Howard	Korder	I strongly oppose granting an air quality permit for Project Jupiter as it is currently constituted. Its initial proposal to use gas turbines for power generation would have produced 14 million tons of greenhouse gases, according to its own documentation-- more than double the amount from Albuquerque and Las Cruces combined. Its new proposal of using fuel cells will "only" create 10 million tons of greenhouse gases, which would still make it the single largest source of emissions in New Mexico, more than 10% of the 83 million tons from all sources statewide, as cited in the 2021 New Mexico Greenhouse Gas Emissions Inventory and Forecast. This is an extraordinary amount in itself, but doubly concerning in that it is only made possible by exploiting a loophole in the 2019 Energy Transition Act, to an extent so great as to make that legislation meaningless. Promotional materials for Project Jupiter have consistently downplayed its true environmental impact, if not outright lied about it. (A 3/4 page ad in the June 6, 2026 Santa Fe New Mexican says "Do you support clean air? Then you support Project Jupiter.") It is up to the NMED to base its determination on the facts, which are not in favor of approving this massive source of pollutants.	Merged Document	1	No								Yes			8/17/2026
Grace	Mason	Allowing project Jupiter to proceed would an egregious trespassing on already incredibly limited water resources and our fragile environment. The corporate greed pushing the project forward needs to go elsewhere, not New Mexico. The potential for environmental contamination should be enough alone to stop this.	Merged Document	1	No					Yes	Yes	Yes	Yes			8/17/2026
Elvira	Esparza Bencomo	As a resident of Dona Ana county I STRONG OPPOSE Project Jupiter. The are more negative effects to community, people, and environment if this project was to be able to move forward. We are in a severe drought and a data center that big will make the situation worse. The developers will hide the true number just to be able to get the center built. Looking at otjer areas that have had centers built around them there is nothing but problem. Do not approve. They are not wanted or welcomed	Merged Document	1	No				Yes		Yes					8/17/2026
Alex	Maas	Dear NMED staff, My name is Alex Maas. I am a New Mexico resident, living in Albuquerque and Santa Fe, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexican's. I am submitting this comment to urge the New Mexico Environmental Department reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Micro-grid in Doña Ana County. I grew up in New Mexico exploring the outdoors, and taking care of the people, land, and animals around me. I have found a deep sense of peace in the outdoors and I believe it is an unquestionable right to have clean air, water, and environments. NMED's mission is "to protect and restore the environment and foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities: Albuquerque, Las Cruces, and Santa Fe combined. Everyone can see that something is not right here. What happened to the public hearing the state Air Quality Bureau recommended on the previous applications that the industry has since redacted? NMED should not overlook the overwhelming community concern expressed in the last public comment period, which still applies to this same project. The project's proposed fuel cell powered grid is concerning for many reasons: -It would produce a high level of greenhouse gas and toxic pollutants. Every living being and ecosystem would be exposed to this for greedy people to turn a profit and a blind eye. -This technology generates toxic waste, and the process for handling this waste is still unclear. Dumping waste into the environment is not acceptable, and it is downright unnecessary to create this waste in the first place. -Fuel cell technology has never occurred at this scale and will no doubt have detrimental consequences. -Surrounding communities' air would be negatively impacted by this development. That means everyone from infants to the elderly would suffer. I urge the NMED to outright reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology and defend their communities from this injustice.	Merged Document	1	No				Yes		Yes					8/17/2026
Anjalina	Barclay	 Dear NMED staff, My name is Anj Barclay. I am an Alamogordo, NM resident. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans, and to the environment. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As a recent New Mexico transplant, I fell in love with the state and its beauty. The landscapes, the wildlife, the people — all of them deserve better than the outcomes of Project Jupiter. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anj Barclay	Merged Document	1	No				Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Cole	Grosland	As a local resident, these requested emission limits are deeply concerning, as is the sudden and unexplained pivot from combustion to SOFC energy sourcing. If YGI and Bloom are confident in their lack of PM emissions as cited in their application, they will be inclined to allow an investigation to their claims by any and all relevant state environmental agencies. Upon confirmation of their assertions, they will surely be glad to revise their application with the updated allowable emissions request.	Merged Document	1	No					Yes	Yes		Yes		Yes	8/17/2026
Alexandra	Clark	Dead NMED staff, My name is Alexandra and I am writing to you about my concerns Project Jupiter poses to our great state. I am a Las Cruces resident and understand the impact this project has on all of us living here. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Dona Ana County. We live in the south west and already face many challenges in environment including water shortages. This projects fuel cell powered grid will produce high levels of greenhouse gases and toxic waste. This directly affects those of us who live here and the surrounding communities. I urge the NMED to outright reject YUCCA Yuca Growth Infrastructure, LLC's air permit application for the YGI microgrid. I also ask the department to hold a bilingual public hearing near the Santa Teresa community can learn about the risks associated with fuel cell technology. Please do the right thing for the residents of this state. Sincerely, Alexandra Clark	Merged Document	1	No					Yes	Yes					8/17/2026
Carly	Baca	I, Carly Baca, a community member of Albuquerque, email to inform you I oppose allowing further expansion of data centers and their working parts. The impact a center at this scale is detrimental to the wildlife and our community members that live in surrounding area. Water and air which are earth commodities, should not be polluted and are protected.	Merged Document	1	No				Yes	Yes	Yes		Yes		Yes	8/17/2026
Ruby	Renteria	Reject these permits for project Jupiter we do not need a massive AI center in New Mexico. We will lose the little water we have and more green house emissions will be released polluting our beautiful state. This will not be beneficial in the slightest.	Merged Document	1	No				Yes		Yes					8/17/2026
Keegan	Boyle	This project is extremely unpopular - for good reason - and this permit should not be approved without a reasonable chance for community involvement. The way that the county has handled this entire process has not been transparent, and we the people of New Mexico, and Dona Ana county deserve a real chance to affect whether megaprojects like this are built in our backyards. This is an unreasonable amount of air pollution for a new build when our state is actively trying to reduce dependency on fossil fuels	Merged Document	1	No				Yes	Yes						8/17/2026
Kelly	Roepke-Orth		Merged Document	2	Yes						Yes					8/17/2026
Emily	Dodson	While this may be a revised plan after previously denied plans were found to use excessive state resources while causing significant ecological harm, this new proposal still uses our already scarce state resources at a significant cost to our people and our environment. It also proposes use of a system that has no evidence of being effective on this scale. I whole heartedly oppose this proposal. Our state is already dealing with extremely scarce water resources, and this would worsen our situation. It would also create more harmful emissions than our state's three largest cities combined. Additionally, the cost is largely on our citizens (including the state's voters and taxpayers!) with profits coming not back to the citizens impacted, but to the companies needing our land and resources. In other states where these data centers have been erected, citizens have seen degradation of their environment, damage to their property or property value, increased scarcity of resources (especially water), increased water and electric bills, and no quantifiable or qualitative benefits to the addition of these centers. There is no benefit to New Mexico and negligible benefit for Dona Ana county at large if this is approved. In fact, those negligible benefits are negated by the amount of harm this would cause. Approval of this proposal would not only be irresponsible, it would be morally reprehensible. I strongly urge those in power to think of those with minimal to no power when making their decision. I urge you to think about those of this this will harm and the harm it will cause for Dona Ana county and our state. I urge them to vote against this proposal. Thank you for your time and consideration of this statement.	Merged Document	1	No		No	Support Non-Substantive								8/17/2026
Logan	Monroe	Dear NMED staff, My name is Logan Monroe. I am a New Mexico resident, living in Santa Fe New Mexico, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. New Mexico is my home. It is a place where our environment is top priority. Project Jupiter would be a detriment to our land. We don't need data centers in New Mexico. Ai data centers have no benefit to the residents of New Mexico. Everything AI can do we were able to do less than a year ago. It is a pointless and harmful technology that will hurt our environment. While tech companies want us to think will be left behind without the technology THEY are trying to sell us, we know that's a lie. As stated before everything AI can do we can do. There is no need or benefit. Our concern shouldn't be project Jupiter, it should be the future of the next generation of New Mexicans. A land of enchantment where there is clean air and clean water. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants • This technology generates toxic waste, and the process for handling this waste is still unclear. • Fuel cell technology has never occurred at this scale. • Surrounding communities' air will be negatively impacted by this development.	Merged Document	2	Yes				Yes	Yes	Yes					8/17/2026
Jackson	Shirley	This data center would more than double the energy usage and pollution already generated by major cities in New Mexico. With its already dry landscape, New Mexico cannot afford to lose more water. Just a few weeks ago there were families on the reservations struggling to find water because they could not use their wells. If a data center is put here it will put peoples lives at risk, taking away their water and our land. New Mexico is a great place and we work hard to reduce pollution and keep our environment clean. I don't want to see my, and the rest of the state's, efforts erased because of corporate and technological greed.	Merged Document	1	No				Yes	Yes	Yes		Yes		Yes	8/17/2026
Gabrielle	Villavicencio	Dear NMED staff, My name is Gabrielle Villavicencio. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. Project Jupiter will put our air quality and water supply at risk and put a strain on our energy grid. Reject these permits!	Merged Document	1	No				Yes		Yes					8/17/2026
Cynthia	Archuleta	I am do NOT want the application for Yucca infrastructure to go through for Project Jupiter! I am asthmatic and moved here for the air quality. They will still be using natural gas and an unknown amount of emissions will still be emitted long after these developers have left. We, the taxpayers, have not been given a voice, and I strongly urge you to NOT approve this. We don't want it!	Merged Document	1	No				Yes	Yes	Yes					8/17/2026
Gurumustuk	Khalsa	A few grounded points I worked into the comment: the NMED notice identifies this as **Permit No. 10883** for a microgrid about **3.6 miles south of Santa Teresa**, and says it would be a **major Title V source** powered by natural gas fuel cells. NMED's own notice lists estimated annual emissions including **37.2 tons NOx, 124 tons VOC, 75.4 tons PM10, 75.4 tons PM2.5, and more than 75,000 tons CO2e**. ([NMED Services][1]) The official Project Jupiter website says the campus includes **four data centers** and claims closed-loop cooling, no ongoing cooling water use, and $50 million for local water systems. ([Project Jupiter Together][2]) But reporting has raised serious questions about the difference between **potable** and **non-potable** water commitments, and whether total water use has been clearly disclosed or enforceably limited. ([haussamen.com][3]) This is happening as the Rio Grande system is under severe stress: Reclamation reported one of the lowest snowpacks on record, most Rio Grande/Rio Chama reservoirs below 15% capacity, and possible Elephant Butte decline to about 2% by late August if monsoons do not help. ([Bureau of Reclamation][4]) Elephant Butte is listed at **8% full as of June 11, 2026**. ([Water Data For Texas][5]) Here's a strong ready-to-submit version: I am writing to strongly oppose the Yucca Growth Infrastructure, LLC / YGI Microgrid Air Quality Construction Permit Application, Permit No. 10883, connected to Project Jupiter in Doña Ana County. This project should not be approved. New Mexico is already living through a water crisis, and it is irresponsible to move forward with massive AI/data center infrastructure that will place more pressure on our water, air, land, wildlife, and communities. The Rio Grande is already drying. We are seeing record-low snowpack, shrinking reservoirs, increasing reliance on groundwater, and worsening drought conditions year after year. This is not an abstract future problem. It is happening right now. The river is already under stress before summer has even fully begun. The water that remains supports people, farms, wildlife, habitat, cultural lifeways, and the long-term survival of communities across New Mexico. Against that reality, Project Jupiter is asking New Mexico to accept more industrial development, more natural gas use, more air pollution, and more unanswered questions about total water demand. The public has not been given clear, enforceable assurances about the full water footprint of this project, including non-potable water, construction water, cooling-related water, maintenance water, and the indirect water impacts tied to the energy system. Calling water "non-potable" does not make it unimportant. In New Mexico, all water matters. Groundwater, brackish water, agricultural water, and industrial water are all part of the same larger water reality we are already failing to protect. I am also deeply concerned that this air permit is being considered too narrowly. The proposed microgrid exists to serve the larger Project Jupiter data center campus. It should not be evaluated as if it were separate from the massive data center development it enables. The public deserves a full, independent, cumulative review of the entire project, including air emissions, greenhouse gas emissions, water use,	Merged Document	2	No					Yes	Yes					8/17/2026

Samantha	Stotz	Dear NMED, My name is Samantha Stotz. I am a New Mexico resident, living in Truth or Consequences, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Across the country, AI data centers are causing harm to rural communities. They poison the environment, poison the water, create noise pollution, and even use precious resources. New Mexico should heed these warnings. We do not need any more stresses on our delicate desert environment! Why should we allow this Corporation to use our precious resources, especially our water? The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Samantha Stotz	1		No															
Suzanne	Valentine	Every time this company and Project Jupiter changes their name or claims of what effect their activity would have on New Mexico, they become more obvious in their disdain for the people of this state. I see their AI advertisements on tv where they show a river full of water, supposedly the Rio Grande. But anyone who lives in the state knows there is currently NO WATER in a majority of the river. They lie in their ads, they lie in their claims, they lie about what the data center will bring to New Mexico. Approving these new attempts at duping New Mexicans into thinking it's clean energy would show that you, as elected officials, care more about getting money in personal bribes than you do about your constituents and the longevity of our state and environment. Listen to the people who are opposing this. Pay attention to all the places around the country placing moratoriums on building data centers because they cannot be proven harmless. Stop listening to false claims about bringing jobs and remember that having a job is meaningless if you can't live in the state because of environmental damage.	Minimal Document	1		No				Yes	Yes	Yes		Yes		Yes	8/27/2026
Serena	Nickell	Dear NMED staff, My name is Serena. I am a New Mexico resident, living in Santa Fe, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. We are districting the little areas that still have forest and land. Where are animals supposed to go? Where are we supposed to come/earth nature? What happens when we run out of water? The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Serena	Minimal Document	1		No				Yes		Yes					8/27/2026
Kaylee	Romero	Dear NMED staff, My name is Kaylee Romero. I am a New Mexico resident, living in the east mountains of Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a mother, a holistic practitioner and a person who genuinely cares to better the health of my community and the land that I was born onto to protect. I am concerned that the irreversible health and land damage already happening in other states is going to spread to this sacred and vulnerable land, jeopardizing countless years of preserved history, and culture, take years of health and potentially wipe the future of the children that are currently being raised in this state. Our future generations. The project's proposed fuel cell powered grid is concerning for many reasons: •It would still produce a high level of greenhouse gas and toxic pollutants •This technology generates toxic waste, and the process for handling this waste is still unclear. •Fuel cell technology has never occurred at this scale. •Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Kaylee Romero	Minimal Document	1		No				Yes	Yes	Yes		Yes		Yes	8/27/2026
Aeshna	Bardwell MD	I am a physician and am worried about the environmental damage that will be incurred by Project Jupiter that will not be limited to the people in Doña Ana County but will extend much further. The project developers are trying to address this by shifting to natural gas fuel cells and and a contained water system. However there will be significant heat generated and other projects deal with this by using large fans to get rid of the heat, which produces noise and heat pollution. I have not heard the developers address this problem.	Minimal Document	1		No					Yes	Yes		Yes		Yes	8/27/2026
Todd	Miller	Doña Ana County is starving for innovative jobs and business, I have an Industrial Hygiene-EHS background, and understand the systems. I built similar chemical plants with scrubbers, cogen, bio-capture, rain water management in India, Indonesia, Saudi and other nations. Im amazed at the lack of knowledge of citizens in Doña Ana County, and hate for change. I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,000 project-supported jobs. Furthermore, Project Jupiter has committed $80 million to help repair, upgrade, and improve local water systems; $380 million in direct support for schools, infrastructure, and local services; and $6 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, Todd Miller	Minimal Document	1		No				Yes		Yes		Yes			8/27/2026
Alexander	Wollack	Issues with Air Permit Massive greenhouse gas pollution Project Jupiter's power plant will release up to 10 million tons – 20 billion pounds – of climate-warming greenhouse gasses every year. This will make a mockery of our climate goals, and erase much of the climate progress we have made in the last few decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The entire El Paso Electric grid is about 2,900 megawatts, while the entire PNM grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. El Paso Electric CO2 pollution: 3,139,379 tons (2020)[5] PNM CO2 pollution: 9,296,705 tons (2022)[2] Jupiter is proposing to emit more greenhouse gases than El Paso Electric and PNM combined. Jupiter is not using carbon capture or any technology to reduce greenhouse gases from the fuel cells. Uncertainty in pollution numbers Fuel cell technology has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. The Application is based on pollution testing from a very small unit. The testing unit is only 65kw, while the power plant is 37,000 times that size. The tests took place in 2024 for three 4-hour tests.	Minimal Document	2		No				Yes		Yes					8/27/2026
Leyla	Porras	The consulting firm that prepared the air application added 10% "safety margin" to the emissions numbers. This is not generally something that a consultant would do if they were confident with the pollution To whom this may concern, Project Jupiter will detrimentally hurt the environment of New Mexico. New Mexico has a diverse landscape that is already struggling through a drought. Water in NM does not need to be wasted on a ridiculous center that is there to collect the data of New Mexicans and not provide anything positive to the people of NM. Water is a precious resource to NM and if anyone deserves the water in NM, it's New Mexican farmers not a data center. STOP SHOVING AI IN OUR THROATS. Water is a finite resource that shouldn't be wasted on something as silly as AI. We have already seen the awful things that AI is doing to our youth, our environment and the truth that the people have in our government.	Minimal Document	1		No					Yes	Yes	Yes	Yes	Yes		8/27/2026
Ann	Montoya	I live closer to Santa Theresa than down town El Paso. I urge you to hold an open public meeting about air quality. This border area will become so toxic it will be worthless. You know our air quality is very very poor at times. Dont succumb to the lure of money. This is corporate wealth v citizen health. The environment is already suffering, dont allow Jupiter to make it so much worse. This toxic air moves all over. Combine this with the gas turbines they will build in EIP for Meta.	Minimal Document	1		No				Yes		Yes					8/27/2026
Madeline	Rappaport-Blackjewska	I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa	Minimal Document	1		No					Yes	Yes			Yes		8/27/2026
Anslee	Gutierrez	New Mexico is my home, I've lived here my whole life and is now raising my child in the same home I've loved. We have no guarantee that these data centers won't be harmless in the long run especially to our already limited water. Please don't agree to building one here, let these billionaires build one on a private island of which they probably already own. Or perhaps somewhere they can monitor and make sure like a their own neighborhood. There's no need to have such greed to get ahead technology if it means damaging our environment in the process.	Minimal Document	1		No					Yes	Yes		Yes		Yes	8/27/2026
Olivia	Romero	Water cannot be used for an AI data center that we ourselves barely have in a drought stricken state!! Where is your accountability??	Minimal Document	1		No				Yes		Yes					8/27/2026
Maya	W.	In regards to permit no. 10863: The absolute last thing we need is more pollution and less water and that's all the YGI microgrid will bring. Yucca Growth Infrastructure is not welcome in New Mexico. I implore you to hold a public hearing on this matter, so the public can make that clear.	Minimal Document	1		No				Yes							8/27/2026
Lucy	Binstead	This latest change by the minds behind Project Jupiter is still very much NOT what the people of New Mexico want. Switching to fuel cell technology does not change the outcome for our state and its people. Poor air quality and toxic waste which ruins our dwindling water supply to the future for us if we allow Project Jupiter to get a foothold in our precious Land of Enchantment. Make the right choice and be the voice of the people. We need a moratorium on data centers in NM!	Minimal Document	1		No				Yes		Yes			Yes		8/27/2026
Bryanna	Hutchinson	Dear NMED staff, My name is Bryanna Hutchinson I am a New Mexico resident, living in Rio Rancho but grew up in Taos and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I was born and raised in Taos, New Mexico. I am 26 years old and have already seen the negative effects of climate change in New Mexico since I was a child 30 trees. To have something built that has so much uncertainty to what it will do to our land and has already been denied by our communities in Dorgan I feel like there needs to be transparency of this situation. What happened to the public hearing the state Air Quality Bureau recommended on the previous applications that the industry has since redacted? NMED should not overlook the overwhelming community concern expressed in the last public comment period, which still applies to this same project. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel	Minimal Document	2		Yes				Yes	Yes			Yes			8/27/2026
Robert	Walsh	I am against this project because of the eventual water usage which will impact all residents and agriculture.	Minimal Document	1		No				Yes	Yes	Yes		Yes		Yes	8/27/2026
Katelynn	Ruspoli	Dear NMED staff, My name is Katelynn. I am a New Mexico resident, living in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a life-long local resident and have decided to raise my family here, we already have an abundance of issues in our state and approving a data center that will require 1 millions gallons of water per day of water we already don't have is reckless. Seeing the lack of flowing water in the Rio Grande for such a long period of time and our ever shrinking water levels in the lakes should be evidence enough, but the to add a data center that will produce more air pollution than 3 of our major cities combined seems you would be signing a death sentence for our ecosystem and environment, wild life, plants, and people alike. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated	Minimal Document	1		No				Yes		Yes					8/27/2026
Matthew	Mendez	Dear NMED staff, My name is Matthew. I am a New Mexico resident, living in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a life-long local resident and have decided to raise my family here, we already have an abundance of issues in our state and approving a data center that will require 1 millions gallons of water per day of water we already don't have is reckless. Seeing the lack of flowing water in the Rio Grande for such a long period of time and our ever shrinking water levels in the lakes should be evidence enough, but the to add a data center that will produce more air pollution than 3 of our major cities combined seems you would be signing a death sentence for our ecosystem and environment, wild life, plants, and people alike. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated	Minimal Document	1		No				Yes	Yes	Yes		Yes		Yes	8/27/2026

Laura	Cardenas	Dear NMED staff, My name is Laura Cardenas. I am a New Mexico resident, living in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I love my community and have bren looking forward to buying a house and settling a family here. However, these data centers make me worry that buying a house here is now a bad investment as it will decrease in value as the quality of life, air, and water decline. The threat of this data center is reason enough to consider not buying or settling in this community. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Laura Cardenas	1		No	[redacted]									
Anastasia	Walhovd	Please deny this permit. The amount of emissions for this permit will dramatically effect in a negative way human health and environment health. Air quality in this area of the state is already some of the worst in the entire United States and I cannot from a moral standpoint or a scientific standpoint accept any project that will make air quality worse here. Additionally, Ysleta del Sur Pueblo, the Piro-Manso-Tiwa, Tortugas Pueblo, the Chiricahua Apache, and Mescalero Apache all merit having a significant seat at the table for consultation on this project. Additionally, I raise concerns about the use of Bloom fuel cells to power this project. These types of fuel cells have never been used at this enormous of a scale before. I am concerned that there will be unexpected air quality and environmental impacts due to the use of fuel cells that cannot be anticipated at this time. This would make New Mexico land and New Mexicans a lab rat for testing by this company. This is morally outrageous to me. Please deny this permit. At minimum, please hold a public hearing for this air permit. Thank you for your consideration of my comment, Anastasia Walhovd	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes		Yes	8/17/2026
dhaval	shah	This project will affect not only the air quality but the health of thousands of people living in the community. For which this project should not be proceeded with.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Miss April	Nastasi	Public Comment – Air Quality Construction Permit Application 10883 Yucca Growth Infrastructure LLC (YGI) Microgrid To the New Mexico Environment Department Air Quality Bureau, My name is April Tina Nastasi, and I am a resident of New Mexico submitting this comment regarding Air Quality Construction Permit Application No. 10883 for Yucca Growth Infrastructure LLC (YGI) Microgrid, associated with the proposed Project Jupiter development in Doña Ana County. I am submitting this comment in opposition to, or requesting significant revision of, the proposed permit based on concerns related to cumulative air quality impacts, infrastructure expansion, and environmental burden on surrounding communities. This proposed permit involves large-scale energy generation infrastructure intended to support a data center development. While the application must be evaluated under the Clean Air Act and applicable New Mexico air quality regulations, I am concerned that the cumulative emissions and associated infrastructure impacts have not been fully evaluated in the context of regional development and existing environmental stressors. Specifically, I request that the Department carefully evaluate: Cumulative Air Emissions Impacts The combined emissions from proposed microgrid generation sources, in addition to existing and planned industrial development in the region, should be fully assessed to ensure compliance with both federal and state air quality standards. Industrial Load Growth and Infrastructure Expansion The permit should clearly account for whether emissions and impacts are driven by large-scale industrial users, including data center development, and whether those impacts are being appropriately mitigated at the source rather than shifted to surrounding communities. Environmental and Community Burden Rural and residential communities should not disproportionately bear environmental impacts associated with large industrial energy demands, particularly where infrastructure expansion is required to support those loads. Transparency and Adequacy of Analysis I request full transparency regarding emissions modeling, assumptions regarding future load growth, and any cumulative impact analysis associated with this project. I respectfully request that the Department ensure that this permit complies fully with the requirements of the Clean Air Act, New Mexico air quality regulations, and that it adequately evaluates cumulative and long-term impacts before any approval is granted. Thank you for your consideration. Respectfully submitted, April Nastasi	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
Barbara	Wisoff	No Data Centers in New Mexico. The so called "Job Fair" is a gaslighting avoidance of accountability and transparency to push through the Jupiter Project data center despite repeated protests by New Mexicans. Data centers usurp our scarce water supply. Promises of closed loop systems are lies. Fuel cells and gas turbines both use too much water for cooling to be allowed to use up New Mexico's water. There are no water treatments that work for fracking waste. Desalination has problems too, due to abandoned wells leaking and corrupting desalination lines and underground water. This is besides the point. In a water scarce desert region, no polluting data centers should ever be allowed. Data centers are part of a surveillance scheme that also pollutes and enriches the developers and private equity entities while harming the land, the air, the water and the health of New Mexicans. They are a Ponzi scheme built on lies to serve the greedy billionaires and downstream officials eager to grift from their build.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	8/17/2026
Shelley	Alonso-Marsden	As a NM resident, I'm very concerned about the environmental impacts of Project Jupiter, which I don't think will have economic benefits commensurate with the severe environmental costs.	1	Merged Document	No	[redacted]			Yes		Yes	Yes		Yes	8/17/2026
Linda	Sperling	The people of Dona Ana County cannot "drink data" nor can they breathe 10.1 million tons of emissions and remain healthy. The strain on water resources that Project Jupiter will bring will diminish the quality of life for all residents of Dona Ana County and will negatively impact the water resources of the rest of New Mexico. The promise of 4,000 construction jobs (all temporary) and a mere 1,500 "permanent" jobs does not justify the extent of environmental damage that will result from allowing this project to go forth. There were promises made years ago to the residents of Carlsbad that WIPP would help their economy -- it has only served to increase the number of cancer patients in the region. New Mexico does not need a data center that sucks up so much precious water and taints so much precious air. Reject the appeals from profiteers to build Project Jupiter or anything like it.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive			Yes				8/17/2026
Abbey	Henley	As a New Mexican homeowner and true lover of the outdoors, this is an extremely detrimental situation to bring to the picture. This Data Center is being put into a severely overburdened and drought ridden state, surrounded by people who have had to live for decades with already poisoned air/water/soil and the health effects of all of the aforementioned. This world does not need more Data centers. The climate is already in such upheaval. You are absolutely ruining the goodness of this beautiful sacred land with your greed and money hunger. This kind of project isn't forward thinking. And the people protesting it are not stupid luddites, either. You should be healing the stressed environment of NM and putting this money towards figuring out how to protect the land, the wilderness, and the people of NM. New Mexico was just listed 50th in education, one of the lowest qualities of life for children, homelessness, animal abuse, crime, and drug use everywhere...and no money to help any of that...but plenty of money to plop a resource hog into the middle of an already strapped community who is struggling? SHAME ON YOU. Not one person in NM wants this except the people who are financially benefitting from it and don't have to live beside it. LISTEN TO THE PEOPLE AND THE BEAUTIFUL ENVIRONMENT WHO YOU WILL UNDOUBTEDLY KILL WITH THIS PROJECT. STOP THINKING WITH YOUR POCKETS. DO THE RIGHT THING AND STOP THIS. Please!	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Maria	Cruz	It's disgusting that commissioners are selling out the public for their own gains! We don't need ai or data centers! We are under a drought as it is and to give private entities more of our valuable resources for their stupid centers is absolutely horrendous. They make promises and promises but they don't intent to keep them. More jobs? How if data centers don't need human workers! They lied to people already and now we're supposed to believe them when they say it's not dangerous? They can't prove anything good will come from this except lining their pockets and environmental impacts already say it's bad for people, not just with water usage. But pollution, quality of life and tax breaks they want to built this crab. We don't need a data centers!	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Paulina	Guerrero	Dear NMED staff, My name is Paulina Guerrero and I am a resident of Las Cruces, NM. I am submitting this comment due to concerns about Project Jupiter. I believe this project should not be allowed to be built as it has failed to prove its claims that it will not impact our land and its people. As a new mom, I want to ensure I establish myself in a place that will provide a great quality of life for my family. And I can only imagine all parents feel the same when considering where their children will live, whether it's with them or at college when they're older. I urge you to prioritize our future. Sincerely, Paulina Guerrero	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Alejadnro	Sosa	Dear NMED staff, My name is Alejandro Sosa. I am a New Mexico resident, living in Mesilla, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am born and raised, the lower valley of the Dona Ana county has been to myself and family members for over 50 years. Project Jupiter should not proceed with their mission as it will have a negative effect on all citizens living here in New Meixco. Noting good for our community will come of Project Jupiter. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Alejandro Sosa	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive			Yes				8/17/2026
Chloe	Banegas	This will pollute our air it will take our drinking water because where in the world are they gonna get water in a desert that barely has water for all of us there is zero point for a data center to be built in New Mexico it will harm our people it will harm our land it has zero need being here in anyway please do not allow this data center to continue to be built as has zero use here in New Mexico.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Robert	Leutheuser	By this communication I wish to register my strong recommendation to the NMED that it not approve Yucca Growth Infrastructures' Permit Application 10883 to provide power to Project Jupiter in Dona Ana County. Yucca states that the plan outlined in this application, if implemented would annually generate about 10 million tons of greenhouse gasses per year, as compared to the 14 million tons per year projected in their first proposal. Yucca presents this as a 4 million ton benefit to the public. This is akin to a mobster saying that instead of killing 14 of your family members he will only kill 10, and you should be grateful! Let's tell him he won't kill any! The voracious appetite of the likes of Oracle and OpenAI (Project Jupiter primary investors) building massive data centers, across New Mexico and the entire country, is growing in recognition of their pernicious negative impacts. Project Jupiter and Yucca is such a case. Please do the right thing and deny this appilication. Sincerely, Robert Leutheuser Santa Fe NM	1	Merged Document	No	[redacted]			Yes						8/17/2026
Stephonae	Nelson	I am a life long New Mexican, we say NO TO DATA CENTERS. Water is life, data centers disrupt the environment, residents, and permanently destroy the water supply. Water is a human right!	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
Thomas	Dankwah	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doa Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, Thomas DankwahThomas Cook Jefferson Dankwah Executive Director Jefferson Intelligent Network Enterprise Ghana [Subsidiary of Hanssen Global UK and Ghana Ltd B&FT Lead Strategic Partner Media and Press Ghana, Microsoft Partner Network, AI Africa Project Knowledge Web Center Ghana Ltd, Allianz Insurance Strategic Lead Partner , World Economy Forum, Accenture, IBM, Amazon, Google, Nvidia, KPMG, Deloitte, EY, PWC Strategic Lead Partner Globally.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Mentaunkhtikes	Williams	Dear NMED staff, My name is Mentaunkhtikes Williams. I am a New Mexico resident, living at zip code 87123, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a biology major at UNM and I've been living in New Mexico for about 3 years now. When I took ecology, I learned how precious—but threatened—all of our ecosystems and natural resources are. I've seen, heard, and felt the fear of watching the deteriorating state of the Rio Grande and the irregular changes in temperature and weather we see with each season. To see how wasteful and resource-consuming A.I mega data centers are and to think that even just one is being welcomed here makes me sick with dread. The project's proposed fuel cell powered grid is concerning for many reasons: * It would still have a high output of greenhouse gas and toxic pollutants * The tech produces toxic waste and the Yucca's process for handling said waste is unclear (this is especially concerning considering Bloom Energy, which will be providiing the fuel cells, was fined twice in the same year, 2020, by two different states, PA and MD, for improper hazardous waste handling) * Fuel cell technology has never occurred at the scale being proposed for Project Jupiter. It is 1000 times larger than the largest existing Bloom fuel cell installation. * Most alarmingly, surrounding communities' air and health will bear the environmental consequences of this insidious project. Santa Teresa Elementary and High School are located within five miles of the site of Project Jupiter. 96% of students at the high school are hispanic. Several tribal governments, like Tortugas Pubelo and Yselta del Sur, have landholdings in Doña Ana county and they haven't been properly notified of the application request. This is blantant environmental injustice, children will be caught in the crosshairs, and it needs to stop. The NMED must outright reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. If you do not reject the permit, please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology and decide for themselves whether they want this planted in their home. Sincerely, Mentaunkhtikes Williams	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Susanna	Ross	The public deserves a full hearing. Environmental justice matters. Water matters. Public health matters. Climate impacts matter. Seven thousand previously submitted comments should not be erased by a revised application. Project Jupiter did not become less significant because the paperwork changed.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Xochil	Moreno Perez	Do not grant any permits that allow the construction of any type of AI Centers. This community does not need any type of center that will waste our natural resources such as water and energy, and that will only grant a few jobs and opportunities while it's being constructed but once finalized will only need between 50/500 employees to operate while using millions of gallons of water and negatively impacting our power grids by their excessive consumption of energy to operate. This community wants to preserve our land, water and energy intact for our future generations to enjoy, not for computers to destroy.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Ivan	White	This is not an unreasonable request. Before any large data center is approved in Las Cruces or Doña Ana County, residents deserve clear answers about water consumption, electrical demand, impacts on our aquifer, effects on agriculture, environmental consequences, and the true costs and benefits to taxpayers. Economic development matters, but so do transparency, public input, and responsible stewardship of our limited water resources. Asking questions is not being anti-growth; it's being a responsible community. No final approvals should be granted until the public has access to independent studies and a meaningful opportunity to review the facts.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Karen	Boehler	In no way is this a "new" project. The "new" permit still relies on natural gas. The "new" permit still proposes massive industrial infrastructure in southern NM The "new" permit still carries significant environmental consequences. This is a wolf in sheep's clothing. Do NOT approve it.	1	Merged Document	No	[redacted]			Yes		Yes			Yes	8/17/2026
				Merged Document		[redacted]	No	Oppose Non-Substantive			Yes				8/17/2026

Sarah	Holliday	Please do not allow the permanent destruction of this land, (or any land for the matter), to build data centers in NM. Data centers create short term construction jobs (NOT long term jobs of any type), they create noise pollution, they waste precious water and power intended for use by each of us. We need serious, and effective regulation for these centers (in addition to AI itself), as well as proof of necessity, before we allow another chapter to be written in the history of NM showing how we poisoned our planet and ourselves.	1		No																		
Jacquelyn	Hello	I am opposed to the construction of Project Jupiter. New Mexico does not have the necessary water for data centers in any corner of the state, but particularly not in Dona Ana county. Furthermore as a concerned citizen, I am in favor of a moratorium on all AI centers until we have political and economic guardrails in place for the - as yet, unaddressed and unintended consequences - of AI on society. Please do not approve this project.	Mirrored Document 1		No						Yes	Yes	Yes		Yes								8/27/2026
Julie	Tumbley	RE: Public Comment Opposing Approval or Requesting Full Evidentiary Review & Analysis; Yucca Growth Infrastructure, LLC (YGI) Microgrid Air Quality Construction Permit Application 10883 To the New Mexico Environment Department I submit these comments in strong opposition to approving the air quality permit for the Yucca Growth Infrastructure (YGI) microgrid serving the Project Jupiter AI data center in Doña Ana County unless substantial additional analysis, disclosure, and enforceable safeguards are required. Project Jupiter was initially presented as a massive AI data center powered by gas turbines and diesel generators. The developer now proposes a "new" energy model centered on Bloom Energy fuel cells and describes this as a cleaner, lower-emissions alternative. While the technology has changed, the fundamental environmental concerns remain unresolved. First, the proposed fuel-cell system should not be treated as inherently clean simply because it reduces combustion-related NOx emissions. Bloom fuel cells still rely primarily on natural gas, meaning the project remains dependent on fossil fuel extraction, processing, and pipeline delivery. This shifts pollution upstream rather than eliminating it. Methane leakage throughout the natural gas supply chain must be accounted for. Because methane is a potent greenhouse gas, even relatively small leakage rates can erase much of the claimed climate advantage of gas-based fuel cells. The permit review must therefore evaluate full lifecycle emissions, not just onsite stack emissions. A narrow focus on local NOx reductions risks obscuring the project's total climate impact. Second, the applicant's claims regarding "closed-loop" cooling and minimal water use require much closer scrutiny. Project Jupiter states that the data center will use a closed-loop, non-evaporative cooling system requiring only a one-time fill of non-potable water, with top-offs. This framing is misleading because "closed-loop" does not mean "water-free." Any industrial cooling system operating in southern New Mexico's extreme heat will experience: thermal inefficiencies, fluid degradation, maintenance losses, leaks, and replacement requirements over time. The public deserves transparent, enforceable estimates for: Initial fill volume Annual makeup water requirements Water losses during maintenance and equipment replacement Water needs associated with the fuel-cell microgrid itself Worst-case water demand during heat waves or prolonged peak AI workloads The region is already experiencing long-term aridification, drought, and increasing water stress. Even non-potable water has ecological and economic values in the desert Southwest. Using "non-potable" as reassurance avoids the more important question: Where exactly will this water come from, and what competing uses may be displaced? Third, this permit appears to evaluate the microgrid in isolation rather than considering cumulative impacts. Project Jupiter is not a typical industrial facility. It is among the largest AI infrastructure developments proposed in New Mexico and part of a broader wave of hyperscale AI buildout across the Southwest. These facilities create redundancy energy demand, often requiring dedicated power generation that effectively functions as a private utility for a single corporate use. This raises a critical policy question about [illegible]	Mirrored Document 2		No						Yes												8/27/2026
Elaine	Cimino	Please see the attached 79-page public comment report regarding the Yucca Growth Infrastructure (YGI) Bloom Energy permit application for Project Jupiter. The attached report incorporates technical analysis, public records, environmental justice findings, water resource concerns, greenhouse gas emissions analysis, hazardous waste issues, cumulative impact review, public financing records, and prior Project Jupiter research previously submitted during related proceedings. The report includes that the proposed permit raises significant unresolved concerns regarding air quality, climate impacts, water demand, aquifer protection, environmental justice, hazardous waste management, cumulative impacts, and long-term infrastructure commitments. Based on the information presented in the attached report, I respectfully requested that NMED: 1. Deny the permit application; or 2. Require substantial additional environmental review and analysis before any permit decision is made; and 3. Hold a formal public hearing with meaningful opportunities for public participation. I requested that the attached report and all appendices be entered into the administrative record and considered in their entirety as part of this proceeding. Submitted by: Elaine Cimino Director, Common Ground Rising Community Advocacy	Mirrored Document 77		Yes						Yes	Yes	Yes	Yes	Yes		Yes						8/27/2026

Dylan	Pommier	The people of New Mexico do not want a disgusting AI data center in our state. It is heartbreaking to wake up in the dystopian future where rich people are trying to destroy the environment so that people can applaggy fillers to their profile pictures. AI is a horrible technology, and we should not compromise our water and air quality in order to serve an immoral company like Oracle. We do not want higher energy bills, we don't want smaggy jet, and we don't want some creep like Larry Ellison ruining our state. The economic numbers they like to push are usually only for the construction of the center. Once it's built, the number of employees usually drops to below 100. There are no jobs to be had, that's just propaganda. We've seen this exact same rollout in other states, we know how it ends. AI is a bubble, made very clear by the huge stock-marketdrop last week when OpenAI went public. It was revealed that AI doesn't make very much revenue, so suddenly a bunch of other AI-adjacent companies like Nvidia lost billions in value. When it crashes, we are going to left with a big ugly deserted building that made the lives of New Mexicans worse. AI is a fueled technology, it won't bring any jobs, it will drive up energy costs, it will pollute the state, and Oracle is a disgusting immoral company. There are no positive elements to this project.	Mirrored Document 1		No	No	Support Non-Substantive			Yes												8/27/2026
Mia	Mariutto	We do not need data centers in New Mexico. Anyone who has children and is invested in ensuring that they have livable BREATHABLE air for the future would be against this. We are ruining the quality of life that everyone who is a future or current member of the community would have. Air pollution is ruining our earth and to be allowing this data center to be built and possibly emit more pollution than Albuquerque, Santa Fe and Las Cruces combined is deplorable.	Mirrored Document 1		No						Yes	Yes	Yes										8/27/2026
Lauren	Kelley	As a New Mexico resident and former NMSU student, I strongly oppose the initiative of Project Jupiter. The harmful impact of this project cannot be mitigated by the "promises" made to retain resources or create jobs. The long term implications from emissions and water depletion are obvious, astronomical, and threaten the agricultural integrity of our state. The potential use of 5 million gallons of water a day and more emissions than Albuquerque, Santa Fe and Las Cruces have the potential to decimate our already dry desert eco system. Water is a vital resource for human sustainability, agriculture, wildlife, and commerce. These data centers are irresponsible and unethical in their environmental impact. These are the kinds of investments that will hurt citizens on an individual, community, county, state, and country level for years to come. I strongly urge the New Mexico Environment [illegible]	Mirrored Document 1		Yes																		
Elizabeth	Hilsenkamp	Dear NMED staff, My name is Elizabeth Hilsenkamp. I was born and raised in Santa Fe, New Mexico, and I am a grad student, pursuing a PhD in Astrophysics. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Growing up in New Mexico, I feel deeply connected to the beautiful land here. It is absolutely essential that we protect the lands, waters, and people in this special place we call home. The growth of AI infrastructure necessitates extreme caution with who we allow to make use of these lands and waters, especially when projects are clearly designed to take from the land and people without concern for us. The project's proposed fuel cell powered grid is concerning for many reasons: It would produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Beyond the toxicity risks, the proposed project will use unfathomable amounts of water — water that we don't have. This is a decision between the greed of large companies and the livelihood of people in our communities. Please make the right choice. Sincerely, Elizabeth Hilsenkamp	Mirrored Document 1		No						Yes	Yes	Yes										8/27/2026
Gabrielle	Seeman	New Mexico is already a very dry area with little water. Adding an AI data center could easily worsen this and would be completely unnecessary. I strongly believe that we don't need anything AI here.	Mirrored Document 1		No						Yes	Yes	Yes		Yes		Yes						8/27/2026
Caleb	Ross	I am opposed to Project Jupiter and urge the New Mexico Environment Department to carefully consider its long-term impacts before approving additional permits. New Mexico already faces serious challenges with water availability, and I am concerned about the amount of water a massive data center project could require over its lifetime. Once these resources are committed, local communities may be left dealing with the consequences for decades. I am also concerned about the project's energy demands and potential air pollution. Even with proposed changes to the power plan, this development would still require an enormous amount of energy and industrial infrastructure. The environmental costs should not be overlooked simply because the project promises economic benefits. In addition, I worry that local residents will bear the risks while large corporations receive most of the rewards. The state should prioritize protecting our natural resources, public health, and future water security before approving projects of this scale. New Mexico's environment is one of our greatest assets. I believe the state should take a cautious approach and require thorough review and public accountability before allowing this project to move forward.	Mirrored Document 1		No						Yes												8/27/2026
Ramona	Stockton	Hello, I am concerned with the construction of this type of center in general. But given the access to funding the Parent company Bloom energy has, it calls into question the ease of accessing a lot of information regarding the companies actual reputation. With some stating Bloom has a history of lying or misleading investors. When initially looking into this The main articles shown are by Bloom themselves. Which is ironic since the work in bottom with an AI company. How do we know are real rep. has provided an informed response or a simple AI prompt response. All this too say if the claims of Bloom lying about emissions and mismanagement of funding prove to be true, us as New Mexicans will experience nothing but damage to our environments and economy by this construction.	Mirrored Document 1		No						Yes												8/27/2026
Jane	Klingbeil	I oppose this due to the massive negative environmental impact. I do not believe they should be building a data center that requires so much water in a desert trying to preserve water that is already subject to droughts. We have seen examples of the right air and water pollution caused by these data centers and other cities. we should not let this happen we dont need AI we need water!	Mirrored Document 1		No							Yes	Yes									8/27/2026
Dolores	Klingbeil	I am against this project Please do not grant the permit. New Mexico in and and has a limited water supply. These projects are detrimental to the entire environment of New Mexico.	Mirrored Document 1		No						Yes		Yes										8/27/2026
Susan	Barns	Since this new permit still allows for the emission of ~10 million tons of greenhouse gases, and tons of VOCs, operation of this plant will clearly negatively impact air quality and our States Net Zero goals. DO NOT APPROVE permits for this project until they can demonstrate ZERO GHG and other pollutant emissions. Thank you!	Mirrored Document 1		No						Yes		Yes										8/27/2026
Jerry	Pacheco	ear Air Quality Bureau Leadership, On behalf of the Border Industrial Association (BIA), I am writing to express our support for the air quality permit application submitted by Yucca Growth Infrastructure, LLC for the proposed fuel-cell-based microgrid power generation facility near Santa Teresa, New Mexico. The BIA represents more than 135 industrial and logistics-related employers operating throughout southern New Mexico. Our mission is to promote the development of New Mexico's border region while recognizing that strong environmental and public health protections are essential to attracting new investment and recruiting top talent. From this perspective, we appreciate the careful and comprehensive regulatory review applied to this proposed facility. The proposed microgrid is designed to provide dedicated, on-site power exclusively for Project Jupiter, a significant data center investment in the Santa Teresa region. This system utilizes solid-oxide fuel cell technology, which generates electricity through a nonconbustion electrochemical process. Project Jupiter represents a major economic development opportunity for our community, bringing substantial private investment, construction activity, high-quality technical employment, and long-term tax base growth. Data center projects of this scale strengthen the region's position in the digital economy and reinforce southern New Mexico's role as a competitive location for large-scale infrastructure investment. The BIA strongly supports Project Jupiter and recognizes the importance of reliable, purpose-built energy infrastructure to the successful operation of modern data centers. We view the proposed microgrid as a necessary and integral component of this project, subject to appropriate environmental oversight and regulatory compliance. We understand that the air permit application includes detailed emissions analyses and air dispersion modeling that evaluate potential impacts under worst-case operating conditions. Based on the materials submitted, modeled pollutant concentrations remai[illegible]	Mirrored Document 2		Yes								Yes	Yes	Yes	Yes							8/27/2026

Davin Lopez	Davin Lopez	I am writing to express my organization's strong support for Project Jupiter. MVEDA, as a nonprofit economic development organization that has served Doña Ana County for more than 30 years, we view Project Jupiter as a once-in-a-generation opportunity for our region and the State of New Mexico. This project represents far more than economic growthit positions southern New Mexico as a leader in attracting the next generation of advanced technology, integrated electronics, and computerized supply chain industries. Project Jupiter promises a substantial economic impact. The project is expected to create approximately 4,000 well-paying construction jobs, followed by 1,500 permanent project-supported positions. These jobs will generate significant local spending, benefiting businesses throughout our community, particularly the small businesses our organization works with every day to help grow and remain competitive. In addition, Project Jupiter's commitment to investing millions of dollars in Doña Ana County's schools, infrastructure, and public services will strengthen the foundation of our local economy, helping employers attract and retain talent while improving quality of life for residents. Importantly, we are already seeing the positive effects of this project. Five companies within the construction supply chain have recently located in Santa Teresa, absorbing more than 500,000 square feet of previously vacant industrial space, nearly 10 percent of the area's total industrial inventory. Several existing companies have become Tier 2 suppliers to the national data center components industry. Our organization is also currently working with three companies evaluating Doña Ana County for expansion and relocation opportunities directly tied to the data center supply chain economy. These investments and opportunities would not be occurring without Project Jupiter. On behalf of our Board of Directors, which has formally voted to support Project Jupiter, I respectfully urge the New Mexico Environment Department to approve this project. Doing so will allow southern New Mexico to realize the economic growth, job creation, and long-term prosperity that our communities have worked toward for many years. Thank you for your consideration. Sincerely, Davin Lopez President & CEO, Mesilla Valley Economic Development Alliance (MVEDA).	Merged Document	1	No	[redacted]					Yes	Yes				6/17/2026
Davin	Lopez	As a resident of Doa Ana County, and a generational New Mexican, I am writing in support of Project Jupiter. Like many New Mexicans, I left the state after graduating from high school because the opportunities I was looking for simply were not here. Fifteen years later, I returned because New Mexico is home. I wanted to build my life here, but like so many others, I still faced the reality that too many of our young people leave in search of careers elsewhere. For as long as I can remember, governors and community leaders have talked about one of New Mexico's greatest challenges: we educate talented young people, and then we watch them leave because there are not enough career opportunities to keep them here. Many never return. Project Jupiter gives me hope that we can begin changing that story. It represents the kind of investment that can create good-paying jobs, attract new industries, and provide opportunities for future generations to build successful careers without leaving the state they love. I also appreciate the project's efforts to address community concerns, including its commitment to operate independently from the local power grid and its updated energy approach designed to help protect local air quality. This project is about more than a single investment. It is about creating opportunities so that more New Mexicans can stay, return home, and build their futures here.	Merged Document	1	No					Yes	Yes					6/17/2026
Miriam	Guevara	As a Doña Ana County resident, I strongly oppose Project Jupiter. Water is one of New Mexico's most precious resources, and it should not be sacrificed for a massive AI data center. We live in a desert. Once the water is gone, it's gone. Please put our communities, farmers, and future generations ahead of corporate interests and deny this permit.	Merged Document	1	No				Yes							6/17/2026
Lena	Bennet	Considering how little water we have here in New Mexico, I don't see how a data center like Project Jupiter will be sustainable here. Not to mention the increased greenhouse gas emissions it will produce. I guess the data center would be sustainable but what about us? What kind of New Mexico will we and future generations have to live in?	Merged Document	1	No				Yes	Yes						6/17/2026
Dawn Vi	Vigil	Dear NMED staff, My name is Dawn Vi Vigil. I am a Tewa woman, high school teacher, mother, and grandmother, and I have lived in the Las Cruces–El Paso (La Frontera) region for over 20 years. My family and students are deeply connected to this land. As an educator, I teach about the Chihuahuan Desert, climate change, and the importance of protecting our limited water resources. Water is essential to all life here, from our native species to our Hatch chile, and it is already under strain. I am concerned that Project Jupiter and the YGI Microgrid in Santa Teresa will consume significant water and energy, produce pollution and toxic waste, and introduce unproven fuel cell technology at a dangerous scale. This project risks harming our air, water, and community health. I urge the New Mexico Environment Department to REJECT the air permit application and to hold a bilingual public hearing near Santa Teresa so local tribal members and Dona Ana county residents can fully participate. Sincerely,	Merged Document	1	No				Yes		Yes		Yes		Yes	6/17/2026
Jacqueline	Rodriguez	I do not support this. I do not want toxic green houses emitted into my community. The communities near the site have not been properly notified and the chihuahua desert borderlands are not a dump site for corporations. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid.	Merged Document	1	No		No	Oppose Non-Substantive								6/17/2026
Carly	Johnston	This permit should be denied for a multitude of reasons. Number one, the county has disregarded the outcry of the community in protest of this project. Two, this will significantly contribute to pollution and global warming in an environment that already suffers from poor air quality and diminishing resources. Three, the land and air is Native property and those relevant communities have not been consulted as sovereign nations. Four, the cell technology is not tested enough to be less detrimental than the original proposition. Five, the company and industry have proven to not be trustworthy and have made a point to create false advertising to lure in support. We the community see through it and adamantly oppose Project Jupiter and any other data or AI centers.	Merged Document	1	No					Yes	Yes					6/17/2026
Michelle	Alba	I am writing to express my support for Project Jupiter, which I believe offers significant economic development as well as community development benefits for our communities in our region. I firmly believe that Project Jupiter is will bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, Casa de Peregrinos Food Pantry in Las Cruces and Sunland Park, clean drinking water, the local Doña Ana Community College, and habitat restoration. I humbly urge the New Mexico Environment Department to approve this important project. The future of our county and state and more importantly our people is in your hands and we need this project to come to fruition. Thank you. Sincerely, Michelle Barragan Alba	Merged Document	1	No				Yes		Yes					6/17/2026
Eva	Gonzales	Thank you for the opportunity to comment on this important matter. Growing up in southern Doña Ana County, I saw firsthand how common it is for families in communities like Santa Teresa, Sunland Park, Chaparral, Vado, Berino, and Anthony to commute to Las Cruces or El Paso for work. My family was no exception. Even though we lived in Santa Teresa, I spent years traveling to school in communities that better aligned with my mother's work schedule because so many opportunities were located outside our immediate area. That experience showed me how limited local job opportunities can be and why projects that create careers close to home matter so much. I am excited about the opportunities Project Jupiter could bring to our region, especially for young people who want to stay in southern New Mexico and build their futures here. I also appreciate that the developers listened to community concerns and made significant changes by moving to fuel cell technology. While every major project involves tradeoffs, it is important that the voices of those who live closest to the project are heard. Many local residents understand both the challenges and opportunities facing our communities, and I believe Project Jupiter represents an important investment in the future of southern Doña Ana County.	Merged Document	1	No								Yes			6/17/2026
Annette	Morales	Re: Docket No. 25-00082-UT To the New Mexico Public Regulation Commission, I am a residential customer of El Paso Electric in Las Cruces, New Mexico. I am submitting this comment in opposition to El Paso Electric's proposed 54% rate increase. According to the customer notice, El Paso Electric is requesting approval of a 50.4% base-rate increase. The notice further indicates that a typical residential customer using approximately 750 kWh during summer months could see a total bill increase of approximately 57% after both phases are implemented. This level of increase is not affordable for many New Mexico residents, particularly seniors, families, and individuals living on fixed or limited incomes. Households are already experiencing rising costs for housing, food, insurance, and other essential services. Utility rate increases of this magnitude place additional strain on basic household stability. I am also concerned about how infrastructure costs associated with system expansion and new large energy users are being allocated. Before residential customers are asked to absorb significant increases, the Commission should ensure that large-load customers, including energy-intensive industrial developments such as data centers, are paying their fair share of system expansion and grid upgrade costs driven by increased demand. I respectfully request that the Commission carefully review this application, ensure that cost allocation is fair, and prioritize affordability, transparency, and protection for residential customers in its final decision. In addition, I am concerned that filing fees associated with formal complaints or intervention may discourage meaningful public participation, particularly for seniors and low-income households. Access to the regulatory process should not be limited by financial barriers, especially when the decisions directly affect essential utility services. Thank you for your consideration. Respectfully submitted,	Merged Document	1	No					Yes					Yes	6/17/2026
Nancy	Tapp	As a citizen of Las Cruces and the state of New Mexico I am protesting any permits given to Jupiter Project. Our air quality will be in jeopardy and will cause an increase in asthma and other breathing difficulties that many of our children and elderly suffer from. This data center was slid under the carpet before any of us in Las Cruces knew what was happening. This is a disgrace to our state and I'm sorry to say, to our local government here in Dona Ana County. I realize this protest is against another air quality permit, but I'd like to address the water issue again. Jupiter will use 1 million gallons of water a day! Eventually, they'll deplete our aquifer. Living next to a large pecan grove a twenty year worker told me that they had to drill down another 200 feet to get enough water to flood the fields, which they do 9 times a year. This industry will compete with the Jupiter Project. It appears to me, excuse my language, a fuckin' free for all for any industry with mega money.	Merged Document	1	No				Yes	Yes	Yes					6/17/2026
Carlan	Tapp	As many New Mexico families understand all too well, one of the most common health conditions caused or exacerbated by air pollution is asthma. The percent increase in asthma prevalence in New Mexico from 2015 to 2025 is approximately 24.1%. Childhood asthma has become an epidemic in our state. Of asthma-sufferers in southern New Mexico, approximately 1 out of 5 children are hospitalized annually for their asthma conditions. Project Jupiter is projected to emit more than 14 million tons of greenhouse gases annually. This emission level surpasses the combined emissions of New Mexico's two largest cities, Albuquerque and Las Cruces, which together emit approximately 6.7 million metric tons of greenhouse gases each year. Additionally, the project is expected to emit nearly 500 tons per year of nitrogen oxides from its microgrids. Simple science tells us if this additional amount of air pollution is permitted we can plan ahead for our children to have increased asthma and health issues. I have worked for over 25 years visually documenting communities riddled with air pollution. Have documented children suffering from pain and breathing trauma from asthma. We owe the next seven generations much better futures than this. I am asking a simple request: please let the health and well being our our children and their children stand in front of the billions of dollars driving Project Juniper. What kind of legacy do you want to leave for your children, grandchildren and great grandchildren. Did you do the right thing? We need to say "NO" to Project Jupiter air pollution. Please think of the next seven generations and how your decisions will effect their lives.	Merged Document	1	No					Yes	Yes					6/17/2026
Jennifer	U	As a resident of Sunland Park I urge this board to have a public hearing with notices mailed to homes to inform the public. A project this size requires scrutiny. I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, including Sunland Park and Las Cruces, so that residents can learn about the risks associated with fuel cell technology. This is our air, our communities. We deserve to know what is happening.	Merged Document	1	No					Yes	Yes		Yes		Yes	6/17/2026
Miguel	Fernandez	Members of the Board, As a business owner working in New Mexico and Doña Ana County, I'm writing to express my strong support for Project Jupiter, which I believe offers significant benefits to the community. For businesses like mine, Project Jupiter promises a significant economic boost, creating 4,000 good-paying construction jobs, followed by 1,500 project-supported positions, that will increase local spending across the community and support small businesses across the area. Project Jupiter's commitment to investing millions in Doña Ana County's schools, infrastructure, and local services will also help businesses attractand retain talent while strengthening our local economy and customer base. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. Additionally, Project Jupiter's heard the community's concerns and has decided to use a new energy strategy to reduce regulated emissions and water usage. All these benefits combined contribute to a strong and vibrant community. I urge the New Mexico Environment Department to approve this important project which can help build a more economically diverse and vibrant community.	Merged Document	1	Yes				Yes	Yes	Yes					6/17/2026
Jo Ann	Bingel	Public Comments for Yucca Growth Infrastructure, LLC Fuel Cell Air Quality Permit at PROJECT JUPITER: Please do NOT approve the most recent applications made by Yucca Growth Infrastructure, LLC Fuel Cell Air Quality Permit at Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit, so that community members can participate equitably. The air quality permit application should be rejected due to Bloom Energy's history of illegally dumping hazardous waste. If the permit is not rejected, a public hearing must be held in Santa Teresa, in both English and Spanish, with the option to participate online. Approving this permit would be government-backed environmental racism, because the people of Doña Ana County already suffer too much from environmental pollution. For years, Doña Ana County has been called a 'non-compliance' zone—this means that our air quality does not meet federal government rules.	Merged Document	1	No					Yes	Yes		Yes	Yes	Yes	6/17/2026
Thea	De Armond	I'm horrified, but -- unfortunately -- not surprised that the state presses forward with its disenfranchisement of southern New Mexicans. We already have terrible air quality in Doña Ana County (a friend of mine -- a recent NMSU MA! The sort of person we'd love to have stick around! Someone who wanted to stick around) recently moved away because our poor air quality was literally making his lungs bleed. How much worse will it get with Project Jupiter's MASSIVE fuel cell plant? Given the lack of public oversight surrounding everything related to Project Jupiter (and the speed with which county commissioners, &c. have attempted to rush things), the public deserves at least 60 more days to review and comment on the air quality permit. Really, this air quality permit should be denied -- Bloom Energy has a history of illegally storing and dumping hazardous waste AND falsifying records to cover it up. I'm a southern New Mexican who'd like to stick around southern New Mexico. Please protect our air.	Merged Document	1	No					Yes	Yes		Yes	Yes		6/17/2026
Anonymous	Professor	Even with the use of fuel cells, the amount of projected air pollutants emitted into our air is enormous. Yes, there is a need for data centers but putting one this large in southern New Mexico is ridiculous and it should be rejected. This project will cause many people to move (or get sick) and it will ruin our housing market. It is just one more example of out of state corporations and government entities taking advantage of us, mostly because they think they can get away with it because they think we are poor and stupid. The deal the county made, however large the benefits sound (which are actually just peanut crumbs), was a bad deal. I'm as guilty as the next person. Just last evening I used the AI Claude app to write a contract that would have taken me hours to write... and not as elegantly as Claude did. It took me only ten minutes to prompt Claude to write the contract. So yes, we need data centers, but not such a huge one here. NIMBY! Apparently Elon Musk has the idea to put data centers in space. Perhaps that is where they belong. Go trillionaire Elon! Spend those trillions wisely and put those data centers in space. Don't pollute our space here in Southern New Mexico. Oracle, OpenAI and their shareholders should be ashamed of what they are trying to do here. In my opinion, it is a crime. If you all at the Air Quality Bureau at the New Mexico Environment Department (NMED) really represent the people of New Mexico, you will take our best interests to heart and reject this application. They are trying to use loopholes in New Mexico law to trick you into approving this project which is just plain wrong. If they still want to build it, they can use renewable energy to do so. They just need to spend the money, of which they seem to have plenty. And, they must keep their promises and use minimal amounts of water. And, no, I did not use an AI tool to write (or even edit) this public comment! All the mistakes and bad grammar, I take responsibility for!	Merged Document	1	No				Yes	Yes	Yes	Yes	Yes			6/17/2026
Jan	Thompson	I question (and hope you will, too) the use of fuel cells to power the massive data center planned for Santa Teresa commonly known as Project Jupiter. Fuel cells have never been used in the quantity required for this project and the efficacy of such an array is questionable. Fuel cells have been known to explode, so there is a safety factor as well as environmental concerns. I am told that, even with the use of fuel cells rather than gas-powered microgrids, the resulting air pollution will be greater than that of Albuquerque and Las Cruces, combined. If that is true, it will endanger the lives of even healthy residents in Santa Teresa and Anthony. The air quality in El Paso is already frequently in the red. Project Jupiter will exacerbate that situation and send many more people to emergency rooms with breathing problems. To further complicate your decision, Bloom Energy cannot be trusted to have made a fair and honest application for permitting. They have a history of illegal dumping of hazardous waste. These are not people New Mexico should be doing business with. It is the function of the NMED to keep us safe and healthy. Please keep that in mind when considering the permit requests of Project Jupiter.	Merged Document	1	No					Yes	Yes		Yes	Yes		6/17/2026
Alberto	del Campo Hernandez	I am a resident of Dona Ana and I'm asking that you deny Yucca Growth Infrastructure's air quality permit. This project's emissions will be devastating to our ability to thrive in the state of New Mexico. I have plenty of family members who have been suffering from cancer and other health difficulties precisely because of the developments of projects like this. We are already living in an extraction zone, with oil and gas industries sacrificing us for wealth. This project with contribute significantly to the rising temperatures in this area, making it near unhabitable. I want to grow old and raise my children here, so I am once again asking NMED upholds it's mission and deny this application. I don't trust OpenAi, Oracle or Bloom Energy's track record illegally disposing of hazardous waste. Approving this permit would be sacrificing the borderlands, and nothing short than environmental racism.	Merged Document	1	No					Yes				Yes		6/17/2026
Charlotte	Lipson	New Mexico is in a drought emergency that can only worsen. Adding a data center like jupiter to our area whose water usage calculations are unreliable is a recipe for disaster.	Merged Document	1	No				Yes				Yes			6/17/2026
Row	Sarkela	I am an environmental engineer with my masters degree from Princeton, where I studied land use cases for achieving 100 percent carbon free energy by 2050. I studied the technologies project Jupiter is claiming, and they simply do not exist yet. Fuel cell technology has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. The Application is based on pollution testing from a very small unit. The testing unit is only 65kw, while the power plant is 37,000 times that size. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. No power plant ever cleans up what it makes. let's stop this before it starts and invest in green energy jobs . The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.	Merged Document	1	No					Yes	Yes		Yes	Yes	Yes	6/17/2026
Jay	Choate	I am a resident of Doña Ana, and I am asking you to deny Yucca Growth Infrastructure's air quality permit. The future of our community is under threat. Adding 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently the 16th worst in the nation for ozone pollution and has received a failing grade on this standard every single year since 2000. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The pollution estimates provided cannot be trusted. This plant is 1,000 times larger than Bloom Energy's biggest existing fuel cell plant, yet estimated pollution levels are based on only three 4-hour tests of a 65 kW unit, making this plant 37,000 times bigger than the unit tested. A 15% safety margin is completely insufficient at this scale. If a unit has a 0.01% chance of failing, the odds of all 37,000 units working perfectly at the same time are just 2.47%, meaning there is a 97.53% chance the plant will experience at least one failure. The fuel cell provider also has a history of illegally dumping hazardous waste, and a fine does not undo contamination of our aquifer and soil. My family's health and safety should be worth more than the profits of out-of-state corporations. These permits must be denied outright. If further deliberation is desired, a public hearing must be held in person in Santa Teresa with virtual participation, translated into Spanish, and meeting any other accessibility needs requested by community members.	Merged Document	1	No				Yes	Yes	Yes		Yes	Yes	Yes	6/17/2026
Abegail	Salugsugan	Hello, my name is Abegail Salugsugan and I have lived in District 1 for most of my life, and I am commenting to ensure that these air quality permits are to be rejected. The scale of Project Jupiter will have a detrimental effect in Santa Teresa as well as the surrounding areas. These extractive projects are not welcome in New Mexico. Santa Teresa and New Mexico deserve clean air, just as much as Santa Teresa and Doña Ana deserve clean water. A public hearing in Santa Teresa should be held if the permits are not denied, and ensure there is a virtual option so that constituents can participate and ask questions. These permits do not make sense, as they are useless due to the pipelines being rejected by NM Land Commissioner. Methane gas cannot be delivered without the pipelines that have been rejected. Please reject this air quality permit.	Merged Document	1	No				Yes	Yes					Yes	6/17/2026
George	Jacobs	As a resident of Dona Ana County I implore you, NMED, to deny the permit for an energy facility for Project Jupiter as it will result in increased methane emissions and by that fact alone already would not conform to existing and current air quality laws and goals. As this is not enough, Bloom Management has a record of illegal dumping of hazardous waste into communities.	Merged Document	1	No					Yes				Yes		6/17/2026

Janet	Stoker	Data Centers such as Project Jupiter consume inordinate amounts of both water and energy. Additionally, the proposed facility will significantly downgrade air quality. I oppose construction of this facility and request the department to do so as well.	1	Merged Document	No	[redacted]			Yes	Yes						8/17/2026
Daisy	Lopez	I grew up and continue to live in Southern Doña Ana County and under no circumstances do I want experimental technology deployed at an unprecedented scale in my backyard. Yucca Growth Infrastructure's gas-powered fuel cell plant is 1,000 times larger than Bloom Energy's biggest existing fuel cell plant. In fact, worldwide, Bloom Energy has developed 1.4 GW of fuel cell technology across more than a thousand locations, yet Yucca Growth Infrastructure is asking for nearly double that (2.46 GW of fuel cells) at a singular location. The largest fuel cell plant in the entire world is more than 30 times smaller than the fuel cell plant under consideration in Santa Teresa. There is absolutely no way to know, with certainty, what the actual pollution levels will be given the tremendous size differential, and thus gap in data, between operational fuel cell plants and this theoretical plant proposed by Yucca Growth Infrastructure. Betting the livability of our county on this unpredictable and unproven plan would be a total capitulation and betrayal of your so-called values: "protects the public health of New Mexicans...by preventing the deterioration of air quality;" "protect and restore the environment...foster a healthy NM for present and future generations" Though approximations of annual air pollution were provided, the testing used an extremely weak methodology leaving us, ultimately, with pseudoscientific guesses that have large margins of error. Our community has already faced so much pollution with our landfill, arsenic in our water and Asarco's long term environmental effects to the area. Do your job to protect New Mexicans from further pollution.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026
Mitchell	Chapman	I oppose construction of Yucca Growth Infrastructure's gas-powered fuel cell plant. The proposed plant would emit ten million tons per year of climate warming gases – more than the emissions of Las Cruces, Albuquerque, and Santa Fe combined. Climate-warming emissions are forcing environmental changes all over the globe, including warming and increasing aridity in New Mexico. This proposed plant would further harm New Mexico's climate, with little benefit in exchange.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026
Greta	Miller	As a resident and homeowner in southern Dona Ana County I urge the NM Environment Dept to reject the air quality construction permit submitted by Yucca Growth Infrastructure LLC for the YGI Microgrid. The fuel cell technology that Bloom Energy plans to use to power Project Jupiter is by no means a clean energy alternative. Natural gas will be utilized by the fuel cells. Bloom Energy has indicated the facility will emit around 10 million metric tons of carbon dioxide per year.Other emissions include nitrogen oxide, carbon monoxide and sulfur dioxide. The emission of 10 million metric tons of carbon dioxide per year will wreck the clean energy goals that New Mexico has set out in the Energy Transition Act passed in 2019. Project Jupiter is taking advantage of a loophole for "microgrids" since the fuel cell facility is not part of the public utility system. This should not be allowed since Project Jupiter will emit more carbon dioxide than Albuquerque and Las Cruces combined. Those two cities together emit around 6.7 metric tons of carbon dioxide annually. Climate change is real and the people of New Mexico have shown their support, through legislation, their desire to reduce carbon dioxide emissions and other greenhouse gases. The planet is getting hotter and drier. As a society we need to be phasing out fossil fuel use not building new infrastructure, including pipelines, that increase fossil fuel use. A data center is being built nearby at Fort Bliss, TX so the argument that Project Jupiter is necessary for national defense seems disingenuous. If Project Jupiter is so vital certainly the backers can find a way to use alternative energy sources that won't increase greenhouse gas emissions that speed up climate change. Please protect our air. Thank you, Greta Miller	1	Merged Document	No	[redacted]				Yes	Yes		Yes			8/17/2026
Cari	Powell	YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	1	Merged Document	No	[redacted]					Yes		Yes		Yes	8/17/2026
Mattie	Roos	Water has always been a sacred and scarce resource here in New Mexico, one that is increasingly threatened every day by the effects of climate change, let alone the effects of a data center which we don't need. A data center that would use thousands if not millions of gallons of water a day. A data center like all other data centers that produces and emits tons of greenhouse gases into our atmosphere which work to worsen the climate crisis we are already in. We here in New Mexico do not need a data center, any data center especially the likes of which project Jupiter is proposing. As a community we should be looking for ways to combat the effects of climate change to make our environment better and more sustainable, not build data centers that do nothing for us as a community. A data center whose only purpose is to line the pockets of greedy billionaires and giant corporations that care nothing about our state or our community. For the sake of our future, for the sake of our climate, for the sake of our state, and for the sake of our community, say no to project Jupiter.	1	Merged Document	Yes	[redacted]			Yes	Yes	Yes					8/17/2026
Conni	DeBlieck	Dear County Commissioners and Community Leaders, I am writing as a concerned resident regarding the proposed data center development in Doña Ana County. While I understand the and disagree with potential economic benefits that large-scale technology projects may bring, I believe it is important that the long-term impacts on our community be fully evaluated and openly discussed before and as construction proceeds. Southern New Mexico is an arid region already facing significant challenges related to water availability and long-term sustainability. I am concerned about the potential effects this project may have on groundwater resources, future water demands, energy consumption, and air quality. Even if current plans indicate limited water use, residents deserve clear information about projected usage not only for the initial phase but also for any future expansion. I am also requesting transparency regarding power generation, backup systems, emissions, noise levels, and environmental monitoring. These factors may affect the health and quality of life of nearby residents for years to come. As community members, we support responsible growth and economic development. However, that growth should be balanced with careful stewardship of our natural resources and consideration of the long-term health and well-being of the people who call this region home. I respectfully ask that all environmental studies, water-use projections, and public health assessments be made readily available to the public and that meaningful opportunities for community input continue throughout the review process. Thank you for your time, consideration, and service to our community. Respectfully, Conni DeBlieck	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026
Ireland	Vandergriff	My name is Ireland Vandergriff. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. A data center powered by of this scale would be harmful for every part of New Mexico- the air, the earth, and the water. Fuel cell technology has never been used at such a scale, and would produce an incredible amount of greenhouse gases that would harm Doña Ana and neighboring communities. This isn't a fantasy development opportunity, this is a real-life concern for the people who actually have to live with the consequences. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026
Lucinda	Marker	I strongly urge that a significant pause be put in place concerning Project Jupiter. I have never, in 34 years as a New Mexican resident, experienced a drier, warmer winter, spring and summer than I have during this 2025-2026 period. I am deeply concerned. New Mexico is experiencing a record snow drought, collecting just 6 percent of our median snowpack. This is a direct result of our present climate crisis and this project's water use would waste more of this resource. We owe it to our state, to future generations to be judicious in our decisions.	1	Merged Document	No	[redacted]			Yes							8/17/2026
Carla	Waldron	As a New Mexico resident I would like to voice my opposition to any resources being used for the development of Project Jupiter. As our population continues to grow and our resources dwindle, allowing this project to proceed is reckless and will ultimately further deplete New Mexico's precious natural resources. There are no long term benefits to this project other than to wealthy outsiders.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive								8/17/2026
Lura	Brookins	The installation of Project Jupiter and any other AI installations should not be permitted! The damage to the environments of New Mexico is tragically costly and irreparable! The loss of water is dangerous. The value of the presence of AI is not comparable to the danger to our stat e.!	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Michelle	Chavez	Project Jupiter and any other data center should not be allowed in New Mexico or anywhere else. This will negatively impact the lives of everyone in New Mexico. Data centers have such a negative impact on the environment in general but will be especially bad for New Mexico because we do not have the water to support a data center. I do not want my community to be severely impacted by a data center. This has to be stopped.	1	Merged Document	Yes	[redacted]			Yes		Yes					8/17/2026
Alexis	Ortiz	Dear NMED staff, My name is Alexis Ortiz. I am a New Mexico resident, living in Los Lunas, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have lived in New Mexico my whole life and have seen our resources become more stretched as time goes on. I hope that you will truly think about how this is going to affect the state, the residents and our future before moving forward with this permit. The project's proposed fuel cell powered grid is concerning for many reasons: * It would still produce a high level of greenhouse gas and toxic pollutants * This technology generates toxic waste, and the process for handling this waste is still unclear. * Fuel cell technology has never occurred at this scale. * Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Alexis Ortiz	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Luis	Morales	Escribo para expresar mi apoyo al Proyecto Jupiter, ya que considero que ofrece beneficios significativos para nuestra comunidad. El Proyecto Jupiter tiene el potencial de generar un gran crecimiento economico para el condado de Doña Ana. Se prevé que genere 4 000 empleos en el sector de construccion y 1 500 empleos vinculados al proyecto. Ademas, el proyecto destinara 50 millones de dolares para reparar y modernizar los sistemas locales de agua; 360 millones de dolares para escuelas, infraestructura y servicios comunitarios; y 6,9 millones de dolares para fomentar programas de capacitacion laboral y apoyar al Boys and Girls Club de Las Cruces, el acceso a agua potable, el colegio comunitario local y proyectos de restauracion ambiental. Exhorto al Departamento de Medio Ambiente de Nuevo México a aprobar este importante proyecto para nuestra comunidad. Atentamente, Luis Morales	1	Merged Document	No	[redacted]	No	Support Non-Substantive	Yes							8/17/2026
Hana	Porrua	Dear NMED staff, My name is Hana Porrua and I am a proud New Mexico resident. I work in Emergency medicine, and I live in Las Cruces. I am reaching out with deep concerns about the risks Project Jupiter poses to our community. Please, NMED, I ask you to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Project Jupiter's power plant is predicted to release up to 10 million tons of climate-warming greenhouse gasses every year. We already live in a nonattainent zone, in which our air quality is regularly unsafe for sensitive groups. This technology generates toxic waste, and the process for handling this waste is still unclear. Moving forward on this proposal would make an absolute mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. Additionally, Bloom's fuel cell technology has never occurred at this scale, and will produce a lot of heat! We already experience triple-digit summers. This matters to me as a healthcare professional, because the combination of poor air quality and extreme heat creates a deadly combination that we see all summer long in the emergency department. I care about the health and wellbeing of the residents of Dona Ana County! I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely,	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Dr. Paul	Shirley	Since I first came to New Mexico in 1970, I have been determined to create high-paying jobs that strengthen our communities, improve our education systems, and enhance healthcare delivery. Thats why I strongly support Project Jupiter. This project will bring significant economic growth to Doña Ana County, creating 4,000 construction jobs and 1,500 ongoing project-supported jobs. It also includes major community investments: $50 million to upgrade local water systems, $360 million for schools, infrastructure, and local services, and $6.9 million for workforce development, the Boys and Girls Club of Las Cruces, clean drinking water, our community college, and habitat restoration. I urge the New Mexico Environment Department to approve Project Jupiter. Sincerely, Dr. Paul Shirley	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
John	Spier	To Whom It May Concern: As the leader of a New Mexico company that designs, builds, and maintains complex electrical infrastructure throughout the state, I am writing in support of the air quality permit application for the Bloom Energy fuel cells that will provide power for Project Jupiter in Doña Ana County. Our team works every day on the challenges of delivering reliable power to critical facilities. We understand the importance of resilient energy systems, and we recognize when a project is utilizing advanced technologies that represent the future of energy infrastructure. The Bloom Energy fuel cells proposed for Project Jupiter are an example of that innovation. These fuel cells will serve as the foundation of an advanced on-site power system designed to provide reliable, continuous electricity without relying on the regional electric grid. From an infrastructure perspective, this is a significant advantage. By generating power on-site, Project Jupiter can meet its energy needs independently while avoiding additional strain on existing utility resources and transmission infrastructure. The project also demonstrates how modern energy technologies can support economic development while maintaining a focus on efficiency, reliability, and responsible operations. New Mexico has an opportunity to become a leader in next-generation infrastructure, and projects like this help position our state at the forefront of that effort. For companies like ours, large-scale investments in advanced energy systems create opportunities for local contractors, electricians, engineers, and skilled tradespeople. More importantly, they help build a workforce and supply chain capable of supporting the next generation of technology and industrial development in New Mexico. As someone who has spent his career working in electrical infrastructure, I believe the proposed Bloom Energy fuel cells represent a thoughtful and forward-looking approach to powering a project of this scale. The technology provides the reliability required for critical operations while supporting broader economic growth and infrastructure investment in our state. For these reasons, I respectfully urge the Department to approve the air quality permit application for the Bloom Energy fuel cells supporting Project Jupiter.	2	Merged Document	Yes	[redacted]				Yes		Yes	Yes			8/17/2026
Jena	Ferguson	As a New Mexico resident I strongly oppose project Jupiter. The evidence is proving that data centers pose risks that can affect our clean drinking water, land and air quality. Our focus should be on reducing air pollutants, maintaining and ensuring access to clean water, reducing chemicals and contaminants to our land. Until enough research has been done - there needs be a pause on data centers. The noise levels are proving to negatively impact nature and wildlife. Utility bills are also rising. There is not enough transparency to justify the risk these data centers create for our enviroment.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Ashton	Johnson	I do not support the Yucca Growth Infrastructure, LLC (YGI) Microgrid Air Quality Construction Permit Application due to the potential harmful impacts it may have on air quality, public health, and the environment in our community. The proposed project raises concerns about increased emissions, long-term environmental impacts, and potential effects on nearby residents, schools, and sensitive populations. Before any permit is approved, a thorough evaluation of the cumulative health and environmental risks should be conducted, and the community should be provided with clear, transparent information regarding the project's potential impacts. I urge regulators to prioritize the health, safety, and quality of life of local residents and deny the permit until these concerns have been adequately addressed.	1	Merged Document	No	[redacted]				Yes	Yes					8/17/2026
David	Henner	Many commenters here have cut and pasted the "official Project Jupiter argument" taken from their website. I did the same thing, but I fixed it: I am writing to express my opposition to Project Jupiter, which I believe presents significant danger to our community. Project Jupiter is poised to bring substantial damage to Dona Ana County. It is anticipated to create unrestrained air and noise pollution and will be a great drain on scarce water resources. Furthermore, Project Jupiter has committed thousands of dollars to influencing legislators and the public at large into accepting unspecified proposals. It is nice that they say they will support the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration, however none of this is guaranteed contractually. The project is being initiated without going through adequate approval processes and without sufficient public input. I urge the New Mexico Environment Department to REJECT this disastrous project. Sincerely, David Henner	1	Merged Document	No	[redacted]			Yes		Yes	Yes	Yes			8/17/2026

Mario	Alaniz	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. This can be seen already in Sunland Park and Santa Teresa as construction companies and workers spend their money earned working at Project Jupiter. Project Jupiter is poised to bring substantial economic growth to Doa Ana County. It is anticipated to create 6,000 construction jobs and 1,000 project-supported jobs. Furthermore, Project Jupiter has committed $90 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, Mario Alaniz	1		No															
Peter	McCarthy	In the comments you are receiving, I noticed (in form letters) that those who support Project Jupiter are touting its economic benefits - construction jobs and project-supported jobs, $90 mil for local water system, $360 mil for schools, infrastructure and local services, and a $6.9mil to fund workforce development, support the Boys & Girls Club and the local community college, and to restore habitat and clean drinking water. These are significant sums but compared to the sheer size of the $165 billion dollar, 1,800 acres, 3 million square foot project, and the backroads already given, barely a drop in the overall financial bucket. Corporate developers, Oracle, headed by Larry Ellison, the sixth wealthiest man in our country and a devoted Trump supporter, and Dynatek hope to gloss over the sheer environmental impact of this massive project by aggressively emphasizing these seemingly positive economic benefits. We see them inundating NM newspapers in an attempt to create a positive spin in order to manipulate public opinion in favor of a project which they know the majority of New Mexico residents are strongly opposed to. This negative opinion regarding burgeoning data centers is not just held by New Mexicans. In a recent poll, 72% of everyday Americans claimed they did not want one of big tech's massive data centers, the sheer scope of which are almost beyond ordinary folk's conception to truly comprehend, in their communities. This is why developers of these destructive projects are looking away from larger population centers and focusing on smaller more economically vulnerable communities. Even as the developers scurried to try to make this project more palatable to the public, it still remains a potential environmental nightmare which in all likelihood will only further enrich them and companies like Bloom Energy, whose stock price has risen 1,400% in the last year alone. Bloom Energy is going to provide a technology the scope of which they have NEVER done before. Their fuel cell technology has never occurred at the scale being proposed for Project Jupiter - 1000 times larger than the largest existing Bloom fuel cell installation. Even if Bloom can pull this off (and what are the environmental ramifications if they can't?), no one actually knows with certainty what the overall deleterious effects (especially long-term) will be except that, without a doubt, high levels of greenhouse gas and toxic pollutants (the plans for handling of which are still a mystery with absolutely no protocol and will) absolutely impact the health, safety and welfare of surrounding communities. When all is said and done, this is the issue the NMED Air Quality Bureau should be concerned about. But there are other valid concerns. In one of the comments I read, Kathleen Walsh wrote "Aqua no vida" This project has attempted to become more water efficient, but the stark reality is that massive data centers require millions of gallons of precious water to operate. In the face of the extreme drought conditions we are now under, their need for this finite resource will certainly exacerbate the risk of depleting (and/or polluting) endangered aquifers that communities need for their very survival. Lastly, an important environmental issue, which can be easily leveraged aside when such staggering sums of money are being thrown around, encircling the tree and the powerful but endangering the majority of others without cloud or sway, is quality of life. Again, I agree with Kathleen Walsh who wrote, "We need our water and peace of mind. We don't want it clearing our electricity and making us pay for it. We don't want the noise it generates. Please save our water!" I urge the New Mexico Environmental Department to reject the Yucca Growth Infrastructure, LLC's initial NSR air quality permit application for the YGI Microgrid and to preserve and protect our endangered New Mexico environment (and quality of life), as you are so empowered to do.	1		No																
Rafael	Lujar	I am writing to express my opinion to approve the project under the understanding that the project is gonna continue to optimize the efficiency of the data center and a severe focus on proper water treatment and a heavy focus on minizing it's impact on the surrounding environment	1		No														
Alan	Thomas	Dear NMED staff, My name is Alan Thomas. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As a life-long resident of our fair state, I have a great interest in maintaining the unequaled beauty of this region for the future residents of our planet. New Mexico is a truly unique place to live, and I feel like I have been lucky to have lived here. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants; this technology generates toxic waste, and the process for long-term storage and disposal of this waste has not been made clear. Fuel cell technology has never occurred at this scale, and definitely not here in New Mexico. In addition, the air quality of the communities surrounding this proposed power plant will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with this particular fuel cell technology. Sincerely, Alan Thomas	1		No																
BRENDA	Soto	This is a supplemental comment. In reviewing comments, I have discovered that these are all identical in language. This is a farce. 1675 comments. Each one I reviewed (maybe 15-) looked at) had IDENTICAL language. These are paid commenters...by project Jupiter. This makes this process very suspect and untrustworthy. Each commenter should be contacted to verify their comment, ask where they got the language. This is sneaky and inappropriate on behalf of Yucca and Project Jupiter. Who is going to stand up and make this right??? The lies in this advertisement, in the comments are a believable. There will not be that many jobs. There will be only a handful permanent employees. They will destroy our community/ponce by piece. As someone else stated in a recent conversation.... they know they are building a mess in these small communities. Why do they pick small communities? Why don't they build in the cities where they live? Put them by the ONI Don't allow them here. I am absolutely asking that this board do a full and thorough review of public comments and that the identical comments be stricken from the record. The language is this: I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doa Ana County. It is anticipated to create 6,000 construction jobs and 1,000 project-supported jobs. Furthermore, Project Jupiter has committed $90 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration.	1		No																
Elizabeth	Dykstra	Thank you for the opportunity to comment. After reading background information on Project Jupiter and their subsequent requests for permits regarding air quality and construction I believe the Doña Ana county needs a higher level of review. I do not support the approval of the permitting for this project. Project Jupiter continues to advertise benefits to the community with minimal facts of their resource needs and impacts over a timeline for the foreseeable future. At this time data center proponents have withheld facts of water use, electricity use and other resources impacts. Nation wide data centers have misrepresented their construction and operational needs. I do not support Project Jupiter. There is a better way to engineer data centers with less resource impacts, namely less water. Potentially data centers could use Produced Water from fracking, thus resolving part of the problem with an abundance of Produced Water from fracking practices. Currently PW is not potable. Project Jupiter should consider other means to support their business and not rely on taking advantage of rural communities or rely on fact distortion.	1		No																
Mark	Pino	I support because the amount of employment opportunities that will rise. I suggest helping with NM residents in relocation for employment as an incentive or sign on bonus. Sincerely, Mark Pino	1		No															
Kelly	Jenks	Please deny this permit. The emissions allowed by this permit will significantly harm air quality in this region, which is already very bad. This, in turn, harms the health of people who live here, who are already underserved by the healthcare industry. It also makes this a less desirable place to live, ultimately hurting the local economy. The people who profit most from this project do not live here - not in this region, and not even in this state. The people who will suffer from this project do live here - voting in elections, paying taxes, and sustaining these communities. They should be your top priority and concern when it comes to permit decisions. New Mexicans have been "rich only" too many times before, paying the price for industries that do not benefit us. We know how this goes. Please don't repeat past mistakes.	1		No																
Eden	Luschei	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. I'll base my response on the things I wrote below. My biggest concern is about the water amount from the Aquifer, the noise, light pollution. , and all of the wildlife. If you can guarantee that those things will be taken care, then okay. I do think teaching & spreading the word to the 48+ population will help as we didn't need even CE 101 to graduate University. Project Jupiter is poised to bring substantial economic growth to Doa Ana County. It is anticipated to create 6,000 construction jobs and 1,000 project-supported jobs. Furthermore, Project Jupiter has committed $90 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, Eden T. Luschei	1		No																
Candace	Donaldson	I drive past our empty river twice a day, and it scares me every time. Building a data center when we do not have water for our residents is unacceptable	1		No															
Elaine	Thomas	Dear NMED staff, My name is Elaine Thomas. I am a New Mexico resident, living in Albuquerque,NM, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am not anti-AI; I support the technology wholeheartedly as a programmer. I oppose this power plant because it will add more greenhouse gas pollution than New Mexico's three largest cities combined (Ándalt, Albuquerque, Las Cruces, and Santa Fe. The project's proposed fuel cell powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology or a centralized waste system has never occurred at this scale. - Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Elaine Thomas	1		No																
Jake	Greene	I am concerned about the various pollutants that this project will create and put into the air we all breath. Asthma runs in my family and I know the terror of having to rush my little sister - blue in the face - to the hospital in the middle of the night. She had a childhood case of asthma all her short life - she died at 19 years of age. My mother struggled with asthma much of her life and I developed an adult-onset case by my mid-thirties. In fact, we moved from California's central valley to Santa Fe county in 2005 to leave behind the nation's third worst airbasin to experience the cleaner air of New Mexico. I carry a rescue inhaler but have never used it since moving here. I fear my asthma may return if this project is allowed to emit 27+ tons of NOx and 7+ tons of particulates annually into the atmosphere. Moreover, I am concerned the men, women, and children who live near this development will be subjected to the same ailments and more (lung cancer, strokes, heart attacks, brain damage, and others) my family suffered with, including premature death. If this project is allowed to use our air as a sewer. Thus, I believe this project should not be permitted at all but, if it is permitted, it should be held to strictly enforced standards already in place in New Mexico, including meaningful fines and stoppages until the development meets those standards. Turning to the subject of the local population - men, women, and children living near this project - Doña Ana County has been a nonattainment zone for years –that is, county air quality does not meet federal standards. It is simply racist and an environmental injustice to site this project in the county. As a part of New Mexico state government, the Environment Department would be engaging in intolerable behavior toward the state's citizens by approving this project, given what we all know about the effects of the pollution it will generate. Approving this project goes facts-sentences a portion of nearby men, women, and children to lifelong ailments, a lessened quality of life, and premature deaths. It simply is wrong to approve this development/weeding/ill-bad hearing from people in person. Thus, the Department must hold local public meetings in English and Spanish to understand how the people feel about the impacts of this project. There is also the matter of the trustworthiness of one proponent, Bloom Energy. According to what I have read, Bloom has been fined over $1.4 million by several states for illegally handling and dumping hazardous wastes. These wastes included cancer-causing benzene, heavy metals such as lead, arsenic, and chromium, and toxic compounds, including sulfur. Furthermore, there is evidence Bloom falsified records to hide what the company did and to escape responsibility for the malfeasance. If again re-side, we cannot pursue limited water at risk by allowing this company to move forward with this project. Nor can we risk our soil and air to a company of dubious repute and honesty.	1		No

