the sacred sources of water are what make these lands special to so many. I am personally concerned about this mega A.I. Data Center because this development will directly impact everything we call home as New Mexicans. This year is already hot and dry, the Rio Grande River is dry, the bills to cool my home are increasing, and a mega-drought is on our doorstep. Approving Project Jupiter's power plant is the most nonsensical decision NMED could make considering their mission, "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." I find it concerning that Project Jupiter's power plant will contribute to climate-warming by releasing up to 10 million tons of greenhouse gas emissions every year. The toxic waste from fuel cells will also further contribute to the pollution of our air, and it is an elementary level observation to understand that anything that enters the environment will eventually cycle into all other areas, like our water and soil. Improper hazardous waste handling has already happened in Pennsylvania and Maryland, and I do not trust that those behind the business of this development care about New Mexican's health and safety. I also find it alarming that the tribal governments of Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Dona Ana County near the site have not been properly notified of this air permit application request. This decision affects this state and surrounding areas beyond our borders social and environmental ecosystems. If NMED's	3	Merged Document	Yes	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Vanessa	Medrano	I am a resident of Las Cruces, New Mexico and moved here in the past year due to the opportunities and policies available here. This land is a large part of the pride I feel living here now. I have been part of the fight for clean air in El Paso, Texas where there is already little regulation causing Doña Ana County and the surrounding region to be a non-attainment zone due to the excessive corporate pollution. I believe, and research shows, that having a data center in Doña Ana County will further pollute our air. It is for this reason the air quality permit should be denied. If the comments you have already received isn't convincing enough, extend the time window for public comment. The public deserves an additional 60 days to review and commoner on this air quality permit, because that is who is going to be directly affected. Not investors and not the leadership of large corporations with empty promises. Bloom Energy even has a history of illegally dumping hazardous waste. This alone should indicate how at risk our region is at the very possibility of an air quality permit being granted. Communities all over the nation have spoken up on the harm of these centers. It's time Doña Ana County be the example of a place where people are heard over environmentally toxic corporations. Should a permit not be denied, the public deserves an accessible public hearing. This would include having the public hearing provide virtual participation opportunities and allowing for it to take place in both English and Spanish so all community members may attend, hear, and be understood.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Beatriz	Lopez	Estoy en contra de la construcción de el Proyecto Jupiter. Nuestra comunidad necesita agua limpia y tenemos que proteger nuestro aire contra más contaminación. Tengo más de 50 años viviendo en Sunland Park y en ese tiempo he visto los afectos ambientales que trajo Asarco, el incenerador del dompe, y como CRRUA todavía nos falla en limpiar nuestra agua.	1	Merged Document	No	[redacted]			Yes							8/17/2026
Mirinisa	Stewart-Tengco	I fully oppose this initiative. A data center is wholly unnecessary to our community and poses a threat to our water, air, land, and values. In no universe does New Mexico need a data center to thrive—we already have plenty of jobs and infrastructure that aren't purely extractive and that don't serve solely to enrich outsiders while depleting our already-scarce water and other natural resources. Yucca OUT of New Mexico, and no data centers in our state!	1	Merged Document	No	[redacted]			Yes							8/17/2026
Rachelle	Pena	My name is Rachelle and for the past four years i have served communities across New Mexico (from Las Cruces to Farmington) in emergency and acute care. Through this work, I have witnessed firsthand the devastating consequences of New Mexico's long history of nuclear, gas, and oil extraction. I fear that the expansion of AI data centers will push our communities that are already struggling even deeper into crisis. I have grown to love New Mexico, and hope to continue to provide care for these communities because this is my home now. So am asking you to deny Yucca Growth Infrastructure's air quality permit. This project is estimated to release 10 million tons of carbon dioxide pollution and other toxic emissions into our skies and into our groundwater, Many of our metro area; especially Doña Ana County have some of the worst in the nation for ozone pollution and regularly receive a failing grades on air quality standard every single year since 2000. Allowing Project Jupiter to continue will put our fiends, family, and neighbors in danger. In my ERs we are rushing to provide fluids to patients who arrived breathless, dizzy and drenched in sweat. Others were brought in on stretchers, their body temperatures so high their central nervous systems had shut down. Just this past week I took take of a man who had a seizure at his grandson's first baseball game from the extreme heat causing severe electrolyte imbalance. I'll never forget the cries of his family. I also will never forget the sound of a child struggling to breathe during a severe asthma attack caused by worsening air quality. And I will never forget placing a woman on life support after her body violently rejected contaminated drinking water she had no choice but to rely on while trying to make it through her work shift. For far too long, our most vulnerable communities have borne the burden of systemic disinvestment at the hands of corporate profiteers, polluting industries, and policymakers who have repeatedly prioritized private interests over the health and well-being of the people. New Mexicans deserve better. you must hold a public hearing in-person in Santa Teresa with a virtual option as well. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	2	Merged Document	Yes	[redacted]			Yes	Yes	Yes				Yes	8/17/2026
Heather	Shelton	Dear New Mexico Environment Department: I write to you as a deeply concerned citizen to urge you to reject the air quality construction permit application (10883) submitted by Yucca Growth Infrastructure LLC (YGI) to build a methane-fueled power plant in the Santa Teresa area, west of Sunland Park, along the Mexican border in southern Dona Ana County. YGI's application has not demonstrated that this project adheres to state statute requiring that it prevent air pollution "in quantities and of a duration that may with reasonable probability injure human health or animal or plant life or as may unreasonably interfere with the public welfare, visibility or the reasonable use of property" (NMSA 74-2-2(b)). The projected amount of carbon dioxide production alone is, to me, reason to reject the application. The carbon dioxide expected to be generated by this highly unusual energy production plan is equivalent to the amount generated by all electricity production in the entire state in 2021 (10.31 MMT CO2e), according to Energy+Environmental Ecconomis ("New Mexico Greenhouse Gas Emissions Inventory and Forecast," released December 2024). The YGI plant, if the applicant is to be believed, would generate 9.2 million metric tons of C02-equivalent per year. The developer has boasted that this amount of greenhouse gases is roughly 40 percent less than its original gas turbine plan; but the overall output is still unacceptable and dangerous. The YGI power plant, by itself, would effectively wipe out the fruits of years of effort on the state and local level – political organizing, policy development, legislative appropriations - to reduce greenhouse gas emissions enough to curb the worst effects of climate change. While the president of the United States may call climate change a "hoax," at the level of state government in New Mexico, the issue is not subject to debate. We have already seen average temperatures in the Southwest increase by 2 degrees Fahrenheit over the last few decades. You know this. We are being asked to sacrifice environmental health and community well-being for private profit. Your decision is clear – the YGI project should not and must not be approved. The developer, with the blessing of the state, proposes to locate this project on the edge of a largely Hispanic, low-income community. This project's impact should be assessed in the context of plans for at least two other data centers in the region – the Meta data center in northeast El Paso (literally on the state line abutting the low-income community of Chaparral, NM), and another data center proposed by the Department of Defense on Fort Bliss, Tx. There are other issues that require additional scrutiny and vetting by the state, particularly the ambient heat produced by data centers and the thousands of fuel cells necessary to power it. A temperature increase of just one or two degrees year-round from heated air flowing over the area will result in damaging aridification and impacts to humans and wildlife. The developers of the data center and its associated microgrid are already racing ahead with construction, before obtaining a crucial air quality permit from your agency. Contractors have already graded land, built parking lots, and are laying the groundwork for the data center and microgrid. It's reasonable to conclude that they are engaging in this risky behavior in a high-stakes effort to pressure regulatory bodies to bend and forfeit your regulatory responsibilities. They are essentially daring you to stand in the way of "progress and economic development," a framework popular with Project Jupiter's backers. If the permit is not denied, then a public hearing should be held as well as giving the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. But I urge you to please stand strong, adhere to principles and policy, and do not allow this pressure tactic to affect your decision-making responsibilities. Reject this application for the good of the community and our shared environment.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes		Yes	8/17/2026
Teresa	Skiba	No data centers in the state of New Mexico. The environmental impacts of such projects are catastrophic. We cannot afford to negatively impact water, soil and air quality. The people of Dona Ana County deserve our solidarity and respect!	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Kat	D'Orazuo	I am vehemently opposed to Project Jupiter. This is theft of our resources and dangerous for our land and people. Deny the air quality permit application and give the public additional time to comment. If this permit goes through, it will be a blatant act of environmental racism against a county already disproportionately impacted by pollution.	1	Merged Document	No	[redacted]				Yes	Yes					8/17/2026
Ali	Anderson	There is not enough water for this project to be completed. Not would it benefit the New Mexico economy. This would only consume a tremendous amount of natural resources for little to no gain.	1	Merged Document	No	[redacted]			Yes							8/17/2026
Misha	Ash	There needs to be much more scrutiny, public input, and transparency before allowing any such project. At a time when climate disruptions are on the rise, including droughts and extreme weather events, what justification is there to allow such massive energy and water usage? Maybe these developers and technologists need to go back to the drawing board to create something that will not impose such severe harms on the environment and local communities, as we already know from comparable projects across the country.	1	Merged Document	No	[redacted]			Yes		Yes				Yes	8/17/2026
Josephine	Lewis	Dear NMED staff, My name is Josephine Lewis. I live in [place of residence], and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. A.I. is not an inevitable technology. A.I. is a threat to human well-being and represents a threat to the people of New Mexico. The climate catastrophe is impending unless drastic measures are taken to conserve our precious resources. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. The NMED has the opportunity NOW to set a precedent of resisting corporate greed that is KILLING our ecosystems and serve its other resource -- the New Mexican people. This is a rare OPPORTUNITY of resistance to a future that the 1% who profit from climate change want to convince everyone is unavoidable. The project's proposed fuel cell-powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Josephine Lewis	1	Merged Document	No	[redacted]			Yes		Yes		Yes		Yes	8/17/2026
Elena	Wegmann	I do not support Project Jupiter. Use of AI leads to the cognitive surrender of our youth and impact their reading comprehension and access to educational growth. Data centers waste massive amounts of water, create noise, and deplete wildlife and biodiversity. Advertisements that are on streaming services are misleading and are not presenting truthful data about their community impact.	1	Merged Document	No	[redacted]			Yes		Yes		Yes			8/17/2026
CJ	Pennington	Project Jupiter brings absolutely zero benefit to anyone living in New Mexico besides the very people who want it's construction- which is without the consent of the people. We do not want this void in our natural economy of very little water and rising heat to take what little we have. It should not require much judgement to know this would only benefit a small percentage of our country and state, and not in any form that helps the public or infrastructure. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026

Carly	Howard	Dear NMED staff, My name is Carly Howard. I live in New Mexico, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Myself and many prominent community members have growing concerns and opposition to the development of data centers in the desert. Support for this project is overwhelmingly lacking, and the project is being advertised with misleading information, not allowing community members to give informed consent to developers. Vulnerable populations will suffer from this development. The jobs it will create are not worth the consumption and eradication of resources the entire world relies on. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Carly Howard The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]			Yes	Yes		Yes	Yes	Yes		8/17/2026	
Jacob	Evenson	Please see our correct letter. I submitted a letter attachment earlier this afternoon with the same title but had the previous applicant's name. This is the letter we'd like to appear in the official record. Thank you.	3	Merged Document	Yes		Yes								Yes	8/17/2026	Wants the other letter off the record. Unclear whose that is?