There is also the matter of the trustworthiness of one proponent, Bloom Energy. According to what I have read, Bloom has been fined over $1.4 million by several states for illegally handling and dumping hazardous wastes. These wastes included cancer-causing benzene, heavy metals such as lead, arsenic, and chromium, and toxic compounds, including sulfur. Furthermore, there is evidence Bloom falsified records to hide what the company did and to escape responsibility for the malfeasance. If again re-side, we cannot pursue limited water at risk by allowing this company to move forward with this project. Nor can we risk our soil and air to a company of dubious repute and honesty.	1		No																
Esperanza	Chavez	Dear NMED staff, My name is Esperanza Chavez, and I live in Las Cruces, NM. I am writing because I am concerned about the risks and harms Project Jupiter poses to my home. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As someone born and raised in Las Cruces, I am deeply concerned with the ways that Project Jupiter has rammed through our public democratic bodies, and is forcing merit onto my community here in Doña Ana county. I was opposed to the project's plan before they abruptly changed their plans, and am still opposed to their proposed fuel cell "microgrid." This new permit application still demonstrates a HUGE and concerning level of greenhouse gas emissions and toxic pollutants. Santa Teresa and our borderlands communities already experience a vulnerable air shed, with some days of horrible air quality and this project would only make our air worse. Isn't your mission "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations"? Granting these permit applications would be a direct contradiction to that mission. As a young person living in Las Cruces this proposed energy generation has paid no regard for present or future generations. This technology generates toxic waste, and the process for handling this waste is still unclear! Bloom was fined for improper hazardous waste handling in Pennsylvania and Maryland. In 2020, Bloom was fined $200,000, and then $1,161,000. When I asked a Bloom employee about the toxic waste at a recent public event in Sunland Park, they were unable to answer my question as to where this waste would go and told me that it would simply go "to whoever can take it." This is unacceptable, and deeply alarming given that neither fuel cell technology nor their proposed "centralized" waste system has never occurred at this scale. For these reasons and more, I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that local residents can learn about the potential dangers associated with fuel cell technology. Respectfully, Esperanza Chavez	1		No																
Shannon	Lionetti	Dear NMED staff, My name is Shannon Lionetti. I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: Fuel cell technology has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. This is also more greenhouse gas pollution than New Mexico's three largest cities combined Ándalt, Albuquerque, Las Cruces, and Santa Fe. Neighbors and community members are very alarmed by this. I urge the NMED to outright reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Shannon Lionetti	1		No																
Alex	Alcitty	Dear NMED staff, My name is Alex Alcitty, I am a New Mexico resident from Albuquerque. I am writing to you to express my disapproval of Project Jupiter and to urge you to reject Yucca Growth Infrastructure, LLC's air permit for the YGI Microgrid in Doña Ana County. Data center development poses a huge risk for New Mexico's environmental health. Project Jupiter is set to release 10 million tons of greenhouse gases into the atmosphere which will further contribute to global warming. Additionally, toxic waste from Bloom Technologies fuel cells does not have a clear process for handling since it has been produced. Bloom Technologies has also been fined over $1.1million for improper handling of hazardous waste in 2020 in Pennsylvania and Maryland for much smaller projects. The scope of the proposed implementation in Doña Ana County exceeds previous projects by a significant amount. The largest installation was 700 MW in South Korea, where this one will be over 2 GW. This company should not be trusted. NMED's mission is "to protect and restore the environment to foster a healthy and prosperous New Mexico for present and future generations." Granting these air permits is contradictory to this mission, so again I urge you to reject the Yucca Growth Infrastructure, LLC's air permit application. I also ask that the department hold a bilingual public hearing near the Santa Teresa community, so residents can learn about the risks associated with fuel cell technology. Sincerely, Alex Alcitty	1		No																

Isabel	Roberts	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans and the dangerous precedent it sets for citizens across the Nation. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the Y59 Microgrid in Doña Ana County. I grew up in Doña Ana county in the Rotledeo Mountains and have seen the effects that prolonged drought has had on this environment. There used to be tadpoles during the monsoon season. They are no longer here. There is not enough rain and moisture to sustain them. There used to be unique insects that would make themselves known every season. They are no longer here. The environment is continuing to devolve due to the stressors of drought and increased heat that will only become more acute under the impacts of climate change. The soil will become hydrophobic, dust storms will become more severe, and agricultural production will fail. We will continue to lose biodiversity and our loved ones. These are the impacts of climate change that this project will exacerbate. My Father's Father died when he was nine years old due to cancer. This loss forever changed my family and we are still suffering his death into my generation. He died due to toxic waste contaminating drinking water from mining operations near his home. The fuel cell proposition for this project will produce concentrated hazardous waste. There is no indication of where this toxic waste will be deposited. Likely, it will find its way into the bodies of the Santa Teresa Elementary schoolers and High Schoolers who are located within five miles of this project site. The toxics won't stop there. They will find their way into the bodies of unprecedented and unevaluated amounts of people. Hazardous chemicals will leach into soil, air, and water. How many children, spouses, and loved ones is NMED willing to expose to this irrevocable harm? Chemical exposure is a slow death that this project promises for those it impacts. The data center will not be held liable for this harm. It is here to make profit, no matter how many deaths it takes. Because of this, the fate of hundreds of thousands of people now rests within NMEPs hands. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." If NMED allows this project to continue it is abandoning those it is tasked to protect. It is leaving them at the will of those who will take their water and pollute it further, sell it back to them, and leave NMED with the consequences of generations of cancer patients, environmental degradation, and loss beyond comparison. I am so deeply wounded that this project was ever allowed past the desks of County Commissioners of Doña Ana. This area is our home. This area is worthy of protection. The people are entitled to clean air, water, and the protection of those charged with their care. Please do right by the land, people, and air. Please do right by New Mexico. Reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the Y59 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.		2		No	[redacted]															
Aaliyah	Dominguez	Dear NMED staff, My name is Aaliyah . I am a New Mexico resident, living in Portales , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the Y59 Microgrid in Doña Ana County. I'm a healthcare worker and the rise of AI in every industry is unnecessary and harmful. These AI data centers are going to rip apart New Mexico as we know it. There will be place completely unable to sustain life. These centers take water from thousands of rivers that are already in water restricted areas. No water no life. With the global rising temperers already adding these center will only speed up the process. When we are all gone this data won't matter. We need to find solution do better helps life now. Find the cooling with food, water and shelter. No need for these centers AT ALL. The project's proposed fuel cell powered grid is concerning for many reasons: * It would still produce a high level of greenhouse gas and toxic pollutants * This technology generates toxic waste, and the process for handling this waste is still unclear. * Fuel cell technology or a centralized waste system has never occurred at this scale. * Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the Y59 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Aaliyah	Mirrored Document	1		No			Yes		Yes		Yes	Yes	Yes		8/27/2026
Mariah	Nzeuji	This project is UNWANTED by citizens. It is an ecological nightmare for an already struggling region. Pollution, rise in citizen utility costs, unprecedented water waste, and negative health impacts are not worth the few alleged jobs. This is purely a corporate money grab that is being pushed on people. NO TO PROJECT JUPITER. I can't believe we are even having this discussion as a water-scarce region. JUST NO	Mirrored Document	1		No			Yes	Yes	Yes		Yes		Yes	8/27/2026
R	Fultz	The air quality permit application should be denied. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County (and El Paso County) has been called a "sacrifice zone" and "dumping ground"; this means our air quality does not meet federal government rules. Project Jupiter and similar projects should be CANCELLED and SCRAPPED entirely. Full stop.	Mirrored Document	1		No			Yes		Yes						8/27/2026
Carlos	Reyes	Escribo para expresar mi apoyo al Proyecto Jupiter, ya que considero que ofrece beneficios significativos para nuestra comunidad. El Proyecto Jupiter tiene el potencial de generar un gran crecimiento económico para el condado de Doña Ana. Se prevé que cree 2 000 empleos en el sector de construcción y 1 500 empleos vinculados al proyecto. Además, el proyecto destinará 80 millones de dólares para reparar y modernizar los sistemas locales de agua; 260 millones de dólares para escuelas, infraestructura y servicios comunitarios; y 6,9 millones de dólares para fortalecer programas de capacitación laboral y apoyar al Boys and Girls Club de las Cruces, el acceso a agua potable, el colegio comunitario local y proyectos de restauración ambiental. Saludo al Departamento de Medio Ambiente de Nuevo México acepto que apoyar este importante proyecto para nuestra comunidad. Atentamente, [redacted]	Mirrored Document	1		No			Yes		Yes				Yes		8/27/2026
Greg	Hobbs	As a New Mexico resident, I am writing to express my strong support for Project Jupiter. I believe Project Jupiter reflects the kind of responsible investment that can benefit both New Mexico and the communities where it is being built. The project can bring meaningful job creation, long-term economic opportunity, and important support for local schools, infrastructure, water systems, and workforce development. I also appreciate that Project Jupiter is being designed with advanced technology to reduce water use and protect local air quality. I respectfully urge the New Mexico Environment Department to approve Project Jupiter. Sincerely, [redacted]	Mirrored Document	1		No		Support Non-Substantive	Yes								8/27/2026
Denise	Hobbs	As a New Mexico resident, I am writing to express my strong support for Project Jupiter. Freddie	York	This is inconsiderate to the civilian population of our state, the expanding size and urbanity and our logistics of a state in the Southwest. We shouldn't even be providing our water for corporate interests, let alone this one that calls itself "better for the environment and the job economy" here. This state is already terrible for employment so why bring in another data center whose primary purpose is to automate more tasks? Take more jobs away from our already precarious white collar situation in New Mexico.	Mirrored Document	1		No			Yes	Yes	Yes						8/27/2026
Steven	Morton	I oppose approval of this permit until the Department fully evaluates the potential impacts on air quality, public health, and surrounding communities. I request a thorough review and consideration of all public concerns before making a final decision.	Mirrored Document	1		No			Yes		Yes						8/27/2026
Maya	Durham	I urge the NMED to deny this permit for Stack Infrastructure and Oracle. From the beginning, this project and its backers have been anything but transparent. For one, representing themselves as "Yucca Growth Infrastructure" is misleading and undermines the companies' apparent support for New Mexicans. They have blindly rejected 80% of Doña Ana County residents support for data center and continually engage in deceptive practices to sway public opinion. This new plan claims to be better for the environment but this permit application proves otherwise. Oracle and its partners will never care about New Mexicans or the environment more than they care about money.	Mirrored Document								Yes						8/27/2026
Jose	Reyes	Project Jupiter needs to be kept out of New Mexico. Our state has limited water. New Mexico does not need or want project Jupiter! In fact, NO data centers should be in a DESERT. ALL permit applications should be DENIED!!! Bloom Energy has a dangerous and questionable history.	Mirrored Document	1		No					Yes	Yes					8/27/2026
Leigh	Saunders	This project should not be permitted for the following reasons: 1)1M tons of CO2 emissions will adversely impact the public health, particularly in times of atmospheric inversion layers. Also, I find no evidence that this project will comply with the New Mexico Energy Transition Act. Please do not permit this project to proceed without a clear and reasonable plan to comply with NM SB886. Additionally, do the expected emissions include those required for water treatment? I have emailed Project Jupiter twice with requests for information, and received no reply in either case. I request that NMED pause their consideration of this application until more information is available.	Mirrored Document	1		No			Yes								8/27/2026
Heather	Duke	The amount of water this project will consume is frankly unconscionable. Everything that lives needs freshwater, and, as we are all aware, there is not enough to go around in the state as it is. There's constant water rights fights between states, we're in the middle of a drought, and the state is growing. Any so-called financial gains that anyone in the state may receive is not worth the loss of life the loss of water will cause.	Mirrored Document	1		No			Yes	Yes							8/27/2026
Ana	Rodriguez	Please dont approve these permits. I opposed the construction of this microgrid. The financial gains of this project don't support the environmental damage to the community, there is no worst poverty that air pollution and water contamination.	Mirrored Document	1		No			Yes								8/27/2026
Anonymous	Anonymous	As a resident on Doña Ana County, I would like solid and scientifically backed studies on the actual impacts of Bloom Energy deployment before NMED approves the methane fueled power plants for Yucca Growth Infrastructure. Pollution levels for these fuel cell units has only been tested at small scale levels with 40kw, as opposed to the 1.4GW currently deployed at more than a thousand locations with these fuel cells currently in the U.Apps proposed for this application. This means the power plant would be 35,000 times larger than the test unit. The people of Santa Teresa and the county should be given clear, honest explanations for how much heat this will generate and how much air pollution will be caused. Please submit days to the review period so more research can be conducted, and deny the air quality permit application or until the public has an honest analysis of how 2,800lbs of methane consuming fuel cells would actually impact the air quality of Doña Ana Area County.	Mirrored Document	1		No			Yes		Yes						8/27/2026
Catherine	Clark	I am writing to you to express my deep concern with the environmental and human health impacts of "Project Jupiter" in Doña Ana County. The detrimental impacts of the proposed gas-powered fuel cell plant on our essential air and water resources are not worth any economic incentives that may be offered by this data center project. Please recognize that the air pollution and hazardous waste produced by the proposed Project Jupiter fuel cell plant have the potential to cause extreme harm to the residents of Santa Teresa, who are already disproportionately impacted by environmental pollution. Powering Project Jupiter will produce more air pollution than ALL of the consumer electrical grids in NM, and will affect the shared airsheds of Las Cruces, El Paso, and CD. Juárez/Jarales. The air quality permit application should also be denied given Bloom Energy's history of illegally dumping hazardous waste. Adding more industrial fossil fuel emissions to power the proposed data center project is NOT the solution for protecting the environmental health and prosperity of Doña Ana County - now or in the future. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a "sacrifice zone" and "dumping ground"; this means our air quality does not meet federal government rules.	Mirrored Document	1		No												
Linda	Van De Reutyne	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. This fuel cell gas plant will release toxic chemical pollutants and 30 million tons of carbon dioxide into our air. Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil. New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." [redacted]	Mirrored Document	1		No			Yes	Yes	Yes		Yes	Yes	Yes		8/27/2026
Jeremy	Herrick(EDS, rcbs)	I live in Doña Ana, which according to the American Lung Cancer association has some of the highest rates for respiratory illness in the nation. I am asking that yucca growth infrastructures air quality permit be denied. The projected CO2 emissions are dangerously high and will only further jeopardize the health of residence in a region that is a healthcare desert and has a high population of immigrants who are unable to access specialized treatments in places like Albuquerque or another State. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Mirrored Document	1		No			Yes	Yes	Yes		Yes	Yes			8/27/2026
Anonymous	Anonymous	I urge the Air Quality Bureau to do what's right and deny the permit for Yucca Growth Infrastructure LLC' Project Jupiter. Approving the permit would directly contradict the Air Quality Bureau's mission to protect the public health of New Mexicans and our land's natural beauty. I spend much of my time at work outside in Doña Ana County, including in Santa Teresa. Any infrastructure related to Project Jupiter (or any other data center for that matter) would result in hazardous air quality that would harm me and thousands of other New Mexicans. It's unacceptable for NMED to allow Yucca Growth Infrastructure LLC to move forward with their plan when it very obviously has the potential to produce thousands of tons of greenhouse gas emissions, cancer-causing chemicals like benzene, heavy metals (lead, arsenic, chromium), and other toxic compounds. NMED should also consider what has happened with past projects of these massive sort of data corporations, namely the illegal dumping of hazardous waste and falsification of records. Obviously these corporations DO NOT CARE about the people that live here in Doña Ana County, and if the Air Quality Bureau approves their permit, it will be a clear message to the public that NMED does not care either. Finally, consider the immense amount of energy that will be required to power the future cell plant. It would be absurd to take the methane gas required for the fuel cells at temperatures above 1000deg F in the middle of a HOT desert environment which is already struggling with fresh water availability and climate change. The fuel cell plant is likely to cause thermal pollution of the surrounding area (along with all the other forms of pollution – noise, air, water, etc) making it even more difficult for the community of Santa Teresa to survive. At the very least I demand an extensive investigation into how the corporation plans to avoid as much pollution as possible. The people of Doña Ana County should be given more time to review and provide input as well. Yucca Growth Infrastructure LLC is part of a shady operation that may be offering millions to NMED. It is essential that the public servants of the state involve the public that they serve as much as possible and consider the close danger they will be putting New Mexicans in if they do not deny this permit. The future and land belong to all of us, not just the executives of some rich and powerful corporation willing to pay anything to squeeze the life out of the desert for their own gain. Stand up for us! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Mirrored Document	1		No				Yes	Yes			Yes	Yes		8/27/2026
Phyllis	Hedges	Fuel cells will drastically increase air pollution in our county and come with other significant environmental risks. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. To add 30 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be an act of environmental racism. Our metro area is currently 28th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperozone air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. I am a resident of Las Cruces, NM and I am asking that you deny Yucca Growth Infrastructure's air quality permit. Thank you for your consideration of my requests to deny this permit. Phyllis Hedges Las Cruces NM The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Mirrored Document	1		No			Yes	Yes	Yes		Yes	Yes	Yes		8/27/2026
Kerri	Kerrigan	New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For decades, Doña Ana County has been designated a "sacrifice zone". The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Indira	Cashner	NMED it is imperative that Project Jupiter not receive any permits to move this project forward to completion, including an air quality permit, because the general public, including myself, do not want Project Jupiter or any Data Centers to be built in NM. Any building and business on a large scale like a Data Center that requires any amount of water on a massive scale and pollutes our windy air is something that is not sustainable for Doña Ana County. With recent and countless being a regular weather reality almost year around, any air pollution will be swept up and affect many areas not just our county for there is no way a company can promise that 100% of their waste can be 100% contained and/or controlled. The owners and investors of Project Jupiter do not call Doña Ana County home, at least not tonight and the consequences of air pollution and increased energy costs will be felt by myself as a nearby homeowner. I implore that the Air Quality Bureau not permit Project Jupiter to receive permits no matter what their data shows, there have been many data centers already in our country that initially promised one reality and with time, these commitments have been broken and the local residents have paid the price with dirty air and higher electrical bills. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Steven	Rivera	I support Project Jupiter, let's see where it takes us , just don't touch our drinking water .	Merged Document	1	No	[redacted]	Yes							8/17/2026
Vanessa	Kenner	Myself and my community DO NOT want project jupiter building their data center on our precious land. We DO NOT WANT anything you claim to offer and we know that this will do more harm than good! If you need a permit to contaminate our air that says a lot. The amount of water needed to power this plant is sickening especially given the state of this land, WE HAVE NO WATER to give is this a joke!? I am truly frightened for myself and my community because we don't deserve this potential harm and stress in already difficult times. Keep your data center away from us!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Kemp	Jones	Even though the fuel cells will produce less air pollution the amount of CO2 will still be substantial for an area that is burden with poor air quality. It is my understanding for a conversation I had with a rep from Bloom there are no plans to address the CO2 that will be released into the air. More time is needed to address these issues to review Blooms application and a public hearing is needed to address the permit. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026
Kashka	Calvin	I opposed project Jupiter being passed. The health concerns the environmental concerns and the finance concerns outweigh the projected benefits. Also every other data center that's been built thus far has lied about there power usage water usage and environmental impact. The air quality permit application should be denied. A public hearing needs to be held in every county that will be affected. Dona Ana air quality is already among the worst in the nation and approving Jupiter with its air pollution projections would make Dona Ana uninhabitable. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]	Yes	Yes	Yes				Yes	8/17/2026
Boston	Barker	Reject everything to do with project Jupiter, don't let the company jargon distract from their true intentions, which is to squeeze everything dry so they have more money. They don't need it, but we need the water, energy, and unpoluted land. Project Jupiter's people should be ashamed of trying to do what they're doing, and for trying to sell it to us like we'll benefit. They're people of few scruples and as bad as the harm they want to do to everyone and everything for their own profit. They are snakes in the grass and don't care about what comes about after they get what they want. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Sumayah	Mustafa	I absolutely do not support Project Jupiter and I find it disgusting that Doña Ana Counties representatives find it to be an acceptable project when we are in a desert, the Rio Grande is currently dry and air quality is already subpar, it is clear the best interest of the citizens in Doña Ana County is not in mind. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Erica	Christensen	I am asking that the air quality permit be denied, as the air quality in Santa Teresa is already poor, and approving this permit would negatively impact the health of local residents. Additionally the public should be given more time, at least 60 days, to review and comment on this decision. If the permit is not denied, there needs to be a public hearing about this issue so residents can be informed about what exactly is being proposed, and can have their concerns heard and considered.	Merged Document	1	No	[redacted]		Yes	Yes				Yes	8/17/2026
Ellyn	Derman	NO Project Jupiter. Deny the air quality permit due to Bloom Energy's hazardous waste dumping past. Dona Ana County is impacted already with environmental pollution. Jobs for building do not mean jobs after the building is complete and damage continues now economically, societally and environmentally. Protect our human and environmental resources for the future. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Alexis	Contreras	We do not want a data center here. They cause so much noise pollution that's going to cause psychological issues. My entire life this area is in and out of drought, we do not have the water supply to support a data center. This will come at the expense of residents who won't have access to clean water. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Sophia	Nuanez	It is unacceptable to let such destructive capitalist AI companies extract even more resources from our already over-exploited lands and people. This environmental racism is being endorsed by virtually all public officials and politicians, as they shamefully value profit over life. Shameful and disgusting, DO NOT LET THE DATA CENTER INTO NM! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Zephyr	Jaramillo	Dear NMED staff, My name is Zephyr Jaramillo. I am a New Mexico resident, living in Isleta Pueblo, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology, as well as extending the public comment period from 30 days to 60 days to ensure that community has adequate time to understand the very serious risks that this project brings to folks' backyards. Sincerely, Zephyr	Merged Document	1	No	[redacted]		Yes	Yes		Yes		Yes	8/17/2026
Gennifer	Gates	We do not need to pay for corporate interests (monetarily or environmentally) including their business decisions to incorporate ai into products without consent. The permit should be denied. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Maryellen	Hunner	I oppose the construction of a data center in Dona Ana county. The risks to the health of New Mexicans outweighs the profits of large corporations. Schools are within 1 imile of the proposed site risking the health of innocent children. Water quality issues already exist in the area around the proposed site. Building a ridiculously large data center will only worsen the problems. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. The public should be given an additional 60 days to review and comment on the air quality allowing so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone—this means our air quality does not meet federal government rules. The mission of the New Mexico Department of the Environment (NMED) is "to protect and restore the environment and foster a healthy and prosperous New Mexico for present and future generations." The NMED Air Quality Office "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality."	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Heather	Anonymous	We do not want Project Jupiter here in New Mexico. No matter how it is powered, our water and air is too precious for a data center to be allowed in this state. We have seen time and time again that the builders and owners of data centers overuse water and blatantly deny the environmental impact caused. New Mexico is too wonderful a place to allow for these methane fuel cells to be tested, have them test them in their own backyards and let their families breathe the proposed pollutants. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Alex	Luce	Hello, I am a resident of Albuquerque and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with my parents, siblings and nieces/nephews. New Mexico -Albuquerque in particular- is my home. Yet the Las Cruces metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are ALREADY breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities WITHOUT ANY EVIDENCE OF ACTUAL COMMUNITY BENEFIT. I want to be able to have children here knowing they have a safe and secure future. I want to be able to stay in my home town. I want my nieces and nephews to have a home when they grow up. But MY future is under threat with this proposed air quality permit. Adding 10 million tons of carbon dioxide pollution, with a vague estimate of toxic emissions to Dona Ana county's active and long-time nonattainment zone, would be nothing short of blatant environmental racism. NMs do not want this. This is not for NM, this is for profit of outside billionaires who are bad faith actors in our community. It is well documented that Bloom energy has a history of illegally dumping hazardous waste. We do not want or need this here. Please reject this permit. I also want to request that the public be given an additional 60 days to review and comment on the air quality permit. If the permit is not denied, a public hearing must be held in Santa Teresa, in both English, Spanish, with ASL interpretation provided, and an option to participate virtually. Thank you for your commitment to protecting NM's air	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	I oppose the building of Project Jupiter. It will deplete our truly precious water sources, pollute our natural resources, and sicken our people. We need to protect this state from money hungry corporations trying to take what is not theirs. New Mexico is sacred land and it must be kept that way. It is your job to protect our health and our state. Don't let the evil men of this world rape our beautiful state. There is not a single good thing about project Jupiter. Listen to your people. I VEHEMENTLY OPPOSE! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Blu	Warren	No no no no stop all projects related to data centers as a respiratory therapist I know these centers will be harmful to all persons who suffer from chronic lung disease! Stop the oligarchs from raping our earth and controlling all data. Why do you think flock cameras are proliferating everywhere? Evidence of harm is already seen across our country and the world both environmentally and citizenry privacy! Quote by Oracle co-founder Larry Ellison: "Citizens will be on their best behavior, because we're constantly recording and reporting everything that is going on" — a dire warning on the erosion of privacy. Oracle is running propaganda ads selling lies. Stop contributing to the devastation of our planet and our freedoms. "Look up" The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]		Yes	Yes	Yes		Yes	Yes	8/17/2026
Liberty	Garner	Dear NMED staff, My name is Liberty Garner. I am a New Mexico resident, living in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have a young daughter whose future I worry about. Project Jupiter poses risks to the environment that I am extremely uncomfortable raising a child around. Additionally, I worry about all those right next to the sight due to light pollution, air quality etc. There are already issues with the data center in Santa Teresa putting out extreme light pollution. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Liberty Garner	Merged Document	1	No	[redacted]		Yes	Yes		Yes		Yes	8/17/2026
Neeshia	Macanowicz	I implore the NMED to deny this permit request. Not only does this permit request exceed legal limits of PPM toxic limits of pollutants/greenhouse gas emissions but a power plant of this nature has NEVER been accomplished anywhere in the world. We are not a testing ground for Bloom Energy Cells. They have proven, time and again, that they are an unreliable company that disregards local and federal protections because they have been fined $1.4 million dollars for illegally storing and dumping hazardous waste by several states. The next largest Bloom Energy power generator is 1,000 smaller than what they are proposing for this site. The numbers that are provided in this application are incomplete or "rounded." We cannot take a risk or rely on their rounded estimates to allow these volatile fuel cells to be operating in one of the hottest parts of this country. These fuel cells operate at 1,1470°F! This will create a heat island in the Sunland Park and Santa Teresa (SP/ST) area. The people of SP/ST deserve clean air and they are currently living in a non-attainment zone. Their air quality is already dangerous, by installing this power plant, this will exacerbate and put the people there at risk. It makes no sense to put this power plant in SP/ST. NMED- is it YOUR job to "protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." Why wasn't this permit outright denied because they are proposing to contribute 10 million tons of CO2 into a non-attainment zone? This number is astronomical to consider for a SINGLE entity, for a couple of businesses who have no other investment in our beautiful state. Why for such a large project are we given a mere 30 days to respond? This is a historical decision for the entire state, and quite frankly, something that will affect our international border with Mexico. We require an additional 60 days to review the jargon-laden application, and respond. The people deserve more time and consideration. This will affect the people. This will affect the global climate catastrophe. The large corporations who own this application have easily hired employees $25/hour to canvass throughout the state to obtain signatures in support of this application but those people do not understand what they are signing. They are not provided the entire application, they cannot decipher the details of this application in their five-minute conversation with an ill-informed and job-desperate individual. This is not just. Every detail of this entire project, of this operation of canvassers, of the amount of pollution, on the dollar amount is UNPRECENDENTED for this state. We cannot function as if it is business as usual. If this application is pushed through, NMED is obligated to the people they serve to hold a hearing. If this application is pushed through, NMED is ushering in such a severe environmental hazard onto the people of ST/SP and Doña Ana County, where majority of the citizens are of a minority race. The Latiné population will be afflicted with health risks induced by the carbon, methane, nitrogen oxide, volatile organic compounds, benzenes, xylenes, and particulate matter from this permit. The population will suffer because they are being directly impacted by the pollution brought onto us by billionaires that do NOT live here, who will never live here, and who do not see us human beings who deserve access to clean air, water, and planet. We beg of you, DENY this APPLICATION. Be a force of good for the people of New Mexico.	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026

Orion	Curtis	To whom this may concern, I am writing this in opposition toward project Jupiter in Dona Ana county. I grew up in new Mexico as did my father, grandmother, great grandmother and so on and so forth. In my life time I have seen the winters become mild and dry, the wild fires increase, the rivers run slower and the lakes decrease in water level. In a state that is already in a drought, we do not need this. The promise of jobs for the community is a false promise as we're one of the least educated states, they will be hiring those from out of state, and not putting the money they claim they will be into our community. Our land is precious and beautiful and also fragile. We cannot afford this vision on our already precarious ecosystem. Please think of the future generations not just the short term promises that will inevitably be false. I want to raise children and grandchildren in my home and share the beautiful place that made me who I am. I have never written one of these before , but I care deeply about our state and want to preserve it for everyone, not just the profits of people who have no interest in our culture and communities. Talent flo s place where there is an abundance of water , not in the middle of the desert. Common sense.	1		No	[redacted]									
Arthur	Allen	Mirrored Document While there are many reasons to oppose Project Jupiter, the extreme environmental damage projected by the project provides adequate cause for New Mexico Environment Department to reject the Yucca Growth Infrastructure, LLC Y01 Microgrid Air Quality Construction Permit. Although Yucca Growth has reduced the proposed emissions from the project by proposing to use fuel cells, this change does not adequately mitigate the climate destroying emissions from their plant. The projected emissions still exceed the combined emissions from New Mexico's largest cities. And if those catastrophic numbers weren't bad enough already, those numbers are probably grossly underrated. Yucca Growth estimated their emissions based on the output of ONE FUEL CELL, while the project will employ over 2000 fuel cells, each with a separate stack. The efficiency the fuel cells will vary over time and there is no way to monitor the total output of the plant or force compliance with their original emissions projections. Temperatures rise every summer, today wildfires are burning in three counties and the Rio Grande is dry in Albuquerque earlier every year. This is of no concern to the tech oligarchs. Consumed by the mania of the Artificial Intelligence stock bubble, the Data Lords consider nothing but the maintenance of their stock prices. The New Mexico Environmental Department now has the power to be the grownup in the room and send Yucca Growth Infrastructure back to the drawing board. Tell them to come back when they have plan that is environmentally neutral, a plan that does not make a lord of money for Larry Ellison while immiserating the all the rest of us. [No A.I. used in the composition of this comment.]	1		No			Yes							8/27/2026
Thomas	Gomez	We stopped those Air Permits we commented on when they wanted to build 42 Natural Gas Turbines to power the data center. They got denied for that. So they pivoted to something faster to build - fuel cells, which are still methane-powered. The builder has a terrible record and the threats to our environment and health are still devastating.	1		No			Yes	Yes	Yes	Yes								
Karen	Quandt	Mirrored Document Extend the comment period 60 days, give us time to comment Deny air quality permit due to the track record of Bloom Energy's regulatory failures. Hold a public hearing in Santa Teresa if the permit is not denied.	1		No						Yes	Yes							8/27/2026
Mario	Rodgad	Mirrored Document I urge you to deny the air permits to this project that will poison our air and our environment. Please deny air quality permit due to the track record of Bloom Energy's regulatory failures. https://insiderbusinessresearch.com/bloom-energy-a-classic-energy-darling-waiting-to-fix-demise/ Extend the comment period 60 days. What is the point of economic development if we pollute our air and water?	1		No				Yes					Yes					8/27/2026
Mariah	Nosug	Mirrored Document NO TO THIS WASTEFUL, HARMFUL, UNNECESSARY PROJECT. Purely a corporate money grab at the expense of the citizens. I do not even have the words to describe how unwanted this is by the locals who will have to deal with the fallout of this ecological and public health nightmare. GO AWAY PROJECT JUPITER. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1		No			Yes	Yes	Yes			Yes							8/27/2026
R	Fultz	Mirrored Document The air quality permit MUST be denied. These corporations do NOT share public interests. They have a history of exploitation and unethical practices. Bloom Energy's own history of illegal dumping of hazardous waste is unforgivable. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Approving this permit would be government-sponsored environmental racism, as residents of Doña Ana County (and El Paso County) are already disproportionately impacted by environmental pollution. For years, Doña Ana has been called a "sacrifice zone" (sorrel&tinch); this means our air quality does not meet federal government rules. New Mexico, us El Paso residents rely on your humanity and dedication to ethical environmental mindfulness because Texas sure isn't looking out for combined region. Project Jupiter should be CANCELLED and SCRAPPED. Entirely. Full stop.	1		No						Yes	Yes		Yes	Yes					8/27/2026
Sam	Gusta	Mirrored Document I think this is completely unacceptable. I have serious concerns about watery usage in a desert, as well as energy requirements. This does not belong in New Mexico. This company has a history of dumping illegal waste. This application should be denied. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1		No						Yes	Yes		Yes	Yes					8/27/2026
E	Sandoval	Mirrored Document Please do not provide a permit to project Jupiter. Current data shows that data centers cause environmental damage to nearby communities. The byproducts of the data center will affect the air and water quality for the small rural communities in the area. The public should be given an extra 60 days to review the permit. This company is known to dispose of hazardous waste products which will be detrimental to the community, so the permit should be denied. If the permit is not denied, then a public meeting should be held in the local community in both English and Spanish.	1		No				Yes					Yes					8/27/2026
Rajal	Jones	Mirrored Document Members of the Board, As the largest, privately-owned transportation fleet in the southwestern United States, I'm writing to express my strong support for Project Jupiter, which I believe offers significant benefits to Doña Ana County and southern New Mexico. Our headquarters is based in Doña Ana County, and Project Jupiter promises a significant economic boost creating 4,000 good-paying construction jobs with 1,000 project-supported positions after completion. This will increase local spending across the community and support small businesses across the area. Project Jupiter's commitment to investing millions in Doña Ana County's schools, infrastructure, and local services will also help businesses attract and retain talent while strengthening our local economy and customer base. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $300 million in direct support for schools, infrastructure, and local services; and $5.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. Additionally, Project Jupiter's heard the community's concerns and has decided to use a new energy strategy to reduce regulated emissions and water usage. All these benefits combined contribute to a strong and vibrant community. I urge the New Mexico Environment Department to approve this important project which can help build a more economically diverse and vibrant community. Thank you for your consideration. Regal Jones [redacted] and CEO	3	Yes					Yes	Yes	Yes			Yes	Yes					8/27/2026
Joe	Cordillo	Mirrored Document This project is extremely concerning. Instead of working with community, being transparent, and following the law, Oracle/OpenAI have consistently done the exact opposite. They're currently paying people $26/hr to canvass my neighborhood and get them to submit an automated form letter in support of this air quality permit, and it's someone has concerns or doesn't support it, they're simply throwing away that person's comment/feedback. I can't think of anything that breaks trust with New Mexicans more than. Top it off with the fact that this permit would give them permission to pollute Southern NM as much as a new city of 750,000+ people (bigger than Albuquerque and Las Cruces combined), and they're working with a company (Bloom Energy) who has never built a fuel cell technology project at this scale before, and it's a disaster in the making. I believe our state will grow, but this is irresponsible, and if New Mexicans have to live with this facility, then Oracle and these other out of state companies and their wealthy executives and shareholders need to be responsible. This is clearly not that.	1		No				Yes	Yes	Yes									8/27/2026
Ada	Ovitt	Mirrored Document Deny this permit and make them go back and try again, if they can afford to pour millions into TV ads, elections, paying social media influencers, etc. they can afford to build a project that doesn't destroy our communities. And if they don't want to do that, I understand. Just leave and let New Mexico be. Approving this air quality permit would be an act of environmental racism towards the residents of Doña Ana County who are already subjected to poor quality air. Furthermore, Bloom Energy has a history of incorrect toxic waste disposal so it would be dangerous and negligent to approve the permit. In order to give a fair opportunity for community input, an additional 60 days should be afforded for review and comment. If the permit isn't denied, a public hearing must be held in Santa Teresa in both English and Spanish, and participants must be given the option to participate virtually. Thank you	1		No						Yes	Yes		Yes						8/27/2026

El Proyecto Jupiter tiene el potencial de generar un gran crecimiento economico para el condado de Doña Ana. Se prevé que que genere 4 000 empleos en el sector de construccion y 1 500 empleos vinculados al proyecto. Ademas, el proyecto destinara 50 millones de dolares para reparar y modernizar los sistemas locales de agua; 300 millones de dolares para escuelas, infraestructura y servicios comunitarios; y 5,9 millones de dolares para fomentar programas de capacitacion laboral y apoyar al Boys and Girls Club de las Cruces, el acceso a agua potable, el colegio comunitario local y proyectos de restauracion ambiental. Exhorto al Departamento de Medio Ambiente de Nuevo Mexico a aprobar este importante proyecto para beneficio comunitario y sus alrededores	1		No	No	Support Non-Substantive													8/27/2026
Caleb	Saunders	Mirrored Document As a New Mexico resident, I am writing to express my strong support for Project Jupiter. I believe Project Jupiter represents a responsible investment in New Mexico's future. The project will create high-quality jobs, strengthen the state's economy, and provide lasting benefits to local communities through investments in schools, infrastructure, water systems, and workforce development. I also appreciate that Project Jupiter is being designed with advanced technologies to minimize water use and improve environmental efficiency. These efforts demonstrate a commitment to responsible resource management while supporting economic growth. I respectfully urge the New Mexico Environment Department to approve Project Jupiter's air permit so this important project can move forward and deliver its long-term benefits to New Mexico and its residents.	1		No	No	Support Non-Substantive	Yes												8/27/2026
Jesus	Sanchez	Mirrored Document Como propietario(a) de un negocio local en condado de Doña Ana, deseo expresar mi solido apoyo al Proyecto Jupiter. Para empresas como lo mio, el Proyecto Jupiter representa una excelente oportunidad economica, con la creacion de 4 000 empleos bien remunerados en el sector de construccion y posteriormente 1 500 puestos asociados al proyecto, impulsando el consumo local y beneficiando a pequeñas negocios. El compromiso del Proyecto Jupiter de invertir millones en escuelas, infraestructura y servicios locales del condado de Doña Ana (una excelente) ayudara a los empresas a atraer y retener profesionales, al mismo tiempo que fortalecera nuestra economia local y nuestra base de clientes. Exhorto firmemente al Departamento de Medio Ambiente de Nuevo Mexico a aprobar este proyecto. Atentamente, Jesus Sanchez	1		No				Yes		Yes									8/27/2026
Kierstain	Anonymous	Mirrored Document Extend the period to allow for further testing and review of the project. No pushing forward without giving the people of Dona Ana county their ability to speak in a public forum. DENY THE AIR PERMIT New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." Asks to include in your comment: The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana has been called a "sacrifice zone" (sorrel&tinch); this means our air quality does not meet federal government rules.	1		No															8/27/2026
Angelina	Malave	Mirrored Document Why are you letting these data centers destroy our land? Our air? Our people? The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. We don't need a data center!!! We'd be better off without it, please think of the people, the children who will be affected by the air quality. There is science telling us this is bad. Stop worrying about money and think about the people. The people need clean air, water, homes... Not a massive polluting data center that feeds us false information and only benefits the rich. Do better for us. Please.	1		No						Yes	Yes		Yes	Yes					8/27/2026
David	Phillips	Mirrored Document I go to school nearby and am vehemently against this project. There are others who will say what I want to say better, and I urge you listen to them. This is not right for our people. It's not fair to our land, and is not what I voted for. Complete denial of this project's development is paramount. Not understanding that is inherently selfish and harmful. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1		No				Yes	Yes				Yes	Yes					8/27/2026
Ricardo A.	Rivera	Mirrored Document I am a resident of Las Cruces. I am asking that you deny Yucca Growth Infrastructure's air quality permit. These AI data centers are being pushed through all over the country without real research into their environmental impact. It isn't enough that they're threatening our already fragile ecosystem but that our leaders are agreeing to these projects behind closed doors, under the cover of darkness. Other municipalities where this is happening are finding out that these companies are preying on weak, lower socioeconomic communities that are desperate for growth that they're willing to sign away their future. If you take a look at other data centers, for example Colossus and Colossus 2 in Memphis, these companies know what they're doing is wrong. So much so that when pressed they easily move their centers as far out as possible in hopes of avoiding detection for all the pollution they emit. The people who live near this data center experience increased noise pollution, their air quality drops causing issues for people with asthma and allergies (an issue that plagues the health of people in SW New Mexico), and complain about partial amounts of waste that threatens their health. People and businesses with nothing to hide don't do things like that. They operate in the open, keep everything above board. So why do data centers? Because they know if they do things the right way, they will never get what they want. Don't fall victim to their lies and sign away our future just for a quick buck, a handful of jobs that'll disappear once the center is built, all for an industry that is already starting to show cracks of imminent failure. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1		No						Yes	Yes		Yes	Yes					8/27/2026
Miranda	Wood	Mirrored Document Please DENY this permit due to Bloom Energy's track record with regulatory failures!! The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa. in both English and Spanish, with an option to participate virtually.	1		No														
Casey	Frank	Project Jupiter is highly problematic and harmful for our air quality and environmental health. The emissions of methane and the other toxic chemicals released by the newly proposed fuel cells is just as dangerous as fossil fuels. And so upon hearing so that a basic New Mexicans can have a say! Let the voices of the people who will be affected by the decision to allow the data center to be built and used be heard! Do NOT hurt, damage, and silence us just for the benefit of the few, the wealthy, and the corrupt! Look at the record of this company for its consistent failure to comply with regulations and stop it from happening in our beautiful state to the detriment of everyone and our already fragile ecosystem! ACT FOR THE PEOPLE and reject this company to infiltrate our community. The people are counting on you. Don't let us, the future, and our air quality suffer from unnecessary and dangerous "advancements" in the interest of the greedy. Regulate with more in mind than money and appeasing the powerful and rich corporations!	Mirrored Document 1		No				Yes	Yes		Yes	Yes	8/27/2026						
Luke	Walters	Please do not allow them to continue with this project. Their air permit should be denied. Our water, air and our lives are at stake. New Mexico has been historically plagued with environmental hazards, from nuclear testing to mining and everything in between. This place is sacred and beautiful, we do not need anymore environmental hustlers to jump over... the people do not want this built yet they keep sneakily trying to sway public opinion so they can line their pockets while the locals feel the heat, literally. Thank you for your time and consideration. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Stephan	Fuentes	I am writing to formally express my concerns regarding the potential health impacts associated with the development and operation of artificial intelligence data centers in New Mexico. As these facilities continue to expand, I am particularly concerned about Yucca Growth Infrastructure, LLC-Y03 Microgrid Air Quality Construction, noise pollution, increased strain on local power grids, or environmental emissions. It is vital that the health and well-being of the local community are prioritized and that comprehensive health impact assessments are conducted before further progress is made. I look forward to hearing how your office plans to address these issues and ensure that the development of such technology does not come at the expense of public health. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Thank you for your time and for considering these concerns.	Mirrored Document 1		No				Yes	Yes	Yes		Yes	Yes	8/27/2026					
Sam	Durate	I am a resident of Santa Fe, New Mexico and I ask that you deny Yucca Growth Infrastructure's air quality permit. My family and I have lived in New Mexico for generations and NM will forever be our home. However, our future here is being put in jeopardy with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a major additional mass emissions to our active and long-time contaminant zone would be nothing short of blatant environmental racism. Our metro area is currently 36th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2008. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyper-scale air pollution into our communities. New Mexico is known for its beauty, charm, and diverse landscapes. This proposed air quality permit would put these landscapes and the surrounding areas at risk. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs required by community members.	Mirrored Document 1		No				Yes	Yes	Yes		Yes	Yes	8/27/2026					
Aubri	Kehoe	Hi! My name is Aubri Kehoe and I am a born and raised Las Cruces local and a passionate supporter, enjoyer and lover of this great state we call home, New Mexico. I love and cherish every part of this amazing state and I truly believe that despite the people, communities, and those that landscape and natural resources make this state beautiful and enjoyable. Our state is beyond unique and special yet we're already facing one of the worse droughts in the United States with the Rio Grande down by 80% of its historic historic water flow. With this I can't even imagine how anyone in their right mind can think Doña Ana county can sustain a data plant. I am aware this is a "one-time" fill system but we cannot even afford the one time fill-fill... much less the thousands of gallons of water used to maintain the plant. We are quite literally water bankrupting ourselves and purchasing Doña ana county an inhabitable place for our future and all the future generations. Which is somewhere I hoped to raise my kids, but that seems like less and less of an option the more and more you build this center. No matter how much profit, how can someone or some company possibly think that's okay, where in your humanity? Please think about the people, land, Animals, economy, and communities your affecting not just the short term money jackpot! Aside from that the air quality is a huge concern!!! How can one even begin to think it's okay to emit that much toxins into what's supposed to be our clean breathing air. Beyone moans and groans about cities and factories emissions but now you wanna add these 2 more grids which emit way more. I simply can't even process how any amount of money would make this data center or any data center at that, halfway feasible. It's insane and inhumane. I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-Y03 Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *Y03's application should be denied by NMED because Y03 failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy &indash;no matter what Y03 says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject Y03's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	Mirrored Document 2		No				Yes	Yes		Yes		Yes	8/27/2026					
Cory	Windorff	I am concerned about the proposal for this air quality permit is being pushed through at a fast rate, without a chance for the public to view and comment on the permit. Therefore I am asking for an additional 60 days for comment. So far, I am particularly concerned that the permit requests to emit an extremely high amount of carbon dioxide. It appears the requestor would like to emit more than the entire state, and that is quite concerning. Thank you for your time. Cory	Mirrored Document 1		No				Yes	Yes		Yes		Yes	8/27/2026					
Jack	Bilan	My name is Jack, I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the Y03 Microgrid in Doña Ana County. As a born and raised New Mexican, I feel that Project Jupiter poses a direct threat to the environment and people who make our state so beautiful. There will be catastrophic consequences for the health and wellbeing of people in Doña Ana county and surrounding areas if this project goes through (caused by major CO2 emissions, heat output from the center, etc.). This data center will also use clean drinking water that is already running out for the people of New Mexico. The project's proposed fuel cell powered grid is concerning for many reasons: - the result still produce a high level of greenhouse gas and toxic pollutants - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology at a centralized waste system has never occurred at this scale - Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the Y03 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cells.	Mirrored Document 1	Yes						Yes			Yes		8/27/2026					
Jack	Armstrong	The creation of data centers is not an issue in my opinion (clearly, I am working on the job). The regulation and responsibility standard of these data centers is what I believe to be so very important. I see the effort and lengths that Dupuy the owners have given this in order to regulate and minimize or fully diminish community water bill increases and water quality. The millions upon millions of dollars committed to making sure that this is done the right way without negatively impacting our surroundings, is enormous. I do believe that the future will be more understanding when it comes to large scale data centers, as long as it is done RIGHT. Clayco is doing it right. I will always sign off on something that I believe to be innovative AND done the right way/responsibly. Supported by, Jack Armstrong	Mirrored Document 1		No				Yes	Yes		Yes		Yes	8/27/2026					
Scott	Lopez	June 26, 2026 New Mexico Environment Department Air Quality Bureau 525 Camino de los Marquez Ste. Suite 1 Santa Fe, New Mexico 87505 Re: Support for Project Jupiter &indash; Air Quality Permit Application No. 10883 (Y03 and Bloom Energy natural gas fuel cells), Doña Ana County, New Mexico Dear Sec. Kenney and Air Quality Bureau Staff: On behalf of the New Mexico Nuclear Alliance (NMNA), I am writing to express our strong support for Project Jupiter's Air Quality Permit Application No. 10883 and respectfully encourage the New Mexico Environment Department to approve this important project. The New Mexico Nuclear Alliance is a nonpartisan 501(c)(4) membership organization founded in 2023 to advance reliable, affordable, resilient, and carbon-free energy while unlocking the economic development opportunities that modern energy infrastructure creates for New Mexico's tribal, rural, and metropolitan communities. We are an ecosystem of environmental advocates, scientists, private-sector companies, skilled workers, entrepreneurs, innovators, national laboratories, universities, policymakers, community leaders, and citizens who recognize the growing demand for dependable, around-the-clock energy across New Mexico, the Southwest, and our nation. We believe New Mexico has a unique opportunity to lead by embracing innovation while maintaining a steadfast commitment to environmental stewardship and responsible development. Project Jupiter is poised to bring substantial economic growth to the State of New Mexico. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $90 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $4.8 million to fund workforce development initiatives, along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. Project partners, like Oxide America, have also made notable commitments to the Well Done Foundation to help plug and abandon end-of-life oil and gas wells.	Mirrored Document 2		No				Yes	Yes	Yes				8/27/2026					
Rebecca	Egan	To Whom It May Concern: I would like to share my concerns with the potential air quality permit: - The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. - The air quality permit application should be denied as residents of Doña Ana County are already disproportionately impacted by environmental pollution. - Representatives of Project Jupiter have been soliciting comments, even going so far as to post some poor fellow with a tablet in front of my local Albertsons, in order to skew the comments regarding air quality permits. As locals, we simply do not have the money and power to meet this effort and show actual community opinion. As such, a public hearing NEEDS to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually to ensure that community stakeholders and give a fair opportunity to weigh in on this permit. If this is not an option, the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Regards, Rebecca Egan	Mirrored Document 1		No				Yes	Yes		Yes			8/27/2026					
Fred	Bemis	Good morning,	Mirrored Document 1		No					Yes	Yes		Yes	Yes	8/27/2026					
		I am writing to inform you that the previous comment submitted under my name was "not" submitted by me. I do not know who impersonated me to submit that comment on my behalf but they did not even include my correct contact information (they only provided a phone number of 202-768-4070, which is not mine). I was not even aware of this project until I received an email reminding my response to this public comment period on my business email. As I own a business in New Mexico my information was likely scraped from public records. If some other comments are to be believed, this may be by representatives of the permit requestor themselves as an attempt to skew the WPC record. I called in through the NMED primary phone number and was directed to comment again here to set the record straight. For the record: - The previous comment submitted under my name do not reflect my views and was not authorized by me - I am not a resident of Doña Ana Ana County - I "do not" support Project Jupiter or the Y03 Microgrid - I "do not" support the build of any Air-focused datacenter due to the disproportionate impact to environment, well-being of residents, and extremely limited water resources In regards to the impersonation of myself or other members of our state, should any legal action be necessary, the matter should be referred to the New Mexico Attorneys General. If a public hearing is scheduled (virtually or physically) then I will attend to echo out these details and call attention to the fraud being committed against the State of New Mexico and the affected members of the local community. I must urge that all comments following the same form-letter style submitted under all persons be reviewed and summarily rejected.																		
John	Stroud	As a NM mechanical contracting company based in Albuquerque, I'm writing to express my strong support for Project Jupiter. For businesses like mine, Project Jupiter has resulted in an incredible opportunity for our company. creating 568 good-paying construction jobs for our company alone. 2027 is shaping up to be the best year in our 96-year history. Not only is this resulting in additional jobs for us, but it is increasing local spending across the Albuquerque and close to Project Jupiter's community. We have bought Wilbert's of Estancia of Holmes such as piping, fittings, ductwork, air handling units, etc... In addition, we have already spent several million dollars on new vehicles, forklifts, hand tools, power tools, etc... We have people staying in local motels, leasing apartments, and in some cases buying new houses. We support local grocery stores, restaurants, hardware stores, buying new vehicles, using local doctors and hospitals, and the list goes on and on. Lastly, our folks are spending money and using all of the local entertainment options in the region. Project Jupiter's commitment to investing millions in Doña Ana a Ana County schools, infrastructure, and local services will also help businesses attract and retain talent while strengthening our local economy and customer base. I strongly encourage the New Mexico Environment Department to approve this project. Sincerely, John Stroud Jack B. Henderson Construction Company	Mirrored Document 1		No				Yes	Yes		Yes		Yes	8/27/2026					
Ryan	Sisson	To Whom It May Concern: As a New Mexico business owner who has spent years helping build the facilities and infrastructure that support economic growth across our state, I am writing in support of the air quality permit application associated with the Bloom Energy fuel cells that will provide power for Project Jupiter in Doña Ana County. Reliable energy infrastructure is essential for attracting major investment, creating jobs, and ensuring that transformative projects can succeed in New Mexico. The Bloom Energy fuel cells proposed for Project Jupiter will provide dependable on-site power generation that supports one of the largest private investments in our state's history. Project Jupiter has demonstrated a commitment to New Mexico through its focus on local hiring, local procurement, and investments in community infrastructure. The project's "Doña Ana First" approach creates opportunities for New Mexico contractors, suppliers, skilled tradespeople, and small businesses. Projects of this scale create economic activity far beyond the construction site itself, supporting businesses throughout the state and generating long-term opportunities for New Mexico workers. The proposed fuel cells are a critical component of the project's energy strategy. By generating power on-site, they provide a reliable source of energy for the project while reducing demands on the regional electric grid. This approach helps ensure Project Jupiter can meet its operational needs while supporting continued economic growth throughout the region. New Mexico has an opportunity to demonstrate that it can successfully attract and support world-class technology and infrastructure investments. Approval of this permit will help advance that goal while creating jobs, generating economic activity, and strengthening our state's position as a destination for future investment. I respectfully urge the Department to approve the air quality permit application for the	Mirrored Document 2	Yes																	
Caroline	Toth	Please deny this permit. From the beginning, Project Jupiter has attempted to ignore the public's desperate cries for transparency, communication, and time. For this permit alone, the public should have had at least 60 days to review and comment. The public must be heard. Project Jupiter is paying canvassers to submit comments in their favor to try and warp the perception of public sentiment. In reality, the vast majority of people I have spoken to are AGAINST this movement. We need to keep New Mexico a safe place to live, and that is fundamentally incompatible with Project Jupiter's strategy of manipulating the public into sacrificing their natural resources for the profit of the ruling class. The residents of Doña Ana county have made it abundantly clear that we will not be misled, and we will not cede these precious resources. As we all knew from the start, Project Jupiter is not interested in the health or cooperation of the community. Please do your part in protecting our home by denying this permit and providing 60 days for public review and comment. Thank you.	Mirrored Document 1		No							Yes		Yes	8/27/2026					
Carla	Moore	Reject the permit for Yucca Growth. While there are many reasons to oppose Project Jupiter, the extreme environmental damage projected by the project provides adequate cause for New Mexico Environment Department to reject the Yucca Growth Infrastructure, LLC-Y03 Microgrid Air Quality Construction Permit. Although Yucca Growth has reduced the proposed emissions from the project by proposing to use fuel cells, this change does not adequately mitigate the climate-destroying emissions from their plant. The projected emissions still exceed the combined emissions from New Mexico's largest cities. Yucca Growth estimated their emissions based on the output of ONE FUEL CELL, while the project will employ over 2000 fuel cells, each with a separate stack. The efficiency of the fuel cells will vary over time and there is no way to monitor the total output of the plant or force compliance with their original emissions projections. The New Mexico Environmental Department now has the power to be the grownup in the room and send Yucca Growth Infrastructure back to the drawing board. Tell them to come back when they have a plan that is environmentally neutral and doesn't destroy the environment in the surrounding communities.	Mirrored Document 1		No							Yes		Yes	8/27/2026					

Marlene	Alvarado	I am writing to express my strong opposition to the air quality permit applications submitted by YUCCA Growth Infrastructure LLC for the proposed microgrid, which is intended to power the Project Jupiter data center campus in Santa Teresa. I urge the New Mexico Environment Department (NMED) to deny these permits and to UPHOLD its mission of protecting public health and the environment for current and future generations of New Mexicans. This project is using DECEPTIVE permitting strategy. This project will be functioning as one large fossil fuel source. Our region is already struggling with air quality concerns. Southern New Mexico and the Paso del Norte region experience ongoing challenges related to ozone pollution. Approving this bloom energy fuel cells and calling it "zero-emission" is blatant LIES. The project would release significant amounts of carbon dioxide which will worsen the conditions our region already experiences. It's contribution to the environment would increase the risk of asthma, other respiratory illnesses, and cardiovascular problems. Especially for children, the elderly, and other vulnerable members of our community. I am deeply concerned about the project's contribution to climate change. Project Jupiter is expected to produce 10.1 million tons of greenhouse gas emissions annually, according to public reporting. We are supposed to be reducing greenhouse gases, NOT adding to it. This level of pollution conflicts with New Mexico's climate goals and commitments to transitioning toward cleaner energy sources. The proposed alternative fuel cell technologies DO NOT offer a meaningful solution. They can be presented as a "cleaner option" or "zero-emission" but they still carry environmental risks, including greenhouse gas emissions, thermal concerns, and hazardous waste. Secretary James Kenney, EPD Director Michelle Milano, and NMED have a responsibility to ensure that environmental regulations are applied transparently and that any decision prioritizes the health and well-being of New Mexicans over corporate convenience. New Mexico should not be forced to choose between economic development and the health of its residents. We should not sacrifice our air quality, our communities, or our desert environment to support out-of-state corporate interests. Kenney, Milano, and NMED should not sacrifice the Indigenous communities and their well-being in the region. I DEMAND that Secretary James Kenney, EPD Director Michelle Milano, and the New Mexico Environment Department DENY this permit application and ensure that any public hearings related to this project are transparent, accessible, and offered in both English and Spanish so that all impacted residents of Doña Ana County have the opportunity to participate.	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Michael	Harris	The addition of natural-gas based power generation as this permit requests would be a catastrophe for Dona Ana County, the surrounding area, and indeed New Mexico as a whole. The proposed solid-oxide fuel cell system claims high efficiency and minimal NOX emissions. However, even if true, these claims must be considered alongside the monumental scale of the project. The proposed plant is equivalent in output to El Paso Electric's total generation capacity (including nuclear and solar). EPE's four major natural gas generators are distributed in an area of over 130 sq miles. This project is asking to concentrate *four major power plants* worth of emissions into a single industrial park in Dona Ana County. At any efficiency, that represents an unprecedented increase in pollution of New Mexico's air. Las Cruces already receives smog from El Paso and Ciudad Juarez, and smoke from distant wildfires. Air pollution knows no borders. While the communities of Sunland Park, Santa Teresa, and rural Dona Ana County stand to suffer the most, the air quality in Las Cruces is at high risk from this project. The secondary "heat island" effect of concentrating so much energy into a small area is an emerging concern and should not be ignored; the negative effects of urban heat islands are already well known. The doubling of our area's CO2 emissions - in a time of increasingly extreme weather caused by climate change - may indeed prove to be an existential mistake. I have made a career in the technology sector, and I appreciate the utility of new technology and its ability to make our lives better. As someone who works in the industry, I am confident in saying that the rush to construct these hyperscale "AI" datacenters has no basis in utility or underlying value. Nothing about this new technology is worth sacrificing our air, land, water, and the future of our communities over. As a Las Cruces resident, business owner, and elected official, I respectfully ask that you decline this permit.	1	Merged Document	No		Yes	Yes	Yes		Yes			8/17/2026
Dawn	Martinez	I do NOT support this project. Someone submitted a positive comment in my name but that was not me. I am concerned about the environmental costs of this project and the possibility of increased energy costs. We live in the desert and we cannot afford for any of our water to go to something like this. We should not build this here. Thank you.	1	Merged Document	No		Yes		Yes					8/17/2026
Kyla	Navarro	As a Doña Ana County Resident, a resident of Las Cruces, I am urging the New Mexico Environment Department to deny this permit. The department has a mission to "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Project Jupiter threatens the NMED's very mission to foster a healthy environment for New Mexico with the current proposal for energy generation not only releasing pollutants into the air but threatens our community in Southern New Mexico with other hazardous waste as a result of fuel cell plant. Any advancement of Project Jupiter to operate is a threat to Southern New Mexico. This AI Data Center is demanding more energy than the largest urban areas of New Mexico, entailing that the pollution to power this project will also double our state's pollution concentrated in Southern New Mexico. Pollutants include carbon monoxide and noxious gas that causes many chronic diseases to those living nearby. Our area is considered rural to many but in truth, we live in tandem with the communities of El Paso, Texas, and Ciudad Juarez. The pollutants produced by Project Jupiter will not harm New Mexicans but our neighbors in Texas and Mexico. I will also highlight that the NMED acknowledges and understand the importance of climate change. Allowing this data center to operate will set back our state's climate goals. Southern New Mexico is already impacted by climate change with less rain during our monsoon seasons, and our summer heat lasting well into our fall season. Lastly, I want to point out that the creator of this project has consistently failed to inform the community about the plans and intentions they have for our community natural resources. As I am writing this, they have also been reported to be out of compliance with their jobs report to the county. This project will sacrifice our community for jobs that is already going to out-of-state workers. It is detrimental to the health and future of the residents of New Mexico that you deny this permit.	1	Merged Document	No				Yes	Yes	Yes	Yes		8/17/2026
Noah	Henderson	Dear NMED staff, My name is Noah Henderson. I am a New Mexico resident, living in O'ga P'ogeh, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Although I was not born and raised here in this state, I truly recognize it as a land of enchantment. We need to protect our natural lands. We need to listen to those whose ancestors were on these lands long before we were, especially when they are standing up for sacred lands. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana county near the site have not been properly notified of this air permit application request. We need to recognize the humanity of students attending schools within 5 miles of the proposed site. We need to acknowledge that this permit would cause harm to a school with a majority hispanic population. No student deserves to be subjected to pollution that will likely cause long-term harm to them and their community. Innocent children do not deserve to be victims of this pollution. Let's learn from the examples of the uranium mines in our state that destroyed the environment and wreaked havoc on majority indigenous or tribal communities and their ancestral lands. Those companies had no clear plan for handling the waste and human beings suffered for it. New Mexicans suffered for it. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely,	1	Merged Document	No			Yes	Yes		Yes		Yes	8/17/2026
Marie	Berglund	Project Jupiter will only deplete the water table. There has been no data center where issues with water depletion and water quality haven't arisen. Water is precious anywhere but especially in the desert. Please dont go through with this data center. How are you going to help the people who's land will be worthless because their property os adjacent to project Jupiter? The benefits are potentially short lived and no promises of livable wages	1	Merged Document	No		Yes							8/17/2026
Anonymous	Anonymus	The public should be given an additional 60 days to review and comment on the air quality permit, so that community members can participate equitably. The air quality permit application should be rejected due to Bloom Energy's history of illegally dumping hazardous waste. If the permit is not rejected, a public hearing must be held in Santa Teresa , in both English and Spanish, with the option to participate online. Approving this permit would be government-backed environmental racism , because the people of Doña Ana County already suffer too much from environmental pollution. For years, Doña Ana County has been called a 'non-compliance' zone—this means that our air quality does not meet federal government rules	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Becky	Corran	June 28, 2026 Re: Air Quality Construction Permit Yucca Growth Infrastructure, LLC Good afternoon, Permit Review Team: Thank you for the opportunity to comment on the Construction Permit for Yucca Growth Infrastructure LLC in Doña Ana County. This proposal is of significant public concern, given the existing air quality issues in our region, and the likely increase to adverse health outcomes if a permit is issued. Below I will outline a number of these issues in detail, and have included references at the end of this letter. The proposed microgrids are planned to release more than 10,100,000 pounds of greenhouse gases every year. Our region currently experiences poor air quality due to our unique meteorological and geographic profile. Doña Ana County is often the only New Mexico county that appears on the EPA's "Current Nonattainment Counties for All Criteria Pollutants," including for May 2026 (Ozone and PM-10.) With substantial morbidity from a variety of respiratory and cardiovascular diseases (see referred link) the cost of added pollutants from this plant would mean more missed work and school days, and higher risk of mortality from a number of diseases (American Lung Association, 2024). Given the vulnerability of residents, and the existing air quality issues that Las Cruces experiences, I request that no permit be issued to Yucca Growth Infrastructure that would lead to increased hazardous air pollutants (EPA, 2016). Respectfully, Becky Corran, MPH	4	Merged Document	Yes			Yes	Yes					8/17/2026
Ana	Brouwer	I am deeply disturbed by the decision to disregard our community's health and future sustainability by allowing a data center in our already drought-stricken area. This project will bring very few short-term benefits and very dire long term effects. If we don't have enough water in our area, property values will go down. Growth in our area will collapse. Our already arid landscape will become even more hostile, especially for small children and families. I have small children and this irresponsible decision will likely impact their quality of life with its disastrous environmental impacts. It will accelerate climate change. Why should billion dollar companies receive tax breaks for something that will hurt our community? Stop Project Jupiter! Voters will not forget who allowed this to happen.	1	Merged Document	No		Yes		Yes					8/17/2026
James	Michaels	I am writing to express my general support for the construction of data centers in the furtherance of US capabilities in artifical intelligence. However, I feel we must preserve the beauty of our landscape, and be good stewards of our natural resources. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project, with due consideration of environmental impacts. Sincerely, James	1	Merged Document	No		Yes		Yes					8/17/2026
Marcus	Lopez	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. I am currently working on the Meta data center in Valencia county, Im an equipment operator and I have been on board for 8 years its the best and safest jobsite I have ever been on. Ive made a living wage and I am building a pension for my retirement. Sincerely, Marcus Lopez	1	Merged Document	No		Yes		Yes					8/17/2026

Chloe	Dusti	I am writing to express my disdain or Project Jupiter, which I believe offers significant problems for our community. Project Jupiter is poised to cause many problems for my county and for the local families. I think that expanding so and building these data centers isn't the worst idea, but that the location you chose is a bad choice. Theres no local resources or any prior help at all to retain the water to begin with. I think your "water friendly" methods of running are lies and propaganda and that's why you push so much money into the community. Your money helps nothing if there's no resources left to live. I urge the New Mexico Environment Department to please not approve this project. Sincerely, Chloe dusti	1	Merged Document	No		Yes		Yes					8/17/2026
Evelyn	Hernandez	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doa Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, Evelyn Hernandez I think this is really cool for last cruces because we don't really have anything thing here and it's good to hear more stuff is coming here.	1	Merged Document	No		Yes		Yes					8/17/2026
Michael	Argueta	The environmental department is supposed to be working to protect our land and our locals who inhabit that land. Data centers like Project Jupiter do nothing but harm the beautiful land of New Mexico that we are supposed to protect and cherish. The Rio Grande, especially in the parts that run through New Mexico, does not have the water to sustain a Data center and also sustain the life that needs it. New Mexico does not need another project that puts money in the pockets of billionaires instead of our hard-working citizens. This project will do nothing but harm the land and people of Doña Ana County. AI data centers consumed 264 BILLION gallons of water in 2025, and according to a study by Alex de Vries-Gao, AI data centers release around as much CO2 per year as the entierety of New York City. AI facilities often hide some of these, as the metrics they report do not include indirect water consumtion, however indirect water consumtion also affects the environment and people in the area. Even if data centers didn't use that much water, they still polute almost all clean drinking water in the area, causing citizens to not have clean drinking water- something that should be a basic human right. Adding a data center is not protecting the land or our people, no matter how many jobs it creates, it will harm more people in the long run. There is a long history of projects like this in New Mexico in poor and native american communities, making land almost uninhabitable for them. As someone who loves New Mexico, is passionate about the environment, and is going to college to hopefully study freshwater ecology in places like the Rio Grande, I urge you to not let this happen. This place means the world to me, and an AI data center would destroy everything I love about it here. Please protect our towns, our state, our people, and our environment from their demise. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No		Yes	Yes	Yes	Yes		Yes	Yes	8/17/2026
Manuel	Mireles	Hello. I am writing to NMED to please consider denying the proposed fuel cell power air quality permit and any other permit for non renewable energy sources to power project Jupiter. I am a resident of west El Paso, and I am very concerned for the detrimental effects of fuel powered plants on our communities health due to its massive environmental/air pollution. The El Paso west side area, upper valley, country club, sunland park, franking hills, mesa hills, Anthony, canutillo, will all be directly impacted by this pollution. Our health is paramount for an ongoing thriving community. I implore that you please seek to approve only clean power alternatives even if that means that it will cost project Jupiter more investment money. Their proposed energy source does not align with the air and environmental goals for Dona Ana County and West El Paso. Thank you for allowing us to voice our comments and concerns. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No			Yes	Yes		Yes	Yes	Yes	8/17/2026
Ariel	Amendola	I am opposed to granting an air permit to Oracle's Project Jupiter. This data center would still emit green house gasses the size of three New Mexico cities, and generate enormous amount of hazardous waste. I spoke with the people from Bloom technology at the career fair. They do not plan to make Bloom technology more sustainable when I asked if this was something they wish to change in their practice. They stated AI data centers at this size could not be run on sustainable technology as we see it now and have no interest in changing this. Doña Ana county is on the top 20 for poor air quality. Our society should be investing in technology that does not cause pollution, use our water, and extract out land. No air permits for Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Carissa	Anonymous	I am against any methane or water use for this data center. It is not a responsible or sustained use of land, water or gas. Further, AI is on the verge of a bubble and when it ruptures, this community will pay with the little resources we have for our people. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026

Josh	Plante	A data center of this scale may bring jobs and wealth to New Mexico but it's also going to bring diseases and incurable sickness to so many people from heavy metals and emissions being leaked into the ground water and surrounding area. Methane fuel cells and pipelines will leak out eventually and it will be your fault for not stopping this!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Dylann	Ray	My name is Dylann Ray and I am a resident of Doña Ana County where Project Jupiter is currently in development. After recently speaking directly at home with residents in Sundland Park, one of the communities nearest the project's construction site, it is clear to me that this massive data center complex as proposed is not something this area can afford. Folks in and near Sunland Park are already reporting difficulty accessing clean water, concerns about air quality, and trouble with waste management. This community is already suffering environmentally, and all of these problems will worsen with Project Jupiter in operation; while this project may tout itself as "low impact", there is no such thing for a community already impacted. The change to fuel cell technology is not enough. The use of methane gas, release of carcinogens, and estimation of 10 million extra tons of carbon into the air every year is unacceptable. I am writing today to urge you to reject the air quality permit application submitted by Yucca Growth Infrastructure, LLC which is attached to Project Jupiter. Do not sell our air to greedy billionaires with a history of illegal and hazardous waste dumping (Bloom Energy) for the hollow promise of jobs and economic growth. There is no return on investment for the operational cost of human lives and livelihoods. Protect New Mexico and it's people from this predatory and extractive sham of a business deal. Should this permit be approved, a hearing should be held in Santa Teresa, the community in which the project is being built, to offer full transparency and accountability to the people most affected by that negligent decision. Too many of the folks I met nearby had still not even heard of this project at all. Because the public clearly needs more information and engagement regarding this project, I am also writing to urge you to extend the comment period 60 days in order to hear from more residents on this matter.	1	Merged Document	No				Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Chris	Schaefer	I beg of you to deny the most recent permit submitted by Project Jupiter for emit outrageous amounts of pollution into our communities air. This is absolutely unacceptable and I am disappointed that this project has gone as far as it has. Too much water use, too much air pollution, too little accountability, too little information. HOST A PUBLIC MEETING! Answer our questions. Face your constituents, you work for us! Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes		Yes				Yes	8/17/2026
Anonymous	Anonymous	KEEP DATA CENTERS OUT OF NM!!! As a born, raised, citizen: I love my state, from the bottom of my heart. From the breathtaking sunsets/sunrises, to the set-in-awe views from this beautiful plane (mountain, rivers, animals, etc.) to the people and families allowing the metro area to keep running. But, if there is one thing that I cannot imagine "fitting in" with everything we all know and love, is the direct cause and effect of putting a water guzzling, massive production of heat, noise pollution, and an insane reduction in fertility rates in wildlife, livestock, etc. Why? This is because as of right now, our infamous Rio Grande is already drying up, and on top of that, our rains are shorter than I've seen any other year I've lived here. The installation of a data center would make the water we do get to our HOMES, WELLS, REFRIGERATORS will be DIRTY. The HEAT has ALREADY caused med to high Fire Hazards. DO NOT ACT OBLIVIOUS AS IF YOU DO NOT SEE HOW THE CONS SEVERELY OUTWEIGH, OUTNUMBER AND OUTPOPULATE *any* "pros". Air quality is not the only thing in danger here. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Joshua	De la Cruz	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. The public should be given an additional 60 days to review and comment. The air quality permit should be denied given Bloom Energy's track record of illegally dumping hazardous waste. If the permit is not denied a public hearing needs to be held in Santa Teresa.	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Teri	Orr	I am writing out of grave concern regarding Project Jupiter and the green-washed project that will have devastating effects on our local ecosystem, people's health, and our future economy (re- tourism). I am imploring three key things: Given the devastating ecological impact of this project: FIRST: 1. Deny the permit Given that this project has picked up steam without sufficient dialogue, I note that 2. the public should be given an extra 60 days to review and comment if the permit were awarded. FINALLY: if the permit isn't denied, we deserve the opportunity for a public hearing.	1	Merged Document	No		No	Oppose - Non-Substantive			Yes				Yes	8/17/2026
Anonymous	Anonymous	As a resident of New Mexico, I am deeply disturbed by the proposal of this data center, and I implore that the permit for this site be denied. Driving by the Rio Grande, it is painfully apparent that our state's precious water resources are already strained to their capacity. Allowing this data center to be constructed would only compound the problem, using gallons upon gallons of water every hour. The public must be given more time to review the air quality permit, and the permit MUST be denied.	1	Merged Document	No				Yes	Yes						8/17/2026
Ciarra	Marrufo	I am a citizen living in Las Cruces that specifically moved here to remove myself from the toxic environment of polluted air that contributed to my debilitating autoimmune disease that has destroyed my health and my life. A data center will contribute to the poor air quality in this area and require me to move my family. Not only air pollution but water pollution and usage as well. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. I am a young breast cancer survivor and have a compromised immune system. I cannot live in close proximity to these pollutants. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Lila	Nezar	NMED must categorically reject the project Jupiter data center. New Mexicans have made their opposition clear, the toll this data center would have on our environment and resources is outrageous. It cannot be over emphasized how project Jupiter would create more emissions than the states 3 biggest cities COMBINED, and use copious volumes of water while Sunland Park still lacks clean drinking water. There is no world in which approving this project would be good for New Mexicans. NMED must protect our environment and New Mexicans, that can only be achieved by saying NO to project Jupiter. Further the permits submitted by project Jupiter were found to be unacceptable as project Jupiter LIED to obscure the outrageous amount of emissions it would produce. We cannot trust that this project has the best interest of New Mexicans at heart when every action has shown disdain for our population and environment. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Kym	Ramsey	To the New Mexico Environment Department, Air Quality Bureau: I am writing in opposition to the air quality permit application for the Bloom Energy fuel cell microgrid proposed for Project Jupiter in Santa Teresa, Doña Ana County. My husband and I bought our home here in 2014. Our son turns five in a week and a half, and we want him to grow up in this place, not be forced out because the air isn't safe. I've seen what happens to communities near industrial polluters: towns where it feels like everyone eventually gets sick, where families either leave or stay and hope. No family in this county should have to make that choice. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations," and the Air Quality Bureau exists to "protect the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." I'm asking NMED to honor that mission: Extend the comment period an additional 60 days. This $165 billion project's air permit has already been rewritten once. Community members, especially Spanish speaking residents, need real time to review the filings and participate equally with the developer's legal and technical teams. Deny the permit. Bloom Energy has a documented history of hazardous waste violations. The EPA fined Bloom $1.16 million in 2020 for shipping hundreds of hazardous waste loads, including dozens to unpermitted facilities, without legally required manifests, from 2015 through 2019. Bloom has also faced litigation alleging it illegally dumped benzene, a known carcinogen, into the ground at a California facility. A company with this record should not be trusted to self monitor a facility this size next to our homes. If the permit isn't denied, hold a public hearing in Santa Teresa, in both English and Spanish, with a virtual option, so residents who can't travel or are more comfortable in Spanish aren't shut out. Recognize that approving this permit is government sponsored environmental racism. Doña Ana County residents already carry a disproportionate pollution burden. Adding a multi gigawatt facility here, in a majority Hispanic community that has had little real say, repeats a familiar pattern of putting industrial burdens where people have the least power to push back. Acknowledge this community cannot absorb more pollution. The Sunland Park area of Doña Ana County is a federally designated nonattainment area for ozone, meaning our air already fails to meet the federal health standard. Even with the switch to fuel cells, the developer's own estimates put annual emissions at roughly 10 million tons of greenhouse gases. Adding a major new emissions source on top of air already out of compliance contradicts NMED's own mandate to prevent further deterioration. We've put twelve years into this home and this community. I'm not asking NMED to choose jobs over health. I'm asking it to make sure my son doesn't grow up in a place where that was ever a real trade off. Please put the health of Doña Ana County residents ahead of this project's timeline.	1	Merged Document	No					Yes	Yes		Yes	Yes	Yes	8/17/2026
Jade	Brandt	Project Jupiter must not move forward. Data centers are known to pollute the land, air, and water of the communities they are built in. The sound pollution alone is detrimental to the quality of life of both human and animal residents. Bloom Energy already has a bad record with waste management of their sites. Their air quality permit application should be denied based on this. The community has a right to be heard in a public hearing should this move forward. We must oppose this project. We must listen to and follow the wishes of the communities that would be impacted by this site. Not a single site like this has improved the lives of the communities they exist in. As we head into a super el Niño year with already record breaking heat the last thing new mexico should be approving is a site estimated to produce astronomical amounts of CO2 that will only further negatively impact the environment. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Jay	Veater	I'm tired of submitting these things pretending to be nice to the people who want to posion the air and water in New Mexico. If you care about the land, the people or even just the planet itself you would reject everything project Jupiter. Including this air quality permit. Otherwise you fail not only New Mexico, but the generations beyond us that you have doomed. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Kyla	Navarro	As a resident of Doña Ana county, I am asking you to deny Yucca Growth Infrastructure's air quality permit. The New Mexico Environment Department has a duty to the residents of the state to ensure we are protected from environmental hazards. Furthermore, the NMED has a larger task in upholding health and environmental standards because the Environmental Protection Agency is rolling back federal standards for industry profit. Many New Mexicans in southern New Mexico need NMED to deny these air permits to ensure that our community can thrive. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Yucca Growth Infrastructure and all associated organizations with Project Jupiter, have also failed to informed the public of what exactly is happening with their AI Data Center. The community has voiced their frustrations countless times yet they want to keep us in the dark knowing that their plans is to pollute our air and dry our water resources. PLEASE deny these air permits for the health and safety of Southern New Mexico. Our community already struggles to receive resources from our state. Our health and well-being should not be sacrificed for the profit of someone else. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes	Yes	Yes				Yes	8/17/2026
Kate	OShea	As a Las Cruces homeowner, I am alarmed that this county is considering Project Jupiter given the environmental damage it will cause. 1. Approving this permit would be government-sponsored environmental racism. Residents of Doña Ana County are already disproportionately impacted by environmental pollution: Doña Ana County has been called a 'nonattainment' zone, meaning our air quality does not meet federal government rules. Project Jupiter will only make this worse. 2. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. 3. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. 4. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. I hope you will consider the real dangers posed by the project and protect the citizens of Doña Ana County by denying this permit. Sincerely, Kate OShea	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Diane	Martin	This AI data center nightmare will reduce available water in a hyper drought prone area. It will use up electrical resources to have the existing residents pay more for basics like power and water. Please consider relocating this project to the site of the closed Four Corners Generating Station. It already has the electrical infrastructure and can use solar/battery + wind there. Likewise morgan lake was a prior water source. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Thank you.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Trenton	White	My name is Trenton White, and I'm a student at New Mexico State University. I'm writing this comment to ask that you deny this new air quality permit, as it does very little to solve the fundamental issues at hand with Project Jupiter's environmental concerns. While this new fuel cell technology promotes itself as a safe and environmental option of renewable energy, it's technology is unproven to work at this large of a scale, and the energy itself still needs harmful energy resources like natural gas to work. While I'm not an expert, and I'm sure not the informed person on this topic, I have not heard a single positive thing about Project Jupiter, and it's plan to greatly hurt our environment for the sake of making it's billionaire owners richer. I can ensure you that many NMSU students like myself don't want this project near us, and rather, would want to move as far away from it rather than live near this harmful project. I personally call for this air quality permit to be denied, or for the air quality permit to be extended by at least 60 days, so that more students which are the future of this region and state can make their voices heard. Additionally, I call for further transparency on Project Jupiter, which has worked hard to keep the community in the dark and hide their harmful statistics from the public. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No					Yes	Yes		Yes		Yes	8/17/2026
Gill	Sorg	If data centers, including Jupiter, can't be carbon, CO2, free, and not use Fresh portable water it cannot be built and operate. All claims must be scientifically proven - it's as simple as that. Therefore no fossil fuel can be burned. No methane no carbon dioxide produced. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Rachel	Perry	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. As New Mexicans, I believe we unanimously agree that we do not want this project because it will indubitably decrease our quality of life by destroying our natural resources from its beginning, on.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Haley	Grant	Project Jupiter is fraught with severe environmental, health, and energy risks. This is nothing nothing new to the many other rural areas that have suffered and opposed data centers that pits billionaire hyper-expansionism against the health and well-being of the people. NMED must extend the comment and period another 60 days and deny Project Jupiter's air quality application permit recognizing that Bloom's projects are environmentally destructive and dishonest. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. NMED must grant a public hearing in Santa Teresa if the permit is not denied.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Austin	Zachary	The Rio Grande is barren. A river without water. Next Project Jupiter wants the air + whatever water is left. ABSOLUTELY NOT. Tell Oracle to fund NM education, roads, and people without destroying this state! Oracle has already ruined media/entertainment. They back a deranged President. NO, NO, NO to Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Melinda	Jones	am submitting this comment in opposition to granting the air quality permit for Project Jupiter's proposed fuel cell microgrid at this time. I want to be clear: I am not opposed to AI development or to economic growth in southern New Mexico. I support innovation. However, I am deeply concerned that this permit process is being used to work around existing air quality protections rather than comply with them. The area around Santa Teresa and Sunland Park already exceeds federal ozone standards (Oilandgaswatch) — meaning this community is already breathing air that does not meet the law. Environmental advocates have noted the legacy of environmental injustice and pollution that communities in this area already bear. (CleanTechnica) Adding a major new emissions source on top of an already overburdened airshed is not acceptable, regardless of whether the technology is slightly cleaner than what was proposed before. While the developers note that the fuel cell system would reduce nitrous oxide emissions by about 92% compared to the previous gas turbine plans, the project would still emit approximately 10.1 million tons of greenhouse gases per year. That is not a clean energy solution — it is a fossil fuel facility at unprecedented scale. Experts have called this project "likely to be one of the most expensive fossil-fueled power generation projects in history," and the technology has never been deployed at anything close to this scale. Switching the power system design mid-permitting — after 7,000 public comments were already submitted on the previous application — and restarting the clock should not be used as a strategy to avoid accountability. The public deserves a full and fair review of what is actually being proposed, not a rushed approval of an unproven technology at gigawatt scale. I urge NMED to deny this permit until the developers can demonstrate that the project will not worsen air quality in a region already out of attainment with federal standards. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Thank you for accepting public comment on this important decision.	1	Merged Document	No					Yes	Yes		Yes		Yes	8/17/2026

Darcy	Nagle-O'Briwn	I am writing to express concern regarding Bloom Energy's air quality permit application. It should be denied. Bloom Energy has a history of illegally dumping hazardous waste. Furthermore, Bloom Energy's proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. There are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? Likewise, there are no provisions to monitor upstream methane gas nor enforce emissions standards. A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC. A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. At the very least, the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate. New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a HEALTHY and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." Bloom Energy's project and specifically their application for an air quality permit does not meet these standards. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air. Project Jupiter will produce more air pollution than the two consumer electrical grids that power all NM families and businesses. Developers did not propose adequate pollution controls. They estimated the plant's pollution based on tests from a very small unit (only 65 kW) but the power plant they want to build is 37,000 times bigger. A 15% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Estimated pollution from the plant's gas pipelines is not included and Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body causing irreversible disease and persist long term in the water and soil. Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. Deny this permit application and give the community a right to defend their access to clean air. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	2	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Veronica	Navigato	Please reject project Jupiter. This is in no way good for our state. This is becoming a race to the bottom and the outcomes will be disastrous. Data centers for profit are damaging for the environment and state. They are siphon wealth and resources out of our land and communities. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Timothy	Anonymous	I have been a citizen in Doña Ana County my whole life , it has roots in my family that cannot be taken away , however this data center makes me worry if living in this area will someday not be worth it , i would hate to leave my community for something so utterly useless to the people of this country. I am 110% against this data center and if this community was more i formed about the voting schedules of their own county then we wouldn't have these centers to begin with , its disgusting to see these things go through without more push back , even knowing its not anything people want . The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Josiah	Garcia	Dear NMED staff, My name is Josiah Garcia. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a farmer and I believe that our communities are deserving of clean air healthy food, clean water and support from their own local governments if not the nations, NOW more than ever we need to put our foot down and make some real change before none of us have a place to call home. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Josiah Garcia	1	Merged Document	No		Yes	Yes	Yes		Yes		Yes	8/17/2026
Anonymous	Anonymous	The construction of a methane-based power plant in Doña Ana County is a horrible idea that should not be carried out. Aside from the horrible sounds and blinding lights produced by these kinds of power plants at all hours of the day, this power plant would also fill the air with toxic gases and the soil with toxic chemical waste. Bloom Energy also has a history of illegally dumping hazardous waste. Given this history, the air quality permit application should be denied; Bloom Energy clearly cannot be trusted to protect our environment. The approval of this permit would, in effect, act as government-sponsored environmental racism against the residents of Doña Ana County, not in keeping with the purposes of either the NMED or the Air Quality Bureau. The public should be given an additional 60 days to review and comment on the air quality permit so that community members can equitably engage with the issue. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Furthermore, if the permit is not denied, a hearing must be held in Santa Teresa in both English and Spanish with the option to participate virtually so that community members can adequately make their voices heard.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Chrystian	Anonymous	I am concerned about the unprecedented levels of waste and pollution that are predicted to come from Project Jupiter without any oversight, regulation, it consideration for the local and global communities and their environment, effects on health, consideration, or approval. I agree with our NM and West Texas communities as a whole against the project with it's current lack of regulation. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Gillian	Taylor	Do not allow project Jupiter to go forward. We cannot endanger the air quality, water quality, and ecosystem of southern New Mexico for a data center that we don't need. This project is not sustainable and not popular. I am a resident of Tijeras NM and my family and I have lived here for decades. Throughout my life, I have seen changes in my back yard related to climate change, and the amount of greenhouse gas emissions and pollutants expelled by project Jupiter will no doubt exacerbate these changes everywhere. Doña Ana county already experiences decreased air quality compared to the rest of the State, and its residents are already disproportionately impacted by pollution. Additionally, Bloom Energy has a history of illegally dumping hazardous waste. Please deny this air quality permit, for the safety and health of the residents of Doña Ana and the rest of New Mexico and the neighboring states. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Gloria	Baron	Please stop them. Air quality when Asarco was operating was dangerous. Don't let it happen again. We live in a fragile ecosystem that is bound together. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Teresa	Louis-Tomlinson	We need to stop the construction of data centers throughout our state. We do not have the resources to support them. Our water supply is already at risk, and we need to have clean air to breathe. Data centers would put us all at risk. We can't eat, drink, or breathe data! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Mathew	Martinez	I am strongly urging bureau to reject this permit for the reason that we as a community do not need more data centers. We need a lot of things and more data centers is not one of those necessities, the environment has been on a slow decline and another data center would put us at rock bottom. We need to focus on preserving and maintaining the future of our environment for generations to come. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Demmy	Smith	I truly believe that the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. And more importantly that the permit should be straight up denied considering Bloom Energy has a history of illegally dumping hazardous materials. New Mexicans already with unclean water, polluted air, a history of health issues among the down winders, etc. and especially in the Sunland Park and Santa Teresa area do they struggle with access to clean water. Letting a company known for dumping hazardous materials have access to an air quality permit is just reckless. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Dana	Kroos	The Yucca Growth Infrastructure, LLC Fuel Cell Air Quality Permit for PROJECT JUPITER should not be approved because the project threatens the long term and short term environmental health of our community. Increased air pollution from fuel cell operations can worsen local air quality, harm wildlife habitats, and negatively affect the health of nearby residents, especially children, seniors, and people with respiratory conditions. Construction and industrial activity may also increase noise, traffic, and strain on local resources. Our area already faces environmental pressures, and approving this permit could create lasting damage to the land, water, and quality of life for current and future generations. We live here. Please don't make that impossible! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Alex	Herrera	I am furious! There is so many places in New Mexico that is far away from PEOPLE. A location that will not affect our water supply, our environment, endless pollution and toxins! This was rushed through without approval from citizens. This is going to affect my property value, my electric bill. my water bill, the environment and how sick I'm going to get because I'm already suffering from autoimmune illness from all the toxins in the air and food. I really loved my city and the people who ran it and protected it and kept it clean! Who got paid off! What the hell is going on! Selling out our quality of life. Destroying our health. This is allllll about money and not about the Citizens well-being. This is disgusting and I'm furious. how could you do this to Dona Ana citizens! The Brown water held up in Congress. The destruction of communities. The pollution the toxins. We don't have any water!!! What in God's name are you thinking? You know darn well that it's going to take a lot of water to clean these systems out. We don't need data centers. This is all about money, not people. I'm going to have to sell my house and move away. I cannot handle toxins. I'm already sick. I'm so furious! Supposed to represent the Citizens of Dona Ana County! Instead you hid it from us! It's criminal! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	I am a born-and-raised New Mexico resident, and I refuse to allow a data center that would pollute our land and line the pockets of out-of-state billionaires to be built in our state. The supposed "positives" of this data center being built are far, FAR outweighed by the factual negatives. Pollution in the form of massive amounts of carbon dioxide (more than our three largest cities combined) and toxic waste will be released, and our state already has one of the lowest air quality indexes in the country. We are already struggling with severe droughts, and have for years, and yet this data center would require many, many gallons of this precious resource that we already lack. The fact that Yucca Growth Infrastructure has given no valid data to back their claims of the supposed "safety" of their data center is extremely concerning; are we betting the lives of an entire community for data whose functions were merely simulated without actually being verified in the real world? It is incredibly disappointing to see the Air Quality Bureau, and the New Mexico Environment Department as a whole, even consider accepting this proposal. Does lining your pockets matter more than the lives of the people you share this state with? Does money outweigh the beauty of the Land of Enchantment, which you supposedly work to protect? Because if you go through with accepting this permit from Project Jupiter, that's the only conclusion I can come to. Deny this air quality permit application. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes				Yes	8/17/2026
Christina	Chavez	The citizens of NM DO NOT want AI data centers built around our state. We are already in a water crisis, which we have been in for decades. It gets worse every year, our reservoirs get lower each year, our river beds dry up earlier every year. Water is a life resource that should be used by, people, animals, and nature. Not for cooling centers like these. No water, means no life. We have to protect this recourse for future generations. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Mark	Lusk	Las Cruces and Doña Ana county still have adequate to good air quality excepting during dust storms. This important factor in quality of life is threatened by Project Jupiter, a project that has failed to submit environmental and jobs reports on time. This project, which never should have been approved, needs to be rolled back and at a minimum held to strict environmental standards. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by severe air pollution.	1	Merged Document	No			Yes	Yes	Yes		Yes	Yes	8/17/2026
A	McCabe	Data centers destroy ecosystems, don't let the ecosystem destroying mass surveillance enabling, constitutional rights destroying, never ending noise & light, water gobbling surveillance machine for the prison state steal all our water & kill our people. No more data centers. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes			Yes	Yes	Yes	8/17/2026
Vivian	Krenz	Please do not allow Project Jupiter to go forward. It is unbelievably reckless to try to put a data center in a desert area that is already under drought conditions. Water is a precious resource and it should not be going to data centers. As a New Mexican resident I am thoroughly opposed to this project. There is no economic or technological gain that is worth the damage to the environment and communities that this project will cause. I vote no! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Suzanne	Smith	I am writing to request that the NMED deny the air quality application of of Bloom Energy's methane powered fuel cell plant. Dona Ana county is already negative affected by environmental pollution, and I am concerned that this proposed plant powered by methane will only the area in worse shape than it already is. The citizens of that county deserve better air quality not worse. It is a fact that Bloom Energy already has had issues with its illegal dumping of hazardous waste. And, the EPA classifies Bloom as a Large Quantity Generator of hazardous waste, fined the company $1.16 million in 2020 for 258 unmanifested benzene shipments, and Bloom settled a 2016 federal lawsuit from a contractor who found benzene in canisters Bloom labeled non-hazardous. Approving Bloom Energy's air quality application would be denying the citizens of that county the quality of life they deserve. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air (see tables below) Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses. Developers did not propose pollution controls They estimated the plant's pollution based on tests from a very small unit (only 65 kW) but the power plant they want to build is 37,000 times bigger. A 15% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Estimated pollution from the plant's gas pipelines is not included Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, the water, and the soil. Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. This possible private gas plant is estimated to release 10 million tons of carbon dioxide into the air per year. This amount of C02 is more than Southern NM and West Texas Power Grid AND the power grid for the rest of New Mexico. The private power plant would serve only a couple of out of state corporation while those power grids supply power to the people of New Mexico. Allowing this air permit would worsen the heat and quality of life in this state. Please do not allow more pollution and environmental destruction in Dona Ana county. I ask that you deny the application. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Respectfully, Suzanne Smith Santa Fe, NM	1	Merged Document	No		Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Karen	Wening	This project will devastate New Mexico's already disastrously low water supply. It will make the state uninhabitable. Under no circumstances should it be allowed to exist. I am deeply opposed to the construction of Project Jupiter. The project as proposed is far beyond destructive. Absolutely no effort is being made to minimize the impact to area residents and the environment. It will create a toxic wasteland, nothing less. An additional 60 days is essential for public review of the air quality permit. Bloom Energy has a history of illegally dumping hazardous waste and actively concealing it. Because of this, their application for an air quality permit should be denied. Dona Ana County has been disproportionately targeted for environmentally destructive projects, showing that the location was selected to impact a minority majority population that would allow it to proceed with little opposition. In short, there is nothing practical or ethical about this project. It will destroy an already endangered part of the state and create a wholly unliveable area. Our resources and residents must be protected from this! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be nothing short of government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Hernán	Gómez	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air. This is a major threat to the future and quality of life in New Mexico. It is shortsighted to allow Project Jupiter to move forward. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes		Yes	Yes	Yes	8/17/2026

Madeline	Rappaport-Blazejewska	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'non-attainment' zone— this means our air quality does not meet federal government rules. Angela	Zaffee	I am writing to give my reserved approval for Project Jupiter. If the things I heard about adding 1500 permanent jobs to NM, a one time water full-up, and a micro grid to generate its own power, I would be for the project. I just want the project to employ New Mexicans, not add more pollutants than necessary to the environment, stick to their one time fill up, and have minimal noise. If they company can stick to these promises, Ill give my support. Sincerely,	Merged Document	1	No	[redacted]			Yes		Yes		Yes			8/17/2026
Jesus	Valtierra	Escribo para expresar mi apoyo al Proyecto Jupiter, ya que considero que ofrece beneficios significativos para nuestra comunidad. El Proyecto Jupiter tiene el potencial de generar un gran crecimiento economico para el condado de Doña Ana. Se prevé que genere 4 000 empleos en el sector de construccion y 1 500 empleos vinculados al proyecto. Ademas, el proyecto destinara 50 millones de dolares para reparar y modernizar los sistemas locales de agua; 360 millones de dolares para escuelas, infraestructura y servicios comunitarios; y 6,9 millones de dolares para fomentar programas de capacitacion laboral y apoyar al Boys and Girls Club de Las Cruces, el acceso a agua potable, el colegio comunitario local y proyectos de restauracion ambiental. Exhorto al Departamento de Medio Ambiente de Nuevo México a aprobar este importante proyecto para nuestra comunidad. Atentamente,	Merged Document	1	No	[redacted]	No	Support Non-Substantive	Yes							8/17/2026

Rebecca	Wells	As a New Mexico resident, I am writing to express my strong support for Project Jupiter. I believe Project Jupiter reflects the kind of responsible investment that can benefit both New Mexico and the communities where it is being built. The project can bring meaningful job creation, long-term economic opportunity, and important support for local schools, infrastructure, water systems, and workforce development. I also appreciate that Project Jupiter is being designed with advanced technology to reduce water use and protect local air quality. I respectfully urge the New Mexico Environment Department to approve Project Jupiter. Sincerely,	Merged Document	1	No	[redacted]			Yes	Yes	Yes					8/17/2026
Kristen	Hestir	Please deny the permit. This company has not been transparent from the start. We need public meetings and written, legally binding commitments. As a resident of Dona Ana County, I feel our quality of life will be farmed if this permit is approved. If it does not have negative impacts, then why the lack of transparency? Thank you.	Merged Document	1	No	[redacted]					Yes				Yes	8/17/2026
Christian	Lira	Members of the Board, As school board president of Gadsden Independent School District, I'm writing to express my strong support for Project Jupiter, which I believe offers significant benefits to the community. Project Jupiter's commitment to investing millions in Doña Ana County's schools, infrastructure, and social services will strengthen our communities and offer students career pathways to successful careers right here in the county. Project Jupiter promises a significant economic boost, creating 4,000 good-paying construction jobs, followed by 1 500 project-supported positions, that will increase local spending across the community and support small businesses and bolster opportunities for students in the area. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. These are investments that will grow opportunities for our youth. Additionally, Project Jupiter's heard the community's concerns and has decided to use a new energy strategy to reduce regulated emissions and water usage. All these benefits combined contribute to a strong, and vibrant community. I urge the New Mexico Environment Department to approve this important project which can help build a more economically diverse and vibrant community. Thank you for your consideration,	Merged Document	2	Yes	[redacted]			Yes	Yes	Yes					8/17/2026
Ada	Ovitt	I am a resident of Albuquerque, and I care deeply about my home and this state's residents and natural areas. I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa. Furthermore, employees of Project Jupiter have been canvassing for public comments, paying NM influencers to support the project, and, it seems from other public comments submitted to NMED, submitting fraudulent comments under names which are not their own. How can anything about this company and this permit request be trusted as they attempt to skew public comment on the matter? I request that you deny YGI's air permit application. Thank you, Ada Ovitt	Merged Document	1	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Mark	Willard	Given the manner in which this project was rushed through the approval process by the developer, I have no confidence whatsoever in any claims made concerning air quality, water use, employment, or any other issue. Please scrutinize this application rigorously and do not approve it until/unless clear guardrails are established that will hold this developer and its tenants fully accountable for future violations that will likely occur.	Merged Document	1	No	[redacted]			Yes	Yes						8/17/2026
James	Mckenna	James Mckenna I am writing to express my lack of confidence and lack of support for Project Jupiter as a resident of New Mexico. New Mexico already has issues with water, heat, and air quality, and Doña Ana County specifically suffers greatly from all three of these. I believe this will cause more harm for the area than any of the benefits that it would bring it, and the benefits it would create are greatly overstated. The job creation that they claim is likely exaggerated, with some studies only expecting .15-.20 jobs to be created per megawatt for a plant of this size, which would result in only 500 jobs, not the 1500 that they claim. On top of that, this microgrid alone would release more than 10 million tons of CO2 into the atmosphere each year, which is equal to 1/4th of our state's current CO2 production. It would also release more than 100 tons per year of Volatile Organic Compounds, and carbon monoxide, which would further harm the local air quality, which is already bad. I also wonder about the actual benefits to our state economically, as it seems that many of the companies that would benefit from the data centers are not New Mexico companies, but rather AI companies headquartered and run out of state. I do not believe that this data center or microgrid should be built, and strongly encourage that you reject this permit until they can find a way to actually create this sustainably. Sincerely, James Mckenna	Merged Document	1	No	[redacted]			Yes	Yes	Yes					8/17/2026
Arron	Bussell	There were several people at the Santa Fe place mall asking shoppers about how they feel about Project Jupiter. I let her know my grievances and that I do not support it. She said she would put that in the survey. She then took down my name and email and used it to make a fraudulent comment expressing support for the project. There are people making fake and fraudulent comments in support of this project on behalf of others. This should not be allowed and should be investigated. It seems possible that Yucca Growth Infrastructure LLC is fraudulently creating fake comments or hiring others to do so via third party or otherwise. Here is the content of the fake comment they used to misrepresent me: "I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project." -- These frauds don't deserve the opportunity to harm our community and should be investigated and prosecuted to the fullest extent the law allows.	Merged Document	1	No	[redacted]			Yes		Yes					8/17/2026
Kathryn	McGehee	Hello, Writing to express my opinion that granting this permit would be incredibly damaging to New Mexico's land and peoples. This company has a history of illegal dumping of hazardous waste, and should not be trusted with an air quality construction permit. The public should also be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Please do the right thing and ensure that New Mexicans are prioritized over detrimental industrial interests. Thank you!	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Dan	Lewis	June 10, 2026 New Mexico Environmental Improvement Board c/o New Mexico Environment Department 1190 St. Francis Drive, Suite N4050 Santa Fe, NM 87505 Re: Support for Air Quality Permit Applications for Project Jupiter (Yucca Growth Infrastructure). Members of the Board, In my roles as both Executive Director of the Asphalt Pavement Association of New Mexico (APANM) and as a member of the Albuquerque City Council, I spend a great deal of time focused on how we build and sustain the systems that keep New Mexicans connected. Whether it's our transportation network, our regional economy, or the workforce that powers both, long term success in this state depends on smart planning and meaningful private investment. With that perspective, I am writing in support of the air quality permit applications for Project Jupiter. For the asphalt and roadway community, projects of this scale matter. When new centers of economic activity take shape, they don't just create jobs on a single site; they reshape how people and goods move across the region. Project Jupiter turning underutilized land into a major employment center will increase demand for safer, stronger roads, better access corridors, and the kind of long term maintenance that keeps communities connected. Workforce opportunity is another key part of why this project matters. Project Jupiter is expected to support thousands of construction jobs and create hundreds of high skill permanent roles. That kind of sustained demand helps grow the skilled labor pipeline that both the construction industry and our cities rely on. With planned training partnerships and a commitment to local hiring, the project offers a path for New Mexicans to step into well paying careers in construction, engineering, heavy civil work, and emerging technical fields. Strengthening that workforce is essential for the future of our industry and our state. Overall, Project Jupiter supports the transportation network, expands our workforce, and strengthens the region's economic foundation, which is why it is vital for the air permits to be approved. Thank you for your consideration of this letter.	Merged Document	2	Yes	[redacted]				Yes	Yes					8/17/2026
Guillermo	Gee	Please deny Project Jupiter. The company has done nothing but lie to the residents. How can we trust them to be honest. We have no water the people of Santa Teresa are poor and Dona ana county has not fixed the arsenic in the water. Please do the right thing for your residents and deny this permit.	Merged Document	2	Yes	[redacted]			Yes							8/17/2026
Brigid	Ovitt	I am writing to urge you NOT to approve air permits for Yucca Growth Infrastructure, LLC. As a lifelong resident of New Mexico I am concerned about the future of our beautiful state and the air permits and the data center connected to them endanger New Mexico's environment, air quality and the health of some of our most vulnerable residents. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The proposed "micro" grid has a 2,462 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana county near the site have not been properly notified of this air permit application request. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. Please DO NOT approve these permit applications. Brigid Ovitt	Merged Document	1	No	[redacted]				Yes	Yes					8/17/2026
Stella	Jackson	Too long to place here. Describes concerns with ethical mining of precious minerals used in SOFCs, heat islands created by operations, and air quality concerns	Merged Document	6	Yes	[redacted]	Yes			Yes						8/17/2026
Anna	Tobin	Dear NMED staff, My name is Anna Tobin. I am a New Mexico resident, living in Santa Fe, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have spent my entire career working in environmental conservation and justice and I recognize the enormous pressure and risks that data centers put on our environment. New Mexico is the third most biodiverse state in the United States and this data center puts our entire states ecosystems at significant risk. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anna	Merged Document	1	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Cyrus	Jordan	This permit needs to be denied, we do not need a massive data center taxing New Mexico already limited resources, using up precision water, release more pollution into our already polluted air. And further selling off our beautiful land to corporate greed. The AI gold rush is just the latest version of corporate greed trying to win out over sustainability, local and native wishes, and long term mind sets over short term gain.	Merged Document	1	No	[redacted]			Yes		Yes					8/17/2026
Shawn	Marquez	This permit needs to be denied due to the massive environmental impact this proposed data center will have. The amount of pollution this data center alone will cause is greater than that of Albuquerque and Las Cruces combined, in an area already assaulted by pollution from neighboring cities. Not to mention studies showing that the data center will increase temperatures in a 10km radius by up to 16 degrees Fahrenheit; Southern New Mexico already sees temperatures in the 110s, and approving permits for a structure that will cause temperatures in the area to increase to up to 130 degrees is cruel and unusual.	Merged Document	1	No	[redacted]					Yes					8/17/2026
Brian	Butcher	Please deny this application. AI data centers pollute air, water, soil, and drain our energy and water resources. The damage wrought by these centers far exceeds any benefit created by them. As someone in a New Mexico area with extreme water limitations, it is unconscionable that the state would allow data centers in the state.	Merged Document	1	No	[redacted]			Yes							8/17/2026

Christine	Santopolo	I oppose granting this permit. As the Los Alamos Daily Post noted, "Data centers, like the proposed Project Jupiter, use massive amounts of water in order to operate and across the nation, create an immense strain on local electricity grids and public water supplies; increase electricity and water bills for both local residents and businesses; and significantly increase noise, light, air, water, and soil pollution in neighboring communities. Project Jupiter, alongside its proposed microgrid, natural gas power plants, battery storage center, and desalination plant, is seeking to make its home in Santa Teresa, where community members have already lacked access to clean, safe, and affordable drinking water for decades." We don't have sufficient resources for New Mexico residents, we can't afford to give them up to data centers that have proven in many other places to be bad neighbors.	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026	
Andrea	Lopez	Please leave our desert we have enough hardships and what you are doing is going to ruin our future environment. We are here to protect the natural resources and block you from our land. This is precious to our future generations and land quality. You are not welcome and we reject your offer to work in our New Mexico Land. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026	
Tim	Staley	Please deny the air permit request asking to double our emissions for the state of NM in southern Doña Ana using Bloom Energy Fuel Cells. The public should have been given an extra 60 days to review and comment. It would make the most ethical and environmental sense to deny the permit, but if it is not denied outright, hold a public hearing in Santa Teresa.	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes		8/17/2026	
Charlotte	Lipson	The air quality permit application should be denied. If the permit is not denied, public hearings should be held in Santa Teresa and Las Cruces in both English and Spanish, with the option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution including an unhealthy water supply. Many of us who leave in southern NM already have serious breathing problems including desert fever. This is an area of severe drought and our water supply is predicted to decrease even further. There are too many unanswered questions by the Jupiter principals re water and electricity usage. This would be government-sponsored environmental racism as the Doña Ana County Commission agreed to the Jupiter Project without proper due diligence. It allowed the agreement to go forward with blank pages and lacking enforceable promises re environmental impact.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes		Yes		8/17/2026	
Maggie	June	I stand strongly AGAINST DATA CENTERS—including this one! NO to all data center proposals in New Mexico! We stand strongly for HEALTHY land & water; we insist on preserving New Mexico's natural resources; we stand to preserve our desert resources—so we will not allow companies to take our Water! No to data centers. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Sincerely, Concerned New Mexicans	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Geneva	Harstine	To whom it concerns at the NMED, I am a lifelong New Mexico resident urging you to deny the Project Jupiter air quality permit application. Given Bloom Energy's history of illegal dumping hazardous waste, and Doña Ana County's status as a 'nonattainment' zone regarding federal air quality rules, I strongly believe that approving this permit would amount to government-sponsored environmental racism. Given the magnitude of statewide effects, the public should be given an additional 60 days to review and comment on the air quality permit, which should be made accessible in Spanish and English, as well as Vietnamese and Diné to ensure meaningful participation. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with the option to participate virtually. I fail to see the benefit of trading our air quality and water we already struggle with for a hyperscale facility that will create more air pollution than our three largest cities combined. A handful of well-paying jobs is not worth exposing our neighbors to hazardous air pollutants such as benzene, xylene, and methanol, which are associated with increased rates of leukemia and lymphoma, permanent damage to the nervous system, kidney, and liver, birth defects, permanent blindness, seizures, and respiratory failure. These are only a few of the expected byproducts of the proposed facility, and I can only begin to imagine how these would play out in conjunction with widespread long CoVid and reduced healthcare access as a result of federal funding cuts. We have lived for centuries without AI, and this hyperscale data center would largely benefit already wealthy corporations and degrade our residents' quality of life. Thank you for serving New Mexicans' public health and our state's natural beauty for generations to come.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Diana	Delgado	When will you guys realize we can't breathe, eat, or drink data. The Air quality in the area you want to build your useless data center is already failing to meet the minimum safety requirement for air quality, what do you think will happen to the environment and people surrounding this data base? Do they not exist? Nobody wants this.	1	Merged Document	No	[redacted]				Yes	Yes						8/17/2026	
Margaret	Fodor	I oppose the construction of Project Jupiter. They have not been transparent, have maneuvered to try and avoid proper environmental reviews, are going against the wishes of the majority of the public and will be contributing very few longterm jobs against the critical damage to the states water supply and air quality.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026	
Patrick	Feil-Trulove	Dear NMED staff, My name is Patrick Feil-Trulove. I am a New Mexico resident, living in Albuquerque Nm, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a USMC vet as well as a rancher in New Mexico. The environmental effects of putting a data center would be irresponsible and irreversible. There are no jobs that can replace the landscape or unpollute the population of people and animals in our great state. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Patrick Feil-Trulove	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes		8/17/2026	
Amanda	Garcia	I'm writing as a concerned resident who is trying to understand what Project Jupiter means for our community. I'm not a technical expert, but the information available so far makes me uneasy about the scale of this project and how it could affect our air quality, health, and natural resources. Many of us already worry about pollution and respiratory issues in Doña Ana County, and adding two gas powered plants feels like a big change with long term consequences. It's also hard to understand why the project needs two separate permits when both facilities seem to be part of the same operation. That makes the process feel confusing and less transparent. I'm also concerned about how fast this project is moving and how little clear information the public has received about things like water use, the gas pipeline, and overall environmental impacts. A project this large should come with more openness and more chances for the community to fully understand what's being proposed. I respectfully ask NMED to take extra care with this decision, make sure the public has complete information, and ensure that the health and wellbeing of local residents come first.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026	
Karl	Rysted	I don't know anyone who lives here in favor of the permit or Project Jupiter going forward. Too much has happened already. They resort to TV ads and paid canvassers to spread their propaganda. The truth is that our environment is too sensitive to grant the permit. Thank you.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive			Yes						8/17/2026	
Maryjane	Blea	Dear NMED staff, My name is Maryjane Blea. I am a New Mexico resident, living in Gallup New Mexico, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have major concerns with data centers in our area they have very harmful environmental impacts that can be detrimental to our wildlife,our elders,and our children the nosie population alone will disturb learning for the schools and day cares in the area please consider what your ancestors our think about you singing away our rights they fought for ,for some big tech to take it away The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes		8/17/2026	
Joseph	Benavidez	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. More jobs is great for our community.Anything that makes a positive impact is good in these days. Sincerely, Joseph benavidez	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026	
Kellen	Becenti	Dear NMED staff, My name is Kellen B . I am a New Mexico resident, living in yatahay New Mexico and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. This data center will pump out 10x more green house gases then the three major cities in New Mexico combined I urge you to think about what climate change we have done and how putting a data center will undo all of our hard work The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a public hearing Sincerely Kellen B	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes		8/17/2026	
Darien	Fernandez	I do not support this. Furthermore, I received notice that a comment in favor was submitted in my name, and with an incorrect phone number. I am attaching proof of the email. Again I am not in favor of this proposed data center development.	2	Merged Document	Yes	[redacted]	Yes									Yes	8/17/2026	This is concerning. I will make a note for NMED to follow up.
Nekita	Walker	I am writing to express my support for Project Jupiter and the meaningful benefits it will bring to our community. Project Jupiter is expected to drive significant economic growth in Doña Ana County, including the creation of approximately 4,000 construction jobs and 1,500 project-supported positions. In addition to job creation, the project includes substantial financial commitments$50 million to repair and improve local water systems, $360 million in direct support for schools, infrastructure, and local services, and $6.9 million dedicated to workforce development initiatives. These investments will also support valuable community programs, including the Boys & Girls Club of Las Cruces, access to clean drinking water, the local community college, and habitat restoration efforts. Given these significant contributions, I respectfully urge the New Mexico Environment Department to approve this important project. Sincerely, Nekita Walker	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026	
Joseph	Green	Dear Permitting Program Staff, I am writing in opposition of this project. YGI's project will create over 10 million tons of greenhouse gas emissions, over 124 tons of VOCs, and over 161 tons of unknown hazardous waste yearly. Therefore, I feel YGI's Air Quality Permit should be denied.	1	Merged Document	No	[redacted]				Yes				Yes			8/17/2026	
Phillip	Hahn	Dear Permitting Program Staff, I am writing in opposition of this project. This will actually create over 10 million tons of greenhouse emissions, over 124 tons of VOCs, and create unknown quantities of hazardous waste. Also, Dona Ana County does not have the water needed to sustain such a center. This is why I feel the YGI's Air Quality Permit should be denied.	1	Merged Document	No	[redacted]			Yes	Yes				Yes			8/17/2026	
Isabella	Manzanares	Dear NMED staff, My name is Isabella Manzanares. I am a New Mexico resident here in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. My family has been here in New Mexico since 1911, I come from a family of ranchers in Northern New Mexico. Water has always been a major concern when living from the land. Which we have used responsibly and it has provided for my family for many generations. If project Jupiter goes forward and pollution takes place, how can I have hope for future generations of my family to stay here and prosper? Furthermore I am a mother currently living within the pollution zone of this Mega Data Center. I am not interested in finding out what the new levels of pollution will do to a child's health. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Consider how this decision could impact the potential for a clean and healthy New Mexico. Sincerely, Isabella Manzanares.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes		Yes		8/17/2026	
nicholas	perez	the only thing project jupiter will bring is job opportunities that our town dosnt need the air quality going to keep worse our water is going to be on a shortage effect hundreds of our residents we have a saying in this and we say no to project jupiter	1	Merged Document	No	[redacted]			Yes	Yes							8/17/2026	
Sheri	Sullivan	I am writing to oppose the Yucca Growth Infrastructure permit proposal. This is not a new air pollution permit. The people/corporations backing Project Jupiter plan to power their hyperscale data center with Bloom Energy's Solid Oxide Fuel Cells and have a applied for a new air permit under the name Yucca Growth Infrastructure (YGI). Their power plant will still emit 10 million metric tons of CO2 every year. That's more than 20 billion pounds. More than the EPE and PNM electric grid combined. Still more than the total emissions of Albuquerque, Las Cruces and Santa Fe put together, making a mockery of New Mexico's emissions reduction goals and erasing all the progress that has been made over two decades. Please, for the sake of the people of NM, and the planet, say NO to this permit application. We do not want these "microgrids" in our communities. Sincerely, Sheri Sullivan Concerned Citizen	1	Merged Document	No	[redacted]				Yes	Yes		Yes				8/17/2026	
Destiny	Fellers-Alison	This will not support our community and will only have negative impact locally. This project is not worth the added green house gasses and noted to be more than all of NM largest cities combined. This is not in NM best interest. We should not allow this permit to pass and project Jupiter should be scrapped all together.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive			Yes						8/17/2026	
Lorenzo	Alba	I am writing to express my full support for Project Jupiter, which I believe offers significant benefits for our community and region. Project Jupiter will bring substantial economic growth and impact to Doa Ana County and the surrounding region. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $360 million in direct support for schools, infrastructure, and local services; and $6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, Casa de Peregrinos Food Pantry, clean drinking water, the local community college, and habitat restoration. I'm a firm believer that with economic development, community development and quality of life begins to also have a positive effect on the community. I humbly urge the New Mexico Environment Department to approve this important project. Sincerely, Lorenzo Alba, Jr.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026	
Katie	Mena	I oppose Project Jupiter and urge the denial of this application on the grounds of environmental concerns, mainly water and energy usage, in addition to the lies and unethical behavior of this company. Utilizing personal information from surveyed community members to submit public comments that are the opposite of their stated stance on this project is devious and misrepresentative of our community 's opinion on this data center and it's fuel cell technology.	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026	
Carol	Williams	I oppose Project Jupiter and urge the denial of this application on the grounds of environmental concerns, mainly water and energy usage, in addition to the lies and unethical behavior of this company. Utilizing personal information from surveyed community members to submit public comments that are the opposite of their stated stance on this project is devious and misrepresentative of our community 's opinion on this data center and it's fuel cell technology	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026	
Leslie	Moody	Please oppose this project. As a New Mexico resident and small business owner, I find it outrageous that an energy and water hog of this magnitude would even be considered in this state. This out of state mega-corp has completely abused our public process by forging letters of support, using NM residents' info without permission, and outright lying about everything. They may have billions of dollars on their side, but they are morally and ethically bankrupt. They have no place doing business in our state. Leslie Moody	1	Merged Document	No	[redacted]			Yes								8/17/2026	

Bella	Norero	I oppose Project Jupiter and urge the denial of this application on the grounds of environmental concerns, mainly water and energy usage, in addition to the lies and unethical behavior of this company. Utilizing personal information from surveyed community members to submit public comments that are the opposite of their stated stance on this project is devious and misrepresentative of our community 's opinion on this data center and it's fuel cell technology. This dangerous and damaging project must be stopped. Our air quality, scarce water, and quality of life demand protection from corporate greed. This permit application must be denied. New Mexico deserves better	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026	
Raymond	De La Vega	I strongly oppose the issuance of this air quality permit for the Yucca Growth Infrastructure project. This project has the potential to affect far more than its immediate location. Air pollution does not stop at county or state boundaries. Emissions from this facility have the potential to impact residents throughout the Paso del Norte region, including the communities of Doña Ana County, Las Cruces, El Paso, Texas, and Ciudad Juárez, Chihuahua. The New Mexico Environment Department should carefully evaluate cumulative regional air quality impacts, not just the impacts immediately surrounding the facility. This region already faces significant environmental challenges, including high temperatures, ozone episodes, dust, and wildfire smoke. Adding another major source of emissions risks further degrading air quality for hundreds of thousands of people who live, work, and attend school in this shared airshed. The permitting process should account for cumulative impacts on public health, particularly for children, older adults, and people with respiratory and cardiovascular conditions. I am also deeply concerned about water resources. Southern New Mexico and the surrounding region face chronic water scarcity and prolonged drought. The region is out of water and water table is residing to the south. This project, which has zero benefit to locals will consume the regions water only to make someone else money who does not live or contribute to the community. Decisions about projects of this scale should reflect the long-term sustainability of the region's limited water supply. I am so ashamed of our county representatives. Finally, I am concerned about the transparency of this project. A proposal with potentially significant regional environmental consequences should be subject to broad public awareness and meaningful public participation. Many residents who could be affected may not have been aware of the project until late in the permitting process or to this day. The public deserves an open, transparent process that allows adequate time to review technical documents, understand potential impacts, and provide informed comments before permits are issued. Given the potential regional impacts on air quality, the serious concerns regarding scarce water resources, and the importance of a transparent public process, I respectfully request that the New Mexico Environment Department deny this permit unless it can clearly demonstrate that the project will protect public health, safeguard limited natural resources, and fully comply with all applicable environmental laws and regulations.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				Yes	8/17/2026	
Jaye	Williams	As a resident of Dona Ana County, I am opposed to granting this permit at this time. This permit is related to a very large project that continues to leave the citizens unclear as to the ultimate long term impacts to the environment. The citizens deserve a chance to question the developers of this project, as numerous changes to the possible impacts this will have on the citizens and the environment have come forth since the original approval by the Dona Ana County Commission in September 2025.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive			Yes					8/17/2026	
Travis	Price	Let's face it, New Mexico doesn't have any water to spare. We need to protect our resources for our ranchers, farmers, and hunters. Furthermore, building a data center in southern NM is impractical due to the enormous energy costs of cooling an operation of this scale.	1	Merged Document	No	[redacted]			Yes							8/17/2026	
Janna	Martinez	The public should have been given an extra 60 days to review and comment on this permit. The lack of this represents extreme dishonesty and manipulation. With this, please deny the permit to help uphold citizen interactions and increase responsiblity. If the permit is not denied please ensure a public hearing is held.	1	Merged Document	No	[redacted]									Yes	8/17/2026	
Javier	Sanchez	Attention NMED staff, My name is Javier Sanchez. I am a New Mexico resident, living in New Mexico, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. With all due respect	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	Yes	8/17/2026	
Charles	Adney	We should not approve this permit. The proposed Project Jupiter data center will be a complete environmental disaster. The people that put these things up are not concerned about any ordinary American citizen, let alone someone in southern New Mexico. They will consume what little water is left and destroy the environment in and around the data center for years or decades. New Mexicans will be left to foot the bill to clean everything up after the AI crash happens	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026	
Mitchell	Ackerman	The very consideration of this project is absolutely insane. Not only have data centers adversely affected air quality and other quality of life conditions for local communities throughout the country, but I cannot think of a more idiotic use of huge amounts of water in the most water challenged state in the US. In addition, generating power through the use of natural gas, whether with fuel cells or otherwise, grows our carbon footprint at a time when our state faces unprecedented damage from drought, wildfires, flooding from burn scars that can't retain water and record heat waves. It's beyond time to treat climate change with the urgency it demands. And what do we think we stand to gain? Jobs? This is the very industry bragging to Wall Street that it will eliminate tens of millions of jobs in the near future. We should be very clear: this is about adding to the wealth of the already ridiculously wealthy Ellison family and the tech oligarchs that now increasingly control our country's most important economic and political decisions with no accountability. Every recent poll all over the country has shown a clear consensus among Americans. We have largely been unaware of the scale of the thousands of data centers that have been approved and built in our communities and the economic and environmental impacts inflicted on us, largely to build the wealth of the wealthiest men on earth, and for a technology many of us deeply distrust. And the more we have learned the more disappointed we have grown at the leaders who have allowed this to happen. To borrow from the old adage about planting trees, the best time to stop building data centers is five years ago. The next best time is now.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes			8/17/2026	
Glenn	Landers	I have heard anecdotal reports in Las Cruces of pro-Jupiter canvassers falsely submitting pro-Jupiter comments to NMED on the Yucca Growth Infrastructure permit. Now, an article published on line by Source NM actually documents instances of paid canvassers for Project Jupiter collecting email addresses from folks that are either opposed to or on the fence about the project. These email addresses are then used to submit pro-Jupiter comments to the NMED. These instances of fraud occur not just with one canvasser or in one location, raising concerns this is a widespread problem. This is a horrible perversion of the comment process, which NMED must investigate and try to rectify. NMED need to send to each and every person who is listed as submitting comments a copy what was submitted in their name and a link where they can report any discrepancy between what was submitted and what their real views are. Otherwise, this attempt to create a false public record will undermine the credibility of NMED and the Department's public participation process. NMED should also investigate if any laws have been broken by the false submission of comments and seek whatever accountability the law affords. The Source NM article referred to above is available at: https://sourcenm.com/2026/06/30/new-mexico-residents-say-their-names-used-without-permission-to-support-project-jupiter-data-center/	1	Merged Document	No	[redacted]						Yes				8/17/2026	
Ivonne	De La Hoya Venzor	TO WHO IT MAY CONCERN.- I am writing to express my support for Project Jupiter, as I believe it offers significant benefits to our community. Given our geographic location as a border region, the project will have a highly positive impact on several key areas. These include the economic benefits generated by local residents who are employed by the project. These jobs are of great importance for the construction and development of Project Jupiter. In addition, the project will promote greater cross-border economic activity, create opportunities for businesses and suppliers throughout Northwestern Chihuahua, and further strengthen binational integration, encouraging new investments in technology and infrastructure. Based on the above, we express our support for and acceptance of Project Jupiter. I urge the New Mexico Environment Department to approve this important project. Thank you in advance for your attention to this matter. Please feel free to contact me via email at gobiernomunicipaldeascension@gmail.com or by phone at 636 699 0692 should you have any	1	Merged Document	Yes	[redacted]	No	Support Non-Substantive			Yes					8/17/2026	
Stanley	Jobe	Dear Members of the Environmental Improvement Board: My name is Thomas A. Georges, and I am the Manager and Vice President of Jobeco Materials, LLC, the General Partner of Jobe Materials, L.P. I appreciate the opportunity to share comments regarding Project Jupiter's air quality permit applications. Jobe Materials L.P. provides ready mixed concrete, construction aggregates, asphalt, precast/prestressed concrete products and more for the west Texas and southern New Mexico regions, including projects in Doña Ana County. Projects we have supplied materials to include the Pete Domenici Roadway Reconstruction and the IBWC Upper Valley Canal Rehab. With locations across the southern New Mexico and El Paso region, including multiple facilities within Doña Ana County, we are familiar with projects including Project Jupiter. Project Jupiter has immense potential for the area. It demands significant construction resources and labor to see it through. The initiative is expected to attract substantial private investment over its lifetime and bring expanded economic activity that benefits businesses of all sizes. We see the success of this project as a rising tide that will lift all regional businesses like ours and one that will positively impact its surrounding communities. Beyond jobs, Project Jupiter will provide needed taxable revenue and direct private investment in infrastructure. This will indirectly support more construction jobs, road re-pavement, school and hospital construction, and more. Coupled with workforce training partnerships, the project can help expand the talent pipeline for businesses across the region, opening doors for residents across a range of education and experience levels to participate in industries shaping our region's future. As you evaluate this project, I hope that you will consider its benefits and support issuing the air permit. Project Jupiter represents a significant opportunity to support our region and we should not let it pass.	2	Merged Document	Yes	[redacted]	No	Support Non-Substantive			Yes					8/17/2026	Unclear if this is correct. Name doesn't match what was submitted. Thomas Georges also submitted his own comment of the same form letter

Billie	Haynie	As a 5th generation New Mexico native and 3rd generation Realtor in the Doña Ana area, I am pleased to offer my support for the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County. I was raised in Santa Teresa and went to elementary school in Sunland Park. I have personally witnessed the continued struggle with the infrastructure in those communities. I went to school under the ASARCO Smelter. They did not care about our air quality. I believe that Project Jupiter will enhance the infrastructure, protect our air quality, as well as create jobs. My grandfather, Jamie Stull Sr., was a developer in the Las Cruces area and a County Commissioner for Doña Ana County. I was raised with his dedication to bettering our community. He led the charge to develop the much-needed health clinics in southern Doña Ana. I sat through meetings with the County Commissioners discussing the water issues back in the 1980s and 1990s. I believe Project Jupiter will accomplish better infrastructure for the Santa Teresa-Sunland Park area of Doña Ana. Please allow Yucca Growth Infrastructure, LLC, for Project Jupiter, to move forward with the air	1	Merged Document	Yes	[redacted]			Yes	Yes	Yes				Yes	8/17/2026	
Kyle	Biedermann	No one wants this data center in New Mexico other than AI moguls and whoever is getting kickbacks in the state for attempting to approve this. This is as disliked as the sale of PNM to Blackstone and involved in just as much shady handling as them too. We are a desert that barely has the resources for ourselves to maintain life out here, much less for massive data centers that will inevitably ruin our environment and extract what little water we have. Allowing this to happen would not only be a breach of trust by the New Mexican government of it's citizens, but a declaration of war against them. The people are united against this and choosing to allow this protect to continue against our wishes will be a mistake for those in power. I promise you that much. For those in charge, if you actually happen to read this, think carefully about the actions you're taking. People can only be pushed so far to the brink before they break.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026	
Chris	Lyons	Members of the Environmental Improvement Board: I am writing to express support for the air quality permit by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County. As one who has been involved in the development of Santa Teresa for decades, I am very familiar with the history of the Santa Teresa International Project, dating back 50+ years when it was the originally conceived by Charles L. Crowder. Today, my family-related entities are substantial landowners in Santa Teresa and remain committed to Charlie Crowder's original vision: to create a showcase bi-national masterplanned community for the 2,000-mile US/Mexico Border Region in the states of New Mexico and Chihuahua at Santa Teresa. Project Jupiter is the largest private investment in New Mexico history and will be transformational, not only for the southern New Mexico region, but for the entire state of New Mexico. It is also part of the Project Stargate Initiative which is of national importance. This investment, all privately funded, will upgrade deficient infrastructure systems and allow for future thoughtful masterplanned development. That means no public money is borrowed or at-risk for Project Jupiter, and yet it will provide payments directly to Doña Ana County over 30 years at levels never experienced before in the County's history. Advanced large-scale infrastructure projects lead by global construction companies are not new, but they are new to southern New Mexico and will provide an unprecedented level of demand for all types of goods and services which will help grow local businesses. Project Jupiter represents the future of development, and can be the future of the Mesilla Valley by making available advanced career options with highly respected companies right here in New Mexico, to give the next generation of Doña Ana County residents the opportunity to remain in the region. Meanwhile, local partnerships, like the ones that Project Jupiter has already established, are an added layer of community benefit and support. We are fortunate to have been selected out of hundreds of competing sites nationally for one of the Project Stargate sites. A project of this magnitude and scale, where world-class developers power the operations onsite, are investing in the community and enhancing infrastructure while working with local partners, is exactly what was envisioned for Santa Teresa decades ago. While following and adhering to NMED guidelines and regulations, Project Jupiter will be the catalyst and a powerful magnet that can attract global electronics manufacturers to New Mexico that otherwise would not have considered locating here; building an enviable ecosystem in a leading-edge industry with untold opportunities for future	1	Merged Document	Yes	[redacted]				Yes	Yes					8/17/2026	
Crystal	Brantley	Members of the Environmental Improvement Board, As the Senator for New Mexico's 35th Senate District, which includes parts of Catron, Doña Ana, Grant, Hidalgo, Luna Sierra and Socorro, I write to offer my support for the air quality permit applications submitted by Yucca Growth Infrastructure, LLC for Project Jupiter in Doña Ana County. I appreciate the Board's careful evaluation of this matter and the opportunity to share the perspective of our community. Project Jupiter means real investment in Doña Ana County, in our businesses, our infrastructure, and our people. Whether our residents are Republicans or Democrats, this huge investment in the county's business infrastructure and the county's utility infrastructure makes sense. This is simply a project New Mexico must support. This project will create jobs, generate tax revenues, and strengthen the infrastructure our communities depend on. Those revenues mean more resources for economic development and public safety in a part of New Mexico that has earned both. This project is a win-win and a perfect example of an opportunity to find common ground to focus on solutions that improve lives. It is also worth noting that this application is in place because Project Jupiter listened to our citizens who were concerned about emissions. Instead of using gas turbines, Project Jupiter will employ fuel cell technology, which will reduce emissions by 92% from the original application. For these reasons, I support the issuance of the air quality permit applications for Project Jupiter and encourage the Environmental Improvement Board to consider the broad community benefits this project represents.	1	Merged Document	Yes	[redacted]				Yes	Yes		Yes			8/17/2026	
Roberto	Ramirez	Members of the Environmental Improvement Board, I am writing to express my support for the approval of the air quality permits for Project Jupiter. As a board member of the Public Employees Retirement Association of New Mexico, I am focused on the long-term financial health of our public retirement system. That health depends on sustained economic growth, strong payrolls, and steady contributions into the fund. Project Jupiter represents a significant economic development opportunity for New Mexico. Largescale private investment strengthens our tax base, increases gross receipts revenue, and supports state and local government budgets. As economic activity expands, so does the demand for public services. That demand supports stable public sector employment, which in turn increases consistent contributions into PERA and helps safeguard retirement benefits for current and future retirees. The construction phase is expected to generate thousands of jobs and substantial local spending. Once operational, the project is projected to create approximately 1,500 permanent jobs, along with ongoing opportunities for local contractors and support industries. The broader economic impact will benefit schools, local governments, infrastructure agencies, and other public entities that rely on a strong economy to maintain services and employment. Project Jupiter is also being developed within New Mexico's regulatory framework. The project will utilize Bloom Energy's advanced solid oxide fuel cell technology, together with battery storage and continued evaluation of geothermal resources, to provide reliable, around-the-clock power while significantly reducing environmental impacts. As Oracle announced when selecting Bloom Energy for Project Jupiter, the technology was chosen because it is cleaner, highly water-efficient, and helps protect local air quality while supporting the energy demands of advanced AI infrastructure. Bloom's fuel cell systems also substantially reduce nitrogen oxide (NOx) emissions compared with conventional combustion-based generation. This approach demonstrates that economic development, energy reliability, and environmental stewardship can advance together.This project represents a meaningful step toward strengthening New Mexico's economic base while reinforcing the financial stability of our public institutions. For these reasons, I respectfully urge approval of the air quality permits for Project Jupiter.	3	Merged Document	Yes	[redacted]			Yes	Yes	Yes	Yes	Yes			8/17/2026	

Antonia	Ruiz	I hope that NMED will NOT grant this bad actor an air quality permit. It is well known that this data center, if activated, will not only use water that our state simply does not have, but will also emit more greenhouse gasses than the two largest cities in our state. Doing anything that would allow this bad actor, to be clear the bad actor is the data center, to harm our communities, workers, air, land and future, all for a measly 3000 jobs is a crime. And so, construction jobs are nothing hmm. And you know what is longterm like PERMANENTLY and the painful impacts our communities and ecosystems are currently facing. It's time for NMED to do their part and be responsible as people who care about this state and its people, air and water. Selling us out for bad actors like Project Jupiter, other data centers, and the myriad of other extractive industries that are already harming our state and people will not go unnoticed. Nothing will ever be enough for extractive industries so it's up to us to tell them no and send them packing.	1		No	[redacted]													
Carla	Kugler	Dear Members of the Board, On behalf of the Associated Builders and Contractors of New Mexico (ABCNM), representing merit shop contractors, specialty trades, suppliers, and construction professionals across our state, we write in support of the air quality permit applications for Project Jupiter (Nuzca Growth Infrastructure). From a construction and infrastructure standpoint, Project Jupiter represents a historic opportunity for New Mexico's building industry and workforce. As the largest private investment in our state's history, this project will activate thousands of skilled craft professionals and contractors while setting a new standard for large-scale, technologically advanced development in southern New Mexico. During the construction phase alone, Project Jupiter is expected to generate over 4,000 construction jobs. These are not temporary economic ripples — they represent sustained, multi-year opportunities for general contractors, subcontractors, specialty trades, suppliers, and local small businesses. This level of activity strengthens the entire construction ecosystem, from apprentices entering the trades to established firms expanding their capacity and workforce. ABCNM is particularly encouraged by the project's "Doña Ana First" hiring commitment and its $1.5 million investment in workforce training partnerships with local schools and colleges. Workforce development is central to our mission. Investments like these help ensure that residents are equipped with the technical skills necessary to succeed not only on this project, but on future infrastructure and industrial developments across the region. Beyond jobs-site impact, Project Jupiter will deliver long-term economic stability to Doña Ana County. The projected $340 million in direct payments to the county will strengthen public education, public safety, and essential services — the very systems that support a healthy construction workforce and thriving communities. Additionally, the $6.9 million commitments to community investment reinforces a broader vision of responsible growth. It is notable that the new fuel-cell design runs without combustion and reduces emissions about 90% compared to the original gas-turbine plan; this change was made after listening and responding to citizen concerns about emissions. For ABC New Mexico, Project Jupiter is not simply a data center project — it is a generational	3		Yes	[redacted]		Yes	Yes	Yes								8/27/2026
Diego	Fuentes	To Whom It May Concern: On behalf of Dolen Rostenda, I am pleased to express our strong support and recommendation for Project Jupiter in New Mexico. As an organization dedicated to regional economic development, innovation, and workforce development in Northwestern Chihuahua, Mexico, we recognize the significant opportunity that Project Jupiter represents for advancing economic growth and strengthening cross-border collaboration throughout our region. Through our active participation in the Northwestern Chihuahua Economic Development Council, a regional alliance composed of business leaders, educational institutions, government representatives, and community organizations, we work to promote economic competitiveness, attract investment, support workforce development initiatives, foster entrepreneurship, and strengthen strategic partnerships that benefit the municipalities of Ascension, Janos, Casas Grandes, Nuevo Casas Grandes, Buenaventura, and Galeana of Chihuahua. Our efforts focus on creating sustainable opportunities that improve the quality of life and economic prosperity of our communities while building stronger relationships with neighboring regions in the United States. The historic economic, cultural, and commercial ties between Northwestern Chihuahua and Doña Ana County create a natural platform for cooperation. Project Jupiter has the potential to further strengthen these connections by encouraging innovation, workforce training, advanced industry development, and regional investment opportunities that benefit communities on both sides of the border. Dolen Rostenda strongly supports Project Jupiter and welcomes opportunities to collaborate with stakeholders in New Mexico, including partners in Doña Ana County and throughout the Borderplex region, to advance shared goals related to economic development, innovation, talent development, and regional competitiveness. We respectfully recommend Project Jupiter and encourage its continued support and	1		Yes	[redacted]		Yes	Yes	Yes								8/27/2026
Juan	Cimera	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter represents a transformational opportunity not only for Doña Ana County and Southern New Mexico, but for the broader Borderplex region, including Ciudad Juárez. The project is expected to generate substantial economic growth through the creation of approximately 4,000 construction jobs and 1,500 long-term project-supported jobs, strengthening the regional workforce and expanding economic opportunity on both sides of the border. Beyond direct job creation, Project Jupiter is positioned to enhance the economic integration of our binational region by increasing demand for suppliers, logistics services, advanced manufacturing, and cross-border trade activity. For Ciudad Juárez, this presents meaningful opportunities for industrial collaboration, supply chain expansion, and continued growth in sectors that rely on the strong economic	1		No	Support Non-Substantive		Yes								8/27/2026
Robert	Abrams				No	Support Non-Substantive													8/27/2026
Jeny	Buckley	I am firmly against Project Jupiter. The last thing this area needs is a data center sucking up what little water is here, and polluting our already vulnerable state. Additionally, with all the shady dealings, and false comments being submitted by conveners, we can already see we are being lied to our faces about what this company actually intends to do. No one, on either side of the political aisle is cheering for this, and when New Mexicans on all sides agree something shouldn't be here, it needs to be listened to.	1		No	Blank													8/27/2026
Jane	Cook	I request that you reject the Nuzca Growth Infrastructure's (YGIs) air quality permit application to construct a methane-fueled power plant near Santa Teresa, NM in southern Doña Ana County. I also request that you hold both a public meeting and a formal evidentiary hearing on the application. YGI's power plant will be the single largest source of greenhouse gas emissions in the state of New Mexico, emitting more carbon pollution (10.5 million tons per year) than New Mexico's three largest cities Albuquerque, Santa Fe and Las Cruces combined. Pollution from this power plant has the very real potential to harm people and the environment, adding to the already unhealthy levels of both ozone and nitrogen oxides that New Mexicans are being exposed to in this area, two toxic chemicals that cause harm to our lungs, hearts, and brains, among many other health issues. This increased air pollution will harm the surrounding ecosystem and add to the global climate crisis.	1		No	[redacted]		Yes	Yes	Yes		Yes	Yes					8/27/2026
Matthew	Dorsey	I do not believe NM has the water or clean energy resources needed to support data centers. I also do not believe that their establishment in our communities provide a positive enough economic impact with jobs to offset use of these limited resources. Projects like these are nothing more than wealth migration at the expense of the communities they are cited in. It is no mistake they are in New Mexico. It is not an "opportunity" for our state; it is an "opportunity" for Jupiter to take advantage of residents in a state poorly prepared to protect its residents' interests.	1		No	[redacted]													8/27/2026
Kathryn	Di Stefano	Reject this application! This is tech billionaires abusing resources and people in New Mexico. We don't have the water and electricity for this. The emission of greenhouse gas will exceed that of New Mexico's three largest cities. The jobs are temporary and will not be exclusive to New Mexicans. No, no, no!	1		No	[redacted]		Yes		Yes								8/27/2026
Nicholas	West	I'm a resident of Albuquerque New Mexico and I STRONGLY OPPOSE any data centers here in New Mexico. Data centers have zero rights to be in an area that already struggles with water management given we live in a desert. Not only that, but it is a well know FACT that a data center drives up energy costs for the ENTIRE state. This isn't hyperbole, it's been proven over and over again with every data center that they don't pay their fair share. Given the already high energy costs in the state, a data center will only drive prices higher making the affordability crisis worse in our state. As a highly-educated suburban's studied data centers for well over 3 years, I can say for certain that this project will not provide our state with ANY benefits whatsoever. Because of this fact, I will reiterate what I said in my introduction. I STRONGLY OPPOSE ANY DATA CENTERS BEING BUILD IN THE STATE OF NEW MEXICO!	1		No	[redacted]		Yes	Yes			Yes						8/27/2026
Taylor	Graziano	I strongly oppose the air quality permits for Project Jupiter. While I believe data centers can be built in an environmentally responsible and sustainable manner, the current plans for Project Jupiter fall far short of that standard. Los Chaves has enjoyed good air quality for generations. Project Jupiter's own permit filings acknowledge that its planned gas power generation would severely impact that air quality. By the developers' own estimates, the two microgrid power plants would emit more greenhouse gas pollution than Albuquerque and Las Cruces, New Mexico's two largest cities, combined. I do not believe the promise of a modest number of jobs justifies this level of environmental harm. The troubled being offered, a relatively small number of long-term jobs against a massive, permanent increase in regional air pollution is not a fair or acceptable one for the community that will have to breathe this air for generations to come. Nevermind the increase in water consumption and energy prices for residents as a result of Project Jupiter. I also want to voice a serious concern about the integrity of this public comment process. I read dozens of comments submitted in support of Project Jupiter which were identical, submitted at the exact same time, under different names. It is clear these are not genuine letters of support from real people. In addition, multiple news outlets have reported instances of individual's comments on the project being completely altered by Project Jupiter canvassers. Canvassers reportedly approached people in public places, collected their email addresses, and then submitted comments in their names in support of the project without consent. Multiple residents in Las Cruces, Albuquerque, and Rio Rancho have since said they discovered their names attached to pro Project Jupiter comments they did not write and do not agree with. This is pattern, in addition to the dozens of comments with identical wording submitted under different names at the same time is not evidence of genuine grassroots support. I urge NMED to discard clearly manipulated submissions and to investigate this blatantly unethical campaign, as it appears designed to manufacture the appearance of public support that does not actually exist.	1		No	[redacted]		Yes	Yes	Yes	Yes							8/27/2026
Kelsey	Phillips	Please deny this application. Project Jupiter will not only affect our air quality, but it will also impact our water supplies. We do not need a data center hindering New Mexicans already scarce resources. No one wants this, reject the permit.	1		No	[redacted]		Yes	Yes	Yes	Yes							8/27/2026
Illana	Tafoya	I am a New Mexico resident, living in Albuquerque , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Nuzca Growth Infrastructure, LLC's air permit application for the 100 Microgrid in Doña Ana County. New Mexico is already experiencing extreme drought. With a large data center as proposed, where will the water come from to cool? Residents are already taken measures to conserve water due to the drought, our water supply should not be taken and used to support an unnecessary data center. On top of this the emissions of green house gases would be more than the 3 largest cities in NM combined, severely damaging any progress that has been made as well as ongoing efforts to mitigate climate change in NM. The project's proposed fuel cell powered grid is concerning for many reasons: Fossil 100 produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YGIZA Nuzca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the departments please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1		No	[redacted]		Yes	Yes	Yes		Yes						8/27/2026
Jane	Shoenfeld	YGI Microgrid in Project Jupiter's new, dedicated power source that is expected to produce 2.26 GW (gigawatts) of electricity, non-stop, all day, every day. Construction of the YGI Microgrid first requires approval by the NM Environment Department (NMED) and YGI Microgrid submitted an application (668 pages long!) describing the types and amounts of air pollution expected from the power plant. NMED is now reviewing the application and is accepting public comments on the application. I encourage you to submit individual comments in English here and Spanish here. The comment period closes July 6 th. Remember, the application is specific to air quality. Comments need to have the same focus. Water issues are handled by the State Engineer. Here is a draft comment that I hope you can use either as is or as a guide for writing your own. I request that you reject the Nuzca Growth Infrastructure's (YGIs) air quality permit application to construct a methane-fueled power plant near Santa Teresa, NM in southern Doña Ana County. I also request that you hold both a public meeting and a formal evidentiary hearing on the application. The bottom line is that pollution from this power plant has the very real potential to harm people and the environment. YGI's pollution will add to the already unhealthy levels of both ozone and nitrogen oxides that New Mexicans are being exposed to in this area, two toxic chemicals that cause harm to our lungs, hearts, and brains, among many other health issues. This damage to air quality will also harm the surrounding ecosystem and ultimately add to the global climate crisis. YGI's power plant will be the single largest source of greenhouse gas emissions in the state of New Mexico, emitting more carbon pollution (10.5 million tons per year) than New Mexico's three largest cities Albuquerque, Santa Fe and Las Cruces combined. The proposed power plant will use a new technology, methane fuel cells, manufactured by Bloom Energy. The application includes results Bloom Energy's technology does not have already [redacted]	2		No	[redacted]		Yes	Yes	Yes		Yes	Yes	Yes				8/27/2026
Alex	Hackler	I strongly urge you to deny the air quality permits for Project Jupiter in Doña Ana County. The plan involves two natural gas plants that would emit over 3 million tons of greenhouse gases annually and dwarfs more than Albuquerque and Las Cruces combined. This directly undermines New Mexico's clean energy goals. Worse, splitting the project into two "minor" sources seems like a tactic to dodge strict pollution monitoring, even while our county already struggles with a failing air quality grade. With thousands of residents and lawmakers calling for a public hearing, we need a transparent process that prioritizes community health over loopholes. Please don't approve these permits without a full, honest review and a real chance for us to be heard.	1		No	[redacted]		Yes	Yes	Yes		Yes	Yes	Yes				8/27/2026
Logan	Nunn	This permit being granted will allow carbon emissions equal to or greater than two of New Mexico's largest city's yearly output combined into our local atmosphere. It is criminally irresponsible to consider any of the environmental impacts that this project will have on the local community as anything other than an absolute tragedy. This project and many others like it will be our undoing if we don't stop it now. Reject the permit.	1		No	[redacted]		Yes	Yes			Yes						8/27/2026
Trinity	Dimas	There is no safe way a data center, especially one at this scale could keep its promises of clean air when smaller ones running on the proposed sources cant. No one wants this and will only cause more problems for New Mexico as a whole, not just the rural area. The air quality is already questionable, so why take the risk on this when the company has already pledged(a) been falsifying approvals of said center as seen in multiple news reports. If they are willing to use people's identities to fraudulently make Project Jupiter seem popular amongst New Mexicans, they are likely lying about their promises, and they are on multiple fronts. But this is about air quality. I do not approve and will never approve.	1		No	[redacted]		Yes	Yes									8/27/2026
Karen	Cerequas	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. If the permit is not immediately denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No	[redacted]		Yes	Yes		Yes							8/27/2026
Melissa	Drennan	This application must be denied. The effects data centers have on the environment is well documented. They use too much water, which is worth more than gold in the desert in a state where the Rio Grande is more dry than grounds. They use too much electricity, which New Mexicans do not deserve to have to subsidize. They emit noise in decibels that can only be considered violent to all life capable of hearing or sensing it. They emit enough heat to raise the temperature of the surrounding environment up to 36 degrees Fahrenheit, which for fragile desert ecosystem cannot survive, let alone the rest of the planet. As for their purpose, mass surveillance has no place in New Mexico, in America, or anywhere else on Earth. The people are saying NO to data centers.	1		No	[redacted]		Yes	Yes			Yes	Yes					8/27/2026
Manuel	Chacon	I oppose. Even though this is in Doña Ana and I live in Luna County, we share the same water shed and pollution in Doña Ana would affect Luna County. Please deny their application.	1		No	[redacted]		Yes		Yes								8/27/2026
Cameron	Stoker	I am strongly opposed to the granting of this permit -- as a NM resident I do not believe this state fragile ecosystem can support more pollution release in the form of heat, CO2, NOx and noise. The desert sons are sparse in wildlife because of the scarce resources and any additional burden on this are will reduce plant and animal numbers and variety. I am additionally opposed to and water usage for this project, though that may not be in the scope of this review. Please support the will of our state residents over the out-of-state corporations. Thank you.	1		No	[redacted]		Yes		Yes								8/27/2026
Morgan	Swan	The harm that project Jupiter and its affiliates will cause to the region will impact generations of New Mexicans. We are already dealing with unprecedented drought, rising heat and increasing fire risk. The people of Doña Ana county do not want this, and the questionable strategies project Jupiter is resorting to make it appear otherwise to a wider audience is proof of their shoddy character and priorities.	1		No	[redacted]		Yes		Yes		Yes						8/27/2026
						[redacted]		Yes	Yes									8/27/2026

Michael	Taylor	The microgrid air quality construction permit for Yucca Growth Infrastructure should be denied. The project will emit more pollution than Las Cruces and Albuquerque combined. The purpose would be to support Project Jupiter, a data center project that no one in the area asked for. The project was shrouded in secrecy before approval by the Dona Ana County Commissioners, and now in the focus of a propaganda campaign to manufacture support for a data center that will not improve any aspect of life in Dona Ana County. The pollution created by this project will leave New Mexicans and West Texans in poorer health and wealth, and will only benefit a minority of already wealthy tech investors and developers. If Yucca Growth Infrastructure and Project Jupiter were going to be a good thing for New Mexico none of the secrecy	1		No	[redacted]								
						Mirsted Document					Yes	Yes		8/27/2026
Lindsay	Herron	As a New Mexico resident, I'm strongly opposed to this data center. It will undoubtedly have profoundly detrimental effects on the state, particularly in terms of its energy consumption; water use; e-waste; and air, light, and noise pollution. Please don't be swayed by greed. We don't have limitless resources; please help us protect them for the good of society and for future generations.	1		No									
						Mirsted Document					Yes		Yes	Yes		8/27/2026
Jacob	Holt	To the New Mexico Environment Department Air Quality Bureau, As a native New Mexican, born and raised, I am writing to state my unequivocal and strong opposition to the YGI Microgrid Air Quality Construction Permit Application for the Project Jupiter development in Doña Ana County. This project is a massive mistake for the future of our state, and I urge the Departments deny this permit. My opposition is rooted in the following critical concerns regarding resource strain and local community impact: Severe Resource Strain on Local Communities: New Mexico faces distinct and continuous water and energy challenges. Diverting vital water resources and generating staggering amounts of power on-site to feed a massive hyperscale data center directly threatens the livelihoods of local residents, farmers, and ranchers. Our traditional agricultural communities and local families need these resources far more than out-of-state tech infrastructure. Disingenuous Claims Regarding Long-Term Job Creation: The developers have heavily promoted massive job numbers to justify the environmental and resource toll of this project. However, these claims are disingenuous. While data center construction creates a temporary spike in short-term labor, the reality of automated hyperscale facilities is that they require very few permanent, long-term operational roles. The long-term economic payoff for everyday New Mexicans does not justify the massive, permanent ecological and resource burden. Unacceptable Environmental Impact: Even with a transition to fuel cell technology, the projected greenhouse gas emissions from this microgrid facility are staggeringly robust, threatening to eclipse the combined emissions of New Mexico's largest municipal areas. This is completely incompatible with protecting our state's air quality and managing our shared environmental future. New Mexico's land, water, and air belong to the people who care for them and live here permanently, not to massive tech conglomerates looking to exploit our resources. I strongly request that NMED deny this air quality permit and prioritize the long-term well-being of New Mexican families, farmers, and ranchers over speculative corporate development.	1		No									
						Mirsted Document					Yes	Yes	Yes	Yes		8/27/2026
Sharon	Eldridge	I am urging the NMED to deny development this air quality permit that is in association with the Project Jupiter AI center. The majority of the American people are opposed to these AI centers and will ONLY benefit the developers and the billionaires PERIOD!!!New Mexico does not have the resources to run these centers which take huge amounts of water and cooling ability. Have you looked at the Rio Grande lately?	1		No									
						Mirsted Document					Yes	Yes				8/27/2026
Joey	Sanchez	Members of the Environmental Improvement Board, My name is Joey Sanchez, and I serve as a representative of AFSCME Local 4624, which represents the blue collar and transit workers who keep the City of Albuquerque running. Our members operate and maintain public infrastructure, run the transit systems our neighbors depend on every day, and provide the essential municipal services that allow our communities to grow and thrive. We understand firsthand what it takes to deliver reliable public services and to support a growing population. I am writing to express Local 4624's support for the air quality permits submitted for Project Jupiter in Doña Ana County. From a labor perspective, responsibly permitting and building major infrastructure projects like this one strengthens the broader economy that public-sector workers and our families depend on. When private investment expands the tax base and creates demand for local services, it helps sustain the public institutions — transit, utilities, public works, and municipal services — that our members provide. Large-scale development of this kind generates ripple effects that reach well beyond the construction site. New facilities require expanded utility service, roadway and transit access, water and wastewater capacity, and ongoing municipal support. These are precisely the services our members deliver. A growing, diversified economy in New Mexico means a stronger and more stable base for the public workforce, with more resources to hire and fully-support big wages and benefits for the working people of our state. AFSCME members care deeply about the communities where we live and work, and we take environmental stewardship seriously. That is why responsible permitting matters. When a project moves forward with clear regulatory compliance and best-available technologies, it demonstrates that economic growth and environmental responsibility can advance together. That balance reinforces public confidence and shows that New Mexico can attract major investment while holding developers to high standards. A well-permitted Project Jupiter will help demonstrate to other employers and developers that [redacted]	3		Yes									
						Mirsted Document					Yes	Yes	Yes	Yes		8/27/2026
Jessica	Lee	I never wanted any AI data centers in New Mexico and neither does my family or friends. AI data centers drink water and they steal electricity. Water and electricity are for people, not AI data centers. Please stop the building of the idiotic project Jupiter AI data center as the citizens of my state do not want it. Keep your corporate hands off of New Mexico's small and meager desert water table and electrical grid. I do not approve of this AI data center, and nor does my family. It puts corporate profits before the welfare of New Mexico citizens and it will be a genocide for humans in favor of AI. It is pure evil and you will be going straight to hell for building project Jupiter.	1		No									
						Mirsted Document					Yes		Yes	Yes		8/27/2026

Taylor	Conlin	I am against a.i. data centers and the tactics used by Yucca and Open AI.	1		No									
		Look at these comments mass submitted with the exact same statements and tell me they do not have malicious intent. Listen to the residents who show up in person and express how much this would negatively affect them in the day to day instead of the quick hit mass comments on this forum. It is clear that open ai is paying to muddy the waters and how they are handling this is how they will treat New Mexican residents in the future. Speaking over them, speaking for them and trying to line their own pockets. AI Data Centers ruin neighborhoods. They cause noise disruptions, drain power, water and resources, and increase temperatures. New Mexico struggles with drought and record high temperatures. So why would we want to cause more problems just for data storage. You can't drink data, you can't eat data, you can't survive on data. Say no to AI Data Centers, for New Mexico's and for the end of Enchantment. If the NMED actually reads these comments, consider the sources. The duplicate comments are clearly bought and paid for by Project Jupiter and should be considered null and clear manipulation tactics by a massive corporation seeking to exploit the New Mexican people and our resources. The comments submitted by actual residents are by in large against this and future data centers in the state. Listen to the people who live here, not to the corporation only seeking a profit. Thank you for your time.

nadala	centers	In protest of Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit/ Application Permit No. 10883 and TEMPO Agency Interest No. 41292 We do not need infrastructure that harms the environment any further, especially in a location that is already struggling with water rights. This would be incredibly detrimental to the fragile ecosystems here in the State. Our focus should be environmental harm reduction. In fact, direct air capture should be the focus, removing the harm already done by companies like this, not contributing +75,000tpy (CO2e). Invest in ways to reduce pollutants and eliminate them completely. There is absolutely no reason for this to happen here in New Mexico. I ask that the NMED refuse to grant this application, as there are threats to the land,	1		No									
						Mirsted Document					Yes	Yes				8/27/2026
Kassandra	Charles	I fiercely urge against the construction of this data center not only do they have a proven affect on the health of communities due to things like water shortages, noise pollution and the loss of public land, they in addition do not provide a level of value at all comparable to the natural landscapes belonging to these communities. As data centers continue to serve only as a way for corporations to redirect the life out of people and land and to allow this to New Mexico again as a state with much history of that already would justify an halt. I strongly urge the council to hold a hybrid informational session to explain the harms and dangers	1		No									
						Mirsted Document					Yes					8/27/2026
Maria	Martinez	As a life long resident of NM I am vehemently opposed to Project Jupiter and Yucca Infrastructure LLC. If Yucca Growth Infrastructure or Open AI and Oracle will resort to fraud in that they fraudently use names and email addresses to send false fraudulent letters of approval then that is clearly a sign that this company and all the companies involved CANNOT be trusted. NM and its land, animals and residents have a long history of abuse by the greater US. Can't find another State stupid and asleep enough to let you dump wasteful dried up your water then NM is your place. Let's stop all this greed for the profit of the rich and take care of our beautiful State while we still have it. I know I am only one voice from Eldorado at Santa Fe but please let's do what's right and oppose Project Jupiter and Yucca Infrastructure. Thank you, Maria	1		No									
						Mirsted Document					Yes		Yes			8/27/2026
Avery	Blair	I am adamantly opposed to the project Jupiter data center and all partnering infrastructure. I am a proud NM resident and work with local farmers and ranchers as staff at the Tuss Land Trust. We are all extremely worried about drought conditions. We don't have acequia water. Temperatures are rising and snow fall/ rainfall is declining. Our state is currently on fire. Rising temperatures add even more stress to plants, animals and trees. I have a bachelors degree in Environmental, Soil and Water Science. Many farmers I work with are cutting/growing food. Ranchers are selling their cattle because there isn't enough water. Fires are burning 30 miles from my home. We cannot afford to be using ANY water towards a data center that consumes exorbitant amounts of FRESH DRINKING WATER when our local food chain is	1		No									
						Mirsted Document					Yes		Yes			8/27/2026
Jeanette	Medina	My family and friends do not approve of the AI data center. It will be using our fresh water that the people need. We barely have any water and this will only make matters worse. We don't need this for our community.	1		No									
						Mirsted Document							Yes			8/27/2026
Aaliyah	Francisco	I am strongly against this project.	1		No									
		New Mexico's water is too valuable to risk. I urge you to carefully consider the long term impacts this project could have on New Mexico's water, air, and land. For instance, the Rio grande has no water!												
						Mirsted Document					Yes	Yes				8/27/2026
Brooks	Blair	I am 36 and work on the Youth Conservation Crew in Northern NM. I am scared for my future if AI data centers continue to be built. We will run out of clean drinking water. These decisions now, will impact young people my age, and my children most. Please consider future generations and how we will cope without clean drinking water. 30, 20, 100 years from now.	1		No									
						Mirsted Document					Yes	Yes				8/27/2026
Trinity	McConnell	Dear NMED staff, My name is Trinity McConnell. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I've seen so much research about how this project will impact us, and it's not good. Countless individuals and community's will be affected negatively. Data centers around the country have proven this with their pollution and effect on neighborhoods. I've lived in New Mexico my whole life and would be heartbroken to see this data center counteract years of community efforts towards improving our environment. Project Jupiter's power plant will release up to 35 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants • This technology generates toxic waste, and the process for handling this waste is still unclear. • Fuel cell technology on a centralized waste system has never occurred at this scale. • Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the departments please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Trinity	1		No									
						Mirsted Document							Yes	Yes		8/27/2026
Christine	Brickley	I do not support this application for a construction permit for Yucca Growth Infrastructure. The pollutants that will be released into New Mexico's air from this project would be more than the greenhouse gas emissions of Albuquerque and Las Cruces combined. New Mexico has precious resources- we need to steward them properly for the sake of our children.	1		No									
						Mirsted Document					Yes					8/27/2026
Petra	Lopez	I am in support as long as it is ensured water isn't being taken from resources like crops and farming.	1		No									
						Mirsted Document					Yes					8/27/2026
Ellie	Coburn	Dear NMED staff, My name is Ellie Coburn. I am a Texas resident, living in Houston, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. If we do not stop this project, not only will residents of New Mexico suffer, but it will be the beginning of a long period of suffering all around the United States. I am deeply concerned with this administration's decision to put the environment and the citizens in danger. I urge you to stop this project. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology on a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. Sincerely, Ellie.	1		No									
						Mirsted Document					Yes	Yes	Yes	Yes	Yes	8/27/2026
Amber	Hanley	I am a 19 year old resident of Washington state and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to raise my future children here knowing they have a safe and secure future. The future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 35 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 36th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to create a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last year, a 16 year old suffered a grand mal seizure while on the courtyard at school because the extreme heat led to electrolyte imbalances. My uncle works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. Families can barely pay electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous and ask many of them at very low levels. How is anyone supposed to send their kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systems' overnight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A law for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participants. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,376. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? How there been or will there ever be upstream fuel testing of methane gas to anticipate the composition of these fuel cells' emissions? How exactly will NMED enforce emissions standards without direct, long-term, continuous monitoring? Or isolate their deleterious impact on air quality without an accurate assessment of localized pollution? A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,376 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS)

Samuel	Foley	My name is Sam Foley and I am a New Mexico resident who wishes to urge the NMED to reject Yucca Growth Infrastructure's air quality permit application. The fuel cell grid the applicants wish to install are concerning for not just citizens of the local area, but also the state of New Mexico at large. The air quality issues from the fuel cells such a site would have would severely degrade the air quality of the surrounding area, putting communities at risk of illness and various respiratory conditions. This is to not even mention the use of water a project like this would need in an area already suffering from a megadrought like New Mexico. I urge Doña Ana County to REJECT project Jupiter and focus its resources towards projects that will truly benefit the county and its citizens rather than only a handful of wealthy beneficiaries of this project.	Mirsted Document	1	No				No	Blank							8/27/2026
Dionne	Rich	Project Jupiter would be disastrous for Doña Ana County and for New Mexico. We already struggle with both power needs and water use. This would add an already burdened system with even greater needs. Also, the company has not been totally honest either in their advertisement or in their use of people's names. People were did not agree to have their name in support of the project have found their names listed by the contractor. We can't trust what they are saying if they are willing to stretch the truth.	Mirsted Document	1	No			Yes	Yes			Yes					8/27/2026
Rachel	Benge	I am a Doña Ana County resident, and I am strongly opposed to this project. The developers have not been transparent about the environmental impact that this project will have on our home, and this area is already a delicate ecosystem. Oracle is a deeply troubling company, who is in the process of moving it's headquarters to a third state since 2020. If these data centers are such a benefit to the local community and the environment, why isn't Oracle building them near their CEO's house? Why has the company's headquarters moving from California to Austin, and now to Nashville to escape regulation? Why does every single support comment on this application contain the exact same message? We will not see long term economic benefits from this development. All profits derived from this data center will be funneled out of state to OpenAI and Oracle, two companies that will NEVER move their operations to New Mexico. Instead, this data center will operate until the term on their tax breaks have expired, all local resources have been drained, and the building falls into disrepair. Afterwards, they will build a new facility in another location that gives them better tax incentives. At that point, these tech companies will abandon our community and leave us with no water, polluted air, an enormous abandoned facility with no redevelopment potential, and sky-high utility costs. This project should not be approved. We do not want data centers in New Mexico. I implore the NMED to research the environmental impact that similar facilities are having on nearby communities across the	Mirsted Document	1	No			Yes			Yes						8/27/2026
Anna	Pollock	The data center project should not move forward with its current plan to use fuel cells that pollute our air with greenhouse gases. I and other New Mexicans care about our environment and want a livable state for future generations. Green energy sources such as solar power are abundant in New Mexico. There is no reason for this project to ignore clean, green sources of energy.	Mirsted Document	1	No			Yes	Yes	Yes							8/27/2026
Eleanor	Kentlewis	I am deeply concerned at the fraudulent and copy-pasted comments available on this project. There have been outspoken New Mexicans that have said their emails are used without their permission to support this project. I am deeply opposed to this project. The emissions created and water used to maintain such a center violate the principles that New Mexico stands behind. We cannot have a data center like this while our river runs dry. It's irresponsible and short-sighted. I urge the cessation of this project.	Mirsted Document	1	No				Yes	Yes		Yes					8/27/2026
Nicole	Arsenault	This project only stand to damage the already fragile ecosystem. Our state already struggles with water issues, and this project will strain our water resources. The project will also only temporarily spike job growth during construction. Data centers do not provide many long term jobs. Building this data center would be a huge mistake.	Mirsted Document	1	No			Yes	Yes								8/27/2026
Jesse	Carsten	project Jupiter is something that should NOT be completed. It takes up too much water and there are many more alternatives to si. If we even did use si it should be used sustainably according to our ecosystem/climate. There are many other worse things that take up our water such as monopolies of corporations. However, we should try and prevent the worsening of our home before tackling bigger issues.	Mirsted Document	1	No			Yes									8/27/2026
Wendy	Kent	I object to the Project Juniper AI Data Center installation. Multiple data centers across the country have demonstrated their lack of respect and consideration for the community members located around the centers. Oracle now says it will use fuel cell technology to power the center. I submit that I do not understand how a data center would use "fuel cell" technology to run a facility by changing a question/answer event into a 100 Ford? Somehow, the company will wiggle out of their "commitment to fuel cells" with one excuse or another and the center will have to connect to the grid. The local/state government will accept their lies and allow it to happen. Then the turbines will crank up and the air pollution will kick in. The center will suck up all the water and community members' wells will run dry or be destroyed as the water will not be decent to use. Electricity costs will skyrocket. Property values will drop. And the noise!! I do not want any data centers in New Mexico.	Mirsted Document	1	No			Yes									8/27/2026
Alex	Black	To Whom It May Concern, I oppose this permit application as there is no evidence that it will actually benefit the state of New Mexico in the long run. Project Jupiter will have a significantly negative impact on the environment due to: it's extremely high energy consumption, water usage, greenhouse gasses, fossil fuel generation and electronic waste. New Mexico is mostly effected by severe to extreme drought according to the U.S. Drought Monitor, we need to conserve our resources for vastly more important purposes than cooling a data center. The jobs that it will create will be temporary contractors that will no longer be required once the project is completed. The completed project will be largely controlled by AI with a small staff of actual people for oversight. The center will require more fossil fuel generation capacity than PNM's entire portfolio. The greenhouse gasses that will be emitted by the natural gas facilities will be more than 5.4 Million Tons per year (more than the total emissions of Los Cruces and Albuquerque combined). The proposed Ozone concentrations will put these communities above federal air quality standards. Several pollutants have been found in Project Jupiter's quality of air permits such as Carbon Monoxide, Sulfur Dioxide, Nitrogen Oxides, Ammonia, Volatile Organic Compounds, Particulate Matter 2.5 and 10. I have a 3 year old daughter. The last thing I want is to have these pollutants pumped into our air for her to breath for the rest of her life. Do the right thing here and deny this permit to protect New Mexico and keep us safe. Also, I read through many of the comments in support of this project, which are all exactly the same. Word for word. Something isn't adding up here. Thank you, Alex	Mirsted Document	1	No			Yes		Yes		Yes					8/27/2026
Amy	Simpson	Source NM recently documented and reported the fact that past Project Jupiter proponents are falsifying public comments and submitting them to NMED. This has happened in multiple cities; it is a premeditated and coordinated strategy to mislead NMED and the public. NMED needs to: 1. Immediately investigate these illegal actions and involve the NM Attorney General to fully investigate and prosecute; 2.Send an email to all the people who made comments with a copy of their comments to confirm if these were real or falsified; 3. Remove all fake comments from the NMED website.	Mirsted Document	1	No			Yes	Yes	Yes	Yes						8/27/2026
Charles	Hazlt	Unlike most of the form "cut and paste" or auto generated comments I have seen, I am writing to express my opposition to Project Jupiter. This project has substantially changed from the original project and in opposition to the air quality and water resources of the area. I am not opposed to data centers. But, their location needs to be carefully weighed against the impact on the environment and the people living in this area. Our air and water are scarce resources and this will have an immense impact on both. I do not support Project Jupiter and urge not to approve moving forward.	Mirsted Document	1	No						Yes						8/27/2026
Catharine	Wolkinshaw	I am strongly against this project because I live in the air and water basin of this project and we already have degraded air quality along with depleting groundwater quality and quantity. This behemoth of a project will only make these problems much worse for little to no benefit to myself, my family, and my community. Further I request a 60-day public review period before any permit is issued. This public review period should also include multiple public meetings in the region especially in Santa Teresa.	Mirsted Document	1	No			Yes	Yes	Yes							8/27/2026
Grace	Nygaard	To Whom It May Concern, My name is Grace, and even though I am not a New Mexico resident, I cannot sit idly while AI data centers ruin the lives of people all across the globe. In fact, I believe it is as important for me to speak out for those who cannot, like the animals. This issue may not directly affect me, but humanity is effected as a whole. Data centers are hurting the earth, the place we all reside. It is crucial that we try to stop any harm possible. Data centers harm the ecosystem by creating water, air, noise, and light pollution. They also create water shortages and/or a place like New Mexico, water is a resource that they cannot afford to lose this much of. We have never needed AI and we do not need it now. It is harming the environment and the education of humanity. This bubble must be popped, and we need to work together to do that.	Mirsted Document	1	No			Yes	Yes				Yes				8/27/2026
Tiffany	Monroe	I am writing to formally oppose the approval of Project Jupiter due to profound concerns regarding procedural corruption, severe environmental risks, and the existential threat this project poses to local farmers. The approval process has been marred by a violation of the New Mexico Open Meetings Act, where critical decisions were made in an illegal closed session, denying the public their rights to transparency. Furthermore, the existence of a secret Memorandum of Understanding signed by the Governor months before the public vote, alongside an NDA forcing a state university to suppress public records requests, demonstrates a systematic effort to bypass democratic oversight and hide the true terms of this deal from the citizens of Doña Ana & Otero Counties. Environmentally, the project has engaged in deceptive reporting with devastating consequences for our agricultural community. While developers claimed a water usage of 20,000 gallons per day, state engineers confirm the actual demand is closer to 3 million gallons per day. In a region already facing aquifer depletion, this massive extraction will directly compete with local farmers for scarce water resources, threatening to dry up wells, reduce crop yields, and jeopardize the livelihoods of the families who have sustained Doña Ana & Otero County's agriculture for generations. This is not just an industrial project; it is a direct threat to our food security and rural economy. Additionally, the strategy of filing air permits just below the "major source" threshold to avoid comprehensive environmental review is a clear attempt to evade regulatory safeguards regarding air quality and emissions. I urge the commission to reject this approval or pause all proceedings until the ongoing lawsuits are resolved, the water usage is independently verified and capped to protect local agriculture, and all permits are issued through a fully transparent, legal process. We cannot allow a $165 billion project to proceed on the foundation of secrecy, environmental deception, and the sacrifice of our local farming community.	Mirsted Document	1	No			Yes	Yes	Yes	Yes			Yes			8/27/2026
Luis	Chavez	According to the New Mexico Department of Health, age-adjusted heat-related deaths in the state increased from about 1.2 per million population in 2010 to 14.3 per million in 2021 & mdash; a tenfold increase over eight years. Given New Mexico's population of roughly 2.5 million, that translates to about 37 deaths per year from heat-related illnesses, including heat strokes and other heat-related conditions. The closed-loop system still has to release heat, no matter how you look at it. This is only contributing to the heat deaths in New Mexico. I wonder if you can add a few extra billion and create a few more jobs so you can build a machine to convert heat into something useful for the community, instead of just giving it to society as a back pay gift, but as I see it now, the "closed-loop system" still burns.	Mirsted Document	1	No			Yes	Yes	Yes	Yes			Yes			8/27/2026
Peter	Lorenz	On behalf of the Greater Albuquerque Chamber of Commerce, we write in support of Project Jupiter and the significant opportunity it represents for economic development, job creation, infrastructure investment, and long-term growth in New Mexico. The Greater Albuquerque Chamber of Commerce works with government, business, and community partners to promote and develop a welcoming business environment and a thriving, diverse economy in New Mexico. Through our Plan of Action, the Chamber has placed a clear emphasis on the business of economic growth, including efforts to help diversify and grow our private sector, strengthen key industries, and support pro-business policies that allow New Mexico to better compete for jobs, investment, and opportunity. Project Jupiter aligns directly with those goals. As proposed, the project would bring substantial private investment to New Mexico, support thousands of construction jobs, create long-term employment opportunities, and expand the tax base needed to support schools, public services, infrastructure, and local communities. At a time when states across the country are competing aggressively for major economic development projects, New Mexico should be prepared to welcome responsible investments that create jobs, strengthen communities, and help diversify our economy. The Chamber's economic development work is organized around the understanding that major opportunities often affect multiple sectors at once, including construction, real estate, utilities, technology, professional services, education, workforce development, and local government. Project Jupiter is exactly that kind of opportunity. Its potential impact extends beyond a single site or single employer. It has the ability to support a broader ecosystem of New Mexico workers, contractors, suppliers, small businesses, community partners, and public institutions. We also appreciate that Project Jupiter includes commitments related to workforce development, education, local infrastructure, water system improvements, and community organizations. Those commitments matter. Economic development is strongest when it produces both immediate job opportunities and lasting community benefits. Investments in training, upskilling, education, water infrastructure, and nonprofit partners can help ensure that local residents and businesses share in the	Mirsted Document	3	Yes						Yes						8/27/2026

Carolyn	Nasr	I strongly oppose the air quality permit and the micro grid system for project Jupiter. This project will produce more greenhouse gases than Albuquerque and Las Cruces combined. The cost of this air pollution/negative externality will be paid by NM residents' health. It will impact human health and increase deaths and diseases from air pollution. It will exacerbate the impacts of climate change so living things in NM that are already experiencing extreme drought and warming winters. Our future will have much less water and this project prioritizes a technbro center over people and the basic needs of clean air and water. There must be another way, such as constructing their own solar grid. I also advocate this protest due to concerns over its use of NM water resources during a time of extreme drought and the beginning of a climate turnoff point	Mirsted Document	1	No			Yes		Yes	Yes	Yes					8/27/2026