Makenzie	Meacham	The last thing this parched land needs is a data center. Disgusting of Yucca Growth Infrastructure to be pushing this project on this community. They are ignoring the wants of New Mexicans, lying about the support they have, and acting like the economic benefit will be worth all the environmental destruction. They do not care about the environment and are only pretending to care for it when they must, e.g. switching to fuel cells only after receiving backlash. They will not be proactive about protecting the environment, building a data center in a drought stricken desert is proof enough their only interest is profit, whatever the cost. I wholly disagree with further development of Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes	Yes		Yes	Yes	Yes		8/17/2026	
C	G	The water crisis in New Mexico is so bad it is actively palpable. Even in the past two years, climate change has genuinely changed the seasonal patterns here. It no longer snows in March, last year there was barely any snow on the ground. There has not even been a monsoon this summer. To build something that has this much environmental impact in a state like New Mexico is jaw dropping. People live in New Mexico for the peace, quiet, lights in the night sky, the nature, and the lack of things like giant light pollution emitting data centers. To build this data center in New Mexico is an insult and an affront to everything this state stands for. This state is called the Land of Enchantment. It exists apart from other states in our country specifically for it's peace and nature and the way it is some ways removed from the technology and focus around electronics and AI and data that exists in other places. This is the beauty of this land. This land is sacred. To build not only a data center, but one of the largest data centers in New Mexico of all places is the largest offense to the people who live here and the way of life we choose that I could possibly think of. We are already trying to deal with the way the water crisis affects our lives and our landscape WITHOUT a data center. The entire state, every business, every part of our government understands we are in severe drought. To even entertain the idea of building a data center here of all places seems laughable and comical, and something that is completely devoid of common sense. There is no way to conclude that this data center will not wreak havoc on our state. The concept of this data center being built is bewildering, reckless, stupid, and so devoid of common sense and any thought for how the lives of the people in this state will be affected that I am left utterly shocked by the decision making process of anyone who is involved in approving the building of this facility. I mean come on, get real.	1	Merged Document	No			Yes		Yes						8/17/2026	
Elizabeth	Small	I am a resident of Albuquerque and I passionately ask that you deny Yucca Growth Infrastructure's air quality permit. The process has not been fair nor just, and public is entitled to more time and equitable information sharing. It is clear that the public interest and wellbeing is of no concern to Yucca Growth Infrastructure, as Project Jupiter has been illegally changing names of opposing signers to supporters. Additionally, the environmental impacts will be felt for generations of New Mexico families already living in counties drained of resources or experiencing radiation or pollutant contamination. There is much support needed in this state, but giving money, land, and bodies to the environmental destruction of AI and large scale data centers will only bring more poverty and death. Approving this permit would be environmental racism, with undeniable ramifications for the incredible people of this state. Please consider us, your constituents, first.	1	Merged Document	No				Yes	Yes						8/17/2026	
Stefan	Fountain	I am submitting this comment to share my strong opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. A report provided by Hindenburg Research has indicated the nature of the Bloom Energy company and its systems in other states which have higher emissions than they initially indicated [1]. This report was used in a court case (Jacob v. Bloom Energy Corporation) in Delaware where a shareholder of the Bloom Energy company was demanding an inspection of Bloom's books and records following the analysis of the Hindenburg report on the company [2]. In this case the court concluded granting Jacob limited inspection rights as Bloom's Form 8-K form rebuttal to the Hindenburg report as the form stated that there was an accounting error, giving some credibility to Jacob's concerns on the company's financial reporting [2]. Additionally, the EPA probed and fined the company over its handling of potentially hazardous waste from their solid fuel cells in Delaware which ran on natural gas in 2020 [3]. In fact, the company has a trend of downplaying the hazardous waste, including this year [3]. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. The amount of greenhouse gases that would be produced is still above the emissions of New Mexico's biggest cities combined despite the fact that the fuel cells will emit about 2 million tons less in emissions than the original gas turbines at about 13 million, according to Bloom Energy's own Doña Ana County website [4]. This does not match the state's push for green and renewable energy as stated by the Energy Transition Act, which has "...set a statewide renewable energy standard of 50 percent by 2030 for New Mexico investor-owned utilities and rural electric cooperatives" [5]. Even the Office for Renewable Energy has a track record for renewable energy as touted by the Office's own state website [6]. However, this project's fuel source is the opposite of what the state's own legislation has set for moving away from nonrenewable and CO2 emitting energy sources. The natural gas powered, fuel cell micro-grid as proposed is almost a completed contrast to other energy projects such as the SunZia and the Iberdrola "El Cabo" projects [6]. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences [7, 8]. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Above all, the lack of information including the energy source the fuel cells use to residents in the city where the center will be located and nearby cities is not appreciated and should be taken into account when reviewing the application.	2	Merged Document	No			Yes	Yes	Yes	Yes	Yes	Yes	Yes		8/17/2026	
Paloma	Mexika	I am a lifelong New Mexican, and I strongly OPPOSE Project Jupiter. I am tired of seeing out of state corporations come to New Mexico to take advantage of our resources, and leave us to deal with the long term consequences. Calling something "eConOmiC dEveLoPMent" does not automatically mean it is good for our state. A massive data center will add pressure on our water supply, more strain on our electrical grid, more industrial development, and the loss of the open landscapes that make New Mexico special, all while the profits flow somewhere else! These are NOT small things to overlook for the promise of temp jobs and the endless expansion of AI. Water is one of New Mexico's most valuable resources, and we need to get real about what AI and data centers require. A corporation's ability to pay for the infrastructure of something DOES NOT mean the environmental and community costs should be ignored. Southern New Mexico is home to families, communities, wildlife, landscapes, and water. It is home to the past, present, and future. These are things that cannot be produced, automated, or replicated by AI. And once they are gone, they don't come back.	1	Merged Document	No			Yes		Yes						8/17/2026	
Cristian	Salgueiro	I am a resident of Doña Ana county and am requesting you deny Yucca Growth Infrastructure's air quality permit. The lack of transparency in environmental impact analysis for this project is reason enough to deny the permit. Combined with the lack of a clear path for regulation, monitoring, and enforcement, there is significant potential for catastrophic environmental impact to the people and land of southern New Mexico	1	Merged Document	No				Yes	Yes	Yes			Yes		8/17/2026	
Julie	Eames	I am writing to urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. NMED should deny this application because granting it would allow operations that will increase air pollution and adversely affect public health and local environmental conditions. Before any permit is issued, the applicant must demonstrate—clearly and comprehensively—that emissions impacts are fully characterized, adequately controlled, and within applicable limits for all relevant pollutants and operating conditions. For these reasons, I respectfully request that NMED reject the application and require the company to submit a new filing that addresses deficiencies and provides robust, enforceable protections for air quality.	1	Merged Document	No				Yes	Yes	Yes					8/17/2026	
Bertha	Vitela	Yucca Growth Infrastructure's proposed plans will significantly decrease the air quality in our area. While their new technology is better than the absolute worst air pollution, the level of methane and other airborne pollutants that would be released would worsen the air quality in Doña Ana county. These are pollutants we can't afford as air quality is already deteriorating from other sources. As a taxpaying citizen I am deeply opposed to YGI's plans for our county. I would like myself and the children of Southern New Mexico to have some semblance of air quality as we live our lives here.	1	Merged Document	No				Yes	Yes						8/17/2026	
Athena	Tirre	am submitting this comment to share my strong opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. Ana	H	I am extremely opposed to Project Jupiter. An AI data center is not needed in New Mexico. We barely have water to support our own people. Our aquaphors are drying up at an accelerated rate. Our surface water is disappearing at an accelerated rate. As a New Mexico resident, I am concerned that this project is just going to line Yucca Growth Infrastructure's pockets and not create jobs for New Mexicans. I know for a fact that this permit application is just a courtesy and required by NMED. YGI's air quality inspectors aren't actually going to follow the letter of the law. They don't care about people, the environment, or the future of planet Earth.	1	Merged Document	No			Yes	Yes	Yes						8/17/2026	
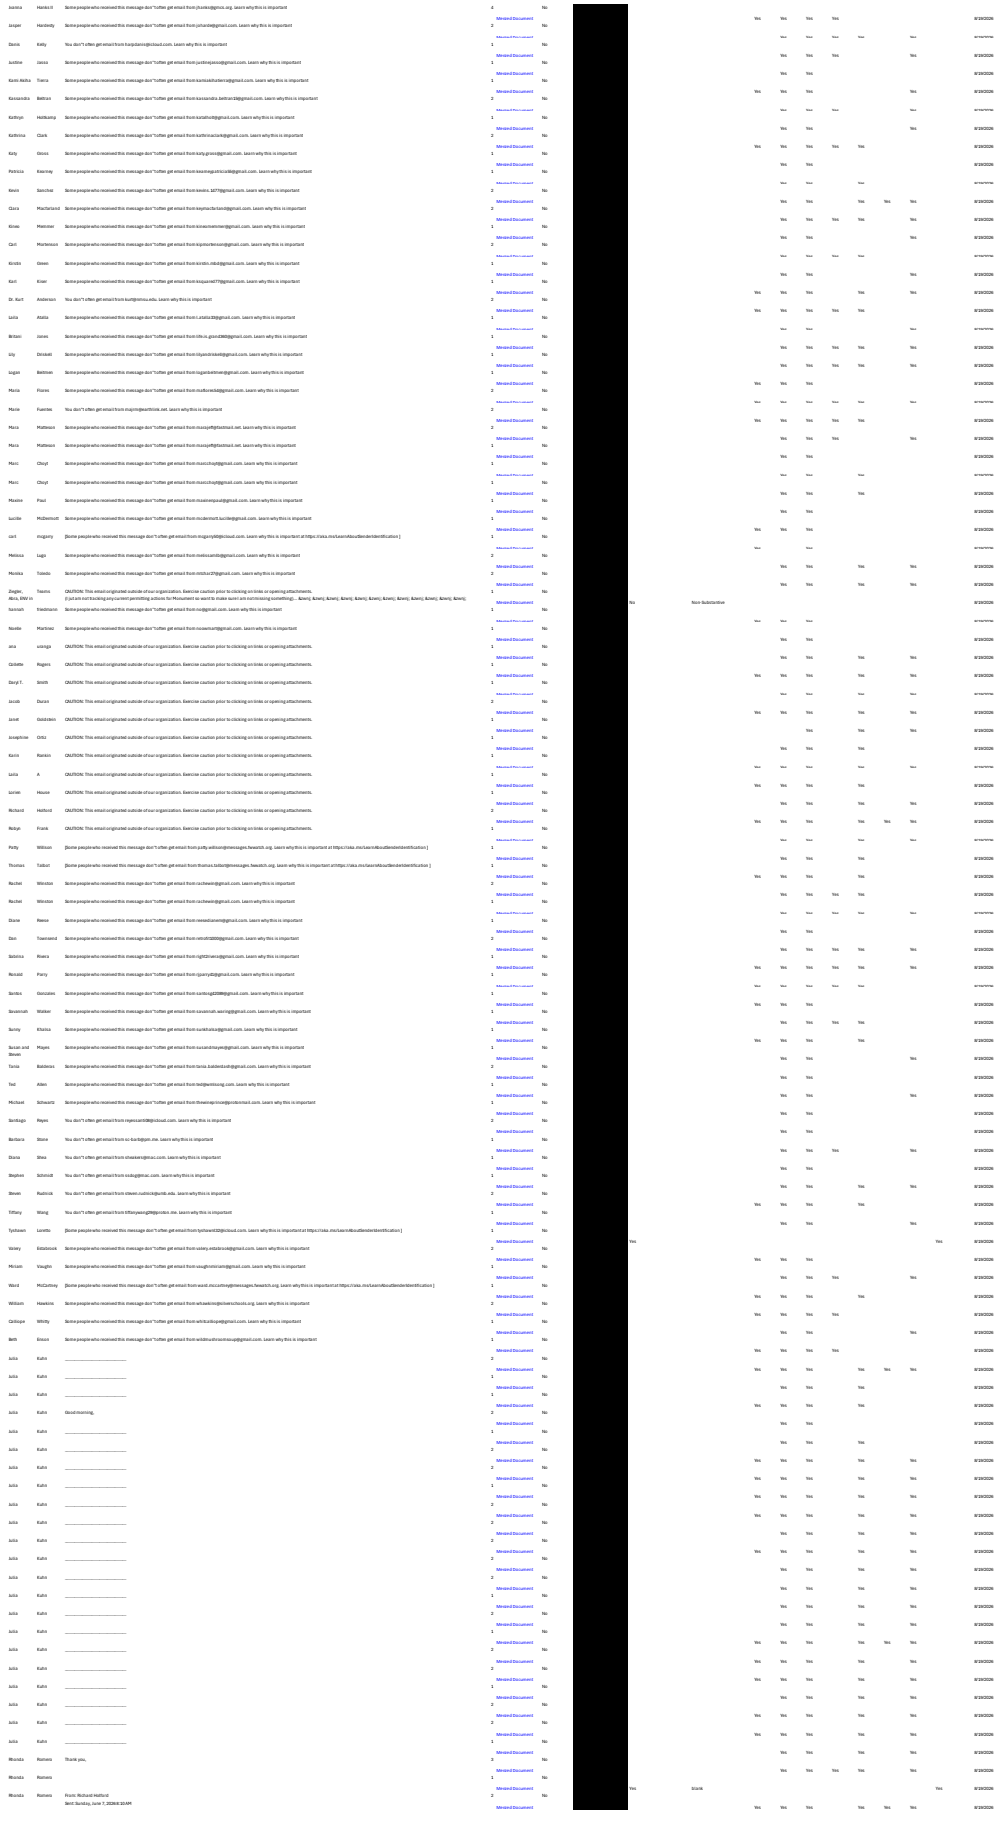
Steven	McDonald		3	Merged Document	Yes		Yes								Yes	8/17/2026	I believe this might be that letter
Sarah	Herbert	I oppose Project Jupiter. Its anticipated groundwater use threatens already overstressed aquifers that communities, farmers, and wildlife depend on for survival. Introducing heavy industrial activity in an area facing chronic drought risks accelerating water scarcity and undermining regional sustainability.	1	Merged Document	No			Yes		Yes						8/17/2026	
Sarah	Ausherman	Please halt Project Jupiter. The public should be giving an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit should be denied given Bloom Energy's history of illegal dumping hazardous waste. The residents of Dona Ana County are already disproportionately impacted by environmental pollution and New Mexico's water supply is beyond depletion. The land and air cannot withstand this project. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both spanish and english, with an option to participate virtually. Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up.	1	Merged Document	No			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Ahtza	Chavez	Please DO NOT approve an air permit for Project Jupiter. The air quality near the proposed site needs improvement NOT additional pollution. The water resources for the project have not been secured. We need water for our state NOT to cool this large scale data center. Genuine Public comments have been disregarded. The ad campaign for support has been accused of inappropriately collecting support for the project. Do not approve	1	Merged Document	No			Yes	Yes	Yes						8/17/2026	
Emerson	Ruiz	As a resident of New Mexico in both Doña Ana and Bernilillo counties since 2010, I am wholly dissatisfied with the lack of public input before readily accepting the terms of Project Jupiter. In a region scarred by the legacy of atomic power, the poisoned downwinders should be a history lesson enough about testing the limits of science onto New Mexicans. Aside from catastrophic impacts on the climate and health of our state, the academic institutions that are already at risk face an increasing apathetic workforce and students without skills to adequately manage AI technologies. I also speak for my daughter, who is the fourth generation to work her family's farmland in southern NM. We already risk droughts and the current Supreme Court decision should be a reckoning for the state concerning our water supply. It's going to keep getting hotter unless we make the choice to stop and think. I stand with the New Mexico Environmental Departments mission and their mission along with their requests: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.	1	Merged Document	No			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Marina	Perez	I urge the New Mexico Environment Department to reject the air quality permit for Project Jupiter and any additional investment in advertising, planning, or proposing this project. The corporations pushing for this project will continue to underestimate the impact a massive data center will have on the immediate and long-term health, wellbeing and safety of NM communities. We do not have the medical infrastructure nor abundance of natural resources for this project to operate. Please yield to your constituents and reject Project Jupiter.	1	Merged Document	No				Yes	Yes						8/17/2026	
Lily	Burrola	Dear New Mexico Environment Department: I write to you as a deeply concerned citizen to urge you to reject the air quality construction permit application (10883) submitted by Yucca Growth Infrastructure LLC (YGI) to build a methane-fueled power plant in the Santa Teresa area, west of Sunland Park, along the Mexican border in southern Dona Ana County. YGI's application has not demonstrated that this project adheres to state statute requiring that it prevent air pollution "in quantities and of a duration that may with reasonable probability injure human health or animal or plant life or as may unreasonably interfere with the public welfare, visibility or the reasonable use of property" (NMSA 74-2-2(b)). The projected amount of carbon dioxide production alone is, to me, reason to reject the application. The carbon dioxide expected to be generated by this highly unusual energy production plan is equivalent to the amount generated by all electricity production in the entire state in 2021 (10.31 MMT CO2e), according to Energy+Environmental Ecconomis ("New Mexico Greenhouse Gas Emissions Inventory and Forecast," released December 2024). The YGI plant would generate 9.2 million metric tons of C02-equivalent per year. The developer has boasted that this amount of greenhouse gases is roughly 40 percent less than its original gas turbine plan; but the overall output is still unacceptable and dangerous. The YGI power plant, by itself, would effectively wipe out the fruits of years of effort on the state and local level - political organizing, policy development, legislative appropriations - to reduce greenhouse gas emissions enough to curb the worst effects of climate change. We have already seen average temperatures in the Southwest increase by 2 degrees Fahrenheit over the last few decades. You know this. We are being asked to sacrifice environmental health and community well-being for private profit. Your decision is clear - the YGI project should not and must not be approved. The developer, with the blessing of the state, proposes to locate this project on the edge of a largely Hispanic, low-income community. This project's impact should be assessed in the context of plans for at least two other data centers in the region - the Meta data center in northeast El Paso (literally on the state line abutting the low-income community of Chaparral, NM), and another data center proposed by the Department of Defense on Fort Bliss, Tx. There are other issues that require additional scrutiny and vetting by the state, particularly the ambient heat produced by data centers and the thousands of fuel cells necessary to power it. A temperature increase of just one or two degrees year-round from heated air flowing over the area will result in damaging aridification and impacts to New Mexicans and natuve wildlife. The developers of the data center and its associated microgrid are already racing ahead with construction, before obtaining a crucial air quality permit from your agency. Contractors have already graded land, built parking lots, and are laying the groundwork for the data center and microgrid. It's reasonable to conclude that they are engaging in this risky behavior in a high-stakes effort to pressure regulatory bodies to bend and forfeit your regulatory responsibilities. They are essentially daring you to stand in the way of "progress and economic development," a framework popular with Project Jupiter's backers. If the permit is not denied, then a public hearing should be held as well as giving the public an additional 60 days to review and comment on the air quality permit so community members can participate	2	Merged Document	No			Yes	Yes	Yes	Yes	Yes		Yes		8/17/2026	
Melissa	Thomas	I do not wish to see this take place. I do not wish to see the overuse of water and the pollution of air. I do not wish to see large data centers or clearings of land, where eventually there will be continuous water issues and energy hum. Other states are being told one thing and seeing something very different. We need more transparency and this should not move forward.	1	Merged Document	No			Yes		Yes				Yes		8/17/2026	
Tammy	Huynh	I am opposed to this project. This is a large construction project that will affect the people in the area in the short term related to dust and air quality issues. As far as long term issues, this is to build an AI facility which has high water. This has no place in this desert and water-deficit location. I do not support this project and hope that it will be rejected.	1	Merged Document	No			Yes	Yes							8/17/2026	
Holly	Potter	New Mexico does not need a data center. Project Jupiter is already preying on our community, offering them $25/hr to spread misinformation about the true agenda of this proposed project, under the guise of an "improvement." I was approached by a representative canvassing for signatures and asked if I wanted to sign "to improve water quality in New Mexico." I fail to see how a data center that will divert mass amounts of water will improve anything at all in a state that is already experiencing an extremely dry season and fires. The Rio Grande has been dry for months and it seems every week I am being served ads from the state asking me to reduce my water consumption, so they already know we can't afford to divert any more of our water supply. Please do not sell out the people of New Mexico for a profit, which the actual working families will not see a fraction of. If you respect the land, the people, and the wildlife of this state, I implore you to reject this petition and keep Project Jupiter out of our state entirely.	1	Merged Document	No			Yes		Yes						8/17/2026	
Meirah	Williamson	I strongly oppose Project Jupiter in its entirety. Building this data center will increase air and noise pollution in the area, and deplete the state's already stressed water supply. Our water and energy costs will increase as utilities are upgraded to support Project Jupiter's vast resource needs. Building this data will cause substantial environmental and economic harm to New Mexico. I urge NMED to reject this permit.	1	Merged Document	No			Yes		Yes		Yes				8/17/2026	