Michael	Hutchins				4		Yes	[redacted]													
		My name is Michael Hutchins and I have lived in southern New Mexico for over 30 years. For 30 years I worked as a federal employee managing natural resources across the United States; I know when a proposal is ill thought out and inadequately vetted. I strongly oppose the issuance of an air quality permit to Yucca Growth Infrastructure which is directly tied to the Project Jupiter data center. This data center will affect far more than its immediate location. Air pollution does not stop at county or state boundaries. Emissions from this facility will impact residents throughout the Paso del Norte region, including the communities of Doña Ana County, Las Cruces, El Paso, Texas, and Ciudad Juárez,Chihuahua. The New Mexico Environment Department should carefully evaluate cumulative air quality impacts regionally, not just the impacts immediately surrounding the facility. Adding 2.5 billion tons of greenhouse gases annually to the region's active and long-time non-attainment zone should not be approved through their permit application . This level of gases is equivalent to the amounts generated by Albuquerque and Las Cruces combined. It will be like a new city has spung up in southern New Mexico. The Las Cruces/El Paso metro area currently ranks 38th worst in the nation for ozone pollution according to the American Lung Association's 2026 State of the Air report . It is unimaginable to approve a new source of carbon dioxide annually to our communities that equates to the annual outputs of Albuquerque and Las Cruces combined. In addition, I am very concerned about southern New Mexico's precious and dwindling water resources. This region is experiencing chronic water scarcity and prolonged drought. Our region is running out of water. Project Jupiter's estimates of water needed for the closed-loop portion of its campus range from 25,000-40,000 gallons per day following a one-time fill of ~460,000 gallons . The Project's two gas-fired microgrids will require nearly 1 million gallons of water per day . Decisions about projects of this scale should reflect long-term sustainability of the region's limited water supply. Southern New Mexico does not have water to spare. We need to protect our resources for our ranchers, farmers, and recreationists. On the issue of water conservation alone, a data center of this scale in southern New Mexico is impractical due to its enormous water consumption. This project will consume the region's scarce water resources while increasing profits of millionaires and billionaires; people who do not live in or contribute to the community. The air quality permit application should be denied on its face given the project's fuel cell provider's (Bloom Energy) known history of multiple Environmental Protection Agency-enforced actions for hazardous waste violations and being classified by the EPA as a Large Quantity Generator of hazardous waste. A simple internet search found Bloom Energy was, "contracted to operate the proposed Deep Green data center's 94MW of fuel cells, received more than $160 million in public subsidies in Delaware, was fined $1.37 million by the EPA for hazardous waste violations, delivered fewer than 900 of 1,500 promised jobs, and had 30MW of fuel cells decommissioned after roughly seven years against a 15- to 20-year expected lifespan. New Jersey pulled fuel cell subsidies entirely, and California ended its fuel cell manufacturer subsidy program". I am concerned about the good faith of the corporations proposing this project. Residents have stated the corporations (via consensus) have utilized their personal information to submit public comments to																				
Joy	Mathieu	Project Jupiter is a threat to local communities in every part of New Mexico . Every New Mexico resident as well as wildlife and our diverse landscapes will be put in jeopardy if Project Jupiter commences. We are a diverse state that depends on agriculture, farming, ranching, tourism, public and national parks for our economy. Livelihoods, communities, schools, farms will all be affected financially. With finances being a huge concern, it is the lowest concern compared to the health and wellbeing of New Mexico residents, wildlife and ecosystems. Our already dry and drought prone state has limited water, that we depend on for everyday living, the data center Project Jupiter would use a large portion of the clean water we don't have to spare. Taking money out of the pockets of New Mexico residents to willfully hand crown to billionaires who have no interest in providing a better quality of life or helping those in New Mexico at all is a direct attack. Putting the health, livelihood and at the very least wellbeing of those in New Mexico at risk to help benefit billionaires who will never suffer the consequences of what they want to impose on us, is the most selfish, money hungry, inhumane, corrupt action one can make. I pray you take into consideration the lives, you will catastrophically devastate if Project Jupiter commences and is not stopped. New Mexico Environment Department needs to: The public should be given an additional 48 days to review and commenton the air quality permit so no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'sacrifice zone' and dumped on; this means our air quality does not meet federal government rules.	1	No	[redacted]	Yes	Yes	Yes	Yes	Yes	Yes		8/27/2026
Liane	Pippin	THIS NEW PLANT IS DANGEROUS. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air (see tables below) Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses. Developers did not propose pollution controls They estimated the plant's pollution based on tests from a very small unit (only 46kW) but the power plant they want to build is 21,000 times bigger. A 10% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Estimated pollution from the plant's gas pipelines is not included Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil Bloom Energy has been fined a total of $1.3 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. The public should be given an additional 48 days to review and commenton the air quality permit so no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'sacrifice zone' and dumped on; this means our air quality does not meet federal government rules.	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/27/2026
Esther	Smith	We do not need a bigger data center. Our planet is on the verge of no return, we didn't need AI before, and it's use disgusting. Earth is three years away from not being able to return from the mistreatment from humans, and AI is boosting it. Data centers cause all sorts of different pollution, like light pollution, and noise pollution. It also takes a lot of clean drinking water which is already limited. We went from stone tools to machines on our own, from horses to cars on our own so why do we need AI? All AI does is recycle information, it doesn't create anything new. It is only making us even more lazy than before, students rely on it for assignments making assignments an ineffective learning experience. What AI is used for is disgusting. Deep fakes, trafficking, child pornography, and catfishing. It is horrible that there is so many people who use AI, and it's disgusting that many use it for things like this. AI puts others at risk without them knowing, since it cannot create something new, it's all recycled. AI music, and art is just stealing. Nothing is new.	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/27/2026
Stephanie	Norwood	Arizona centers are detrimental to the environment. Consider the water usage of such a center. Consider the dry Rio Grande. Building an AI data center in New Mexico is a slap in the face to those who are impacted by the lack of fresh water available. Further, data centers produce emissions via electrical use (which often is not produced in an eco-friendly manner). Project Jupiter promises economic growth at the expense of the environment. This promise of economic growth preys upon the economic inequality felt by residents of New Mexico, hoping that here are too ignorant to realize that this company does not care about New Mexicans.	1	No	[redacted]	Yes		Yes					8/27/2026
Justin	Ruiz	I am a resident of Santa Fe, New Mexico and I am asking that you deny Yucca Growth Infrastructure's air quality permit. Santa Fe has personally been a welcoming and beautiful home for myself and my family. I want to continue to live here and even raise my children here in the hopes that they have a safe and secure future. However, that future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering everyone will endure as a result of the gas plants air pollution. To add 10 million metric tons of carbon dioxide pollution and a vague estimate of toxic emissions to Sunland Park/Santa Teresa active and long-time nonattainment zone would be nothing short of blatant environmental racism. Their metro area is currently 38th worst in the nation for ozone pollution and southern New Mexico has received a failing grade on this air quality standard every single year since 2000. New Mexicans are already breathing some of the most compromised air in the whole country. It is completely unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone from this project will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous & death; many of them at very low levels. How are parents and families supposed to send their kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Doña Ana County has and continues to face an illegal dumping epidemic so how can it be sure that these systemic oversight failures won't continue and expand to include this dangerous and experimental fuel cell operation. A law for illegal dumping does not undo damage or its spread once the aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. New Mexico Environment Department needs to provide: the public should be given an additional 48 days to review and commenton the air quality permit so no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/27/2026
Jim	Graham	I am opposed to the Jupiter AI center as it is currently envisioned. New Mexico is often used as a dumping ground by outside interests. If they want the Jupiter project to be good neighbors they should commit to using renewable energy and storage. It will be less expensive in the long term and is just the proper way to do things, especially in an energy rich area like NM. They should also commit to very low water use by using ground sourced cooling. The public should be given an additional 48 days to review and commenton the air quality permit so no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/27/2026
Rebecca	Rodriguez	I strongly oppose Project Jupiter. I have lived in New Mexico my whole life, and while our state has been in droughts and air pollution, this data center will only make it worse. This will affect our environment, our families, businesses, and rivers. No matter how they word it, the greenhouse gases it would throw into our air, the water it will take from us which we don't have, it is not for us in our communities. I urge you to please look at other states in which data centers have been built and how it has affected them. That is how New Mexico will be if Project Jupiter gets built and you let it move forward with this permit. I would like to request the department to reject the permit, if the permit is not denied, I also would like to request that a public hearing over Santa Teresa to have their voices heard once more.	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/27/2026
Catharine	Watkinshaw	I am requesting that you deny the air quality permit for Project Jupiter. I live in the air basin of this project and am very concerned about the impact of this project on mine and my family's health and welfare. I strongly request a 48 day period for public review of this proposed permit and that public meetings be held throughout this region and especially a public hearing be held in Santa Teresa, NM.	1	No	[redacted]	Yes	Yes	Yes			Yes		8/27/2026
Anonymous	Anonymous	You call yourselves public servants, your entire objective as a governing body is to make good on your commitments of what you're supposed to protect. And yet, you propose a plan that will come with colossal, potentially irreversible detriment on our environment, our community, and our home. You should be ashamed of yourselves. The dedicated, hardworking, spirited people of Southern New Mexico are not lab rats, and we certainly have no interest in our home being annihilated by the interests of a privately-run, for-profit corporation that couldn't care less about the harm they might do to anything or anyone else as long as they make a buck. Many years due to the water needed to even survive here, and our quality is already not up to par, and all this will do is make it worse. Deny this permit. If you don't, may it weigh forever on your conscience.	1	No	[redacted]	Yes	Yes	Yes			Yes		8/27/2026
Sandra	Nemeth	I am against the Project Jupiter Data Center and all of its attempts to get certification for energy sources. I live with Chronic Obstructive Pulmonary Disease. Ozone and particulate matter in the environment create conditions where I am unable to even leave the house. The project that they are trying to get approved will increase these environmental hazards. To cause New Mexicans to be unable to even breathe the air is criminal. Please deny their application.	1	No	[redacted]	Yes	Yes	Yes			Yes		8/27/2026
Brigid	Dott	If the permit is not denied a public hearing needs to be held in Santa Teresa in both English and Spanish with an option to participate virtually Dear NMED staff, My name is Brigid Dott I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 150 Microgrid in Doña Ana County. I am a lifelong New Mexico resident, and I care about the direction our state is taking. I care about New Mexico's environment and about the effects this project will have on our air, water, landscape and wildlife and on the residents who would live near the project even if built. The project's proposed fuel cell powered grid is concerning for many reasons: it would produce a high level of greenhouse gases and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology is a constituted waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 150 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Brigid Dott	[redacted]											
Anonymous	Anonymous	I am a 5th generation New Mexican and while I have watched my elders pass, I have been blessed to have heard their stories... why they chose New Mexico as their home, the beauty that we have each experienced in different time periods on the same land and the adventures that span generations which have taken place only because of the beauty we are blessed to live within. This land is important to every single person born here. called to be here or as enchanted visitor. Locals have always cared for the land and that is exactly why New Mexico has remained so wonderful. I urge you to consider this for yourselves while working on passing this project into action. We do not want it. We want YOU to stop it. Absolutely no one wants this. The jobs are SO temporary and will bleed our land of what we cherish most, our land which is beautiful, captivating and enchanting, our water which is limited but appreciated by every being that lives on the land and our air which used to be one of the cleanest and most cherished parts of us. It is already dirty enough. We need progression. We need our planet more than we need this. We need long term protection for our beautiful state. Not1 Temporary Jobs! All the very minimum please consider, • The public should be given an additional 48 days to review and comment on the air quality permit so community members can participate equitably. • The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. • If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. • Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	No	[redacted]	Yes	Yes				Yes	Yes	8/27/2026
Anonymous	Anonymous	Why are we not consulting the citizens of the cities, you are actively trying to ruin. Also, maybe we should start considering that the greedy people pocketing money from this being passed also will have to live in and suffer the same low quality living consequences that will come with you making decisions with no regard for the human lives that not only pay your bills but what you vote into office to protect us. The public should be given an additional 48 days to review and commenton the air quality permit so no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	[redacted]	Yes	Yes				Yes	Yes	8/27/2026
Kathy	Prenatt	As a very concerned resident of Las Cruces, I oppose Project Jupiter, and the way it is being handled. There has been far too much secrecy. And those of us that will be most affected by it are being rushed to support it. Respectfully, I demand that: - The public should be given an additional 48 days to review and comment on the air quality permit so community members can participate equitably. - The air quality permit application should be denied, given Bloom Energy's history of illegal dumping hazardous waste. - If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism, as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'sacrifice zone' and dumped on; this means our air quality does not meet federal government rules.	1	No	[redacted]						Yes	Yes	8/27/2026
Anonymous	Anonymous	I am asking you to deny Yucca Growths Infrastructure's air quality permit. The health risks of green house gasses are irreversible and carbon monoxide can stop oxygen from entering your brain, this can give permanent brain damage, heart attacks, and death. The underlying thyroid problems one can continue by being exposed to these chemicals can be cancer causing. Our people should not be subject to life long illnesses, cancer, defects, and should not be subject to not being able to reverse these effects forced upon them and their community. New Mexico has been subject to changes against their people's wills for years. We are constantly taken advantage, due to the luck of our voices being heard. Our very own water sources drying up. The Rio Grande River, Aleopas lake, and more. Its living infrastructure into a poverty ridden, and already environmentally struggling place is a crime. To take from people with no voices, some with no idea what is truly going on, is an act of systematic injustice and environmental racism. Our families, our communities, our workers, and children do not deserve to suffer generations of illnesses, pollution, water scarcity, and toxic waste pollution for the kind of inattentive infrastructure that will cause more than years of damage that is not reversible in our lifetime. Our people and our planet will for years to fighting the consequences of this and may never recover. New Mexico has been subjected to illegal waste dumping for decades, being taken advantage of because of our incapabilities to fight against multimillion dollar corporations. Our land and people are being taken advantage of. It is time to stop illegal waste in New Mexico, it is time to stop Yucca Growths Infrastructure's air quality permit, it is time to as a whole move in a different direction than carbon dioxide pollution. It is time for us all to step up and fight for the future of our planet. The public should be given an additional 48 days to review and commenton the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	[redacted]	Yes	Yes	Yes	Yes		Yes	Yes	8/27/2026
Paul	Alley	We can live without AI, we don't need this data center, but we do need clean water and a livable planet. I believe the public should be given an additional 48 days to review and comment on the air quality permit so community members can participate equitably. Due to the history of dumping hazardous waste on Bloom Energy's part, the air quality application should be DENIED. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English AND Spanish, with an option to participate virtually.	1	No	[redacted]	Yes	Yes				Yes	Yes	8/27/2026
Terry	Miller	Thank you for giving the public an opportunity to express our thoughts about the Fuel Cell Air Permit you are considering for Yucca Growth Infrastructure. I cannot write about the scientific reasons why I am asking you to deny the Fuel Cell Air Permit because I do not have the background and knowledge this would require. But, I have read some of the scientific statements posted and, even with my very limited knowledge, it is clear there is great cause for concern, and clear scientific reasons, that our environment and the air quality in Doña Ana County and our state will suffer greatly if you grant this permit. What I CAN ask you to consider is the negative impact the scientifically-predicted polluted air will have on my–and your–children; my–and your–grandchildren; and, my–and your–great-grandchildren. I have read your Mission Statement–and Our mission is to protect and restore the environment and to foster a healthy and prosperous New Mexico for PRESENT AND FUTURE GENERATIONS. And, I have read the 4 tenets that guide your Mission. The very first one states, "The Air Quality Bureau of the New Mexico Environment Department protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." So, I am asking all of you to honor both your mission, and the tenets that guide your mission, when you make your final decision. The health of our future generations in Dña Cand New Mexico depends on you. The public should be given an additional 48 days to review and commenton the air quality permit so no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Thank you. Terry Miller	[redacted]											
Anonymous	Anonymous	I am a Native New Mexican. I do not like the rhetoric and suspicious language of the company that is developing the Jupiter project. I have researched the multiple facets of the descriptions, proposals to the area and the specifics of how it began, how it is being developed and the future consequences to our state, our environment our people and our water. I believe that The Doña Ana Area residents were lambasted. My main concern is the impact to water. The Company states that they will not and are not including future needs and outcomes in their Proposal. That deeply indicates to me that once the Project is in place and functional that "future needs" including but not limited to "more water needs" than originally disclosed will be a moot point because the state without any recourse to refuse the new water requirements. This company is framing the "advantages" of their Data Center while, at the same time, downplaying the environmental catastrophe that their presence in New Mexico will create climate wise and to the future of our State. Like all things going on in our country right now, it Money is "King" and can buy anything. 2) There is a Policy of Restricting the Information (almost always misleading and intentional) down the throats of the Decision Makers, often highlighting the "glossy parts" while "sugar coating" the not-so-great parts while at the same time, moving on a project in overwhelming whirlwind speed. In New Mexico, there is a belief that whomever (Court Decks) are portents of evil. This Jupiter Project is a HUGE Duct Devil that will be sweep across our state, decimate our already tenuous water supply and leave us all in a world of hurt. PLEASE BLOCK THIS PROJECT FOR THE FUTURE OF OUR STATES PEOPLE, ENVIRONMENT AND FUTURE WATER. The public should be given an additional 48 days to review and commenton the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	[redacted]	Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026
Anonymous	Anonymous	This data center is not as important as the well being of all the communities affected by the lack of water caused by the construction of it. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'sacrifice zone' and dumped on; this means our air quality does not meet federal government rules. New Mexico Environment Department should provide the public with an additional 48 days to review and commenton the air quality permit so no community members can participate equitably. Deny the air quality permit application, given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/27/2026
Suzanne	Guralé	We must not put our state and water up for sale at such a high price to our communities. If we do not honor our resources, we will reap the consequences that affect our children and grandchildren for years to come. Do the right thing for NM. Listen to the people. The public should be given an additional 48 days to review and commenton the air quality permit so no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied a public hearing needs to be held in Santa Teresa, in both English and Spanish with an option to participate virtually	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/27/2026

Administrative Record NSR 10833_010915

Emilia	Preczenka	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses not only for Mexicans, but also for the whole world. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As someone who deeply cares about the wellness of the environment,I am very concerned about the fact that Project Jupiter's power plant will generate a lot of climate-warming greenhouse gasses. This will erase most of the climate progress we have made in the last two decades. I believe that this should not be acceptable, since a good climate and a clean environment are essential for humanity's survival. The project's proposed fuel cell powered grid is concerning for many reasons: -It would still produce a high level of greenhouse gas and toxic pollutants. -This technology generates toxic waste, and the process of handling this waste is still unclear. -Fuel cell technology or a centralized waste system has never occurred at this scale. -Surrounding communities' air will be negatively impacted by this development. I urge NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC'S air permit for the YGI Microgrid. I Ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Emilia Preczenka	1		No	[redacted]									
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Annette	Del Suarez	Please end Project Jupiter before it begins. It does nothing but promise to turn our people our lands and our future generations. The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Melissa	Flores	Please do not allow this permit. Southern New Mexico is running out of water! Where will the water come from?	1		No												
						Amended Document					Yes						8/27/2026
Tania	Radkovan	There is no need to build this in New Mexico, a desert state that is already struggling, under the false promise of job creation and economic advancement for residents. This will only drain our resources, misuse your land, and harm the environment around it. Do not build it.	1		No												
						Amended Document				Yes		Oppose - Non-Substantive		Yes			8/27/2026
Nyssa	Licari	Dear NMED staff, My name is Nyssa Licari. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County for the following reasons: Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined –Albuquerque, Las Cruces, and Santa Fe. The proposed "micro" grid is a 2,802 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of these grids include a substantial amount of renewable energy sources and each of these grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. Santa Teresa Elementary and High School are located within five miles of this project site. 94% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana County near the site have not been properly notified of this air permit application request. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. What happened to the public hearing the state Air Quality Bureau recommended on the previous applications that the industry has since redacted? NMED should not overlook the overwhelming community concern expressed in the last public comment period, which still applies to this same project! urge theNMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Sincerely, Nyssa Licari	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Jean	Bowles	Corporate personhood, lack of direct constitutional powers to control corporate existence and policy are foundational challenges to one vote per citizen. The constitution needs to be amended through "the states' initiative" to do so (article 5). The present Law of the Land is out of date with challenges presented by technology and the development of the business sector, its presence, use and rules, that did not exist when the Constitution was written. A frame of mind to sustain/protect/use power to live in harmony with the governing body for war, peace, education, economic directives, and healthcare, must be arranged by the people reflecting the present and future life within the environmental latitude and longitudes designated on the western hemisphere. Offering a secure dynamic of participation for each voter and a plan for the future of our governing body can be used in education forums of empowerment, possibly leading to a unified perspective for all our vested participants. The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Haley	Erwin	Als a blight on society that will poison the Earth and sicken its inhabitants all so a few hundred wealthy sociopaths can feel important. The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied a public hearing needs to be held in Santa Teresa in both English and Spanish with an option to participate virtually.	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Morgan	Sexers	As a citizen of New Mexico I absolutely oppose the Jupiter Project. This project would release 10 million tons of green house gas emissions a year. This is more emissions than all of NM's major cities combined, completely back tracking any recent progress our state has made on emissions. I value clean air far more than AI. It's water use would have a devastating impact on the water table of the region which is already depleted. I value water use for homes and agriculture far more than for AI. It would not necessarily create enough local jobs to offset loss of jobs to AI. There is no contingency in the contract for construction of the center which would award construction jobs to in state firms. Construction contracts have already been awarded to firms from other states. The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'sacrifice zone' in whole Earth, this means our air quality does not meet federal government rules.	1		No										
						Amended Document				Yes	Yes	Yes	Yes	Yes		Yes	8/27/2026
Michelle	Soijak	&Aacut; I request that 60 days be added to the review and comment period for the air quality permit application of the Project Jupiter methane-fueled AI power plant. &Aacut; I request that the application be denied given Bloom Energy's history of regulatory issues. &Aacut; I request that if the permit is not denied, that a public hearing be held in Santa Teresa.	1		No										
						Amended Document					Yes	Yes				Yes	8/27/2026
Pauline	Wheatley-Rutter	Please reject the advancement of Project Jupiter. We cannot afford to power this data center or endure its escalation of the climate crisis. The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Gretchen	Williams	I oppose project Jupiter and ask you to deny the permits requested. The project will have devastating consequences on air quality and pollution, water usage, and other environmental concerns. The change in fuel type does not help, it's the wrong project for NM. We don't want it! The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Caroline	Barr	Please schedule a public hearing before any land additional hearings if necessary. I am concerned about pollutants as I have interstitial lung disease and suffer from the amount of pollution we already have here.This will have devastating health consequences for all of us in the Rio Grande valley. The company did not give an accurate estimate of the huge amounts of pollutants that will be produced. The company has been fined for not adequately managing pollutants at other facilities. Why should we believe they will not do the same thing here? The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Bryana	Montoya	I, Bryana Montoya, am proud to be a New Mexican resident. A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the 15(ish) permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these stacks were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazard into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks stretch in around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete dethement of the authority vested in you. The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Teri	Rauch	I don't want Project Jupiter to bring a methane fueled power plant to our county. I am concerned about Jupiter's lack of transparency, our air quality, our water and safety issues. I am asking that the permit be denied. The public should be given an additional 60 days to review and commment on the air quality permit.no community members can participate equitably.	1		No										
						Amended Document					Yes	Yes				Yes	8/27/2026
Keith	Gangwere	Dear NMED staff, My name is Keith, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am young, and I should be promised a long, healthy life. Instead, I am already living in fear of what tomorrow will look like because massive AI data centers continue to pop up all around the United States. This one particularly will ensure that the fresh water humans NEED to survive will be gone and wasted by the time it's my privilege to begin my adult career. Do you live in fear of flashing the toilet because you do not know when the next amount of fresh water will be in your household? How often do you shower or wash your hands with fresh water? Do you drink any beverages? Do you do the dishes? Do you have children to bathe? These are simple needs that are becoming luxuries. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants, this technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the departments please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Keith	1		No

Valentina	Valdez	I am vehemently OPPOSED to the approval of this permit! As a citizen of New Mexico and a person with a long generational history in the area, this project stands to hurt ALL of New Mexico. These corporations do not have the best interests of people in mind; they care about profits. The long-term effects on our children will be devastating. Our communities deserve clean air. We are already at a state ranking low on water. This is not the best use of our water resources. No one has asked for AI, this being pushed on us by class oligarchs. We deserve better, and the officials in charge of reviewing the permits, please remember that you serve the citizenry of this State. Our voices need to be heard. Please please please DENY this permit!	1		No										
						Amended Document					Yes						8/27/2026
Naomi	K	Dear NMED staff, My name is Naomi. I am a New Mexico resident, living in Rio Rancho, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have lived here my whole life. Out of all my years of living and New Mexico history, this had never been a necessity. We care more about being able to see our mountains, keep our wildlife, nature, water, insects and home than a data center we've given our whole lives without. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the departments please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. 						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Ty	Kramer	Hello, my name is Ty Kramer. I am a resident of Albuquerque, New Mexico and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with my family. I want to be able to make sure that New Mexico stays a safe space for the common people in the future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 38th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of near-ground-level ozone. Last summer, my brother fainted and became the victim of mild brain damage because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to get away from the sun. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous--many of them at very low levels. How am I supposed to support Project Jupiter knowing the toxic air pollutants it would produce can cause permanent brain damage or breathing complications. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these [redacted]	3	Yes											
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Casey	Dickerson	Dear NMED staff, My name is Casey Dickerson. I am writing because I am concerned about the risks and harms Project Jupiter poses not to just New Mexicans, but the rest of the world. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a mother of 2 and this data center will only add to the climate crisis. I fear for my children and the children across the world. We can live without data centers, but we cannot live with contaminated water, extreme heat, or extreme cold. New data centers will be affecting us all and our future. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the departments please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Casey Dickerson	1		No										
						Amended Document					Yes	Yes		Yes		Yes	8/27/2026
Willow	Goode	I oppose project Jupiter. It will wreck our environment and make clean drinking water less accessible when that's already an issue worldwide. I come from the poorest county in my state and I have seen what it's like to not have clean water. It's not livable. It's not sustainable. It's horrible for elderly, infants, and people who suffer from autoimmune diseases or illnesses.	1		No										
						Amended Document					Yes			Yes			8/27/2026
Sarah	Stephen	The Rio is dry already this year. Why permit more data companies to exploit New Mexico's dwindling natural resources further? Do not approve the permit for this project's go forward.	1		No										
						Amended Document				Yes		Oppose - Non-Substantive	Yes				8/27/2026

Heather	Ailes	I oppose this project on environmental grounds. Beyond the strain this project puts on our finite water resources as a state, I'm concerned about groundwater contamination, massive greenhouse gas emissions and cancerous byproducts. There's also irrefutable evidence of substantial increases in surrounding temperatures in places where data centers have already been built. Bringing these harms into our communities under the demonstrably false claims of "local jobs" is bad policy for our communities and our economy. Finally, I have moral objections to the true purpose of these massive data centers. They allow for the relentless and amoral pursuit of "artificial intelligence," controlled by private industry without oversight and with very little discussion or accountability for the long term consequences of this kind of technology.	Merged Document	1	No	[redacted]	Yes	Yes	Yes					8/17/2026
Ruby	Denson	The proposed plant, if built, will release up to ten million tons of greenhouse gases within just a year. We only have one America, and one Earth, and as citizens it is our right to a healthy public land without projects like this steamrolling over all of the progress we have made towards bettering the climate over decades. This is a project that benefits the few at the cost of years of work and progress taken by millions all across the country and the world at large. Allowing it to move forward spits on the democracy we founded our country on. Granting this project a permit goes against the NMED's supposed mission to foster a healthy New Mexico for future generations is completely contradicted by the Yucca Growth Infrastructure's proposed project, which will be located within five miles of multiple school districts, and is being handled by a company with a documented legal history of mishandling toxic waste. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid.	Merged Document	1	No	[redacted]		Yes	Yes					8/17/2026
Christopher	Currie	As a residents and local New Mexican I formally oppose project Jupiter and all outside data center companies. New Mexico is a unique state and culture that has been historically disrespected by outside forces in one form or another. Projecting Jupiter is just the latest in a long line of greedy outsiders that have no problem ruining our land for their profit. We need out clean air, open desert, and clean water for the residents of the state of New Mexico. The fact that any elected politician would even consider allowing an outside entity whose entire business model is designed to ruin natural resources and displace human involvement is deplorable. My hope is that all of these current iteration of invaders IE: the black rock/ pnm merger, project Jupiter, the Amazon expansion, etc are issues that future politicians can use as projects to stand against for the will and good of our states future. Law makers of our state, please listen to the voice of the people, we don not want these projects to move forward. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Thank you	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Cynthia	Haber	I am a resident of Dona Ana county , I am asking you to deny Yucca Growth infrastructure's air quality permit. A change to fuel cells has minimal impact on the suffering we will endure as a result of gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long time non attainable zone would be nothing short of blatant environmental recidivism. Our metro area is currently 16th worst in the nation, we have received a failing grade on air quality every year since 2000. It is unacceptable to invite anew source of hyperscale air pollution into our communities. Carbon dioxide pollution alone will heat our environment much faster pace and promote the formation of more ground level ozone. In the intense heat ,we have now I am experiencing heat exhaustion, I also hear my neighbors complaining that they too, are experiencing it. My sister who is elderly , can only be outside for a limited time. Even my dogs are feeling, I worry about our wild life . As we create more global warming. Fuel cells create hazardous waste and the fuel cell provider for this project has a history of illegally dumping waste and hiding it .This company will likely do the same here,Dumping,dangerous and undisclosed chemicals into our public lands fills, and we have to wait until someone notices. A fine for illegal dumping doesn't undo damage or it spread into our aquifer and soils are contaminated.It will also not recapture the volatile chemicals released into the air when hazardous waste is improperly stored These Data centers and the private equity companies are only only concerned with profit and their own interest.They claim they are going to to do much to improve our beautiful homeland. But they will Rape our natural resources, our business, our livelihood, our health. We have so much to lose . Please take the time to look at what big , under regulated corporation, have harmed communities in the past. Please, not here. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Odalis	Pacheco	I do not live in Santa Teresa but I am part of the New Mexican community. If one part of my state is impacted, the rest will soon follow if we do not speak out against this kind of decision making. Approving this permit would create the downfall of this state. New Mexicans deserve better. As I have learned, border towns such as Santa Teresa, are already impacted by environmental racism. Saying yes to this, is not going to make our state better. It will make it worse. If you truly care about New Mexicans and their future livelihoods, you will think twice before approving it. This "project" should not be allowed. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Bonita	Davis	This area of New Mexico already has polluted air due to the dust that is naturally there in a desert environment. We do not ned another major source of pollution here. People need to breathe! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Jack	Barkhurst	I urge the Air Quality Bureau at NMED to reject Project Jupiter's air quality permit because their new fuel cells are not proven effective at their scale, Bloom Energy, the company behind the fuel cells has a history of illegal dumping of hazardous waste, the emissions in construction and operation will be larger than that of the three largest cities in New Mexico combined, and with over 70% of US citizens opposing data centers being built in their communities, it's clear that New Mexicans, who have historically felt the impacts of extractive industry, do not want another project that will degrade our land and our health. This PR stunt that they're pulling to pay New Mexicans to promote the data center on social media, as well as speaking to families and youth near UNM campus, Railyards Market, and other beloved spots in Albuquerque shows that they are desperately trying to pull any support together that they can. If it was truly beneficial to our communities it wouldn't be this difficult for them to gain support. As a young person who studies Sustainability and Environmental Planning at UNM, I can tell you that this project is being greenwashed. Please stand on the right side of history, no matter the pressure that they may give you. I ask for the public comment period to be extended 60 days so that there is more time for members of our community to respond and if the permit is not denied a public hearing should be held in Santa Teresa, in both English and Spanish with an option to participate virtually. Thank you for your attention to this matter.	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026
Milo	Patterson	The air quality permit for this proposed fuel cell plant must be denied. Given bloom energy's fraught history of illegal dumping, pollution, and creating potential public health crises, there is no reason to expect this project to proceed in a way that respects and protects the health and livelihood of New Mexicans. The fuel cell project will release unprecedented amounts of pollutants and carcinogens into the atmosphere, causing harm not only to the fragile desert ecosystem but to the people of Doña Ana county. The area is already experiencing substandard air conditions and no new industry should be allowed to operate until existing air quality concerns are met. Finally, a bilingual, accessible comment period with in-person and virtual participation options must be made available so that the people living in the affected area have a chance to make their voices heard.	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026
Grace	Anonymous	We do not want a data center draining the land and resources. Every living being deserves to drink clean water and breathe clean air, and even though Project Jupiter is claiming to change their methods, this will still hurt our communities. The wealthy have no regard for the public's health. I am feeling so much stress and anxiety thinking about the possibility of Project Jupiter polluting our state, concern for the people, animals, and plants in Doña Ana. This is not the future I want. This land and it's people have been exploited so much, we need to put an end to this. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Shanna	Meaders	I live in Doña Ana County and do not want experimental technology deployed at an unprecedented scale in my backyard. Yucca Growth Infrastructure's gas-powered fuel cell plant is 1,000 times larger than Bloom Energy's biggest existing fuel cell plant. New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." Allowing this monster in is a failure of those above missions. This is what I am asking: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026
Hope	Wimer	I respectfully urge the New Mexico Environment Department to deny, or at a minimum require additional review and stronger enforceable permit conditions before approving the Yucca Growth Infrastructure, LLC air quality permit for Project Jupiter. Although the revised proposal using Bloom Energy fuel cells may reduce emissions compared to the previously proposed gas turbines, that does not mean the project's impacts are insignificant. Fuel cells powered by natural gas still consume fossil fuels and emit criteria pollutants and greenhouse gases. The Department should evaluate this project based on its actual emissions and cumulative impacts—not simply because it is cleaner than an earlier proposal. Given the unprecedented scale of Project Jupiter, NMED should carefully evaluate cumulative air quality impacts alongside other industrial development in the region, ensure emissions estimates account for startup, shutdown, maintenance, and upset conditions, and require continuous emissions monitoring, transparent public reporting, and enforceable permit limits. Because this would be an unusually large deployment of fuel cell technology, the Department should also ensure there is sufficient evidence that emissions performance can be maintained over the facility's operational life. Protecting public health requires more than comparing this proposal to a more polluting alternative. It requires demonstrating that the facility itself will comply with New Mexico's air quality standards and that its remaining impacts are fully understood and appropriately mitigated. For these reasons, I respectfully request that NMED deny the permit unless the applicant demonstrates, through a complete and transparent record, that the project will protect air quality and public health under enforceable permit conditions. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Edward	Woods	I believe this application should not be approved. Applicant has baited and switched its plans since day one. Original promise was all renewables, them gas turbines, now methane fuel cells. There appears to be no end to the duplicity of applicant. They cannot be trusted to act in good faith, nor fulfill promises made. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026
Alicia	Robinson-Welsh	Project Jupiter is a terrifying and dangerous proposal. Not only will it double the electricity needs of New Mexico but it will worsen an already overheating climate, especially locally in Santa Theresa where residents will experience hotter overall temperatures due to the cooling processes for the computers. It will use water that we do not have, exacerbating New Mexico's water crisis. Project Jupiter only benefits the richest of the rich, billionaire investors from out of state and lining the purses of state politicians. It does not benefit the people of New Mexico, it threatens us with quickening environmental disaster. The people of Dona Ana County and Santa Theresa will face higher cancer rates due to air, land and water pollution the data center will produce. Oracle and Open AI, along with Yucca Growth Infrastructure and Blackstone, will be making quick profits at the fatal expense of many New Mexicans, both immediately and long term. Once this facility is abandoned in a matter of a couple of years, as the computers become obsolete and these companies turn to other communities, we will be left with the consequences of economic and environmental destruction. Say NO to Project Jupiter, NO to AI Data Centers. We need a moratorium on AI Data centers and detention camps in New Mexico and across the country. Please take these comments with the gravity that they necessesitate. The people of New Mexico are outraged and do not want data centers in our backyard. Alicia Robinson-Welsh Albuquerque resident	Merged Document	1	No	[redacted]	Yes		Yes		Yes			8/17/2026
Paul	Cook	I am strongly opposed to granting the Yucca Growth air quality permit. Even with the fuel cell technology, this would add a huge amount of air pollution, more than that of Las Cruces and Albuquerque combined. This will have a major impact on people's health, particularly older residents, children, and those with respiratory illnesses like asthma. This would become a huge long term cost to the area, for people's health, as well as costs to residents for productivity and prosperity in the future. Please do not approve this permit. Giving a multi million dollar tax break to a company to increase pollution and health care issues for New Mexicans is unethical. Increasing New Mexicans' long term health issues is not beneficial to the state.	Merged Document	1	No	[redacted]		Yes	Yes		Yes			8/17/2026
Isabel	Spafford	I demand that members of NMED's Air Quality Bureau do their duty to their constituents by rejecting permits for Project Jupiter. Our beloved desert home is already suffering from extraction of water and contamination from oil and gas. This project promises to dramatically increase the extraction and pollution of this land. This land is not a "sacrifice zone." It is precious, sacred land, home to plants, animals, and people. It is hard to imagine the degree of self-centered cruelty that could allow elected officials, who's duty it is to represent the interests of their constituents, to whore out their own land and the future of their own people, their own children, for something as completely unnecessary and universally opposed as a data center, all to make a profit. Give community members an additional 60 days to comment on the air quality permit. Given Bloom Energy's well-documented history of illegal dumping of hazardous waste, it is abundantly clear this permit should be denied. A bilingual public hearing must be held, in English and Spanish, in Santa Teresa, with an option to participate virtually, so that the people who will actually face the consequences of such a disastrous project can speak and be heard. If members of NMED have any principles at all, or any interest in the future of humanity, say NO to Project Jupiter. If you don't care about this land, leave. But don't ensure it's destruction for those who love it.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Uma	Chang	This data center will harm the earth and its people. It will cause generations of lung cancer and other diseases from its pollutions. It is a parasite and blight that must be stopped. For the sake of the earth and the people, its stewards, please listen to the people and stop this horrendous project before it's too late. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Christina	Scott	I am opposed to Project Jupiter due to the fact that it proposes a danger to human and environmental health. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air. Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses and developers did not propose pollution controls.Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil. Health risks from exposure to the pollutants can case things such as childhood asthma and brain damage, headaches, dizziness, memory loss, nausea, and permanent damage to organs. Quality of life for residents in Dona Ana will decrease and overall health of the community will be jeopardized. New Mexico Environment Department's mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. A public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	Project Jupiter is detrimental to the environment. New Mexico already has limited water. The Rio Grande River is actively drying up and will be even more so at risk due to Project Jupiter. The people of New Mexico need water to survive and the communities depend on it. Project Jupiter has many negative effects on the climate. Project Jupiter will cause large amounts of air pollution, dry up the surrounding sources of water and will generate a large amount of hazardous waste and release greenhouse gas emissions greater than the largest 3 cities in New Mexico combined. Project Jupiter is overall detrimental to the communities of New Mexico. If projects like this will continue eventually everyone will suffer. Everyone. We have never needed AI before, we didn't need data centers of this size before, we don't need them now. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. New Mexico Environment Department should provide the public with an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Deny the air quality permit application, given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Laura	M	I live in New Mexico and oppose Project Jupiter. This AI project will not hesitate to use, pollute, and and destroy our limited resources for private profit with no lasting benefit to those of us who live here. Our resources are not replaceable. Your mission is to "protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Not enrich private corporations at our expense. They know they're not wanted, you know they're not wanted. All permits should be denied.	Merged Document	1	No	[redacted]			Yes					8/17/2026
Anonymous	Anonymous	I am a resident of Albuquerque New Mexico and I am asking that you deny yucca growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue living and growing amongst my niece my nephews and my kids to come, I want them to know they have a safe and healthy future We deserve clean air, clean water. That future is under threat with this proposed air quality permit. My families future should be worth much more than the profit and success of an AI dater center who uplifts out of state cooperations. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Kristen	Anonymous	The proposed data centers are going to KILL US. The public does not want any more data centers in our state. It's your job as elected officials to listen to us. DO YOUR JOB. Do not sell out to these companies who are searching for control. There is a civic and ethical duty to protect the future of this state and of this earth. UNACCEPTABLE to let this environment destruction occur. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Michelle	Montoya	My husband & I are both educators. Our plan is to retire in Don Ana County but the air quality and access to clean water is a priority. Las Cruces is absolutely beautiful in every possible way, especially the people who live there. Please do not prioritize corporations over the health & safety of humans. The billionaires do not need more money but people who live in NM need clean air and clean water. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Alexandra	Henry	The construction of Project Jupiter will have negative ramifications beyond Doña Ana county. The air quality issues will effect residents like my family in Sierra County. The water consumption will disrupt the livelihood of tens of thousands of New Mexicans who already live in a drought-plagues state. The 'job generation' will not create jobs for locals but for higher skilled workers from out of state. The stress on the power grid will have economic consequences on an already 49th poorest state in the US. Please consider the direct effects that the construction of this AI data center will have on a state that already struggles to take care of its own. No more exploitation of our natural resources and peoples! Your new plant proposal still uses the same amount of energy. And will need new gas pipelines built. This is all destructive to surrounding areas and communities. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Julie	Morales	I object to this data center coming to the southwest, a desert that is already scarce on water! No matter if they claim to be climate friendly with closed loop. We have zero water to spare as our Grand river has dried up, our lakes are extremely low, our communities are running out of water! Not to mention the heat and pollution and all the bad to the land, ecosystem, and planet! Do not bring you data center to NM now or ever !!! This is our land, the people's, the inhabitants of this beautiful planet! Stop trying to destroy it! From a native of the southwest! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
John	Thomson	Please STOP project Jupiter. Do not let this monstrosity darken our doorstep. Do the right thing, and deny their permit, and any others they put forward. Do not take their bribes. Our children's futures depend on the decisions you make today. Thank you. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Xander	Anonymous	I am a New Mexican born and raised, I love our state with every fiber of my being. That is why I'm so heart broken about project Jupiter's construction in our state, despite what they say about new job growth and benefits for our community, the facts of this project show negative affects that significant out way any benefits. The projected environmental hazards will have lasting effects on every aspect of life in our state. Our air quality is already below national standards, can we really sacrifice to add to that pollution! So please help keep this land enchanted, and keep data centers out of it! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Sincerely, a concerned citizen.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Erik	De La O	This project is going to do nothing but bring death to the state of New Mexico. Do you want that? The majority of Us don't! Project Jupiter is a death sentence and I'm not f****** signing it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Hannah	Lyles	I reject the air permit for the data center (Project Jupiter). We don't need a data center. Most New Mexicans do not want this. Listen to the people. Protect the earth. Do the right thing. Do not prioritize wealth and greed. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.	Merged Document	1	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026

Corrinne	Farner	I strongly oppose the Yucca Growth Infrastructure permit related to Project Jupiter. Environmentally, the project will create more air pollution in an already smoggy area and will deplete already compromised water resources. The Southwest is no place for data centers in an ongoing drought. The project's dependence on Bloom Energy bodes poorly for outcomes as Bloom has been found to under deliver on promised production and has been held accountable for unacceptable levels of pollution in previous projects. In regards to the project public relations, it appears that there are issues around ethics that have been breached with consumers' opinions being misrepresented. I do not support giving business to organizations that seem so clearly to be working against the public interest.	1		No	[redacted]										
Anonymous	Flanders	YGI's application should be denied because they failed to provide information about Bloom Energy. Bloom Energy has been cited by the USEPA for illegally dumping its hazardous waste into public landfills. No matter what YGI says, fuel cells will generate harmful air pollutants and hazardous solid waste.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Pat	Swan	I strongly oppose the Yucca Growth Infrastructure permit related to Project Jupiter. Have you heard of "Downwind" - the movie that documented all the aftermath of nuclear bomb testing? What's the difference? Environmentally, the project will create more air pollution and will deplete already compromised water resources. We are in a SERIOUS DROUGHT! The Southwest is no place for data centers. I 100% DO NOT support this and urge you to listen to your constituents, the people who will be stuck with the results of this bad decision	1	Merged Document	No	[redacted]							Yes	Yes		8/17/2026
Catherine	Walsh	Project Jupiter is extremely harmful not just to nm but to the whole world. This data center must not be established. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Alonso	Sanchez	This application states it is a "minor source" (under 250 tons/year of criteria pollutants), but it ignores the massive emergency diesel backup generators, cooling infrastructure, and secondary emissions inherent to a multi-gigawatt data center facility. NMED should reject the application until a comprehensive, combined Environmental Impact Report is submitted for the entirety of the facility as a whole. The El Paso-Las Cruces-Sunland Park borderplex area already suffers from severe air quality challenges, and routinely fails to meet federal standards for ground-level ozone and particulate matter. NMED cannot safely issue a new permit without a rigorouslocalized cumulative air modeling study. I Demand that the applicant explicitly disclose the exact chemical composition of all routine and non-routine emissions, including HAPs. Granting a permit for a massive, dedicated fossil-fuel project locks the state into decades of high emissions, completely violating the intent of New Mexico's clean energy transitions. Due to the unprecedented scale of this project, the critical nature of the local air basin, and recent public controversies surrounding community outreach, I formally request that NMED deny a quick administrative approval and instead mandate a formal, contested public hearing held locally	1	Merged Document	No	[redacted]				Yes				Yes	Yes	8/17/2026
Macie	Pages	Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are Hispanic. There are also daycare centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs.	1	Merged Document	No	[redacted]				Yes	Yes	Yes			Yes	8/17/2026
Hannah	Le	Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are Hispanic. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs.	1	Merged Document	No	[redacted]					Yes					8/17/2026
Andrew	Trujillo	This should be soundly rejected, New Mexico does not have the water for such a project.	1	Merged Document	No	[redacted]					Yes					8/17/2026
Penni	Sears	I strongly oppose the issuance of an air quality permit to Yucca Growth Infrastructure, which is directly tied to the Project Jupiter data center. This data center will affect far more than its immediate location. Air pollution does not stop at county or state boundaries. Emissions from this facility will impact residents throughout the Paso del Norte region, including the communities of Doña Ana County, Las Cruces, El Paso, Texas, and Ciudad Juárez, Chihuahua. The New Mexico Environment Department should carefully evaluate cumulative air quality impacts regionally, not just the impacts immediately surrounding the facility. Adding 25 billion tons of greenhouse gases annually to the region's active and long-time non-attainment zone should not be approved through their permit application. This level of gases is equivalent to the amounts generated by Albuquerque and Las Cruces combined; it will be like a new city has sprung up in southern New Mexico. The Las Cruces/El Paso metro area currently ranks 16th worst in the nation for ozone pollution according to the American Lung Association's 2026 State of the Air report. It is unimaginable to approve a new source of carbon dioxide annually to our communities that equates to the annual outputs of two of New Mexico's largest cities. In addition, I am very concerned about southern New Mexico's precious and dwindling water resources. This region is experiencing chronic water scarcity and prolonged drought. Our region is running out of water. Project Jupiter's estimates of water needed for the closed-loop portion of its campus range from 20,000- 60,000 gallons per day following a one-time fill of ~960,000 gallons. In addition, the Project's two gas-fired microgrids will require nearly 1 million gallons of water per day. Decisions about projects of this scale should reflect long-term sustainability of the region's limited water supply. Southern New Mexico does not have water to spare. We need to protect our resources for our ranchers, farmers, and recreationists. On the issue of water conservation alone, a data center of this scale in southern New Mexico is impractical due to its enormous water consumption. This project will consume the region's scarce water resources while increasing profits of millionaires and billionaires; people who do not live in or contribute to the community. The air quality permit application should be denied on its face, given the project's fuel cell provider's (Bloom Energy) known history of multiple Environmental Protection Agency-enforced actions for hazardous waste violations. Bloom Energy is classified by the EPA as a Large Quantity Generator of hazardous waste. A simple internet search found Bloom Energy was, "contracted to operate the proposed Deep Green data centers with 16 MW of fuel cells, received more than $580 million in public subsidies in Delaware, was fined $1.37 million by the EPA for hazardous waste violations, delivered fewer than 800 of 1,500 promised jobs, and had 18 MW of fuel cells decommissioned after roughly seven years against a 15-to-21-year expected lifespan."	2	Merged Document	No	[redacted]			Yes							8/17/2026
Ben	Foerstner	I strongly oppose the issuance of an air quality permit to Yucca Growth Infrastructure, which is directly tied to the Project Jupiter data center. Kari	Simmons Vickerman	I am submitting this comment because I am deeply concerned about the proposed Project Jupiter and its potential impacts on New Mexico's limited water resources. New Mexico is an arid state facing ongoing drought, increasing temperatures, and long-term water insecurity. Water is not simply another resource here, it is essential to the health of our communities, our agriculture, our wildlife, our rivers, and future generations. Any project that requires significant water consumption should be evaluated with extraordinary care. I question whether it is responsible to approve a water-intensive industrial project in a region already struggling with scarce water supplies. Facilities with such high water demands should instead be located in areas where water is abundant and where the environmental burden is substantially lower. I respectfully ask the New Mexico Environment Department to fully consider the cumulative impacts this project could have on groundwater, surrounding communities, ecosystems, and long-term water sustainability. Short-term economic benefits should not outweigh the permanent value of protecting New Mexico's most precious natural resource. Please place the long-term health of our state, our environment, and our residents first by requiring the strongest possible environmental review and by denying any permits that would jeopardize our already limited water supply. Thank you for considering my comments.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes		8/17/2026
Dana	Roth	I request that you reject the Yucca Growth Infrastructure's (YGIs) air quality permit application to construct a methane-fueled power plant near Santa Teresa, NM in southern Doña Ana County. I also request that you hold both a public meeting and a formal evidentiary hearing on the application. The bottom line is that pollution from this power plant has the very real potential to harm people and the environment. YGI's pollution will add to the already unhealthy levels of both ozone and nitrogen oxides that New Mexicans are being exposed to in this area, two toxic chemicals that cause harm to our lungs, hearts, and brains, among many other health issues. This damage to air quality will also harm the surrounding ecosystem and ultimately add to the global climate crisis. YGI's power plant will be the single largest source of greenhouse gas emissions in the state of New Mexico, emitting more carbon pollution (10.1 million tons per year!) than New Mexico's three largest cities – Albuquerque, Santa Fe and Las Cruces – combined. As proposed, YGI's microgrid is disaster for our environment, and climate. The power plant would threaten the health and imperil the environment of people in New Mexico, Texas, and Mexico. New Mexico is already the fastest heating state in the continental United States. The application violates state and federal air quality laws, and NMED must reject it.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Andrew	Cordova-Andrews	The new technology suggested here will not change the facts of the environmental impact of the data center. At this time our AI needs are met and are not growing, and the outlook for existing companies such as OpenAI who sponsors this project are grim at best - running out of capital by 2027. This project will not help our communities in any way. At a time when water is scarce here. I do not support giving away my children's future in our state.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	De Guzman	"Provides jobs for thousands of individuals." But destroys the planet where millions live. Are you blind? Dumb? Obtuse? Do you not see the consequences that this project entails for our Earth? What is the point of creating projects like these, providing jobs for people if there will be no one left to take them? Prolonging the life of our Earth is the real road to success because we are able to further live, create, and build opportunities for one another. What this project is doing is killing off the seed for that growth. It is already dead before it can even start its journey. How shameful. This project will not only affect New Mexico but the world	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Kenia	Solis Villagran	In my personal opinion what is so important about this data center? For one it can't give us any improvement in the surrounding areas with there only waste and dirty our water that is already feeling limited. This plan does not need to take affect and should not be taken lightly in any way because while it might not affect now does not mean it doesn't mean in the future.	2	Merged Document	Yes	[redacted]	No	Oppose - Non-Substantive								8/17/2026
Jean	Berlowitz	I do not support Project Jupiter. I have deep concerns about water usage, extreme noise, and air pollution. I have no confidence in the claims by the project's backers. I respectfully request that you do everything in your power to block this project.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive	Yes							8/17/2026
Angel	Garcia	My name is Angel Garcia. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a Native American, 21 year old that just wants our world to be living. Mother nature is crucial for our survival. If Project Jupiter happens, our water will be cut significantly, not the mention our climate change. Everyone can deny climate change BUT you can obviously see the signs of our world dying. It's horrendous what we're doing to our world. Please, Please think about what this will do for our future generations and ourselves. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel	1	Merged Document	Yes	[redacted]			Yes		Yes		Yes			8/17/2026
Elizabeth	Hernandez	My name is Elizabeth Hernandez. I am a New Mexico resident, living in Las Vegas, New Mexico, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely,	1	Merged Document	Yes	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026
Keri	Stockman	The Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application should NOT be approved. New Mexico, especially southern New Mexico, is already experiencing severe drought. This data center will be a net negative for our state. These data centers consistently under deliver on employment opportunities while negatively impacting nature. They pollute the environment. The only real benefit is making rich people richer. Let them build them in their own yards instead of taking advantage of our state	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Walker	Laughlin	I urge NMED to REJECT Yucca Growth Infrastructure's LLC-YGI Microgrid Air Quality Construction Permit Application. Despite this revised permit application the Project Jupiter Data Center will still emit more carbon dioxide annually than Albuquerque, Las Cruces, and Santa Fe combined. It will also spew 124 tons per year of VOCs, dangerous pollutants that threaten the health of vulnerable communities. Allowing this air permit application to move forward would mean jeopardizing public health and reversing decades of progress towards the state's emissions reduction goals. The project developers promise local economic development, but they do not deserve our trust. Source NM reports that the project developers have been collecting the names and emails of New Mexico residents, many of whom oppose this air permit application, and using their information to post comments in support of it -- against the will of these residents. This deceptive behavior challenges the credibility of Yucca Growth Infrastructure and casts doubt on the claims in this air permit application. NMED is entrusted by New Mexicans to protect public health and the natural beauty of the state by preventing the deterioration of air quality. NMED must stay true to its mission and reject Yucca Growth Infrastructure's LLC-YGI Microgrid Air Quality Construction Permit Application.	8	Merged Document	Yes	[redacted]			Yes	Yes	Yes					8/17/2026
Michelle	Verranault	I respectfully request that the New Mexico Environment Department deny, or at minimum defer approval of, the Yucca Growth Infrastructure, LLC (YGI) Microgrid Air Quality Construction Permit until the applicant has fully demonstrated compliance with all applicable air quality and environmental requirements. The administrative record should clearly establish that the project will comply with all state and federal air quality standards, including a thorough analysis of emissions from all proposed equipment, cumulative impacts with existing industrial sources in the Santa Teresa area and the effectiveness of proposed emission controls. Because the region already experiences significant air quality challenges, the Department should ensure that any assumptions used in emissions estimates and air dispersion modeling are fully supported, transparent and subject to public review. In addition, the Department should carefully evaluate whether the project's environmental impacts have been adequately considered, including the availability of water resources needed to support construction and operation in an area where groundwater supplies are limited. If the project relies on technology that has not been widely proven at this scale, the applicant should provide evidence from actual operating projects, not just projections, that its emission estimates and pollution controls will perform as claimed. If there is still uncertainty about emissions or how the project will actually perform, the Department should require additional analysis before making a final decision. The applicant should be required to show, with credible supporting evidence, that the project can meet New Mexico's air quality standards in addition to show there will be no impact on the limited groundwater supply before any permit is issued. If the applicant is unable to make these demonstrations, the Department should deny the permit to fulfill its RESPONSIBILITY TO PROTECT New Mexico's residents, natural resources, and air quality from risks that have not been adequately evaluated.	1	Merged Document	No	[redacted]				Yes	Yes	Yes				8/17/2026
Maria	Velasquez	The health risks and long term impact from the potential toxic pollution derived from the power plant should be reasons enough to deny this permit.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
				Merged Document							Yes					8/17/2026

Dustin	Flannery-McCoy	I am New Mexico resident who was born and raised here in the state, and am now raising my own family here- and we are STRONGLY AGAINST this so called "project Jupiter" in every way, shape , and form. A data center whose emissions will be more than all the cities in the state combined!! And using more energy as well! And how about the water use? Millions of gallons of water needed every day!! And building and natural gas pipeline through our beautiful landscape!! This is a project that will do incredible harm to New Mexico, to the benefit and greed of tech giants like Oracle, who are so slimy that they name their projects "green chile pipeline" and "yucca growth infrastructure" to try and give the appearance of being home grown, when in reality they are just trying to hoodwink people. We must fight against this kind of hostile takeover from the greedy and corrupt forces that are behind this project. Together we can keep projects as destructive as these out of NM. Thank you, Dustin Flannery-McCoy	1		No													
Matthew	Tims	I strongly disapprove of what project Jupiter is trying to do. The energy source they are trying to use is gonna wreck toxic on the environment and cause more green house gasses than both tax cruzes and Albuquerque combined. I urge that project Jupiter and whom or whatever it is associated with to re-shut down and not allowed to continue in this state. Project Jupiter is a net negative for the state and community and I disapprove strongly of it.	Mirrored Document	1		No					Yes	Yes					8/27/2026
Luke	Anonymous	Dear NMED staff, My name is Luke. I am a New Mexico resident, living in Santa Fe, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 159 Microgrid in Doña Ana Ana County. I worry for our Earth's future as we have limited time to act and prevent global warming and climate change. There is only one Earth. These data centres are a waste of space and interfere with people's lives and animals and ecosystems. They should not be built. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge this NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 159 Microgrid. I ask the departments please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Luke	Mirrored Document	1		No				No	Ozzone - Non-Substantive			Yes				8/27/2026
JEREMY	MONTOYA	Subject: Urgent Request to Deny Project Jupiter Air Quality Permit To the New Mexico Environment Department (NMED), I am writing to strongly oppose the air quality permit application for Project Jupiter, a proposed 16 billion-dollar AI data center in Santa Teresa, New Mexico. As a resident of [Your City/County, NM], I and my neighbors are deeply concerned about the environmental and health impacts this project will have on our community, our desert ecosystem, and future generations. Project Jupiter's new proposal relies on fuel cell technology, which developers claim is cleaner. However, this technology is unproven at the scale being proposed, and its operation will generate hazardous waste. More critically, the project's greenhouse gas emissions are projected to exceed those of Albuquerque, Santa Fe, and Las Cruces combined—all putting our region further out of compliance with national air quality standards. Southern New Mexico is already facing severe drought conditions, and this project would demand up to 1 million gallons of water daily, draining resources from local communities, agriculture, and wildlife. We cannot afford to trade our air, water, and desert for corporate profits. I urge NMED to reject this permit application and instead prioritize sustainable, community-driven solutions that protect our environment and health. Additionally, I demand a bilingual public hearing in Santa Teresa to allow all residents to voice their concerns. Sincerely, Jeremy Montoya Po box 235 Cuba NM 87013 Jtm8828@gmail.com 505-967-9328	Mirrored Document	1		No					Yes	Yes	Yes		Yes		8/27/2026
Roberto	Luera	I am writing to express my strong support for Project Jupiter as a proud member of Carpenters Local 1319, living here in Albuquerque. Through bringing advanced construction techniques to our backyard, Project Jupiter will serve as a vital training ground. Our apprentices will gain hands-on experience with innovative technology that is revolutionizing our industry, ensuring Albuquerque's workforce is fully prepared for the advanced building demands of tomorrow. Project Jupiter represents an investment in the long-term skills development and competitiveness of New Mexico's working families. I urge NMED to approve the air quality permit and support this project so we can train, build, and secure a stronger future for New Mexico. Crystal	Boylan	The thought of having a data center inside of New Mexico is gut wrenching. We are the Land of Enchantment. We are beautiful, breath taking, awe inspiring, a full on spiritual experience. But we are also fragile. Our water and air are precious and necessary for the communities that live and work here and for the animals that can only call our beautiful state home. The promises of money and jobs are fleeting. They will dry up with the water, burn away with the clean air, and we will be left desolate. The powers at be will move on leaving a husk of an ugly building, broken promises, and a shattered ecosystem. Their bodies are temporary, New Mexico is forever. The thought of destroying this sanctuary is heart crushing. We are stewards of the Water, Air, Soil, Peace and Wellness, and People. This data center and any data center is poor stewardship. A wrecking ball to all we hold dear.	Mirrored Document	1		No					Yes						8/27/2026
Jennifer	Heymann	Waterjoint (Christopher Inc.) submits the attached comment addressing the cooling water demand profile of the proposed Bloom Energy fuel cell (SOFC) technology compared to conventional thermoelectric generation.	Mirrored Document	?		Yes					Yes	Yes					8/27/2026
Trenton	Dobbs	We simply do not have the resources to support a data center in the Southwest. Our reservoirs are dropping at an alarming rate, temperatures are rising to new records every year. A.I. will not save us. Politicians that support it will be voted out.	Mirrored Document	1		No					Yes		Yes				8/27/2026
Bonnie	Torres	I strongly oppose project Jupiter. Our environment is already struggling and wildlife in danger, we don't need a giant water guzzling center in the middle of a severe drought. Our rivers are already dried up let's not make this issue worse.	Mirrored Document	1		No				No	Ozzone - Non-Substantive						8/27/2026
Sonya	Beal	I am glad for the jobs Project Jupiter, which will benefit our community, 1,000 project-supported jobs! That is great! Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water systems; $380 million in direct support for schools, infrastructure, and local services; and $6 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. Sincerely, [redacted]	Mirrored Document	1		No					Yes		Yes				8/27/2026
Margaret	DeMond	The data center proposed for Doña Ana County will be harmful to the environment and community well-being. New Mexico is in a historic drought. Using water to cool an ever-sized data center will only worsen New Mexico's water availability. Data centers of this size have also been shown to increase the cost of electricity for community members, a thing most New Mexicans cannot afford. Also, it has not been shown that this data center will in anyway benefit New Mexico in the LONG TERM. Yes, temporary construction jobs will flood the state, but data centers require few, if any, long term personnel to run. Such projects	Mirrored Document	1		No					Yes		Yes				8/27/2026
Tessa	Chavez	New Mexico Environment Department, As a lifelong resident of Doña Ana County, I am writing to formally request that NMED deny the air quality construction permit application submitted by Yucca Growth Infrastructure, LLC for the 159 Microgrid, also known as Project Jupiter. I strongly oppose this project due to its SEVERE air quality risks, SEVERE risk to our vital resources like electricity and clean water, and for the total lack of transparency we've been given on the truth behind this project. Our community deserves absolute transparency, independent environmental impact studies, and strict oversight, not a fast, a rushed permit process for a project that fails to prioritize the local communities that will ACTUALLY be affected by this decision. I urge NMED to do your job and protect our beautiful lands and our communities by rejecting this permit and putting an end to Project Jupiter. Thank you for your time and consideration. Sincerely, Tessa Chavez	Mirrored Document	1		No					Yes		Yes				8/27/2026
Katalina	Hadfield	I have asthma. One of the reasons I live in this region is because the air is clear enough for me to breathe well. Approving these permits would DRASTICALLY increase emissions and DRASTICALLY affect my asthma. I was born and raised here, and after living elsewhere for 10 years, I finally decided to come back. I don't want to have to leave again and leave my community behind :(	Mirrored Document	1		No					Yes		Yes				8/27/2026

Ian	Sullivan	All this data center will do is kill. Recognize the correlation between unregulated infrastructure and poor air quality. Is the next generation's future really worth sacrificing to data centers? Do not approve the air quality permit for Project Jupiter.	Mirrored Document	1		No					Yes						8/27/2026
Shiyah	Serna	Dear NMED staff, My name is Shiyah Serna, I am a New Mexico resident, living in Rio Rancho, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 159 Microgrid in Doña Ana Ana County. I am born and raised Albuquerque. I grew up in the mountains, by the Rio Grande walking through the Bosque. All of these are such essential nature parts of our beautiful city. Let alone our state. If you bring in a data center, it will take all of our water and resources. Our nature will die, our animals will leave, our beautiful state will die. We do not need an AI data center. They are a waste of resources. They will destroy our beautiful state by bleeding it dry. fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge this NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 159 Microgrid. I ask the departments please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Shiyah Serna.	Mirrored Document	1		No					Yes	Yes	Yes		Yes		8/27/2026

Mary	Moreck	I live in Santa Teresa and under NO circumstances do I want experimental technology deployed at an unprecedented scale in my backyard. I urge the NMED to deny the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration. YGI must not be allowed to greenwash a fossil-fueled plant that erases New Mexico's climate progress. NMED must reject this permit, or at the very least schedule a formal public hearing to investigate these severe community impacts	1	No	Merged Document	[redacted]				Yes	Yes				Yes	8/17/2026
Geneva	Poteet	I am vehemently opposed to project jupiter, as are most of the people I personally have communicated with about this. We live in a desert where many people are already struggling to access potable water, this project proposes HUNDREDS OF THOUSANDS of water gallons being used A DAY. Water should be for the people and the environment, not greedy corporate data centers who are using their technology to oppress us further. Furthermore, this entire campaign has been RIDDLED with illegalities including lack of transparency to the public, astro-turfing, incomplete procedural paperwork, indications of fraud and forgery because comments are being submitted en masse in support of this project using people's names who expressed that they are not in favor of this project. This deserves a proper investigation, not special treatment to cram it through despite the objections of the people that live here. The people and environment in New Mexico DESERVES to be protected from corporate interests who aren't interested at all in benefiting the community. What the hell does money and jobs do if we can't drink water?? If our soil is too polluted to give us clean food, if the air becomes unbreathable, if the UV threshold becomes so unbearable from pollution that we cannot go outside anymore?!?	1	No	Merged Document	[redacted]			Yes		Yes				Yes	8/17/2026
Olivia	Gordon	Dear NMED staff, My name is Olivia Gordon, I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am currently a student at the University of New Mexico studying environmental sciences. This project is especially important to me, as a born and raised New Mexican, I will not stand to see our enchanted lands be destroyed and extracted for resources that will have irreversible consequences in result of the health of our planet and surrounding communities. We do not need to house the 'largest AI data center in the world'. We do not need these data centers at all. The community does not want nor need these types of land exploitation. Our land is more scared to us than anything any billionaire could own. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Olivia Gordon	1	No	Merged Document	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Edward	Schmitt	I am opposed to Project Jupiter because of the negative impact it will cause to the environment, the noise and air pollution that it will cause, the use of water that is needed by this desert community and the threat of rising utility rates.	1	No	Merged Document	[redacted]			Yes		Yes		Yes			8/17/2026
Sylvie	Stiffler	Essentially: "1) Produce 10,144,115 metric tons of CO2 annually; 2) Emit federal hazardous air pollutants (benzene, methanol, and xylene) at a rate of 0.325 lbs/hr; 3) Have no emissions control, add-on controls for regulated pollutants, continuous emissions monitoring equipment, or parametric emissions measurement equipment; 4) And run 24hrs/day, 365 days/year while located a. 3.6 miles from Santa Teresa b. And 1,500 meters - less than one mile - from the nearest school."	5	Yes	Merged Document	[redacted]	Yes			Yes						8/17/2026
Donna	Sinn	No more infrastructure appropriations or approvals for any data center main or support infrastructure. New Mexicans voices have not been heard or sought related to any data center projects that impact the quality and quantity of water, air pollution, noise pollution, temperature elevation due to extreme heat outputs from data centers. The people of New Mexico's voices must be heard. The Governor and various County Commissioners should have known better but never sought input from the public. Likely because they knew the public would not approve if the public was aware of the true impacts of data centers.	1	No	Merged Document	[redacted]			Yes		Yes		Yes			8/17/2026
Heloise	Adema	To allow Project Jupiter is a mockery of every single environmental goal the New Mexico state government claims to uphold. Not only will this create more greenhouse gasses as many ai data centers use "temporary" diesel generators to skirt laws requiring them to hold a certain standard of air purity and maintenance of said generators, new Mexico is in a habitat loss crisis driven by the overuse of our water. With our monsoons diminished and our rivers running dry, is it really a good idea to invite such a water dependent facility into our state? Not only will this data center cause irepairable damage to the unique wilderness in the south of our state, which is home to many insects found nowhere else in the world, nearby communities will be affected as well. Data centers like this one around the country have been proven to cause many issues, ranging from pollution, decreased air quality from construction dust, constant noise from the servers themselves, and co-opting resources like water and power meant for people, not computers. Project Jupiter is not for the people but for billionaire tech companies and if construction continues it would show the New Mexican people where the priorities of our elected officials lie and I for one will not vote for any politician who allows this to continue.	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes			8/17/2026
Katalina	Sanchez	I do not want project Jupiter in New Mexico. We already have little water we can't afford to use any on data centers.	1	No	Merged Document	[redacted]			Yes							8/17/2026
Rachel	Hilley	I am writing to oppose project Jupiter. Over and over again similar datacenter projects in this country have been exposed causing even more pollution and using even more water than their proposals, while providing fewer jobs. Resident energy and water bills skyrocket, with no benefit to anybody but the billionaire owners of these companies. Project jupiter has already moved the goalposts multiple times, and the companies involved have already been caught doing illegal dumping of toxic compounds in municipal landfills in other projects. With such a clear and repeated pattern of deception and exploitation it is clear that this is their business model, and it will be repeated in our state as well.	1	No	Merged Document	[redacted]			Yes		Yes			Yes		8/17/2026
Sophie	Starler	Sophie Starler The development of AI centers in my hometown is a terrifying thought, the Rio Grande flora and fauna already suffer and the drought will affect all New Mexican residents as well. Using public land to support the extreme-wealthy will only harm our economy, as well as the unique ecosystems that thrived in the areas that are now being flattened and buried under concrete. The happiness and future prosperity of both New Mexican residents as well as our land depends on maintaining our public land, and limiting water consumption from megacorps, so that our	3	Yes	Merged Document	[redacted]			Yes							8/17/2026
Bryce	Sowards	Project Jupiter needs to be scaled down or paused indefinitely. New Mexico has limited water availability as it is and adding a facility that relies on that will make it harder for us to continue living here	1	No	Merged Document	[redacted]			Yes							8/17/2026
Madison	Caster	Look at how bad the area around the centers are. People don't have enough water and it's not even clean. The pollution in the air is making it hard for people to breathe. No good person wants this	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
Robert	Nordmann	I am writing in opposition to granting the air quality permit for the proposed YGI Microgrid power generation plant. The proposed fuel cell generation system is untested at the enormous scale of this project and so the projection of impact is uncertain. However, even if the the proposed system operates at improved efficiency over conventional gas turbine systems, the overall magnitude of the project (output equal to EPE's current total output capacity) will most certainly cause an unacceptable increase of pollution in our air. Our air in Dona Ana county is already subjected to a variety of pollutants and we cannot afford to make it far worse. Thank you.	1	No	Merged Document	[redacted]				Yes	Yes		Yes			8/17/2026
New Mexico Environmental	Law Center	Please accept the attaached additional comment, demand for public hearing and demand for permit application denial, submitted by the New Mexico Environmental Law Center on behalf of Jose Saldaña Jr. and Vivian Fuller (hereinafter, "Community Members"), regarding Yucca Growth Infrastructure, LLC's ("YGI") Initial NSR Application for the YGI Microgrid ("Application"). Ultimately, YGI's Application simply contains too many unknowns and provides far more questions than answers that this Department must address prior to issuing any air pollution permit at the expense of Southern New Mexico residents. In addition to the concerns and issues raised in Community Members' comment submitted on May 20, 2026,1 Community Members urge the New Mexico Environment Department to deny YGI's Application because YGI's Application is based on incomplete data and flawed assumptions; because issuing an air pollution permit will violate provisions of the New Mexico Air Quality Control Act ("AQCA"), NMSA 1978 § 74-2-1 et seq., and the federal Clean Air Act, 42 U.S.C. 7401 et seq.; and because permitting the YGI facility will result in the Department's perpetuation of environmental racism against residents of Sunland Park and Santa Teresa, New Mexico.	103	Yes	Merged Document	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Tia	Brim		1	No	Merged Document	[redacted]	No	Blank								8/17/2026
Janet	Nordmann	I do not support the passage of the Air Quality permit. Why? It is my belief that this company has failed miserably to advise the public of the impact to their health that this system will cause if the permit is approved by NMED. Has the company done its due diligence by supplying facts that either prove or disprove "our" health concerns? Can NMED answer this question? It appears to me that the well-being of people, the well-being of the environment (air we breathe and water we use) are at the bottom of the list of concerns. Jobs, however, have been the primary focus of elected officials and of the companies affiliated with this data center project. Jobs for New Mexico residents would be welcome but not over the well-being of the people and the environment of all of Dona Ana County and beyond. After all, the very people who may gain employment may be some of those whose health ends up negatively impacted. Janet Nordmann	1	No	Merged Document	[redacted]			Yes	Yes	Yes					8/17/2026
Richard	Wright	I am submitting this comment to share my strong opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Approval of this construction is an affront to the community of Santa Teresa and sets the precedent that all New Mexicans are to bear the financial, environmental, and health burdens associated with the development and operations of data centers. The number of jobs this may create, or short-term financial benefit it may offer won't matter if there is no water for agriculture or neighboring communities and the air is polluted, exacerbating health problems such as asthma and COPD in a region already designated as a provider shortage area. If this is not enough, please deny this application for the following additional reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	1	No	Merged Document	[redacted]			Yes	Yes	Yes		Yes		Yes	8/17/2026
Dominic	Oddo	I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. Heyab	Tekle	My name is Heyab Tekle, a data science student who has called Albuquerque home for decades. I cannot more strongly oppose the Yucca Growth Infrastructure permit request. This technology is unproven, unsafe, and serves no purpose aside from the exploitation of New Mexico's already fragile environment. The proposed plan of YGI, alongside companies including Oracle and OpenAI, would emit more air pollution than the sum total of the hundreds of thousands of people and dozens of businesses in Albuquerque *and* Las Cruces. No proper provisions have been taken to ensure that this will even provide jobs to New Mexico, which is the only argument the backers of this project have even attempted to make to convince us that this will be in any way good for New Mexico. The Rio Grande, a focal point of New Mexico's scarce water, is all but dry, and YGI intends to take even more of this precious resource from us. It is absolutely essential to note that the technology is entirely untested, and we ought not allow ourselves to be exploited at the hands of people who do not have New Mexico's best interests at heart. There is no good reason to accept their proposal, and the people of Doña Ana County and all of New Mexico will suffer immensely if the county and state accept this.	1	No	Merged Document	[redacted]			Yes		Yes					8/17/2026
Spencer	Taylor	Spencer Taylor LMSW, MFA, BA DENY THIS PERMIT. Deny Yucca Growth and by extension Project Jupiter this permit, or any other permits or permissions to continue any of its work. Reasons: 1. It will nearly double the harmful emissions for the state of New Mexico. This will make things uninhabitable in only a handful of years. a. The data center will be its own destruction. The data itself will not be able to function because of this. Temperatures will rise at such accelerated rates due to these emissions that the data center will not be able to function, and nobody will be able to live in NM to operate it. b. All of the credible research and scientists have made it abundantly clear for decades that if we do not reverse our increasing emissions the planet will not be habitable sooner rather than later. We are already at the 1.5 degrees Celsius above pre-industrial average temperature threshold for the survival of humanity. Doubling the emissions for an entire state will not only be the end of a habitable state, it is a death sentence for humanity. c. With temperatures increasing at the rates these emissions will cause, places like New Mexico will be among the first to become uninhabitable. Basic technology like air conditioning units, for example, will not be able to function at the temperatures we will reach. People will not be able to safely go outside. Our cities will be ghost-towns long before that as people move away due to extreme discomfort. There will be nobody left here to drive any economy. d. The cities and towns of New Mexico are already consistently among the worst in the nation for air quality, and do not meet standards. Yucca and Project Jupiter will ruin that forever with these emissions. People will suffer from respiratory diseases, cancer among them. This will also lead to people moving away from the state for their own safety. e. One of NMs primary industries is agriculture, and that whole industry will no longer be viable with this level of emissions. f. This violates the explicit climate goals set forth by the state government. 2. It will absorb millions of gallons of water, and there is no such thing as a truly closed system for water because dirty water must be replaced. a. New Mexico is a desert. We very have limited water. We already have communities that do not have safe drinking water. We do not want water to be used to cool a data center. We want it for things that help residents live healthy lives. b. Water is set to be a scarcity on the planet in the coming decades. We can't afford to waste it on things that are not directly supporting the lives of people. 3. Data centers are not producing things we want. They are used for harmful purposes. a. The whole argument for Project Jupiter is that it is supposedly and economic booster, but AI is designed to ELIMINATE JOBS. That is its whole purpose. It will eliminate far more jobs than it creates. b. Data centers are also being used to further develop and operate surveillance technology to oppress citizens and empower the rapidly expanding fascist powers in the U.S.	5	Yes	Merged Document	[redacted]			Yes	Yes	Yes				Yes	8/17/2026
Jarod	Buell	I live with severe asthma. A condition that only worsened after I contracted covid. I still attend a pulmonologist and physical therapy for breathing issues three years after contracting it. I don't need to check the air quality index because I feel it when I wake up. I feel it when I go to work or try to just exist in the world. I fear this data center and it's component power plant will chain me to my bedroom air filter. I already struggle so much in the summer months with wildfires and allergies and heat. I strongly oppose Project Jupiter's construction.	1	No	Merged Document	[redacted]				Yes	Yes	Yes				8/17/2026
Susan	Ellenbogen	I urge you to deny YGI's air permit application. YGI's Microgrid will emit at least 124 tons of VOCs per year which will worsen already dangerous levels of ozone, and would violate the New Mexico Air Quality Control Act and the federal Clean Air Act. The Environmental Improvement Board must create a comprehensive framework to regulate greenhouse gas emissions before approving such a massively polluting facility, which would emit more greenhouse gas pollution than NM's largest metro areas combined. In addition to the unhealthy level of air pollution it would cause, and despite being located in drought-stricken, fire-prone Southern NM, YGI has failed to provide a fire hazard plan or analysis for its high-risk facility. Were a fire to occur, it would cause even worse air pollution. If the permit Application is not denied, then I urge NMED to hold a public hearing in Santa Teresa in both English and Spanish.	1	No	Merged Document	[redacted]			Yes	Yes	Yes				Yes	8/17/2026

YVONNE	DENZLER	Reject Permit #10883 to construct the YGI Microgrid, submitted by Yucca Growth Infrastructure, LLC. The Lower Rio Grande Valley air quality will be greatly impacted by this facility. The YGI Microgrid is expected to spew carbon emissions equal to those emitted by Las Cruces, Albuquerque,and Santa Fe combined. Our lives depend on your actions to protect the air quality in southern New Mexico.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026	
Dolores	Hendricks	It is apparent that proponents of Project Jupiter have and are submitting fraudulent positive statements and are illegally using the names of citizens without their permission. This alone should stop any ongoing construction until a full and unbiased investigation is conducted. This project has been rammed down the throats of Dona Ana residents without any real discourses or disclosures on how and what this project will be doing to our water resources and the impact on the community.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026	
Matthew	Ayoub	Dear NMED Air Quality Bureau, I support approval of the air quality construction permit for the Yucca Growth Infrastructure (YGI) Microgrid that will power Project Jupiter in Doña Ana County. Data centers are a cornerstone of the AI and digital economy that is rapidly expanding. New Mexico has a real opportunity right now to position itself as a competitive location for this growth rather than watching other states capture the benefits. Opponents frequently overstate water use. Project Jupiter's design uses closed-loop, non-evaporative cooling systems that require only a one-time fill, with ongoing operational water use comparable to typical office or domestic needs. The Bloom Energy fuel cell technology further minimizes water consumption. The project also includes major developer commitments to regional water infrastructure improvements. New Mexico cannot rely forever on oil and gas revenues, which currently represent a large but volatile and finite share of state funding (often 25–35% or more of general fund revenue). As production eventually declines and the energy transition continues, we need diversified economic drivers that bring stable jobs, tax base growth, and infrastructure investment. New Mexico continues to rank poorly nationally on key economic indicators, including poverty rates and wage levels. This project is expected to generate thousands of construction jobs and more than 1,000 permanent positions, with priorities for local hiring. It can meaningfully help address economic challenges in southern New Mexico and contribute to broader statewide growth. Approving this updated permit for the cleaner fuel cell microgrid design lets us move forward responsibly while seizing a generational opportunity in the industries that will define the coming decades. I urge NMED to approve the permit.	1	Merged Document	No	[redacted]			Yes	Yes			Yes				8/17/2026	
William	Sharer	Attached please find a letter from myself and several of my senate colleagues expressing support for this permit application.	3	Merged Document	Yes	[redacted]	No	Support - Non-Substantive									8/17/2026	State senators supporting
Lorien	House	Yucca Growth Infrastructure's (YGI's) (second) application for an air pollution permit should be DENIED in its entirety. YGI's planned project is anything but "green." The microgrid facility will be, for all intents & purposes, a natural gas power plant. It will emit at least 124 tons of VOCs per year which will exacerbate already dangerous levels of ozone and likely violate ambient air quality standards. Fuel cells, it should be noted, also emit hazardous wastes in unknown quantities, and YGI has not addressed that at all. If built, the grid will emit more greenhouse gases per year than New Mexico's 2 biggest cities combined. The NMED does not have a framework in place to regulate such a massive polluter. Moreover YGI has not provided a fire hazard analysis or plan for this facility. In hot, dry NM, this is unconscionable. Community groups and many individuals are opposed to this land grab and have been from the start. Project Jupiter has been far less than transparent about the real world risks of this center, and YGI is following that playbook. This is a re-submitted application, because so many people were opposed to the first. But they've made nothing better. The application should be denied.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes			8/17/2026	
Alina	Barney	Alina Barney The development of AI Data Centers in the US right now is highly unethical considering the environmental struggles we are already dealing with, especially New Mexico desert where the allocation of our water is already a huge issue, using our local water supply even on the "closed loop" advertised will more than likely negatively affect our community after seeing what has happened in other towns with data centers installed. The development of these centers is not productive or efficient for New Mexico communities and forces our ecosystems to sustain a mega corporations AI developments that already are being used in questionable ways for security and wars.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026	
Geneva	Sandoval	Dear NMED, Environmental Improvement Board. Let me say that one more time... ENVIRONMENTAL. IMPROVEMENT. BOARD. Just as a quick reiteration of your very existence. I am writing to you strongly, vehemently and desperately asking you to deny Yucca Growth Infrastructure's Air Quality Permits. Project Jupiter's estimated emissions are going to be 10 Million TONS of greenhouse gases and air pollution a year. New Mexico's three largest cities (ABQ, SF, LC) COMBINED only emit around 8 Million. Think about that for a second please. Not only would that make a laughingstock of our states progress toward our 2030 goal, it would SET US BACK years. Yes, yes, "jobs," "economic benefits," they say. Please explain to me... WTF is the point of jobs or economic boost if our air is UNBREATHABLE??? I'm just confused why anyone could every justify how this project is a good idea and worth it for the awful deal the developers are giving. In no world can you as the EIB justify approving these permits, no matter how you try. Board, I would also like to emphasize that Data Centers across the country OVERPROMISE, UNDERDELIVER, and LIE about the so called job and economic benefits. Project Jupiter has already changed their job numbers over 6 times and their water usage numbers twice. Please explain to the public why on Earth we are trusting Billion dollar tech corporations who HAVE EVERYTHING TO GAIN by lying to us????? Because that makes all the sense in the world-- you would think as our local governments we would have some pride and dignity. LOOK IT UP. Find the research and the studies. In another area, the data center deliver TWO PERCENT of the "promised jobs." Across the country, the infrastructure and community promises that were made, NEVER HAPPENED or were enforced. By approving these air permits you are essentially taking the money from these corporations and sacrificing our air, land, water and health. Some last points to make are that the plan proposed for the Bloom Energy cells (not to mention Bloom is proven to be scandalous and shady and was a dying company before this life saving deal) has NEVER BEEN DONE AT THIS SCALE. We are guinea pigs. I can GUARANTEE that if this was proposed in YOUR background, next to YOUR children's schools, you would be voting no unanimously. Am I right? P.S. Project Jupiter is out of compliance with their job reports- requirements for the IRB bonds. They have ALREADY BROKEN THEIR CONTRACT ON SEVERAL OCCASIONS. I ask again... WHAT!!???? They are also continuing construction without the LEGAL permits. Just tell us this is already set. Stop the the song and dance clown show. its insulting to your constituents- you have to feel some guilt, some inkling of guilt about how wrong this is. It was found out that the County was not even all on the same page and some Commissioners were completely unaware of what was even going on, even being told different numbers. They basically got completely duped or paid off. The cherry on top, are the FRAUDULENT bot and unauthorized comments that are flooding into this portal by the minute. Some of these names DO NOT EVEN EXIST. I ask again what you will do. Thanks for listening	2	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes					8/17/2026	
Samantha	Colt	Dear NMED staff, My name is Samantha Colt. I live in Farmington and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I share many concerns with others. For one, through my work as a civil servant for the United States government I have seen first hand how drought has affected the southwestern states. It is a fact that these centers use a substantial amount of water at a rate in which it cannot be replaced. Other environmental concerns involve the amount of power used. The proposed "micro" grid has a 2,462 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. Additionally, Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. Additional concerns regarding Project Jupiter include the fact that Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. This contamination is a result of the fuel cells that generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the desulf canisters is exempt from air permitting regulations (because there is less than 1000 lbs/yr). NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. The project's proposed fuel cell powered grid is concerning for many reasons: * It would still produce a high level of greenhouse gas and toxic pollutants. * This technology generates toxic waste, and the process for handling this waste is still unclear. * Fuel cell technology or a centralized waste system has never been tried at this scale.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes		8/17/2026	
Lyn	Hoffmann	As a Dona Ana County Resident, I am completely opposed to building a large data center, such as the Jupiter Project, in our arid and sensitive environment. I agree with others that have concerns about environmantal impacts, such as air quality and water use. The desert ecosystem has a long history of abuse because developers see it as useless barren land. Our deserts need to be protected from the ignorance of the greedy that have pushed this project through quickly with little care for the adverse consequences for nearby residents, humans, plants, and animals that call this area home. I urge you NOT to approve this proposal or any other proposal associated with Project Jupiter. Lyn Hoffmann	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026	
Aeron	McKinnon	Im worried for the long term effects that this company will have on the environment it plans on building on. There is also the fact that this company has changed its name to change face to get away with other damages it has caused as well. We cant drink or eat data.. you cant breathe it either. We need to rebuild our climate more than build over it harmfully.	1	Merged Document	No	[redacted]					Yes						8/17/2026	
Reagan	Morris	Dear NMED staff, My name is Reagan Morris. I live in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am coming to you as a member of the public, who continually sees the struggles of a disproportionately affected community. These people by no means have the resources to fight back against the negative effects brought about by Project Jupiter. As a government agency you have the responsibility to look out for the well-being of all citizens, but by allowing Project Jupiter to advance you are serving a multi-million dollar company with no interest in the people, animals, and environment they could potentially harm. I've seen all the ads put out by the companies backing the project. I see how they prey on the lack of knowledge from their audience. People unfamiliar and uninformed may see no downside, but they forget to mention the multitude of environmental consequences Project Jupiter brings. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes		8/17/2026	
Felma	Vrecenar	As a resident of New Mexico who is very worried about our water issue, allowing an ai data center to be build in our state is a big problem for everyone. We as New Mexicans should preserve the only water we have for future uses and for our future generations. We do not need another data center to pollute and empty our river.	1	Merged Document	No	[redacted]			Yes								8/17/2026	
Hunter	Richardson	This data center needs to be shut down. there is no planet b. this will release 10 million tons, yes TONS of climate warming greenhouse gasses every year no one asked for ai and no one needs it. If you depend on ai that much switch to a ecofreindly one like ecogpt. stop destroying our future.	1	Merged Document	No	[redacted]				Yes							8/17/2026	
Kasha	Sanderson	Please do not allow YGI's application to pass. There are too many unknowns according to environmental law groups, and foul play by Project Jupiter canvassers falsely using New Mexican names to feign support for the project that the microgrid will be enabling. The slim amount of dollars Project Jupiter will put into Doña Ana county is not enough to truly support New Mexicans; it's merely to try and garner public support rather than truly trying to be responsible, and it will cause a lot more damage in the long run. Please do not agree to the microgrid; there will be dire consequences.	1	Merged Document	No	[redacted]					Yes		Yes				8/17/2026	
Alicia	Trujillo	This data center is an unnecessary burden our state's environment and the local ecosystems. Our river is already drying up and this project will continue to do enormous amounts of harm. We live in a state full of life and beauty that should be cherished and protected, not destroyed for selfish gain. This project should be shut down permanently.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026	
Anonymous	Anonymous	It is apparent that proponents of Project Jupiter have and are submitting fraudulent positive statements illegally using the names of citizens without their permission. This alone should stop any ongoing construction until a full and unbiased investigation is conducted. Please stop construction. No more data centers.	1	Merged Document	No	[redacted]	Yes									Yes	8/17/2026	
Sarah	Drinkwater	As a lifelong resident and citizen of New Mexico, I STRONGLY oppose the approval of this permit and of ANY and ALL permits related to the development of AI or other Data Centers here in New Mexico. NEVER in my life has the Rio Grande been this dry for this long. Who in their right mind would think that building a massive drain on New Mexico's precious, scant water supply would be a GOOD thing? The only answer I can arrive at is "greedy people" and they wouldn't be in their right mind. PLEASE, please do what is best for New Mexico, and everyone and everything who lives here, and deny this and every data center permit. ~5k jobs are NOT WORTH IT!	1	Merged Document	No	[redacted]			Yes								8/17/2026	
Amy	Logan	Project Jupiter cannot stand. Not only will it affect wild life, air and water quality but also further pollute our natural environment through noise and space. This project is plain and thoroughly selfish, it ignores the concerns of 7 out of 10 people. And what about the people in surrounding communities? What about native people who have connection to the land? The problem possibilities this project is causing are endless. No amount of sugar coating and postponing will make people side with this. It's disgusting and an another huge sign of corporate greed.	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026	
Katherine	Curtis	I am a resident of New Mexico and I do not think there have been enough studies about these data centers to feel confident it's not going to adversely affect residents. Those of us who live here are acutely aware of how vulnerable we are to drought and fire. We need to know much more about how this project will impact the environment and the people and animals who live in New Mexico.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026	
Michael	Collier	I oppose the permit - Permit Number 10883 - for the YGI Microgrid proposed by Yucca Growth Infrastructure, LLC. The estimated carbon dioxide emissions of greater than 75,000 tons per year will drag down New Mexico's effort to urgently reduce greenhouse gas emissions to net zero. Our lives cannot afford further increases to these emissions that are causing global heating. We are in the summer months now, and despite temperatures already above 100°F, this is the coolest summer that we will experience for the rest of our lives. Next year will be hotter, and the years after that hotter still. I have already been hospitalized 3 separate times for dehydration and heat exhaustion; global heating has directly affected me personally. I implore you to reject this permit for the health and safety of vulnerable New Mexicans like me. Yucca Growth Infrastructure, LLC could easily install fields of solar panels to meet their electricity needs, which would not contribute to greenhouse gas emissions. Yes, it would require several square miles worth of solar panels, but there are vast swaths of empty land adjacent to the proposed site that they could acquire to use for such an installation. Yes, it would also require an enormous number of batteries to store the solar energy for use at night, but Oracle (the main beneficiary of this project) has more than $1 trillion(!!!) of investment funds available for its hyperscale data centers for artificial intelligence implementation. The fact that the developer of this project is insisting on a natural gas energy source when they can absolutely use an emissions-free source like solar energy proves their psychopathic level of greed: they would prefer to externalize the environmental and human health costs by choosing a financially cheaper (in capital expense only) energy source so they can maximize their profit. And to be clear, only a few people - who are not even New Mexican - will actually profit from this choice. So please, reject this permit that harms New Mexicans and benefits only out-of-state billionaires and trillionaires.	1	Merged Document	No	[redacted]				Yes	Yes		Yes				8/17/2026	
Melissa	Gildark	I am strongly opposed to Project Jupiter. This plant is unnecessary and will pollute our beautiful natural environment. It will use 1 million gallons of our precious water per day. The people, plants and animals of New Mexico need that water to survive and grow crops. It will also disperse tens of millions of tons of cancer causing chemicals and greenhouse gasses into our air. This company has already been fined for improper disposal of hazardous materials. It is irresponsible, dangerous, and an insult to the people of New Mexico if Project Jupiter goes forward. Please stand with the people and reject the application of project Jupiter/ Yucca Growth Infrastructure.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes			8/17/2026	
Michael	Hutchins	On July 1, 2026, I inadvertently stated in my comments opposing Yucca Growth Infrastructure's permit application that: "Adding 25 billion tons of greenhouse gases annually to the region's active and long-time non-attainment zone should not be approved through their permit application." I am updating my comment to state: "Adding 14 billion tons of greenhouse gases annually to the region's active and long-time non-attainment zone should not be approved through their permit application."	1	Merged Document	No	[redacted]				Yes							8/17/2026	
Hepzibah	Hoffman-Rogers	This project is completely inappropriate for our arid desert landscape. Our state has been commodified to the detriment of our citizens, our land and our economy for too long with too little benefit. This project will result in very little long-term benefit to our community and great amounts of destruction to our precious natural resources	1	Merged Document	No	[redacted]	No	Support Non-Substantive	Yes								8/17/2026	

Natasha	Nullius	"Our river is drying, Our crops are dying, Our people aren't thriving. But still, they come to take. Our water was taken, Our dreams mistaken, Our needs voted vacant. But there's still money to make." -Natasha Nullius, 2026 We do not want one more Google, Intel, Amazon, Facebook, or any other insincere giant company that comes in with promises only to take what little we have and the faith of New Mexicans when they inevitably leave. These people buy land that holds a history all its own and that is home to what little wildlife and wild plants that can survive here. We do not have enough to feed all of our children with New Mexican crops on New Mexican farms, nor enough water to sustain those crops, the livestock, the workers, the driller, the influx of snowbirds, the children, and the animals we share these borders with. Please, don't sell out New Mexican futures and hope for Billionare promises and mass produced assurances. No one asked the citizens what they wanted. Not the ones who speak English OR Spanish. No one held a community meeting that was acessible enough for the people who sustain the local economy and who sustain the image of the hearty New Mexican spirit. We need thorough representation, time to learn all of our options, and a vote by all who will be affected directly and indirectly by this affront to our environmental progress and the eyesore of a building theyre wrapping it in. Sincerely,	1	Merged Document	No	[redacted]			Yes		Yes				Yes		8/17/2026
Brandy	Runningwolf	I strongly oppose Project Jupiter. Modern AI-focused data centers require millions of gallons of water per day, particularly in hot and arid climates. In NM, where water supplies are already stressed, increased industrial water demand will harm long-term sustainability and compete with residential, agricultural, and environmental needs. Beyond water and energy use, data centers are noisy and generate more heat! These effects should be evaluated cumulatively rather than individually. While data centers can generate temporary construction activity, permanent operational staffing is often relatively small compared with the size of the investment and the amount of land, water, and energy used. AI Data Centers do not belong in our drought prone state	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Mark	Willard	It has come to my attention that agents for the developers of Project Jupiter have been falsifying comments on your website in support of this project. Please take these underhanded efforts seriously and investigate the accusations against them thoroughly. Thank you.	1	Merged Document	No	[redacted]	Yes									Yes	8/17/2026
David	Trimmer	Our region is already facing a severe, documented water shortage. Bringing an AI data center here—an industry known for consuming millions of gallons of water every single day just to keep its servers cool—is a massive threat to our future. AI models require an immense amount of computational power, and the cooling infrastructure needed to support them will place an unsustainable burden on our dwindling local aquifers and reservoirs. We cannot afford to prioritize the cooling of tech infrastructure over the basic needs of local residents, agriculture, and our fragile desert ecosystem. If we run out of water, our community cannot survive. I urge the board to put our community's long-term water security first and vote NO on this project. Data centers belong in regions with a surplus of water, not in a desert during a water crisis.	1	Merged Document	No	[redacted]			Yes								8/17/2026
Matt	Celeskey	I oppose the YGI Microgrid construction in Doña Ana County and add my voice to those requesting that you deny the permit application by Yucca Growth Infrastructure, LLC. Any way you look at it, this is a bad deal for New Mexico. It will add tons of toxic and greenhouse emissions to an area that already has dangerously high ozone levels, and use millions of gallons of water in a state that struggles with increasing droughts. Some estimates calculate this single project will create more greenhouse emissions than the 700,000 residents of Albuquerque and Las Cruces combined - 1/3 of the entire New Mexico population. Do we really want to poison this much of our air and drain this much our water for the sake of a couple thousand temporary construction jobs and vague promises of a few hundred 'permanent' ones? The Project Jupiter data center that plans to use this grid offers shockingly little value to New Mexicans in exchange for the resources it will drain from us. I ask that the New Mexico Environment Department make this simple calculation--this is a poor use of our state's resources, and it is not in the interest of the vast majority of New Mexicans. Please deny this application for the YGI Microgrid.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
Angelique	Maestas	To the New Mexico Environment Department, As a lifelong resident of New Mexico living in Moriarty, I am writing to strongly urge NMED to deny the air quality permit applications for the Project Jupiter data center microgrids. While out-of-state advocates debate tech infrastructure, actual residents know this project poses severe risks to our water, air, and public health. Water and clean air are non-partisan lifelines for New Mexicans, and we cannot afford to jeopardize either. My concerns include, but are not limited to, the following critical issues: Water Security: Groundwater depletion is a reality right now; just 30 minutes down the road from me, the Town of Estancia is in a water emergency, hauling water by the truckload. Any heavy industrial draw on our aquifers—even for closed-loop cooling systems—threatens our long-term water security. Extreme Greenhouse Gases: Despite switching to fuel cells, public notices show this facility will still emit over 10 million tons of greenhouse gases annually—more than New Mexico's two largest cities combined. This accelerates climate change and actively degrades our environment. Local Toxic Air Pollution: The surrounding communities already struggle with unsafe levels of air pollution. Splitting this massive power source into two separate applications appears to be a tactic to evade "major source" air monitoring requirements while still dumping tons of nitrogen oxides and hazardous VOCs into local neighborhoods. Unproven Technology & Toxic Waste: Fuel cell microgrids have never been tested or managed at this massive scale. Furthermore, the process of filtering natural gas for these systems creates highly toxic hazardous waste, including benzene. The long-term handling and disposal plans for this waste remain completely unclear. New Mexico communities should not be treated as a corporate testing ground for massive pollution and resource depletion. I urge NMED to protect our residents, our air, and our aquifers by denying these permits. Thank you, Angelique Maestas	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes			8/17/2026
Aaron	Mullennix	Good morning. I want to express my concern over giving an air permit to a data center. I believe it provides too high a risk to the environment. We've seen far too many data centers with issues regarding sound pollution with peaks being up in the upper 60dB going non stop day and night. We do not need a data center for this reason and also concerns about their water input and output. I don't want our water being evaporated at high amounts and neither do I want it pumped back out to the Rio at high temperatures. Please do not support this. Please let us be good stewards.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Carmen	McClelland	I strongly oppose this data center. We are a drought prone state with water limitations already in place around the state. While it would be a temporary increase in construction jobs, permanent operational staffing is often relatively small compared with the size of the investment and the amount of land, water, and energy used.	1	Merged Document	No	[redacted]			Yes								8/17/2026
Stephanie	Deutsch	Allowing Project Jupiter to be built is incredibly short sighted and forgets about the community. The community of Doña Ana county will be harmed with the immediate aftermath of bad water, electricity shortages and the long term environmental damages. The environmental damages will outlive the data center. What happens to that mass of a built environment once the tech world has moved on to something else? Leaving New Mexicans to suffer in the waste of Project Jupiter. Please do not allow this to happen	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026
Mathew	Patalano	The project proposed by Yucca Growth is not in the public's best interest. But n addition to draining our resources for private profit that will not benefit the community, Project Jupiter will emit obscene levels of air pollution in our state. Their shady and dishonest tactics thus far - paying influencers, obtaining information from citizens opposed to the project and then using it to forge letters of support, misleading brochures, etc. alone should disqualify the permit from being granted and has clearly demonstrated their lack of integrity and respect for New Mexicans. Time after time, in state after state, similar projects boast community benefits such as revenue and jobs that never pay off and are disproportionately overshadowed by the environmental harm and harm to public health resulting from the operations of such facilities. The people of New Mexico do not consent. We do not want or need this data center. We need cleaner air. We value our resources and the quiet of our natural surroundings. We strongly urge that permits be denied to Yucca Growth for this project and any others (under any names they adopt in the future) that they propose, as they have clearly demonstrated their lack of morality and respect for our communities.	1	Merged Document	No	[redacted]					Yes						8/17/2026
Cynthia	Brown	I am opposed to the air quality permit for Project Jupiter being passed. This permit is due to be issued before a public comment meeting scheduled for 8/11/2026. The ramifications of this project on the people and environment of Dona Ana County is being kept secret, with plans for energy and water usage continually changing. How many New Mexicans will Project Jupiter commit to hiring, and at what salary? With evidence of wrong doing at this stage, changing public comments and false advertising, these companies can not be trusted to do the right thing for our community.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				Yes		8/17/2026
Michael	Nutkiewicz	I urge you in the strongest possible terms to reject permits that allow the Jupiter Project to move forward. The toil on the environment and natural resources, and the fact that most data centers actually do not create significant number of jobs, among other factors, calls for commonsense rejection of Project Jupiter.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive			Yes						8/17/2026
Alexandra	Ma	Building more data centers is unnecessary and waste of money when men Americas live in poverty. Not only is building such a large data space harmful to the environment because all the needed water to keep it cooled down and functioning, its also very invasive, no local wants to to be driving and see this huge invasive data center that cost so much money to make while the mist the locals in new Mexico live in poverty. And this whole project is so expensive the money could be used to literally anything like feeding children in American schools, feeding families, and putting in money towards free healthcare.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
James	Roybal	My name is James Roybal and I am a software engineer and I do use AI for work. However I want to be very clear, we do not want data centers in new mexico that pull from the power grid and waste water. However I do think we should have regulations for these data centers to need to run on a high percentage of renewable energies such as solar during the day, and their cooling systems NEED to be on closed loops. A data center being built that does not run on a closed loop water system is a waste in our dessert environment especially when we already have severe water issues.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
GILL Michael	Sorg	Stop the Jupiter Data Center in Dona Ana County, unless it conforms to the environmental standards for air pollution, most importantly carbon dioxide from fossil fuels. I don't want them to use fossil fuels to produce electricity, the amount of electricity equal to the amount used by Las Cruces and Albuquerque combined.	1	Merged Document	No	[redacted]				Yes	Yes		Yes				8/17/2026
Mary	White	Please hold a public hearing on this air quality permit. I register a resounding negative opinion to the Project Jupiter air permit. Air you can see is not a good thing but in Dona Ana County our bad air already blurs the view of the Organ Mountains and frequently erases them from view entirely. The region is already in a federal nonattainment zone. This is without the added CO2 emissions by Project Jupiter which are expected to double our level of pollution. Safety first should be the guiding principle especially for our children. Asthma is one of the most common chronic diseases in New Mexico. According to the NM Department of Health between 2,000 and 2017, the number of those suffering from asthma jumped 40%. That was between 11 and 26 years ago and it is much worse now without the added pollution from Project Jupiter. Air, whether fresh or polluted, enters the lungs and goes into the bloodstream. Experts link air pollution like ours to adverse health effects including asthma, brain damage, birth deformities, cardiovascular disease and childhood cancer. Please do not become part of the money grab that will only put our children in danger for the sake of profit.	1	Merged Document	No	[redacted]				Yes	Yes				Yes		8/17/2026
Joshua	Ridens	I oppose Project Jupiter. New Mexico should not approve a massive AI data center in a drought-stricken desert region based on private assurances from companies whose numbers and plans have already changed. This project adds industrial demand, energy demand, air-quality risk, and public infrastructure burden in a state already planning for a severe long-term water shortfall. No permit conditions would make this project appropriate for this location. Companies of this scale can treat fines as operating costs, and the public should not be forced to trust after-the-fact enforcement once the damage is done. I also request that NMED audit the public comment record. The docket contains large clusters of substantially identical comments, and public reporting has documented residents alleging that supportive comments were submitted under their names without consent. NMED should verify mass-submitted comments, flag or remove unauthorized comments, and investigate whether the record has been manipulated. NMED should deny this permit.	1	Merged Document	No	[redacted]			Yes			Yes					8/17/2026
Frederick	Tyler	I oppose the permit for the YGI microgrid. This facility will fill our state with air, water, light and noise pollution. The NMED must protect residents from these harms.	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026
George	Jacobs	Project Jupiter has thus far been initiated without using the proper approval channels allowing public input. This letter is in opposition to granting the Air Quality permit. The project sponsors have a long record of environmental damage and operating while not adhering to applicable codes. Nothing in their history supports otherwise. Air quality is at risk in any data center project...this particular one, applied for by an applicant with a dismal track record on adhering to air quality codes, must be denied. S. NM is already in a dire situation environmentally. The concept of adding more emissions to our air, at the scale of what this project would bring, is absolutely contradictory to the intent and purposes of an Air Quality Code and other supporting codes.	1	Merged Document	No	[redacted]				Yes	Yes						8/17/2026
Zachary	Theus	As a local business owner in Las Cruces, I'm writing to express my strong support for Project Jupiter. For businesses like mine, Project Jupiter promises a significant economic boost, creating 4,000 good-paying construction jobs, followed by 1,500 project-supported positions, that will increase local spending across the community and support small businesses like ours. Project Jupiter's commitment to investing millions in Dona Ana Countys schools, infrastructure, and local services will also help businesses attract and retain talent while strengthening our local economy and customer base. I strongly encourage the New Mexico Environment Department to approve this project. Sincerely,	1	Merged Document	No	[redacted]	No	Support - Non-Substantive			Yes						8/17/2026
Jerry	Harrell	As a local business operator in Mesilla, I'm writing to express my strong support for Project Jupiter. For businesses like mine, Project Jupiter promises a significant economic boost, creating 4,000 good-paying construction jobs, followed by 1,500 project-supported positions, that will increase local spending across the community and support small businesses like ours. Project Jupiter's commitment to investing millions in Dona Ana Countys schools, infrastructure, and local services will also help businesses attract and retain talent while strengthening our local economy and customer base. I strongly encourage the New Mexico Environment Department to approve this project. Sincerely,	1	Merged Document	No	[redacted]	No	Support - Non-Substantive			Yes						8/17/2026
New Mexico	Construction Alliance	As a local non-profit that supports the growth of the construction industry through advocacy and education throughtout New Mexico, we're writing to express our support for Project Jupiter. For members like ours, Project Jupiter promises a significant economic boost, creating 4,000 good-paying construction jobs, followed by 1,500 project-supported positions, that will increase local spending across the community and support small businesses like ours. Project Jupiter's commitment to investing millions in Dona Ana Countys schools, infrastructure, and local services will also help businesses attract and retain talent while strengthening our local economy and customer base. We strongly encourage the New Mexico Environment Department to approve this project. Sincerely, The Board of Directors, New Mexico Construction Alliance	1	Merged Document	No	[redacted]	No	Support - Non-Substantive			Yes						8/17/2026
Donovan	Bennett	As a STACK employee, I am writing to express my support for Project Jupiter. As a seasoned construction professional who has built nearly every type of power generation facility on the marketincluding HRSG, cogeneration, simple-cycle, nuclear, and geothermal plantsI believe the proposed Bloom Energy technology represents one of the most environmentally responsible power generation solutions currently available. Based on the information available for review, the only significant byproduct of the Bloom power generation process appears to be water. While the initial startup requires a substantial volume of water, once the system is operational it functions / operates through a closed-loop cooling system that continuously recirculates the cooling water. As a result, the long-term water makeup requirement is minimal. In comparison, the anticipated water demand is estimated to be approximately <1% of that required by a conventional HRSG-based power generation facility. Likewise, air emissions appear to be extremely limited, making the technology one of the cleanest commercially available power generation alternatives. From an environmental stewardship perspective, particularly regarding water conservation and air quality, Project Jupiter using Bloom Energy offers significant advantages over traditional fossil-fuel-based generation. The combination of dramatically reduced water consumption and minimal emissions presents a compelling solution for communities concerned with environmental impact. From an operational standpoint, there is every reason to believe the Bloom Energy system is capable of providing more than enough electrical capacity to support the anticipated facility load, while also offering the scalability and reliability necessary for mission-critical applications such as data centers. Beyond the environmental benefits, the economic impact to the surrounding communities could be equally significant. The construction, commissioning, operation, and long-term maintenance of these facilities create high-paying, skilled employment opportunities that inject taxable wages directly into the local economy. Those dollars circulate through local businesses, supporting housing, retail, restaurants, hospitality, transportation, and professional services. As these supporting industries expand, they attract additional businesses, investment, and population growth, creating a positive economic multiplier effect. This not only strengthens the local economy but also broadens the municipal tax base, providing additional revenue for infrastructure improvements, schools, emergency services, and other public investments that benefit the community as a whole. Having spent my career constructing nearly every major form of utility-scale power generation, I view this technology as a significant step forward in balancing environmental responsibility with operational performance. Project Jupiter, with Bloom Energy appears to offer a rare combination of clean, reliable, and efficient power generation while delivering meaningful long-term economic benefits to the communities in which these facilities are developed. Based on the information currently available, it represents a practical and forward-thinking alternative to conventional power generation technologies.	2	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026

Michael	Highee	I am writing to voice my opinion on Project Jupiter. I believe it has the potential to help New Mexico, but it is vital that the commitment to only using non-potable water remains in place.	1		No												
Ashley	Watson	To Whom It May Concern, I oppose Project Jupiter because I believe some decisions are bigger than economics. I am not opposed to technology. I am not opposed to investment. I am not opposed to growth. I understand that artificial intelligence will shape the future, and I do not believe New Mexico should reject innovation simply because it is new. What I reject is the increasingly common idea that every community should be expected to sacrifice whatever is necessary to accommodate the ambitions of the world's largest corporations. We have reached a point where billion dollar companies arrive with promises of jobs, investment, and prosperity, while communities are expected to absorb the uncertainty. We are told to trust projections, trust future technologies, trust that resources will be managed responsibly, and trust that the long term benefits will outweigh the long term costs. Yet once these projects are built, the consequences belong to the people who live here, not the executives or investors who approved them. That is not a partnership but an imbalance of power. New Mexico is not empty space waiting to be optimized. Doña Ana County is not a blank canvas for industrial expansion. It is home to families, farms, wildlife, small businesses, and communities whose relationship with this land stretches back generations. Those interests deserve equal weight, not secondary consideration after corporate growth targets. Supporters often argue that this project will create jobs. Jobs matter, but employment alone cannot become the standard by which every proposal is judged. By that logic, there would be almost no project too large, too resource intensive, or too disruptive to reject. It's also still unclear how many PERMANENT full-time jobs will actually exist for NM residents. I believe economic development should leave a community stronger than it found it. It should protect the resources that make a place livable. It should respect the people who already call that place home. It should not require residents to lower their expectations for transparency, public participation, or environmental stewardship simply because the company involved is wealthy enough to promise billions of dollars.	2		No														
Carol	Alvarado	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,400 project-supported jobs. Furthermore, Project Jupiter has committed $100 million to help repair, upgrade, and improve local water systems; $380 million in direct support for schools, infrastructure, and local services; and $4.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. I think you'd be awesome for it to be for it to be made and it would give everybody a new job and our water would be't just would be awesome okay all right thank you have a blessed day yeah it's under construction right now Sincerely, Carol Alvarado	1		No		Yes			Yes			8/27/2026
Michelle	Miller	I adamantly oppose this permit. This project will increase pollution, drain the water table, and provide minimal job growth for the local community. A desert habitat is not the place to build this kind of water hog.	1		No		Yes		Yes				8/27/2026
		Just review the experiences of other communities with data centers.					Yes		Yes				8/27/2026
Zee	Lin	This will pollute the already limited water supply and it will use up to 1 million gallons of water. And I will not allow this data center to hurt our already suffering planet.	1		No								
							Yes						8/27/2026
Ethan	Campbell	To the New Mexico Environment Department My name is Ethan Campbell, I am a lifelong resident of Dona Ana County, New Mexico, and I am submitting this comment in formal opposition to the Yucca Growth Infrastructure YGI Microgrid Air Quality Construction Permit Application. I want to be clear about who I am and where I stand. I contacted my county commissioners before the vote on the $365 billion in industrial revenue bonds for Project Jupiter last September. I made my opposition known. They approved it anyway, without a public vote, in a process that bars separate lawsuits now allege violated state law, including the New Mexico Open Meetings Act. A judge has already ruled that the petitioners challenging that approval may be entitled to relief. My voice was not heard then. I am submitting this comment to make sure it is on the record now. I oppose the issuance of this air quality permit for the following reasons: The emissions figures in this application are not a minor local concern. Public notices estimate the facility's air pollution at 32.2 million tons of greenhouse gases annually, which is equivalent to 70% of the entire state's electric carbon emissions and more than Albuquerque and Las Cruces combined. That is not a data center. That is a major industrial emitter, and it is being proposed for a community that never asked for it and never voted on it. ABQ Journal The EPA designated an area near Sunland Park as a marginal nonattainment area due to ozone pollution that already exceeds allowable federal standards. This permit would add an enormous new emissions source to a region already struggling to meet air quality benchmarks. The people breathing that air are my neighbors. Sandy Fe New Mexican I do not believe the money Oracle, OpenAI, and STACK Infrastructure will generate from this project will stay in Dona Ana County. The $365 billion in industrial revenue bonds approved for this project includes a decades-long property tax exemption. Ainstead, meaning the wealth created here leaves, and the community that absorbs the environmental cost receives almost nothing in return. I did not ask for my city, water, my energy grid, or my land to be used to generate profits for corporations headquartered far from here. Santa Fe New Mexican I am also writing to note that I am aware that residents in Las Cruces, Albuquerque, and Rio Rancho have recently come forward stating that identical form letters supporting this permit were submitted to this Department under their names without their knowledge or consent, by canvassers working on behalf of Project Jupiter. I want this Department to know that this comment is mine. I wrote it. I am submitting it. My opposition to this project is genuine and longstanding. I am asking the New Mexico Environment Department to deny this permit application and to hold a full public hearing in Santa Teresa, in the community that will actually live with this decision, before any further action is taken. Sincerely, Ethan Campbell Dona Ana County, New Mexico					Yes						8/27/2026
Meredith	Keeton	I am a native and lifelong resident of southeast New Mexico, an underserved region typified by poverty with a history of government involvement only to build nuclear weapons that left a legacy of destruction and death. The message to people, especially children growing up here, is that we do not matter to this country. Allowing the poisoning of our air for profit further enforces this message. The only major investments in this quadrant of the state have been from the military industrial complex and from oil and gas. Communities here deserve better than another extractive, polluting company coming in to use us. We deserve real investment in our future. The water demands alone should be enough reason to stop consideration of Project Jupiter.	1		No		Yes	Yes	Yes			Yes	8/27/2026
Haiden	Reyes	My name is Haiden Reyes. I live in Santa Teresa New Mexico , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I've lived here since I was five years old I've seen the struggles with our water and now this data center is putting more struggles into my community with is very concerning. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants. • This technology generates toxic waste, and the process for handling this waste is still unclear. • Fuel cell technology or a centralized waste system has never been tried at this scale. • Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1		Yes			Yes					8/27/2026
Eric	Bruce	4000 construction jobs and 1400 jobs later does not justify the water useage and power draw for this facility. Build it where the water is plentiful and the power grid can handle the load.	1		No		Yes	Yes	Yes		Yes		8/27/2026
James	Garcia	How the fuck are new Mexicans supposed to be new Mexicans without green chile? The data center intends to extract our already minimal water from the farmlands that make our food. The water they would release would contaminate communities and wildlife habitat downstream. Speaking of wildlife, the route of the data center would destroy migratory patterns and entire ecosystems. If we keep building cities shit where there was nature, nature will keep coming into our towns. Dumb asses who can't understand the planet they destroy should have no power over it. One last warning, if this data center goes up, all reasonable parties will die violently#%	1		No		Yes						
Sandy	Barraza Delgado	My name is Sandy Delgado. I live in Santa Teresa, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have been a resident for more than 15 years in Santa Teresa we are a very small community and we don't need any centers that will harm our environment which will eventually lead to harm our health as well. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants. • This technology generates toxic waste, and the process for handling this waste is still unclear. • Fuel cell technology or a centralized waste system has never been tried at this scale. • Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1		Yes		Yes						8/27/2026
Mariah	Hothan	Please deny this data centers new air quality permit. Its just a whitewashed attempt to destroy our state. They see us as poor and desperate, that's why their lies are all centered around "bettering the community". We don't need their help, their really want to be better we need to say no to Project Jupiter. Have you seen Memphis lately thanks to Musk's data center. Its kinked that city just like every data center does. Everywhere they succeed the people end up losing and if we keep approving this nonsense then humanity as a whole will reap what we've sown when we end up in a tech wasteland with no water, no natural resources. Please deny this air quality permit for the sake of the people that live here, because I guarantee the people benefitting financially off of Project Jupiter are not going to be in NM and probably not even in the US. Its been proven over and again that the promised benefits are never close to being realized and all that people are left with is anger and regret. Deny this permit, please. The public should be given an additional 60 days to review and comment on the air quality permit, so that community members can participate equitably. The air quality permit application should be rejected due to Bloom Energy's history of illegally dumping hazardous waste. If the permit is not rejected, a public hearing must be held in Santa Teresa , in both English and Spanish, with the option to participate online. Approving this permit would be government-backed environmental racism, because the people of Doña Ana County already suffer too much from environmental pollution. For years, Doña Ana County has been called a 'non-compliance' zone Which means that our air quality does not meet federal government rules. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No		Yes	Yes		Yes		Yes	8/27/2026
Kelsey	Erickson	I strongly urge you to deny this air quality permit to Yucca Growth Infrastructure. Their proposed Project Jupiter boasts profits only for tech companies, it serves no long-term benefits to the residents of Doña Ana County nor any other New Mexico residents who bear the brunt of increased emissions and reduced water supplies in the state. There is not sufficient water availableto maintain a cool environment for such a massive data center. The Rio Grande is already in decline, currently 48 miles of the river is now dry due to constraints of agriculture. This is the second year in a row that the river has dried over 70 miles. The critically endangered Rio Grande Silvery Minnow is at risk of extinction in the wild if this pattern continues as it likely will. It should also be noted that New Mexico is in a water deficit to Texas, a deficit that will undoubtedly grow if Project Jupiter takes any amount of water from the river or the Mesilla Basin aquifer. Since there's no disclosure on where this project intends to attain its water, it should be rejected. We live in a desert that is becoming increasingly arid, there is no water available to support data centers and we cannot afford to double our emissions at a time when our livelihoods demand that we reduce them. We have now surpassed the 1.5 degree Celsius of warming that the IPCC agreed was the maximum amount we could emit to avoid the worst effects of climate change. If this data center is built, it would not only consume water but contribute to increasing acidification and reduced snowpack that are causing rapid drying to our Rio Grande. Project Jupiter is a terrible idea, as are all data centers that have increased our emissions nationwide. Though Trump could care less about the climate accord, those of us who care about our children do care and want to maintain a livable planet for them. I urge you to reject the air quality permit for Yucca Growth Infrastructure and stop Project Jupiter permanently.	1		No		Yes	Yes		Yes	Yes	Yes	8/27/2026
Kristen	Dorman	To the New Mexico Environment Department: I urge you to DENY the air permit for Project Jupiter's proposed fuel cell microgrid. Oracle frames this as an environmental improvement, but the data reveals this as a greenwashed gamble that remains equally detrimental to our community and environment. 1. A 28% Cut to Nox is Close to Business-As-Usual Oracle touts a 40% reduction in NOx compared to their natural gas turbine plan. However, this is a distraction from the true threat: greenhouse gases. Amidstat. The original gas turbine plan would have emitted over 3.4 million tons of CO2 annually.Amidst more than Albuquerque and Las Cruces combined. Amidstcl. The fuel cell "solution" only reduces this by about 28%, leaving a staggering ~2.4 million tons of CO2 pollution per year. 2. Fuel cells are unproven at this scale. This project would be one of the largest fuel cell microgrids in the U.S., requiring up to 2.65 MW of capacity. This is not a proven, scaled technology for a 24/7 industrial load. Approving this permit makes our community a test subject for an experimental energy scheme, risking operational failures, unanticipated emissions, and stranded assets. 3. "Negligible" is our "Zero Impact" Fuel cells still require natural gas and significant water for hydrogen processing or steam methane reforming. Citing EPA data, fuel cells using distributed natural gas EMFA still produce NOx, CO, and PM emissions. This is not the "zero-impact" solution Oracle claims. This permit is a reckless gamble with our health and climate. Please choose proven solutions over corporate spin and deny this application.	1		No		Yes	Yes		Yes			8/27/2026
Aaron	Kirtk	The building of the Project Jupiter data center in southern New Mexico greatly concerns me. I don't understand why these data centers that use water for cooling are being built where waste is scarce and temperatures are hot. It seems inefficient to say the least. It is also insane how much power these data centers need, more than either of the largest cities in New Mexico. The real reason the are being built here is likely that the land was cheap and the didn't think they would get much resistance from the population. I have lived in Southern New Mexico and West Texas for many years and know that the air quality in this area is not particularly the best already many days. It seems like the Project Jupiter data center will make the quality of life for residents in this area much worse. The only people who will really benefit are the rich billionaires and investors. After initial construction, there will be very little long term job creation and economic growth in this area. It is time to stop trading the future of our families and children for short term profit and increased shareholder value. For the reasons stated above the air quality permit should be denied and the public comment period should be extended to allow more community involvement in the decision making process. If the permit is not denied then a public hearing should be held in Santa Teresa in both English and Spanish.	1		No		Yes	Yes	Yes		Yes		8/27/2026
Brennon	Davis	I grew up in Las Cruces, and have lived in New Mexico all of my life. I implore our state regulators to do just that – regulate. Our public lands belong to us. Our water, our air, our soundscapes, our landscapes – they belong to us. New Mexico has so much to offer - we have been used as a dumping ground by our nation for decades, and we need to have the bravery to say no more. This data center is not just about this data center - it is about setting the precedent that our land is for sale, for pennies on the dollar, that our politicians and regulators are for sale, and that we have nothing more to offer the world than just "empty space" that only needs to be abused. We have collectively been too comfortable for too long with this status quo. We are worth more than this. Have the bravery to be the voice our people so desperately need. We can no longer afford to trade our land, air, water, and livelihoods for a pittance of a few jobs. We can no longer afford to sidestep public voices for the benefit of the few. Give the public sufficient time, information, and resources to voice themselves. Extend the review to public input. And, most importantly, do not approve this fuel cell plant. Do not sell us out. Please, for the love of your neighbors, your brothers, and your sisters - regulate.	1		No		Yes			Yes			8/27/2026
Ally	Powell	I have now lived in most of the areas that would be affected by this data center. I've lived in El Paso, Las Cruces, Santa Fe currently and I will be moving to Albuquerque. This data center is terrible and against humanity for many reasons. All these areas that I have lived in have water quality and quantity issues, wildlife protection needs, and extreme weather. This data center will increase the temperatures of already hot areas, and the rest of the facts that are necessary are outrageous. How much waste, what kind of waste will be produced, that has not been said with actual scale, that the air won't be polluted creating more extreme weather for these communities. We have signs all the way up here next to the mountain in Santa Fe still asking to reduce water use and I know very well that this data center would not be held to the same standard we have been held to for decades. This is only to tide rich people's pockets with more money and this is a state filled with wildlife conservationists and humans who care about each other's well being. This data center has no right to be here and no one in any of these cities in here in want this either.	1		No		Yes	Yes	Yes				8/27/2026
Alexandra	NA	Shame on anyone who has anything to do with this AI center. NM is already suffering from water pass and extreme fire risks. This AI center will take water from communities and compromise their safety in the case of a wildfire. Our air quality will worsen from waste dumping. Please put NM communities first.	1		No		Yes	Yes					8/27/2026
Kaitlyn	Torres	No data centers in New Mexico! You will do nothing but pollute our air and take what limited resources we already have! NO TO PROJECT JUPITER AND NO TO DATA CENTERS IN NEW MEXICO. The air quality permit application should be denied! Stop poisoning the Duke!Doña Ana County community! The air is already unhealthy, adding your disgusting emissions won't help! This isn't a need for society or our community in New Mexico! Bloom energy has a bad history already of illegal dumping including hazardous waste!! Absolutely don't want or need them here. As a community we rule no! And should you succeed in putting this in place, I promise it won't succeed or last. Our community doesn't quit and won't stand for this. So go ahead and build it, I promise there will be vandalism and destruction! New Mexico doesn't want you here!	1		No		Yes	Yes		Yes			8/27/2026
Sita	Stanfield	Allowing project Jupiter to be built without fully recognizing the implications of a fuel cell center at this scale in a community that will be impacted by it's air pollutants is irresponsible and dangerous. Considering the air quality concerns and impact of the environment, I urge NMED to reject the air quality permit proposal and ask that data centers be assessed with much deeper scrutiny in order to protect people and the planet. This impact this data center would have on the community and landscape to be given a risk and concern to allow it to continue to be built. Let's please step back from this building these data centers with a better balance between technology and the future health of our communities and the environment can be achieved.	1		No		Yes	Yes		Yes			8/27/2026
Tanner	Guskey	As a resident, I am concerned of the impact the heavy methane will have on our community health and safety. I am also concerned that the gas will contribute to our greenhouse gas output and ultimately our acceleration of increased temperatures in our region. As a trained Archeologist, I am concerned about the impact of the buried pipeline on cultural resources and the danger of a leak. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No		Yes	Yes		Yes			8/27/2026
Jenica	Nardacci	Please reject the air quality permit to Project Jupiter. Please reject Project Jupiter entirely. Our state cannot afford the impact to air quality, not to mention water availability & electrical draw, that a data center would cause. Project Jupiter is frankly a stupid venture made by short-sighted people who don't live in reality. We have don't sacrifice the entire state for short-term profits.	1		No				Yes	Yes		Yes	8/27/2026
Camila	Alcaus	I OPPOSE THE AIR PERMIT AND URGE THE NM ENVIRONMENTAL DEPARTMENT TO DENY THE AIR PERMIT FOR PROJECT JUPITER. THE PEOPLE NEED THE AIR, NOT AI. THE PEOPLE NEED THE WATER, NOT AI. DENY THE AIR PERMIT. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.	1		No		Yes	Yes		Yes			8/27/2026
Ariel	Yoder	Please stop this project. How can this much pollution be acceptable? Make them use solar panels or windmills to power this terrible thing. They should never be allowed to produce this much pollution. How is their greed more important than the quality of the lives of the citizens of New Mexico? Would you mind living close to this pollution? Please consider the environment and the lives of ordinary people in this state. We don't want this.	1		No								
Scott	Fellman	These data centers are not widely supported by the public and needs more time for public comment and debate. Approval of the permit should be denied and a longer comment period should be allowed.	1		No				Yes				8/27/2026
Margaret	Neely	The permit project Jupiter is seeking needs to be denied. Air equality will be destroyed, and it will affect New Mexico as a whole. The amount of heat this data center will generate will also affect the air. This project is endangering plants, animals, and humans. We need clean air and water, and this data center will take away both. Imagine the stupidity of not knowing how important clean air is. They don't care about us. YOU have to. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'noncompliance' zone Which means the air quality does not meet federal government rules. Do the right thing	1		No						Yes		8/27/2026
Taryn	Kaminsky	My name is Taryn Kaminsky. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I live in the community and have a small child, there are many reasons this project is putting risk for the future of this land and our children. There are schools as well as a daycare within miles from the site and this project has the potential to cause detrimental damage to their environment and air quality. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Taryn Kaminsky	1		No		Yes	Yes		Yes			8/27/2026
Rachael	Abq	This permit is no safer for our communities than the prior. Changing technologies does not change the undesirable and catastrophic risks to our local communities, water supply, and air quality. This would cause green house gas emissions to be larger than or 2nd giant NM cities combined. There is no sustainable version of Project Jupiter or reduction for New Mexico, regardless of how developers power it. There is no room for data centers in a healthy and thriving New Mexico. Additionally, Bloom Energy should be denied the air quality permit application given their history of illegally dumping hazardous waste and materials.	1		No			Yes	Yes		Yes		8/27/2026
								Yes	Yes	Yes			8/27/2026

Rachel	Armijo	I am a resident of Las Cruces and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want future generations to live here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. New Mexico is not for sale to tech billionaires who look at our state as something to exploit and our populace as a barrier to wealth. I strongly urge the Department to reject the new proposal from the developers of project Jupiter. The impact of AI data centers on the environment and community health is not known. We must build a sustainable future for our beautiful state and protect the natural resources that make New Mexico special. Bloom Energy has a history of illegally dumping hazardous waste! I request 60 additional days for the public to review the permit. If the permit is not denied a public hearing must be held in Santa Teresa with an option to attend virtually.	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes		8/17/2026
Sarah	Silva	There is no reason for this data center to be build it takes up to much of the very little resources we have in our state alone. The quality of life in this town will be affected tremendously from our natural resources such as our clean drinking water, electricity, money, ect. This data center will effect everyone and anyone living here no matter location of residence, class level, or any other factors. It may seem innovative but we are not thinking of the lives and future of our friends and family. Do not let your actions and character be driven by the promises of money in the future. Human beings as a whole cannot drink money, we can not eat money. We will have nothing left to provide for basic survival for not only ourselves but our children as well. We as people are not only losing our resources but we are also loosing our knowledge by using Ai and other engines to do our work for us. We people are the future and we need to retain and learn as much knowledge as we can to pass down generations to live. With technology becoming as powerful as it is we as people are losing basic skills to cook, build, sew, create, because we rely on technology and money for ourselves. We the people in our community are strong and if you care about your family, your home, and your future you will not support Project Jupiter or any other data centers that may be proposed to in the future.	1	Merged Document	No	[redacted]			Yes		Yes	Yes				8/17/2026
Anonymous	Anonymous	This project will hurt the health of residents in the city. This does not benefit the people whatsoever. The air quality is already not great, therefore will continue to decline when project Jupiter proceeds.	1	Merged Document	No	[redacted]				Yes	Yes					8/17/2026
Maude	Dinan	I am a resident of Mesilla, and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I want to continue living in my home here knowing I have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would destroy my quality of life. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. We cannot endure, no afford (electrical bills are high enough), more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. I am in my early thirties, and stats like this completely me dissuade me and my friends from considering starting families here. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Thank you for your time today. Please look within yourself and do the job we believe in you to do.	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes		8/17/2026
Jenna	Maldonado	Say no to project Jupiters revised air plan. We don't need an AI center. It will still cause Lasting environmental impacts on the community. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	1	Merged Document	No	[redacted]				Yes	Yes		Yes			8/17/2026
Shenekah	Telles	I strongly oppose Project Jupiter! The resources in a desert are precious and a data center would completely disrupt the delicate balance of life here. We are pleading with you to choose the people of this great state over profit. Do the right thing!	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive								8/17/2026
Alex	Gonzales	New Mexico is already in a delicate state due to ongoing drought and rising temperatures. We can not afford the potential or projected environmental impacts a data center will have on our communities, our environment and our land. A data center is an ecological disaster in the making. As a lifelong New Mexican I oppose any data center constructed in our already water deprived state and demand that the permit is denied.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Marlene	Chavez	I support the mission of the New Mexico Environment Department "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." I also support the Air Quality Bureau's responsibility to "protect the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." For these reasons, I urge NMED to deny the air quality permit for the proposed AI/data center project. Bloom Energy has a documented history of illegally dumping hazardous waste, and that history raises serious concerns about whether this project can be operated in a manner that protects public health and the environment. At a minimum, the public should be given an additional 60 days to review and comment on the permit application so community members can participate equitably. If the permit is not denied, NMED must hold a public hearing in Santa Teresa, conducted in both English and Spanish, with a virtual participation option so all affected residents have meaningful access to the process. Approving this permit would amount to government-sponsored environmental racism. Residents of Doña Ana County are already disproportionately burdened by environmental pollution, and for years the county has been classified as a "non attainment" area, meaning our air quality does not meet federal standards. Adding another major source of emissions would further harm a community that is already struggling with poor air quality. NMED's mission is to protect present and future generations, not to allow additional pollution in a community that has already borne more than its fair share. I respectfully request that the permit be denied.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes		8/17/2026
Anonyous	Anonymous	We have no water in the Rio Grande. Common sense is going to tell these people that this is not a good idea, but obviously these people don't have common sense. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes		8/17/2026
Sydney	A	We don't want data centers in New Mexico! We are already experiencing water shortages and don't need anything to do with this! The community needs more time and resources to fully understand the implications of what it would mean to implement Project Jupiter. I am confident that if this decision was put in the hands of community members who were well-educated in this subject, Project Jupiter would absolutely be rejected.	1	Merged Document	No	[redacted]			Yes							8/17/2026
Marcela	Mendoza	I am a New Mexico resident who is deeply concerned about Project Jupiter and its potential impacts on our health, air quality, and limited water resources. New Mexico is already facing significant challenges in these areas, and we must protect our natural resources for current and future generations.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Jacob	Stimmel-Chavez	Can the developers and governments promise the people of NM that this project will not effect the flavor and abundance of our cherished Hatch Chile? If the Chile is gone, you cannot eat money.	1	Merged Document	No	[redacted]	Yes								Yes	8/17/2026
Caroline	Graham	As a New Mexico resident I am writing to urge the NMED to deny fuel cell air quality permit submitted for Project Jupiter. Approving this permit would be disastrous for our state's current and future residents and environment, unaligned with the Air Quality Bureau's mission to protect the "public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." The proposed fuel cell plant lacks pollution controls for construction at an unseen scale by a company that has a proven record of illegally dumping hazardous waste. Doña Ana County is already suffering environmental degradation and poor air quality, and approval of this fuel plant will only increase both short and long-term health risks to a community already disproportionally impacted by pollution. I urge the Air Quality Bureau to reject this application. If the permit is not rejected, I urge the NMED to extend the public review period and hold an accessible, bilingual public hearing so that impacted community members' voices may be heard. This project is a blatant threat to our environment and will have an outsized negative impact on the health and prosperity of current and future generations of New Mexicans. Thank you for your time.	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes		8/17/2026
Anonymous	Anonymous	As someone who lives in Santa Teresa, I would like my voice to heard as i have stood against project jupiter in the past and will continue to do so. As my community was not given adequate time to understand and review what exactly project jupiter is. Not only this but my community has been fighting for clean and safe drinking water since I was a kid only. Now clean water is being used as a leverage so that we support this project. A project mind you that will most likely make the water worse. And now they also want up to put are air quality at risk to. No, my community deserves better.	1	Merged Document	No	[redacted]			Yes	Yes						8/17/2026
Duke	Heathet	I oppose the air quality permit for Project Jupiter because the proposed fuel cell-powered data center would still rely on fossil gas and produce substantial air pollution and greenhouse gas emissions in a region that already struggles with poor air quality. Although the applicant states that fuel cells are cleaner than the original gas turbine proposal, they would still emit millions of tons of greenhouse gases annually along with nitrogen oxides and other pollutants that contribute to ozone formation and respiratory health risks. Southern Doña Ana County and neighboring communities already experience cumulative pollution burdens, and approving another major fossil fuel-powered industrial facility would further degrade air quality and disproportionately impact nearby residents. New Mexico should prioritize truly clean renewable energy solutions rather than locking our communities into decades of additional fossil fuel dependence. The Air Quality Bureau should deny this permit to protect public health, improve regional air quality, and support the state's long-term climate and environmental goals.	1	Merged Document	No	[redacted]				Yes	Yes	Yes				8/17/2026
Hunter	Hastings	Dear NMED staff, My name is Hunter Hastings. I am a New Mexico resident, living in Farmington, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have lived in Farmington for my entire life and it is very noticeable that human activities are greatly affecting the environment. The Animas River is almost completely dried up which means there is less available water for us to use to live. There are numerous amount of fires that are causing poor air quality, and people and animals to lose their homes and lives. We are already facing the threatening impacts of the nuclear project that is being built in the Colorado basin, and the data centers that are being built across Colorado and in other nearby states, which will make these problems worse. We cannot allow for any more of these projects to claim the valuable resources that are already dangerously scarce, and further create an uninhabitable environment. Surely the communities and the land we call home are more important than corporations trying to increase their profits with no regard to how those who live here will be impacted.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Anon	Anon	The facts we do know about this proposed plant point to a totally unacceptable level of pollution. The environment cannot sustain this. That is a fact. People who have been subjected to these data centers elsewhere have said the only local jobs created are the construction. These corporations will find a way not to pay any taxes or invest in the community. Look at their actual history. The Ai is not for us. It's to power software for big corporations to sell datamining. Ask why they aren't building in their communities. Or why more affluent communities are saying no. We don't have to be human guinea pigs.	1	Merged Document	No	[redacted]					Yes					8/17/2026
anonymous	anonymous	Everyone is against a data center bro don't even bother putting one. You haven't given people time to register and comment on the matter, you're forcefully pushing this onto people KNOWING this will make everyone's lives harder. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]					Yes			Yes		8/17/2026
Janette	Meacham	I am a resident of Albuquerque, Bernalillo county, and I am asking that you deny Yucca Growth Infrastructure's permit request. There are multiple reasons why this project is wrong for New Mexico, primary among them are air pollution, unaffordable water use and lack of a disposal plan for the waste this facility will generate. My understanding is that this facility will generate air pollutants in excess of what is tolerable for the local residents. I stand with the communities whose families would be negatively impacted and ask that you reject this permit application. We live in the arid Southwest where water is a rare and invaluable resource. We are in a constant struggle to provide enough water for our communities and farmers, with the shortage growing larger with each year of global warming. We cannot afford to divert this precious resource to a data center here in the desert. The issue of disposal of waste generated by this project is another primary issue of concern. My understanding is that Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. They cannot be trusted to suddenly do the right thing on this project. Until there is a documented solution for storing the waste generated, this organization should not be granted the permit to move forward with this project. Thank you for considering this urgent request.	1	Merged Document	No	[redacted]			Yes		Yes		Yes			8/17/2026
Anthony	Anderson	Project Jupiter is going to do more harm than good. We do not have enough water to sustain this and it will take away resources from valuable communities and people who deserve clean drinking water. This will also produce so much waste that we won't want to clean up, and it'll cause more problems for the earth that aren't so easily reversed. Please, take our environment into account. The public deserves 60 days extra to review and possibly deny the air quality permit due to Bloom Energy's history of dumping hazardous waste illegally.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes		8/17/2026
Anonymous	Anonymous	Rio Grande WILL dry up before summer even begins. I DO NOT TRUST building the largest data center in the WORLD wouldn't threaten the limited water our communities depend on to survive. THIS IS A CLIMATE CRISIS! Project Jupiter's fuel cells will also release 10 million tons of carbon dioxide into our air. Essentially polluting us! This is our chance to stop it! A public hearing needs to be held in Santa Teresa in both English and Spanish and an option to attend virtually. The public should also be given 60 days to investigate Project Jupiter and comment on the air quality permit. This is government-sponsored environmental racism for the people living in Doña Ana County as if they weren't already being impacted by environmental pollution.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes		Yes		8/17/2026
Abrianna	Chatman	Project Jupiter is a direct attack to New Mexico's limited resources. With a lack of recourses already in the desert, such as the water planning to be used, air quality will decrease to an even lower number. New mexico faces severe drought as of today and no proposed 'changes in technology' will make this data center better. Unanswered questions about the amount of water this project will use is a clear sign that this project is not sustainable or safe for the people. due to all of these known issues about this project the public needs to be given an additional 60 days to decide whether construction should continue or whether the project should be stopped completely	1	Merged Document	No	[redacted]			Yes	Yes				Yes		8/17/2026
Silas	Eggleton	Project Jupiter will do more harm than good for our community. Community is something we take seriously here in New Mexico, and we use our natural resources to better that community. Project Jupiter would strip many of those much needed resources away from us which will lead to further climate disruption and damage us at a personal level. This is a widely fought against project, one that I will also fight against for the betterment of the community of Albuquerque and the state of New Mexico. No to protect Jupiter.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive								8/17/2026
gaby	mendivil	We do not need more data centers. Data centers use up so much water while the U.S is going into more water shortages. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Anon	Anon	Dear NMED staff, My name is anonymous. I am a New Mexico resident, living in Jemez , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Why I am concerned about this project is because I am from one of the many Native communities among New Mexico, my people and mostly all of the other Native communities use water to plant, farm, drink , and to do traditional ceremonies with the water. I know that data centers take millions if not billions of water that's surrounding them. We already don't have enough water to supply to the data centers, since we are living in a desert. Also to mention the stuff that will be going into the air, that is literally not okay and you all should know that but your all to busy being selfish of your selfs knowing it won't affect you all since you only care about the profit and money, not the people who have been here far longer than you all have, and I'm talking about the natives since we have been here far longer, we've all fought many times to keep our land, water, and people. Now you all are trying to take away all we've have fought for, it honestly isn't fair since we have been here far more than you have all been. It also is so crazy to me that this 165 billion dollar data base shouldn't even exist in the first place. The 165 billion dollars could go to climate change, air pollution, oil spills in the ocean, litter in the oceans, and could help eco companies plant plants to help the oxygen in the atmosphere, but yet you all are so selfish and ignorant to only think about the profits and the money, grow up its not just our plant it's yours too, take care of it. In the first place we didn't even need AI we were just as fine without it, we've lived thousands of years without AI and now......AI is like the most important thing in the world, when in reality it's not, there are many other things in the world that are way important than building AI data bases, for example helping climate change and helping animals from extinction, since before natives came, animals were here first. With 165 billions of dollars could help the planet recover from climate change, the oceans, plants, and animals. You all need to open your eyes and look around at the world, animals, the people. When the world has been destroyed with its plants, oceans, air, and waters, all destroyed, you will all understand that you cannot eat money. Money will be worthless when every thing is gone. Wake up. Help Mother Earth. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anonymous	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes		Yes		8/17/2026
Jonathan	gonzalez	We cannot sustain water-intensive data centers in a region facing severe drought and a dry Rio Grande. This threatens our ecological stability and local water supply.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Anne	Clark	I would like ask for the rejection of Project Jupiter. I, my family, friends, and the majority of the residents of our beautiful state do not want our land, our homes, and our wildlife to be destroyed in order to line the pockets of billionaires, corporations, and tech giants. AI is not even close to worth the cost of our already very limited resources. We do not want or need more data centers. We want, need, and deserve clean air. We want, need, and deserve clean water. We want, need, and deserve the peace of existing without the hum of technology in our open pastures. We, as well as our beautiful wildlife, water sources, and plants need this land to survive. We cannot live, work, and thrive in an environment filled with noise pollution, water pollution, and air pollution. I implore you to put the wellbeing of the residents of New Mexico before the wellbeing of billionaires' bank accounts. Please do better and be better, and stop this project now. We all deserve better. Thank you.	1	Merged Document	No	[redacted]			Yes		Yes	Yes				8/17/2026
Macyn	Taylor	I am from Marion and I am asking that this project be denied. This project will produce too much toxic waste and harmful gases into the atmosphere. These gases could trap heat and hurt the environment and influence global warming. People will continue to suffer due to extreme heat. Besides just insane temperatures, the air quality will heavily decrease. We already have very poor air quality and this project will further lower the safety. This project will not just affect humans, but every plant and animal species across the globe. So I would like to ask that this project does not go through	1	Merged Document	No	[redacted]				Yes	Yes					8/17/2026
Shaun	Sanchez	No Data Centers in NM. Rural does not mean abandoned or useless, New Mexicos beauty comes from the least industrialization. Our mountains, sky, land, and air will not look and/or be the same when the WASTE generated from the Data Centers. Where are they going to get the water to cool the largest data center? In a state that's in a drought every 3 years. No matter what generates the power. Turbines, solar, nuclear, gas, or wind. It still produces waste! Yes wind and solar are the least. That should not DISMISS the fact it's harmful. No need to specify who or what it's harmful to because it's harmful to everyone and everything. Then down the road we're going to be faced the impacts from the data. WE the people that live here and call this beautiful state home. NO DATA CENTERS IN NM!	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Gabrielle	Jackson	Dear NMED, My name is Gabrielle Jackson, I also go by Onsé. I am a New Mexico resident, living in the Far Northeast Heights district of Albuquerque, and I am writing because I am concerned about the environmental risks and harms Project Jupiter poses to New Mexicans, as well as the dire climate-related risks this massive data center poses to our precious and already water-burdened desert ecosystem. Our river has already RUN DRY! We are running off groundwater and it's NOT ENOUGH as is! What will happen to our state if people stop coming here because there is no water? THE FARMERS CAN'T GROW CROPS WITH DATA! WE CANNOT DRINK DATA! We risk PLUMMETING our state into catastrophic climate consequences and economic loss if this moves forward when we are already a poor state! I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I have been pestered going about my business by Project Jupiter canvassers and I don't believe New Mexicans should be harassed and manipulated to be for this ai data center. Our precious state deserves better than this! Invest in the ARTS, not DATA CENTERS! The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants! This technology generates toxic waste, and the process for handling this waste is a COMPLETE SHAM. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development causing COPD and asthma. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, ONSÉ	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes		Yes		8/17/2026
Estefani	Ortega	We the people of New Mexico do not want our air quality destroyed by an AI data center. Let alone the environment and ecosystems surrounding the area to be destroyed by the construction of the data center. We are also a state with limited water resources that would inevitably be depleted by the construction and retention of an AI data center. We are living in a world where climate change is drastically effecting the entire planet and construction of data centers in any US community will only negatively contribute to irreversible effects of climate change. In now way does the state of New Mexico truly benefit from the construction of this data center. We do not want our limited resources and environment to become polluted by this data center.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Anonymous	Anonymous	I don't even live in the USA and I know that this isn't right. The amount of energy and water this project will consume is massive and we don't even need more data centers that will ruin this planet we live on. I'm from Europe and the climate jump from last year to this year is so insane our electricity keeps blacking out. Not to mention how many people ended up in hospital and how many even died of the insane storm that this heat will bring. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. It's so sad to see that people are willing to ruin our planet for profit and nothing more. I'm tired of Americans proving that us (people who live in Europe) are smarter about this.. And so I ask you, stop this. Stop this before the global warming is irreversible. Once this planet is ruined, there is no second planet. No second chance to make this right because this is our chance there's not even 3 years until we can't do anything. The earth can be a nice place if we let it. So let it. Stop ruining the nature for money, because in the end the stuff if you can no longer gain stuff from the nature, such as air and food, you'll realize that money is useless. And I pray to God you all realize this sooner than later. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Listen to your people and not only them. Listen to all of us, Americans, Asians, Europeans.. Everyone. We do not need more AI data centers.	1	Merged Document	No	[redacted]			Yes	Yes		Yes	Yes	Yes		8/17/2026
Grette	Lare	My name is Grette Lare. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. It is clear that Project Jupiter was not proposed with the needs of New Mexico residents in mind. It only concerns the needs of tech billionaires who see our state as nothing more than a tool for money making. If Project Jupiter is approved the quality of life will decrease drastically for thousands of New Mexico residents. Me and my fellow New Mexicans are speaking up out of genuine concern. We want New Mexico to be liveable for future generations. We ask that you put the needs of the people before profit. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Grette Lare	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes		8/17/2026
Kristen	Dolgos	Our environment needs our support. Project Jupiter would consume huge volumes of water. We already don't have enough. This project jeopardizes us all.	1	Merged Document	No	[redacted]			Yes		Yes					8/17/2026
Renée	Dean	Hard NO to Project Jupiter and any data center in New Mexico! Private equity and data centers are only here to take from us, including our water, energy, air quality, land, quality of life and money. These companies take and do not give back…any initial investment is only a pay off to open the door to take and take and take from us all. Any promises of jobs and community investment is basically a lie. New Mexicans know this and so NO!!!!! I will never support and organization or politician who sells us out to private equity and tech oligarchs.	2	Merged Document	Yes	[redacted]			Yes	Yes						8/17/2026
Anna	Moro	New Mexico does not need or want another data center. We do not have the water resources to support it. Our air quality cannot withstand it. Preserve the unique cultural and environmental heritage of New Mexico and stop the building of Project Jupiter. Thank you.	1	Merged Document	No	[redacted]			Yes	Yes	Yes					8/17/2026
Linley	Green	I am writing to encourage the Air Quality Bureau to deny Yucca Growth Infrastructure LLC's air quality permit application for a methane gas-powered fuel cell plant as part of Project Jupiter. This fuel cell gas plant will release hazardous chemical pollutants and over 10 million tons of carbon dioxide into the air of southern New Mexico, where the air quality already fails to meet federal standards. Southern New Mexico has been used as a sacrifice zone by the military and energy companies for far too long, and the people there deserve better. Bloom Energy has a history of illegal dumping and has already exhibited disingenuous behavior when they submitted their first air quality permit applications and attempted to subvert air pollution limits by breaking their project into two microgrids. They cannot be trusted to properly manage the waste and pollutants that will be generated by this project. As I'm sure you know, Project Jupiter will generate more CO2 emissions than both of New Mexico's current power grids combined. If NMED approves this permit and allows this project to move forward, this will be a huge step backwards for New Mexico when it comes to reducing emissions and tackling climate change. We are already seeing the effects of climate change here in our state and allowing an outside company to come in and pump an insane amount of emissions into our air is unconscionable. Lastly, this project will not benefit the community or the State and is not worth any of the environmental tradeoffs. We do not want data centers built here, especially ones that only benefit Big Tech oligarchs like Oracle and OpenAI. As a lifelong New Mexican, I believe that our land, water, and air are our most precious resources and I do not want to see them wasted and polluted for the benefit of a few. Thank you.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes			8/17/2026
Yasmine	Jahangiri	I am a resident of Las Cruces and I am asking that you deny Yucca Growth Infrastructure's air quality permit. As the NMED it is your job to protect and restore our environment. Allowing an experimental data center to be built by a company who is known to illegally dumb hazardous waste at an unprecedented level goes directly against your mission. I ask that you extend the public comments period to 60 days and allow the public to further review the proposed permit	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes		8/17/2026
Abigale	Philipps	do not do project jupiter, this is very dangerous and it scares people. this will limit our water and release millions of carbon into the air, which will boost global warming	1	Merged Document	No	[redacted]			Yes							8/17/2026
Gavin	N/A	Dear NMED staff, My name is Gavin. I am a New Mexico resident, living in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. Accepting this air permit application is a violation and a mockery of NMED's stated mission "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations", and violates NMED's Air Quality Bureau's mission to "protect the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." Accepting this application would be a direct contradiction to the stated goals of this Department. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Gavin	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes		8/17/2026

Anton	Burgard	I truly think that the impact on the climate need to be heavily studied and evaluated. We need to keep this world alive so others can experience the joys of life	1	Merged Document	No	[redacted]	Yes			Yes					8/17/2026
Shylah	Chambers	Project Jupiter should not go on because it's gonna be the biggest thing to change climate change and they are not seeing that building this data center is gonna take up. Most of our water is going to harm animals and plants and the Earth in general and it should not proceed and with them saying that it's not gonna harm anything clearly that's a lie.	1	Merged Document	No	[redacted]		Yes		Yes					8/17/2026
Marley	Patcher	We cannot risk the condition of earth to be anything but flourishing. Nothing less. Stop building this data center. The cons outweigh the pros. On top of that, the public should get an additional 60 days to review and comment on the air quality permit so everyone can participate. The air quality is also a huge concern. The hazardous waste they dump? It's terrible. The air quality application should be denied, and if it isn't, a public meeting needs to be held at Santa Teresa. Enough is enough. The people say no!!	1	Merged Document	No	[redacted]			Yes				Yes	Yes	8/17/2026
Malea	Aleck	Though approximations of annual air pollution were provided, the testing used an extremely weak methodology leaving us, ultimately, with pseudoscientific guesses that have large margins of error. Estimated pollution levels for this gas-powered fuel cell plant are based on only three 4-hour pollution tests from a very small unit (only 65 kW). This is a far cry from thousands of sweltering fuel cells operating 24/7 at maximum output in close proximity, all in the scorching heat of our open desert. The lack of rigorous testing at even this small of a scale is lazy and very concerning, especially given that the gas power plant Yucca Growth Infrastructure wants to build is 37,000 times bigger than this unit.	1	Merged Document	No	[redacted]				Yes		Yes			8/17/2026
Michaela	Dolly	I grew up in Las Cruces, NM (Doña Ana county) and now live in Albuquerque. Please deny the air quality permit to Project Jupiter and otherwise disallow this project to continue despite the "riches" they entice our community with that they will provide jobs and economic boost. These are empty promises. In reality, this project serves to support replacing humans and human thought with machines. The threats their massive data center poses to our air, water, soil, environment, noise level, climate, and society are deeply concerning and need to be more thoughtfully considered. We live in a scarce and delicate ecosystem that already faces so many challenges and threats simultaneously. This data center is not human-centered, it is tech- and big profit-centered and provides no profound or meaningful invention as to how we can move toward an eco-friendly future with sufficient water, clean air, and fresh food for our community. This is disappointing considering better technology exists to sustain our future, yet they don't care to pursue it for interest in profit above all. Please uphold NMED's commitment to New Mexico and consider the wellbeing of your neighbors, farmers, teachers, healthcare workers, firefighters, and many more whose families have inhabited these lands for generations and want to see this land thrive, not fall victim to corporate buy outs that seek to push us and our beautiful wildlife out of our unique and stunning southwestern paradise. Please allow an additional 60 days for the public to review and comment and please seek to disregard bot-generated or otherwise falsified comments. Please provide a public hearing in Santa Theresa in English and Spanish with a virtual option if the permit is not denied. Thank you.	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes		Yes	8/17/2026
Olivia	Wischmeyer	it is ridiculous that we should have to fight against something that is obviously terrible for our community and ecosystem! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably! The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste! If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. do something to change the future rather than bend to the will of billionaires who wish to kill us all!	1	Merged Document	No	[redacted]			Yes	Yes			Yes	Yes	8/17/2026
Decllan	Cunningham	We Will All Die. There is really no way of getting behind this ignorance to pollution. I am a resident of the United States of America and I am asking that you deny Yucca Growth Infrastructure's air quality permit. We as people need clean water to survive and this new data center just like the others will not only pollute the sound in the air, but also water. We need water. Humans and animal all need it. Water is like the tracks under a train to us! We quite literally require it to live. We only get one planet, so why are we destroying it? It's terrifying to think something like this could ever even be considered. Please deny the yucca growth infrastructure air quality permit. Your life depends on it.	1	Merged Document	No	[redacted]		Yes	Yes	Yes					8/17/2026
Zachary	Angell	I would like to see this air quality permit for Oracle/OpenAI rejected by the Air Quality Bureau. This project, if given permission will affect the lives of all New Mexicans adversely for decades to come. The air pollution will spread beyond the immediate area and will affect not only people but flora and fauna in the immediate and surrounding areas. Not to mention the water usage that a facility like this will place on the water table for our state which is already a desert. The Rio Grande is already running dry so early in the year from the metro areas south and we do not need more draw on the aquifers anywhere in the state. We all love this state and would not like to see it ravaged so that a billionaire and his AI venture can provide pennies to remove necessary natural resources.	1	Merged Document	No	[redacted]		Yes	Yes	Yes					8/17/2026
Alheli	Caton-Garcia	To: The New Mexico Environment Department Air Quality Board From: Alheli Caton-Garcia As a young New Mexican I am deeply concerned and disturbed about Project Jupiter's construction, power sources and lack of transparency within the community. New Mexico is a place with a long history of environmental injustices - Oracle and OpenAI's Project Jupiter has come into our home, where many of our relatives are non-english speakers, or english as a second language learners. Dona Ana county is a low-income community with a history of being overburdened environmentally. I am disturbed by the potential environmental impacts of fuel cell technology on our air quality. As well as, water consumption, and the impact on public health. I am even more disturbed by the unethical ad campaigns that have been launched, as well as the illegitimate canvassing campaigns. We must show OpenAI and Oracle that New Mexico is not for sale. That our desert is not a wasteland. It is our home, and it is your home too. Project Jupiter (OpenAI, Oracle, YGI) have been so incredibly shady it is hard to believe we even have to speak up to this - their corruption is so obvious it stinks. Your mission? To "protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations"...In order to do that Project Jupiter must be shut down. There must be Hyperscale Data Center moratoriums. This tech is too new to understand the lifelong impacts of these structures and their power sources. I ask that NMED deny the application from Yucca Growth Infrastructure. Should you choose to not reject their application the people will demand that hearings between the public, YGI and NMED be held in Santa Teresa with translators available for spanish speakers. We will settle for nothing less.	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes		Yes	8/17/2026
Madeline	Brown	I am a resident of Sandoval county and ask the Air Quality Bureau of NMED to deny Yucca Growth Infrastructure's air quality permit. I believe it is in the best interest of New Mexicans and future New Mexicans to deny this permit and protect our air and land. Bloom Energy's has a history of illegal dumping of hazardous waste; cancer causing chemicals, heavy metals and toxic compounds. Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air. Please protect our state and deny this permit. Thank you.	1	Merged Document	No	[redacted]			Yes	Yes		Yes	Yes		8/17/2026
Anonymous	Anonymous	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilment of the authority vested in you.	1	Merged Document	No	[redacted]		Yes	Yes	Yes					8/17/2026
Phoebe	Guskey	This is absolutely unacceptable. The water usage, the power usage the pollution all of it. And for what? So the whole facility can be outdated and useless in a few years? Our breathable air and drinkable water are not worth 200 temporary jobs so that some out of state billionaire can further line their pockets. If project Jupiter wants a data center so badly let them build it in their own backyards not in ours. We are in a climate crisis and are already struggling to find enough water to support the human beings that live here. We cannot waste water for cooling data centers nor should we use noxious gas to power them. This process has been incredibly rushed and shady. The public needs additional days to comment and more in person multilingual opportunities to comment. We cannot sacrifice the health and the lives of our children for a project of so little benefit to our community.	1	Merged Document	No	[redacted]		Yes		Yes					8/17/2026
Anon	Rodriguez	Having a data center in an area that already had poor air quality will endanger not just the animal and plant life but as well human life, as a person who had similar symptoms to asthma it can cause me to suffocate me and can affect others and even employers, as our desert is dying this is going to make it worse, and among the public if this permit is given and planet Jupiter is successfully made, this will send a message to new Mexican citizens that the government does not care about the well being of their citizens, this is practical murder, so I plead do not allow this corporation kill us.	1	Merged Document	No	[redacted]			Yes	Yes					8/17/2026
Khya	German	I oppose Project Jupiter because projects of this scale should not move forward without clear transparency, public accountability, and meaningful oversight. When major decisions are made behind closed doors or without adequate public input, they can erode trust and create unintended consequences that affect communities for years. Innovation is important, but it should never come at the expense of privacy, fairness, safety, or democratic participation. Before expanding or implementing Project Jupiter, those responsible should clearly explain its goals, risks, costs, and long-term impacts, and they should be willing to adjust or stop the project if those concerns cannot be addressed. Progress should benefit people, not require blind trust. Any project with significant social, technological, or economic consequences deserves careful scrutiny rather than automatic approval.	1	Merged Document	No	[redacted]	Yes			Yes				Yes	8/17/2026
Anonymous	Anonymous	We don't need another data center. We need better infrastructure that support the ecosystem, and the limited water we have left. Building the is only ruins this ecosystem more and kills thousands of animals for a billion can have more money. Stop project Jupiter and focus on better info the life's of your citizens and community.	1	Merged Document	No	[redacted]		Yes		Yes					8/17/2026
Autumn	Todd	While I live in Albuquerque and have been a resident since 2006 I have grown to love New Mexico. It is my home. I have made it my home because of its unique landscape and environment that drew me here. I am asking that you deny Yucca Growth Infrastructure's air quality permit. I want to continue seeing my godchildren, nieces, and nephew growing here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How are we supposed to send our children to schools knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. The residents of New Mexico are not to be experimented on. There is nothing beneficial to our state or communities by the toxicity this will cause to our environment. This is not our way. Deny the air quality permit. The public should be given more time to review and comment on the air quality permit in order to evaluate the impacts to their communities and families. Given prior history Bloom Energy has already proven itself to be unreliable, untrustworthy, and irresponsible considering their history of illegal dumping of hazardous waste. Unacceptable in our own communities. People live here, for the love of God. Families send children to school here. Our environment is impacted and the people that live and work in the high desert deserve to have clean and healthy lives and air!! Assuming the permit is not denied a public hearing MUST be held in Santa Teresa (in English, Spanish, in person, and virtually)!! The approval of this air quality permit is akin to governmental approved racism!! Considering that Dona Ana County residents are already negatively impacted by poor air quality.	1	Merged Document	No	[redacted]			Yes	Yes		Yes	Yes	Yes	8/17/2026
Christopher	Baca	I do not believe this is a sustainable development for the peoples or environment of southern New Mexico. New Mexicans cannot afford to sacrifice any water, air, or other natural resources for ai. Furthermore, project Jupiter needs to rehab the land that they have been preparing for this ai installment. Look at examples of what ai data centers are doing to communities where they are already in operation. The communities are being devastated. New Mexico must take action to protect the health of its residents and more importantly the environment.	1	Merged Document	No	[redacted]		Yes		Yes					8/17/2026
Sharyn	Slisher	Even though the technology powering Project Jupiter is to be changed, that does not alter the risks. The land Project Jupiter has already begun construction on has trouble producing decent air quality. This project will only cause more harm to the land and communities. Project Jupiter has already been shown to produce more greenhouse gases, further ruin the little air quality the land already has, and generate tons of hazardous waste. New Mexico communities have already done the math and research and know the numbers connected to these risks will be tremendously higher than the three largest cities in New Mexico combined. Furthermore, I, a citizen of New Mexico is in full agreement with my community that the air quality permit should be denied, especially since Bloom Energy's history of illegal dumping of hazardous waste, and if not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. I also request that the public is given an additional sixty days to review and comment on the air quality permit, so community members can participate equitably.	1	Merged Document	No	[redacted]			Yes				Yes	Yes	8/17/2026
Paola Fernanda	Guerra Martinez	I am writing to express my strong opposition to Project Jupiter and respectfully urge the New Mexico Environment Department to thoroughly evaluate the environmental consequences of this proposal before issuing any permits or approvals. New Mexico is one of the most water-stressed states in the nation. We have endured years of drought, declining groundwater supplies, increasing temperatures, and growing competition for limited water resources. In a state where residents are constantly encouraged to conserve water, it is difficult to justify approving a project that could require millions of gallons of water annually to cool servers. Water is not an unlimited resource in New Mexico, and every large industrial user places additional strain on our communities, agriculture, wildlife, and future generations. Data centers are often promoted as clean because they do not produce visible smokestacks or heavy manufacturing waste. However, they carry a significant environmental footprint. These facilities require enormous amounts of electricity to operate around the clock, placing additional demand on an already stressed electrical grid. Unless that energy comes entirely from new renewable sources, increased demand can result in greater reliance on fossil fuel generation, leading to higher greenhouse gas emissions and poorer air quality. The environmental impacts also extend beyond water and electricity. Construction of a project of this scale requires substantial land disturbance, the removal of vegetation, increased stormwater runoff, habitat fragmentation, and significant construction traffic. Once operational, additional roads, transmission infrastructure, and utility expansions may be required, creating long-term environmental impacts that deserve careful consideration. I am also concerned about the cumulative effects of approving large industrial developments without fully considering what future expansion may look like. If one data center is approved, it may encourage additional facilities to locate nearby, multiplying the demand on our limited water and energy resources. The Department should evaluate not only the immediate impacts of Project Jupiter but also the long-term cumulative impacts that could result from similar developments. While I recognize the importance of economic development and technological investment, those benefits should not outweigh the responsibility to protect New Mexico's natural resources. Economic growth should be sustainable and should not come at the expense of our water supply or environmental health. Any jobs created by the project should be weighed against the long-term costs borne by residents if groundwater levels decline, utility demands increase, or environmental degradation occurs. I respectfully request that the New Mexico Environment Department require a comprehensive environmental review that includes: A complete accounting of the project's anticipated annual water consumption. Identification of the water source and an analysis of potential impacts on local aquifers and existing water users. An assessment of projected energy demand and associated greenhouse gas emissions. Evaluation of impacts to wildlife habitat, vegetation, and nearby communities. Consideration of alternative cooling technologies that significantly reduce water consumption. A thorough analysis of cumulative environmental impacts if additional data centers are developed in the region. New Mexico's water is one of our most valuable and limited resources. Once depleted, it cannot easily be replaced. I urge the Department to place the long-term health of our environment and communities ahead of short-term economic interests and deny permits for Project Jupiter unless it can be clearly demonstrated that the project will not significantly impact our state's water resources or environmental quality.	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes			8/17/2026
Ariana	Bitsui	Dear NMED staff, My name is Ariana Bitsui. I am a New Mexico resident, living in Rio Rancho, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Our water resources are already severely depleted. I have lived here all my life and I am scared how this huge corporation will effect the environment and it's toxic pollutants to our air. New Mexico is a land that must be preserved and cherished not sold to a corporation that will do more harm than good for our land and future generations. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Ariana	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes		Yes	8/17/2026
Angela	Stevenson	Project Jupiter will only harm our communities with little to no benefit in turn. It is harmful to our water supply, air quality, and the communities that subsist on them. It is not sustainable and will not improve New Mexicans' lives in any way, shape, or form. In fact, it is to our detriment to allow this to be constructed in our state. We do not need an AI data processing center in Doña Ana County. The harm, including raised prices on our utilities and water scarcity in a region that hardly has enough water to support its population and agricultural needs, significantly outweighs any positive attributes the project will bring. For those of you who believe this is an economic opportunity, you need to re-evaluate. What will New Mexico's economy look like with no water in an agriculturally dependent region? This project is guaranteed to only bring destruction and chaos to our state.	1	Merged Document	No	[redacted]		Yes	Yes						8/17/2026
Alex	Coulson	I strongly oppose the building of the oracle and open ai data center in dona ana county. project jupiter threatens our water and air and has already destroyed large swaths of valuable land despite not being approved on all of there permitting. This area is already notorious for having below average air quality. Approving this data center will have irreveresable effects in the health of communities and surrounding eco systems. We need you to deny the air quality permit for the health and safety of our water, air, land, and people. DATA IS NOT MORE IMPORTANT THAN THE HEALTH AND WELLNESS OF THE COMMUNITIES WE LIVE IN! PERIOD None of this is even getting into the history this company has related to illigal dumping. This leads me to belive they will skort the laws even if they do get an approved permit. we have zero reason to trust that this project is toing to provide more benefit than harm.	1	Merged Document	No	[redacted]		Yes	Yes	Yes			Yes		8/17/2026
Kaya	Perce	Dear NMED Staff, I am writing to share my concerns about Project Jupiter and to urge NMED to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI microgrid in Doña Ana County. I am a new teacher and I care deeply for the health of our state's children. Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs, which may be produced as a result of this project. I am especially concerned that Santa Teresa is serving as the testing grounds for a technology that has not been deployed at this scale. As it stands, the project still stands to increase our state's emissions drastically, generating more more greenhouse gas pollution than New Mexico's three largest cities combined. These risks make it unconscionable for NMED to allow this project to proceed. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Thank you. Kaya Perce	1	Merged Document	No	[redacted]			Yes	Yes		Yes		Yes	8/17/2026
Aidan	Anonymous	This project is irrational, inhuman and unethical. Data centers are known to obscure the daily life of citizens: why now must you further that issue. Speaking up on the issue of climate change. Yeah, that's real. The United Kingdom faced nation wide heat increase. What is one of the roots of that change? Big AI corporations and Data centers being installed releasing carbon emissions and causing global distress. This project needs to be retracted or heavily restricted and directed to a smaller and less powerful center. Thus, avoids outrage it is already sparking and worsening the global issue.	1	Merged Document	No	[redacted]			Yes	Yes					8/17/2026
JD	Harding	These data centers keep getting built under our noses, proposing to make our lives better, or to bring jobs. In reality, all they do it take resources that we can never get back. In this case, our clean air will be polluted, and not for our benefit, and not because we want it. But for the benefit of billionaires to profit even more off of our natural resources. I am adamantly against this project. It will affect the air quality in a beautiful region that needs the clean air.	1	Merged Document	No	[redacted]			Yes						8/17/2026
Yvonne	Dresden	The data center will emit 10 million metric tons of carbon dioxide annually, more than the annual emissions of Albuquerque, Santa Fe, and Las Cruces combined. The energy provider behind the project, Bloom Energy has a history of illegally dumping hazardous waste The Bloom fuel cells operate between 800 and 1000 degrees and will contribute to heat island effect in the local Santa Teresa community, raising neighborhood temperatures by 3.6 degrees or more. Bloom fuel cells have never been used at this scale and will be hard for NMED to monitor as they degrade. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. I also value my clean drinking water for my loved ones, pets, and fellow New Mexicans.	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes	Yes		8/17/2026
anonymous	anonymous	The proposed design includes an individual exhaust stack for each of the facility's 2,275 fuel cells. According to the application, there are no pollution controls on these individual stacks, nor is continuous emissions monitoring proposed for each one. Given this design, it is unclear how the applicant intends to demonstrate continuous compliance with the emissions limits required under the Title V operating permit program. Has upstream methane fuel characterization been conducted, or will it be required, to establish the expected composition of emissions from these fuel cells? Without direct, continuous monitoring, how will NMED verify compliance, detect equipment degradation, or determine whether localized air quality impacts remain within allowable levels? Fuel cells can continue operating while catalyst performance deteriorates. Catalyst degradation can substantially increase carbon monoxide and volatile organic compound (VOC) emissions without interrupting electricity generation. If emissions are not continuously monitored, these increases could go undetected. To provide meaningful compliance assurance, emissions from the 2,275 individual exhaust stacks should be consolidated into a much smaller number of centralized exhaust systems equipped with Continuous Emissions Monitoring Systems (CEMS). As proposed, the monitoring approach does not appear to satisfy the requirement that permit conditions be "practically enforceable" under 20.2.70.302.B NMAC. The application also relies heavily on computer modeling and limited emissions testing rather than direct measurements from a facility operating at full commercial scale. Modeling is only as reliable as the data and assumptions used to develop it.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes			8/17/2026
David	Phillips	As a biology student studying in socorro new mexico, and a resident of new mexico for all the years of my life, it pains me to see our legislators, who i thought were headstrong, who at one point i respected, fold under the promise of a portion of a foreign billionaires net worth. It disgusts me that these developers are allowed to take control of our land, our water, and our energy, resources we have worked so hard to protect throughout our state's history, are simply forfeit when promised money. No matter the medium, no matter the technology used, there is no reduction of harm with project jupiter. I urge these legislators to read any portion of scientific text studying the environmental impact, if they have any care for our land and our people. And i urge them to read and use their critical thinking, as it should become clear the economic impact of letting this project come to fruition. Though given the past actions of our legislators in terms of allowing such projects, i doubt they'll even read my statements with any rational thought. I am appalled, and frankly disappointed. And so i urge, to redeem yourselves to the people, read up, now from unbiased sources, and understand that no matter the technology used to power the center, the center will cause devastation to the air, water, land, and power grid. No to this. I hope you can find it in your heart, and have some sense in your brain, to agree.	1	Merged Document	No	[redacted]		Yes		Yes					8/17/2026
Lauren	Lynne	The data centres that already exist are polluting the air, a cause of deforestation, and are huge disruptions to the environment. We in no way need any more of these unnecessary and damaging data centres. Do NOT damage our planet further and continue to build more of these! The impacts have already gone global, we are already experiencing heatwaves in Europe, summers of 40 degrees celsius in the United Kingdom, France, and the rest of europe is NOT NORMAL. Under no circumstances go through with project jupiter, it is a climate disaster waiting to happen.	1	Merged Document	No	[redacted]	Yes			Yes					8/17/2026
Miranda	Borowick	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. The pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. The Rio Grande is drying up. People are going to lose access to clean water. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Human lives and the health of our planet are worth more.	1	Merged Document	No	[redacted]		Yes	Yes	Yes					8/17/2026
Donald	Kurtz	It is very important that NMED protect the residents of Southern NM, West Texas and Northern Chihuahua from harmful emissions, including nitrogen oxides. First, in terms of process, there should be a public hearing on the Yucca permit, which is being requested for the largest energy infrastructure project in New Mexico history. If the process allows for a public hearing the question becomes: if not now for a full NMED public hearing on a state permit, when? Second, it concerns me that this plant is being built in, or very close to, an EPA-designated ozone non-attainment area. Ozone plays a significant role in residents developing asthma, especially children. A new outpouring of nitrogen oxides into an area that already struggles with ozone attainment would lead a significant increase in asthma attacks, more emergency room visits, and reduced lung function on high-ozone days, all of which would disproportionately affect children, older adults and people with existing respiratory disease. On a personal note, I have been hiking in Doña Ana County for almost fifty years. I have seen first hand the steadily worsening layer of smog that covers the southern New Mexico landscape on almost all days of the year. Our clear skies and beautiful landscape are a significant part of New Mexico's appeal for residents and visitors alike, and I'm concerned that Jupiter will continue the deepening degradation of this shared legacy. Please act diligently in the public interest in all areas where NMED has been given that statutory responsibility.	1	Merged Document	No	[redacted]			Yes	Yes				Yes	8/17/2026
Anonymous	Anonymous	There is no reason we need a data center that big; it will do far more harm than good, as it endangers the lives of many Americans by the amount of water it will consume.	1	Merged Document	No	[redacted]		Yes							8/17/2026
anonymous	anonymous	The public should be given 60 more days to review and comment on the the air quality permit so members can participate. Peoples families and communities are far more important than this is, especially young or elderly residents who have to breath in all the pollution.	1	Merged Document	No	[redacted]			Yes	Yes					8/17/2026
Andrea	Teran	Project Jupiter cannot happen. Don't do this to New Mexico. It is not beneficial to our land, our water, our air or our people. Project Jupiter would be built in an area that already fails to meet national air quality standards. Why is this even a possible? That doesn't make any sense. Save New Mexico from another detrimental mistake.	1	Merged Document	No	[redacted]		Yes	Yes						8/17/2026
Porsche	colelay	People in Navajo nation dont even have safe drinking water and u want to build a data center? All that water could be given to people who actually need it, 1 gallon for an Ai generated slop could've been 1 gallon that could've saved someone's life. All that water that could possibly be used could be water that extends someone's life another day	1	Merged Document	No	[redacted]		Yes							8/17/2026
Kiz	Romero	I do not live in New Mexico currently but I was born in New Mexico and feel very strongly about project Jupiter. I have family that still lives in New Mexico who will be affected by this project and I have compassion for the other people who live there as well. Something I've always loved about New Mexico is how it's not as industrialized as other states, the people pride and cherish their untouched land. They find richness and value in their way of living; water, clean land, clear skies, agriculture etc. The vegetation and the animals will also be affected by this which affects our ecosystem and comes back to affect us. Project Jupiter will be a parasite, on land that is already being exhausted of resources just to gain a profit. The people standing against this project care about their homes and future, not about profit. The quality of life means more. Please reject the fuel cell air quality permit.	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes			8/17/2026
Canyon	Lloyd	Data centers create very few jobs once they are built, they create immense greenhouse gas emissions, noise pollution, and further strain our very limited water resources. Please, do not allow Project Jupiter to move forward.	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes			8/17/2026