Gary	Sanderson	I am opposed to Project Jupiter, and I implore NMED to outright reject this proposal and application. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. Not to mention, solid hazardous waste will also be produced by this data center. Considering Bloom Energy's poor history of illegally disposing hazardous waste, among other things, gives every reason as to why NMED should reject this application. The amount of pollution will be extremely damaging to the health of the women, men, and children who inhabit New Mexico. The massive amount of sound pollution will do the same, and it will damage the already suffering wildlife. It will destroy the health of many, and for many it will be irreparable. This noise pollution will put people and their children at high risk of high blood pressure, heart attacks, and permanent deafness. The repercussions of allowing this project to become reality will be next to irreversible and will haunt the land and its people for many generations to come. Nobody in New Mexico wants this monstrosity of a data center here, nor do we harbor any respect for those with power who may allow it to exist. Do not allow the adults and children of now and the future suffer just so that these companies can make continue to stuff their rotting pockets. Remember that you are not immune from the decisions you make about the environment and the people in it no matter who you are. With as much respect as you'll deserve after making your decision, -Gary R. Sanderson	1	Merged Document	No	[redacted]			Yes	Yes		Yes	Yes			8/17/2026
Katharine	Elliott	Dear NMED Officials and Doña Ana County Commissioners, I am writing to express my strong opposition to the proposed Project Jupiter data center campus in Santa Teresa/Sunland Park. As a concerned resident, I urge you to deny the necessary air quality permits and halt the approval of Industrial Revenue Bonds for this project due to its severe threats to our environment, resources, and community well-being.My opposition is rooted in the following critical issues: Severe Air Pollution & Climate Impact: Project Jupiter's plan to utilize massive, private natural gas microgrids is an unacceptable workaround to the New Mexico Energy Transition Act. Generating an estimated 14 million tons of greenhouse gases annually will severely degrade local air quality, increase regional heat, and actively endanger the health of nearby desert communities. Unsustainable Water Depletion: New Mexico is facing unprecedented, systemic water scarcity. Diverting millions of gallons of water to cool an industrial tech campus puts an unsustainable strain on our local aquifers and threatens the long-term drinking water supply of the Mesilla Valley. Financial Burden on Local Residents: The immense energy and infrastructure footprint of this facility threatens to drive up utility demands, risking utility rate hikes for local families who are already struggling with the cost of living. Environmental Injustice: Placing this massive pollution source in Santa Teresa and Sunland Park disproportionately burdens lower-income communities and communities of color. Our neighborhoods should not be sacrificed for corporate data storage. Lack of Public Transparency: The fast-tracked and secretive nature of this project is unacceptable. I demand that all technical modeling data be made fully public, all documents be provided in both English and Spanish, and accessible public hearings be held locally in Santa Teresa.For these reasons, I request that Doña Ana County and the State of New Mexico prioritize its residents over corporate interests and reject Project Jupiter. Thank you for your time and your serious consideration of these community concerns. Sincerely, Katharine Elliott	1	Merged Document	No			Yes	Yes	Yes				Yes		8/17/2026
Carl	Christensen	Dear NMED Officials and Doña Ana County Commissioners, I am writing to express my strong opposition to the proposed Project Jupiter data center campus in Santa Teresa/Sunland Park. Thank you for your time and your serious consideration of these community concerns. Sincerely, Carl Christensen	1	Merged Document	No			Yes	Yes	Yes				Yes		8/17/2026
Jac	Crespin	I'm generally in favor of technology, especially when it helps with education, new ideas, and responsible growth, but approving Project Jupiter without really understanding what it could do is not a good idea. Technology should help people make better decisions, not replace careful thinking or ignore possible problems, especially with the risks to air quality, water use, and public health in an area that is already under pressure. There isn't enough transparency in the process, and important information about emissions and environmental impact is missing. They need to deny this permit, because New Mexico shouldn't move ahead with a project that could hurt its communities and natural resources.	1	Merged Document	No			Yes	Yes	Yes				Yes		8/17/2026
Catherine	Brenholdt	I am against any data centers in New Mexico. I am proud of the efforts displayed in my state to keep people safe during a time when the freedom and lives of so many Americans are under threat. A data center can only be a direct threat to those efforts. We do not need a data center. The negative environmental impacts will be catastrophic. It will be a drain on resources that continue to grow more and more limited as we have reached the point of climate crisis. I say no to data centers for the good of my community and the well being of all citizens of New Mexico.	1	Merged Document	No					Yes						8/17/2026
Kat	Kemp	Dear New Mexico Environment Department: I write to you as a deeply concerned citizen to urge you to reject the air quality construction permit application (10883) submitted by Yucca Growth Infrastructure LLC (YGI) to build a methane-fueled power plant in the Santa Teresa area, west of Sunland Park, along the Mexican border in southern Dona Ana County. YGI's application has not demonstrated that this project adheres to state statute requiring that it prevent air pollution "in quantities and of a duration that may with reasonable probability injure human health or animal or plant life or as may unreasonably interfere with the public welfare, visibility or the reasonable use of property" (NMSA 74-2-2(b)). The projected amount of carbon dioxide production alone is, to me, reason to reject the application. The carbon dioxide expected to be generated by this highly unusual energy production plan is equivalent to the amount generated by all electricity production in the entire state in 2021 (10.31 MMT CO2e), according to Energy+Environmental Ecconomis ("New Mexico Greenhouse Gas Emissions Inventory and Forecast," released December 2024). The YGI plant would generate 9.2 million metric tons of C02-equivalent per year. The developer has boasted that this amount of greenhouse gases is roughly 40 percent less than its original gas turbine plan; but the overall output is still unacceptable and dangerous. The YGI power plant, by itself, would effectively wipe out the fruits of years of effort on the state and local level - political organizing, policy development, legislative appropriations - to reduce greenhouse gas emissions enough to curb the worst effects of climate change. We have already seen average temperatures in the Southwest increase by 2 degrees Fahrenheit over the last few decades. You know this. We are being asked to sacrifice environmental health and community well-being for private profit. Your decision is clear - the YGI project should not and must not be approved. The developer, with the blessing of the state, proposes to locate this project on the edge of a largely Hispanic, low-income community. This project's impact should be assessed in the context of plans for at least two other data centers in the region - the Meta data center in northeast El Paso (literally on the state line abutting the low-income community of Chaparral, NM), and another data center proposed by the Department of Defense on Fort Bliss, Tx. There are other issues that require additional scrutiny and vetting by the state, particularly the ambient heat produced by data centers and the thousands of fuel cells necessary to power it. A temperature increase of just one or two degrees year-round from heated air flowing over the area will result in damaging aridification and impacts to New Mexicans and natuve wildlife. The developers of the data center and its associated microgrid are already racing ahead with construction, before obtaining a crucial air quality permit from your agency. Contractors have already graded land, built parking lots, and are laying the groundwork for the data center and microgrid. It's reasonable to conclude that they are engaging in this risky behavior in a high-stakes effort to pressure regulatory bodies to bend and forfeit your regulatory responsibilities. They are essentially daring you to stand in the way of "progress and economic development," a framework popular with Project Jupiter's backers. If the permit is not denied, then a public hearing should be held as well as giving the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. But I urge you to please stand strong, adhere to principles and policy, and do not allow this pressure tactic to affect your decision-making responsibilities. Reject this application for the good of the	2	Merged Document	No			Yes	Yes	Yes	Yes	Yes		Yes		8/17/2026
Jaimie	Hashey	As a resident of the state of New Mexico I feel it is very irresponsible to have constructed these data centers so fast without proper environmental impact considerations. The Rio Grande is dry and we are going through a drought. These data centers use tremendous amounts of water. It does not seem logical to build such large data centers so fast in New Mexico. These data centers must be made to have minimal impact on the water supply as well as not polluting the air and land. No one wants to live battling sicknesses because of the pollution produced by these large energy users. Please reject the permit.	1	Merged Document	No			Yes		Yes						8/17/2026
Sydney	Wang	Dear NMED staff, My name is Sydney. I live in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: . It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	2	Merged Document	Yes				Yes	Yes		Yes		Yes		8/17/2026
Alicia	Benavidez	Project Jupiter will negatively impact the entirety of New Mexico and its residents. It will result in higher electricity bills and exacerbate the climate and water crisis our state is currently facing. I am in complete opposition of Project Jupiter.	1	Merged Document	No			Yes		Yes		Yes				8/17/2026
Donalyn	Lorenzo	I am writing as a Native woman, mother, and Auntie mama to strongly urge you to REJECT the permit application for Yucca Growth Infrastructure, LLC and Project Jupiter. This project threatens the health, safety, and cultural heritage of our communities, and it disregards the sacred responsibility we hold to protect the land for future generations. Project Jupiter poses significant risks to our environment, including: • Water Contamination: New Mexico's water resources are already scarce and vulnerable. The project could pollute groundwater and surface water, threatening the health of families, wildlife, and sacred sites. • Air Quality: Increased industrial activity risks releasing harmful pollutants, disproportionately affecting Indigenous communities and low-income families. • Soil Degradation: The project could lead to long-term soil contamination, making it difficult to sustain traditional agriculture or foraging practices. • Climate Impact: Expanding fossil fuel infrastructure contradicts New Mexico's climate goals and exacerbates the climate crisis, which harms all NM communities. As a Native woman and mother, I am deeply concerned about the cultural and spiritual harm this project will cause: • Project Jupiter will desecrate lands that hold immense cultural and spiritual significance for all our communities. These lands are not just resources—they are part of our identity, history, and connection to our ancestors. • We have a sacred duty to protect the land for those yet to be born. This project threatens to leave behind a legacy of pollution, loss, and suffering, rather than a healthy and thriving environment. • Our Tribal communities must have a meaningful say in decisions that affect lands and waters. The voices of Native people—who are often the keepers of traditional ecological knowledge—must be centered in this process. I urge the New Mexico Environment Department to: 1. REJECT the permit application for Yucca Growth Infrastructure, LLC and Project Jupiter.	1	Merged Document	Yes			Yes	Yes	Yes						8/17/2026
Tory	Woods	I think it is absurd to consider a desert in a water crisis as the site for a data center that uses millions of gallons of water. As a resident of Dona Ana it genuinely feels like you think we can be made a fool of, that we can be taken advantage of. To build a data center here is not putting the people of Dona Ana first. You are telling me who has lived here my entire life that I am not as important as a corporation and that is appalling.	1	Merged Document	No			Yes								8/17/2026
Michelle	Watkins	I urge the NMED to deny this permit application. The amount of emissions presents a severe public health risk on many levels. The emissions data they have provided is based on faulty science and is little more than a guess, as a project of this scale is untested and unproven. If NMED must allow this project to continue, it needs to require a formal public hearing to have all of this properly investigated. (Along with investigating the recent allegations of falsifying comments and using people's names without their consent.)	1	Merged Document	No				Yes	Yes				Yes		8/17/2026
Pamela	demmer	I oppose Project Jupiter. We are in a 26 year drought and our rivers are drying up. This project will continue to deplete already stressed water supply.	1	Merged Document	No			Yes								8/17/2026
Danny	Wolf	I deeply oppose this permit and the whole project. It is threat to all residents of New Mexico and our precious. The fuel cells will release 10 millions of tons of carbon dioxide per year and pull on water we don't have. The rio grande has run dry earlier than it ever has. We need clean air and abundant water, not one of the biggest data centers in the world.	1	Merged Document	No			Yes	Yes			Yes				8/17/2026
Estevan	Whiting	I am lifelong New Mexican resident in Albuquerque in the city. I was born into 25 years ago is not the city/ state I know now, the rivers are dry and the snow packs are nonexistent. It is a fact that Data Centers such as project Jupiter increase heat temperatures in regions they are placed in and the state or southwest region cannot be sold out like this to the ultra rich. Watching my future be decided by the few is what's most scary, and knowing all I do to try to mitigate the consequences is undone by the few who get a say and can be lobbied, and bought out. Our country and state of New Mexico cannot be ran as a business and we should say no to data centers in our state and stand up for the people of New Mexico who will be directly impacted by project Jupiter and the hellish future it will bring.	1	Merged Document	No			Yes		Yes						8/17/2026
Sandra	Chavarría	As a New Mexico resident I vehemently oppose the issuance of air quality construction permits for Project Jupiter microgrid facilities. A full environmental impact study, to clarify potential effects including greenhouse gas emissions and aquifer depletion, is critical for the protection of our natural resources and by extension our communities. Please protect our state.	1	Merged Document	No			Yes	Yes	Yes				Yes		8/17/2026
Karen	Mabry	I am a resident of Dona Ana County and am writing to OPPOSE the permit to Project Jupiter. We already have terrible air quality in the region, and if this permit is granted it will only become worse. This project would also do significant damage to NM's climate goals.	1	Merged Document	No				Yes							8/17/2026
Alice	Hutchins	I strongly oppose the approval of Yucca Growth Infrastructure's air quality permit. The amount of CO2 released will contribute to an already oppressive heat index over southern New Mexico and northern Mexico. It is environmentally and socially unjust to locate these loud, water- and energy-gobbling complexes in the poorest area of the poorest state in the United States. Those who will profit are already billionaires, while the poorest of the poor live with the effects of this boondoggle. Say NO to Project Jupiter.	1	Merged Document	No			Yes	Yes	Yes						8/17/2026
Timothy	Carlton-McQueen	I am opposed to Data Center projects like these especially when our state is experiencing a water crisis that is part of an interstate commerce pact. I believe we must uphold our current water compacts and treaties before we allow any new data centers. Water will always be more important and valuable to the state than this project.	1	Merged Document	No			Yes								8/17/2026
Eve	Ostara	Decades of dams, diversions, and over-allocation of the Colorado River have already left much of the Southwest and northern Mexico struggling with water scarcity. Southern New Mexico depends on limited groundwater and the Rio Grande, both of which are under increasing pressure. Building one of the world's largest AI data centers over a stressed aquifer is the wrong direction. Water is not just another industrial input—it sustains our communities, our farms, our wildlife, and the ecosystems we call home. In Running Out, anthropologist Lucas Bessire reflects on what happens when ancient groundwater is treated as an expendable resource rather than a shared inheritance. Aquifers accumulated over thousands of years can take far longer to replenish than they take to deplete. Once that water is gone, it cannot simply be replaced within a human lifetime. The Southwest has already spent decades living beyond its hydrologic means. We should not deepen that pattern by inviting another water-intensive industry to depend on groundwater that our communities, our wildlife, and future generations will need. This proposed data center does not belong where water is already scarce.	1	Merged Document	No			Yes		Yes						8/17/2026
Michelle	Gonzales	As a local resident in Mew Mexico, I strongly oppose Project Jupiter. The amount of groundwater usage from this project will greatly over stress the aquifers used by our communities, farmers and natural wildlife. Most residents are aware of our drought levels, and this project will only accelerate water scarcity and instability. This project will do damage to New Mexico's environment and ultimately a disservice for its residents.	1	Merged Document	No			Yes		Yes						8/17/2026
Diana	Lestz	This should absolutely not be allowed. Our state is in a drought and the states nearby have been fighting for years over water rights. As a New Mexico resident I strongly disagree with this company being allowed to build this data center and their business practices have already proved abysmal across the state, particularly their fraudulent signature activity in Albuquerque but also the way they convinced Doña Ana county to approve the project. It is not right.	1	Merged Document	No			Yes								8/17/2026
Sarah	Azibo	Project Jupiter places the health of all living beings in New Mexico (and beyond) at extreme risk. It denies us of the valued resources of clean air and water without an ounce of consideration or thought to the irreparable destruction it will cause. I wake daily to the air quality report to see if I'm able to step outdoors with my respiratory condition. Recent fires in the Bosque filled my lungs with suffocating smoke this weekend while more smoke from fireworks added to that harm. To imagine our air quality decreasing even further, with players knowingly producing dangerous levels of emissions from this project, is untenable. I need no reminder of how precious air is to sustaining us, nor should you. I implore you to prevent this project from going forward.	1	Merged Document	No			Yes	Yes	Yes	Yes					8/17/2026
Keenan	Flynn	I am writing to express my firm opposition to the Yucca Growth Infrastructure Microgrid Air Quality Construction Permit Application for a number of reasons. Chief among them is the fact that the new collaborating force, Bloom Energy, has an egregious history of dumping hazardous waste illegally. Given the microgrid's proximity to the local community of Sunland Park, I am also deeply concerned about the affiliated companies' disregard for human life and willingness to inflict more pollution on an area that is already a non-attainment zone. Frankly it's absurd to expect residents of Doña Ana County to accept even more impact on their environment than they already experience. I urge the NMED to deny this permit. In the event the permit moves forward, there MUST be a public hearing held IN SANTA TERESA, in both English and Spanish, with virtual options for attendance, to address and express concerns about the permit. We have already been snubbed once in favor of a "job fair" for the project this microgrid permit is associated with, and I am frankly tired of the farcical behavior on the part of the applicants. Our planet is already fragile enough as it is. Half the Pacific Ocean is buried in trash. We are underestimating how close we are to runaway global warming. And when the last drop is extracted from our water-starved land, then we will find out we can neither drink nor breathe data.	1	Merged Document	No			Yes	Yes	Yes			Yes	Yes		8/17/2026
Austin	Schuberth	I ask you to please deny this permit for Yucca Growth Infrastructure LLC. It has been shown already that data centers increase air pollution, as well as noise. They also increase the temperatures all around them. You can already see how data centers have affected people living in Memphis, TN and the horrid air pollution they now breath in. This will only harm our local communities. Again, please deny this permit and protect our beautiful land.	1	Merged Document	No					Yes		Yes				8/17/2026
Andrew	Young	The high amount of comment submissions earlier today who are in favor of the project, but used the same copy/pasted wording is alarming. It is difficult to trust the permit application process if those comments are not vetted and thrown out if they were made by a bot farm.	1	Merged Document	No		Yes								Yes	8/17/2026
Milam	Smith	Project Jupiter will use resources subsidized by the community without returning anything to said community. The amount of jobs provided will be minimal, but the the energy and water usage will be excessive. I strongly disagree that this gross misalocation of resources be allowed.	1	Merged Document	No			Yes								8/17/2026



David	Moseley	These permits need to be denied. If not denied then it is absolutely necessary public hearing on these permits. The amount of CO2 that these untested fuel cells will produce will completely undo all the progress we've made as a state moving towards renewable energy. Additionally the way they have been canvassing for positive comments by lying to people and submitting comments people did not approve, including City Councilor Finkelbeum. This is absolutely unacceptable and should be taken into account when weighing the positive comments on these permits. Do what is best for the State and our Environment. Deny these ridiculous permits outright, or at the very least, hold a public hearing.	1		No															
Shelby	Bazan	I strongly oppose the construction of Project Jupiter in Doña Ana County and anywhere in New Mexico. New Mexico's environment and those who have stewarded it for generations do not deserve this treatment. Our fragile ecosystem is already running on empty and cannot take more water depletion. More jobs are not worth the irreparable damage this would do to the environment.	Mirrored Document 1		Yes														8/27/2026
Samantha	Blowers	I oppose this air quality construction permit application. The proposed project is not considering the well-being and interests of the local community. A data center will have a negative impact on the local environment and will not offer any long-term economic benefits to the members of the community. I urge the NM Environment Department to deny this application.	Mirrored Document 1		Yes	No			Yes										8/27/2026
Larch	Kingdon-Edwards	Project Jupiter, if implemented, would be disastrous for our communities. Water use and rights in New Mexico is already a huge issue, and one that a large data center like Project Jupiter would accentuate. The idea that it would provide "economic opportunity" and jobs is patently false. It would only be a huge expansion of corporate power over our communities, and one that allows them to put their AI models over our lives and our communities. I urge you to not allow this to proceed, and to value people over profit.	Mirrored Document 1		No				Yes		Yes								8/27/2026
Jesse	Ritchey	This project will hurt the community and should not be implemented. It is harmful and will take valuable resources from the people they truly need them. This project will use vital water and energy resources that should be used elsewhere.	Mirrored Document 1		No				Yes										8/27/2026
Justin	River	New Mexico, is a desert, so it is we have Zero water and they want to take away what little water we have? Yes, I understand it creates jobs, but in the long run the rest of the city state has to suffer because we have extra land? Please, do not take away our resources to live and it's bullshit enough we are struggling just to survive. Please hear us. Thank you.	Mirrored Document 1		No				Yes										8/27/2026
Connor	Anderson	NMED should reject Yucca Growth Infrastructure, LLC's Y59 Microgrid Air Quality Construction Permit Application. Y59 has failed to detail the problematic past behavior of Bloom Energy. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. Not to mention, solid hazardous waste will also be produced by this data center. Considering Bloom Energy's poor history of illegally disposing hazardous waste, among other things, gives every reason as to why NMED should reject this application. The amount of pollution will be extremely damaging to the health of the women, men, and children who inhabit New Mexico. The massive amount of sound pollution will do the same, and it will damage the already suffering wildlife. It will destroy the health of many, and for many it will be irreparable. This noise pollution will put people and their children at high risk of high blood pressure, heart attacks, and permanent deafness. The repercussions of allowing this project to become reality will be nearly irreversible and will haunt the land and its people for many generations to come. Nobody in New Mexico wants this monstrosity of a data center here, nor do we harbor any respect for those with power who may allow it to exist. Do not allow the adults and children of now and the future suffer just so that these companies can make continue to stuff their rotting pockets. Remember that you are not immune from the decisions you make about the environment and the people in it no matter who you are. Sincerely, -Connor Anderson	Mirrored Document 1		No				Yes										8/27/2026
Jesse	Rivera	Please reject this proposed data center. I am deeply disappointed in the dishonesty and behavior of this organization through its clear and blatant deception to New Mexicans. There have been hundreds of not thousands of instances of misrepresentation of both public officials and community members including myself about this project. This alone should disqualify them from further business in New Mexico and their contract. Data centers like this have been shown time and again to be harmful to the environment, ecosystem and communities around it. This is planned to be taking from and polluting critical water sources while we are in the midst of a drought, this will have generational health effects in the surrounding communities and this will critically disrupt the animals and fauna around it through its air, water, land and noise pollution.	Mirrored Document 1		No				Yes		Yes				Yes	Yes			8/27/2026
Dean	Gordon-Buxbaum	I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC Y59 Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *Y59's application should be denied by NMED because Y59 failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy — no matter what Y59 says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject Y59's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	Mirrored Document 1		No				Yes		Yes		Yes	Yes					8/27/2026
Mary	Moeckus	Please deny the air quality permits for Yucca Growth Infrastructure, LLC. This project does nothing to benefit New Mexico and only endangers NM residents and the environment in the long run. Additionally, the state should be considered cumulative impacts for developments and industries, rather than piecemeal consideration of emissions and impact. Water resources should be carefully conserved instead of used for data centers. We do not have the water for this development. Instead we should focus on developments that will not deplete our water resources.	Mirrored Document 1		No				Yes		Yes								8/27/2026
Mireya	Ramentería	I believe we do not have the resources to support this. I believe our water and air are at risk plus possible health risks for us and our future generations not to mention the environmental disaster this will be. I know the good old 'crop' is marketing, we doing there best to make this week like the greatest idea and they have written donated a couple million to NM education and programs but I believe this is bribery. Look you really want our community's support? Then put your money where your mouth is. If this is going to create jobs, be low impact on the environment be the best thing since sliced bread for us in drought stricken, poor air/water quality already communities like Santa Teresa, Sunland Park and Anapra, then why not create a 30 billion dollar medical, environmental institute that the people in our communities can have just in case things go south. According to Protect Jupiter and cronies, well-out politicians with shares in this, it's gonna be the best thing. Put your money where your mouth is. Set aside 30 billion and we will wait 30 years to see what happens. But in my opinion, cancel cancel cancel I don't believe a word of this. I don't support this and want this comments to really be on record so we can as a community can sue whomever supported this in the future.	Mirrored Document 1		No				Yes		Yes								8/27/2026
Audrey	Carter	"I lived in Albuquerque New Mexico for college starting in 2020. It was a very special and important place for me to live and explore in as a young adult. If this project continues, young people like me will not be able to live in those conditions. UNM was the only college I was able to afford. I would not have gotten a second education without New Mexico. This project not only adds 2[HIGLIGHTED]TONS of carbon dioxide pollution per year, but it has ALREADY negatively affected local farmers. It has created water shortages while that area is already in a drought. Please. I beg you. Do not let New Mexico fall to the same fate as all of these other states that are environmentally beyond repair. The air quality permit application should be denied because of Bloom Energy's history of illegal dumping hazardous waste. Do you really want a land that is already taken advantage of to be trashed and destroyed more? Approving this permit would be government-sponsored environmental racism. Residents of Doña Ana County are already disproportionately impacted by environmental pollution. It is your duty to listen to us. Listen to to the children and young adults who are fighting for our lives to make a difference. We are the future. And you are robbing us of a chance in that future if you don't LISTEN"	Mirrored Document 1		No				Yes		Yes								8/27/2026
Max	Budbong	I am writing about Project Jupiter. I would like to know exactly what sort of pollution we can expect and to have a chance for the community to decide if it's worth it. I also think there should be clear repercussions if pollution exceeds project/updters claims. It seems unfair to push this on citizens without the public having more options to voice their opinions and get transparency about the impact project jupiter will really have.	Mirrored Document 1		No				Yes	Yes	Yes		Yes						8/27/2026
Andrew	Curtice	This entire process flies in the face of the interest of the people of New Mexico. The managers of this project have been consistently deceitful and have astroturfed a campaign in the interests of the rich and powerful and not the people. This project would raise energy prices and poison our communities further. We are a state still suffering from the consequences of the Manhattan project, we can't give the powerful another bomb to drop on us.	Mirrored Document 1		No						Yes				Yes				8/27/2026
Summer	Betley	Communities across the country that have jumped headlong into permitting facilities like this one have paid the price. Environmental damage, water quality issues, depleted aquifers, and noise and air pollution that harm communities and ecosystems. Until comprehensive and unbiased studies can be completed, and just and balanced systems to hold companies accountable (with hefty fines and penalties for emissions that exceed what's allowed or the excess of water or energy) are in place, this project will come at the expense of New Mexicans. It doesn't benefit us, it carries a detriment. There are other roads to economic development. What is irreplaceable is our environment - clean water, clean air, healthy land. This project doesn't support New Mexico's future, and can not be trusted. Please do not approve.	Mirrored Document 1		No															8/27/2026
Armando	Montaño	"Emissions from natural gas generation can lead to severe environmental and public health concerns. Nitrogen oxides react with other substances to create ground-level ozone, which exacerbates asthma and damages lung tissue. Localized analyses frequently raise flags about the health risks associated with living near these combustion sources. Carbon Dioxide (CO_2): Roughly 117lbs of CO_2 are produced for every million British thermal units (MMBtu) of natural gas burned. Nitrogen Oxides (NO_x): Formed when atmospheric nitrogen and oxygen react under intense heat. NO_x is the primary local pollutant of concern because it causes smog and contributes to respiratory and cardiovascular health issues. Methane (CH_4): Can escape via ""combustion slip"" (incomplete combustion) or supply-line leaks. Methane (CH_4) is a highly potent greenhouse gas—trapping over 80 times more heat than carbon dioxide (CO_2) over a 20- year timescale. It drives rapid short-term global warming, fueling	2		No															
Emma	Jones	My names Emma Jones, and I oppose project Jupiter and data centers in New Mexico. I'm extremely concerned with the environmental impact as what projects like this are doing to our water.	Mirrored Document 1		No				Yes	Yes	Yes		Yes						8/27/2026
Toni	Purley	I'm strongly opposed to this places being built anywhere, but especially our Beautiful State. How can you possibly think this project is going to help our Community. We live in a desert where our already dwindling water resources are at dangerously critical stage, so any water found should be going to the people, animals, & overall environment. No good can come out of this, a few jobs does not enough make up for the destruction of our resources & the people, animals, plants who live here. Our State is precious the land, the people, the animals, which will eventually be destroyed in the long run by something that is inorganic & full of lies about how it is supposed to help us. This whole thing is scary & hopefully will not be allowed because we all will pay in the long run & not in a good way.	Mirrored Document 1		No				Yes		Yes								8/27/2026
Fidel	Briones	"My wife and I are completely opposed to Project Jupiter. This gargantuan project will emit tremendous amounts of dangerous air pollution in our area which already suffers from bad air quality many days of the year. This project was rushed through with very little public input. Many people living in the Sunland Park/Santa Teresa area did not have a chance to express their opinion before the project was begun. This was done intentionally so as to avoid any negative feedback from the public. We demand that the project be stopped from being built here. We thank you for your attention to this matter."	Mirrored Document 1		No				Yes		Yes								8/27/2026
Hannah	Hurd	As a resident of New Mexico in both Doña Ana and Sandoval counties, I feel disgusted in the lack of care shown by the non-allowance of meaningful public input and time for residents to voice their concerns of our own government readily accepting the terms of Project Jupiter. We have been propagandized and brainwashed by the lack of care shown by government officials, as well as an utter disregard for New Mexico residents despite years of history and public opinion pointing elected officials in the face. *Aside from catastrophic impacts on the climate and health of our state, the academic institutions that are already at risk face an increasing apathetic workforce and students without skills to adequately manage AI technologies. I also speak for my daughter, who is the fourth generation to walk her family's farmland in southern NM. We already risk droughts and the current Supreme Court decision should be a reckoning for the state concerning our water supply. It's going to keep getting hotter unless we make the choice to stop and think. I stand with the New Mexico Environmental Departments mission and their mission along with their requests: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone—this means our air quality	Mirrored Document 1		No				Yes	Yes	Yes		Yes	Yes					8/27/2026
Oliver	Scroggins	"Dear NMED staff, My name is Oliver Scroggins. I live in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the Y59 Microgrid in Doña Ana County. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. I would like to continue living in the state I have grown up in and call home. As climate change progresses, I believe all New Mexicans must prioritize the health of our state in order to continue to have a place to call home. The project's proposed fuel cell-powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the Y59 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	Mirrored Document 1		No				Yes	Yes	Yes		Yes	Yes					8/27/2026
Melanie	Bonicelli	I am writing to voice my strong opposition to Yucca Growth Infrastructure LLC setting up in New Mexico. New Mexico, as a state, does not have the resources necessary to keep a data center of the proposed size up and running. While I am opposed on environmental grounds, I am also opposed because of recent and disturbing developments regarding data centers and their surrounding communities. When there is not enough energy or water, the data centers tend to be prioritized instead of the community - this can be seen in many, MANY instances across the US recently. New Mexico does not have much water; data centers need a lot of water. this is a setup for disaster for the community if Yucca LLC is allowed to build. Data centers employ very few people relative to the resources they consume, so that'll not be a trade-off or net positive, instead it will be a net negative for Doña Ana County. Additionally, I am deeply skeptical of the trustworthiness of this project - it has also changed its name recently to Yucca Growth Infrastructure LLC from "Project Jupiter". This project was in the news recently having been accused of using the names of citizens to claim proof support for its data center; however, the citizens claim that they did not consent to their names being used in support, nor did they support Project Jupiter building in their community (as alleged through this link: https://www.organicsunbrew.com/project-jupiter-public-comments-rumor-used-without-permission-2026/). This is deeply concerning; a simple name change/cosmetic move like trying to evade bad press given this context. Due to these highly disturbing allegations, sketchy practices, and to the aforementioned concerns regarding resource/water stress, I would strongly encourage halting all permitting for Yucca Growth Infrastructure LLC, ideally in perpetuity, but at the very least until it is clear whether or not it has any genuine community support.	Mirrored Document 1		No				Yes		Yes								8/27/2026