First	Last	Comment	Attachment	Count	Duplicate	[redacted]										Date
Diane	Laughlin	Stop this insanity. Building a data center in a desert is not only irresponsible, but disastrous. We already don't have enough water in New Mexico and the pollution this will cause is unacceptable. Most of Southern New Mexico is already compromised by oil and gas. Please. You can't drink data, and breathing pollution of this magnitude is not healthy. I'm sure the people who are responsible for building this data center would not want to live anywhere near it. This must be stopped now.	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Dominic	Ohri	New Mexico does not want this data center. We do not want billionaires in California making money on the backs of New Mexicans. The Rio Grande is the driest it has ever been, a data center will bankrupt our economy after ten years and diminish all of our water resources. I support Project Jupiter moving forward. New Mexico will leave	Merged Document	1	No	[redacted]			Yes							4/17/2026
Adelina	Anonymous	Why would you willingly choose to harm the earth knowing its already bad? This project not only takes EVEN MORE WATER from spaces but also harms the ecosystem and disrupts the already disrupted natural order. And for it to be in the middle of the dessert will only make things worse. This project will not benefit anyone, not even the rich. It will steal from everyone regardless of wealth and living conditions. Not only is this disrupting earth but its disrupting earths atmosphere and will harm it severely, possibly making it harder to breathe, and overall harder to live. We barely have 5 years to save the planet, so choosing to do this project lowers the chances of saving the very planet that gives us life will only take our lives instead. Also i hope the center gets sucked in by a sinkhole and all your money and work gets sunk into the earth	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Anon	Anon	Do not let this happen people are being affected all over the world because of emissions, this will amplify it even more. Please the people of New Mexico don't need this. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Consuelo	Granados	Data centers are intruders to our communities and to our wildlife. Many communities drinking water is being contaminated and there are reports of an increase of noise pollution. How can we allow for data centers like these to be made in our communities that will destroy our environment? It's pushing us closer to worse climate change and soon we will see and feel the consequences of our actions. This is not something to be ignored and forgotten because personally I don't want to suffer from the actions of someone else.	Merged Document	1	No	[redacted]			Yes		Yes	Yes	Yes			4/17/2026
Lise	Baker	I am strongly AGAINST the building of this plant in our state. This massive and dangerous building will use valuable resources that our plant and and our state cannot spare to power technology they no one needs at a time when we should be lowering our power needs. Communities all over the country have seen the massive and destructive impact that data centers have had in their areas including noise, air and water pollution, as well as the destruction of the natural landscape. Not here. Not anywhere. No water for AI. Not one drop. Our land is not up for grabs to out of state corporate interests. This project should be halted immediately.	Merged Document	1	No	[redacted]			Yes		Yes		Yes			4/17/2026
Zoe	Hogan	I do not personally live in New Mexico but I'm here to write for the residents. Building this AI center will not only use valuable resources like water but also create massive amounts of air and water pollution. We do not need any more AI data centers until we have found better way to regulate them. KEEP AI CENTERS OUT!!!	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Suzanne	Neville Staley	Residents of Dona Ana have been deliberately kept in the dark on the development of Project Jupiter. It has created an atmosphere of distrust around our elected officials and the citizens they serve. Now more than ever we need to conserve what water we have and put the needs of our people first above the needs of corporate shareholders. Bloom Energy on paper sounds like an environmentally friendly company but the fuel cells will be producing enormous amounts of greenhouse gas in addition to using millions of gallons of water per day. Water is already so scarce in southern New Mexico and we cannot afford to waste it on a data center that has very little support from the communities around it. I ask that the air quality permit application be denied. I ask that the public be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. And if the permit is not denied, I ask that, at minimum, a public hearing be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]			Yes	Yes	Yes		Yes		Yes	4/17/2026
Olyvia	Weaver	I'm tired of corporations filling America with data centers we don't need. We do not need ai. We do not need data centers. Our atmosphere cannot handle the carbon dioxide those would be producing. Our planet cannot handle the rising climate temperatures from the heat data centers release. We cannot and will not survive the droughts that data centers cause. This needs to stop and I refuse to not do anything.	Merged Document	1	No	[redacted]			Yes	Yes						4/17/2026
Olivia	Reyes	Since my last comment was thrown out due to profanity (which is funny because I thought I had a constitutional right to express myself however I freely choose to), let me use more formal words so that I don't hurt your feelings: it's hilarious that y'all probably hired crisis management consultants to help y'all shift the narrative that this will be a "new technology therefore it's going to be better for the environment" when we all know that that is not only wrong, it is deceitful. No matter how you try to spin this into a positive, you are helping billionaires who don't care whether you live or die—in fact, they are actively TRYING TO KILL YOU—to destroy our planet THAT WE NEED IN ORDER TO LIVE at an even faster rate than it is currently going. I implore the people in charge of making this decision in NM to forgo the bribes they are likely being offered under the table to do the right thing and deny this project from going through. If you are not religious, please think of how our earth has given us so much only for us to bleed it dry. That is morally wrong. If you agree with this project, you can deny it all you want, but you are an immoral human being and a traitor to we, the people. If you consider yourself religious, such as Christian or Catholic, I will leave you with this (since it seems a lot—not all—don't seem to possess even the most basic of moral values): Leviticus 25:23 "The land must not be sold permanently, because the land is mine and you reside in my land as foreigners and strangers." (NIV) Revelation 11:18 "The nations were angry, and your wrath has come. The time has come for judging the dead, and for rewarding your servants the prophets and your people who revere your name, both great and small—and for DESTROYING THOSE WHO DESTROY THE EARTH." (NIV) Your duty as a Christian/Catholic is to be good stewards to the earth that God created for YOU. YOU define his Word by agreeing to a data center. YOU commit sin by agreeing to a data center. And YOU will be held accountable, both physically here on earth and spiritually in the Heavenly Realm if you decide to vote for this project to go through.	Merged Document	1	No	[redacted]	Yes	Oppose - Non-Substantive	Yes		Yes					4/17/2026
Anonymous	Anonymous	I don't like the idea of a data center taking away precious resources from our state. We are already in a drought, this will only negatively impact the lives of New Mexicans through the entire state, not to mention the problems that will occur in the Las Cruces area as a result of this data center stealing water, energy, and land to consume with no benefit to our state. The small increase in jobs from this is not worth the cost that will be felt for generations to come. The people living by this data center will lose their quality of life, look at what's happening in Georgia, where data centers are literally draining the ground and destroying people's homes, poisoning their water, and increasing their home's energy costs. If this project is approved I don't think I'll choose to raise my family here, a state where a massive company can come and bulldoze people's lives and precious resources isn't somewhere I can fathom living.	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Anonymous	Anonymous	I hate the fact that people think we could just reincarnate. This isn't a fairytale. We dont know if we live once of twice. Cancel project Jupiter. Do anything. Petition? Protest? For me honestly I would KILL for it to stop. Climate change is affecting us. Lots of heat waves that's caused from climate change. We have THREE FUCKING YEARS until this is irreversible. If we don't do anything. We are dead. They think they will survive it while water is slowly disappearing, leaving chemicals in the air (it damages the ozone layer I think) all because of AI. Project Jupiter isnt some insane shit that will help us. It will RUIN the earth. The same earth that gave us water, food and a lot more. I might look like im saying bullshit right now but im just so shocked to the point I cant make a sentence on how this is fucked up.	Merged Document	1	No	[redacted]			Yes					Yes		4/17/2026
Klaudia	N/a	Projects like these are completely pointless choosing to have some stupid building over wellbeing of people? We have to stop this right now because its OUR planet and no one but WE can save it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Polett	Gutierrez	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous—many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up.	Merged Document	1	No	[redacted]				Yes	Yes		Yes			4/17/2026
Andy	Anonymous	This has to be a joke. Our summers are like nothing before and you want to make another data center? Animals including humans, are dying because of the water shortage. At this point there's almost no going back. And I know that scientists will tell you that there are planets like earth or even better than earth. And that in the future we will be able to travel to them. But how. How do you expect us to travel to them when all the money gets sent towards building data centres and other harmful things towards earth. There is no longer a future if we keep making stupid decisions. At this point it's humanity against humanity. It doesn't matter if you're rich or poor, black or white, gay or straight. We're all humans. We all bleed the same red. Stopping the construction of this data centre won't solve all global issues, but it will at least help. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone—this means our air quality does not meet federal government rules.	Merged Document	1	No	[redacted]			Yes	Yes	Yes			Yes	Yes	4/17/2026
Rua	M	We have survived for so long without AI, why are we scrambling to develop and build all these data centres right now. The earth is warming. At a much faster rate than what scientists predicted. Building this data centre will not only contribute significantly towards the climate issue, it will drain resources from the surrounding communities who had no say in the development of the data centre. The ice caps are melting and sea levels are rising. With that in mind, what's the point of building a data centre if in a few years it's going to be destroyed due to flash floods or some freakish weather disasters. It's up to us to stop The rapid decline of the Earth. In a few years, we won't have the same Earth to call home. Our children and their children will suffer immensely because of our poor and irresponsible decisions. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Neea	Leikari	The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC. A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an un-monitored loophole that violates the Clean Air Act's mandate for continuous compliance. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would allow this project to introduce unmitigated and undisclosed hazards into our air. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete abdication of the authority vested in you. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]				Yes	Yes	Yes	Yes	Yes	Yes	4/17/2026
Ale	Hern	stop projecting jupiter immediately. And prevent the lively threat it poses in our communities, this doesn't just affect me it affects you. ye you reading this, they didn't can't about us, they want you to not care, you can be the change, help change the world for good. stop data centers. we can still change the world for good. please please please help humanity survive. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Ethan	Swain	Data centers do not need to exist to this scale. This is purely corporate greed, poking at the limit of how far they can ruin environments before they are stopped. This will destroy the nearby ecosystems, killing off possibly thousands of local species in the immediate area, this includes fauna and animals alike, which will eventually lead to worse air quality due to the lack of carbon absorbers like trees and plants. For anyone that cares about our earth and our biodiversity, I implore you to act on this, please reconsider this plan.	Merged Document	1	No	[redacted]				Yes	Yes					4/17/2026
Yuki	Yee	We still need a future!! We shouldn't rely and focus on AI, and instead we should push our focus on the world. To be specific, global warming and climate change. We don't have much time left, we should use all of our remaining time left to save our Earth before we lose our last chance in saving it. Protect the Air! Push and delay the project jupiter.	Merged Document	1	No	[redacted]	Yes	Oppose - Non-Substantive								4/17/2026
Jocelyn	Maldonado	We actually need to stop this. No one asked for AI so why is it still here? AI! it's doing is harm rather than good. We only have one planet to live on, so why waste it using unwanted data centers that will increase global warming rapidly. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Merged Document	1	No	[redacted]				Yes	Yes					4/17/2026
millicent	lambert	I am only 15, and I'm watching my home burn before my very eyes. we have made substantial progress evolving as humans but it was until the early 2010s that artificial intelligence was introduced, it might be a quick fix for a math problem you're stuck on, but it throws our future away, it throws mine away. ai not only proceeds to take away the last of our drinking water and ruins the planet, but shrinks our cognitive function and takes the place of the art us humans make. ai can make sucky poetry paintings, songs, generate ideas, scripts, and has even made actors, but the truth is the only thing that ai can't do is feel, but we can. and we will feel the consequences and pain of our ecosystems and consequences if we don't act now, or won't be sorry.	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Anonymous	Anonymous	This data center is a major threat to both human life and our ecosystems we rely on. This is one of the absolute worst things we can do to ourselves right now. This data center, given what data centers are already doing to our beloved country and world, will absolutely dwarf the negative impacts seen by previous centers. This is using up our country's land where our already threatened wildlife and flora lives. and looking at the impacts on nearby infrastructure, homes, and businesses will by no doubt be catastrophic and displace at least hundreds of people. Refuse the data centers and be the hero to stop it. The carbon emissions from the center will by no doubt include, hundreds of construction and homes	Merged Document	1	No	[redacted]				Yes	Yes					4/17/2026
Lucy	Dill	Project Jupiter needs to be stopped! The rio grande is drying up before summer is even starting, and building a big data center will not help. It will be releasing 10 million tons of carbon dioxide annually just from the fuel cells. All the data centers we currently have are causing many problems to our water supply and nature, this one WILL NOT HELP!!!!!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone—this means our air quality does not meet federal government rules. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air (see tables below sourced directly from p. 150 of Air Permit) Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses. Developers did not propose pollution controls They estimated the plant's pollution based on tests from a very small unit (only 65 kW) but the power plant they want to build is 37,000 times bigger. A 15% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Estimated pollution from the plant's gas pipelines is not included Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up.	Merged Document	1	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	4/17/2026
Anna	Sterling	Please do not accept this permit. I do not live in New Mexico, but I know that if this was happening to me, I would fight tooth and nail to make it stop. This plant would be detrimental to the surrounding communities. What they need right now is less pollution, not even more of it. This plant would take up copious amounts of water and make the environment heavily polluted, more than it already is. We all know that this big corporation is not going to be trying their hardest to stop or manage anything. They do not care about the human lives just trying to live. What they care about is making money. Deny the permit. If you really care about the people and environment you're meant to protect, then you will deny the permit. If you don't really care then I hope you like heavy metals and toxic gass polluting the only planet we have.	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Juan	Herrador	Stop building project jupiter. STOP THE BUILDING OF PROJECT JUPITER ◆ A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC.	Merged Document	1	No	[redacted]				Yes		Yes	Yes			4/17/2026
Shane	Hollis	I'm not sure if my voice will even reach anyone, but I gotta say project jupiter scares the crap out of me. There's already a limited amount of water in Mexico and this mega ai data center in development is planned to take up to 1 million gallons a day! That's crazy, not to mention this'll dry up what little water is in the neighboring towns. We need to leave a better, healthier planet to the next generation, so they don't have to spend their entire lives making the planet habitable again. Think about the world you want to leave behind for your sons and daughters, if this thing is promised to be built it's poison and kill everything surrounding it, including but not limited to, plants, animals, people and the surrounding environment as a whole.	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Lenati	Leon	I urge you to extend the public comment period for the proposed air quality permit by an additional 60 days to ensure that all community members have a fair and equitable opportunity to review the application and provide meaningful input. I also believe the permit application should be rejected because of Bloom Energy's documented history of illegally dumping hazardous waste. This record raises serious concerns about the company's ability to operate responsibly and protect public health and the environment. If the permit is not rejected, I request that a public hearing be held in Santa Teresa with interpretation available in both English and Spanish, and that community members also have the option to participate online to maximize accessibility. Approving this permit would further burden a community that already faces significant environmental pollution. Doña Ana County has long been designated as a non-compliance area for air quality, meaning it does not meet federal air quality standards. Moving forward with this permit would disproportionately impact an already overburdened community and raise serious environmental justice concerns. Please prioritize the health, safety, and voices of the people of Doña Ana County by extending the comment period, rejecting this permit, or at the very least ensuring a fully accessible public hearing before any decision is made.	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Alex	Smith	do not build this bullshit. A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC	Merged Document	1	No	[redacted]				Yes		Yes	Yes			4/17/2026
Crystamae	Herrera	The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution	Merged Document	1	No	[redacted]				Yes	Yes		Yes			4/17/2026
Kamarah	Thompson	We do not need more AI. Our waters are already polluted, and we're running out of water as we speak. It doesn't make any sense for us to have more AI to take the. Resources that we barely have left. We don't need more data centers. The Earth is already dying. This isn't helping it anymore than it already is at it's current state	Merged Document	1	No	[redacted]			Yes							4/17/2026
Anonymous	Anonymous	I used to live in the United States for majority of my life before I moved to France and I have family that lives in the United States in New Mexico and California. NMED should not continue moving forward with their project, project jupiter because of the carbon thats polluting our planet and also using the water thats between several different countries, states, cities, etc. This will only increase the climate change that we are facing, we have gotten terrible heatwaves and colder winters. Over 46,000 of our species will also become extinct if we continue moving forward with making more data centers. We will not be able to live in a world where it can handle this much pollution. I ask you to find another way to be able to proceed with your mission that does not pollute the earth. Please allow the public have an additional 60 days to review and comment on this project so they're able to commute equitably. If the permit is not denied then please we ask for a public hearing that needs to be held in Santa Teresa. We ask for your understanding as to why this is not a good idea, for the environment, for our planet.	Merged Document	1	No	[redacted]			Yes		Yes				Yes	4/17/2026
Kinzie	Sneller	There is no future without a healthy environment! Killing the Earth means everything goes with it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Fazian	Anonymous	Building a data centre this huge is so fucking selfish. I don't know how people can care so little. I am willing to bet my entire life savings on this project significantly reducing local air quality. Are you really going to allow innocent people to have their lungs damaged all just for selfishness? Grow up. Doña Ana county already hasn't met federal air quality rules. Please don't let these innocent people suffer more due to dumbness and selfishness.	Merged Document	1	No	[redacted]			Yes		Yes			Yes		4/17/2026
Tally	N/a	Project Jupiter will cause more harm than provide something good. We don't need another massive data center to pollute water, pollute the air, and emmit millions of tons of carbon annually. Our ecosystems are important, and the communities of humans living next to where the data center is planned to go deserve the right to a healthy unpolluted life with stable water supply. Project Jupiter will take this away from these poor people. Stop Project Jupiter.	Merged Document	1	No	[redacted]			Yes		Yes			Yes		4/17/2026
Dylan	Kimball	I do not live near where this is happening but I do know that this is not right in any sense. We already have limited water thanks to the other data centers being put up without our permission and we do not need another one. We are already struggling so much with the other centers depleting our water and ruining our air quality, we never wanted nor needed these before and we do not need them now. I sincerely ask you to stop all developments of this project for the betterment of everyone in the area and for the wildlife this will affect.	Merged Document	1	No	[redacted]			Yes		Yes		Yes			4/17/2026
Nina	Ponce	I am a resident of Antipolo City in Manila, Philippines and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I may not be a resident of your country, but I, along with many people, live on this planet. This is OUR home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Your metro area is currently 18th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. This will not only impact your country, but our global climate. In the Philippines the summers have been growing hotter. Meralco—a power company who monopolizes the electricity of our country, has been cutting off power. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous—many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and unidentified chemicals	Merged Document	1	No	[redacted]				Yes	Yes		Yes	Yes		4/17/2026
Olina	krøret	These data centers make people and animals sick. There is radiation around them and a constant noise. This noise can and WILL make humans and animals horribly sick and all living species around the data center WILL have effects of it. Stop killing our earth. Who actually wants this other than the government?	Merged Document	1	No	[redacted]					Yes		Yes			4/17/2026
anonymous	anonymous	we have to think about the future generations and how they're going to live if we have no resources left such as water :((. and i heard this is going to be near an elementary school?! we cant have this pollution affecting kids and the elderly residents nearby as well. the air quality permit should be denied and the heat in our atmosphere is going steady. but surely	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Jelena	Baker	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone—this means our air quality does not meet federal government rules. This is genuinely disturbing and sickening that this company wants to ruin the earth for AI and whatever other reasons they have. Not only is it destroying our air quality and pumping cancer toxins into the air, it's ruining an already limited water supply and when that water is gone, there is no going back. THIS NEW PLANT IS DANGEROUS. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air (see tables below sourced directly from p. 150 of Air Permit) Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses. Developers did not propose pollution controls They estimated the plant's pollution based on tests from a very small unit (only 65 kW) but the power plant they want to build is 37,000 times bigger. A 15% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Estimated pollution from the plant's gas pipelines is not included Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up.	Merged Document	1	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	4/17/2026
Judith	Gonzalez	So many people are against this for many reasons I do not need to repeat. You know this is wrong and you choose to ignore the fact that majority of the people don't even want this. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste but like always, it all comes down to greed and selfishness; the people do not need or want data centers. My family's health and safety should be worth more than the profits of out-of-state corporations. Approving this permit would be government sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. You could also do something to benefit the air quality instead and plant trees with all the land purchased.	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Kate	Qinters-Davis	Generative ai and it's data centers have never and will never be necessary for the development of humanity. All this accomplishes is the enhanced destruction of our planet and more money and power towards the billionaires that are running the world into the ground. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Tobias	Kimble	Building this data center will harm so much wild life with all the water it uses, also effecting humans and making us lose clean drinking water. This Data center is an unnecessary waste of our resources.	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026
Eloisa	Ruz	I am a resident of Carol Stream, Illinois. I do not want this data center to be built at all and I do not wish for communities who are already suffering from droughts and water scarcity to face even more harm with this data center being in place. Though I do not live in the state of New Mexico, it is obvious that water is not something that can simply be regenerated and just magically become abundant again. This data center is not needed at all and should not be taking valuable resources that people need to survive. The pollution that it could emit into the atmosphere can speed up climate change which can affect everyone, who lives on planet earth.	Merged Document	1	No	[redacted]			Yes		Yes					4/17/2026

Desirae	Vigil	Please stop this. we did not need ai to evolve into the people we are now. we did not need ai to show love or affection, we did not need ai to be happy. Ai did not create religions, beliefs, relationships, or our world. we have no second chance. please, don't let this happen. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	4/17/2026
Adela	Roybal	We in New Mexic will not not stand for this, project Jupiter will ruin the state know for being the land of Enchantment, so many people could lose their homes, New Mexico already has very little drinking water, if project Jupiter will ruin the little drinking water we have.	1	Merged Document	No				Yes							4/17/2026
zoey	miller	project jupiter is stupid and shouldn't be allowed to continue. as of the current moment, our earth is already struggling with climate change. even in europe it has made a presence. the use of ai is also limiting out clean drinking water by tons, DAILY. our clean water is at risk, water streams are at risk, antarctica and the polar bears are at risk. the more this continues, the more we and the earth we NEED TO LIVE is at risk. speak up for the earth, water, and animals we humans are putting at risk by the use of ai, data centers, and many many more. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. we, the earth, and animals will be harmed by this project as it gives off MANY unsafe chemicals, one even cancer causing.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	4/17/2026
Lori	Lawrence	I am writing to formally log my strong opposition to Project Jupiter. Our region simply cannot handle the burden this project will place on our critical infrastructure, our natural resources, and our families. First and foremost, we do not have the water. Our regional water supply is already under immense stress, and committing massive amounts of this finite resource to an industrial project of this scale is entirely unsustainable. Water is life in our region, and prioritizing Project Jupiter over the long-term survival of our communities and environment is dangerous and irresponsible. Furthermore, we cannot afford the energy strain. Our local utility grid is already stretched, and a project with this level of energy demand will inevitably drive up utility costs. Working families in our community are already at a breaking point. Inflation and the skyrocketing cost of basic necessities have left people down here barely able to afford to live as it is. Forcing residents to absorb even higher energy bills to subsidize Project Jupiter is flatly unacceptable. Our leaders and decision-makers must prioritize the people who actually live, work, and raise families here. We cannot sacrifice our water security and financial stability for Project Jupiter. I urge you to deny the approvals for this project.	1	Merged Document	No				Yes		Yes					4/17/2026
Marianne	Nys	I am Marianne, and I am against project Jupiter.. project Jupiter will amit about 10 million carbon dioxide per year and use up our water, which we're already beginning to run out of. People will die, animals will die, and plants from lack of water.. and climate change will increase icebergs will melt, animals will lose their habitat.	1	Merged Document	No				Yes	Yes	Yes					4/17/2026
Janet	Nyland	If you have any common sense, you should see that Bloom historically illegally dumps its hazardous waste. Normal data centers also consume a ridiculous amount of water to stay cool, let alone a giant one in the middle of a damn desert? That thing is a ticking time bomb. AT BEST, it'd be a huge waste of money and resources within a short amount of time because that thing WILL melt itself if the AI bubble doesn't pop first	1	Merged Document	No				Yes					Yes		4/17/2026
Alexa	Kuivanen	I may not live where the data center is being put, but I have enough empathy and situational awareness to know this is unethical, unneeded, and unacceptable. It is cruel to the people that have lived there for generations not only that but the entire world. 10 millions tons of carbon being dumped into OUR atmosphere is so astronomically detrimental I cannot even imagine it. You gamble with the lives of all that live there and that alone is a complete defilement of the authority vested in you.	1	Merged Document	No		No	Original - Non-Substantive								4/17/2026
anonymous	anonymous	Many people, myself included, are asking that you deny Yucca Growth Infrastructure's air quality permit. So many people live near the area where this is happening, and no one I want this. Our future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat the atmosphere at a much faster pace and promote the formation of even more ground-level ozone.The other toxic air pollutants are extremely dangerous–many of them at very low levels. How are kidd supposed to go to school, and adults have to go to work, while breathing this toxic gas. Knowing it can cause permanent brain damage or breathing complications.	1	Merged Document	No					Yes	Yes		Yes			4/17/2026
Arielle	Kibbee	I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the application to ensure everyone can understandably comment determine an opinion and participate.	1	Merged Document	No								Yes		Yes	4/17/2026
Anonymous	Anonymous	The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC. A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an un monitored loophole that violates the Clean Air Act's mandate for continuous compliance. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would allow this project to introduce unmitigated and undisclosed hazards into our air. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilment of the authority vested in you.	1	Merged Document	No					Yes	Yes	Yes	Yes			4/17/2026
anonymous	anonymous	The Rio Grande is dry. This data centre is not needed and not wanted. The Air quality permit application must be denied. It must be denied as Bloom Ebeegy have proven they cannot be trusted with environmental responsibility through their history of illegally dumping hazardous materials. Additionally the public body, the people of New Mexico, should be allowed an additional 60 days at least to review and reflect upon the proposal, so as to ensure equitable opportunity for community members to have a voice in such a major development proposal. You are compromising our collective future by building it. When historians ask us in the near future who killed New Mexico we will point towards the cowards and evil men behind project Jupiter. For cowards sit behind AI and big tech infrastructure instead of fighting for climate solutions and sustainability in our communities. Don't be the bad guys, be better. No Project Jupiter. The approval of this permit would fall under government sponsored environmental racism and should the permit not be denied then a public hearing must take place in both English and Spanish in Santa Teresa, with the opportunity for members of the public to participate in person or online. Information pertaining to the gearing should be widely available, easily accessible, in both English and Spanish, and non-threatening. This development poses a dangerous risk to public health across this community. Project Jupiter is not only an extreme threat to New Mexico but to the world as should it be approved it sets a dare I say apocalyptic precedent for other large AI infrastructure developments which will act like parasites on our planet, sucking us dry of resources that we desperately need to survive. Invest in our future, no project Jupiter.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	4/17/2026
Bridey	.	Stop using AI, the world has been perfectly fine without it. Parklands, swimming pools, forests, and the public of the world and New Mexico have a strong community of people who agree with this. They want to make change, the world wants to make change, but rich people decide whats quote on quote 'better and more sustainable'. It has become so much of an issue to the people of this town and planet that it has spread across to nations who want to stop this centre. Stop using AI, don't make project Jupiter, just look at the history of the world and see how well humankind did without technology and artificial intelligence. The world was and always will be, better without it. It is ruining creativity, water supplies, nature, makes people less inclined to	2	Merged Document	Yes				Yes							4/17/2026
Joe	Gallegos	Hello, I am writing as a concerned citizen of New Mexico. Every single day I read a new story about how these data centers are degrading the life of the residents in which they directly impact. Project Jupiter will be no different. They say that they will create jobs and spur economic development. But at what cost? Our water? Our environment? We will be like these other cities and counties who are now faced with higher rates, having to monitor their water usage, and are having environmental and noise impacts. Why would we be the exception? Why would this company, oracle, be any different? The truth is, these data centers benefit their benefactors. They receive all of the benefits while all of the losses are socialized by the people of the places in which they exist. New Mexico will be worse off with this project. It's people will have to face more environmental concerns. The nation as a whole will have to face severe surveillance and constitutional problems as a result of these data centers since they do have government contracts in the surveillance world. The people of New Mexico do not want this, no matter how much they pretend they will help us. They will not. We have numerous examples of the pitfalls of these data centers and it would be criminal to ignore them. Thank you. Joe Gallegos (Albuquerque)	1	Merged Document	No				Yes		Yes	Yes	Yes			4/17/2026
Anonymous	Anonymous	I'd like to request to take down project Jupiter. It will only harm the environment and the people near it. The public should be given 60 days to review the air quality permit, it should be denied as theres cases in bloom energy's history of dumping hazardous waste. Accepting this permit is also extremely offensive and will be labeled as government-sponsored environmental racism. The residents of Doña Ana County are already impacted by the environmental pollution and it affects their daily lives. For years they have been called a "nonattainment zone" meaning that their air quality is not met by federal government rules. If the permit isn't denied, it should atleast be held in Santa teresa, in both English and Spanish, with an option to participate virtually. Please consider the project and its affects on the people who live there, along with the animals. And how it impacts the climate aswell. Thank you.	1	Merged Document	No					Yes	Yes			Yes	Yes	4/17/2026
Violet	Kehl	I am a resident of Colorado, and I ask that we deny Yucca Growth Infrastructure's air quality permit. As we need to protect our environment from harm so we can continue to live in it and keep it safe. All animals and humans should work together to prevent more harm, and as people we should be helping hardest to do that. Children should get the privilege of growing up in a heathy environment, as our environment should get the privilege to grow. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	4/17/2026
Anon	Anon	ai data centers deplete so much of just fresh drinking water that data centers are so dependent upon to cool their servers. 1% of the earths water is drinkable, and coincidentally the ai data centers use FRESH DRINKING WATER NOT SALT WATER, directly depleting the water that is already scarce, and will leave the community for dead. the land will not be habitable. not to mention, the amount of energy required, heat it produces, the emissions. it is not worth sacrificing what keeps us alive. AI is so unnecessary and we do not need more data centers. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes				Yes	Yes	4/17/2026
Juleima	Jaquez	I have been a resident of New Mexico my whole life and plan on staying here for the rest of it. I love my state and I am deeply concerned about the already dwindling water supply that we have in this state. Building a giant AI data center that hoards all of the water is just not sustainable in a desert. I am also concerned for the air quality and environment. Our state has already been used and abused so many times for its vast uninhabited land and I do not think it should continue to be taken advantage of in this way. This AI data center will cause more harm than good to the local residents.	1	Merged Document	No				Yes	Yes	Yes					4/17/2026
Emma	Nguyen	I am a resident of Washington state and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time non attainment zone would be nothing short of blatant environmental racism. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. Think of the lives. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes		4/17/2026
mia	maes	I live in Las Cruces, New Mexico. The Land of enchantment; and entrapment because man, there is something so captivating about the nature of this state. This is because we try our best to keep it the way it was before civilization, beautiful. New Mexico runs a very tight program when it comes to littering, so much so that theres some pretty hefty fines for throwing a candy bar wrapper on the side of the road, however, Fuel cells also create a very hazardous waste and the fuel cell provider for project Jupiter has a history of illegally dumping this waste and hiding it for several years. Furthermore, the carbon dioxide pollution ALONE will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. To add 10 million tons of carbon dioxide pollution and toxic emissions to our already bad air with our metro area currently being the 16th worst in the nation for ozone pollution not to mention we have received a failing grade on this air quality standard every single year since 2000. It is beyond unacceptable to invite a new source of SEVERE air pollution into our home we've been taking care of for a couple hundred years and will continue doing so by stopping this project. To build this data center is to create a threat to all the future future families residing in NM, ESPECIALLY the children attending Santa Teresa Elementary School who will every day, wall, play, eat, and sleep LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks all sit within around 4 miles of this project. We also have to take into consideration the dangers of an incident occuring at this center. Highly flammable hydrogen under high pressure only needs a microscopic crack to leak out, ignite, explode, and level entire neighborhoods and schools while sending shockwaves into nearby counties. to put such a massive hazard even anywhere remotely near a community would be unbelievably careless.To put into reference the size of Worldwide, Bloom Energy has developed 1.4 GW of fuel cell technology across more than a thousand locations, yet Yucca Growth Infrastructure is asking for nearly double that (2.46 GW of fuel cells) at a singular location. The largest fuel cell plant in the entire world is more than 30 times smaller than the fuel cell plant under consideration in Santa Teresa. This data center will take a MINIMUM of 1 MILLION gallons of water PER DAY. To build something that requires that much water in a state that has a VERY LIMITED SOURCE of water sounds nothing short of unreasonable, short-sighted, and barbaric. so please, for the sake of the community, STOP PROJECT JUPITER!!	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes		4/17/2026
Bruce	Baron	This project is only about economic growth. It will obviously have a terrible impact on the environment locally, and vividly take part of the climate change overall. In my country in Europe we had temperatures neighboring 40°Cwhich is a first since more than a decade. Thousands. Thousands of people died in France because of this heatwave. Don't ultra-rich already have enough ? They keep building, investing in projects that are ecologically worst every-time. We have to change our way to construct, create and maintain a climatic balance, if it's not already too late.	1	Merged Document	No		No	Original - Non-Substantive			Yes					4/17/2026
Angelique	Guerrero	The community does not want another data center. Our water is limited already and data centers require large amounts of water. Whatever water it doesn't take to operate, it will contaminate the rest of the surrounding water. Not to mention Bloom energy has a history of illegal dumping of hazardous waste. We do not need or want another data center.	1	Merged Document	No				Yes					Yes		4/17/2026
Suze Van	Dijken	We need to stop project jupiter so climate change. This year alone a lot of the maximum heat records have been broken and it will only get worse. Humanity is cooking it self. The ai is not worth it, we can funtion without it as we have for thousands of years. Tgis is not woth peoples lives for. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	4/17/2026
Anon	Anon	Please reconsider this project. Project Jupiter will threaten the already limited water supply that communities need to survive, due to the fact that data centers all use up too much water to bring back. The fuel cell gas for the project will also release around 10 million tons of carbon dioxide annually. Which would worsen the climate change and heatwaves that we are already going through. Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing cancer-causing chemicals (benzene), heavy metals (lead, arsenic, chromium), toxic compounds (sulfur,...). All of these poison the human body, our water, and our soil. Also, mostly nobody has asked for this project, and nobody will benefit from it in any way. Project Jupiter is a disaster and can worsen and/or threaten human lives, harm the enviroment, cause harm to animals and affect the climate. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes	Yes	4/17/2026
Anon	Anon	I am a citizen of Lithuania and I've always deeply cared about nature. I am signing this to try and limit CO2 emissions from data centers, factories and other industrial facilities to hopefully slow down global warming. I also want to try and help locals that suffer from high air pollution, lack of water, unnaturally high or low air temperatures. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	4/17/2026
Phoebe	McCallum	An Ai data centre like this should NOT be built. There is no valid reason for something this large and damaging to be created and the cons significantly outweigh the pros. The damage this will cause to the already unstable environment is not worth it and it is an incredibly stupid and selfish idea. The people DO NOT WANT THIS!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	4/17/2026
Guste	Brazauskaite	Today we face a major challange with climate change and depleting water supplies. This project would push local community and the human kind back massively in combating these issues. As a global citizen, I feel it is my right to a better future - one where projects like this have no place. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	4/17/2026
Caelvin	Anon	Do NOT build this data center. Project Jupiter could literally destroy the planet, not that you probably care, you selfish asshole. AI is already killing us slowly, we don't need it to be worse. Animals are going extinct, there are droughts everywhere, the polar ice caps are melting because of the climate change AI is making. Think about something other than money for once. The air quality permit application should be denied, and if it's not you need to hold a public hearing needs to be held in Santa Teresa. The people of Doña Ana County are already getting butt-fucked by the air quality. They don't need it to be worse. It genuinely bewilders me how disgusting and self absorbed people like you are. I don't believe in god, but sometimes I hope there is a hell so that people like you suffer. 1 million gallons of water a day is absolutely INSANE. I hope you get fined another 1.4 million bucks and go bankrupt you fat fucking loser. If you're not gonna stop for nature or your family or your friends (assuming you have any), do it for yourself, because this WILL effect YOU too. I can't believe a 16 year old boy has to explain this to you, you fucking idiot. I hate you. Do better.	1	Merged Document	No				Yes	Yes	Yes				Yes	4/17/2026
Isabella	Williams	Stop project Jupiter!! Please, Dara centers are already ruining our environment enough as it is. I want my children and my children's children to grow up in the beautiful environment that I always dreamed of, but if we continue destroying the land already provided, we'll never have a future. We don't need more data centers, we don't need ai at all. We can survive without chat gpt but we can't survive without running water. If you won't listen to me listen to my unborn children. You claim to be pro life, but you won't protect the planet that the life is being born onto. Please, stop projecting Jupiter. Save the planet, we still have time but not much. Make the right choice, be on the right side of history. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	4/17/2026
Mac	Agbenla	No to project Jupiter. You cannot eat money, when the world is too hot to sustain life, no clean water, no nature , no life. What will you do? The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Anonymous	Anonymous	Hello, I'm deeply concerned about this project. Project Jupiter should be stopped, there are many communities who rely on bits of water as it is, project Jupiter is going to leave them with nothing left, the body can't go without water, we are humans we need water to survive, but not only humans need water and AIR to survive, animals also need it. It doesn't matter if it's water or air, they need it to keep living, our environment is already declining very rapidly, so why should you, the rich be able to enjoy it even though you can't see how much it's regressing? I wrote to you to express my opinions on this matter as the animals and plants and PLANET cannot write to you to tell you how much they are suffering. We don't need a massive AI center, in fact we don't need AI, I beg you, reconsider this project, for the animals, plants, and PLANET. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	4/17/2026
anonymous	anonymous	its like you guys arent even thinking about the effects this will have on our environment, and thats not even the only factor that will be influenced if this continues to be built. there are so much articles, documentaries, and comments from people who live NEAR data centers not even as big as this one. so what makes you think that this will benefit us in any way? we already are experiencing shortages on WATER, prices for basic commodities are getting higher and higher while people who are already struggling have an even harder time to balance the expenses. where do you plan on obtaining the water you need for this?Think about the people, the animals, our homes, there is no way in any world that AI needs a facility this big. at the rate AI is advancing, this is absolutely unnecessary. what even is this facility truly for?	1	Merged Document	No				Yes		Yes					4/17/2026
Neci	Yazzie	THERE IS WAY MORE NEGATIVE AFFECTS THAN GOOD. All the emissions, energy and water are way too much for the Earth to handle, we're passing a threshold for reversing global warming. I HOPE YOU MOTHERFUCKERS ARE THE FIRST TO FEEL THE RESULTS OF YOUR OWN STUPID ACTIONS. Do not build this data center, we have ABSOLUTELY NO REASON for a data center in this area. Especially since we are already in a DROUGHT. This data center will disrupt all biological life and will create lifelong issues for those developing around this. WE DO NOT NEED AI OR DATA CENTERS. WE DO NOT NEED AI OR DATA CENTERS. WE DO NOT NEED AI OR DATA CENTERS. PUT HUMANS FIRST. PUT HUMANS FIRST PUT HUMANS FIRST. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	4/17/2026

[redacted]

Administrative Record NSR 10833_010928

Cody	Pčola	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Stop destroying our planet! Don't forget you live on it too and will suffer the consequences like everyone that's already suffering for your profit	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Liam	Hartviksen	Building these data centers will bring the end of mankind so much closer SO much faster. Building data centers will use too much water. It will release too much co2 and ultimately it will kill us off just to use stupid generative AI who no one NEEDS btw. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Colton	Bagley	I do not at all agree with Project Jupiter, our environment is so sacred and has existed for so much longer than us. We are merely borrowing Earth and we think it gives us the right to decimate it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Alicia	Royal	We are in a desert which means limited water for us anyways. Especially now with the increase in temperature. The last thing we need is a data center making our water situation worse. I want clean drinking water for my family and my community.	1	Merged Document	No		Yes							8/17/2026
Anonymous	Anonymous	The future of the earth should be our priority. We, as humans, who've stolen this earth from the natural beings are responsible for preserving the health of it. And by building this data centre? Not only does it accelerate climate change but also destroy millions of habitats. This, is completely unacceptable. Climate change with become irreversible in just 3 years time if action cannot be taken, therefore this data Centre? CANNOT happen. We need to actively work to reduce climate change, not build unnecessary projects like this that will only make climate change 100× worse. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied. Approving this permit would be government-sponsored environmental racism. If the permit is not denied, a public hearing needs to be held in Santa Teresa.	1	Merged Document	No			Yes	Yes				Yes	8/17/2026
Kaushi	K	STOP PROJECT JUPITER!! we lived this long without ai, we can live the rest of our lives without it too. Stop making the future generations depend on ai to make decisions rather than using their own brains!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	I don't have much to say BUT WE. DON'T. WANT. TO. LIVE. ON. A DEAD. PLANET. With these fuckass data centers that ruins fucking everything around us and kills lives of animals and children. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Liana	Jalloul	I strongly oppose the approval of Project Jupiter and urge that this air quality permit be denied. The public must be given an additional 60 days to review and comment on this permit so that all community members have an equitable opportunity to participate in a decision that will have lasting consequences for their health and environment. The permit should also be denied because of Bloom Energy's documented history of illegally dumping hazardous waste. A company with this record should not be entrusted with another project that has the potential to further harm the environment and nearby communities. If the permit is not denied, then at a minimum a public hearing must be held in Santa Teresa, conducted in both English and Spanish, with a virtual participation option so that everyone affected has a fair opportunity to be heard. Approving this permit would amount to government-sponsored environmental racism. Residents of Doña Ana County already bear a disproportionate burden of environmental pollution, and for years the county has been designated a federal nonattainment area because its air quality does not meet federal standards. Adding another major source of pollution would only worsen existing environmental injustices. Beyond the local impacts, we must also consider the global consequences. Data centers consume enormous amounts of electricity and freshwater while contributing significant greenhouse gas emissions. We are already experiencing the effects of climate change through rising temperatures, more extreme weather, melting glaciers and polar ice, and rising sea levels that threaten vulnerable communities and island nations such as the Maldives. Continuing to build massive AI infrastructure without addressing its environmental costs will only accelerate these problems. Our planet cannot afford more projects that increase pollution, consume precious freshwater, and contribute to climate change. We should be investing in sustainable alternatives instead of expanding infrastructure that places corporate interests above public health, environmental justice, and future generations. I urge you to deny this permit and protect the people of Doña Ana County and our shared environment.	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Amira	Rodriguez	Though approximations of annual air pollution were provided, the testing used an extremely weak methodology leaving us, ultimately, with pseudoscientific guesses that have large margins of error. Estimated pollution levels for this gas-powered fuel cell plant are based on only three 4-hour pollution tests from a very small unit (only 65 kW). This is a far cry from thousands of sweltering fuel cells operating 24/7 at maximum output in close proximity, all in the scorching heat of our open desert. The lack of rigorous testing at even this small of a scale is lazy and very concerning, especially given that the gas power plant Yucca Growth Infrastructure wants to build is 37,000 times bigger than this unit. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes		Yes	Yes	Yes	8/17/2026
Tara Delaney	Dana	I live in Southern Doña Ana County, and I do not want an experimental project of this magnitude built in my community. The gas-powered fuel cell plant proposed by Yucca Growth Infrastructure would be unlike anything that has ever been deployed before. At nearly 2.46 GW, it would be roughly 1,000 times larger than Bloom Energy's largest existing fuel cell installation. Bloom has installed approximately 1.4 GW of fuel cell capacity across more than a thousand different sites worldwide, yet this proposal seeks to concentrate almost twice that amount in a single location. Even the largest fuel cell plant currently operating anywhere in the world is more than 30 times smaller than what is being proposed for Santa Teresa. Because there is no comparable facility operating anywhere, no one can honestly say with certainty what pollution levels would look like at this scale. The enormous gap between existing fuel cell projects and this proposal means there is little real-world data to support the applicant's emissions estimates. Approving this project would mean gambling with the health and quality of life of the people who live here while ignoring the New Mexico Environment Department's stated mission to protect public health, prevent the deterioration of air quality, and preserve the environment for future generations. The emissions estimates presented by the applicant are based on a very limited testing process that does not inspire confidence. The data comes from only three four-hour pollution tests performed on a single 65 kW unit. That is nowhere close to replicating the conditions of thousands of fuel cells running continuously, at full output, in the extreme heat of the Chihuahuan Desert. Even at the small scale that was tested, the amount of available data is limited. Trying to use those results to predict emissions from a facility approximately 37,000 times larger leaves far too much uncertainty. A 15% "safety margin" was added to the numbers provided by the applicant. Safety margins are not usually added if a company is confident in the accuracy of their pollution estimates. Even small variations from this superficial test will result in massively different levels of pollution and given that the plant will be 37,000 bigger than the testing unit, a 15% safety margin is completely insufficient–it could work as a margin for a single unit, but not the entire plant. If a unit has a 0.01% chance of failing (sounds promising right?), the odds of 37,000 of those units working perfectly at the same time is 2.47% (pathetically low feasibility). That means there is a 97.53% chance that the plant will experience at least one failure. What will the exact level of redundancy be? Will more fuel cells be rubberstamped or pollution levels overlooked in five years or less due to age-related inefficiencies? What about cases of catastrophic failure? Are we approving those deadly incidents of pollution in advance without any real data informing us of the risks at this scale? Highly flammable hydrogen under high pressure only needs a microscopic crack to leak out, ignite, explode, and level entire neighborhoods and schools while sending shockwaves into nearby counties. Assuming this risk, an act of gross negligence, at a scale that has never even remotely been demonstrated in practice would be unbelievably careless. These permits must be denied outright. If further deliberation is desired, a public hearing in Santa Teresa is non-negotiable.	1	Merged Document	No			Yes	Yes		Yes		Yes	8/17/2026
Anonymous	Anonymous	I'm not from new mexico but this will affect everyone in the world so I feel I have to voice opinion too. I don't think this is a good idea. A data center that big will use up a lot of water. We already have a limited water supply. When will rich people learn that money isn't everything. After we run out of water and destroy the earth that money won't have any value. You can't eat money. The public should be given more time to review and comment. Do NOT accept the air quality permit application. A public hearing is needed.	1	Merged Document	No		Yes	Yes					Yes	8/17/2026
Mitchell	anonymous	I am a pleading for the denial of project Jupiter and the end of data centers building. These power plants will leave absolutely detrimental effects on our environment and will only further the harm of climate change and global warming. With only three years left on the climate clock, I believe it is imperative to work toward solutions instead of escalating damages that will soon be irreversible. As a young person who still has lots of time left on this Earth, I am heartbroken to know my worries waking up each morning will be if I have clean drinking water for my family that day. There is so much beauty in the nature that we are destroying and the animals that we are killing. I know it is essential for everyone to work together to fight for this Earth that has provided so much for us. These power plants are invasive species. Not only to ecosystems and the nature that has been on this planet before our creation, but also to humans. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Akshaya	Thirumoorthy	Dear Government, Greeting from across the world. We are sick and tired of your projects and Propaganda. We the people do not want any new data centres anymore, people have already been silently suffering from the already existing ones, causing irreversible damages to their lives. We urge you to find a better way rather than killing the planet. We can live without AI. We cannot live if we don't have a earth to live on. None of your bunkers built for billionaires are going to protect you if you don't have an earth to live on. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Stop poisoning your own people and the planet. You cannot eat money on earth. Respectfully, Akshaya	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you. Gambling with the lives of people around the world for a data centre that supports machinery that is denying art and culture around the world, worsening the health of people around the world and overall ruining the world all while not being a necessity is cruel and foul and disgusting and anyone supporting this should be ashamed of themselves or be able to stand up to the children and elderly and ALL PEOPLE that they do not care for while in support of this infrastructure.	1	Merged Document	No		Yes	Yes	Yes					8/17/2026
Naomi	Mori	I am asking that you deny Yucca Growth Infrastructure's air quality permit. I believe that people want to continue living their lives while knowing they have a safe and secure future but that future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. Please, for not only our future but yours too, put a stop to this before environmental damage becomes irreversible. It's not too late to create a positive change and make our future better. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes		Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	I want yo have a safe future for every single one of us living on this planet. I know the circumstances and consequences of the project Jupiter and I plead and insist that this project should be immediately closed down for the sake of our planet. I don't have anything else to say about this. We have to fight for the bright future of our planet and we have to limit the risks of global warming and other environmental disasters to the best of our human ability. Everyone has to understand the fact that our planet is slowly being murdered by humanity. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Pauline	Petrauska	Were ready seeing the effects of global warming and our water supplies are running out. You have enough money you dont need more if you build this this might be the final nail in our coffins. I want to have a future where we have water and the animals arent on the brink of extinction. Get that through your thick skulls WE CANT EAT MONEY The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Maja	Kołodziejczak	I am writing to urge you to deny Yucca Growth Infrastructure's air quality permit. Although I do not live in the affected community, decisions like this have consequences that extend far beyond local borders. Approving a project that would produce millions of tons of carbon dioxide while adding toxic air pollution to a region that already struggles with poor air quality is deeply concerning. Communities that have carried the burden of pollution for decades should not be asked to bear even greater environmental and health risks. I am also concerned by reports regarding the hazardous waste associated with the project's fuel cells and the provider's past history of improper waste disposal. Strong environmental oversight is essential, and communities deserve protection from avoidable risks to their air, water, and soil. I respectfully ask that you deny this air quality permit. If the permit is not denied, the public should be guaranteed a fully accessible hearing with in-person and virtual participation, including Spanish-language interpretation and materials so that all affected community members can be heard.	1	Merged Document	No		Yes	Yes	Yes	Yes	Yes	Yes		8/17/2026
Anonymous	Anonymous	Building a large data will centre harm the planet even more, contributing to climate change. As it's built near a river the people near the area will have less access to clean water as it's being primarily used for a data centre, it produces a heavy amount of CO2 which is never good for our planet. The people are asking you to reconsider, as it will affect the lives and futures of many. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Veronica	Anon	People should have 60 days more for making such a decision as important and serious as air condition in their country. Having more days would lead to an equal share in the discussion on making the decision. The residents of Dõna Ana are already disproportionately affected. Their air was never in good condition, and it has never met federal standards, which means, that the application regarding air pollution should be rejected. If not, a public hearing must be held in Santa-Teresa in both languages, english and spanish. The issuance of this permit would be an act of environmental racism which is sponsored by the government.	1	Merged Document	No				Yes				Yes	8/17/2026
Anonymous	Anonymous	I don't live in New Mexico, but I still want you to deny Yucca Growth Infrastructure's air quality permit because it will affect the communities there and the planet as a whole. AI data centers are known to use large quantities of fresh water to cool the servers down, and large amounts of energy to keep the servers running. This, of course, comes with risks we already know, such as droughts and power outages in nearby communities. The data center will also release around 10 million tonnes of carbon dioxide annually, which is equivalent to the carbon emissions of countries such as Cameroon, Mozambique or Tajikistan, which will impact our planet negatively. Please, don't build that data center.	1	Merged Document	No		Yes	Yes	Yes					8/17/2026
Camille	Bowens	I am a resident of Albuquerque and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Sunland Park metro area is currently 16th worst in the nation for ozone pollution and they have received a failing grade on this air quality standard every single year since 2000. They are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into this or any New Mexican community. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone.	1	Merged Document	No			Yes	Yes		Yes			8/17/2026
Malcolm	Cuttingham	Dont you think we were perfectly fine without ai??? Also there are enough data centers all over the unites states that are taking up enough water??? Also our air is already bad enough it cant get any much worse can it? The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Evelyn	Steffen	Please don't build the data center if you want to live in 3 years. Don't stop the build for the sake of humanity, stop it for the sake of all life on earth, and for the planet. There is no planet #2. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Maitshwarelo	.	What will chat gpt matter if we don't have a place to live? Even if AI can give us all the answers in the world, it's only doing harm if AI is gonna take from our planet and kill us slowly. The Earth doesn't need us, we need the Earth. Theres no other planet that humans can live on. Unless your an alien, that would explain why you could be so heartless. We have one planet. One Earth. But people would rather make rockets and fast cars, not caring how much harm it does to the world. Children are being born everyday, as the world dies a little more by the second, and AI Data centres are OK with that. You've lived your life, so don't stop young people from living theirs. The Earth isn't just a rock. It's our home, and if the rich continue to ruin the Earth, your not hurting the Earth, your hurting everything that lives on it. AI doesn't feel the consequences, but the humans, the ones thst matter the most do. And I'm not going to sit back and watch the world get destroyed with things like CHAT GPT and Grok ai. None of that shit will matter when the water has run dry, the air is toxic to breathe in and the animals are dead. Don't make stupid decisions because you have a stupid amount of money to do so. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Maddison`	Vinton	I live in Australia, I'm nowhere near where this project is taking place and I know that it will still effect me and most of the world. I am appalled at the fact that anyone could agree to let this happen, there is no one they do not know what will come after this project and the damage. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Rose	Daish	Even though I do not live in the area this will directly affect with droughts and noise pollution, everyone on this earth will be affected when it comes to the rapid heating of the earth, and extreme changes in weather impacting wildlife and human settlements all of the world. As someone that lives in New Zealand, we see what changes like what this would cause in atmosphere can do to smaller at risk pacific countries. Even though these countries are incredibly far away from the data center, we coexist in one large ecosystem that relies on each other to make sure everything around us runs smoothly, when something changes so severely, it shifts everything and causes all the systems to collapse. Building something like this would also completely destroy native wildlife and their environments in New Mexico, also putting the residents livelihoods at risk. To make sure that this data centers creation is given the proper consideration, the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. In addition, the air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste, if the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	We CANNOT let project Jupiter happen. The climate is bad as it is and if we would be to ket project Jupiter go through it'd worsen even more. As of today we have 3 years until our environment is done, until theres no turning back. Were in a crisis right now and we don't need any more hinders. We need nature, wild life, anything that prevents the global warming! A brand new data center will not only produce a lot of carbon dioxide during its working phase, but also produce a lot of carbon dioxide during the building phase. This means that we will have to take a big blow climate wise only for the building of the data center and continuous outpour of carbon dioxide after the building phase. There will be no time for our planet to recover from our previous mistakes. See, if they would go through with this data center and our world would be actually destroyed for good, and we all would eventually die. Therefore the data center would've been a complete waste! It would have been built, we would go under, and the data center stands there with no use other than being a mass killer. Including the owners, employees and the sponsors. Nothing would matter after this point. So please! Don't let them go through with this "project Jupiter" and deny their air quality permit!	1	Merged Document	No			Yes	Yes					8/17/2026
Humayra	Talukder	We need our earth to survive, there's no planet B. Earth isn't ours for us to destroy in the first place, we are also responsible for the harm we've already caused to the animals. We cannot eat money. Please don't. SAVE EARTH!!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes			Yes	Yes	8/17/2026
Kelly	Johnson	I believe it is a horrible idea to build a data center, especially near a river and active community. Long term exposure to the loud buzzing from data centers will lead to people losing their hearing, along with the air quality being ruined by HAPs. The Rio Grande will also dry up even worse than it has before, considering how much water AI data centers need to cool down. I've seen many people from the nearby community expressing how badly they are against building anything related to AI. It would be disrespectful to ignore the people who live there. Please do not go through with Project Jupiter. It will be horrifying for the climate and people's health. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes			Yes	Yes	8/17/2026
Yuliya	Pieczara	My name is Yuliya, I live across the globe from this project, and even I can see that this will cause severe and unnecessary harm to the environment. The ONLY benefit I could find for everyone who isn't rich and involved? The jobs YOUR project promised us. And funnily enough, majority of those are temporary construction jobs. You can't just go through with a project this big and damaging, just because it provides billions for those who are billionaires. The damage is PERMANENT !! If you go through with this, you will be crushing the earth under the weight of YOUR carbon footprint, that YOU added. Do not erase the damage you'll do, don't sugar coat it for yourself. So, what do I ask of you? Don't go through with project jupiter. Don't contribute to tons of pollution, and don't be an environmental racist. Stop targeting vulnerable communities, and forcing locals to just accept the fate you want them to- give the public an additional 60 days to review and comment on the air quality permit. The air quality permit SHOULD NOT BE APPROVED. If it IS approved, let people speak up about how they feel. A public hearing needs to be held in Santa Teresa, in BOTH English and Spanish. Ways to participate virtually should exist too. Don't spring it up suddenly- let people choose. Don't be greedy.	1	Merged Document	No			Yes	Yes				Yes	8/17/2026

Alice	Da Silva	I am very concerned for our future. I am only 22 years old, I got many years ahead of me, but what good will those years be if our only planet is ruined. We don't need data centers, generative AI is not something we have to depend on. And it's pathetic that it's becoming our reality. Europe is going through a heatwave that has already claimed 2500 lives, at least and still counting. Each year the temperature rises in the summer, each year is breaking a new record. People are dying, because ignorant bastards in power don't care about anything but money. The poles are melting, fauna and flora are going extinct, permafrost is rapidly melting, and for what? What reason do we have to destroy the world we live in? I may not be directly affected by datacenters, but I have sympathy for those who do, and I notice the changes over the years. Please stop. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No																	
Marianne	Zaiai	Residents have no want nor need for something else that will consume New Mexico's scarce water supply and strained electric grid. The Project Jupiter commercials are deceptive. Even if the promised 1,500 jobs would be created (which is unlikely), it is not worth the environmental and community consequences.	1	Minimal Document	No							Yes	Yes			Yes	Yes	8/27/2026			
Anonymous	Anonymous	Project Jupiter will harm more than it will help communities. It has no benefit to anyone except the people profiting off said AI and its usage. It will ruin the overall environment and local ecosystem and hurt the communities around it. New Mexico Environment Department should give the public an additional 48 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No			Yes		Yes				Yes	Yes	8/27/2026			
Sawvie	Alessia	STOP PROJECT JUPITER. The entire planet earth will die and so will the rich and the poor. When the winter is as hot as the summer and the summer will melt through our homes you will wonder why and blame everything but the hungry hungry idiots that think money is what we need to survive, not food and water. The more people die the less people to grow our food or make our clothes and thats the only thing rich people care about so, there you go. Nobody's safe. WE NEED TO MAKE UP AND STOP. THIS IS STUPID. ABSOLUTELY STUPID. I WANT TO LIVE I have friends and a partner and pets and I want to see them how I want to see myself live. I dont just wanna hear that "we will adapt cuz humanity always has" anymore. Its a stupid argument. We are adapting to a hell we are creating and can fully avoid. Stop being stupid. Stop ruining our planet. Its the only planet in an entire solar system with colourful pppearing life on it and you want to kill it all for nothing. A want make our lives better, matter of fact it already made them worse, people dont think or read anymore. Technology is taking over. We are destroying humanity. STOP PROJECT JUPITER. CEASE PROJECT JUPITER. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes			Yes	Yes	8/27/2026			
Anonymous	Anonymous	Project Jupiter will harm the environment greatly and deplete local areas of the water they need in order to survive. Proposing to continue with its construction is to actively ignore the plights of the people and to deprive them of their right to live upon this planet. In addition to this, the company responsible for the construction of Project Jupiter's Data Centre (Bloom Energy) has an extensive history of dumping hazardous waste back into the environment which can cause irreplaceable harm to wildlife and air quality. Todos o Bastantes: El proyecto Bastante pide causa Bastantes de medio ambiente y agotaba acuerdo. Los mismos de agua que las comunidades locales necesitan para sobrevivir. Proponer continuar con su construcción Bastante equivale a ignorar deliberadamente el sufrimiento de la población afectada y a privarla de su derecho a vivir en este planeta. Además Bastante, la empresa responsable de la construcción del centro de datos del Proyecto Bastante, Bloom Energy, cuenta con un largo historial de vertido de residuos peligrosos al medio ambiente, lo que puede causar daños Bastantes irreparables a la fauna y la calidad del aire.	1	Minimal Document	No			Yes	Yes	Yes				Yes	Yes	8/27/2026			
anonymous	anonymous	It's always being talked about how we need to focus on the climate and help the earth. Then why build such an enormous AI data center, where you'll ruin forest, rivers and wild life? Time and time again it's being told how bad an AI, and how bad it is for the environment, we only go through with this? I'm sure you're aware of the consequences, yet the money is somehow worth more. We don't need ai data centers, we don't need projects like this. We need to think about the climate, and what we can do to help it, because right now we're just destroying the earth. I think the public should be given an additional 48 days to review and comment on the air quality permit so community members can participate equitably and if the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes			Yes	Yes	8/27/2026			
Henry	Ye	Hello, I'm from Poole in Dorset, UK and I'm asking you to stop Project Jupiter. It will affect many people all across the globe and the fact that we only have 3 years left to prevent the irreversible effects of climate change. It is crucial to stop this. Future generations, if they ever will exist due to the lasting effects of climate change, will suffer immensely from the conditions that your kind of companies left them with. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes			Yes	Yes	8/27/2026			
Anonymous	Anonymous	STOP IN STOP THIS PROJECT WE CAN LIVE WITHOUT ANY OF THIS STOP CAPITALISM AND COMMUNISM STOP TRUMP ELON MUSK STOP THIS BILLIONAIRES STOP EATING MEAT FROM SLAUGHTER HOUSES STOP EATING FAST FOOD DON'T STOP EXCESSIVE WATER USE STOP TOTALITARIANISM STOP BENGALI AND MORE STOP CUTTING TREES AND NOT PLANTING ANY AFTER. SAY YES TO CONSCIOUS DAY YES TO PRODUCTS FROM LOCAL FARMS SAY YES TO PUBLIC TRANSPORTATION SAY YES TO AGRICULTURE SAY YES TO WORK SAY YES TO MULTIPAL PARLIAMENTS SAY YES TO PLANTING SAY YES TO LOVE!!! I HEAR OUR VOICES, I HEAR THEY WE WANT WORLD PEACE!	1	Minimal Document	No									Yes	Yes			Yes	Yes	8/27/2026			
Leighton	Toiretto	The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. I want to live in a world where my future kids will not have to worry about data centers taking up all of their water, I want to live in a world where I don't have to do that. I want to see that our wildlife stays intact. I want to see that our country won't run out of clean water in the future. What these data centers do is take away clean water. It's disgusting that we take water away from living people with each data center built in a world where we only have 4% fresh water. The sheer amount of carbon released from the data center will be detrimental to our world. And my children should not be affected, develop medical issues or have to live with toxic pollution in our air and land. This is disgusting. Do better. No data center.	1	Minimal Document	No			Yes	Yes	Yes				Yes	Yes	8/27/2026			
Kris	Kliskeva	The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Project Jupiter has to end for a plethora of reasons. Data centers are stealing our water to fuel AI, which should be worth less than a human life but people higher up don't see it that way. AI already has done so much damage to our society, imagine how much more will happen within the span of a decade or two. We as a society have been dumber and lazier. By allowing data centers to be built we are jeopardizing our future, and the future of all children. More and more water is used to fuel these ugly data centers, meanwhile millions go thirsty. AI is taking over more and more jobs, which means that there are fewer jobs available to the working class. This could lead to a huge growth in homelessness in a couple of years. AI can also be used to create images and videos that have the ability to ruin someone's life. Data centers also cause a lot of noise pollution and environmental pollution. Children having easy access to AI is a really bad thing. We have seen kids and teens using this cheat on academic work and waste. This contributes to the downward trend in literacy rates and overall intelligence. In a decade or two, we could see the dumbest and laziest society yet. This could mean more homelessness, more pollution, more deaths, suicides and unavoidable, and so much more. The noise these data centers make harm the animals, nature and citizens/communities near by. Neurodivergent people could go crazy because of that constant noise, but may not have the opposite ability to tune it out. There are many more issues with data centers, however these issues can be seen by stopping Project Jupiter. The public should be given an additional 48 days to comment on the air quality permit so community members can put equitably. The air quality permit application should be denied given Bloom Energy's history of dumping hazardous waste. If it is not denied, a public hearing should be held in Santa Teresa in both English and Spanish, with an option to join virtually. Lastly, approving this permit is government-sponsored environmental racism as residents at Doña Ana County are already disproportionately impacted by environmental pollution.	1	Minimal Document	No			Yes	Yes	Yes				Yes	Yes	8/27/2026			
Laurie	Gonzales	Project Jupiter is one more project destroying our planet. Without nature, we are nothing. The more we consume and destroy, the sooner is our extinction. We aren't doing anything to prevent it because economy and money overweights human values, which is totally messed up. You think economic growth is more important than the quality of the one we breathe, of the water we drink, of the ground we plant our food in. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No			Yes	Yes	Yes		Yes	Yes	Yes	Yes	8/27/2026			
Jessica	Brown	I am asking that you deny Yucca Growth Infrastructure's air quality permit. That future is under threat with this proposed air quality permit. Acharge to fuel cells has minimal impacts on the suffering folks will endure as a result of the gas plant's air pollution. To add 30 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to the active and long-time nonattainment zone would be nothing short of blatant environmental racism. The metric area is currently 38th worst in the nation for ozone pollution and they have received a failing grade on this air quality standard every single year since 2005. They are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperacute air pollution into these communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. New Mexico Environment Department should give the public an additional 48 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No			Yes	Yes			Yes	Yes			8/27/2026			
Isabelle	Palacinen	The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? Has there been or will there ever be upstream fuel testing of methane gas to anticipate the composition of these fuel cells' emissions? How exactly will NMED enforce emissions standards without direct, long-term, continuous monitoring? Or isolate these deleterious impact on air quality without an accurate assessment of localized pollution? What about cases of catastrophic failure? Are we approving those deadly incidents of pollution in advance without any real data informing us of the risks. Is this a case? Highly flammable hydrogen under high pressure only needs a microscopic crack to find a spark, ignite, explode, and send entire neighborhoods and schools whole entirely into nearby counties. Assuming this risk, an actual gross negligence, at a scale that has never even remotely been demonstrated in practice would be unbelievably careless. These permits must be denied outright. If further deliberation is desired, a public hearing in Santa Teresa is non-negotiable.	1	Minimal Document	No					Yes	Yes		Yes	Yes	Yes		8/27/2026			
Josslyne	Joseph	The government is building data centers for a future we won't be able to live in anymore because of machines that are taking our resources! New Mexico Environment Department should give the public an additional 48 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Adriana	Anonymous	We only have one earth!! Climate change is real and I for one am TIRED of seeing what we are doing to our poor home. It doesn't belong to only humans. We must be fair and think about not just us but particular ecosystems and environments. Think about the animals that you are hurting, this is there only home too!! The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Anon	Anon	We do not need AI to exist!! Stop building data centers that speed up global warming and will eventually kill us all!! These data centers are a direct cause to the rapid rise of temperature in the world, and all for what?? An AI that can tell you how to simple math problems, or write you an essay that doesn't even sound human? It's not necessary! You're killing our planet for no reason! New Mexico Environment Department should give the public an additional 48 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Alyssa	C	We do not need AI to exist!! Stop building data centers that speed up global warming and will eventually kill us all!! These data centers are a direct cause to the rapid rise of temperature in the world, and all for what?? An AI that can tell you how to simple math problems, or write you an essay that doesn't even sound human? It's not necessary! You're killing our planet for no reason! New Mexico Environment Department should give the public an additional 48 days to review and comment on the air quality permit so community members can participate equitably. Anastacia	Bruton	We need to stop project Jupiter or else our planet will turn into Jupiter. We were fine without ai, in fact we lived many many years without it, why do we need it now? Is it because we need it to confuse us, to make us question what is real? The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Nicoleta	Popa	This planet is dying because of us and we're already seeing the effects of this through the heat wave going through Europe. A data center of this size and calibre would do so much damage to the environment, women our current situation so much and for what? For chatgpt to give more answers to basic questions? AI is not a necessity, people have forgotten to do things on their own due to getting so much help to the most basic of questions and tasks from AI. What we ACTUALLY need is to nourish our planet as much as possible so we have a place to live in peace and avoid more severe weather disasters that are bound to come our way at this rate. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Anon	Anon	Artificial intelligence has become increasingly damaging to our environment. Instead of ruining the only planet we can live on. Ruin the schools, fund community centers, pay teachers and educators and we wouldn't rely on having to on AI. Ai not as the dissension of not listening to our voices. America is for the people by the people, do this one thing for the people The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Johnathon	Veiens	Project Jupiter is HORRIBLE and generative AI as a whole is horrible. It's already been used for horrible things and will continue to be used for such horrible things, and AI data centers are horrible for the environment as a whole. No body likes AI and we don't need it either. Fuck generative AI and you billionaire pigs. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Anonymous	Anonymous	Stop this, why are we destroying our planet, I'm 22 and I don't wanna grow up where the earth is literally burning up, I want my kids and grandkids in the future to have a normal life without this constant greed for ai and data centers. Why are we doing this now. When the global warming is at its peak and will soon be irreversible. It's now we should care and decrease global warming. And why is it that maybe 20 years from now we kids will have to clean up from all the billionaires and adults that are making stupid decisions. I'm young but I still know the disasters that will happen in the future. New Mexico Environment Department should give the public an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Anonymous	Anonymous	I am very concerned about the development of this project. This poses serious impacts to health and lives of the local residents, and has an alarming negative impact on both the soil and water environment. The air quality permit that Bloom Energy require needs to be denied, in order to protect the environment and to foster a healthy and prosperous New Mexico for present and future generations. This company has a history of illegally dumping hazardous waste and cannot be trusted with such materials that if mishandled have the potential of making local disaster. The EIS published that this project gave the plant would require almost 1 million gallons of water per day. Reservoirs and lakes are drying up nationwide. It is deeply concerning to think that such large quantities of water will be used in this way, during a time like this. The long-term health risks to the community from pollutants such as benzene and methanol would be highly detrimental to the local community. It is alarming that developers did not propose pollution controls. They estimated the plant's pollution based on tests from a very small unit (only 454MW) but the power plant they want to build is 37,000 times bigger. A 24% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Estimated pollution from the plant's gas pipelines is not included. Please do the right thing for the people and the environment and prevent this project from going forward. The potential cost to life and the environment is too much to gamble with.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Janelle	Wilcox	Building this AI center will make thousands of New Mexicans lose trust in the people we have put in charge currently. Not only are you changing our beautiful natural environment, the damage that the data center could cause for the future livelihood of New Mexico could be detrimental to our communities. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. New Mexico does not need or want a data center we should be focusing on making New Mexico better, not worse with this insane amount of money being wasted on a data center that does not benefit New Mexicans at all. Not to mention how it would probably be a waste of money anyway with the way AI is failing to make companies a profit and consumers just don't like ai, period. The building will sit there and rot away while anything valuable has already been stolen, it's adding no value to the environment, community, or even on an economic scale. AI is a failing investment and if New Mexico gives in to a data center New Mexico will fail too. Please think of the future for New Mexico and for New Mexicans who live on this beautiful land and want to continue living here without the horrors of what living by a data center could put us through. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Sydney	-	We only have one planet. Please don't let the human race wipe itself out when there is so much time left to stop it. Everything is burning up, everyone feels the heat from the now data centers. We survived without this. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No									Yes	Yes	8/27/2026			
Jessica	Dukes	YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCS, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environment pollution compared to the rest of New Mexico. NMED should give the public 48 days of additional time to review and comment on the application to ensure everyone can meaningfully comment and participate. If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	1	Minimal Document	No									Yes	Yes	8/27/2026			

Gracy	dhungel	Project Jupiter should stop. It's going to have great consequences on the environment as we already have limited drinking water. This project will just heat the earth more, plus reduce the water supply. So please stop project Jupiter!!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	[redacted]	Merged Document			Yes	Yes	Yes			Yes	Yes	8/17/2026
anonymous	anonymous	On the year that we are going to experience a Super El Niño, where 1300 people died just in Europe due to the heat, where climate disasters are intensifying, I got to know that there will be a data center that will aggravate everything. Instead of investing in stuff that is destroying our planet, why not on the space data-center? You'd have way less consumption of resources to keep the data centers cool, since they are in space, and you'd stop damaging our environment so much. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Alicia	White	Project Jupiter must be stopped. Our planet will be heavily damaged by the carbon emission that is posed by the data center. Bloom energy has a history of illegally dumping hazardous waste. Please listen to us and stop the continuation of this	1	No		Merged Document								Yes		8/17/2026
Luana	.	On the year that we are going to experience a Super El Niño, where 1300 people died just in Europe due to the heat, where climate disasters are intensifying, I got to know that there will be a data center that will aggravate everything. Instead of investing in stuff that is destroying our planet, why not on the space data-center? You'd have way less consumption of resources to keep the data centers cool, since they are in space, and you'd stop damaging our environment so much. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Karman	Khatkar	Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilment of the authority vested in you. If you truly cared about your people you would not be letting this project happen.	1	No		Merged Document					Yes					8/17/2026
N	J	This new data center will devastate the climate of our current earth. Tons upon tons of carbon are going to be released into our already damaged atmosphere. The data center will only push us forward in the destruction of our home. It is not, even by a fraction, worth it. The first thing I would like to say is that the data center will harm the people of Doña Ana County. The county has a population of 229,091 - the amount of people that will effected both communally and individually by the establishment of projected Jupiter. Data centers have shocking side effects on those who live nearby them. These effects can include the discharge of cancer causing chemicals, such as benzene. The data center can also lead to heavy metal waste, these include lead, arsenic, and chromium. In addition to these already deadly chemicals, the discharge of other toxic compounds such as sulfur are highly likely. All of these chemicals produced have a garenteed chance of poisoning the population and communities of Doña Ana County and can cause blood cancer, blindness, birth defects, and various types of lung disease. This data center clearly has a high chance of causing detrimental effects of the community of Doña Ana County. The environmental impacts will also be devastating, with over 2GW of energy being produced under this new data center. The carbon footprint of such a massive project will produce roughly 10 million tons of carbon dioxide annually, this far exceeds environmental capacity. This project should take into consideration the following: The approval of Blooms air quality permit will be deemed a form of government-sponsered environmental racism, as the people of Doña Ana County are already unfairly affected by environmental pollution as well as the air quality not meeting federal standards. The air quality permit must be denied, given Blooms unclean legal history. In an outcome where the permit is approved, a hearing must be held in Santa Teresa - open to the public.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Ava	Nerison	We only have one planet we can properly function on without the need of constant life support. Ai and data centers are draining the earth of its water- which is needed for most life on this planet. We do not need Ai to function as a society, it is not bettering our lives, but only worsening the quality of this beautiful planet for future generations. And by future generations, I mean the very next generation of children. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document			Yes	Yes	Yes			Yes	Yes	8/17/2026
Charles	n/a	The fuel cells cause hazardous waste and impacts the health of locals in the area. It will also pollute the earth. For years, Doña Ana County had air quality that does not meet federal government rules. Approving this permit would be government-sponsored environmental racism. The public should be given 60 more day to review and comment on this.	1	No		Merged Document				Yes	Yes		Yes	Yes		8/17/2026
Amelia	Anonymous	You are ruining the world. You are trying to convince us thats its good but all u care about is money, the massive heatwaves in Europe and ice melting is all human fault. Why are we even born? To destroy the earth just so you can get your money? Your stupid money can wait. WE ARE DYING. WE ARE DESTROYING OUR ONLY HOME. AND YOU ARE JUST HELPING THEM. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	When considering Bloom Energy's history of illegal dumping of hazardous waste, approving their permit would be unethical and unjust to the community members of Doña Ana County.	1	No		Merged Document								Yes		8/17/2026
Rosa	Ramirez	Please stop data centers. They are not welcome in our community. We need clean air, water and lower electric bills. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document			Yes						Yes	8/17/2026
Anonymous	Anonymous	STOP THE BUILDING OF PROJECT JUPITER. You are destroying the land, surrounding animal habitats and poisoning our Earth. How will you feel when you're one of the biggest contenders when it comes do destroying our Earth? If you want to protect our planet, your families, your children and their futures stop the building now, remove it please. If that's not enough of a reason here is more: the air quality permit should be denied given Bloom Energy's history of illegal dumping hazardous waste and approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution - the air in this county has been called a 'non-attainment' zone for years meaning the air quality already does not meet federal government rules.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Kadi	F	AI is ruining our world. It's ruining our planet, our people and our lives. AI data centres are destroying our wildlife, and biodiversity is rapidly declining. So many endangered species are losing their space to thrive and reproduce and simply live their lives. Families are losing access to clean drinking water, a basic human necessity and may I add a human right, from overconsumption of generative AI. There are so many more problems than just our environment, though. People are lacking common sense, initiative and basic knowledge, and we have generative AI to thank for this. Having unlimited and public access to generative AI means that people are beginning to completely rely on this. Humans are quite simply becoming stupid; having no initiative at all thanks to "just asking ChatGPT" and not bothering to go and research something because, again, they can "just ask ChatGPT". AI itself isn't the problem, it's the accessibility and publicity. AI should be used as a tool, not to replace everything we already know. Artificial Intelligence should be used as a tool for specialists in certain sectors, e.g. healthcare and emergency services. Giving the public unlimited access to AI means that our brains are declining, lacking the stimulation they need to grow new brain cells and form important connections. But one of the worst parts is that by giving the public access to this, we are also giving it to children. Children with devices have become increasingly more common these past few years, and continues to become even more normalised. By giving children access to AI, they are often exposed to inappropriate 'chat bots', designed for adults to chat to and often simulate a romantic or sexual relationship between the human and the robot. Children and even toddlers are given access to this which I quite frankly think is disgusting. As a world, we don't need AI. We were doing fine, even better than we are now, without it. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document			Yes	Yes	Yes			Yes	Yes	8/17/2026
Grace	Dukes	I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject YGI's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	1	No		Merged Document				Yes	Yes		Yes		Yes	8/17/2026
Lamichhane	Samridhi	I believe data centers like project Jupiter will be a huge harm to our environment including all the natural resources surrounding it, increasing the already worsening climate change. No matter what we do, we all know that we can't eat money so its better to leave the Earth as it is, without nudging it and pushing its limit any further. It destroys the air, water, land and everything else. It uses extensive amount of water to cool the systems. the water dont return to the water cycle hence harming the local watersheds and resources which also disrupts the lifestyle of the people who use the same water resources. Not to mention all the carbon emission it will cause due to the wide use of energy spoiling the air quality as well. This puts the health of people in risk. Slowly but surely, people's lungs will get damaged, they will suffer from asthma and will even cause kidney, live, heart and brain damage.	1	No		Merged Document			Yes	Yes				Yes	Yes	8/17/2026
Alfred	Pike	The direction of industry and artificial intelligence with its factories and data centres is one that should not be taken, it puts not only the environment and ecosystem of the entire planet at risk but the whole of human population. I and many others alike will not stand for gigantic data centres being built in order to support the ridiculous and unethical amount of recourses used to run AI super computers. This has to stop. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Kaithlene	Esparza Martinez	I am a born and raised citizen of New Mexico. This state does NOT need Project Jupiter. END PROJECT JUPITER. We are LIMITED on water and our air is dry enough. Building this data center will destroy our plants and our society as a whole.	1	No		Merged Document			Yes		Yes					8/17/2026
Norah	bediako	My name is Norah, I live in France. In june, the country has been though the hottest days ever registered. I am 16 years old and now when I think of my future, I also wonder if we even could survive. Everyone is boycotting AI to save the Earth and to protect art, so don't use planet we are trying to save to make even more useless money. How is that money going to be useful if everyone died because of you. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Ian	Del Valle	From my perspective, Project Jupiter is a project that should not move forward because the risks and unanswered questions outweigh the promised benefits. It feels like something that's being rushed without enough transparency, accountability, or meaningful public input. What concerns me most is the uncertainty surrounding its long-term impact. Projects of this scale can affect communities, the environment, and people's daily lives for years to come. If those impacts aren't fully understood or openly discussed, moving forward is irresponsible. The potential environmental impacts are another major concern. Large-scale developments can damage natural habitats, reduce green space, increase pollution, and place additional strain on local ecosystems. Once these changes occur, they can be difficult or impossible to reverse. There are also economic concerns. Projects like this often require significant funding, and if costs exceed expectations or the projected benefits fail to materialize, taxpayers and local communities may ultimately bear the financial burden. Those resources could potentially be invested in projects with clearer and more immediate benefits. The impact on the community should not be overlooked either. Increased traffic, construction noise, changes to neighborhoods, and pressure on local infrastructure can reduce residents' quality of life. If the people most affected by the project don't feel their voices are being heard, it creates distrust and resentment instead of support. I also believe that trust has to be earned. When people feel excluded from the decision-making process or don't receive clear, honest information, it creates doubt instead of confidence. A project that affects so many people should be built on openness, not assumptions. To me, Project Jupiter represents a lack of transparency and an unwillingness to address legitimate public concerns before making major decisions. Until there is stronger evidence that the benefits truly outweigh the cost, the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document				Yes	Yes		Yes	Yes	Yes	8/17/2026
Jupiter	Horo	We need clean water to live, its not optional and not easy to get. we won't realise what we have until it's gone. As someone who wants to grow up, and have children who don't have to grow up in fear and anxiousness over whether or not they'll have to sleep thirsty, hungry and sick I submit a comment to go against project jupiter. We only have one earth, we can't mess it up. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document			Yes	Yes	Yes			Yes	Yes	8/17/2026
Rachelle	Serna	Project Jupiter is not what's best for the community. I've talked to people where they're building AI data centers. They told me that they hate them there for many reasons such as traffic, noise, and the cost of living. Cost of living prices are already high enough everywhere as is, but they stated renting a home was currently at $4,000 or more in their city due to the AI data center which most people can't afford. They didn't even mention the environmental problems with them but water scarcity is a huge concern in our area. If we have extra water to spare at all it should be going to the farmers that struggle with the little water given from their water rights they pay for every year regardless of how much they're allowed to use. It's awful that community input wasn't taken before our political leaders gave Project Jupiter the go ahead. Anyone in a position of power that is supporting this should be removed. All they see is dollar signs. I would like to know if the citizens of Dona Ana County will be having to pay any of the costs for Project Jupiter because I've heard things that make it sound like it's costing us money without our knowledge.	1	No		Merged Document			Yes		Yes		Yes			8/17/2026
Zaylin	F	I am not a resident of Southern Doña Ana County, but I have a right to speak on behalf of those residents who do not approve of this project. This is extremely unnecessary. At what cost will you stop? When the earth has had the worst nature disasters that destroy families because of climate change? Or worse, the environment changing because of the lack of accessible habitat for animals that have a life with more meaning than a data center. Take into consideration that we can thrive as a nation without this kind of energy, water, and fossil fuels being used and/or put into the environment causing climate change and the earth to overheat at a detrimental rate. When will you put your money into more important corporations? Like saving polar bears, or replanting trees or even trash clean up. When will you realize? How would you feel, as a person, an human being having to deal with a huge data center in your neighborhood? Sucking the life out of water sources and the environment. At what cost will you stop? Put yourself into the collectives shoes that you are affecting the most. This is not a way of living. The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? Has there been or will there ever be upstream fuel testing of methane gas to anticipate the composition of these fuel cells' emissions? How exactly will NMED enforce emissions standards without direct, long-term, continuous monitoring? Or isolate their deleterious impact on air quality without an accurate assessment of localized pollution? A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to centralize the 2,275 individual stack emissions into an exponentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring conditions that are "practically enforceable" under 20.2.70.302.B NMAC. A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit.	1	No		Merged Document			Yes	Yes	Yes	Yes	Yes			8/17/2026
anonymous	anonymous	I want to live, I wanna live in a world where I wouldn't have yo worry about global heat that Ai is currently worsening and you can't deny that, I wanna be able to live knowing that my future generations wouldn't have to live what we're living, I wanna be a part of a world that cares about it's planet, this constant exploitation for resources is draining all of us, this "evolution" as in Ai becoming a big thing is rely not necessary, building that data center is just minimizing our chances of staying on this earth even further	1	No		Merged Document	No	Obscene - Non-Substantive								8/17/2026
anonymous	anonymous	You need to give the public at least sixty days to make a comment. This project is not only harmful, but environmental racism. Residents in that county are already impacted by pollution at a higher rate than their white counterparts. You have a chance to stop it. We don't need a data center that large nor do we need one at all. It is a sign of greed and racism. Two things we don't need	1	No		Merged Document					Yes					8/17/2026
Logan	Secor	Our metro area is already currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities.	1	No		Merged Document				Yes	Yes					8/17/2026
Chris	.	We shouldn't be doing this. This is such a major problem. This is going to drain peoples waters, and it will expand to other cities and small town areas and not to forget the most important thing (ECOSYSTEM'S). You guys want to build more stuff and lie to us that it's going to do better I don't understand why we keep doing this instead of looking forward other ways or other problems that people many ask you people but don't listen. STOP THE JUPITER PROJECT	1	No		Merged Document			Yes							8/17/2026
Mia	Houston	Stop this data center. A large portion of my family live in Santa Teresa and have for their whole lives. I used to, but I have moved to live with my husband. We often go there for holidays, celebrations, or just visits. I don't want to lose my home. My family don't want to lose their home. My family's and thousands of other people's family's health, safety, and livelihood, should not be worth less than some huge corporations building something that destroys our earth. It poisons the air, takes up all of the water, deforests acres and acres of land, kills animals, destroys homes, and so much more. The air quality permit application shouldn't even be considered, I mean look at Blooms history. They said they are a clean company, yet they illegally dumped hazardous waste. Doña Ana County has been a non-attainment zone. And passing this permit would be literal government-sponsored environmental racism. If the permit is not denied, a public hearing needs to be held in Santa Teresa, translated in both English and Spanish, with an option to attend virtually. You are killing a planet that's already half dead.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Silas	Anonymous	Globally, AI usage is an issue. Outside of environmental issues which im sure everyone is already aware of, ai is being used to sexualise and harm women and children. We dont need more ai, its adding nothing to our society and is creating dependence, meaning the entire next generation arent going to succeed without the use of ai systems. No more data centres, no more AI. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Kurt	Depner	Wow, you sure are burying the truth in this comments section. Yucca Growth Infrastructure? This has Project Jupiter and big tech dystopia written all over it. No we don't want AI, data centers and your resource gobbling bullshit to feed Oracle's insatiable greed. It's a lie that this a great job creator. Never mind the effect this will have on our electric bills and water table. Did you know that El Paso Electric is asking the regularly body for an 80% rate increase? 80%?!? Hmmm... I wonder why. Take your AI slop elsewhere. We don't want it.	1	No		Merged Document			Yes							8/17/2026
Damiya	Malone	Building a data center that will release 10 million tons of carbon Dioxide annually when most of The untied states of America is in a drought could possibly be one of the most idiotic things that could happen, it will put thousands of people at risk of no water at all and will be a very hurtful ending to our environment when its already dying from other things. Stop project Jupiter!	1	No		Merged Document			Yes	Yes	Yes					8/17/2026
Ariana	Anonymous	Nobody needs these overkill pollution "data centers" NOR IS IT WANTED!!!! It's not beneficial for nobody but the greed out of touch parasites of billionaires and people like Peter Thiel and the corrupted government. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No		Merged Document				Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	STOP THE BUILDING OF PROJECT JUPITER. You are destroying the land, surrounding animal habitats and poisoning our Earth. How will you feel when you're one of the biggest contenders when it comes do destroying our Earth? If you want to protect our planet, your families, your children and their futures stop the building now, remove it please. If that's not enough of a reason here is more : the air quality permit should be denied given Bloom Energy's history of illegal dumping hazardous waste and approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionally impacted by environmental pollution - the air in this county has been called a 'non-attainment' zone for years meaning the air quality already does not meet federal government rules.	1	No		Merged Document				Yes	Yes			Yes		8/17/2026
Lauren	Harteg	Hi, I know I am young, but even I see the problem that this data center will create. Climate change has been accelerated and worsening every year, we do not need something that will make it accelerate faster. I want my children and my children's children to have a safe planet to live on, I want them to have Earth, but due to projects like this seems less and less likely every year. Project Jupiter and projects similar are destroying the Earth when we should be trying to fix what we have already broken. Instead of investing in data centers, we should be investing in electric vehicles, renewable energy, and a greener community. I know that won't give you money in your pocket but it will give us all the security to live on the planet we desperately want to protect, which is worth more than anything money can buy. Consider the numbers and damage Project Jupiter will cause. Consider all the voices that are speaking up about this. Consider the environment and planet you are going to destroy. At least consider your children, and the kind of planet you are forcing upon them. Thank you.	1	No		Merged Document	No	Obscene - Non-Substantive			Yes					8/17/2026
Anonymous	Anonymous	Data centers threaten the livelihood of all who live around it. They deplete water and natural resources, release huge amounts of carbon dioxide into the atmosphere, and use up tons and tons of electricity in the surrounding area. The implementation of generative AI on this level truly will not benefit human kind in the slightest. We have survived our entire existence without AI. If its so harmful to humans and the environment, genuinely what is the point of continuing to create huge data centers that do nothing but harm the earth. People are already dying in Europe from CLIMATE CHANGE-led global warming, and the states are experiencing the hottest recorded summer. If you care about the wellbeing of the planet and humans, because you sure are foolish for thinking AI will benefit humanity, please stop the integration of this huge data centers that will do nothing but accelerate human extinction. Deny the air quality permit application or hold a public hearing in Santa Teresa. Approving this permit would be blatant environmental racism on a governmental level. Please, the people of Pennsylvania, beg you to put a stop to this.	1	No		Merged Document			Yes	Yes	Yes		Yes		Yes	8/17/2026
Brooke	n/a	The future is in OUR hands and WE are ruining it, were ruining our future and everyone else to come, project Jupiter will effect us, releasing fuel cells into the atmosphere or wasting tons of water on a data centre we do NOT need, In Morgan county Georgia people do not have clean drinking water. Is that what you want? For people, innocent people to not have drinking water because of data centres they didn't ask for? To be punished on behalf of "let's build a data centre." no. We are ruining our future and killing our planet. "For years, Doña Ana County has been called a 'nonattainment' zone— this means the air quality does not meet federal government rules." We want people to have clean water and clean air to breathe, on the planet we live on, we shouldn't be worried about the air and water being dirty or not being able to access a clean version of it, put yourself in the position of a family, maybe a young child or an elderly person with no clean drinking water or contaminated airs, it's not fair. It's cruel. We're killing our planet and ourselves while we're at it, future generations were destroying it for them, people can't afford clean water in places because of this. Stop project Jupiter. Stop denying our planet is dying.	1	No		Merged Document			Yes	Yes	Yes		Yes			8/17/2026