Armando	Montaño	Emissions from natural gas generation can lead to severe environmental and public health concerns. Nitrogen oxides react with other substances to create ground-level ozone, which exacerbates asthma and damages lung tissue. Localized analyses frequently raise flags about the health risks associated with living near these combustion sources. Carbon Dioxide (CO_2): Roughly 117lbs of CO_2 are produced for every million British thermal units (MMBtu) of natural gas burned. Nitrogen Oxides (NO_x): Formed when atmospheric nitrogen and oxygen react under intense heat. NO_x is the primary local pollutant of concern because it causes smog and contributes to respiratory and cardiovascular health issues. Methane (CH_4): Can escape via ""combustion slip"" (incomplete combustion) or supply-line leaks. Methane (CH_4) is a highly potent greenhouse gas—trapping over 80 times more heat than carbon dioxide (CO_2) over a 20-year timescale. It drives rapid short-term global warming, fueling climate-induced heat waves, intense storms, and prolonged droughts. Along the supply chain, leaks release this gas directly into the atmosphere. Infrastructure like compressor stations and plants are prone to leaks and explosions. Catastrophic leaks or massive venting incidents can displace oxygen in the immediate vicinity, causing suffocation, fainting, and toxin damage. Routine operations also cause severe noise pollution and localized odor. Facilities are often sited in low-income areas and communities of color, disproportionately exposing vulnerable populations to industrial hazards and disease. Oscale's Project Jupiter is designed for a generational power capacity of roughly 2.8 to over 2.8 gigawatts (GW). For scale, 1 GW of electricity can power about 750,000 homes	1		No				Yes	Yes	Yes		Yes						8/27/2026
Anna	Kattos	Project Jupiter is going to do much more harm than good. The facility will produce insane amounts of light, air, and noise pollution and use 1 million gallons of water per day. We cannot afford to be using our cultural resources in this way. Elephant Butte Lake is 13% full and the Rio Grande has lost 90% of its historic flows.	Mirrored Document 1		No				Yes		Yes		Yes						8/27/2026
Mavi	W	As a New Mexican resident, we barely have enough water as it is. An AI center would completely diminish the little sources of water we can even use in New Mexico. This is a desert, and any jobs that would be brought from this center would be unsustainable and replaced by AI that'd only. Leave our desert alone, please don't take whatever water we have left.	Mirrored Document 1		No				Yes		Yes		Yes						8/27/2026

Brian	Stamper	To: The New Mexico Environment Department & The Las Cruces City Council Regarding: Public Opposition to Yucca Growth Infrastructure's Air Quality Permits & Project Jupiter Approval I am submitting this formal public comment to establish the record of community opposition regarding the $165 billion Project Jupiter AI data center complex in Santa Teresa. The administrative maneuvers used by the Doña Ana Board of County Commissioners and corporate actors to advance this project represent a structural failure of transparent governance and local democratic representation. 1. Violation of Democratic Process and Lack of TransparencyOur public voices have been systematically bypassed. The Doña Ana County Board of Commissioners went into a closed, executive session during pivotal contract and tax incentive deliberations for this project. This clear disregard for the public has forced the New Mexico Foundation for Open Government (FOG) to file formal transparency lawsuits against the county over Open Meetings Act violations. Turning a promised public town hall meeting into a highly controlled corporate open house is not community representation—it is a closed-door corporate favor. 2. Misrepresented Public SupportThe claims of sweeping local approval for this project are foundationally compromised. Investigations have revealed that project canvassers approached residents in Las Cruces at gas stations and grocery stores, only to later use those names without permission on falsified support letters sent directly to state environment officials. We will not allow our names or our communities to be hijacked to rubber-stamp environmental degradation. 3. Severe Regional Environmental and Public Health ImpactsThe physical threats to our high-desert home are severe. The massive scale of Project Jupiter threatens our regional water table and power grid stability. Despite recent attempts to pivot to a Bloom Energy fuel cell microgrid design, serious questions remain regarding the massive natural gas or carbon-intensive hydrogen footprints required to power this layout. Bypassing independent, neutral environmental impact reviews exposes Doña Ana County residents to hazardous particulate matter emissions and severe long-term degradation of local air quality. Conclusion For decades, the authority of the "administrative pen" has been used to ignore ballot outcomes, block community opposition, and keep Southern New Mexico at an environmental disadvantage. I stand with the growing coalition of local residents and state legislators demanding an immediate halt to all zoning and air permit advancements. We demand a full, independent, third-party environmental review before our finite natural resources are permanently signed away. Respectfully submitted Brian D. StamperResident of Doña Ana County / Las Cruces	4	Merged Document	Yes	[redacted]	Yes	Yes	Yes	Yes	Yes		Yes	8/17/2026
William	Caudle	As a resident of New Mexico and someone with a thirty-year-plus tech background, I urge the Department to reject the permit for this data center. Our water, electricity and air will all be impacted, with zero benefit for New Mexico residents.	1	Merged Document	No		Yes		Yes		Yes			8/17/2026
Molly	Biggs	as a citizen and a physician, I absolutely oppose approval if the the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. This project is unlikely to provide sufficient economic benefit to the state to offset the harms to air quality in our state. I've seen first hand how air quality affects vulnerable patients, the rates of chronic lung disease from asthma to emphysema are already quite high in New Mexico and projects like this will severely affect many vulnerable new Mexicans and overburden our already struggling health system. the projected water use and heat generation additionally make this project untenable in our state. please listen to the real people here in NM and deny this permit.	1	Merged Document	No		Yes	Yes	Yes					8/17/2026
Brian	Wortman	I urge you to deny the permit for Project Jupiter's fossil fuel microgrid. This project conflicts with our community's health, prosperity, and values. Approving it means accepting continued air pollution that harms residents' health while prioritizing a private energy facility over local economic development that would create sustainable jobs and strengthen our tax base. Project Jupiter also threatens our water through contamination risks and unsustainable consumption while exporting profits that should remain in New Mexico. This proposal continues a harmful pattern: extracting our natural resources, degrading our environment, and saddling the costs with residents while benefits flow elsewhere. We deserve solutions that respect our air, water, and future. No to exporting profits. No to destroying our environment and natural resources. No to new gas plants. No to Project Jupiter.	1	Merged Document	No		Yes		Yes					8/17/2026
Anonymous	Anonymous	1st comment: "I am a resident of Minnesota. I am asking that you deny Yucca Growth Infrastructure's air quality permit. Though I do not live in the area, this is an issue that impacts our relatives and contributes to the climate crisis. The future for our children and children's children and seven generations ahead - is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. BIPOC and low income communities often suffer the consequences more frequently from climate change induced disasters. The metro area there is currently 16th worst in the nation for ozone pollution and has received a failing grade on this air quality standard every single year since 2000. People are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Families in the area are suffering from serious health complications like seizures. We cannot afford more intense heat or pollution and resource extraction from AI data centers or fuel cells. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How are people supposed to send their kids to school knowing what they are breathing in? Or elders traveling? Knowing it can cause permanent brain damage or breathing complications. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits. There is no sustainable way of extraction." 2nd comment: "And illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can we be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. People's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. Such a sign language interpreters. I need to add an important story of the town of Picher Oklahoma. Once a booming mining town that was a major export for lead and zinc and helped supply the U.S army in WWII. The area is now a complete ghost town. It was declared a superfund site by the EPA while citizen STILL lived there. Overtime the huge piles of chat left outside the mines blew lead and zinc dust into citizen's homes and contaminated their waters. In the 90s and 2000s, 40% of children tested positive for lead poisoning. The final straw for eviction was the 300 miles of abandoned hollowed out mines that caused great risk of sink holes that could swallow the entire town at any moment. This story while devastating serves as a warning for what happens when we extract and extract with no regard for the consequences on the environment and our people. Don't let New Mexico become the next Picher Oklahoma. AI data centers will only extract the community's water."	2	Merged Document	No		Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Zoe	Unruh	To Whom It May Concern, My name is Zoe Unruh. I am a nurse and have been working with New Mexican communities for the past 4 years. New Mexicans have lived through generations of environmental harms from Uranium mining to nuclear testing. We do not need to add additional pollutants to the air and compromise the health of our communities even more. This project will affect the health of the most vulnerable in our state through air and water pollution, energy usage, and water consumption. I am asking you to center New Mexican community voices, particularly indigenous voices who have always stewarded this land, and reject the Yucca Growth Initiative's permits. Thank you for your time	1	Merged Document	No		Yes		Yes					8/17/2026
James	Longmire	Greenhouse gas emissions from Project Jupiter are estimated to exceed those of Albuquerque, Las Cruces, and Santa Fe combined. Why is this project even considered for approval? We need to be fighting climate change not supercharging it. And for what? A massive data center for AI slop videos or social media? Don't sell out our future, our tenuous climate and water table for this affront to humanity. Don't foreclose on your own children's future. If you approve this project, you will be consigning every New Mexican to a doomed future. And for what? 1500 construction jobs? That will probably mostly go to a firm in TX? Do the right thing. End project Jupiter now.	1	Merged Document	No		Yes	Yes	Yes					8/17/2026
Rosie	Amendola	As a life long resident of NM, Dona Ana County, I have seen this town grow and evolve into what it is now. And as someone who as grown up along the Rio. I and people in the community do not want this data center, or any permits that would allow it to pollute our home. I have family members who had cancers due to exposure to chemicals from poor structured facilities and spaces where they would otherwise have not gotten cancer from. And especially in Santa Teresa where they are already facing health problems due to negligence of contaminated water, and poor handling of waste. I want the future of NM to know what it's like to see water flow in the Rio Grande, and to have clean water and a flourishing desert environment. Not only will this data center harm our future but destroy it. New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." Do your job and protect the environment from harmful data centers. I would not want to live in a community that has no Rio, no clean air or water, and everyone sick with cancer, children born with deformities and weak immune systems. People of Santa Teresa and Dona Ana County deserve better. Especially with already unresolved water contamination and pollution. We the people of Dona Ana County and Santa Teresa demand that: Be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. practice what you preach	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Jadyn	Lauzon	Additional comment: "undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members."	1	Merged Document	No		Yes		Yes		Yes	Yes	Yes	8/17/2026
Anon	Anon	I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I'm 18 and I'm incredibly concerned about the environmental future of both New Mexico and the United States as a whole. To subject the citizens of New Mexico to this project would be near environmental terrorism, especially considering the site is located within a five mile vicinity of AN ELEMENTARY AND HIGH SCHOOL. It would absolutely destroy their ability to learn due to the heat and noise output. Allowing this project to go through to completion would be both a waste of money and would go directly against the NMED's mission to "protect and restore the environment and foster a healthy and prosperous New Mexico for present and future generations." What happened to the public hearing the state Air Quality Bureau recommended on the previous applications that the industry has since redacted? NMED should not overlook the overwhelming community concern expressed in the last public comment period, which still applies to this same project. The project's proposed fuel cell powered grid is concerning for many reasons: It would stillproduce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	2	Merged Document	Yes			Yes	Yes		Yes		Yes	8/17/2026
Sol	Johnson	I oppose. AI data centers are killing the earth and I do NOT welcome any in New Mexico. Not to mention, we live in a desert where we already deal with water shortages. I want clean, affordable water for our people, not more contamination.	1	Merged Document	No		Yes							8/17/2026
Maria	Montoya	As an OBGYN, the data is clear, projects like this will worsen health outcomes for the surrounding community. The increased heat and air pollution is linked to preterm birth, infertility, preeclampsia and stillbirth. Our community should not sustain this project which will harm vulnerable communities.	1	Merged Document	No				Yes					8/17/2026
Abby	Anon	"I am a behavioral health clinician in Dona Ana County and among the tens of thousands of concerned voices submitting comments on this platform to urge NMED to oppose the YGI Microgrid permit request. Considering how the climate of this designated nonattainment area reliably pushes yearly records for triple-digit heat and mounting records of poor air quality, it's surprising and concerning to see that the application is being considered altogether. Members of our community have made repeated and painstaking efforts to seek information/transparency that support corporate claims of consideration for any affected area's environmental health, and the published metrics alone are deeply disturbing. 10 million metric tons of climate-warming greenhouse gases will not only harm residents of this area as a baseline—not to mention the generations to come after them—but exposure to mounting temperatures and hazardous air quality will only continue to exhaust our already overburdened emergency departments on top of endangering those being served. Emergency, medical, and behavioral healthcare workers alike suffer and regularly see the longer-term implications of existing health issues tied to our current climate—this is before the effects of operations like Project Jupiter. The mission statement of NMED is clearly displayed; I urge representatives and staff to engage communities if the incentives driving matters of science, innovation, and compliance behind this unprecedented project are truly out of the hands of the people you serve. Please consider holding a bilingual public hearing in Santa Teresa should the application be pushed through. At minimum, the public should be given an additional 60 days to review and comment on the application so the community members who will inevitably be affected can participate equitably. Abby"	1	Merged Document	No			Yes	Yes				Yes	8/17/2026
Isabelle	Vigil	I strongly oppose Project Jupiter due to its environmental impacts on the state and world. Do not displace millions of New Mexicans by draining the state of water it already desperately needs.	1	Merged Document	No		Yes		Yes					8/17/2026
Nathan	Marquard	I am greatly concerned regarding the projected amount of emissions this project will generate, specifically VOCs. The NMED states in the permit application that VOCs will not be monitored, even though Yucca claims a staggering 124 tons/year will be emitted. I am concerned that these emissions will react with NOx emissions (est. 37.2 tons/year) to create locally high amounts of ozone that will pose a health risk to nearby communities. Combined with high summertime temperatures and low humidity, this increased ozone presents a public health risk that should be monitored much closer by NMED before granting this permit.	1	Merged Document	No			Yes	Yes					8/17/2026
Joseph	Rumbaugh	I strongly oppose the construction of data centers in New Mexico. We are a state with very little water and large amounts of well-preserved desert and mountain land. For both the preservation of water and wildlife, I strongly oppose the construction of data centers in New Mexico.	1	Merged Document	No		Yes		Yes					8/17/2026
Esmeralda	Aguilar	There are no net positives that would happen if the data center were allowed to be built.In a time where we are draining reserves in the southwest to make sure that people have enough water to survive, I cannot think of a worse use of our limited resources. Even if this facility did create new jobs, the jobs would be short lived and unsustainable. I strongly opposed the approval of this application.	1	Merged Document	No		Yes							8/17/2026
Armando	Marrufo	"Emissions from natural gas generation can lead to severe environmental and public health concerns. Nitrogen oxides react with other substances to create ground-level ozone, which exacerbates asthma and damages lung tissue. Localized analyses frequently raise flags about the health risks associated with living near these combustion sources. Carbon Dioxide (CO_2): Roughly 117lbs of CO_2 are produced for every million British thermal units (MMBtu) of natural gas burned. Nitrogen Oxides (NO_x): Formed when atmospheric nitrogen and oxygen react under intense heat. NO_x is the primary local pollutant of concern because it causes smog and contributes to respiratory and cardiovascular health issues. Methane (CH_4): Can escape via ""combustion slip"" (incomplete combustion) or supply-line leaks. Methane (CH_4) is a highly potent greenhouse gas—trapping over 80 times more heat than carbon dioxide CO_2 over a 20-year timescale. It drives rapid short-term global warming, fueling climate-induced heat waves, intense storms, and prolonged droughts. Along the supply chain, leaks release this gas directly into the atmosphere, often negating its supposed climate benefits over coal. Infrastructure like compressor stations and plants are prone to leaks and explosions. Catastrophic leaks or massive venting incidents can displace oxygen in the immediate vicinity, causing suffocation, fainting, and brain damage. Routine operations also cause severe noise pollution and localized odor. Facilities are often sited in low-income areas and communities of color, disproportionately exposing vulnerable populations to industrial hazards and disease. Oracle's Project Jupiter is designed for a generational power capacity of roughly 2.45 to over 2.6 gigawatts (GW). For scale, 1 GW of electricity can power about 750,000 homes With no benefit to surrounding communities and the risks to environment and the inhabitants, a power consumption polluting facility should not be permitted. NO PERMITS!!!"	1	Merged Document	No		Yes	Yes	Yes		Yes			8/17/2026
Eli	Becker	I strongly oppose the construction of project Jupiter that would come at the detriment of our gorgeous New Mexican nature. Water is too precious to use for cooling GPUs. The only people who benefit from this project are the few billionaires who would destroy our entire planet for a few bucks in their portfolio. We came from Mother Nature so we must respect her and our communities who would be affected by this travesty. Stop data centers before it's too late for us all.	1	Merged Document	No		Yes							8/17/2026
Amelia	Johnson	In a state already plagued by drought and an environment showing the detrimental effects of warming, building a data center that will use our water and pollute our air puts all of our communities at risk. The profits of this project will not stay in our state, the harmful aftermath of it will. Say no to Project Jupiter.	1	Merged Document	No		Yes		Yes					8/17/2026
THARA	LECHUGA	I was approached by an employee or representative of ORACLE regarding support for Project Jupiter in Dona Ana County. I specifically told the ORACLE employee that I do NOT support Project Jupiter and I listed various reasons - #1 being we live in a desert and water scarcity is already an issue. I was under the impression that my comments would be delivered as I had requested - NOT in favor of Project Jupiter. However, I am not sure if my name was recorded as in favor of Project Jupiter. Thank you, Thara K Lechuga	1	Merged Document	No		Yes							8/17/2026

Siobhan	Kilbride	As the owner of a small healthcare recruiting business, I am quite concerned about the impact of the microgrid on efforts to recruit professionals to move to New Mexico. No one wants to live near one of these facilities and it will absolutely deter people from moving here. We may also lose NM professionals who chose to move out of state and away from these microgrids. As an Albuquerque resident, I'm very concerned about the environmental and quality of life issues associated with the microgrids. We should say "no" to project Jupiter specifically and "no" to microgrids in general.	1		No	[redacted]								
anonymous	anonymous	If the New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations" then the air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. The public should be given an additional 60 days to review and comment on the air quality allowing so community members can participate equitably. Approving this permit would be government-backed environmental racism , because the people of Doña Ana County already suffer too much from environmental pollution. For years, Doña Ana County has been called a 'non-compliance' zone—this means that our air quality does not meet federal government rules. If the permit is not denied, a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually. Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air (see FCDX tables sourced directly from p. 150 of Air Permit) If the NMED Air Quality Office "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality" then the the air quality permit application should be denied because Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses.	1	Merged Document	No	[redacted]			Yes					8/17/2026
Sarah	Raupagh	I oppose Yucca Growth Infrastructure's permit application request and believe it should be denied. New Mexico's land, water (and supply), air and health risk significant impact with this project. Or anything correlated with Project Jupiter. Bloom Energy's history with handling hazardous waste is a concern and Doña Ana County has already experienced enough environmental pollution. If the permit is not denied a public hearing needs to be held in Santa Teresa, in both English and Spanish, with the accessibility option of virtual participation. Thank you for your time	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026

River	Nunez	"The proposition of thousands of jobs being provided with Project Jupiter and recycled water for AI search engines is built on a false promise to have New Mexicans side with the continuation of this data center. Many New Mexicans truly disapprove of this center being built and we can all collectively agree we would rather our lands that our wildlife depends on should stay untouched. This center will truly harm SO MANY communities in an already at risk state. We truly do not have the resources to deal with more water restrictions in this drought or for our electric bills to skyrocket when our job market in NM is also scarce. Do not continue to hurt our communities. Please stop Project Jupiter and protect NM land!!"	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Nathalie	Nichols	Water and the health of our communities are more important than data centers. If you will not live long enough to feel the reprocutions of your actions you should not get a say in our future. OUR PLANET AND PEOPLE WILL ALWAYS BE MORE VALUABLE THAN ANY BLOOD MONEY YOU CAN RECIEVE! PEOPLE ARE ALREADY SUFFERING. THERE IS ALREADY DATA PROVING WHY DATA CENTERS ARE DANGEROUS. YOU CANNOT DRINK MONEY! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Melissa	Harrison	I am deeply opposed to this project, as I am opposed to any construction that allows for pilfering of a dwindling resource such as water from New Mexico's already drought stricken landscape. The power draw, immense heat creation, and the noise created by this project will not only devalue local land but destroy the ability to live near it unaffected. These are only the immediate initial concerns, and does not encompass all issues this project creates, such as creating chemical pollutants and decimating local wildlife and their habitat. This project will not create meaningful jobs and the product of its use costs New Mexicans jobs. Whether this data center is used for AI, data management or mass surveillance, it is a cost too high to allow the projects completion in New Mexico.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Annabelle	Berg	County commissioners predict that the Jupiter AI data center will use up to 1 million gallons per day to run. This much water usage will not only cause the cost of water and water bills to skyrocket, but it also risks bleeding the Rio Grande, the life blood of much of New Mexico, dry. As an Arizonan and a resident in the already dry Sonoran desert, I understand what it is like to live in constant drought and it breaks my heart to know that my wonderful neighbors are at risk of losing their access to safe and reliable water. In top of that are the concerns about air quality and noise pollution. Neighborhoods that are located near data centers have shown a spike in diagnosis of asthma and other respiratory illnesses, and those who already have those conditions, I of whom am one of, see a worsening of their respiratory health in the presence of these data centers. The noise pollution that comes from data centers has also been proven to cause insomnia and immense distress in humans and birth defects and even still births in breeding animal life alongside severe changes and worsening in behavior. The approval of project Jupiter will drain the Rio Grande, destroy the wildlife of the Chihuahuan desert and corrupt air quality for countless New Mexicans, as well as severely worsening the quality of life for millions of New Mexico residents and animal inhabitants. I urge you, please do not approve this project, I would never wish the fate of living by a data center on my beloved neighbors.	1	Merged Document	No	[redacted]	Yes		Yes		Yes			8/17/2026
Earl	Cason	To the New Mexico Environment Department, Air Quality Bureau: I am a resident of Doña Ana County in Southern New Mexico. I am writing to express my concerns over the air permit application for Project Jupiter. The more research I do, the more concerns I have, and I do not have time to write out all of this before the deadline. The short version, though, is that I am opposed to the approval of these air permits on both an individual level and on the level of our community. One household member has chronic illness and is immune compromised; an increase in pollution in our area will only make life harder for us. Similarly, one of our young children has asthma, and declining air quality will likely exacerbate this condition. On the level of our community, we live in a hot, dry climate and our region is very poor. There seems to be a risk that the proposed microgrid power plant could create an increase in ambient temperatures in the surrounding area due to waste heat, and I would ask that the applicants be required to analyze this impact if they have not. Many people in the vicinity of the proposed power plant are likely to already be without air conditioning; any increase in heat will cause increased hardship. On top of this, the facility's enormous carbon emissions would worsen the very heat and smog our region already struggles with during the summer. I have concerns that the microgrid power plant plan appears to allow these companies, which seem to have considerable financial resources, to sidestep legal burdens that would require them to move toward renewable energy sources in a timely manner. According to analysis from New Energy Economy and others, this single private gas plant would emit roughly 10 million tons of CO_2 per year, about three times the emissions of the entire Southern New Mexico and West Texas power grid, and more than the cities of Las Cruces, Santa Fe, and Albuquerque combined. That grid serves half a million homes and businesses; this plant would serve a couple of out-of-state corporations. It would seem reasonable that the applicants explain why they cannot adhere to a more traditional or cleaner power generation solution that would place less of an environmental burden on our community. I do not think it is unreasonable to slow this process down and make sure due diligence is done to ensure that this project takes into consideration the well-being and health of the residents in our area. It should be possible for the applicants to meet their goals without adversely harming our community. As residents of New Mexico, we are depending on the NMED to stand up for our rights and protect us from unnecessary harm. Sincerely, Earl Cason Dona Ana County	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes			8/17/2026
Matthew	Winter	New Mexico's residents are facing unprecedented threats in the form of drought, forest fires and heat waves. Data centers act to directly increase the severity of these threats, and with few benefits for the communities they harm. Any elected official that truly cares about the citizens of New Mexico must prioritize ensuring that people have access to clean drinking water and oppose data centers. We can't afford to further destroy the environment so that a few wealthy individuals can profit off of the suffering of the people of New Mexico.	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Roxanne	Lester	We continue to see the exploitation of New Mexico's beautiful open land for out-of-state profit that returns nothing to our people. Building an AI data center here completely disregards and diminishes the agricultural and environmental crisis we are ALREADY having in this state due to drought. SAY NO TO PROJECT JUPITER.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Daniel	Gallegos	These permits must be denied. Project Jupiter will be responsible for dumping insane amounts of carbon pollution into the air, ruining our beautiful state, and raising local temperatures up to unlivable degrees. This will literally kill New Mexicans, and it has no place here. Not to mention, the contstruction of these data centers will result in the loss of hundreds to thousands of jobs once these facilities are up and running. I'm a voter and I want these AI corporations and data centers far away from our New Mexico communities. Oracle's Project Jupiter is not welcome in New Mexico	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Zane	Nordquist	I am a citizen of New Mexico who works in the renewable energy industry and I oppose issuance of this air quality construction permit and urge NMED to deny the application. The YGI Microgrid application, as filed in the Las Cruces Sun News legal notice and reported by Source New Mexico, projects 10.1 million tons of greenhouse gas emissions per year, this is more than Albuquerque and Las Cruces combined. Despite the rebranding from gas turbines to oxide fuel cells, the fuel cells run on natural gas. This is not a "green energy" proposal; it is a costly fossil fuel power plant in repackaged form. Water is an equally serious and unresolved concern. Doña Ana County sits in a drought-afflicted desert basin. The developers' water use figures have shifted repeatedly throughout the permitting process, and no binding, enforceable water use cap has been established in this application. NMED cannot responsibly issue a permit where the water impact on an already-stressed aquifer remains undefined. Finally, the integrity of this public comment process has been compromised. Source New Mexico documented that Oracle's canvassing operation submitted form-letter public comments in the names of residents who never authorized them. NMED should view this as dangerous corporate tampering of our state's democratic process. The application contains too many unresolved unknowns to issue a permit. I urge you to deny it. Thanks, Sources: Source NM (GHG figures from Las Cruces Sun News legal notice)	1	Merged Document	Yes	[redacted]			Yes			Yes		8/17/2026
Danna	Renteria	Dear NMED staff, My name is Danna Renteria. I live in Santa Teresa, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have heard from family and friends in Valencia Park about their water pressure going down. I have heard from my grandparents down in Anapra that their neighbor's house burnt down, and the lack of proper water pressure caused a slower reaction from the fire department. I have been told my whole life living in Santa Teresa that our tap water is so subpar that we cannot drink from it. I was at home when the great Arsenic and oil issue of 2024 occured. This is not a one time occurence. Our drinking water has been contaminated since forever, and bringing a big data center will not help. Our lack of proper water pressure will only get worse; water contaminants will only get higher; the price of buying potable water will increase, limiting lower income families such as my own on how much water we can use. Water is a human right, not a privilege. We as citizens of Sunland Park and Santa Teresa deserve to be treated as humans. We deserve to stay in our homes, drink clean water, and not be pushed out by big companies only seeking revenue and land. This comment, however, seeks the NMED to look into air permits. This, too is an issue I am tired of seeing. We live in a desert where haboobs, sand storms, and metropolitan pollution takes over. We do not need another issue added to this. I urge the NMED to reject this air permit and realize that the citizens of this city do not want this data center. Listen to us, listen to everyone, and listen to nature. All of us seek safety, security, and health. https://www.washingtonpost.com/nation/2024/04/18/new-mexico-arsenic-drinking-water/ The project's proposed fuel cell powered grid is concerning for many reasons: * It would still produce a high level of greenhouse gas and toxic pollutants. * This technology generates toxic waste, and the process for handling this waste is still unclear. * Fuel cell technology or a centralized waste system has never been tried at this scale. * Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Danna Renteria	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes	Yes			8/17/2026
Jess	Soza	I am adamantly opposed to the permitting of "Project Jupiter". The covert and forceful way that this project has come this far is outrageous and offensive. This threatens the health and well being of residents, drains an already disastrously depleted water table, and strains a power system for no good reason. This much data is never worth the sacrifices it is demanding. Please develop some common sense and moral integrity. This is a travesty.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes		Yes	8/17/2026
Karl	Hakmiller	New Mexico is a land of limited resources and a state with a history of pollutive exploitation. Clean air in our state is as precious as our water, and both resources are threatened by shadowy, billionaire-funded data center projects that promise nothing but increased energy bills, increased air pollution, and hundreds of thousands of gallons of water wasted daily on evaporative cooling. For what? Half a dozen jobs? A brief stimulation of the construction industry that will boom and then bust? I firmly oppose any permitting to Project Jupiter, whose backers are anonymous and flooding the state with pro-data center propaganda and the streets of ALbuquerque with out of town canvassers. Do we want our grand children to be proud of us or ashamed? Reject the permit for the good of New Mexico.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Ange	Anonymous	You're insane and selfish if you believe that Project Jupiter developers should proceed with the world's largest data center. WE WILL ALL SLOWLY DIE AND BECOME SICK BECAUSE OF THE 10 MILLION TONS OF FUEL CELLS BEING POLLUTED INTO OUR AIR! We will all run out of clean drinking water and rivers will dry out. Project Jupiter is inhumane. We deserve 60 days to collect and review information about the air quality permit. The air quality permit NEEDS TO BE DENIED! Given Bloom Energy's untrustworthy record of illegal dumping toxic waste. A public hearing should also be held in Santa Theresa given in both English and Spanish with an option to attend digitally. Please for everyone's sake please don't move forward with Project Jupiter. I beg of you. You'll kill us all.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Joshua	Lopez-Binder	I am not a resident of Doña Ana County, but I write in solidarity with the community. I urge you uphold NMED's mission "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." by denying the air quality permit application because the residents of Doña Ana County are already disproportionately impacted by environmental pollution. At the very least a public hearing should be held and an additional 60 days should be given for review and comment on the permit. Shouldn't the people of the county have a say in their future? Can we find ways to promote economic growth that don't place heath burdens on communities and the environment? Thank you for your consideration, -Joshua	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Elisha	Weisman	There is no reason that New Mexico should approve this project with the majority of the water in the Rio Grande being used by Colorado Hatch barely has enough water each year to finish the growing season let alone providing clean water for the community. Without greater education and accurate assessment of the water use and proof that this won't disrupt the community resources for healthy living this should be shut down without question. Please take the people into consideration instead of the stock holders of a multi billion dollar industry who do not give back or even provide jobs for our lively hood. Please stop the Jupiter Project!	1	Merged Document	No	[redacted]		Yes	Yes				Yes	8/17/2026
Harrellette	Tate	There is No water here! Therefore, common sense would indicate no data center. I am against all AI data centers. Human life is more important than destroying the earth.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