Mishaal	Fatima	Symptoms already and the consequences are real. Dont build the data center, stop destroying us and yourself. My cousins can't live normal lies. They are constantly nauseous, throwing up and have puffy eyes because of the air index dropping. Sometimes their skin starts to peel. My freinds with asmath have started finding it harder and harder to breathe even in the wilderness. Its horrible.	1	Merged Document	No	[redacted]					Yes				8/17/2026
anonymous	anonymous	I respectfully oppose the proposed Project Jupiter data center. While I understand the potential economic benefits, I'm concerned about its long-term impacts on our community as a whole, not just the people living nearby. Large data centers can require significant amounts of electricity and water, increase traffic during construction, strain local infrastructure, and affect the environment and quality of life for residents across the area. I encourage decision-makers to carefully evaluate the environmental impacts, infrastructure demands, and broader effects on the community before approving this project. Any development should prioritize transparency, sustainability, and the well-being of everyone who may be affected.	1	Merged Document	No	[redacted]			Yes		Yes	Yes		Yes	8/17/2026
Katelyn	Orozco	I wish to enjoy my future with a healthy and better planet, and allowing this permit to pass and thus allow for project Jupiter is going to be detrimental to the planet. As an environmental organization, you should be aware that this project poses greenhouse gases that are more than the three biggest cities in New Mexico combined. With this awareness, passing the permit will not only set back New Mexicos climate efforts but destroy a generations future. Iurge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Blas	Villanueva	The complexity of this issue demands that time for comments be extended for the public. The use of water for cooling this AI/data center will result in a loss of 3/4 of the water used as evaporation and New Mexico will never get it back. We are a DESERT state and have no water to waste. Examples of this are nationwide, as noted at The use of microgrid laws by such a huge development violates the intention of the microgrid law. Do not allow this to happen. The negative impact of project Jupiter will fall affect minorities in the area of Dona Ana County while the benefits will accrue about of state. These harms include noise, air, and water pollution. DO NOT APPROVE PROJECT JUPITER	1	Merged Document	No	[redacted]			Yes		Yes	Yes			8/17/2026
Zoe	.	We do not need ai. We do not need more data centers. The world is in a fragile state and we need to be doing everything we possibly can to help the earth, not ruin it for money. This will put everyone at risk. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I don't have much say in this but I believe that humanity as a whole comes first. A data center that uses more water than anything else in this planet and creates more pollution from one source ever seen shouldn't be just something we create. Our inability to see the wrong in this is the exact thing that threatens to collapse us. I believe that we shouldn't allow this to just be created. Including 60 days for review is fair, it shouldn't be a "choice" it is our right to participate and we should be allowed to all vote regardless. Our air quality should come first, after all it is the thing that keeps us alive which is why their permit should be denied as it is plaguing our air and destroying us from within and if it is not denied a public hearing is demanded. Due to this, approval of said permit is considered government-sponsored environmental racism. This is due to residents at Dona aña County have been constantly impacted by pollution leading to the air quality being less than what is needed for federal government rules. I conclude this statement with hopes that whoever reads this may find the goodness in their heart to care for our planet. After all this is the only one we have.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	8/17/2026
Eliyaas	Aidid	I am against project jupiter. I do not agree with the proposals of destroying our climate. It's destroyed enough as it is and i am sure we as a whole won't be able to see past 2035 on the way we're heading. It's disgusting. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Ethan	deBoer	Project Jupiter needs to be stopped. We do not need AI, it brings no good to us. It's been proven to give false information and it can't even properly generate a human hand. Why bother to waste an unreasonable amount of water and release a horrible amount of carbon dioxide into the air every single day. We are facing so much damage due to climate change, that's our fault. We need to fix it, we need to give back to the earth, and we need to use less technology. Where they wish to put this data centre is used to have a beautiful river that is now nearly completely dried up before summer has really begun. The centre would dry it up completely, that is incredibly sad. This is a horrible decision that cannot be made. There has also been toxic waste dumped in this area, do you know about the Niagara Falls incident? A town who thought they lived safely suddenly started realizing weird deformity's in all newborns. Mothers saw that many others children had the same issues, which isn't normal at all. People had also been dying faster than normal. They did an investigation and it was revealed that the government knew of the waste that had been dumped for years, but cleared it and built a town anyway. Toxic chemicals were still everywhere, first on the ground and in the water. Then they built the town and the chemicals spread into everything. This county you want to put the data centre is also heavily impacted by environmental pollution. This land, habitat, and ecosystem is collapsing like many other places around the world that are not just homes to us. There are so many animals facing extinction because of us. We need to stop and help them. If we seriously are the most intelligent species why do we continue to hurt them? Shouldn't we used our intelligence to help and support them? We should be focused on eliminating useless forms of technology, especially Ai, we should be planting more trees to restore forests, we should lower the amount of deforestation that occurs globally, We should be more mindful about how much water we use, we should make illegal to not recycle, we should find ways to reduce landfills and keep stuff out of our oceans, we should find a way to save the arctic. There's hundreds of amazing things we could do for this earth that we don't. We need our earth not Ai. When the last tree falls, the last river is poisoned, plants can no longer grow, and animals have been wiped out. You will realize the damage that this centre along with all centre's and additional supports to Climate Change and environmental pollution and impacts have caused. Where will go after that? We will never be able to fix that. Please, if you care at all for the environment, ecosystems, habitats, animals, our earth, and our futures then do not build this data centre.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes		8/17/2026
John	Anonymous	I live in Sweden and I know that the ai data centers will make our climate worse by doing stuff like making our water levels ride because the construction will put out a bunch of bad gases and will make the layer of green house gases go out of balance and make the earth hotter I also know that our water that we have on our planet that is getting used is from lakes and go into oceans when it evaporates which makes the water cycle obselete and it will not work because the clouds that will be created will most likely drift over To a ocean and rain there instead of raining in our lakes or ground. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Wavey	Villanueva	We don't need a data center in the middle of a desert. This is detrimental to the environment and to our water supply. Additionally, the economic bubble for AI data centers is bound to pop soon, and we will be left with wasted money and wasted space. We are begging you to listen when we say this is not what New Mexico needs or wants.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Anonymous	Anonymous	Project Jupiter should be stopped because we don't even need AI that much. We can live without it. This project is also a climate disaster. Barely anyone wants these data centers to be made anyway. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Jessica	Boyd	AI was already a hindrance to people's every day lives when it came to their jobs. Now that these data centers are being built, the environment in towns which they reside, are becoming less flush. The air is being filled with millions of pollutants, The water is becoming scarce, The water is becoming less usable. I refuse to believe AI can ever be good if this is its effect on the world.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Alice	Quale	I reject Project Jupiter's use of water or methane gas to power their AI data center. We are in one of the largest droughts our state has been witness to. We don't have anymore to give. Get out of our state!	1	Merged Document	No	[redacted]			Yes						8/17/2026
Anonymous	Anonymous	Please do not continue to build this Ai data center. It does nothing but take desert land to many animals for 1. It's going to pollute our air and take our water when we already struggle for water in this desert heat. Our generation and future generations have to breathe toxic air. All just because of the internet and Ai. That is not important. Being outside in the sun with no polluted clouds of trash in the air but a beautiful sun with clouds and nature touching our skin as it should be. Please don't build the data center. We can build more opportunities than this. Open more store or family activities if people want jobs and this to do. Please think of the people and future generations. Don't build the center!!	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive	Yes		Yes				8/17/2026
Clifton	White	We do not want more ai!! Let alone a massive data center that will only exacerbate the problems we are already facing in NM. Ai is both ethically and economically dubious there is no reason for us to suffer for something that will never benefit us. Stop Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Nikola	Anonymous	I am deeply troubled by the future of our planet and our climate, as summers continue to get hotter every year and I physically see the water level differences in my local area. I hope our political representatives take real action to stop Project Jupiter, and similar climate threatening projects in the future. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anon	Anon	A fuel cell plant this size has never been constructed before. PJ's power plant would be 1,000x larger than the biggest fuel cell power plant Bloom Energy has ever built. It is dangerous to the residents of Dona Ana County and beyond. Please do not allow this monstrous power plant in New Mexico.	1	Merged Document	No	[redacted]					Yes	Yes			8/17/2026
Shanice	Somda	I do not live near the plant nor do i have any family there but from a human to another we cannot continue with this project. I firmly believe people who fund or demand these projects are part of higher society or are part of the higher class in the wealth gap. Nothing irritates me more than those people destroying lands that aren't theirs for their own monetary benefit. This project is destroying communities and with the amount of carbon emissions released yearly, is killing our future. I am only fifteen, i haven't gotten to experience nor enjoy life enough. I didn't even graduate from high school yet. I have to live on this earth knowing i live with thousands of plants like these killing me, my friends, my family and people i don't even know. You are killing communities, draining their water without anyone's approval other than the only people that won't be affected. These projects are killing minorities that governments don't care to defend. The rich are further insulting groups that had been insulted, discriminated against and colonized, including some communities like Doña Ana, majorly affected by bad air quality which nobody is fixing. Instead of using their money to fix climate change, or help communities, they use it to kill us faster. The air quality won't just harm locals, it will harm the rest of the world quite fast considering the amount of pollution yearly. Huge decisions like these should be voted upon or taken to the public in some way or even, taken to court in an accessible way so that anybody may be able to attend. Please at least let the public have time to review the air quality. As a matter of fact, the air quality permit should be denied because of the company's history of dumping illegal hazardous waste. Consider the pleas of life of your communities and of the world.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes		8/17/2026
Amelia	Anonymous	Please, are eco system is completely at a lost the way we are going. Keep destroying trees and water systems we will have no way of living or surviving because all of our natural resources are slowly becoming more and more scarce and destructed. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Grace	peters	In the 1950s, uranium mining moved to Navajo Nation outside of Gallup. Big companies like UNC promised new jobs. They promised wealth to residents. They promised a change in the right direction. Now, in 2026? The jobs are gone. Uranium dust lingers. Babies are born with uranium in their bodies. Our elders are dying of cancers. They made promises that they did not keep, because they knew that if they got access to our state, no financial penalty, no damage that they could cause, would be worth avoiding for the profit their companies could gain. We are a valuable resource to them, and a finite one. There's one key difference between then and now: this time, we know the consequences. We know what will happen. We will be depleted and left sick and dying. But we know how to prevent it! To this day, I have not met a single New Mexican who supports the construction of the Doña Ana County data center. Political party has had no impact on their opinions. The fact of the matter is simple: those constructing Project Jupiter have no motivation to protect New Mexicans. They have no incentive to protect our health, jobs, and land. Say no and give them hell. For OUR PEOPLE. So our children have drinking water that isn't brown. So we can water our crops. So we have inhabitable cool lands and our elders are protected from heat exhaustion.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Anonymous	Anonymous	I am a resident of _____ and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing. In the 1950s, uranium mining moved to Navajo Nation outside of Gallup. Big companies like UNC promised new jobs. They promised wealth to residents. They promised a change in the right direction. Now, in 2026? The jobs are gone. Uranium dust lingers. Babies are born with uranium in their bodies. Our elders are dying of cancers. They made promises that they did not keep, because they knew that if they got access to our state, no financial penalty, no damage that they could cause, would be worth avoiding for the profit their companies could gain. We are a valuable resource to them, and a finite one. There's one key difference between then and now: this time, we know the consequences. We know what will happen. We will be depleted and left sick and dying. But we know how to prevent it! To this day, I have not met a single New Mexican who supports the construction of the Doña Ana County data center. Ariel	Ross	To begin, this project should be illegal. Data centers that are a fraction of the size are already detrimental to the communities and environments surrounding it. To multiply ig by 10x would do unremarkable damage to the ecosystem. The resources are already limited and with this data center, they will be milked dry. AI is doing so much harm for the public for something that nobody even asked for. If you cared about our planet in the next 5 years, you wouldn't have to think twice about implementing this project. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Kelsey	rust	My name is Kelsey. I am a New Mexico resident in Albuquerque, New Mexico. and I am writing because I am concerned about the risks and harms Project Jupiter poses to vulnerable and low income New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. We are clearly seeing the affects of greenhouse gases as the global temperatures reach record levels around the world, fueled by greenhouse gases production which is what Project Jupiter will contribute to. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Clean air should not come in the way of profit margins. Protect New Mexican futures. Sincerely, Kelsey Rust	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Gia	morales	Project Jupiter will devastate our ecosystem and water supply. The creation of data centers hinders wildlife and the nature surrounding it. Data centers are not needed to sustain life--- water is. Taking up one of our most valuable resources to create a data center is harmful and unessecary. The amount of toxic chemical pollutants that will be released by this data center will not only harm the surrounding nature, but is detrimental to people's health. Certain pollutants can cause asthma, respiratory issues, brain damage, several types of cancer, and death. The amount of hazardous waste being produced by this fuel cell plant such as benzene (a cancer-causing chemical), lead, arsenic, chromium (heavy metals), and sulfur, will seap into the soil, the water, and will reach human life leading to devastating outcomes. The eradication of Project Jupiter is necessary for the health and safety of the ecosystem and surrounding occupants of the designated building grounds. Stopping the creation of this data center now will prevent a domino effect of large unessecary data centers being created, taking up our land, ecosystems, and right to fresh air and clean water. Stop Project Jupiter.	1	Merged Document	No	[redacted]			Yes		Yes	Yes	Yes		8/17/2026
Amie	Yansane	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Project Jupiter is an exploitative project that will jeopardize the health of the community and ecosystem surrounding it.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	8/17/2026
Charlotte	ampbell	I come from Plymouth county in MA. Even I know how terribly dangerous this data center is. it will destroy air quality fast. it will deprive those around the center of water. The Carbon emissions ALONE will impact the world in such a negative way. If the country keeps moving like this we will have no world in a matter of three years. We need to stop this now. Make things right.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Leah	Montoya	Project Jupiter affect A lot of the times we as people always want the best even if it means prioritizing ourselves first but what happens when it affects not only the people but the environment around it? When looking at the project I understand the usage of AI and how it can help people and how it navigates data. I understand and sympathize with the fact that a lot of have needs to be meet whether it be by doing right or wrong it's human nature. The problem with this is that it affects other people, but not only is this going to affect other people. It will also affect the Earth itself. By creating this data center we are allowing more catastrophic events to happen or at least put more danger on earth than we have now. By creating this data center, you are basically saying that you don't care about what affects the planet and what it does to the people in it, if you already don't know half of the planet has already been affected by the usage of AI a.k.a. artificial intelligence. Some examples of put right here are lake Irwin in trucker Georgia Iran lake Irma it lost 90% of its water and it's critically overdrawn in 97% of Iran is affected by some level of drought. Texas Medina Lake, lake Wylie Falls North Carolina. The world's fourth largest lake lost 90% of its water. It had 40,000 tons of fish now all diminishing to zero all 24 species gone. Rio Grande dried up before summer even began and on top of that we have carbon dioxide which will be affecting our lungs. Not only our lungs, but our environment too the fruits and vegetables that we need for survival all of the things that we eat all the things that we see all of it would be affected more than it already has. So in conclusion, it brings me back to my question are you willing to find out what happens by creating the data center? Or are you willing to stop now and see what we can do better as a society to recover our environment?	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026
Roselyn	L.	it is so disturbing and ignorant to say that this will not affect our water supply.	1	Merged Document	No	[redacted]			Yes						8/17/2026
Anonymous	Anonymous	If this data center is built this would distort the way of life in beautiful New Mexico. If the NMED mission is "to protect and restore the environment and to foster a healthy and prosperous Nm for present and future generations" why would you want this to ruin the beautiful state that you do have? Bloom has dumped toxic waste in places it should not have been there for what do you think is gonna happen to your community? Even then you would need to make a public announcement to Santa Teresa in English and Spanish because those are the two most common languages in nm. This would also lead to the displacement of most of the Dona Ana communities do to government sponsored racism. Thank you for reading my contribution to try and stop this from happening.	1	Merged Document	No	[redacted]					Yes				8/17/2026
Mateo	Anonymous	As a young person growing up in this world, I don't want to have to worry about my drinking water being affected in the future. As someone from Michigan, I know we're lucky to have clean drinking water but it's a privilege, not a guarantee. There are many places across the country going through severe drought, and building AI data centers won't do anything to help us. It will destroy our ecosystems. It's not just about water, either. Clean air is something we all deserve as human beings. We shouldn't have to breathe toxic air and neither should any animal. As someone who cares deeply about the environment, this hits hard. These data centers would cause catastrophic damage to ecosystems in New Mexico and the surrounding areas. We're already in the middle of a climate collapse, with extreme heat waves making everything worse. This will only add to the suffering of the American people. Preserving the beauty of the states isn't just important for the ecosystem it's for future generations. We can make a difference, and it doesn't matter how big or small the action is. Every bit counts. We need to make this change happen. We need to prove that we, as American people, are strong and worthy of fighting back against the companies destroying our planet. Let's show them we won't back down and tell them to stop building harmful AI data. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	All big corporations and AI data centers are taking up the vital recourses we need, we are estimated to have un reversible climate changes in as much as 3 years, would you like to suffer in agony for the rest of your life? Because thats what many people living by unwanted data centers are already living like. They are running out of fresh resources and there are no backup, we need to stop building these destructive data centers	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive							8/17/2026
Georgia	F	To whom it may concern, I implore you to use proper judgment and consider the environment in the matter of project Jupiter. Our climate is in an extreme crisis, and all of our current issues are only going to grow exponentially with time. The planet is going to get warmer, and (very pressingly) we are going to have water scarcity issues. While AI is not the sole source of these issues, it is a contributing factor to the current climate crisis. AI is not essential to human life, it damages brain development, isolates people, and harms the environment. We must place regulation on AI and the construction of these large data centers which gobble up resources, raise electricity costs, and take away jobs from real, working Americans. The people do not want this.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes			8/17/2026
Denyse	Vargas	Dear NMED staff, My name is Denyse Vargas I live in Albuquerque, NM and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants. - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology or a centralized waste system has never been tried at this scale. - Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely,	1	Merged Document	Yes	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Nicole	Jara	I strongly oppose the approval of the Fuel Cell Air Quality Permit for Project Jupiter. I urge the New Mexico Environment Department to prioritize the health and well-being of nearby communities, Tribal Nations, and future generations over industrial expansion. Even projects promoted as "clean energy" can have significant impacts on air quality, water resources, wildlife, and the climate if they are not thoroughly evaluated. The Department should require the most rigorous environmental review possible, ensure complete transparency about emissions and cumulative impacts, and fully consider public concerns before making any decision. If there is uncertainty about the project's environmental or public health impacts, this permit should not be approved. New Mexico's clean air and natural resources deserve the highest level of protection. Once pollution is released into the air, the impacts on people and ecosystems cannot simply be reversed. I respectfully ask the Department to deny this permit and invest in energy solutions that do not put communities or the environment at unnecessary risk.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes		Yes	8/17/2026
Anonymous	Anonymous	I live in southwest Philadelphia and under no circumstances do I believe an AI data center as large as this one should be built. Rivers are drying up, due to multiple factors like greedy companies sure, but also due to increased ai usage. A single ai prompt uses approximately one bottle of clean water. Now multiply that bottle by the amount of people using ai in a day. Make that day a month. A year. We cannot create clean water, there is a finite amount of it on earth. If we run out of water then mass dehydration— and mass deaths for the poorer people— will shape society again and again until there is nothing left of the world we know now. Not to mention the carbon emissions this center would produce. Deforestation is still an ongoing issue that already threatens our oxygen supply without adding millions of unsafe to breathe gases into the air.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				8/17/2026

Natalie	Marrufo	Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	1	Merged Document	No	[redacted]			Yes		Yes		Yes	Yes	Yes		8/17/2026	
Teddy	Gaylord	This unnecessary data centre will release 10 million tons of carbon dioxide annually, which will contribute to climate change, which is already extreme enough. The Ozone Layer is healing! Let's let it heal and let's help fix our earth so we can actually live in it. The Rio Grande has also dried up, even before summer, because of this. Building this data centre would threaten our water supply. Water is supposed to be renewable. It's becoming non-renewable because of your data centres. Communities, human or not, heavily depend on this water to survive.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026	
anonymous	anonymous	I live in a city where they're planning on putting a data center. It's the most terrifying thought. I couldn't imagine what a power plant that requires at least one million gallons of water everyday does to not only the surrounding area, but the planet as a whole. It's just not necessary. There is nothing that can come from this but a power grab and the destruction of so many lives and ecosystems. The damage we've done to our planet is beyond comprehension, and if this permit of environmental racism is approved by the government, it will solidify that it is beyond repair. As such, I ask that the public has 60 days to review and comment so all parties can be as informed as possible. If the permit is approved, hold a public hearing in Santa Teresa, in both English and Spanish, with an option to participate virtually. This needs much more discussion, and should have never been an option in the first place. I pray for the people, land, animals, and environments that may suffer from this injustice.	1	Merged Document	No	[redacted]			Yes		Yes				Yes		8/17/2026	
Guro	Lakså	This is such a horrible idea because data centers in general pollute the water and environment around it making it unsustainable and not safe for the general public nor the wild to live there, they also produce noise pollution that is a constant reminder of the mistake called project jupiter. Although this won't directly affect me in the near future it sure as hell will in the long run. We've had enough of generative AI and it's bullshit. It makes us stupid and it feeds us misinformation. Generative AI is not the solution. Stop this immediately	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026	
Xianaliah	n/a	We don't need more data centers polluting our earth, ai and more technology is not a necessity, but our earth is. There are schools, care centers for the elderly, parks and people's houses that will get affected. It's horrible for the environment and horrible for the people who will be forced to endure it. Data centers get rid of so much of the environment and it distorts habitats. We learned this even in primary school, data centers are not a good idea and should not be treated as such. The residents are already racing horrible environmental changes, this is environmental racism but funded by the government. This is not okay.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive			Yes						8/17/2026	
Aeron	Barbier	New Mexico Environment Department's (NMED) mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." NMED's Air Quality Bureau "protects the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026	
Layla	Wray	Living in Memphis with the new construction of Elon musks ai monster has already been hell on earth. The summers are unbearable, the stench is growing, and my drinking water is turning brown. Not only will Project Jupiter destroy our world it will destroy our moral kindness to our planet with it. We have an obligation to take care of the earth, but we don't	1	Merged Document	No	[redacted]			Yes								8/17/2026	
Jakobína	Guðmundsdóttir	It should be considered a crime, not only against our planet, but against humanity that the government can take this sort of action without taking the public into account. This affects every single one of us and its completely unnecessary, we should be given more time to decide on the matter. Bloom Energy has a history of illegally dumping hazardous waste so the air quality permit application should NOT be accepted. A public hearing will be held in Santa Teresa if it's accepted where people from across the globe will show up, virtually or in-person. The population of Doña Ana will experience extreme pollution in addition to their already bad climate. This is government-sponsored racism. We don't need a gigantic data centre for any reason whatsoever, we are doing fine as it is. Things like AI shouldn't be accessible to anyone besides medicine researchers and such people, not even the government should need AI. PUT A STOP TO PROJECT JUPITER	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026	
Lyn	lynxie	I do not want project Jupiter to happen because it will damage our planet. Earth already is in a bad state. Climate change, pollution, melting icebergs and so more. Data centres use up alot of water, our drinking water. If project Jupiter happens the fuel cells will release 10 million tons of carbon dioxide annually. Stop project Jupiter	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes				8/17/2026	
Anonymous	Anonymous	Please stop Project Jupiter. It's very dangerous for our planet and environment, and it can cause severe environmental damage to our planet as this impacts our climate system and our population as well. We don't need more data centers for ai, which uses the same water we need for survival. Unfortunately, stopping this project won't solve our climate problem at this instant but it will help us save time and help our planet get better at least a bit	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026	
Nina	Cordelli	I urge the Environment Department to deny the Yucca Growth Microgrid permit, and to deny any permits related to Project Jupiter at large. This project is wildly unpopular with the public. It is not wanted and not needed. Any approval of environmental permits related to this project is a betrayal of the people. New Mexico already has a checkered history with poor air quality- the Trinity Project, venting of tritium gas by LANL, and, as I write this, there is a strong smell of smoke and visible haze due to wildfires. The residents of this beautiful state do not need any additional detractors of air quality. It has already played out in state after state, county after county. These data centers promise opportunity and economic growth, and yet the residents pay the ultimate price in low water pressure, constant noise, poor air, and higher utility bills. There is no reason to believe Project Jupiter and its related permits will be any different. Deny this permit.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes				8/17/2026	
Anonymous	Anonymous	I am a resident of this planet, i have family not far from the site of project jupiter. I cannot understand why something like this is necessary, why you are sacrificing the health, the lives, the survival of future generations for 'technological advancement'. It is abhorrent and To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental suicide. It is almost as if you wish for Earth to be completely destroyed, there is no justification for this terrible act, it is unacceptable to invite a new source of hyper-scale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. The drinking water it will use will mean that communities water supplies will become nonexistent or toxic as we have seen with smaller AI data centres around the country, why sacrifice us to make tech-billionaires even richer? . Building an even bigger data centre as proposed in Project Jupiter will no doubt catapult not only our nation but the rest of the world further into environmental catastrophe. Deny the air quality permit, approving would be government sanctioned environmental racism. Our families health and safety should be worth more than the profits of tech companies like Open AI and Oracle. If further deliberation is required, a public hearing in person with virtual components is required in New Mexico. I will not stand by and allow the majority to be sacrificed for the sake of the minorities wish to be richer.	1	Merged Document	No	[redacted]			Yes	Yes	Yes				Yes		8/17/2026	
Blake	Gibb	This is so wrong on so many levels it is going to disrupt the eco system, release 10 million tons of carbon monoxide annually and ai is not something we need we as a society benefit really little from ai it is useless and harmful!	1	Merged Document	No	[redacted]	Yes									Yes	8/17/2026	Should correct their alleged claim. Believe they meant CO2. CO is much lower
Anonymous	Anonymous	STOP PROJECT JUPITER! WE NEED WATER TO SURVIVE! DO YOU WANT THE NEXT GENERATIONS TO SUFFER?!? THE PUBLIC SHOULD BE GIVEN AN EXTRA 60 DAYS TO REVIEW AND COMMENT ON THE AIR QUALITY PERMIT SO COMMUNITY MEMBERS CAN PARTICIPATE EQUITABLY. THE AIR QUALITY PERMIT SHOULD BE DENIED GIVEN BLOOM ENERGY'S HISTORY OF ILLEGAL DUMPING OF HAZARDOUS WASTE. IF THE PERMIT IS NOT DENIED, A PUBLIC HEARING NEEDS TO BE HELD IM SANTA TERESA, IN BOTH ENGLISH AND SPANISH, WITH AN OPTION TO PARTICIPATE VIRTUALLY. APPROVING THIS PERMIT WOULD BE GOVERNMENT-SPONSORED ENVIRONMENTAL RACISM AS RESIDENTS OF DOÑA ANA COUNTY ARE ALREADY DISPROPORTIONATELY IMPACTED BY ENVIRONMENTAL POLLUTION. FOR YEARS, DOÑA ANA COUNTY HAS BEEN CALLED A 'NON-ATTAINMENT' ZONE— THIS MEANS THEIR AIR QUALITY DOES NOT MEET FEDERAL GOVERNMENT RULES.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Jake	n/a	From what you can see in my information, I am not American. The hatred for this 'project' has left the boarders of America and reached the wider world. What you are doing is going to damage our O zone layer, our environment more than what you think. Your money hungry minds cannot think beyond what happens to you. People have no water, and not just the people near your 'projects', all over the world and YOU are using the resources that could save their lives. You're killing habitats by just building this 'project'. Creatures, little lives that keep our food cycle running smoothly, animals that help us grow our food. You destroy plants. Plants that keep our air clean, that make it so each breath isn't painful. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. You really want to support that? This isn't any woke bs. This is real life, this is what's happening. Plants that provide food for us and for the little creatures. I have one question for you. How selfish do you have to be, to go through with this. You can still stop. No one is forcing you to continue. For a moment, think about everyone BUT yourself. Please. This message comes from someone on the other side of the world. If that doesn't make you stop and think, "maybe what I'm going is a bit wrong", there is no hope in you ever caring for anything but yourself. I am lucky I have just come across this before the date and I don't even live there. The people of the area and the wider world should have more time to tell you their needs. They need more time. They need their 60 days. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. People who this doesn't reach, need to be able to express their opinions and needs. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. The people here, their air is already not up to standard. You cannot tell me this doesn't sound like a movie. The air they breathe, is harming them. They do not need anymore pollutants in their air. What if it was your home place? You can say on TV all you want that if you were them you'd support it, you wouldn't care about breathing in that toxin filled air but we all know, no one wants that. No one says "mm I feel like I'd live better if my air I breathe was harming me". You do not want toxic chemical pollutants and 10 million tons of carbon dioxide in your air. Stop the entirety of 'Project Jupiter'.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Brookelyn	Howard	Project Jupiter will not only affect water, climate, but our animals. It will lower their water supply, pollute the water, and severely affect the animals. Please, PLEASE think about what you're doing before you go through with this. Also, a data center uses entirely WAY too much water. Millions of gallons a day. This will cause surrounding civilians electricity bills to go up, not everyone can afford that. This will pollute their water, it will make their water visibly dirty while coming out of the faucet, if you don't believe me do your research. You're affecting the planet, we only get one planet. There is no planet B, we must take care of this one. We must take care of the animals, because believe it or not, we need them too. Please don't go through with this. Think about what it will do to the earth.	1	Merged Document	No	[redacted]			Yes		Yes		Yes				8/17/2026	
ruby	n/a	I am writing to express my strong opposition to Project Jupiter. This project poses significant environmental risks and fails to consider the long-term consequences for our community and the planet. We must prioritize sustainable solutions that protect our natural resources for future generations. The potential negative impacts of Project Jupiter are extensive. From habitat destruction to increased pollution, the evidence suggests that this endeavor is not in the best interest of our environment. We have a responsibility to explore alternatives that align with ecological preservation and community well-being. I urge you to reconsider Project Jupiter and to instead champion initiatives that promote a healthier and more sustainable future. Let us work together to find solutions that benefit both our community and the environment.	1	Merged Document	No	[redacted]					Yes						8/17/2026	
Itzel	Zavala	The building of data centers is decimating our environment. They are unnecessary and unwanted by the communities in which you build them. Don't ignore the people that make you the money you love more than the planet you live on. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026	
Maria	Gossin	We don't need Ai to live it's destroying our planet and stealing our water. The intention of project jupiters investors is to make more money and they have little regard towards human life and safety. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
David	Declarador	I am begging you to stop this, once all the water is dried up, and all the animals are gone, and the trees are cut down, you will realize that AI cannot create anything we need to survive. Building data centers will just take and take and take until nothing is left. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Kira	McKinney	This data center is a complete waster of time, resources, and energy. This money could have been used to solve so many other problems that the president has already gotten us into. Nobody wants these data centers except the people who will not be impacted by the aftermath which would be the people who are funding it in the first place. They have no consideration for us because they genuinely do not care. I don't know how they get up every morning. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026	
Shane	Dobbins	There is absolutely NO reason a mega ai data center should be built anywhere in the world data centers are nothing but awful to the world by 2060 or so we won't have clean drinking water cause of these said data centers they create problems with water they use so much water to cool their internals and they use chemicals mixed into the water to help cool the data centers it's just plan out awful for the world it's sad that they want to build it instead of trying to do something nice for the world. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Juno	Hyndman	This new plant is going to kill our air, it is the biggest plant to be ever built and there is no plant that can store and create this much carbon dioxide before. It's already been fined for ILLEGALLY storing, transporting, and dumping this toxic waste and they falsified the records to covered it up. It's already been through illegal business and coverings. It won't help protect nor restore the environment, it will absolutely destroy it more. And you know that. It will contribute even more to climate change, we need this plant to not be built for the sake of our planet. Climate change only has three years left before it is irreversible, WE NEED ACTION TO STOP CLIMATE CHANGE BEFORE ITS TOO LATE. We can still stop climate change, we need to act fast. Building stuff like this will only contribute to climate change, we need to save our planet before it's too late and our time is almost up	1	Merged Document	No	[redacted]				Yes	Yes			Yes			8/17/2026	
Chelsea	Guillen	I am a resident of Gallup and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live in NM many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous waste further devastating environmental conditions in NM. We already don't have water to put out the fires, why would you allow a fire to burn out of control here?	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes			8/17/2026	
Alondra	Burgos	Stop this. This is going to cause so much air pollution. Not only to this area but the world. We don't need this at all	1	Merged Document	No	[redacted]					Yes						8/17/2026	
Viridiana	Tapia	we don't need more ai. Our Planet is already drying up faster then it should be and heatwaves are getting so much worst it is suppose to be monsoon season but not one bit of rain has came. A date center isn't needed we lived without ai our whole life just fine we don't need it this bad to be making the world worsts. Things like this make some people think the world is ending sooner and it maybe be because with more date centers means more water usage which in some towns is already limited. We need water for so many things such as our food supply, all of the things we can consume need water to grow better but if we have limited water that won't happen. New Mexico is already very dry and once the water is used there it will go to states all around which the states around are just as dry. So many animals will go extinct if they don't get water like the desert animals if the date center is built there will likely be less rain so animals in the desert aren't able to reach it. With the amount of chemicals that it will throw out too it will the air dangerous to even breath in. There is so many risk with each and every chemical it is gonna throw. Most causing Brain, Liver, Heart damage, cancer, asthma, premature birth, heart attacks, seizures, comas, lung failure, and even permanent blindness. We don't need or want Ai!!	1	Merged Document	No	[redacted]			Yes		Yes			Yes			8/17/2026	
Anayeli	n/a	STOP PROJECT JUPITER NOW, WE NEED WATER AS MUCH AS U NEED IF TOO BUT WE CANT SURVIVE WITH NO WATER , OUR ATMOSPHERE NEEEDS IT MORE THEN WE DO SO WE DONT ROT IN THIS WORLD , THE WORLD IS GETTING HOTTER WITH NO WATER. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Aaliyah	Goodyear	Our earth is already being destroyed, planet Jupiter will only make it worse, most likely irreversible. Tech giants have no reason to be richer and we don't have to ruin our earth by even attempting to make the top 1% more superior. Artificial intelligence is something we can live without, especially generative AI. It uses extreme amounts of water for non important results. We don't need Artifical intelligence to create for us, to think for us, to tell us facts, humans are lazy. We need to stop Project Jupiter, it's not okay, it's an active danger to the present and future generations, and the earth. You want to go on that multi million vacation? Well too bad, it doesn't exist, or it's too dangerous to visit due to heat, air conditions, or the land. Want to go to that underrated landscape? Well there's probably a data center. It uses the water of those who need it, families go without tap water, which only gives to the rich who own bottled water brands. It all circles back to the millionaires. We should ask the public what they decide, I can guarantee many would vote against this center, and even give an extended 60 days to comment and review this matter. I believe the air quality permit should be denied as they (Bloom energy) have history of dumping hazardous waste illegally. If this permit is not denied and instead approved then this is government assisted environmental racism, racism to those in New Mexico, racism to those around the world, discrimination to those with less then $1,000,000 in their bank.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026	
Anonymous	Anonymous	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilment of the authority vested in you.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026	
Julian	Wright	Our planet is already struggling with droughts due to data centres. Project Jupiter is avoiding telling us the devastating impacts that their "project" will cause. Projects used to describe an amazing development in research and conservation. This is doing the opposite. The clean water they run through and then put back into the same water sources will be hotter and will destroy ecosystems, leading to the mass death of aquatic life and the animals who rely on it for food. Project Jupiter is a biological genocide waiting to happen. I don't want to grow up in a world that prioritises generative ai over the health of the planet and marginalised communities. I'm 18 and shouldn't be worrying about my future because OpenAI wants to make it possible for people to generate photos of themselves as a caricature. It's horrendous that the public isn't given more time to vote on this! Communities need to time to be notified this is even happening and can be protested against and that their air quality is at serious risk due to a permit that's being reviewed for this project. It should be denied! This company has a heavy past of dumping hazardous waste that isn't only a danger to the wildlife and ecosystems but can cause real harm to the communities they are sacrificing for Project Jupiter. Sacrificing these communities in this way is environmental racism that is sponsored by the government. The impact it will have on the people living there will be devastating and irreversible. This project is disgusting and needs to end.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes			8/17/2026	
Lily	Desmond	Dear NMED, I encourage you to please SAY NO to the data center because it releases SO much green house gases and drinks so much water that the citizens of NM could be using	1	Merged Document	No	[redacted]			Yes								8/17/2026	
Claire	Romero	I request that you reject the Yucca Growth Infrastructure's (YGIs) air quality permit application to construct a methane-fueled power plant near Santa Teresa, NM in southern Doña Ana County.I also request that you hold both a public meeting and a formal evidentiary hearing on the application. The bottom line is that pollution from this power plant has the very real potential to harm people and the environment. YGI's pollution will add to the already unhealthy levels of both ozone and nitrogen oxides that New Mexicans are being exposed to in this area, two toxic chemicals that cause harm to our lungs, hearts, and brains, among many other health issues. This damage to air quality will also harm the surrounding ecosystem and ultimately add to the global climate crisis.YGI's power plant will be the single largest source of greenhouse gas emissions in the state of New Mexico, emitting more carbon pollution (10.1 million tons per year!) than New Mexico'sthree largest cities – Albuquerque, Santa Fe and Las Cruces – combined. The proposed power plant will use a new technology, methane fuel cells, manufactured by Bloom Energy. The application includes results Bloom Energy's technology does not have enough of a track record to justify approving a 2.4 gigawatt (GW) power plant. Bloom's largest operational power plant project is a 40 megawatt (MW) system that began operation on Dec 22, 2025, at Chunju Eco Park in South Korea. The power plant uses 120 of Bloom's 330 kilowatt (kW) fuel cell stacks compared to more than 7000 that will be needed for Project Jupiter. The Chunju Eco Park installation is 60 times smaller than the proposed Project Jupiter power plant and has been operating for only six months. No public data are available regarding air pollution emitted from the Chunju Eco Park installation in those six months. IN SHORT, IT WOULD BE FOOLHARDY FOR AN AGENCY, WHOSE PRIMARY PURPOSE IS TO PROTECT CITIZENS AND THE ENVIRONMENT WE LIVE IN, TO APPROVE THIS PERMIT.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	Yes		8/17/2026	
Cassandra	Miller	I urge NMED to reject the proposed development of Project Jupiter. With the critically low Colorado and Rio grande River basins, we cannot commit our limited resources to an industry that is energy intensive.	1	Merged Document	No	[redacted]			Yes								8/17/2026	
James	Gilliam	The use of any energy source other than solar in New Mexico for a data center is truly ridiculous and unacceptable. If a company that large needs that much energy it should generate it itself without artificially increasing local demand and prices for natural gas, pumping our air full of smog, and giving no thought whatsoever to climate change, which particularly affects New Mexicans. I am not in favor of this permit's approval.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive									8/17/2026	
Stephanie	Wolf	I strongly oppose permitting Yucca Growth Infrastructure, LLC-YGI's Microgrid Air Quality Construction Application. There is irrefutable evidence that similar projects have devastated communities that possess far greater resources than New Mexico can possibly imagine. These applicants have engaged in deeply unethical and even fraudulent acts to manufacture approval in our state. New Mexicans deserve so much better than what this company has on offer. We will NOT forget if you choose to sell our collective future. We will also remember if you stand firm in what is best for New Mexicans. What side of history do	3	Merged Document	Yes	[redacted]				Yes							8/17/2026	

anonymous	anonymous	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical inevitability of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, 1,200 TAHN CNM MOE from this pollution. Three other schools, an elder care center, and three public parks will within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete dethronent of the authority vested in you.	1		No															
Samantha	Feliciano	NMED's mission is to foster a healthy environment for NM residents by restoring and protecting the crucial flora and fauna, especially their most vulnerable communities. This data centers pose a risk of further damaging the health of minority communities who have been statically and disproportionately affected by environmental racism and exposer to contaminates. Residents of NM deserve a chance to review all aspects of the decision being made, especially since the company building the data center has a history of illegally dumping hazardous materials irresponsibly. Outside of their health, the residents want to preserve the beauty of their home, as nature is being loving and taking care of their home is one of the best things they can pass down to the next generation. Think of your children now, and of them to come if you approve this.	Mirrored Document	1		No			Yes	Yes	Yes								8/27/2026
Chrish	Rivera	We do not need another data center! We can live without AI, if we did it behoovely can't we do it now!? I'm still a highschooler, and I cannot stand seeing my future, OUR future crumble and break just because of a data center. These data centers are ruining our environment, producing over millions, maybe even billions of carbon dioxide annually. This ruins everything. We can live without AI, we do not need AI. As I highschooler I have many thoughts about this, are they just thinking about their own benefits, money, power, over humanity? MONEY AND POWER WILL DO NOTHING OF GLOBAL WARMING & CLIMATE CHANGE IS IRREVERSIBLE This cannot be good for us, this ruins our health, our planet, our home. I think it's really stupid of how rich people think they are in a higher position than us, think about how they can control everything. They hide everything from us, crimes, theft, even possible murders before secrets by the rich. You can never, I MEAN NEVER, trust them. So many incidents are happening right now, politics used to be boring. Don't make another data center, for our own good. Repost here, for our children before it's too late. Eat the rich before the rich eat you.	Mirrored Document	1		No					Yes									8/27/2026
Rylee	Stevens	AI is a waste of resources. We have lived without it for so long why can't we just keep living without it? We're sacrificing basic survival necessities for our own time saving purposes. Through some research I have learned that this company often dumps hazardous waste in different water areas.	Mirrored Document	1		No			Yes	Yes	Yes								8/27/2026
anonymous	anonymous	I firmly believe project Jupiter would be a detriment to Albuquerque, and new mexico as a whole. both in the destruction of natural land, in the pollution it would cause, and to new mexicos stance as a democratic state. We pride ourselves on natural beauty and the protection of our public lands, an somewhere where the world is a little more untouched and beautiful. In a world that so often seeks to destroy nature or treat it carelessly the precious nature of our state becomes only more relevant. The pollution alone, that is clearly evident in similar projects should be enough to say no to project Jupiter. New Mexico has a hard enough time sourcing water without added contamination. New Mexico is also proud to have clean air, that people travel to experience, it would be disgraceful to jeopardize that for something that would not benefit the people of new mexico The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	Mirrored Document	1		No			Yes				Yes							8/27/2026
Joseph	Hammond	We don't need data centers let alone the biggest one built in New Mexico. We are dealing with extreme water usages as it is and this will bring more problems than the ones we are currently dealing with, plus ruining the air quality.	Mirrored Document	1		No			Yes	Yes	Yes				Yes	Yes			8/27/2026
Luke[4279,	Kinsley[427	It's insane that people think that we can survive without AI. It's absolutely unnecessary and so bad for our planet. Stop this and use other technologies that can counter the data centers and don't use water and use technologies that are way less harmful for humans, animals and our environment.	Mirrored Document	1		No			Yes	Yes									8/27/2026
Sara	Tubby	No community needs an ai data center, what a community does need is clean air and water. We have seen a surge of these data centers popping up all over the United States and we have seen the damage they've done to those around them as well as the livestock that we depend on as a food source. Every data center built strips acres and acres of land that could either support wildlife or be used to expand infrastructure within the community. The USA has warned us of the the environmental consequences of these data centers and yet, US politicians continue to sell out our country to these big tech companies against the will of their constituents. Every data center built has a cost to all of us, please consider the future of our children before constructing another one.	Mirrored Document	1		No			Yes		Yes								8/27/2026
Emma	Fehr	As an individual with an educational background and career in environmental health and toxicology, I have firsthand knowledge of the harm pollution and degradation of environmental resources has on our most vulnerable communities. Moving forward with this project despite known environmental and human health risks is extremely irresponsible and unjust. I demand that this project ceases before the harm it causes is irreversible.	Mirrored Document	1		No					Yes								8/27/2026
Mimi	black	my issue with data centers is not only is it destroying our environment so drastically, we have already done irreversible damage to our home, if we continue destroying the beautiful world mother nature has created we will have no where to go. If we didn't need data centers this big than, than why now? Why fuel generative AI, why fuel apps destroying our home. stop the building of data centers.	Mirrored Document	1		No					Yes								8/27/2026
Laura	Denham	The construction of this data center would be extremely detrimental to the environment in more ways than one. Not only would it strain the land for resources, it would, upon development, release massive amounts of carbon dioxide. In this truly the end we want for our beautiful biologically diverse ecosystem? I think not. I am one of many who is against project Jupiter.	Mirrored Document	1		No		No	Oppose - Non-Substantive			Yes							8/27/2026
Emily	Myers	The carbon dioxide pollution alone will treat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous AND kill many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up.	Mirrored Document	1		No		Yes	Oppose - Non-Substantive			Yes							8/27/2026
Anonymous	Anonymous	Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will purchase to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. There should be an additional 60 days given for the public to review and comment. This is not an act that can be accepted lightly for money, it detriments to my community, and your people.	Mirrored Document	1		No			Yes		Yes	Yes	Yes							8/27/2026
Chase	Johnson	We can not destroy OUR planet for the greed of billionaires who don't know what it's like to struggle for anything. We require 60 days to review this proposal and comment on it, deny the air quality permit and allow for a public hearing on this issue.	Mirrored Document	1		No			Yes		Yes		Yes	Yes	Yes				8/27/2026
Maddie	Sweitzer	The pure amount of CO2 that this would produce would outweigh what little accessible any amount of data centres could create. This would impact the people and children living close by and needs to be prevented.	Mirrored Document	1		No				Yes					Yes				8/27/2026
Kat	Burton	I am a constituent from Detroit, MI and denying this project going through is a no-brainer. One Data center alone can run an entire community out of their water. This project will be 4 THOUSAND times larger than that. Right as well just run the whole state of Texas out of their water famously with this project drink up a lot as the water, but it will also emit TEN MILLION TONS of CO2 and illegally emit toxic&ua chemicals into the atmosphere, as Bloom Energy has done before. Approving this project specifically and deliberately threatens the spanish communities of Doña Ana County, which is environmental racism, let alone approved by the government themselves (but is that really any surprise at this point?) this event there was a public hearing in Santa Teresa in both English and Spanish. Jeff Bezos recently said that "human water consumption limits AI potential". Say Jeffbezos, in the event that dehydration hasn't killed you too, who will be your cattle then?	Mirrored Document	1		No		Yes	Oppose - Non-Substantive			Yes								8/27/2026
Rosalia	Cobbs	The air quality permit application for the Project Jupiter Data Center projects that our emissions will exceed the combined emissions of Albuquerque and Las Cruces. Project Jupiter is being built in Santa Teresa, NM, on the edge of the Sunland Park sun attainment zone where ozone levels created by volatile organic gasses and other pollutants violate EPA standards. Residents of Santa Teresa stretches from the center of Sunland Park and Sunland Park are mostly of Mexican or Hispanic heritage and with a lower than average $35 median income. These populations deserve and are legally entitled to the protections of the state of New Mexico and, specifically, by the Air Quality Bureau, in regard to their health and quality of life. There is no study of the possible cumulative health effects of this project plus existing polluting projects in the area. Please deny the application for an air quality permit for Project Jupiter.	Mirrored Document	1		No			Yes		Yes									8/27/2026
C	Caroline	I strongly oppose construction of this data center. The devastating environmental impacts vastly outweigh any benefits. In a place where water and air quality are already major concerns, this data center only harms our community more.	Mirrored Document	1		No			Yes	Yes	Yes								8/27/2026
Chantelle	Yazzie-Martin	Do not approve the construction air quality permit for the Yucca Growth Lic organization as it supports project Jupiter and the data center being built in southern New Mexico. Not only has the process been rushed but there have been gaping environmental holes that are not being kept to the public about the harm impacts to our water, air quality, and overall impacts to the cities surrounding the center. We request that this permit be rejected and a full investigation into the environmental impacts with anyone associated with the project Jupiter data center construction or any entities that testify to enter New Mexico Mexico to build this kind of center.	Mirrored Document	1		No													8/27/2026
Amanda	Mirabal	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Doña Ana County. It is anticipated to create 4,000 construction jobs and 1,600 project-supported jobs. Furthermore, Project Jupiter has committed $90 million to help repair, upgrade, and improve local water systems; $380 million in direct support for schools, infrastructure, and local services; and $4.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. I urge the New Mexico Environment Department to approve this important project. I live in Alamogordo New Mexico, but I come down here to visit my family all the time, so I know how bad the water is down south in the Doña Ana/Las Cruces area. Alamogordo's water is not great either and I feel that if they are giving $90 million to Doña Ana's water system, they should give some money to Otero County's water system as well because they have calcite in the water where I live. We can't even drink the water out of the faucet because it will give you kidney stones if you drink it. So project Jupiter needs to focus on that situation as well. Sincerely, Amanda Mirabal	Mirrored Document	1		No			Yes		Yes								8/27/2026
Jan	Gilbrecht	I am writing to oppose the permit application for Project Jupiter. No one paid or coerced me to write this. I am deeply concerned about the environmental, social and long term economic impacts of this massive data center on the land and the people of New Mexico. This is just one more get rich quick extraction scheme that is being rushed in without careful consideration. I suggest a moratorium on data centers such as the planned Project Jupiter until our legislature has the opportunity to fully assess long term impacts.	Mirrored Document	1		No			Yes		Yes								8/27/2026
Ricardo	Salvador	I'm strongly opposed to the project because it threatens water and air quality, and because of the lack of transparency and the false pretenses of the builders.	Mirrored Document	1		No		No	Oppose - Non-Substantive			Yes							8/27/2026
Matt	Ziegler	NMED should deny Yucca Growth Infrastructure, LLC's Y10 Microgrid's air quality construction permit. Compliance will be difficult to implement and enforce with the current fuel cell design. The scale of the fuel cell project is untested and there are too many unknowns on how this will impact emissions. Modeling of the design is based on the applicant's data and is not transparent. The significant production of CO2 and VOC emissions will impact and continue to marginalize our residents and communities most at risk including my own family members that live in Doña Ana County. In addition, the companies involved in the proposed fuel cell project are already significant non-compliers when it comes to environmental regulations. This project does not support the people of New Mexico.	Mirrored Document	1		No			Yes	Yes						Yes			8/27/2026
Elena	Luna-Chavez	I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. I believe this project is environmentally sound! We should be more concerned with the massive peace-tree growth in this area, which is consuming so much more of our water!!! I urge the New Mexico Environment Department to approve this important project. Sincerely, Elena Luna-Chavez	Mirrored Document	1		No				Yes	Yes	Yes	Yes						8/27/2026
Amy	Elrod-Lahti	I am NOT one of the fake people who is putting in a cut-and-paste comment in support of the data center proposed for Southern New Mexico. I am a lifelong New Mexican who has serious concerns about water usage and destruction of electrical grids from data centers. We are already facing a serious water crisis in New Mexico. Elephant Butte reservoir is at 10% of capacity, and the Rio Grande is dry through Albuquerque and points south. The proposed mega-data center will suck up more of our water resources that we need to support people, animals and agriculture in our state. We should not allow careless, non-local mega-corporations like Oracle and OpenAI to pollute our environment and steal our water to support their nefarious business practices. It's clear from the multiple repeat comments, all of which say the exact same thing, that the corporations seeking to build this facility are engaging in astroturfing and making it look as though residents are supportive. Most residents I have talked to are strongly opposed to this data center and we will continue to fight this development. Please do not approve the data center's construction. Thank you.	Mirrored Document	1		No			Yes		Yes								8/27/2026
Samantha	Caballero	I am strongly opposed to pushing through this infrastructure. It will pollute our homes and deplete our water, which in the desert we already are struggling. There is no place for this here. We do not want to raise the temperature, cause drought, air pollution, noise issues, wildlife devastation and increase our energy bills further. This project neither supports the environment or the local residents. Stop this.	Mirrored Document	1		No			Yes		Yes								8/27/2026
Margaret	McGuinn	This entire project should be rejected. From step 1, the process has been, at minimum, skewed, and every single commissioner who did not vote their due diligence on this proposal should be replaced. The simple fact that NDAs were required by anyone in the county is very telling and evident that deals were being made that were not in the best interest of the community. Anyone who signed an NDA in relation to this project should also be replaced. Data already exists showing the negative impacts of data centers on environments and communities, these impacts and dangers are not worth the empty promise of jobs - which are likely temporary, low paying jobs in much smaller numbers than promised. With 10 MILLION TONS of CO2 being released from a center such as this, an incredible amount of extra heat generation, depletion of water and other natural resources, as well as hyperelectrical uses and cost increases for average consumers, no matter what returns are promised, we can't afford it. In the best interest of people and the community, reject this application.	Mirrored Document	1		No			Yes		Yes								8/27/2026
Douglas	Kurtz	Down here in southern New Mexico, we are angry. It seems powers in the northern part of the state want to force a data center on Doña Ana County without regard to the environmental destruction this building will cause. There are concerns that elected officials are disregarding state laws. Developers agreed to hold a community meeting, but held a job fair instead and failed to submit job reports. The developers have already proved they cannot be trusted. To address their lack of candor, we demand a community meeting to publicly air the deal making going on without public knowledge.	Mirrored Document	1		No			Yes		Yes								8/27/2026
Rosalinda	Roman	Don't build project Jupiter , our state in already suffering with nothing but desert and town limited resources where . Our land , and any resources we do have is going to be ruined , and any damage that is done can't be reversed or be saved. We need to protect our land instead of destroying them with selfish and money hungry intentions.	Mirrored Document	1		No						Yes	Yes			Yes			8/27/2026
Anonymous	Anonymous	I am a resident of New Mexico and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here as a 10th generation New Mexican and this is my home. I am only 28 years old, so it's my future on the line. I want to continue growing here and eventually raise my children here knowing that they will have a safe and secure future. My future, and the future of those around me is under threat with this proposed air quality permit. A change in fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 20 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 98th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyper-acute air pollution into our communities. We already have enough setbacks and challenges in this state and we don't need more. This plant is unnecessary, and does not benefit the residents of New Mexico. Our health is at risk for the benefit of a large, private company. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirrored Document	1		No			Yes											8/27/2026
Sarah	Campos	Dear NMED staff, My name is Sarah Campos. I live in Brazil, Belo Horizonte, MG, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the Y10 Microgrid in Doña Ana County. I am concerned because this project promises insane levels of pollution, and in the current climate, we cannot afford that. The project's proposed fuel cell-powered grid is concerning for many reasons: it would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the Y10 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Sarah The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirrored Document	1		No			Yes	Yes		Yes	Yes	Yes					8/27/2026
Mia	diaz	We are already close enough to not be able to stop climate change doing this only solidifies that there will be no more hope for clean water or air for us and the other animals and plants on this earth. We only have one planet and we are killing our selves with useless data centers that we never needed is the first place. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.	Mirrored Document	1		No				Yes	Yes		Yes	Yes	Yes				8/27/2026
Thijn	Thijn	Data centers DO NOT needs to ruin the environment that's already collapsing and take more power than New York City to power when that could be used for helping the environment or the people who need power not Ares can live without it!	Mirrored Document	1		No			Yes	Yes	Yes				Yes				8/27/2026
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. anonymous	anonymous	We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous AND kill many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. There should be an additional 60 days given for the public to review and comment. This is not an act that can be accepted lightly for money, it detriments to my community, and your people.	Mirrored Document	1		No			Yes	Yes	Yes									8/27/2026
Leila	Ortiz	I am a resident of La Habra California and I'm using my voice for those of New Mexico, don't do this. There's already a limited water source in New Mexico and it'll become worse with it going towards that data center and not only that it'll affect the people of New Mexico. You may think it's beneficial and profitable but you're only thinking of the 1%, those who can afford better air quality, to live far from it and not hear the constant waves coming from it. Put the people first and not think of the money, you say need jobs are coming, do something better, I may not live in New Mexico, but I am doing all I can to stop this from happening to them.	Mirrored Document	1		No													8/27/2026
Katie	Tindall	the building of this data site is an absolute disgrace and no one in the area desires it! we are putting a community with a limited water supply at risk for the sake of a data centre that no body wants. not to mention the amount of irreversible damage that will be done to the environment in not only the surrounding area of then intended data centre, but also the global effects a building of this scale has. I am pleading with vou not to make this situation any worse and to cease the construction of this project	Mirrored Document	1		No			Yes	Yes									8/27/2026

Morgan	Bell	The public should be given an additional 60 days to review and comment on the air quality permit, so that community members can participate equitably. The air quality permit application should be rejected due to Bloom Energy's history of illegally dumping hazardous waste. If the permit is not rejected, a public hearing must be held in Santa Teresa , in both English and Spanish, with the option to participate online. Approving this permit would be government-backed environmental racism , because the people of Doña Ana County already suffer too much from environmental pollution. For years, Doña Ana County has been called a 'non-compliance' zone—this means that our air quality does not meet federal government rules. The people do not want data centers. As elected officials, your job is to represent your people. Your refusal to do so will result in the loss of public trust and respect. Do the right thing. Stop decimating the southwest, this country, and the world for the profit of a few who do not have the best interests in mind for you, myself, or your children.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Anonymus	Anonymus	Project JUPITER its not only wrong but also mean. We haven't understand that the whole world isn't ours, we also share it with other species,living beings who doesn't know why are we destroying their planet. And also, the way that influencers are being part of this project just shows that nothing cares if they generate money, what do I mean? , it doesn't care if someone is dying, if we are destroying our natural resources, if thats the value to get more money "it is okey " but guess what? WE CAN NOT EAT MONEY "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Weronika	Ciszewska	The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,275. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project show evidence of their compliance with emissions limit requirements under Title V? Has there been or will there ever be upstream fuel testing of methane gas to anticipate the composition of these fuel cells' emissions? How exactly will NMED enforce emissions standards without direct, long-term, continuous monitoring? Or isolate their deleterious impact on air quality without an accurate assessment of localized pollution? Yucca Growth Infrastructure's gas-powered fuel cell plant is 1,000 times larger than Bloom Energy's biggest existing fuel cell plant. In fact, worldwide, Bloom Energy has developed 1.4 GW of fuel cell technology across more than a thousand locations, yet Yucca Growth Infrastructure is asking for nearly double that (2.46 GW of fuel cells) at a singular location. The largest fuel cell plant in the entire world is more than 30 times smaller than the fuel cell plant under consideration in Santa Teresa. There is absolutely no way to know, with certainty, what the actual pollution levels will be given the tremendous size differential, and thus gap in data, between operational fuel cell plants and this theoretical plant proposed by Yucca Growth Infrastructure. Family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	1	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes		Yes	8/17/2026
anonymous	anonymous	I am writing this to express my concern and to say that Project Jupiter is a horrible idea. It not only will harm the environment even more and the inhabitants in the surrounding area, it will also use gallons upon gallons of water daily. The community in New Mexico relies on this water to maintain their farms. Without this water families who are already struggling will suffer. The earth is already using millions of gallons of water daily just for other AI data centre around the world, why do we need another one? Humans have lived for centuries without AI and now all of a sudden, we can't live without it. Students are lacking knowledge, they don't know how to study or write an essay all because there's a tool that simply does it for you. While AI can be useful and sounds like an amazing creation, in reality it is a climate killing machine that takes away from our youth. So I ask you why do we depend on AI so much? In only 3 years climate change will be irreversible, but in 2020 during lockdown, the environment started to bounce back and heal itself, so what's stopping us from helping it bounce back again, stronger than ever. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	It is astonishing to me that people are investing billions of dollars into a useless project that WILL destroy ecosystems and release immense carbon emissions to our air. Not only that, people in towns close by to this center will struggle. Water and air quality will degrade, leaving habitants upset and in need of new ways to live a comfortable life. No one should have to adjust their lifestyle for a data center. I'm appalled that I live in a world that cares more about money and profit than the world itself. Killing the earth affects everyone including the people in charge of project Jupiter. Think about the land you are stealing, and for what. Money and AI will never be more valuable than real human lives, the earth we live off of, or the animals that inhabit it. There is already so much happening on our planet causing its destruction, we don't need a useless data center on top of it all. Please rethink this project, and put your money and efforts into something that actually matters and can help our planet heal. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Natalie	Grantham	We are the verge of losing water and crops due to data centers are you trying to kill your people? I live in indiana born and raised my whole life here indiana is beautiful especially when the crops grow but soon that'll end because soon we'll get data centers in here then my family is gonna die because of lack of water and crops so thank you trump and thank you America for screwing me and my family in the future just so you can make your funny A.I photo for Facebook because "everyone is doing it" YOU ARE KILLING YOUR PLANET WAKE UP PEOPLE WE ARE ON THE VERGE OF OUR PLANET COMPLETELY DYING OUT WE ARE GONNA BE THE NEXT DINOSAURS IF WE DON'T DO NOTHING NOW	1	Merged Document	No	[redacted]	Yes							8/17/2026
Clara	Anonymous	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. Under the new application: Methane gas is pumped into fuel cells where it is baked at extremely high temperatures (around 1,470 °F) to make hydrogen for energy generation Produces the same massive amount of energy (2.46 GW) Uses the same type of fuel (methane gas) Still need proposed pipelines to deliver the methane gas THIS NEW PLANT IS DANGEROUS. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air (see tables below sourced directly from p. 150 of Air Permit) Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses. Developers did not propose pollution controls They estimated the plant's pollution based on tests from a very small unit (only 65 kW) but the power plant they want to build is 37,000 times bigger. A 15% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Estimated pollution from the plant's gas pipelines is not included Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Elizabeth	Washington	OUR PLANET CANNOT AFFORD THIS. No state, country, or government could afford the irreparable damage this will cause to their ecosystem. All it takes is someone to say no, and to care for a breathing life more than the empty shell of wealth. No one will forgive you for playing part in the destruction of the planet. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Kate	Pierce	I am against the building of this data center. As it will harm communities by polluting their air, and taking their water, and it will further the dangers of the climate crisis.	1	Merged Document	No	[redacted]	Yes							8/17/2026
Ezra	Giles	i might not live in the US, however im not an idiot. i can see what ai is doing to this planet and you can too. how can you see the fact that ai has. chat gpt uses around 10-25 milliliters per prompt, 57 million people submit an average of 5 prompts a day, you do the maths. 148 million liters of water PER DAY is being used. after doing some research, predictions indicate that ai-related data centres could consume over 1 trillion litres ANNUALLY by 2028. not only this, but you are trying to add a data centre into a place that ALREADY has bad air quality, if you add a data centre you are basically committing mass murder as the people will have no water and no clean air to live in. if you really sit there and think about it do you not truly fear how that will impact the rest of the world? sometimes i think people forget that we share our planet with so much amazing wildlife and animals that we need to strive to protect, not destroy. as a young person who is very passionate on this topic i believe we need to thrive to protect the world and all that comes with it instead of building unnecessary ai data centres. the future of our world depends on young people like me who are dedicated to stopping things like this from happening. we have to live in this world that YOU are actively trying to destroy. by the time us young people the same age as the people in charge of all these data centres, they will all be incapable of making decisions on things because they will he too old. so let me ask you this, why should the young people living in this world have to be responsible for cleaning up the mistakes of the generation before? there have been many PROVEN bad side affects of ai for the environment, all you have to do is research. thank you for reading.	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Dóra	Inotai	Though I live a bit further this big project have an affect on the whole world, so everyone is in danger. The amount of bad effects that this work has can't be described: the water that this building requires, the harmful gases that it produces. This project because of its size is harmful to everyone, not just the residents that live close	1	Merged Document	No	[redacted]	Yes							8/17/2026
anonymous	anonymous	Climate change affects everybody, including the people funding this. it is a mistake that we cannot come back from, the heatwaves this year are already killer, this will kill people. We do not need more ai we need more land free to create oxygen and provide homes for honeybees The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	The water of the world is already scarce. I will not allow for such a water hungry machine to be constructed when so many suffer from its lack. This type of plant is probably not going to even be useful to the people around which it is built, but only to the rich CEOs who have more money than they need. It is a threat to the air quality of the area which will have tragic consequences.	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Melanie	Velez	I find it absolutely ridiculous that so many ai centers are being built when there is no public demand for ai usage but rather companies forcing ai features down users throats. We were fine before ai was revolutionized and we will still be fine without it. These useless centers are destroying our environment: rivers and lakes are running dry, people complain about headaches and noise, ecosystems are being killed off due to the natural disasters stimulated by this absurd amount or water usage. Stop with ai. Stop killing our earth. Stop building the center. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Mira	Guilty	Under no circumstances should this be allowed to happen. Not only does this greatly affect our air quality, but it affects our water supply as well. Climate change is a huge problem, and the fact that we, as human beings are still convinced that we should make it worse just goes to shows how pathetic humanity has become. If we give them an inch, they will take a mile. Making the earth uninhabitable should have never become something we have to discuss. This is non-negotiable. This is the coldest summer we will experience in our lifetimes. Do you understand that? It is all downhill from here, and we have the opportunity to stop while we are ahead, so why don't we? Let's use our brains! This cannot continue. I REFUSE TO BE POISONED BY BILLIONAIRES. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Bella	Martinez	I demand that Project Jupiter ceases the entirety of the project for the betterment of the state, and all of the people who are going to be affected. The Rio Grande is already bone dry, and every summer is going to get only hotter and hotter from this point on if we do not do anything to stop building data centers. Greenhouses gases will destroy the quality of the air, and the environment. To brand Project Jupiter as opportunity and to polish it as if it will only bring good to New Mexico is entirely false, and downright misinformation. Changing the technology to fuel cell technology does not change anything, or the risks that building this data center will bring. The amount of hazardous waste created is bigger than three of the largest cities combined in all of New Mexico. It is absolutely horrifying. We are already in a nationwide water bankruptcy, and the area they want to build in already does not meet nation air quality standards. Project Jupiter has no place in the state of New Mexico, or any place on Earth. If you claim to care about improving the state and providing for all of the people, you would not build a ginormous, resource-sucking factory that will be sure to put an end to us faster. As I am only 18 years old, I don't want to have children in a world where the temperature reaches boiling hear and water becomes limited due to computers that do more harm than good. There is no sustainable version of extraction no matter how developers power it. I demand that NMED reject the developers' latest air quality permit application. I love my state, and the people inside it, their lives are not worth a warehouse full of hazardous computers. NMED's job to protect the public health of New Mexicans, and moving forward with this project would put every single person at risk. Our lives are not worth being replaced with bots, and machinery. Please protect us NMED. The public should receive an extra 60 days to review and comment, because we have the rights and the say to reject billion dollar companies plans. The air quality permit application should be denied because of Bloom Energy's history of illegally dumping hazardous waste, there is nothing stopping them from doing it again, and speeding up the process of poisoning New Mexico faster than before. If the permit is not denied, multiple public hearings need to be held in Santa Teresa, and other cities in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Elizabeth	Vera	This project will cause tremendous damage to the community and if you choose to follow through with it you are choosing profit over people. The public need an additional 60 days to review this project. The air quality permit application must be DENIED or at least have a public hearing abt it if it isn't. This organization has a long history of illegal dumping of hazardous waste and allowing them to build and operate in your state is a massive mistake.	1	Merged Document	No	[redacted]		Yes				Yes	Yes	8/17/2026
Lindsay	Tierney	I think it would be a terrible decision to build a data center in Dona Ana county, or anywhere else for that matter. The planet is facing historic high temperatures, and infrastructure for water and electricity is under enough strain as is. By beginning massive construction like this for an unstable and unnecessary venture like modern AI projects, ordinary people will be priced out of necessities like home cooling and tap water, all for the sake of investors with a proven track record of bad behavior, including illegal pollution and dumping, along with privacy violations. Countless other data centers have spiked noise, water, and air pollution, leading to public health crisises and it is clear that New Mexicans are looking down the barrel of yet another known danger that the federal government is subjecting us to in hopes it will be forgotten. In resubmitting the same plans virtually unchanged, despite public outcry, project Jupiter's developers show a belief that the rule of law and democratic input should not apply to them. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Alex	Stephenson	We do not need AI. We need our air and water! I don't see how anyone could think this is worth our environment and where we grow as humans. We do not need Project Jupiter or any other AI data centers. All it does is pollute our air, waste our water and tear down our environment. We don't deserve this, our animals don't deserve this and Earth, especially, does not deserve this. Where is the compassion and humanity? What about the future? This will cause IRREPARABLE damage. I am not okay with this and no one else should be. The people should have a choice in whether or not this permit gets approved or denied. This is not right and should be illegal	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Yuliet	Lopez	Dear NMED staff, My name is Yuliet Lopez, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. With people's usage and support for AI declining, there is absolutely no benefit to going through with this project. The project's proposed fuel cell powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants. - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology or a centralized waste system has never been tried at this scale. - Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Yuliet Lopez "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Jacquelin	h	I urge you to reject any permitting shortcut for future oil and gas production sites in the National Petroleum Reserve in Alaska. Each new project should receive a full, project-specific environmental review under NEPA. The BLM should not rely on older environmental reviews in place of carefully studying the impacts of new development, including cumulative impacts from existing and future oil and gas infrastructure. The Western Arctic is a sensitive and important region – these irreplaceable public lands hold higher values than oil production. New oil and gas development would threaten wildlife habitat, wetlands, clean water, public health, subsistence resources, and the climate. The BLM must preserve meaningful public input and Tribal consultation, fully evaluate the risks of each proposed project, and reject any process that would fast-track oil and gas development in the Western Arctic. Sincerely, Jacquelin H	1	Merged Document	No	[redacted]	Yes		Yes					8/17/2026
Chloe	Gallagher	Project Jupiter is a climate disaster, the full cells will release 10 million tons of carbon dioxide annually. Will clearly threaten limited water supply some communities depend on to survive.	1	Merged Document	No	[redacted]	Yes	Yes						8/17/2026
Catherine	Laughlin	Please deny this permit. Protect our precious water, air quality, and New Mexico's future! NM does not need polluting, harmful data centers (or dishonest "grassroots" paid media campaigns from Project Jupiter! Please note that they also appear to be using bots to mass-submit comments under the names of people who did not consent and don't agree with this permit.)	1	Merged Document	No	[redacted]	Yes	Yes						8/17/2026

Katharine	somers	This project is extremely dangerous to not only human kind and the animals but the whole earth itself. Plenty of river's are being dried out giving animals in that area no water nearby. We don't need a data center in fact we need to lower the amount of all these generative ai centers and data centers that use up a huge percentage of drinking water. We are slowly killing ourselves.	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
Anonymous	Anonymous	the new project called project Jupiter's issues(world wide or in NM) Dona Ana's air quality does not meet the federal government rules and that's why the residents has been impacted disproportionately. I would love to mention weather temperature and global warming. Apparently, jupiter project releases 10 milion tons of carbon dioxide into the air per year the amount of CO² in the air has been getting higher and higher because of multiple other reasons, and now imagine the disaster that can happen after project jupiter! the amount of CO² in the air has direct effect on air temperature that's why letting go 10 MILION TONS of carbon dioxide in the air must be insane! there are many elders and outworkers that pass out because of the heat and if they release THIS amount of CO², people are DEFINITELY going to get heart attacks, heart strokes or dehydrated. Although many kids and elderly woman and man suffer from heart attacks, asthma and cancer and MANY normal people are bothered by the awful air quality that causes many HARMFUL diseases for all the ages, project developers are still insisting on continuing this plan. Moving to another point, I'm talking about ozone or smog, it is approved that ozone has been getting thicker and thicker and even totally gone in some parts, which means UV effects our life and daily activities and the ground, where we live! For conclusion- I strongly believe that this project should not be allowed or approved and people's health and life matters more than anything! Thanks for paying attention, looking forward your answer and hope this might change your decision!	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
Franco	Araceli	Project Jupiter is not safe for our community. It will cause harm not good, this data center does not need to be built. I cannot stress enough on how much harm this will cause for our environment. We need clean water, clean air, and Dear NMED staff, My name is Aracely Franco . I am a New Mexico resident, living in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. It is extremely harmful to our environment and living areas. It is not needed, this is only for the rich to profit. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Kay	Jones	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 89% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
Lynette	Quintana	This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	1	No	Merged Document	[redacted]	Yes Yes Yes Yes Yes	4/17/2026
lily	carbary	we do not need ai or more data centers we should be focusing in putting effort towards things we NEED right now or at least an eco friendly way to make the data centers.	1	No	Merged Document	[redacted] No	Observe - Non Substantive	4/17/2026
Giulia Maria	Tonti	I don't live in the American continent, yet I know how it feels when you see your home being encroached. In an era when we are fighting pollution, this project is an insult to all our efforts against carbon dioxide being released in our air every day. It shows again the hypocrisy of our institutions about these topics. You don't care about the well being of the people that live there, you care about money. That money is earned by killing our environment. Families live there and we all saw the effects of data centers on small cities. Their clean water will be at risk, their pets will be under a huge stress because of all the noise pollution. The heat during spring and summer will be unbearable, because carbon dioxide raises up temperatures really fast, and most of them won't be able to relieve the discomfort because of their water and electricity being taken away. So in this letter I ask the public to be given an additional 60 days to review and comment on the air quality permit; the air quality permit application to be denied, given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism against us residents of Doña Ana County are already disproportionately impacted by environmental pollution, because for years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. Thank you for your time for reading this.	1	No	Merged Document	[redacted]	Yes Yes Yes Yes Yes	4/17/2026
Jasmine	Jasmine	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026

Emil	Krasich	I am strongly opposed to the environmental and economic impacts of project Jupiter. Our state already has a water problem and we have no need of yet another data center consuming our life-needed water, increasing already record temperatures, polluting the air, emitting extensive greenhouse gases, and causing soaring energy prices.	1	No	Merged Document	[redacted]	Yes Yes Yes	4/17/2026
Lucas	Trede	We the people of New Mexico are opposed to the development of data centers without proper oversight or representation. Project Jupiter must not continue for concerns over environmental damage and community wellness. Additionally, the influx of ai-generated comments in support of oracle's push to move forward with project Jupiter, should make it apparent that this project is largely unpopular among actual residents of New Mexico.	1	No	Merged Document	[redacted] Yes	Yes	4/17/2026
Richard	McCoy	I oppose issuance of the air permit for the Yucca Growth Infrastructure fuel cell construction. Based on a review of the application, it only addresses emissions from the fuel cells used to power the data center. The application does not include emergency generators, which are typically diesel fired, which are almost always installed at data centers to maintain constant supply of electricity to the facility. Section 1, page 3 of the application states the proposed output of the fuel cells requested to be installed is 2,462 MW per hour. A large diesel generator manufactured by Generac (Model SD4000) has an output of 3.25 MW. To support the full capacity of the facility, over 750 generators would be required. Under 40 CFR 60, Subpart IIII, a diesel fired emergency generator is allowed 100 hours per year for non-emergency usage, and 50 hours for testing and maintenance. In the unlikely scenario where the facility only covers 50% of its total fuel cell output with emergency generators, this would be the equivalent of over 18,200 operating hours of diesel generators for testing and maintenance alone. Based on the emission factors in AP-42 (the same source used by the consultant for some calculations), Table 3.4-1, for testing/maintenance alone, the potential to emit is over 500 tons per year of NOx and 27 tpy of particulate matter. Due to the climate in the area, hot and dry, these two pollutants are of particular concern, NOx due to its contribution to ozone formation and PM because of the ambient particulate from the natural environment. As a chemical and environmental engineer with more than 25 years of experience in air permitting and compliance, I know it is a common permitting strategy to submit an application for some emission units then later subsequent applications for additional emission units. This can be effective in bypassing regulations, and it can help reduce public involvement in public comment process by making it more complex and thus less transparent to the general public. This extremely basic review of the permit application and likely potential emissions from the project supports only one aspect of my opposition to construction of the operations.	1	No	Merged Document	[redacted]	Yes Yes Yes	4/17/2026
Anonymous	Anonymous	Dear NMED staff, I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. I do believe this project will not have any sort of positive impact on the climate as the state it is already in right now. It is clear to me that this project would only release toxic pollutants into our water that we depend on in daily day-to-day life. It would still produce a high level of greenhouse gas and toxic pollutants into our atmosphere as well. What about the communities in that area where you plan on making this take place? Will they have fresh air to breathe? Will the temperatures outside be manageable for them without heat being so high from how much carbon dioxide this will put out? I urge this not to take place and I urge you guys to hear the voices who care about climate change and our earth as much as I do. I am writing this and submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Please care about the community voices as it is not welcomed into their home. Sincerely, Anonymous	1	No	Merged Document	[redacted]	Yes Yes Yes	4/17/2026
Ash	Estrada	Though approximations of annual air pollution were provided, the testing used an extremely weak methodology leaving us, ultimately, with pseudoscientific guesses that have large margins of error. Estimated pollution levels for this gas-powered fuel cell plant are based on only three 4-hour pollution tests from a very small unit (only 60 kW). This is a far cry from thousands of sweltering fuel cells operating 24/7 at maximum output in close proximity, all in the scorching heat of our open desert. The lack of rigorous testing of even this small of a scale is lazy and very concerning, especially given that the gas power plant Yucca Growth Infrastructure needs to build is 37,000 times larger than this unit.	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
milla	bussey	I urge you to stop Project Jupiter. I live in Finland, far from the proposed site, and I'm still deeply concerned about what this project represents. We're in a climate crisis, and building massive new data centers for AI, with their enormous energy and water demands, is moving in exactly the wrong direction. These projects benefit a tiny number of tech companies while the rest of us bear the environmental cost. The land, the water, the local community, none of it should be sacrificed for something that serves profit, not people. Please reconsider and put this project on hold permanently.	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
Lisa	Woods	I don't support project Jupiter because the massive data centre will pollute the water and release a lot of noise the can scare off wildlife. Even though the water does eventually come back to the atmosphere, it takes an awful long time. The wind blows away the water vapour coming from the data centre which will then cause certain areas to face drought. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]	Yes Yes Yes Yes Yes	4/17/2026
Lillianna	Anonymous	Dear NMED staff, My name is Lillianna. I live in Australia, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. This WILL kill people. It will give people lung cancer. People are going to die of dehydration, due to the amount of water you'll poison with this data centre. It's so stupid how you guys think this is going to help people, it ISNT. Nobody likes ai, it's so dangerous. You'll soon realise that, as the summers will get hotter and hotter due to your involvement with climate change. The project's proposed fuel cell powered grid is concerning for many reasons: →It would still produce a high level of greenhouse gas and toxic pollutants. →This technology generates toxic waste, and the process for handling this waste is still unclear. →Fuel cell technology or a centralized waste system has never been tried at this scale. →Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Lillianna "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes Yes Yes	4/17/2026
Anonymous	Anonymous	Dear Board of NMED, I am writing to you to urge you to stop the progress of Project Jupiter. In addition, these requirements should be met before any plans go forward. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Thank you for your time. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes Yes	4/17/2026
Panthera	Anonymous	Con mi perspectiva como país latinoamericano, es evidente cómo los impactos ambientales de este tipo de proyectos afectan no solo al ecosistema, sino también a toda la sociedad y a la población, incluyendo a los políticos, ya que el daño suele costar vidas, dinero y consecuencias legales. En el contexto global actual, es inviable y sumamente irrespetuoso con la población y la naturaleza permitir que un proyecto tan perjudicial siga adelante, un proyecto que incluso podría poner en peligro las condiciones futuras del planeta a largo plazo si, le contribuís a este ritmo, a corto plazo. La gente clama por un cambio, por diligencia, por conciencia y, sobre todo, por humanidad. Por muy lucrativo que parezca este proyecto ahora, pronto ninguna cantidad de dinero se comparará con el daño que puede causar. Por lo tanto, es necesario un enfoque compasivo ante estos problemas, y espero que el gobierno comprenda la urgencia de ponerle fin. Atentamente, Panthera "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Anonymous	Anonymous	Dear NMED staff, I am an anonymous commenter from Canada and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am of the younger generation and I do not believe we need another ai data centre going up as we do not need ai to begin with. It's bad for our health and it's bad for our planet for many reasons. It would produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. Santa Teresa Elementary and High School are located within five miles of this project site. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Thank you for reading. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. lilly	mejia	i know this data center should not be build because it will be so bad for the air quality in new mexico and horrible for water in our state it would have a massive negative impact on our whole environment "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes Yes Yes	4/17/2026
Anonymous	Anonymous	New Mexico is already facing huge drought concerns and has been for awhile now. We do not want nor need this in New Mexico or anywhere for that matter. Our ecosystems need us to advocate for keeping it healthy and sustainable. Adding more data centers/ gas plants are only going to make everything worse to what is already a HUGE economic issue. 10 million tons of co2 causing more global warming issues and harming our planet even more. This cannot happen. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes Yes	4/17/2026

Anonymous	Anonymous	We get nothing out of destroying other animals lives and homes but for some reason we still do it. These animals probably don't even know we exist and we're still going to kill them for the sake of our own lives, which if I may add are horrible for the Earth. If we allow Project Jupiter to move forward from a plan to actual actions, we won't have a voice. But right now we have a voice in the matter and not all the time, but if thousands of people believe what you're doing is wrong, then it's more times than none; wrong. What people don't realize is that by harming animals and their environment, we're also harming ourselves in the long run. Sure we'll have good resources for a while, but eventually the process of these resources destroying the Earth and atmosphere will make people realize "wow, maybe we should've been decent people and this wouldn't have happened". "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Francesca	Reyes Fabian	I am not in support of this project. It is wrong and is destroying the planet as speak. AI is a destructive tool that deteriorates the environment all around us. We should not let this happen and most definitely should not let this become a project in the future that is already so scarce. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
Ariah	Sandle	I respectfully oppose Project Jupiter and urge decision makers to reconsider moving forward with this project. I am concerned about its potential impacts on the community, including environmental, economic, and quality-of-life effects. Before any further action is taken, there should be greater transparency, more opportunities for public input, and a thorough review of the long-term consequences. I believe the concerns of local residents deserve careful consideration, and I ask that Project Jupiter be stopped until those concerns are fully addressed.	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
Lasha	Kirker	With the data centers, air quality will worsen and I don't want that. I want to be able to breath; I want future generations to have a good planet to live on and not suffer. We should be caring for and tending to Earth not exploiting her for profit, for money. We don't need "the cloud storage" — people have lived hundreds of years without and we can learn to live without it again. We are all already to addicted to our phones and computers, we don't need more data centers to keep us submitting to these robots. We are in the age of the rotors, we are already being controlled. By going forth with the data centers, with Project Jupiter, we continue this narrative—the narrative that will be the downfall of humans. The broader public does not want that, we just want connection with other humans in person; data centers is not the answer to that. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
Anonymous	Anonymous	Give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Deny Yucca Growth Infrastructure's air quality permit because they cannot be trusted given Bloom Energy's history of illegal dumping of hazardous waste. Approving this permit would be governmental racism, as the residents of Doña Ana County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing must be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No	Merged Document	[redacted]	Yes Yes	4/17/2026
Maribel	Hernandez	Health impacts of air pollution & hazardous waste I am a resident of Albuquerque, NM and I am asking that you deny Yucca Growth Infrastructure's air quality permit. The impact of air pollution and hazardous waste will be devastating and irreversible. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. We need to be working on solutions to improve our environment not making it worst. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes Yes Yes	4/17/2026
Kylie	Seo	We don't need more data centers ◆ Really respect what you guys are doing to stop this project. I hope we can save our planet before it's too late. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes Yes	4/17/2026
Allison	Hernandez	stop project jupiter!! we can live without ai but we cannot live without the earth. this project will use already limited water resources hear in New Mexico. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No	Merged Document	[redacted]	Yes Yes Yes Yes Yes	4/17/2026
Alexie	smith	is provided by the applicant. Safety margins are not usually added if a company is confident in the accuracy of their pollution estimates. Even small variations from this superficial test will result in massively different levels of pollution and given that the plant will be 37,000 bigger than the testing unit, a 15% safety margin is completely insufficient—it could work as a margin for a single unit, but not the entire plant. If a unit has a 0.01% chance of failing (sounds promising right?), the odds of 37,000 of those units working perfectly at the same time is 2.47% (pathetically low feasibility). That means there is a 97.53% chance that the plant will experience at least one failure. What will the exact level of redundancy be? Will more fuel cells be rubberstamped or pollution levels overlooked in the years or less due to age-related inefficiencies? What about cases of catastrophic failure? Are we approving these deadly incidents of pollution in advance without any real data informing us of the risks at this scale? Highly flammable hydrogen under high pressure only needs a microscopic crack to leak out, ignite, explode, and level entire neighborhoods and schools while sending shockwaves into nearby counties. Assuming this risk, an act of gross negligence, at a scale that has never even remotely been demonstrated in practice would be undeniably careless. Those permits must be denied outright. If further deliberation is desired, a public hearing in Santa Teresa is non-negotiable.	1	No	Merged Document	[redacted]	Yes Yes Yes	4/17/2026