S.	Mont.	I am deeply opposed to this permit being approved. If anyone in the NMED has studied, researched or read anything related to environmental sciences, you would also be opposed. Our resources are precious and it is important we all come together now to do the hard work to protect them, before it is too late. Doña Ana county already has some of poorest air quality ranked nationally in regard to prolonged exposure to pollution and increased cases of respiratory issues such as asthma and pneumonia, as a result. I hope my comment along with others from the community will be considered before profit and the progression of a technology that just like others before it will likely be obsolete, but not before the damage is already done. Our air and land, our environment, are the real commodities here. Some already know this and are willing and ready to take advantage of those who have not yet figured out. All the best.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Gabe	Karns	NO to Project Jupiter... The name is fitting. Just like the gas giant, it's obvious what this project is really after: sucking up our gas and non-renewable resources. Our home isn't just an extraction zone to be drained. What's really worrisome is the water. We all know how incredibly scarce our water is, and with predictions saying our supply could run dry by 2030, every drop counts. Handing over our most vital resource to a massive, unsustainable project is completely reckless. On top of the water crisis, Project Jupiter brings real, unacceptable health risks to our communities and our neighbors. Nobody here asked for this. It's unsustainable, it's unsafe, and it is absolutely not "New Mexico True." No water, no life. Please do the right thing and reject this project.	1	Merged Document	No	[redacted]		Yes	Yes					8/17/2026
Julia	Nelson	I am a resident of Doña Ana county and I am requesting NMED to deny Yucca Growth Infrastructure's air quality permit. The residents of New Mexico, and more specifically our county DO NOT WANT OUR AIR POLLUTED. During the last comment period, thousands of comments were submitting requesting to reject the air quality permits for Project Jupiter, now Project Jupiter is resubmitting with new fuel cell technology. Oracle and Open AI know how unpopular data centers are and realize that people around the nation are not going to stand for air pollution, water waste, and noise pollution. Project Jupiter has now dumped thousands and probably millions of dollars on propaganda to try and gain "support" for this disaster. They have PAID canvassers that walk around Albuquerque and Las Cruces to get signatures. And pay locals to promote Project Jupiter. There have been first hand reports of pedestrians OPPOSING Project Jupiter, and the canvassers will submit their name and email in support despite people verbalizing oppostion. NMED, please be wary of these many signatures in support of this Project, they have PAID for artificial support. There are even instances of canvassers trying to get signatures from the homeless populations in Albuquerque and Las Cruces. Project Jupiter is MANUFACTURING CONSENT through these paid canvassers, both on the ground and through social media. This is dangerous for the representation of public opinion and is highly unethical and questionable. If Project Jupiter is willing to use money and questionable tactics to push their data center and air quality permits forward, what other boundaries are they willing to cross? Oracle and Open AI behind Prohect Jupiter have the funds to pay for fake support, but this shouldn't mean that they can be approved to pollute our air, water, and land and push these boundaries further. We do not want air polluted with 10 million tons of carbon dioxide, especially next to a school. We want development for jobs, but not temporary construction jobs that go mainly to out of state residents. New Mexico is better than this. Santa Fe county has passed a moratorium on data centers. Will New Mexico allow the "Not in My Backyard" attitude to deny data centers in the more white and more wealthy counties and allow the exploitation of rural and predominantly nonwhite counties? NMED, we can decide to be better. PLEASE deny this permit. Approving this permit will allow not only the degradation of this beautiful state, but set a precedent for allowing air pollution and water wasting and extraction in water poor areas that are predominantly rural. If you haven't yet, look at the stories of communities impacted by large scale data centers, such as those in Loudoun County Virginia. Property values plummeting, constant noise pollution harming the health of residents, lies sold to county representatives.This project is not only a danger to New Mexicans, but all of the US. We are sitting PAST the tipping point of irreversible climatic change. New Mexico has seen UNPRECEDENTED fires earlier in the season that last into the winter. This is a direct result of unfettered carbon emissions. For what? What will this project provide? No sufficient long term jobs. No water to drink. No land for biodiversity. WE WANT WATER TO FLOW THROUGH THE RIO GRANDE, NOT TO COOL TURBINES. WE WANT AIR TO BREATHE DEEPLY AS WE WALK AND HIKE AND TRAVERSE OUR STATE, AND NOT BREATHE CARBON EMISSIONS. Why are we sacrificing our resources for billionaires' AI projects? They only wish to take part in the AI boom while it's happening and abandon this project when it's no longer profitable. I cannot touch AI, AI cannot water pecan trees, AI cannot be cycled through our respiratory systems. We are sacrificing so much for a project that will only further harm society at large. NMED, deny this permit.	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Anonymous	Anonymous	To whom it may concern at the Air Quality Bureau of the New Mexico Environmental Department: do the right thing for the environmental well-being of our future. Project Jupiter air permits should not be approved for a plethora of reasons, but primarily for the sake of our future, for the sake of the present, and for the sake of our river. The public should be given 60 more days to review and comment on the permit. I do not believe that the application permit should be flat out denied	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes	Yes		Yes	8/17/2026
Jordyn	Terrazas	I wholeheartedly oppose the approval of an air quality permit for Project Jupiter. The amount of CO_2 emissions a year that it would emit is astronomical, the water it would use is ridiculous, and it should not be allowed anywhere in our state. The very very short-term gain of bringing jobs to the community versus the long-term loss that comes with having a data center in your backyard is not worth it. Let's focus on repairing our environment, not paving the way to destroying it	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
				Merged Document		[redacted]	Yes	Yes	Yes					8/17/2026

Joel	Fountain	I am submitting this comment to share my strong opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. A report provided by Hindenburg Research has indicated the nature of the Bloom Energy company and its systems in other states which have higher emissions than they initially indicated [1]. This report was used in a court case (Jacob v. Bloom Energy Corporation) in Delaware where a shareholder of the Bloom Energy company was demanding an inspection of Bloom's books and records following the analysis of the Hindenburg report on the company [2]. In this case the court concluded granting Jacob limited inspection rights as Bloom's Form 8-K form rebuttal to the Hindenburg report as the form stated that there was an accounting error, giving some credibility to Jacob's concerns on the company's financial reporting [2]. Additionally, the EPA probed and fined the company over its handling of potentially hazardous waste from their solid fuel cells in Delaware which ran on natural gas in 2020 [3]. In fact, the company has a trend of downplaying the hazardous waste, including this year [3]. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. The amount of greenhouse gases that would be produced is still above the emissions of New Mexico's biggest cities combined despite the fact that the fuel cells will emit about 2 million tons less in emissions than the original gas turbines at about 13 million, according to Bloom Energy's own Doña Ana County website [4]. This does not match the state's push for green and renewable energy as stated by the Energy Transition Act, which has "...set a statewide renewable energy standard of 50 percent by 2030 for New Mexico investor-owned utilities and rural electric cooperatives" [5]. Even the Office for Renewable Energy has a track record for renewable energy as touted by the Office's own state website [6]. However, this project's fuel source is the opposite of what the state's own legislation has set for moving away from nonrenewable and CO2 emitting energy sources. The natural gas powered, fuel cell micro-grid as proposed is almost a completed contrast to other energy projects such as the SunZia and the Iberdrola "El Cabo" projects [6]. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences [7, 8]. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Above all, the lack of information including the energy source the fuel cells use to residents in the city where the center will be located and nearby cities is not appreciated and should be taken into account when	2	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Emelia	Beam	This data center does not consider the needs of New Mexicans. Water is life and this center would drain us of our already strained resources.	1	Merged Document	No	[redacted]			Yes							8/17/2026
Robin	Brown	This project is wasteful, unnecessary, and will provide few jobs and benefits to the people of our state while increasing pollution and heat. The river is currently dry and we have no water to waste on such frivolous and toxic expenditures. No to this high stakes gamble of a project that stands to benefit very few.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Cristian	Maldonado	This permit should be denied. Project Jupiter will negatively impact our air quality and water for the whole community and for little to no benefit. Only the owners of this project stand to profit and they have no roots or love for this land. Please take into consideration the future of this community. Future generations will look at this moment either in shame for allowing this to happen or pride that we stood up such a short sited idea.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Aaliyah	Thom	Dear NMED staff, My name is Aaliyah Thom. I live in Clovis, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest operating Bloom installation is a 40 MW facility - 60 times smaller than what is proposed here. Scaling this technology to a mega-utility application remains entirely unproven. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the desulf canisters is exempt from air permitting regulations (because there is less than 1000 lbs/yr). Suspect Estimates & Inadequate Testing: The emissions data provided is based on testing of a single, 65 kW unit four times for four hours. Extrapolating data from a unit 37,876 times smaller than the proposed plant capacity - and adjusting it with an arbitrary 15% safety margin - fails to provide credible empirical evidence. The emissions data provided by the company cannot be trusted. Enforcement Impossibility: The design routes 2,275 individual cells through separate stacks with no add-on pollution control mechanisms or integrated continuous monitoring for particulate matter, VOCs, or shifting CO2 intensity. NMED cannot practically enforce compliance under 20.2.72.210 NMAC across thousands of individual, degrading units. Severe Public Health & Environmental Impacts: The microgrid will emit 161.2 tons/year of CO and 124 tons/year of VOCs near existing EPA non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.6°F in a sweltering desert climate, threatening vulnerable populations. Furthermore, concentrating 10M metric tons of climate-warming CO2 into 275 acres - exceeding the combined emissions of Albuquerque, Santa Fe, and Las Cruces - creates localized health risks. Emerging 2025–2026 research links elevated CO2 levels to permanent changes in human blood chemistry, oxidative stress, and cognitive decline. Because CO2 sensitivity exists on a normal spectrum, even minor	2	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Shalese	Lovell	Creating a microgrid isn't getting rid of the environmental problem that a massive energy production facility creates. In fact, it proliferates emissions by condoning wilful blindness - this facility will NOT be constructed eco-conciously, nor will any of it be directly beneficial to NM residents. If this facility causes an increase in commuting, it will also become a social and economical problem, as we are currently facing an oil shortage during an economic downturn and active war. This greedy act will set the precedance for how New Mexico handles AI - while in the right hands it is a necessary tool of the future, private monopolization of tech that is on the equivalent scale of atomics should ESPECIALLY be opposed in our times.	1	Merged Document	No	[redacted]				Yes	Yes					8/17/2026
Cynthia	Chavers	I ask the NM Environmental Dept. to reject Yucca Growth Infrastructure, LLC's air quality permits. As a New Mexican, I am deeply concerned with the environment impact of this project. The long-term negative effects of Project Jupiter far outweigh any potential short-term economic growth. This data center will only initially need to hire masses of people to build the center; however, once built, those job will no longer be needed. The investors of this project have not been truthful about these potential jobs, with promises of economic security that cannot be realized. New Mexico's fragile watershed system cannot withstand or sustain the water needs this data center will create. We have an obligation to protect our lands fiercely as they are our most precious resource. The development of one of the biggest proposed data centers in the world will threaten our dwindling water supply. I stand with my community in asking the NMED to listen to the voices of concerned New Mexicans opposed to the development of this project. We are already seeing the severe impacts data centers are having in other parts of the US; we must proactively fight against the use of our water for AI data centers. We are already in a massive water crisis; we cannot afford to allow these permits. I urge you to protect New Mexico by denying the air quality permits for Yucca Growth Infrastructure, LLC. Sincerely, Cynthia Chavers Albuquerque NM	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Alex	Schweitzer Kroll	No data center! We do not have the necessary energy infrastructure to support a data center. The insane energy suck of the data center will raise utility costs for locals with NO resulting community economic development. No long term jobs will be made and no long term economic boost. DATA CENTERS ARE NOT WELCOME HERE	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive								8/17/2026
Liliana	Hernandez	Hello there, my name is Liliana Hernandez in Albuquerque, New Mexico. It comes to great a heavy heart to see other places around the world how grossly the the AI data centers. Have become to destroy many things and c caused great harm to us all great harm to the nature that we live in, I will not stand with any types of forms of AI data centers. I will not stand for project Jupiter we want project Jupiter, stay far far away from New Mexico for many futures to come forever and always ! https://www.washingtonpost.com/nation/2024/04/18/new-mexico-arsenic-drinking-water/ The project's proposed fuel cell powered grid is concerning for many reasons: * It would produce a high level of greenhouse gas and toxic pollutants. * This technology generates toxic waste, and the process for handling this waste is still unclear. * Fuel cell technology or a centralized waste system has never been tried at this scale. * Surrounding communities' air will be severely impacted by this development.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026
Alex	Wilson	The amount of emissions and pollution from this facility is unacceptable. As a proud New Mexican, I am against the construction and permitting of this facility. Please deny this permit. This is the air our communities breathe and our future. It's not worth the disastrous environmental impact on our community.	1	Merged Document	No	[redacted]				Yes	Yes					8/17/2026
Thomas	Manning	I personally believe that there data center is not only unnecessary, but counter intuitive to even have in the desert. This also seems to be part of (intentionally or otherwise) a row of actions to strip new Mexico of its assets. Parts of new Mexico even entertaining the idea of joining Texas (and taking our oil), while data centers consume water from the Rio grande (when we already fight over water rights and struggle through drought) as well as the energy drain to our grid which would raise rates for residents and only profit PNM, (which is coincidentally being obtained in a manner already questioned for legality/ethicality). As a new Mexico resident and film industry crew member, I have no desire/need, and this is the sort of thing that will rather push me to utilize my opportunity scholarship and take my training to another state (as ai threatens my career directly and I will take steps to economically inhibit this as an individual).	1	Merged Document	No	[redacted]			Yes							8/17/2026
Albert	Ibarra	Members of the Environmental Improvement Board, My name is Albert Ibarra, and I am writing to express my support for the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County, from the perspective of a logistics professional working in the Borderplex region. I work with JAD Solutions, which supports the movement of goods, equipment, and materials across regional, national, and international supply chains here on the border. Our work depends on reliable infrastructure, predictable regulatory environments, and long-term investments that strengthen this region's capacity to support modern industry. Projects like Project Jupiter play an important role in advancing all three. Large-scale developments like this one require extensive coordination across transportation, warehousing, construction materials, specialized equipment, and ongoing operational logistics. These activities create opportunities not only for logistics providers like JAD Solutions, but for a wide range of supporting businesses - from trucking and freight services to local vendors, maintenance providers, and professional services. When projects of this scale move forward responsibly, the economic activity they generate extends well beyond a single site. Southern New Mexico and the greater Borderplex are uniquely positioned as a logistics and trade corridor, with proximity to major highways, rail infrastructure, international ports of entry, and cross-border commerce. Investment of this scale helps reinforce our region's role as a hub for movement, connectivity, and distribution, while strengthening the infrastructure and workforce needed to support future projects across the state. From a business perspective, regulatory certainty matters. A clear, consistent permitting process allows companies like ours to plan, invest, and allocate resources efficiently. When projects meet environmental standards and advance through the established review process, it builds confidence across the business community that New Mexico is a place where responsible development can succeed. Project Jupiter also sends an important signal to other companies evaluating New Mexico for	1	Merged Document	Yes	[redacted]				Yes	Yes					8/17/2026
Adam	Elbeck	I am requesting that NMED deny Yucca Growth Infrastructure's air quality permit. The experimental fuel cell technology will still lead to an increase in an exorbitant amount of emissions, which is incredibly concerning as New Mexicans are experiencing firsthand the impacts of anthropogenic climate change- through drought, extreme unseasonably high temperatures, and severe and intense wildfires. The citizens of Doña Ana county have the most to lose if this project is approved due to proximity to air and noise pollution while having the least to gain- most jobs will be temporary construction jobs and those that will profit from this exploitation project, the AI millionaires and billionaires, will never have to face the consequences of drought, fires, and heat exhaustion that New Mexicans in Doña Ana county will. NMED, deny this permit. Make a desicion for the health of our state's future. Follow the example set by Santa Fe's moratorium on data centers.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026
mark	leclaire	I urge you to deny this permit. Project Jupiter, even after this revamped proposal, is slated to release more greenhouse gas per year than all our major cities combined. Doubling our state's GHGEs in a time of widespread drought, unprecedented fires, and devastating heatwaves is unconscionable. The connection between CO2 emissions and climate change is crystal clear and undeniably within the purview of this department. Its personal for me. As a small-scale farmer I am watching crops struggle to survive. My pasture is drying up. I can't afford to keep my livestock fed and will probably have to sell them at a loss. Just working in the heat feels dangerous some days. And ONE project is going to be allowed to double our air pollution? For what? So a few billionaires can get richer? Bloom Energy seems incapable of completing this project on time - or at all - given that, according to a report by the reputable energy industry journal Rystad Energy, this project will require almost the entire global supply of the rare mineral, scandium. This project violates the administrative code and any reasonable interpretation of air quality and public health rules. Now it is clear their PR firms are falsely submitting comments claiming to be from our own city councilors in support of this project. Maybe ethical grounds are beyond the purview of this department...but should they be? There's too much at stake here. Deny this permit.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes				8/17/2026
Raith	Addams	This permit should be denied. Project Jupiter will only harm our community's air & water quality, severely harming us. There is no benefit to having this approved. Plus the organizers of Project Jupiter have been incredibly deceptive to our community. In their advertising of events, information they share, & using personal information people share with them without their consent. They have not been honest in trying to get this approved, meaning we cannot trust the impacts they claim will be a result of Project Jupiter. We already know that projects like this harm the communities they are in. Reject this proposal! Protect the community members here!	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Dr. Antonio	Lara	I am a citizen that is very concerned about our quality of life, should Project Jupiter's air quality permits be approved. I am a chemist with organic and environmental training and live 15 linear miles from Santa Teresa, New Mexico. My research involved soot abatement for brick manufacturing and uranium abatement to produce potable water from uranium contaminated sources. The data provided in this application comes from a test unit that was rated at 65 megawatts and operating at 71 megawatts; in reality the chemical and physical characteristics of these fuel cells will be magnified to meet the 2,461 megawatts needed for the proposed project. To extrapolate findings from this data to Project Jupiter is statistically questionable. At larger scales, this project may perform much differently, ESPECIALLY because of the myriad of chemicals involved in this process.For example, temperature will effect many aspects of the project. Temperature impacts the productivity of each chemical differently. For this particular case, NOx is a product of nitrogen and oxygen from the air reacting to produce NOx. This process is very temperature dependent. For example, methane is 32 times more reactive/ toxic than carbon dioxide. Problems will arise if methane were to leak during transportation or through on-site processes.There will be leaks. As another related example, N2O is 273 times more reactive/toxic than carbon dioxide. These are temperature dependent toxicities; this is why these related species should be considered independently. Stacking Bloom energy server units will lead to completely different NOx concentrations due to increases in temperature such as with a stacked configuration. Therefore there is not a linear relationship with respect to the number of Bloom energy server units. A collection of units as proposed by Project Jupiter will definitely have a different temperature effect on the NOx that is produced. There is a likelihood that this profile will be exponential and runs contrary to a one unit analysis. The effect of temperature on NOx reactivity is not linear; it is more "exponential-like".For example, NO and NO2 have different chemistries so to combine their reactivity on a mass basis can be erroneous especially if the mass ratios are significantly different. The baseline testing by Montrose and Blue Sky was on a new unit, in the real world everything deteriorates and the situation will worsen over time. These different scenarios cannot be extrapolated and compared to initial readings from a new unit. The duration of a new unit is ephemeral to units that run non-stop. This project needs attention from many dimensions, including water, soil and other aspects of community impact. Air quality considerations are in front of you and I ask that this permit not be granted until the entirety of impacts are fully studied and fall within accepted protocols and measurements.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes		8/17/2026
Pascual	Romero	As a multigenerational New Mexico native and a cybersecurity and AI-certified ISP solutions engineer, my career has been built on supporting the connection of our communities. My work involves traditional data centers and network infrastructure. The data facilities I design network solutions for are built for critical communications and data storage. They feature somewhat basic, localized footprints that fit into municipal utility grids without requiring major water or power considerations. Beyond this technical infrastructure work, I sit on the AI advisory council for one of the nation's largest corporations. In this role, I advise responsible AI deployment and work to establish people-first guardrails. Seeing this technology from both the corporate governance side and the infrastructure side has made this clear: the current hyper-scale AI push is a speculative bubble that is direct threat to our state's resources. Traditional infrastructure is sustainable, but the massive generative AI data centers being proposed are nit. They are at the leading edge of a massive tech bubble that is rapidly outpacing its economic viability. According to financial market data, the five largest tech hyperscalers are on track to spend over $725 billion on AI through 2026. Yet, the returns on these investments remain incredibly low. For instance, developers like OpenAI are projected to experience up to $140 billion in operating losses between 2024 and 2029, with some warning the firm could face a crisis by mid-2027. The risk is severe enough that a July 2026 U.S. Treasury Department report explicitly warned that the AI sector is highly vulnerable to a major market correction, drawing direct parallels to the dot-com crash. Beyond that, a 2026 National Bureau of Economic Research study revealed that despite massive corporate spending, 90% of surveyed firms reported zero actual impact of AI on their workplace productivity. Companies have already begun excising AI from their internal tools as they've shown to cost more and be less effective than the comparable human labor they are designed to offset. When this bubble inevitably corrects, our communities will be left holding the bill for overbuilt, abandoned infrastructure. For a water-starved state like New Mexico, the cost of waiting out this bubble is too high. A June 2026 United Nations University report found that global data centers consumed an astonishing 448 terawatt-hours of electricity in 2025 alone—surpassing the energy consumption of entire nations like Saudi Arabia—and large AI facilities can consume up to 5 million gallons of water per day for server cooling. We cannot afford to divert precious water from our communities to support a corporate trend that the public is actively resisting in favor of human creativity and critical thinking. New Mexico needs to invest in robust, sustainable communication systems, not massive, empty white elephants in our desert when the tech bubble bursts. Sources: Corporate Capital Expenditure & Return Gap:	2	Merged Document	No	[redacted]			Yes		Yes	Yes	Yes		Yes	8/17/2026
Brenda	Vara	I do NOT support project Jupiter at all. As New Mexicans, we know that we are struggling everyday to keep our Rio grande flowing and adding a data center will not solve that issue. It will impact communities and allow the rich to keep getting richer. Lets put people over profit. Thank you, Brenda Vara	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Mary	N	I am writing to request NMED to deny Yucca Growth Infrastructure's air quality permit. I have family in Doña Ana county New Mexico that are concerned on the air quality impacts, water use, and noise pollution that this project will have while not providing a long term benefit to the county.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026

Elizabeth	Alarid	Elizabeth Alarid Central New Mexico Community College Governing Board, District 1 900 University Blvd SE Albuquerque, NM 87106 June 25, 2026 New Mexico Environmental Improvement Board c/o New Mexico Environment Department 1190 St. Francis Drive, Suite N4050 Santa Fe, NM 87505 Re: Support for Air Quality Permit Applications for Project Jupiter (Yucca Growth Infrastructure, LLC) Members of the Environmental Improvement Board, New Mexico has an immense opportunity before it. Project Jupiter has the potential to unlock new long-term investments, create jobs, and drive the state's economy to new heights. With that in mind, I write to express my support for the air quality permit applications for Project Jupiter. Our state is in a race to attract talent, jobs, and investment. Artificial intelligence is the new frontier and has the potential to revolutionize every aspect of our lives. It is crucial that New Mexico play a leading role in this transformation, and we have an opportunity before us to become as regional, if not national hub, for the industry. With 4,000 construction jobs, and more than 1,500 permanent full-time jobs at all skill and education levels, with high paying salaries that will support strong middle-class families, it is an opportunity to put money into the pockets of New Mexicans with quality long-lasting jobs. Project Jupiter is more than a jobs engine; this project will bring significant investment in the public institutions we all share. Tax revenue generated by this project will improve roads, support law enforcement, provide needed public services to support growth, and will go directly to the local school systems. All while direct investment in higher education and trade schools will ensure were preparing the next generation of technicians, mechanics, robotic engineers, hydraulic, and IT professionals alongside the AI safety researchers, infrastructure engineers, and agentic project managers. The opportunity for not just the next	2	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes					8/17/2026
Krystal	Zaragoza	New Mexico is a unique state with few resources, but what little we have we make it work for all of our community members. Project Jupiter is not for our community. It is a money grab with pointless results. All research shows that data centers are currently losing money (no return on investments) while creating endless noise, water and air pollution in the communities they are built. We must not let outsiders bring in environmental destruction to our state. Deny their air quality permit! Their gas emissions will still be damning to the air quality in New Mexico.	1	Merged Document	No			Yes	Yes	Yes		Yes				8/17/2026
Theo	West	Project Jupiter is a gross violation of the rights of not only New Mexico residents, but residents of the entire country and indeed the world. This data plant will certainly cause generations of health complications resulting in death, disablement, and birth defects. It will dry up our river, the source of life for our communities near and far. It will dump unheard of amounts of pollution into our skies, traveling miles to affect people and ecosystems far from us. This permit must not be granted. As the Department is well aware, allowing the construction of this project to continue would in effect sentence generations of New Mexicans and our neighbors and families outside of the state to damage that is enormous and impossible to calculate as yet. DO NOT GRANT THIS PERMIT!	1	Merged Document	No			Yes		Yes						8/17/2026
James	Hernandez	Our water is not for sale, project Jupiter threatens our fragile aquifers and household water security for so many New Mexican families. In addition, the backroom deals, closed door meetings, and forged comments from New Mexicans falsely claiming to supporting this project, undermine our trust in government and public institutions. At a time when our planet's future is at stake, we do not want another corporation coming to our state to exploit our already scarce resources. Silicon Valley Oligarchs should have no right in dictating New Mexico's climate future.	1	Merged Document	No			Yes						Yes		8/17/2026
Eileen	O'Shaughnessy	Please see attached letter from Demand Nuclear Abolition (DNA) in strong opposition to Yucca Growth Infrastructure, LLC's permit application. Submitted via email and comment portal by Eileen O'Shaughnessy on behalf of DNA. Dear NMED Permit Staff, We are Demand Nuclear Abolition (DNA), a volunteer grassroots collective based in Albuquerque, New Mexico on occupied Tiwa lands. Formerly known as the Nuclear Issues Study Group, we have been active since 2016 working towards protecting New Mexico's air, land, water, and life forms from military, industrial, and nuclear violence. We are writing in strong opposition to Yucca Growth Infrastructure, LLC's permit application for the reasons outlined below. We join our voices with the thousands of New Mexicans who have spoken out against this egregious project which threatens the sanctity of water, defiles environmental & public health, deepens the historic harm of environmental racism, and pushes the Southwest region closer to climate catastrophe. We demand an extensive public hearing and that the application permit be denied. ● Nationwide, the rush to build datacenters is being used to justify building new nuclear reactors, including Small Modular Nuclear Reactors (SMNRs). SMNRs are an expensive, unproven technology that relies on mining uranium and produces nuclear waste: continuing the legacy and violence of nuclear colonialism. In spite of their reliance on mining uranium and production of dirty radioactive waste, SMNRs are frequently proposed as "clean" or as a climate-friendly energy solution. This is a misleading form of greenwashing. The current YGI permit proposal shifted away from SMNRs and is now proposing using fuel cell technology as a "clean" solution. Here again, the tactic of greenwashing is used to sidestep the fact that the microgrid will emit 161.2 tons/year of CO and 124 tons/year of VOCs near existing EPA non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.6°F in a sweltering desert climate, threatening vulnerable populations. YGI's permit must be denied because itis a	4	Merged Document	Yes			Yes	Yes	Yes	Yes	Yes		Yes		8/17/2026
Janelle	Astorga	I oppose project Jupiter because of the proven negative environmental impacts that data centers cause. New Mexico's land, air and water are not for sale. A few hundred jobs that might not be permanent for our local workforce are not worth the long lasting pollution, contamination and extreme water use that this project is proven to create. Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish or relevant Indigenous languages and meet any other accessibility needs	1	Merged Document	No			Yes		Yes		Yes	Yes	Yes		8/17/2026
Roger	Hale	I feel that this type of project is totally unacceptable for an area in the desert. The requirements for water and the impact on air quality should not effect the quality of life for any community. The requirements of such a project should not take a critical water supply from those in a community that rely on it for their livelihood. Please do not misrepresent the facts and requirements needed for such a large scale facility. This type of facility should be built where there is a source of water that can be used. A desalination plant on the coast would be a better source of water. An area that can be helped with the water resource and not hampered.	1	Merged Document	No			Yes	Yes	Yes						8/17/2026
Mars	Taylor	Hello, I am writing as a concerned resident of the state of New Mexico. As we are experiencing intense UV radiation, wildfires, and progressive drought that threatens the safety and longevity of our families, lands, and food security. I am extremely concerned about the decision to approve the construction of this project, which will undoubtedly accelerate the destruction of what air and water we do have. I would like to request a 60 day extension be applied to the comment period for this project. This is not so much to ask, considering the extensive impact of these decisions on the health of generation, and it being such a major drain on resources we *actually* need, unlike a data center. As we are dealing with a lack of polluter accountability in other sites around the state, why would it make any sense to approve a permit to a company like Bloom with a track record of illegal dumping? To approve this would be a clear dereliction of your duty as a quality control body. The chemicals that will undoubtedly be spilled are known to stop or slow oxygen to the brain and hearts of real human beings, humans with families who love them, children who were born to live free and happy lives. It would just be basic decency to allow a public hearing and look such people in the eyes before rushing to slap approval on a project for the sake of laziness, or greed, or whatever motivates the hearts of those who support this project. Do the right thing please. Do not approve this project, hear from the people, and extend the time for the people to understand what a Goliath is at our door step. Thank you, MC Taylor	1	Merged Document	No			Yes		Yes			Yes	Yes		8/17/2026
Uday	Ruddarraju	OpenAI writes in strong support of the updated air permit applications for Project Jupiter in Doña Ana County, New Mexico. We expect to use the infrastructure enabled by Project Jupiter to train frontier AI systems, and we believe the project is important both to America's continued leadership in artificial intelligence and to the economic future of southern New Mexico. As an intended user of the infrastructure, OpenAI has a direct interest in seeing Project Jupiter developed reliably and responsibly. Project Jupiter will help provide the capacity needed to develop and operate AI systems that can benefit people and communities, including tools that support scientific research, improve healthcare and education, strengthen public services, and help businesses become more productive. We recognize that infrastructure of this scale must be developed responsibly. The revised design represents a meaningful environmental improvement and responds to concerns raised about the prior proposal. It replaces the withdrawn combustion-turbine and diesel-generator configuration with a natural-gas solid-oxide fuel-cell system (bloom cells) and eliminates routine diesel generation, which is expected to reduce nitrogen oxide emissions by approximately 92%, carbon monoxide by 67%, particulate matter by 83%, volatile organic compounds by 38%, and carbon dioxide by 21%. The revised plan significantly reduces the project's ongoing water requirements, an especially important consideration in southern New Mexico. The fuel cells require an initial startup fill and limited maintenance water rather than continuous water use during normal operations. The data center will use closed-loop, non-evaporative cooling that recirculates cooling liquid. Project Jupiter's sponsors also have committed to privately funding the project's energy infrastructure and electricity costs so those costs are not passed on to local ratepayers. As an end user, OpenAI supports that commitment and the principle that the project will not increase electricity costs for New Mexico families and businesses. The project's local economic benefits are equally significant. Project Jupiter is expected to create approximately 4,000 construction jobs and support 1,500 ongoing positions, with local workers,	2	Merged Document	Yes			Yes	Yes	Yes	Yes	Yes				8/17/2026