Tajai	n/a	I am a resident of new mexico and I am asking for you to deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. Hello This data center will only accentuate the already pressing climate crisis, if we take the time time to find better sources of energy and better ways to store data instead of continually consuming all the land and resources we have left on earth we will be able to not only further our goals a humanity as a whole but also become more efficient eventually making these massive data centers obsolete. I believe the public should be given an additional 60 days to review and comment on the air quality permit and the air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste in addition to the option of a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually if the permit is not denied and it can be shown Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. Thank you -Tajai johnson	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	Yes	8/17/2026
Nox	Ponce	As a young person so lives in new Mexico project Jupiter is NOT gonna be this amazing thing. It will actually be the opposite it's gonna cost of water pollution , noise pollution and overall disturbe are communities. We know that the people behind project Jupiter are shady people who will don't deliver on their claims. Why are we putting are communities at risk for money. New Mexico has limited water sources as it is what is the need to put that water at more risk. Knowing I will have to grow up in a state that is willing to sacrifice their own communities for a million dollar corporation is shameful, and udderly inhumane. Instead of helping the community your harming millions of life's	1	Merged Document	No				Yes		Yes		Yes			8/17/2026
Anonymous	Anonymous	We do we need all this? We're completely fine without ai. If anything, let the public decide, we should have 60 days to review it. And why is this even being approved? Does NMED not realise how much pollution this'll increase? It's stupid. If this permit is for some reason not denied, then there should be a PUBLIC hearing in English and a Spanish, with the option to participate virtually.	1	Merged Document	No						Yes				Yes	8/17/2026
Alondra	Hernández	Project Jupiter threatens the safety and well being of my community and environment. I do no agree with this data center construction and would like to advocate for its denial. New Mexico needs clean water and healthy residents , not an artificial intelligence data center that will disrupt our ecosystems and health. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Bethany	Reilly	I'd like to voice my strong opposition to the granting of an air quality permitting action for the YGI Microgrid, and anything that is in support of Project Jupiter. Our desert community cannot sustain a project that threatens to drain our already stressed aquifers and potentially pollute our air with millions of tons of greenhouse gases. We are trading our natural resources and the health of our communities for corporate AI dominance. I am deeply disturbed by the developers' lack of transparency. Reports of canvassers submitting public comments in residents' names without consent completely undermine the integrity of this process. It's not the first time Project Jupiter has been caught lying and spreading false information. I demand a fair, honest, and transparent process that puts the residents of Doña Ana County first. I urge the New Mexico Environment Department to reject the developers' air quality permits and close the regulatory microgrid loopholes once and for all. Our air, our water, and our futures are not for sale to the highest bidder. Thank you.	1	Merged Document	No				Yes	Yes	Yes	Yes			Yes	8/17/2026
Sarah	Swan	Project Jupiter will threaten our already limited water supply that's ALREADY being threatened by large cooperations that use far too much water (Example: Nestlé) I fear for my future, I cannot be a Maritime Archeologist if there is no water for the Maritime part. Project Jupiter also will cause many animals to go extinct along with ruining already fragile ecosystems. Please, stop project Juptier before it happens because once every river is dry and all the animals are toxic I hope these people realize that you cannot eat money and that this is our only planet, we cannot live and prosper in any other ones.	1	Merged Document	No				Yes		Yes					8/17/2026
Laena	Wheeler	Dear NMED staff, My name is Lane Wheeler. I am not a New Mexico resident, I live in Keizer, Oregon, but I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I care about my generation's and the future generation's futures, and this giant data center puts our futures at risk. The climate is already in jeopardy and a giant data center for AI is unnecessary and dangerous. Generative AI steals water, information, art, jobs, and people's intelligence, it was never essential to the average person's day then and that should remain true to now. The project's proposed fuel cell powered grid is concerning for many reasons: -It would still produce a high level of greenhouse gas and toxic pollutants. -This technology generates toxic waste, and the process for handling this waste is still unclear. -Fuel cell technology or a centralized waste system has never occurred at this scale. -Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Lane Wheeler	1	Merged Document	No				Yes	Yes	Yes		Yes		Yes	8/17/2026
Madison	brown	STOP PROJECT JUPITER! Citizens do not want data centers in NM and trying to brand it as a way to help New Mexicans isn't going to work because we're not stupid. What use is more temporary job openings when you're going to permanently damage the lives of thousands of citizens in new mexico. It will pollute our water, our air, OUR LAND, the so called Land of Enchantment. The claims of loving New Mexico more than anything do Not align with polluting our land and citizens with the effects of a data center. completely selfish and disgusting is what project jupiter is.	1	Merged Document	No				Yes							8/17/2026
NA	NA	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe.	1	Merged Document	No					Yes	Yes					8/17/2026
Adri	Esp	I vehemently oppose the approval of this permit that will be used to build a data center in New Mexico. It will negatively affect the air and waterways of this community, and the financial gain does not outweigh a community's health. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Elaine	-	I do not live in Santa Teresa, but I own property in El Paso, directly across the border from where Project Jupiter is being built. This is not just an investment—this is my family's land, and what happens on that side of the fence affects my side of the fence. The air does not stop at the state line. The water does not either. I am asking you to deny this air permit. Ten million tons of carbon dioxide and over a hundred tons of VOCs on top of a community that has failed air quality standards every year since 2000 is not progress. It is environmental racism. We already breathe some of the worst air in the country. My family and my neighbors cannot afford more. And let's be clear about who we are dealing with. The fuel cell provider has a documented history of illegally dumping hazardous waste and covering it up. They have done it before. They will do it again. And when they do, it will be our soil, our water, and our children's lungs that pay the price. A fine after the fact does not undo that damage. If you will not deny this permit, then at the very least you owe us a real public hearing. In Santa Teresa. In person. With Spanish translation and virtual access. We deserve to be heard in our own language, in our own community, on our own terms. My family's health and my property's future are worth more than any out-of-state corporation's bottom line. Please do the right thing. Deny this permit.	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Daniel	Kreymborg	Building a data center will bring us nothing good, and will contribute to global warming. It will also drain our fresh water supply which is already getting really low.	1	Merged Document	No				Yes							8/17/2026
Katherine	Colindres	Creating another data center when we are already at the brink of having no clean drinking water will only enhance the situation even more. Many more communities will struggle from dehydration with how big project Júpiter is planning to be. This data center isn't just harmful it is completely unnecessary considering that AI is nothing but a harmful tool made by companies to increase their profit. We lived without it before we can live without now. Their should be no reason we are destroying ecosystems over something we don't need.	1	Merged Document	No				Yes							8/17/2026
Jade	Rodriguez	No matter how it is presented to the people, this project should not continue. It is an environmental hazzard for a state that already has limited water and less than ideal national air standards, with air pollution already having been affecting the ways of life for all of those who live in New Mexico. Look at Colorados data center, who are suing the state for not enough water to fuel the center meanwhile people who live there have been forced to accept dirty and polluted water since all the clean water is being taken to keep their data center going. These projects are not necessary but selfish cruel, and utterly useless as the money going into the destruction of public land and architecture of the center, to the system of fueling could all be going to other more useful and necessary things, such as homelessness, education for all citizens regardless of age and gender, and lowering rent prices so the people of the United States could live without fear for their future. That is what the government should be investing in, not AI that is of no need to the public. Stop Project Jupiter.	1	Merged Document	No				Yes		Yes					8/17/2026
Galilea	Barajas	We cannot afford more intense heat. The other toxic air pollutants are EXTREMELY DANGEROUS, many of them at very low levels. How am I supposed continue to live without FEAR for my families, communities, and I's health knowing what they are breathing in? Knowing it can cause PERMANENT BRAIN DAMAGE or breathing complications!!! Fuel cells also create HAZARDOUS WASTE and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat THEIR bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices??? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping WONT UNDO DAMAGE or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of.	1	Merged Document	No				Yes		Yes		Yes	Yes		8/17/2026
Nicole	Bellin	The health of the people in our country should be held higher than the desire to build a data center to power unnecessary AI. There is no reason to sacrifice the lives of countless people just to have more data centers on this planet. AI is ruining job opportunities for people, people's health, the environment, the sanctity of art and creation, the safety of people and children, and everyone's right to privacy. The negative effects that AI and giant data centers are bringing infinitely weight out the potential sliver of good that it may or may not bring.	1	Merged Document	No						Yes					8/17/2026
Bryanna	Romano	There is absolutely no reason for the rapid expansion of AI usage that we are seeing as of late. We have led and lived fulfilling lives for years without AI systems that damage our environments. Human beings used to have a drive for work, they used to be creative and THINK of solutions with their brilliant minds. Do not become a part of the sheep flocking to use such a lazy route when we have so many other solutions. Stop AI. Stop Data Centers. Protect our planet, it's the only one made for US. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Meme	Fry	Nobody with a tax bracket below 50% asked for this absolute joke of a climate disaster. Project Jupiter would release insurmountable amounts of greenhouse gases and person not just the nearby schools and communities, but the environment ITSELF. The hispanic residents are already suffering from environmental racism. it's also not even guaranteed to WORK because this type of power has never been done to this level. It's so exhausting and ridiculous that we have to get on here and plead you all not fucking kill us with your next "get rich quick" scheme of useless ai, just so you can give more money to shareholders. The public demands a moratorium on any development and construction of this facility and a ban on any similar to it— at MINIMUM.	1	Merged Document	No					Yes	Yes					8/17/2026
Khloe	Dadieh	The AI Data Centers that you are trying build across this country is not for powering a search engines like chat gpt. It is for collecting mass amounts of data on people. This mission that you have to surveil regular people is absolutely ridiculous and tyrannical to say the least. The fact that you AI companies are willing to hoard the water that people need to live and also contribute significantly to climate change is quite frankly evil. You are sacrificing the well being of people and this planet to control people and frankly that is not sound like a reasonable sacrifice. If you really want to remain in power create technologies that actually benefit people, move us away from being reliant on fossil fuels, move ai data centers from being reliant on water, use the "vast capabilities" of AI to preserve and benefit this planet. If you know AI is not capable of doing so then stop project jupiter remove the investments that you have made in AI and channel your wealth to technologies that are more beneficial.	1	Merged Document	No				Yes							8/17/2026
Elsa	Mastico	As a long term traveler to New Mexico it horrifies me that this data center could ever get as far along as it has. New Mexico has a beautiful and fragile ecosystem with water problems already. This data center will decimate the water supply and potentially lead to the decline of New Mexico as a viable place to live. To lose an entire state and have an egress of climate refugees could be devastating to our already failing government subsidies. I urge the environmental commission to attempt to stop this project at any cost. For the sake of New Mexico, the people who live there and call it home, and the tourists that love it so much.	1	Merged Document	No				Yes		Yes					8/17/2026
Emma	n/a	Dear NMED Staff, My name is Emma, I am not a resident of the area this is being built, but for the sake of the New Mexican community I urge the NMED to outright reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. Even though I am not a resident, a climate injustice such as this being passed anywhere in the United States affects every single state, not just the one it's happening in. No community deserves to live in the environmental damage that this air permit application will cause. This project will be a climate and communal disaster with its proposed 10 million tons of climate-warming greenhouse gasses every year, creating more greenhouse gases than New Mexico's three largest cities combined. Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Emma	1	Merged Document	No					Yes	Yes		Yes	Yes	Yes	8/17/2026
Alyx	Montez	As a US citizen born and raised in New Mexico for my whole life I do not want this state to represent itself with inhumane projects. The inhumane project in question is data centers being built in our state without any regard for the environment or anyone in this country. The exorbitant amount of pollution caused by these data centers has been thoroughly studied, and has been noticed by US citizens directly involved in using the same water that these data centers consume. It is a repulsive mark on this entire state to continue with any and all data center projects due to excessive use of any and all resources required, the main resource being clean water. All US citizens have a right to access clean drinking water, and data centers actively prevent that by taking as much drinking water as the leading companies want without any concern for the way water comes out and back into public water systems. All of this excessive use materials, labor, and water not only affects people as a whole but also becomes a primary pollutant to our atmosphere as a whole. If this continues there will be irreparable damage to people, the environment, and not to mention the status of those involved with these centers. US citizens are not happy with the toxic conditions being caused by these projects and unconcern for public health and safety. I do not want our air quality lowered and I do not want any sort of bill to allow it either.	1	Merged Document	No				Yes	Yes	Yes					8/17/2026
Agnes	Heib	The sacrifice of our communities and environment to Ai is absurd. There is known evidence of what data centers cause, none of which benefits the people who have to live near them. Light pollution, sound pollution, air pollution, and water pollution, vital things in order to live. Stop project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	I don't live in NM, or anywhere near that state. But to have to sit back and watch as this data center takes up valuable space, money, water, and breathable air is like watching hell. We do not need these data centers to live, and have not needed them. I just pray that enough people sign this document and that this project is stopped. We are stripping our earth of its valuable resources, its sickening to watch people not care about things like these, not realizing one day they won't have water to drink, or bathe with. One day we won't have clean air, from these data centers and other air polluting systems. I refuse to sit back and watch this data center be built. Stop project Jupiter and save the Rio Grande. The public should be given an additional 60 days to review and comment. The air quality permit should be denied. If the permit is not denied, then there should be a hearing held on Santa Teresa. Approving of the permit would be government-sponsored rascism.	1	Merged Document	No				Yes	Yes	Yes				Yes	8/17/2026
Anonymous	Anonymous	The absolute tipping point for climate disaster is in eleven years. Not 50, not 20, but a decade. If you think that a climate disaster wouldn't affect you, maybe because you're rich, or "humans are very adaptable", you're dead wrong. We humans are animals. We aren't gods. We depend on the stability of the environment just as much as every other living thing. But we need data centres to generate ai cats. Right. I guess you just shouldn't listen to me if you think chat gpt is worth the lives of your children and grandchildren. I guess it doesn't matter if they have a slow and excruciating death. I mean, those ai companies REALLY needed more data centres. If we continue to let ai centres be opened despite the incoming climate disaster, the tipping could be cut in half. If you care about the lives of your children, you would do something. We can't afford to be cowards	1	Merged Document	No		No	Oppose - Non-Substantive			Yes					8/17/2026
Logan	quarles	This is wrong! Prioritizing the advancement of AI development over maintaining and improving our already struggling ecosystems will be the beginning of the end! "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	I am a Native American resident of New Mexico, specifically the Diné tribe. I call on the NMED to deny Bloom Energy's air permit. New Mexico is home to Native Americans and other minorities who live and work on lands that deserve to be protected. The issue of AI data center water useage is at the forefront of concerns around the environment, but the issue is even more extensive than water. New Mexicans should not have their health further compromised by environmental hazards, especially since Bloom has illegally dumped hazardous material before. When corporate profit is placed before the health and wellbeing of the people, then the vulnerable suffer. Native Americans and Hispanics especially are affected by scarcity of environmental and social resources. Allowing an AI data center in Doña Ana county would only deter any equitable access to health and well-being and worsen historical trends of disenfranchisement. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Briana	Anonymous	Earth is our only planet, please help conserve it. I want the animals and the earth to continue thriving in the little ways they currently can. I am a highschool student, I am the future, but my future seems to be being wrongfully manipulated by billionares. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Paloma	Baron	As a lifelong resident of New Mexico, I encourage the NMED to deny Bloom Energy's recently contested permit. This goes further than the fact that Bloom has a history of illegally dumping hazardous waste. The people of New Mexico, especially our Hispanic and Native American populations, are consistently affected disproportionately by environmental hazards caused by industrialization. The environmental hazards inherent in large-scale AI data centers will become another negative statistic for the health and well-being of minorities. It will also harm not only the people, but also the flora and fauna of the lands they call home. Furthermore, AI data centers consume quantities of water that would plunge the state into even more dire levels of drought--again, affecting minorities who rely on availability of already scarce resources to live and work. I encourage the NMED to give the public an additional 60 days to review and comment on the air quality permit. Additionally, should the permit not be denied, a public hearing should be held in Santa Teresa in multiple languages and with virtual options. By allowing Project Jupiter to move forward, the state allows residents of Doña Ana county and the state at large to become expendable fodder in a class war in which the rich and powerful are the victors. Please consider the needs of the people of New Mexico and the environment of the Land of Enchantment before corporate profit. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Camila	Ponce Pozo	This project will not only destroy the habits and life of the wildlife in the area but also affect the health of the residents nearby. The pollution that this project will cause will outweigh massively any of its supposed benefits. Close by are innocent children who just want to learn, their health will be massively affected by this awful project. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Jonathan	Butler	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up.	1	Merged Document	No					Yes	Yes		Yes			8/17/2026
anonymous	anonymous	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Bloom was fined for improper hazardous waste handling in Pennsylvania and Maryland. In 2020, Bloom was fined $210,000, and then $1,161,000. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the application to ensure everyone can meaningfully comment and participate. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Anonymous	Anonymous	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Where I live temperatures are getting dangerously high like they never have before. Pollution and climate change has already severely impacted my local area via forest fires, displacing people from their homes and making the air unbreathable. AI data centres only contribute to this ongoing issue, some examples listed below. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anonymous "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Max	Herrmann	Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	1	Merged Document	No				Yes		Yes		Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	Hello, I don't live in New Mexico, But I'm afraid of the precedent Project Jupiter will set if it is actually built. They just want more and more and more land. How much is enough? Until our land is no longer usable? Until our skies can no longer allow us to breathe? Until AI has encroached even further into everyday life, moreso than it already has? Not to even get into the detrimental effects AI has on the brain. The earth is already being damaged by AI data centers. The globe is warming and everybody sees it, the latest heatwave is just a side effect. The greenhouse gasses that will be emitted by Project Jupiter will just speed this up. I know that I do not live there, but think of the families that will be damaged by the pollution Project Jupiter will subject. Light, sound, air, water. When will it be enough for you? How many voices does it take? This will not only hurt New Mexico, it will not hurt just America, but it will hurt the entire world. Don't let yourself become complacent in the destruction of your home. I wish we could talk to you face to face, so you could see every person that would be irreversibly hurt by Project Jupiter (and other such similar projects) coming into reality. The truth is I'm scared of this world I'm living in. Scared that people can be so easily swayed by money to double back on their values. I'm just 19, whole life ahead of me, and this is what me and others like me will inherit. Is it worth it? To leave behind a wasteland for your children to rule? It can't be, it never will be. Money isn't forever, the land is if we put in work to protect it. I know you may think it won't effect you, as you probably don't live in the would be effected town, but soon you'll see the horrors you've unleashed, the doors you opened for this virus to infect our land. Please make the right decision. Do not let Project Jupiter stand. Thank you.	1	Merged Document	No				Yes	Yes	Yes					8/17/2026
Zan	Uchuu	Building a data center in the desert in a low income state makes absolutely no sense at all. It will put undue stress on the local community and destroy the local ecosystem. PLEASE DO NOT BUILD THIS NEEDLESS WASTE OF SPACE! "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026

Fernanda	García Moreno	Dear NMED staff, My name is Fernanda. I live in San Diego, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. Since I was a little girl I've been extremely passionate about the environment which is OUR HOME, and that passion hasn't died out, in fact it's been so present that I graduated as a bioengineer just to be able to help somehow our planet. This projects is extremely dangerous, it will kill everything, animals and plants alike. But I will also kill us, we CANNOT EAT MONEY. This project will only reduce our natural resources and when they dried out, I wonder what will you buy when there will be nothing to eat. The project's proposed fuel cell powered grid is concerning for many reasons: it would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Fernanda García Moreno "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."																				
Mitta	Clark	Minted Document Whilst I do not live in New Mexico, I will be impacted by the 10 million tons of carbon dioxide that fuel cells from project Jupiter will release. I will also be impacted by the water shortages this project will cause, as the rio grande has already started to dry up before this project has even fully begun. This project is a climate disaster, and will impact everyone in this country. I am begging that you halt the continuation of this	1		No							Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026
Anonymous	Anonymous	Minted Document I was born and raised in New Mexico alongside every generation of my family. Every year I see the Rio Grande yield less and less water, completely drying up before this Summer even began. How am I supposed to support a data center that will use MILLIONS of gallons of water daily when my state, my home, has been in a water crisis as long as I have been? WE THE PEOPLE REJECT PROJECT JUPITER. WE THE PEOPLE WILL FIGHT AND INSIST FOR THE SAFETY OF OUR HOME. FUCK THE DATA CENTER. FUCK YOUR MARKERS, AND FUCK THE SURVEILLANCE STATE. PEOPLE OVER PROFIT. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes	Yes	Yes			8/27/2026
Nicolas	Arroyo Prado	Minted Document No one needs AI and many don't want it. People who do are people who can't think for themselves or want to do any kind of work.	1		No							Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026
		"The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."																
Melissa	Gildark	Minted Document I strongly oppose Project Jupiter. It will not benefit our community. The jobs it will create are temporary, and will leave thousands jobless after the construction is complete and the it begins operations. It also will be taking water for people and animals in New Mexico need for survival and growing crops, to the tune of 5 million gallons per day. Additionally the carbon dioxide pollution from this plant is estimated to be 10 million tons. It will also create huge quantities of hazardous waste. The plant will also disperse chemicals like carbon monoxide, nitrous oxides, volatile organic compounds, benzene, xylene, and methanol into our air. This company has already been fined for improper disposal of hazardous materials and polluting the environment. It is irresponsible, dangerous, and an insult to the people of New Mexico to allow this project to go forward. Please do not allow Project Jupiter to become a reality. There are no long term benefits of this project that outweigh the negative output. The people of New Mexico do not want it taking our resources, polluting our air, and putting hazardous waste into our beautiful natural environment here in the land of enchantment. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Eliana	Harden	Minted Document We do NOT need air! The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Sarah	Eng	Minted Document Dear NMED staff, My name is Sarah Eng. I live in Seattle, WA, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: 1. Bloom was fined for improper hazardous waste handling in Pennsylvania and Maryland. In 2020, Bloom was fined $250,000, and then $1,341,000. The proposed "micro" grid has a 2,460 MW Capacity. For comparison, the El Paso Electric grid is about 2,000 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of these grids includes a substantial amount of renewable energy sources, and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. 3. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. 4. Fuel cell technology has not been deployed at this scale. This is 10 times larger than the largest existing Bloom fuel cell installation. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Sarah E. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Kimberly	Steele	Minted Document I am not a resident of New Mexico. But as someone who has basic human decency, I know that it is far more important to prioritize the actual people living in an area. A data center to run AI to think for us has no real long term benefit to the community and will only take away clean drinking water from people who need it. We need to start using our brains and stop having AI do it all for us.	1		No							Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026
Deidra	Hill	Minted Document WE ❤ DON'T ❤ AI. ❤ WATER. They are either trying to kill us or create resource scarcity so they can sell us our own river back. This Data Center is a death sentence to our state.	1		No							Yes						8/27/2026
		"The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."																
Azaria	Abbaud	Minted Document don't build this stupid data centre. ai is already bad enough - using tons of water, partly responsible for climate change. do we really need another fucking data center? even kids have to speak up about what's going on. you can't look at the wildlife around you and think 'yeah lets cares about them let's just build more data centres' your gonna regret building this when you have no clean water and climate change gets so bad that it's not even safe to go outside. this is already happening in some places because of wildfire! idiots like you, open your eyes	1		No							Yes	Yes			Yes	Yes	8/27/2026
Ella	anonymous	Minted Document my frontal lobe hasn't developed yet and still knows how stupid this is. water is essential and your causing damage to our earth and us. "us" is including you. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes			Yes	Yes	8/27/2026
Alexandria	Bedell	Minted Document I want to live in a world where I don't need to ever use my AC, where I don't have to see garbage everywhere, where I don't have to fix a problem that shouldn't exist. A I may have existed for decades, but it's becoming a bigger problem everyday. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes			Yes	Yes	8/27/2026
Maria	Mosselyon	Minted Document please stop the damage that the project causes. it is harmful for the environment and for people. the crowd shouldn't be explaining how dangerous it is to the ones who should've been aware of that in the first place.	1		No							Yes	Yes			Yes	Yes	8/27/2026
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.																
Amelie	Longate	Minted Document Approving this permit would be government-sponsored environmental racism, approving this permit would be killing us ALL. we should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. For the future of this world please don't continue with this	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Taz	Lueren	Minted Document Our world is being bent/yet starts at usage and data centers being built in large amounts, ruining our waters, weather, and creative thinking. We don't need billionaires to get richer we need our environment back with safety.	1		No							Yes	Yes			Yes	Yes	8/27/2026
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."																
Aria	Barber	Minted Document This is disgusting. Stop this project! People are working to destroy a planet they live on like it won't affect them too! People going into high school and middle schoolers know how harmful this stuff is and grown adults don't?!? This needs to stop we are already ruining peoples futures and it needs to stop by now. Horrific and harmful it is to our! Stop this before we make the timeline have left on earth shorter than we can outlive! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes			Yes	Yes	8/27/2026
Seren	Thorn	Minted Document I'd like to let you know, that project Jupiter will kill people. Your forced clientele is going to die if this happens, climate change is our shared disaster and we must stop it. Your data centre will only contribute masses of deaths. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No							Yes	Yes			Yes	Yes	8/27/2026
Shanice	Sotelo	Minted Document I do not live near the plant nor do I have any family there but from a human to another we cannot continue with this project. I firmly believe people who fund or demand these projects are part of higher society or are part of the higher class in the wealth gap. Nothing irritates me more than those people destroying lands that aren't theirs for their own monetary benefit. This project is destroying communities and with the amount of carbon emissions released yearly, is killing our future. I am only fifteen, I haven't gotten to experience nor enjoy life enough. I didn't even graduate from high school yet. I have to live on this earth knowing I live with thousands of plants like these killing me, my friends, my family and people I don't even know. You are killing communities, draining their water without anyone's approval other than the only people that won't be affected. These projects are killing minorities that governments don't care to defend. The rich are further insulting groups that had been insulted, discriminated, ignored and colonized, including some communities like Doña Ana. Area, majorly affected by bad air quality which nobody is living. Instead of using their money to fix climate change, or help communities, they use it to kill us faster. The air wouldn't hurt harm locals, it will hurt the rest of the world quite fast considering the amount of pollution yearly. Huge decisions like these should be voted upon in town halls to the public in some ways or even, taken to court in an accessible way so that anybody may be able to attend. Please at least let the public have time to review the air quality. As a matter of fact, the air quality permit should be denied because of the company's history of dumping illegal hazardous waste. Consider the pleas of the in your communities and of the world. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No							Yes	Yes			Yes	Yes	8/27/2026
Angie	Laurenn	Minted Document We Don't need AI to be intelligent, AI should not be on internet in the first place, it's actually Destroying the system and draining our water, please stop this project it's not useful. Think about the children, this project gives them toxic fog and asthma. This causes extreme hot waves in the world and it's dangerous just this can cause terrible diseases and it could kill so much animals, plants, trees even forests. Please wake up, we look like stones. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes			Yes	Yes	8/27/2026
Reagan	Lenhead	Minted Document This data center can have a huge amount harm for local communities as this will not only cause a depletion in water source but add more to the pollution the communities already have	1		No							Yes	Yes			Yes	Yes	8/27/2026
Adriana	Gonzalez	Minted Document Creating this gigantic data center will not benefit anyone, it will only harm us and our planet. This is will also deeply affect, as it it's not already but it will affect so animals and their habitats. This center I'm sure you know, is going to take away the clean water for multiple people and leave them with dirty water coming out of their faucets. Everyone knows climate change is increasing every day and AI is not going to help reduce it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes		Yes				8/27/2026
n/a	n/a	Minted Document Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined — Albuquerque, Las Cruces, and Santa Fe. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "sweat canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the sweat canisters is exempt from air permitting regulations (because there is less than 1000 lbs/yr). I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate.	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Paige	Murray	Minted Document I do NOT support this! We do not need data centers! We do not need air! We needs be planting more trees and cleaning our oceans! Doing this and placing a huge data center will have a huge and significant impact on our future and environment! The people who want to do this and who support this are BEYOND evil and if they care about no one they don't care about the earth or the environment. Fuck you for that. And if you have the AUDACITY to say you do even if you want to do this or if you support this, you're lying and you don't actually mean that. Do NOT put this data center up, do NOT support this, do NOT let this pass. Focus on the Earth. We need to clean the earth, plant more trees, put more on buildings, focus on solar power, stop using fossil fuels. Make the world a better and healthier place. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes			Yes	Yes	8/27/2026
Mira	Anonymous	Minted Document We as people are not meant to rely on AI we are meant to BE the AI. We should not let our brains rot due to the dependency on AI. more data centers not only increases our depends but damages the environment around us a lot quicker than we already are, for the good of humanity, and our children, and their children. Do not build this data center. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No							Yes	Yes			Yes	Yes	8/27/2026
Ty	Owens	Minted Document We can not afford to allow more data centers to be built, let alone this massive one that is Project Jupiter. The environmental catastrophy that is this trend of generative AI will fail because the people do not want it. Allowing Project Jupiter to be built will waste resources and it will not result in any true influx of jobs or money into your community.	1		No							Yes	Yes			Yes	Yes	8/27/2026
Nour	Rostan	Minted Document We do not need data centers. The world has survived long without it. Our planet is in desperate need of a healthy and productive change. Climate Change is real and detrimental. We do not need data centers, our air.	1		No	No	Glucose - Non-Substantive					Yes	Yes			Yes	Yes	8/27/2026
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."																
Giselle	Hernandez	Minted Document AI uses so much water just for a single question, and we are running out of fresh drinking water and also going through climate change which is why it has been so hot and it's only going to get hotter so please Jupiter can cause more climate change. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Crawford	Pennington	Minted Document The world is already filled with pollution. We already reached the limit faster than only all us could've imagined, and this is just like putting salt on these billionaires only concern themselves for when they die, but not the future generations to my goals. Do not stop this one, but stop all forms of pollution to reverse change. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Anonymous	Anonymous	Minted Document Project Jupiter as a data center would be environmentally destructive to a severe degree that it would end up affecting not only the water resources in the US, but also global climate. Quite frankly, the planet already has enough climate issues as it is, so when it comes to large water-consuming data centers like this, it is a matter of global concern. Heatwaves in Europe have already reached 45C while tropical countries are slowly sinking. Though these things are the result of many contributing factors, it is undeniable that AI centers play a huge role in global warming, and we must do whatever can to, at the very least, mitigate the effects and build a more sustainable planet earth under the United Nations' Sustainable Development Goals. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Perry	Monroe	Minted Document We don't need generative AI. We have lived fine without gen AI for years, we should honestly go back to when it wasn't released to the public. If you think back, things started to go down hill when it was introduced and it won't be reversed as already on the verge of collapsing not just due to deforestation but also air pollution, which is caused by AI many things. Gas, factories, light, GENERATING AI. And on top of that most generative AI isn't used for good either. Grok for example, that's mostly used to make NSFW content or at least that's what it's KNOWN for. ChatGPT is useless because they've also slowing AI down our thought. Not only all of that but we've also made people dumber. The more people use ChatGPT or basic everyday day things means your brain stops thinking for itself and starts to rely on it. The more people that use AI to do homework, tests, etc... You're not doing any good to yourself. We need AI gone and that data center will only make it worse. MOST PEOPLE DONT WANT AI SO DONT FORCE IT. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026
Mai	Tran	Minted Document The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intolerances. The other toxic air pollutants are extremely dangerous—all many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up.	1		No							Yes	Yes			Yes	Yes	8/27/2026
Faith	Rodriguez	Minted Document Hello, I personally find it inhumane and extremely unethical to use AI let alone build a data center that will release 33 million tons of carbon dioxide into our planets atmosphere and drain our water sources. We've NEVER needed AI, AI is not a necessity and it is not something the public needs access and it's definitely something our government doesn't need to implement as heavy as it is right now. People are going to die but what effect does that have on the billionaires? It doesn't have an effect on them but it does. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No							Yes	Yes	Yes		Yes	Yes	8/27/2026

Perry	Monroe	We don't need generative AI. We have lived fine without gen AI for years, we should honestly go back to when it wasn't released to the public. If you think back, things started to go down hill when it was introduced did it not? The environment is already on the verge of collapsing not just due to deforestation but also air pollution, which is caused by SO many things. Gas, factories, light, GENERATIVE AI. And on top of that most generative AI isn't used for good either. Grok for example, that's mostly used to make NSFW content or at least that's what it's KNOWN for. ChatGPT is useless because we have Google. (Even though they're also shoving AI down our throats) Not only all of that but Gen AI has made people dumber. The more people use ChatGPT on basic everyday day things means your brain stops thinking for itself and starts to rely on it. The more people that use AI to do homework, tests, etc... You're not doing any good to yourself. We need AI gone and that data center will only make it worse. MOST PEOPLE DONT WANT AI SO DONT FORCE IT. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No	[redacted]											
Shania	Hernandez	We lived without AI for so long, why do we need it now? It's not fair to the planet that homes US and would be just fine without us, we need this planets water, we need its resources and by adding this data center we will lose those resources fast, if humans ever go extinct the earth would be just fine without us, why do you want to harm the earth that WE need, it's not fair to the people that actually appreciate clean water and good vegetation, we can live without AI or data centers, you guys just want to traffic other stuff and hide it behind data centers.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Elvira	Anon	I am writing this with my request to stop Project Jupiter. We struggle with huge global warming and climate changes and this project is a real danger to our planet. A fuel cell plant of this size has never been constructed before. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air. Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: cancer-causing chemicals, heavy metals, toxic compounds, etc. All of these poison the human body, our water, and our soil. I think it is right to view the problems Project Jupiter will cause. I am hoping for you to consider people's requests. Remember that this project carries a real risk to us all. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Payton	Wallace	Give the public at least 60 days to review and comment about this data center. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes		8/17/2026
Caroline	Smith	Communities need the health or their environment and the health of the water to come first, without a healthy humanity there is no point for AI to exist. Soon those towns will become ghost towns as humans cannot function or thrive is the conditions that data centers bring with them. Putting the health of humans, animals, and the environment first is the key to keeping thriving communities alive. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Olivia	Rowe	This data center will be EXTREMELY harmful to the environment surrounding it because this plant will release toxic chemical pollutants and 10 MILLION TONS of carbon dioxide into our air. In fact there are schools just miles away, and the children that attend could potentially be harmed. Our world is facing a global warming crisis and this data center would just worsen it. There's no reason to take away the already scarce water supply to towns surrounding for an unnecessary, expensive, and pollutive building. I believe the public should be given an additional 60 days to review this permit and share their opinions. I personally also believe that the permit should be DENIED because Bloom Energy has a past of illegally dumping hazardous waste. If this permit is somehow NOT DENIED then a public hearing must be held in Santa Teresa in English AND Spanish with the option to attend virtually. If this permit is granted then it is a form of government sponsored environmental-racism because residents of Dona Aña are already unfairly impacted by environmental pollution. I sincerely hope you take the time to think this over and consider the major impacts that project Jupiter will have, not only on the surrounding environment, but also the entire world.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026
Tara	McGuire	I don't agree with moving forward with Project Jupiter. My greatest concern is not just its immediate impact, but the long-term consequences for New Mexico's future. We already live in a state with fragile ecosystems, limited water resources, and increasing pressures from drought and climate change. My concern is about future forecasting, looking beyond today's promises of economic growth and asking what this project could mean 20, 30, or 50 years from now. Once our groundwater is depleted or our natural landscapes are permanently altered, those losses cannot simply be reversed. Economic development is important, but it should not come at the expense of our environment. New Mexico's land, water, and wildlife are among our greatest assets, and I believe we have a responsibility to protect them for future generations. I would rather see investments that create jobs while strengthening, rather than risking, the health of our environment.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026
Elizabeth	Nicodemus	Hello, I am about to turning 21 in acouple months. I still have my whole life left to live and I want to be able to enjoy my life and the world around me. I want to travel, hike, explore, etc. I want to be able to enjoy the planet we live on. If this data centers gets built it will have unfixable consequences to the environment and will destroy many ecosystems. We only get one earth to live on, why are we destroying it? Why aren't we protecting it? We don't need more AI, we do not want AI. I can think for myself, I can create for myself. I do not need an AI robot telling me everything. While I do think there are some good uses for AI like help for disabled people. I saw a video of a deaf women and a blind women being able to communicate through AI technology using Morse code. Things like that can be very beneficial uses for AI but there are better ways to do it then this project. We need to find ethical ways to produce AI. We as humans have brilliant minds, we can figure out ways to make AI not harmful. We also do not need so much of it. Think about the consequences this data centers will have on our planet before going through with building it. Think about how my people are already struggling to survive because they can't find enough water, food, etc. Also we are actively seeing the effects of climate change with this massive heat wave coming through. It is only going to get worse from here but it is not too late to stop it. I speak for everyone and everything when I say please consider what this will do to our planet.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Iana	Nikulina	Stop building crap that ruins our ecosystems and kills our planet. We survived without those data centers before and we will survive without them now. These data centers will not prolong our life on earth, but shorten it and make it way harder, causing thousands of deaths, both animals and humans. We only have three years till the effect of climate change is irreversible, please act responsibly. The environmental impact on the communities living by those centers is massive, including air, water, land, as well as visual and noice pollution. This is truly unacceptable. We cannot endanger the population like that, as well as cannot allow to spend millions of gallons of water like that, we will not survive for long if we do. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Anonymous	Anonymous	Data centers are everything except positive. They don't benefit anyone, it negatively affects people and anything surrounding the area. Animal habitats are being destroyed, it is polluting the air and water, wasting tons and tons of water, causing sound pollution. This is nothing but capitalism's and selfishness. People have been speaking up but are being ignored. We cannot live without the planet we live in, so why are people deciding to expand AI while knowing the consequences. Before AI, we did perfectly fine without it but all of a sudden we're not? This needs to stop, we must be heard.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026
Kristina	Grujoska	Polluting the limited drinkable water sources and drying them up completely is not worth it to have some ai that people will use just to ask about their symptoms and what they should do and search up the basic stuff on which we can get answers by opening a book or getting a doctor's appointment like we used to before. Stop wasting our water resources it is really not worth it we can't live off money and we can't live without water and food. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Juno	han	We can't eat money and animals are dying bc of out actions and if that sit right with you then you are a good for nothing piece of trash. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026
Wiebke	Boeing	Building a big data center with limited understanding about the real consequences seems like a big mistake. At times, it's challenging to distinguish between fact and fiction. I encourage you to take time, really look at the repercussions this will have for the local population, weight the advantages and disadvantages and make an educated, not rushed decision. My vote would be on having public hearings and educate the public on facts (not opinions, not special-interest twisted facts).	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Sophia	Davis	This data center can not be built. This could permanently destroy ecosystems, killing so man living creatures that one may not certain think about. With the release of carbon dioxide, sea levels will rise. Animals will die and coastal cities will begin to sink under sea level, destroying cultures and communities. Heat waves will get worse, and millions will die. If larger data centers are built, more electricity is used, and that means families will not be able to use electricity to cool off, rendering them vulnerable to the heat. This data center has more cons than pros. This will only positively affect the 1%, but in the end they won't even be able to see the fruits of building the data center. It will be a short-lived victory.	1	Merged Document	No	[redacted]									Yes		8/17/2026
Lee	McGuire	I oppose Project Jupiter because I believe the long-term risks to New Mexico outweigh the short-term economic promises. New Mexico is one of the driest states in the country. Water is our most precious resource, yet a project of this scale places additional demands on our groundwater, energy, wildlife habitat, and public lands. I'm also concerned about increased CO_2 emissions, potential impacts on air and water quality, and the long-term effects on public health and our environment. The economic benefits may be temporary, but the environmental consequences could last for generations. We cannot afford to sacrifice the natural resources that sustain our communities for short-term financial gain. Our land is more than open space—it is our identity, our culture, our history, and our way of life. We owe it to future generations to protect New Mexico's water, wildlife, public lands, and environmental heritage. Some things are worth more than money, which is..Our water. Our land. Our health. Our future.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive		Yes	Yes		Yes				8/17/2026
Sendilkumat	Akhil	The proposed data center is an absolute climate disaster that relies on already depleted water sources. It will only be a burden to the community and impact the health and wellbeing for residents in exchange for virtually no value.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
Leigha	Gill	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. extreme heat leads to electrolyte imbalances. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance too grow	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Lauren	Distler	Nobody wants this project to happen. Ordinary people don't stand to benefit, why would we support this? Why would NMED allow this? When I worked at NMED there were people working there that actually cared about sustainable water supplies and clean air. New Mexico has been facing water scarcity issues for decades. Building this plant further jeopardizes our utilities abilities to provide consistent clean water- especially in rural communities. They will be the first to suffer. The water use is just too much and the risks too great. On the topic of air quality.... Somehow I don't believe that the largest methane power plant ever made won't be bad for our air, communities, and ecosystems. We cannot allow this to happen. DENY the permit and put this to bed now. We will continue to fight this.	1	Merged Document	No	[redacted]				Yes	Yes		Yes				8/17/2026
Isabella	Schlueter	Why does the government think we need more data centers even tho we have all stated either limiting to not even using Ai. What does this even solve nothing because all they want is to see the planet suffer for example they're trying to build data centers in my state when my state is going through the worst drought in ages. We need to stop data centers we don't even need more of them because the hell because the government just wants to fuck us over to the point we're too tired to fight back. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
sal	burracho	I am a resident of texas and I am asking that you deny Yucca Growth Infrastructure's air quality permit. If you add this rio grandes biome will be destroyed not only that it will admit 10 million tons of carbon dioxide annually. Think about how many families that puts at risk. No way is this data center more important than human life. without human like every thing would be pointless. even this data center. we lived without AI for most of history. if we lived without it before we can live without it again	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026
Zoie	Anonymous	We cannot keep building these data centers let alone build a huge one. We are humans are extremely destructive creatures, but I never thought that I would get this bad. They aren't thinking about future generations. They're only thinking about themselves. These data centers are taking drinking water that small communities need to live. Water is needed for life. Where are we supposed to get more if we use all of it? I'm not even allowed to drive yet and I'm having to worry about if I'm gonna have drinking water for the next day. When this planet inevitably dies, where are we supposed to go? Mars? We are destroying our planet at a concerning rate. Maybe instead of using AI we should be focused on nature. If our planet dies, we're going to die with it. There is no Planet B.	1	Merged Document	No	[redacted]			Yes	Yes	Yes						8/17/2026
Laynee	Royland	We don't need anymore data centers, let alone tus ginormous one that is literally going to kill the United States. We need an additional 60 days to review and comment on the air quality permit.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Kylie	Scott	Project Jupiter is ABSOLUTELY disgusting and needs to be stopped this data center is going to ruin what clean air and water we have left their is SO much evidence of how AI and data centers ruin the environment and earth on top of what has already been affecting the environment for thousands of years us humans are reaching if not already to the point of no return and this is just adding to it. We have lasted THOUSANDS of years without ai and now theirs a sudden change and big push for it witch is NOT needed at all we do NOT need ai especially since theirs little gain from it and MAJOR negatives. Also given the facts of: The history of hazardous waste dump done by bloom in the past (witch in my opinion is grounds for closure and legal action against bloom) and secondly the fact that the Doña Ana county has NOT reported federally approved air quality in years meaning that their is already HEAVY pollution in Doña Ana. This ai data center will cause more and more pollution in Doña Ana county and the surrounding areas witch will also affect the citizens already living there and already affected by air pollution witch you have done NOTHING affective to stop. This decision to put a ai data center has already been projected to release 10 million tons of carbon emissions ANNUALLY and use up what's left of the rio grande river. This decision should be up to the people who will be paying for this ai data center with their safety, health, air, water, and their lives. They have already opposed against this idea but you guys don't care what they want you care about the next paycheck witch is NOT what ur job was invented to care about. This is absolute bull shit and a stupid thing to try and support when thousands of not millions will be negatively affected by this.	1	Merged Document	No	[redacted]				Yes					Yes		8/17/2026
Alexa	Waldhoff	Bloom Energy's air quality permit application should denied, if the permit is not denied a public hearing needs to be held in Santa Teresa. The public should receive an additional 60 days to review and comment on the air quality permit. Approving this permit would be government sponsored environmental racism.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes		Yes			8/17/2026
Gia	Barajas	I am a resident of Santa Teresa nm and I am BEGGING that you deny Yucca Growth Infrastructure's air quality permit. Ive lived here for about almost six years calling this our permanent home until 2024 is when our water supply had issues effecting our water till this day. Since then there's been this unknowing if WE will have a safe and secure future. That future is under THREAT with this proposed air quality permit AS WELL. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental RACISM. Our metro area is currently 16th WORST in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year SINCE 2000. We are already breathing some of the most compromised air in the country. It is unacceptable and EVIL to invite a new source of hyper scale air pollution into OUR communities. We cannot afford more intense heat. The other toxic air pollutants are EXTREMELY DANGEROUS, many of them at very low levels. How am I supposed continue to live without FEAR for my families, communities, and I's health knowing what they are breathing in? Knowing it can cause PERMANENT BRAIN DAMAGE or breathing complications!!! Fuel cells also create HAZARDOUS WASTE and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat THEIR bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices??? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation.	1	Merged Document	No	[redacted]				Yes	Yes				Yes		8/17/2026
Brianna	Bautista	This should NOT be built. It is a danger not only the the wildlife and nature, but to us as humans as well. This will take millions of water away from the people who need it. Water that he already limited as is. Please re think this decision.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes			8/17/2026
Neve	Driscoll	Project Jupiter is a threat to our nation and the land it is built on. We do not need it. We do not want it. We are concerned. The air quality is already deteriorating without this monstrosity, we don't need to add more fuel to the fire.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Lucius	Frost	We are sick of data centers! You take the water from the people, resources from the people and future homes for the people and what about the animals those whom no longer have homes those whom also can't drink like us. We don't want more ai. Leave ai to rot! NO MORE AI. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes							8/17/2026
Ruika	Yashimoto	AI IS THE WORST. We only have one planet, and all AI, but especially generative AI puts our planet in jeopardy. Screw data centres and let's prioritize the environment! The public should be given an additional 60 days to review and comment on the air quality allowing so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone—this means our air quality does not meet federal government rules.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes		8/17/2026
Jason	Begin	I STRONGLY oppose this horrid project and their permit application. This company has not shown itself to be capable of operating in an honest, open way. There are no assurances that this project will be safe or sustainable. The petition process has been abused and corrupted by Oracle, as they've failed to submit an unknown number of "opposed" comments, submitted via PJ canvassers. And other "opposed" comments were change to supportive comments. There must be an investigation into these facts before the petition comments can be weighed	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
NA	NA	I'd like to live a long, happy life. If the planet is in shambles, I will not have that. Shouldn't we be given more time? Maybe 60 more days to review? This is a big deal.	1	Merged Document	No	[redacted]	Yes									Yes	8/17/2026
Bella	Dossey	This will not only ruin the entire environment and community of New Mexico, but is the beginning of the end of an AI takeover. These projects are funded by billionaires who will not have to live in the future they are ruining. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	No	Oppose - Non-Substantive									8/17/2026
Mary	Crosier	The permit should be denied given Blooms reputation for illegal dumping & a hearing held for further review of environmental impact	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Chloe	Perie	STOP PROJECT JUPITER IF YOU WANT YOUR KIDS TO LIVE AND YOUR GRANDKIDS TO LIVE AND SAVE THIS PLANET. WE ONLY HAVE ONE! STOP BEING MONEY HUNGRY! New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]					Yes			Yes			8/17/2026
Anonymous	Anonymous	Please do not ruin our current ecosystem and environment. My understanding of this project is that it will lead to more concerns for the individuals near the area, pollute the environment for unreasonable outcomes, and create issues for the future generations to deal with the idea that this is for their future. What is the point of creating a center that will also contribute to is finding out a way to reverse its effects? How can this center be more important than the HUMAN lives that will and are disproportionately harmed? Or the animals and wildlife near the area? How can anyone in the committee of project Jupiter be okay knowing thousands of people do not support their endeavors? We have many other concerns to worry about as the general public, adding this project to an area already facing a climate change impacts. This plea for everyone involved to think about the consequences for the future of our families, future generations, the animals, the wildlife, and the climate as a whole. Instead of wholeheartedly believing this is an advancement for humanity or the US when we are already suffering through inflation and its consequences.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes		8/17/2026
Zoey	Tafoya	As a lifelong New Mexican I strongly oppose Project Jupiter and any future data centers that may try to be built/operated in New Mexico. Our air, water, and land are all so precious and must be protected. Data centers and AI are a direct threat to the planet/environment (as well as the human spirit) and must not be allowed to pollute our beautiful state. Given that Project Jupiter would not have any direct benefit for the people of NM and in fact would only serve to drain and pollute our resources, I think it should be struck down. We only get one planet and our resources are finite.	1	Merged Document	No	[redacted]					Yes						8/17/2026
Isabel	n/a	I am a resident of Calgary Alberta and although I may not live in a an area directly affected by project Jupiter I still feel the need to help those living nearer stop it. Project Jupiter is an unnecessary waste of resources and doesn't benefit anyone but the higher ups. The ones who live close and have no clean drinking water or no fresh air aren't happy cause "oh now I can use AI" The most important impact it'll have is on the environment. We're already seeing what other data centres half the size of this one are doing to the local environment so why would we want to double that essentially. Project Jupiter will not only affect those around it but will contribute to the global environment impact caused by other data centres and other factors of pollution. We cannot afford to keep destroying our planet like this so we need to do what we can to stop it, starting with the ban of this project.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Mireya	Ramirez	I am a resident of Santa Fe and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with generations of my family and this is our home. I want to continue living in a community that is safe from more environmental pollutants. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. It will add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone which will jeopardize the health of the community members. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. Our county has and continues to face an illegal dumping epidemic with fines being the only consequence. A fine for illegal dumping does not undo damage to our air, water, and soil or the health issues us residents will face after the damage is done. The cycle of this company paying fines after illegally dumping shows that paying fines isn't enough of a consequence to stop them. Why are we allowing an out of state operation to impose a data center NM residents never asked for? The residents will be dealing with the consequences, not the people who own the company. What gives them the right to put our people and our environment at risk? The chemicals that will be released will have long term health implications on everyone in our communities. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. Please put an end to this data center. Create strict safety measures with real consequences (like not being able to continue building or operating if they fail to meet the safety guidelines). We the people do not want this data center in out backyard. Clearly the out of state operation didn't want it in their own backyard so what gives them the right to put it in ours? There are reports of both animals and people suffering from the low frequency sounds coming from data centers and impacting their health. Please do not ignore our lives for profit.	1	Merged Document	No	[redacted]			Yes		Yes						8/17/2026
Annaliesa	Jimenez	I am a resident of this earth. PROJECT JUPITER will put out more carbon dioxide into our atmosphere, an atmosphere which is already exposed to carbon dioxide levels causing climate change, ocean acidification, and general pollution. PROJECT JUPITER will unsustainably cool and power their data center with water; water which communities and our planet requires. The community where this project would be built around should have the ability to review and comment on the air quality permit, as it affects them directly. Money and production is important in our world, but not everything. What is the importance of AI or money if there is no livable world to use it in? Be better. Don't ruin this world further.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	Yes		8/17/2026
				Merged Document		[redacted]			Yes	Yes	Yes						8/17/2026

Sofia	Flores	My name is Sofia and I live in El Paso, Texas. As a community built by the Rio Grande, a large Data Center such as this one will suck New Mexico's and nearby communities resources dry. The energy needed to power something like this alone would raise utility prices for the residents near the area. Not only that but for a community located in the desert, water is already a scarce resource and to use it on something as toxic and dangerous as a Data Center is reckless. Data Centers are also extremely loud, communities with already established data centers complain of the consistent noise pollution. It is an annoyance that no one in the community is asking for and that no one in the community needs. Please think of the carbon emissions that will come of the center as well as the impact this will have on the desert ecosystem.	1		No		Minimal Document								8/27/2026
Abigail	Carr	I am a 19 yr old with a strong opinion and I understand the the severity of building a new non-beneficial water wasting data center while our Rio Grande River is dried. This has no benefits for the people , what about our water ? What about the land? What about the animals that are habituated there? The CEO's of OpenAI , ClaudAPI , Gemini , they're terrible people and they should not have a place in New Mexico to call their own . People will loose jobs from this , we will have a crazy decrease in healthy 'good' water . I am only one voice but I am hoping there can be a change within building the data centers and for them to build something beneficial to the people. For the sake of the people please do not build this crappy machine.	1		No		Minimal Document								8/27/2026
Addison	Hoeft	I have been born and raised in rural South Dakota. This place is my home and my heart. Data centers threaten my beautiful home state everyday. I cannot imagine a benefit so great from a data center that it is worth tearing away the natural beauty of the world. One day, I hope to grow old and travel. How will I travel when ecosystems across the world are being slowly drained of their resources and natural beauty by these thirsty, malignant data centers? We have been given one chance on this planet to do the right thing. So why breach the environment of everything that it bees filled with for "greater" technology or "advancement"? Advancement is always necessary, but how can it be considered necessary when it tears apart the very ground we stand on? I stand, with many others, against data centers. Please do not tear away this beautiful land we have been given. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright , a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually.	1		No		Minimal Document								8/27/2026
NA	NA	I urge NMED to completely reject Yucca Locus growth infrastructure, LLC's air permit application for the 930 Microgrid. I also ask the department to please hold a bilingual public hearing near the Santa Teresa community, so residents can learn about risks associated with the fuel cell technology. Although I am not a resident of New Mexico, I have family and friends who live there. I want what is better for not only their lives but also everyone else's lives and the wild life that resides there. This project would still produce high levels of green house gas and toxic pollutants which are very well known to have negative impacts on the environment. This technology generates toxic waste, and the process for handling that waste remains unclear. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases annually. If NMED's mission really is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations," Then granting these permit applications is a direct contradiction to the mission and will hold back the completion of the mission. Sincerely, An anonymous person who cares.	1		No		Minimal Document								8/27/2026
Anonymous	Anonymous	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. This mega-A.I. data center would only cause harm to the environment and the residents of New Mexico. There is not enough water for this mega-centre and the harm it would breed long term is too great to rationalize anything of this size. People are using less and less A.I. and this blight on the land will only serve to further hurt our people and their environments. You can never truly "get back" and once something like this is constructed on it. Do not allow this project to materialize. For your people, your land, and for your own family. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anonymous	1		No		Minimal Document								8/27/2026
Ava Rose	Van de Velde	STOP PROJECT JUPITER! We don't need yet another useless data center that only further jeopardizes the survival of humanity. This is just another cash grab for millionaires and billionaires which we absolutely cannot have. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright , a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually.	1		No		Minimal Document								8/27/2026
Mikayla	Anonymous	This is absolutely horrible for the earth! We need to be thinking about all life on the planet, not just ourselves. The world is changing so quickly and this is feeling those changes. We can live without this. We should be helping the earth and other life instead of continuing to destroy it. Do better! New Mexico Environment Department should give the public an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright , a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No		Minimal Document								8/27/2026
Daniella	Vargas	While I am a resident of Cape Coral, Project Jupiter is barely the beginning for the mass depletion of clean drinking water in the U.S. as AI Data Centers uses billions of freshwater annually to cool down their servers. Although AI is seen as the future for technology advances, there will not be a future if there is no clean drinking water available for people. There are already millions of people who go without clean drinking water throughout the world. The absence of clean drinking water will bring forth a significant increase in diseases. AI Data Centers also noticeably decrease our quality as more energy is demanded of the region and more fossil fuels are needed for the power grid. The application of the air quality permit should be denied given Bloom Energy's history of illegal dumping of hazardous waste. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. If the application can not be denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with options to participate virtually.	1		No		Minimal Document								8/27/2026
Alexys	Rounsaville	I am a resident of Valley Center Kansas and am worried about the major negative impact this project will cause to me, the people I care about, and the planets well-being. This project is far from necessary and very dangerous for the environment, including pollutants, animals, plants, and overall wildlife. Not only will this increase hazardous risks to the environment, but will increase climate change and make it worse than the harm it has already caused. Society has survived many years without major data centers and I don't believe that should change any time soon because of this careless project and other projects that have already been followed through on. The harmful climate change has caused has become extremely dangerous for humans and wildlife and will only get worse from here if we continue with building major, unnecessary data centers. It is important that Project Jupiter is not followed through due to the everlasting impacts it will have on our planet. The changes it will cause are irreversible and will lead to everlasting consequences for humans and wildlife's well-being. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous/absorbed by many of them at very low levels. How am I supposed to raise my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. My family's health and safety should be worth more than the profits of out-of-state corporations. The only defendable options moving forward are to deny the air permit or you must hold a public hearing in person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	1		No		Minimal Document								8/27/2026
Anonymous	Anonymous	Project Jupiter will be a horrific disaster to our planet and lives. This project is extreme environmental racism, an issue residents already suffer from. Bloom Energy has a documented history of illegally dumping waste with zero regard for people, animals, or this planet and have lied and forged documents in an attempt to cover up their disgusting actions. Residents should be given an additional 48 days to review and comment on the air quality permit, and if the permit is not denied, a public hearing must be held. They deserve a word in the fight against them having breathable air. AI is not necessary, the world spun without it and will continue to after the bubble pops. This soulless vacuum of resources serves no real purpose, our planet does.	1		No		Minimal Document								8/27/2026
Nov	Suleiman	I am a resident of California and I am asking that you deny Yucca Growth Infrastructure's air quality permit. These centers will release 10 million tons of carbon dioxide annually, which is double or triple the amount released from other major power grids. This is detrimental to our climate and our communities. We do not need fuel that is this unsustainable. Residents of Rio Grande already suffer from pollution, there is no need to subjugate their communities further for such minimal and unnecessary gains; it is blatant environmental racism.	1		No		Minimal Document								8/27/2026
Max	Rhodes	WE THE PEOPLE DO. NOT. WANT. AI. Nor do we need it. Data centers this big are RUINING our planet no matter how much you try to sweep it under the rug. LISTEN TO YOUR PEOPLE. This data center is SO dangerous for the air quality and the carbon emissions y'all claim to care soooo much about.	1		No		Minimal Document								8/27/2026
Lana	Bell	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous/absorbed by many of them at very low levels. How am I supposed to raise my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up.	1		No		Minimal Document								8/27/2026
Jasmine	Visael	Take action. This will affect us all at some point, and we won't be able to turn back. It only takes five minutes of everyone's time. Do your part. "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County.	1		No		Minimal Document								8/27/2026
Anon	anon	If the permit is not denied outright , a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually." We need to stop putting government money towards outrageous and harmful projects such as building data centers. There is so many more beneficial outcomes that could happen if we put money towards saving our planet and ecosystems. We do NOT want anymore data centers and matter of fact, we shud tear ALL of them down and allow wildlife to have their homes back. It is not fair or safe for wildlife and neither is it fair or safe for humans. According to World Health Organization, 1 in 4 people globally still lack access to safe drinking water. Placing more data centers, especially ones this big threaten the world's future especially because of climate change and ground water is depleting. We need to put a stop to this before the human race is at risk and wildlife species are bordering extinct. We didn't choose to be born into the Earth but since it is our only planet then we can fix how we, are MUST take care of it. It is truly saddening to think of all that is going on now. We are so divided over everything (politics, opinions, wealth status, mental health, AI opinions. We must unite together and put opinions aside so that we can save our planet and prevent wildlife and possibly even the human race from dwindling down in numbers. WE SAY NO TO ANYMORE THAT DESTROYS OUR PLANET SUCH AS THESE DEPOTS OF DATA CENTERS!!!! WE SAY NO!!!! WE THE PEOPLE SAY NO!!!	1		No		Minimal Document								8/27/2026
Nicolas	Navarro	As a resident of New Mexico, I strongly oppose Project Jupiter and urge decision-makers to reject it. The plan this project promises are temporary, but its consequences for our communities, water resources, wildlife, and landscape could last for generations. Too often, public hearings give the appearance that citizens have a voice, yet many residents feel the outcome has already been decided before a single comment is made. If public input is truly valued, then it should have the power to influence the final decision. New Mexico deserves a long-term vision, not another project that consumes enormous amounts of land and water while offering only short-lived economic benefits. Instead of covering our state with massive industrial developments and data centers, we should be investing in reliable, high-output energy infrastructure. Advanced nuclear fission has the potential to provide dependable power, strengthen New Mexico's energy independence, and support sustainable economic growth without the sprawling land footprint required by many large-scale renewable installations. Project Jupiter represents a short-sighted approach to development. It prioritizes corporate interests over the long-term well-being of New Mexico's people, natural resources, and future. The profits will largely leave with the companies involved, while local communities are left to manage the environmental and infrastructure impacts for decades. New Mexico deserves investment that builds lasting prosperity and will not projects that deliver temporary gains while imposing permanent costs. I respectfully urge you to reject Project Jupiter and pursue policies that protect our water, preserve our environment, and secure a stronger, more self-reliant future for our state.	1		No		Minimal Document								8/27/2026
NA	NA	Hello im writing to make you aware of the impact this data centre will have on local endangered wildlife species and the vital habitat loss and potential extinction this project may cause. Data centres admit noise and pollution 247 which poisons these species and disrupts breeding behaviours which is absolutely vital to keep these animals from being onto history. This data centre may also potentially cross into the path of endangering protected species like the mexican long nosed bat and the Pecos pupfish, which are protected by federal law such as the Endangered Species Act (ESA). The public is already skeptical that this project has truly been negotiated and checked by courts to ensure its safety to the local community and wildlife populations so for the community welfare and the environmental protection please consult with the us fish and wildlife services (USFWS) and the environmental protection agency (EPA) to ensure this project not a environmental disaster	1		No		Minimal Document								8/27/2026
Adam	Burnett	This seems like a very bad idea. We already have air quality issues from fires, cars, current pollution, etc. this is too much and will make rain unsafe to live in. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County.	1		No		Minimal Document								8/27/2026
Anonymous	Anonymous	STOP PROJECT JUPITER! we do not need data centers and we never did before its sunrise. You are taking away resources people need to survive for your own selfish needs. Only when the last drop of water has been dried up will you realize you can not drink money. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County.	1		No		Minimal Document								8/27/2026
Renee	none	The world is already ending. This is the last thing we need speeding up the process. As is not a necessity, it's a want. And we do not want these data centers being built. The public should be given an additional 48 days to review and comment on these quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County.	1		No		Minimal Document								8/27/2026
Yuki	arellano	Project Jupiter should be stopped because it could have lethal effects on the Earth and the environment. Large industrial projects often require huge amounts of energy, land, and natural resources. If they are not carefully managed, they can increase pollution, damage wildlife habitats, and contribute to climate change. Our planet is already facing serious environmental challenges, including rising temperatures, extreme weather, and the loss of biodiversity. Instead of investing in projects that may make these problems worse, we should focus on cleaner, more sustainable solutions that protect the environment for future generations. The Earth is our only home. Every decision we make today affects the people, animals, and ecosystems that will exist tomorrow. We should choose projects that put the health of our planet first, not ones that could create long-term environmental risks. You're living on this earth too don't fuck it.	1		No		Minimal Document								8/27/2026
Cassie	M	I want to grow up in a world where water is not scarce, where the air is clean, and where I know my children and their children don't have to worry about the same concerns. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County.	1		No		Minimal Document								8/27/2026
Anonymous	Anonymous	As a student in the states myself, i cant even imagine having to listen to the constant sound of humming coming from an unnecessary "infrastructure." The project is completely worthless, serving little, if not NO purpose at all. From reading other comments someone states, "Children attending Santa Teresa Elementary School will sit incessantly, everyday, LISTENING AND thrive in this pollution. Three other schools, an elder care center, and three public parks smeithin around 4 miles of this project. Deny this air permit. Gambling with the fragile health... " I completely agree with them. Children, wildlife, and the elderly are VULNERABLE AND PRICELESS. Children are at their peak of development, learning social interactions, learning, etc. Imagine how their learning and social interaction would be disturbed if Project Jupiter were to happen. Elderly should have peace, obviously as they are of their most vulnerable state where their senses are very sensitive along with the wildlife, varying from apes young and old especially with the fact that many species would be endangered because of the PRESENCE project Land then A.I data center is taking up. As humans do not need artificial intelligence to function, in fact its became a negative to humans as its been scientifically proven to shorten attention span ect Hotter greens an immediate answer, have students becoming to dependent and reliant on A.I. This is exactly what the government, in my opinion, wants. They want us to be deprived of knowledge, become reliant on A.I which they could possibly then be manipulated into giving false answers. Using our clean water and electricity in the process, and for what..? Many people may not care until its too late, but when people finally realize that the government truly doesn't care, they will finally be seeing the rich living their life while the lower class has to watch and suffer from outfighting back and not speaking up. People must realize there power in numbers. "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright , a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually."	1		No		Minimal Document								8/27/2026
Sophia	Opizzi	This is a data center that requires a million gallons of water to keep running each day. Is this not excessive? Is it not enough? When is enough? We have survived for years without ai and similar types of technology. There are more environmental friendly ways that allows for the use of ai. Ones that don't require a million gallons of water every day. If this were to be built it would essentially be writing new future for humans. One where the planet is destroyed, one where the damage cannot be undone. And for this the blood of humans and animals will be on your hands. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright , a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually.	1		No		Minimal Document								8/27/2026
NA	NA	I want to continue raising my children here knowing they have a safe and secure future. That future is in under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 38th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2020. We are already breathing some of the most compromised air in the country. It's unacceptable to invite a new source of hyperactive air pollution into our communities. I want my children to be able to play and breathe the fresh air, not wearing masks or needing medical assistance to breathe. Help the world become better for humans and animals alike. Don't destroy it for greed or for the promise of AI. Please think of us and our country.	1		No		Minimal Document								8/27/2026
Laurie	Anonymous	I am a resident of VA and I am asking that you deny Yucca Growth Infrastructure's air quality permit. Our future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Catalina	Bustos	Dear NMED staff, My name is Catalina Bustos. I live in San Juan, Argentina, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. I am still a teenager, and I am already pretty concerned about this project. The project's proposed fuel cell powered grid is concerning for many reasons: * It would still produce a high level of greenhouse gas and toxic pollutants. * This technology generates toxic waste, and the process for handling this waste is still unclear. * Fuel cell technology or a centralized waste system has never been tried at this scale. * Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Catalina "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright , a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No		Minimal Document								8/27/2026
Zyana	Benjamin	This "project" will ruin our water supply and our land. The environment around us cannot sustain this level of abuse on its resources. This is a danger to our communities in New Mexico. The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. More people need to speak up against project Jupiter. SAY NO TO PROJECT JUPITER.	1		No		Minimal Document								8/27/2026
Andrea	S	We do not want a data center polluting our air and increasing the heat and water shortage in NM. The unique wildlife of southern nm and already hot climate would suffer if this is allowed to be built. "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright , a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No		Minimal Document								8/27/2026
Anonymous	Anonymous	I am far from this country but hearing about this issue? made me have to write this comment, the doomsday clock already ticks lower and lower by the second/minute/, instead of the economy helping maintain atleast the more drastic that clock has, they decidents make a project that creates a climate disaster, fuel cells that'll release 10 million tons of carbon dioxide annually and on this my NMED is supposed to protect and restore the environment, why is it permitting the Yucca Growth Infrastructure? I'm beyond furious about this, even when the some was first under 'scoria' by march, resident already protested and warned about them future. You cannot excuse this as a "Mistake" or any sorts, when your office has failed to protect, if you choose to continue project jupiter, might as well also evacuate the citizens. Because if you are by any chance then that only means you're selfish and is only seeing the protect pells and wuces of YOUR fellow people for THEIR future, as nonsense. Side that is!, and to those who made this website, thank you. I hope you guys get justice served. :), And to the ones who are still considering this very argument of whether to still build project jupiter? sincerely, i despise you and your incapability of hearing the ples of your people, your people deserves justice.	1		No		Minimal Document								8/27/2026
My	Martin	I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC 930 Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *930's application should be denied by NMED because 930 failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy & doubly so matter what 930 says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of peoplebears a disproportionate share of negative environmental consequences. This is especially important because Doña Ana County residents already bear the disproportionate burden of environmental pollution compared to the rest of New Mexico. *NMED should give the public 48 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. *If NMED does not reject 930's application, NMED must hold a public hearing on the Application in both English and Spanish, in a hybrid format and in person in Santa Teresa.	1		No		Minimal Document								8/27/2026
Anonymous	Anonymous	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. "The public should be given an additional 48 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana & Otero County. If the permit is not denied outright , a public hearing needs to be held in Santa Teresa , in both English and Spanish, with an option to participate virtually."	1		No		Minimal Document								8/27/2026

Anon	Anon	I am a resident of New Mexico and I am asking that you deny Yucca Growth Infrastructure's air quality permit. This is my home, and I want to continue living safely and securely with the possibility to have a family here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. New Mexican's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Daniel	Rockey	This is detrimental to our planet and sacrifices the future of not only humans, but life on Earth. It is outrageous that this project would sacrifice the local communities for profit. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Tanya	Valle	Planet Jupitor will disrupt the ecosystem, to us humans, as well as animals. Planet Jupitor is something the community does not want! This will interfere with the people's water, animals ecosystems, as well as habitats. This will effect everyone, we do not want this built, we do not agree to Planet Jupitor, we do not want this built, we do not want this to happen. Speaking as a citizen, I do not want this built. We do not need AI, nor is anybody asking for it. We've lives without AI and we can continue to live without it, there's no benefit. Project Jupitor will spend water, the water we already cannot spare more water loss, our water is crucial especially with these new data centers popping up, we cannot afford a water crisis. If politicians keep on building ai data centers, our water will turn sacred, not because of the community, but because an AI data center that we did not want, nor asked to build. Our water in some places that data centers have already been built, their water has been turned sacred, their water is dirty, tap water is turning brown, tap water is undrinkable, rivers are drying out, lakes are drying out, because of these data centers being built in our cities, in our states, that the community did not ask for. This will affect our communities, our children, our future, we're not asking for data centers, we're not asking for more of them, in different areas, we're not. This is a climate disaster and will affect climate change. We're already at a crisis where the Atlantic is facing ice loss, as well as polar bear loss. Ouf polar bears are almost extinct because of climate change, because our actions are affecting it, we don't need another data center, nor we need the largest. We need a change, a change where it'll benefit the environment. We do not need a ai data center, that will only destroy and destruct our water system, make our climate change worse, our green house gases worse, and will impact everyone including animals significantly, no to it	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Jorge	Reyes	Estimado personal de NMED: Mi nombre es Jorge Reyes, vivo en Santa Fe y les escribo porque me preocupan los riesgos y daños que el Proyecto Júpiter representa para los habitantes de Nuevo México. Presento este comentario para instar al Departamento de Medio Ambiente de Nuevo México a rechazar la solicitud de permiso de emisiones atmosféricas de Yucca Growth Infrastructure, LLC para la microrred YGI en el condado de Doña Ana. Me preocupa mucho el medio ambiente y mi país, y este proyecto va en contra de mis creencias, perjudica al país y al medio ambiente. Apenas tenemos agua y este proyecto va a consumir la poca agua que nos. En nombre de mi comunidad, insto al Departamento de Medio Ambiente de Nuevo México a rechazar la solicitud de permiso de emisiones atmosféricas de Yucca Growth Infrastructure, LLC para la microrred YGI. Si el Departamento no rechaza el permiso, solicito que se celebre una audiencia pública bilingüe cerca de la comunidad de Santa Teresa, para que los residentes puedan informarse sobre los riesgos asociados con la tecnología de celdas de combustible. El Departamento debería otorgar al público 60 días adicionales para revisar la solicitud y presentar comentarios, a fin de garantizar que todos puedan participar y expresar sus opiniones de manera constructiva. La red eléctrica propuesta, alimentada por celdas de combustible, genera preocupación por varias razones: Seguiría produciendo altos niveles de gases de efecto invernadero y contaminantes tóxicos. Esta tecnología genera residuos tóxicos, y el proceso para su manejo aún no está claro. Nunca se ha probado la tecnología de celdas de combustible ni un sistema centralizado de gestión de residuos a esta escala. La calidad del aire de las comunidades aledañas se verá gravemente afectada por este proyecto. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	New Mexico is not the place for this. Asthma rates are up and my parents are supposed to grow old here. The drought and heatwaves will get increasingly worse until it is not safe to live here. The companies' behavior has already demonstrated that it does not care in the slightest about the repercussions their plant will have on the environment and the families who live near it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anon	Anon	If projects like this keep happening, we're not going to have essential supplies that every living thing on Earth needs to survive. AI centers already use up so much water as it is, and if we keep going in this direction we won't be able to live longer than maybe a decade or 2 past the point we're at now. AI is so damaging to not only the environment, but the psychological effects it has on the people that use it are so dangerous and has already contributed to the literacy crisis. AI psychosis is already becoming an extremely prevalent and dangerous thing. We weren't dependent on AI not even 5 years ago, why do we suddenly need humongous AI centers? It does nothing but make humans more ignorant and blatantly stupid, use all of our clean drinking water, and if this happens it will boost climate change SIGNIFICANTLY. The heat right now is already practically unlivable, with a noticable heat stroke increase in particularly the elderly. Everyone is complaining about how hot it is but no one wants to do anything about it when scientists have been warning us about it since I was a child. I freshly turned 18 a few months ago, and I already worry for my future. I worry if me and my partner will be able to have the life we desperately want to have, and at this rate, we simply won't. This is a huge problem and something needs to be done about it or everything will eventually end up extinct from the severe climate change of these projects that will do nothing for us in the long run but make humans dumber, use up all of our water, and increase climate change dramatically. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	ai data centers are unnecessarily using up resources like water and land and causing issues for residents, this particular center will be the largest and cause water unavailability for people living in water scarce areas already.	1	Merged Document	No	[redacted]			Yes						8/17/2026
Anonymous	Anonymous	Trusting an AI data Centre to not cause much damage is like leaving your property in the Hands of a well known theif. Project Jupiter is going to cause severe damage which will take generations to fix. Abstain from going for it at all costs because it will not help us or our future generations. AI itself is not a good thing. It takes people's jobs away, it destroys creativity in people, and it tones people to become lazy and lazier because as we speak now, several people don't Like Reading paragraphs, the rate of literacy is decreasing in people and that is NOT a good thing. I understand that there are people who learn slowly and there's no one there to help them learn, so they Resort to ai. But they do this for the sake of not being Left behind and not for things which don't benefit them in any way. Project Jupiter and all other AI data projects are not here to „help the people," but they are here to fund the rich—they need to be richer than they alread are and the only way to do that is bring useless creations that the public can live without, but force them onto the public. I personally think that Project Jupiter should not be funded and let the rich deal with rejection. This is the ONLY Home we have, the only Place where human life can be sustained—destroying it will lead us to our early graves. Data centres are not the only ones to blame for this of course, but they are one of the causes for it. We are losing ecosystems, Habitats, and most of all, biodiversity, all for the sake of something that people can do without. The damages These data centres cause can and at one Point WILL be irreversible. So I(as myself) plead that this project does not commence.	1	Merged Document	No	[redacted]	Yes	Oppose - Non-Substantive			Yes				8/17/2026
A Born and Raised New Mexican	Declined	Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you. If further deliberation is desired, a public hearing in Santa Teresa is non-negotiable. Betting the livability of our county on this unpredictable and unproven plan would be a total capitulation and betrayal of your so-called values: "protects the public health of New Mexicans...by preventing the deterioration of air quality;" "protect and restore the environment...foster a healthy NM for present and future generations". NOBODY IN THIS COUNTY OR ANY NEIGHBORING COUNTIES WANTS A DATA CENTER. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Anon	Anon	I am a resident of Cartersville, Ga. I've lived in only one other state, but two other cities. not only is this the last generation able to do something about climate change. we're the ones getting it the worst. the world has prospered without the use of Ai and "unnecessary" plants, so why should Yucca Growth Infrastructure aka Project Jupiter be any different. When put against pros- and cons. Cons out weight whatever delusional plan of what Project Jupiter is. it will worsen the limited water and continue the line of destruction. A statement says, "Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years." isn't the lives of our people or earth more valuable than that? though it won't effect everyone at once, doesn't mean it won't effect them at all. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Paige	Anonymous	Project Jupiter will have devastating effects on the environment and our people. The permit that is being requested needs to be denied. We are already seeing the impacts on the environment with the construction, imagine how much worse it will get when the center is running. It will dry up the communities water supply, release fumes/chemicals/gasses into the air while not helping to reduce any air pollution already there, take massive amounts of energy to run, generate a hum that will drive all wildlife away and cause mental and physical health issues in the surrounding communities because not everyone can afford to leave. We do NOT NEED data centers to live. we DO NEED clean running water and quiet environments to live. The rapid construction of data centers is concerning and disgraceful that the humans and animals nearby are not thought about, that the impact they will have are not thought about, that the developers are only thinking about the potential profit and the cheapest way to get to it. Data centers do not make enough profit to be worth all the damage they do. Stop the construction and restore the environment! New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Hélèna	Berard	Dear NMED staff, I am writting because I'm concern about the risk and harms project Jupiter poses to our world. I am submitting this comment to urge the New Mexico Environment Departement to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Camila	Hernandez	I am Camila Hernandez and I want to ask that you would deny the "Project Jupiter" because it will use all of the clean water that us humans need to survive. You aren't helping the world with your data center you are killing it. - Thank you	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Ricardo	Martinez	Dear NMED staff, My name is Ricardo Martinez. I live in Santa Fe, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I'm really into protecting my countries environment and this data center is a danger to the environment, my people, and the world in general. This data center cannot be build, it will do a harm in the county, we barely have water and this data center will take it all. WE DO NOT WANT THIS DATA CENTER. WE DO NOT WANT AI. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Ricardo Martinez. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Alaysia	Kirkland	We do not need AI to survive. I am not picking somebody to do things for me. That is quite literally making the world worse than what I can do for it which is better cause I'm not gonna be lazy. I'm not trying to let things get me thinking that I'm stupid when I can do it myself. I want water and if that has to include me working hard for it that is just what's gonna happen because I live without AI before I don't need it now. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	Project Jupiter will take away water that is needed for our communities to survive and with more carbon going into the air it causes more climate change to happen leading to terrible weather and natural disasters. Ai also steals our jobs and takes jobs away from REAL human beings. Project Jupiter can't happen if it does our future generations might not even be able to just walk outside without terrible weather going at them and our earth collapsing	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
A'Jhani	Whitaker	By building this data center you are putting our future at risk. You will destroy the water needed for drinking, desert needed for wildlife to inhabit, and you will you will cause climate change to worsen. You are ruining our planet! There is only one known planet that inhabits life and you are destroying it. We are all suffering because of these data centers and AI use.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Marin	n/a	I am a citizen of Silver City and I strongly appose project Jupiter. This risks the livelihood of our future and future generations. This project will ruin New Mexico. You are putting our health at risk. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Virginie	Larouche	Dear NMED staff, I am writting because I'm concern about the risk and harms project Jupiter poses to our world. I am submitting this comment to urge the New Mexico Environment Departement to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Please consider the future of our children and the impact this project will have on our planet. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Alo	Declined	Ay Que ayudar al planeta para las futuras generationes no exterminarlo yo quiero que mi futura familia pueda vivir con aire limpio y que puedan ver las Estrella's en la trade ser y en la noche. Yo quiero lo mejor para mi gente "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Ishan	Mankad	I would prefer if this project pays for its own electricity it's only right... I don't want to pay more electricity bills	1	Merged Document	No	[redacted]	Yes	Oppose - Non-Substantive				Yes			8/17/2026
Riley	Leger	The greed and hatred for others that one must have to want this to be built is astounding. What will you do when there are no more people to use this tech and fill your pockets?? What will you do when there is no more ocean to exploit? What will you do when there is no more oil in the ground to take?? You and everyone like you will end up poor and powerless. You have time. You have time to change and not only help all of us, but also help yourself. Rethink this decision. We do not need ai, generative ai is all that trickles down from the rich and i'm not interested in my planet dying because you people want to lick the boots of people who don't care. Take 60 days to review this and deny that air quality permit. If not a public hearing should be held in Santa Teresa. This permit being approved is government sponsored environmental racism, these people deal with enough and you want to put more on their plate to put more money in your pocket?? Money you don't even know how to spend?	1	Merged Document	No	[redacted]				Yes				Yes	8/17/2026
Ted	Anonymous	I oppose project Jupiter in its entirety. I oppose the construction of a data centre in an area already lacking water. I oppose the construction of a mass polluter of greenhouse gases. I oppose the construction of a building granted planning permission without the public's agreement on it given that it affects them directly and indirectly through water usage, ecosystem damages, and pollution/contribution to climate change. This data centre does not serve the people, it does not benefit the economy, it does not benefit the environment. This data centre will cause far more problems than it will bring solutions. It creates a problem to something that wasn't broken. And for these reasons I oppose the construction of this data centre wholely. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Cyrus	Palmer	Project Jupiter is terrible. We cannot just build onto sensitive ecosystems without a care for the environment or the species that are in it. We don't need to let our greed overtake our morals and what we know is correct deep down. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Addyson	Buckley	Project Jupiter is unnecessary it is not needed for survival at all and it is absolutely ruining our planet. There is no point of it being made, we've lived without AI for so long and we don't need it. It harms the earth and has little to no benefits. The air quality permit application should be denied and approving this permit would be government-sponsored environmental racism. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Why is Project Jupiter still a thing if there are so many cons but yet so little pros??? Think on that... The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Lane	smith	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by enviormental pollution. Project Jupiter will produce more air pollution than the two consumer electrical grids that power NM families and businesses. Developers did not propose pollution controls They estimated the plant's pollution based on tests from a very small unit (only 65 kW) but the power plant they want to build is 37,000 times bigger. A 15% "safety margin" was added to the numbers. Safety margins are NOT usually added if a company is confident their pollution estimates are accurate. Estimated pollution from the plant's gas pipelines is not included Project Jupiter's fuel cell plant will generate enormous amounts of hazardous waste containing: Cancer-causing chemicals (benzene) Heavy metals (lead, arsenic, chromium) Toxic compounds (sulfur and others) All of these poison the human body, our water, and our soil Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Leenah	Ragoonan	these AI data centers are taking up all of the fresh water WE NEED TO SURVIVE and is speeding up climate change. PROJECT JUPITER will cause tons and tons of carbon dioxide to be emitted in our atmosphere destroying our ozone layer therefore speeding up climate change destroying us and our planet. WE ONLY HAVE ONE PLANET, destroying it by using AI and creating AI data center that use tons of our fresh water daily, IS NOT A GOOD IDEA. there is no plan b. AI could be killing any chance for a future for the next generation. STOP PROJECT JUPITER or voluntarily be killing yourselves and the rest of the planet. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Paige	Alexander	I am a resident of Bernalillo County, and I'm writing today to ask you to deny this permit. Out of state corporations like these do not have our community's best interests at heart. This benefits THEM ONLY while sacrificing the quality of life in NM in the long term. The harmful reality of project Jupiter is sadly not a surprise as residents of Doña Ana County are already disproportionately impacted by environmental pollution due to environmental racism. Not to mention the issues with pollution monitoring & lack of controls, the fuel cell provider for this project is a threat to us. Bloom Energy has a history of causing irreversible harm, by dumping hazardous waste and improperly transporting chemicals. Not if, WHEN they repeat their bad habits, a fine for illegal dumping does NOT undo the harm or stop those carcinogens and heavy metals spreading through our aquifer and soils. It also will not re-capture the volatile chemicals put into the air when hazardous waste is improperly moved, stored, and disposed of. They are betting we will allow them trade money for irreversible harm. I implore you to deny these permits outright. If further deliberation is desired, a public hearing in Santa Teresa is non-negotiable wherein materials must be translated into Spanish and meet any other accessibility needs requested by our community members.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Selah	Peterson	I will die before I live in a world without proper fresh water and nature. When all the water is gone what will we do? Everything will collapse and all for money they don't need. The people closer to this monstrosity don't even want it either, deny the air quality permit. STOP PROJECT JUPITER! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026

Avery	Ten Haken	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, a 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. People were outside everyday without shade or rest breaks and have nowhere to keep necessary medications like insulin cool. Electricity bills are barely affordable in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How are parents supposed to send their kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and risking it for several years. This company will likely report its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to force an illegal dumping epidemic so how can I be sure that these optimistic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fire for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. This needs to be stopped.	1		No															
Brandon	Roberts	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	Minimal Document	1		No		Yes	Yes	Yes	Yes	Yes		8/27/2026					
Jade	Lucier	For starters, there is no safe way to build the Aztec center. No matter the technology. The risks and concerns are still in effect. I want to make it absolutely clear, again, no matter the technological changes the data center has no rights to be in an area with an already poor air quality. More concerning points are water pollution effecting the world more than already. Not to mention the thousands of animals homes destroyed in order to make this possible. Please take into account all the people screaming that this data center is not a good idea and deny the permit. Secondly, it's important that everyone has a chance to speak their mind on the dangers and effects of this data center/permit. Lastly, it's important if the permit is accepted or denied a hearing should be held in both English and Spanish to make sure all citizens have the opportunity to fully understand what will be happening in their community.	Minimal Document	1		No			Yes			Yes		8/27/2026					
Anonymous	Anonymous	Communities all over have been dealing with the damage that data centers have been causing. It's not a secret that data centers just like this one is doing much more harm than good to our planet and our people all for some millionaires to make more money. The New Mexico Environment Department can help their community stand up for their environment and be one of the few that decide enough is enough. It can help out rather than relying away from businesses who have shown time and again that they do not care about people nor the environment and only care for what would give them the most money. Here's how the Air Quality Bureau can help; give the public an additional 60 days to review and comment on the air quality permit so that the community members can participate equitably, the air quality permit should be denied given Bloom Energy's history of illegal dumping hazardous waste, if the permit is not denied, finally a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. This needs to stop. Join hands with each other and protect your families and friends along with our planet. If we get the ball rolling, it will cause more to join in and defeat against these greedy millionaires. We can protect our earth, our future but only if we work together. Please, we can heal America, heal our planet, but only if we work together.	Minimal Document	1		No		Yes	Yes	Yes		Yes		8/27/2026					
Jennifer	Pravia	I am opposed to this project. The air quality will be affected negatively in an area where the air quality fails to meet National air quality Standards. It would release toxic chemical pollutants and 30 million tons of carbon dioxide into our air. The greenhouse gas emissions would also have a negative effect. They would be at a state that is a combination of our 3 largest cities in New Mexico combined. During times of drought and rising temperatures that lead to fires is that what New Mexico needs? The technology has not been proven with a project at this scale. There is no sustainable way of extraction. Finally, Bloom Energy has been fined a total of $1.4 million dollars for illegally storing, transporting, and dumping this hazardous waste in several states AND falsifying records over many years to cover it up.	Minimal Document	1		No		Yes	Yes			Yes	Yes	8/27/2026					
Debbie	M	Many companies have started to use ai and slowly destroy our land. People who live near these ai data centers, are having to use polluted water and have their peace disturb due to the loud noise it's causing. Your home should be somewhere safe and a place to be able to relieve yourself from your problems, not somewhere with more problems that people can't even lie or control. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1		No		Yes	Yes			Yes		8/27/2026					
Stephen	Libicer	There is no justifiable reason for this project to continue in southern New Mexico. This is in an obvious threat to the long-term environmental stability of all of south central New Mexico, considering Bloom Energy's unfavorable history regarding the disposal of hazardous waste. But more critical is the threat this project presents to existing water supplies and tables, and the surrender of future generations' water access and use for a project that presents absolutely no compensation benefit for our state. If for any reason this permit is not denied, a public hearing with virtual access should immediately be held to ensure it and	Minimal Document	1		No		Yes	Yes		Yes	Yes	Yes	8/27/2026					
Karina	Anonymous	My family has lived in New Mexico for generations and we've loved being here, we don't want our land, our air and our water taken away for data centers collection. Don't ruin the public future for short term success. Let the people have water so we can survive. The air we breathe and the water we drink is what keeps me and you alive. Don't take away basic human rights until there aren't any left. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Minimal Document	1		No		Yes	Yes			Yes		8/27/2026					
Lizz	Thorne	Decisions in constructing data centers that will produce noise, air, light, and water pollution should be throughly thought through before making the choice to use citizens resources. The public should have more time, preferably 60+ days, to review the construction of "Project Jupiter." In any case, the permit should be denied. Residents of New Mexico and the surrounding areas are already heavily impacted by environmental pollution, limiting their resources and making living conditions less attractive. In the case where the permit does pass, a public hearing should be held. The hearing should be presented in English, Spanish, and virtually so it is fully accessible. The decision to construct an AI data center of this size should be heavily revised and the lasting after effects it will have needs to be throughly and efficiently	Minimal Document	1		No		Yes	Yes			Yes		8/27/2026					
Holly	Lindley	Rejecting our partners wanting to destroy land. Fighting for future generations to have clean air and water. Money is not important when your grandchildren won't have clean water or air. Fighting for New Mexico resources should be the highest priority. Instead of making big corporations and faceless companies more and more money. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No		Yes	Yes			Yes		8/27/2026					
Makyah	Robinson	No one needs this data center, or any of the recent ones from the last few years. Stop forcing this down the people's throats and put more time into saving the planet. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No		Yes	Yes			Yes		8/27/2026					
Anonymous	Anonymous	Why host a company that has a history of dumping hazardous waste illegally? Do they have plans to clean up waste in legal ways? This project will consume massive amounts of resources that would be better spent on the surrounding community, also protecting what natural environment there is left. If they are going to build, they should be held accountable for the environmental impacts, the hazardous byproducts their plant produces, and the health of the surrounding community. But everyone knows, included corporate executives AND local governments, that they will not hold themselves responsible for the damaging impacts they have. Do not permit them to build or submit new proposals.	Minimal Document	1		No		Yes	Yes			Yes		8/27/2026					
Jimena	Carrillo	Dear NMED staff, My name is Jimena Carrillo. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid in Doña Ana County. It would still produce a high level of greenhouse gas and toxic pollutants; it will also release toxic waste into the environment and it is unclear where the waste would go. So I'm assuming that it could potentially go into our water cycle. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Jimena Carrillo	Minimal Document	1		No			Yes			Yes		8/27/2026					
Faith	Ruiz	This will be the end of civilization as we know it we need to take action and stop this we will be out of water before we know it we need to end this before it's far to late. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No		Yes	Yes	Yes		Yes		8/27/2026					
Sofia	Esescha	I am signing to help stopping PROJECT JUPITER . We don't want more ai data centers !! We already only have 3 YEARS to save this planet before the damage we have done is too late to reverse. And this dumb Project Jupiter thing is destroying the eco system, THIS PLANET. And I will say it again, we don't want ai, especially not more than there already is. This whole world is purchasing everything ai, ai data centers and more generative ai stuff. Generative ai is one of the #1's that we are able to avoid the most, we don't need it and it doesn't do anything good, so please stop this PROJECT JUPITER and invest in things that will actually help the planet instead of destroying it!!! STOP PROJECT JUPITER! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No		Yes	Yes	Yes		Yes		8/27/2026					
Mario	Rios	I grew up in the valley in Texas, I grew up swimming in the rivers and going out to the woods hunting with my dad. I still have family down in the area, my grandma and grandpa from both sides of my family, cousins, Tios and Tias, and with this data center being so close to the Rio Grande, I can't imagine what it'll do to the communities just further down the river, and the wildlife relying in it will cause unfathomable amounts of pollution, lower the quality of life for residents nearby, lower the amount of available water locally as well as lower the water quality of what they do manage to get. We do not need nor want a new data center, and to build it knowing about the many people that are against it as well as the repercussions it'll have on their anyway, is just irresponsible and would go to show that you are not listening to who you should be here to help and give a voice to. Please do not let this proposal go through.	Minimal Document	1		No			Yes			Yes		8/27/2026					
Anonymous	Anonymous	Please do not sacrifice the well-being of communities and wildlife for unwanted and unnecessary data centers. The money spent on this project could rather be invested into the people whose lives will be negatively impacted by unsafe water, noise pollution, and the impacts of climate change which the data centers will cause. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No			Yes											
Ullah	Izlad	then let project jupiter happen it will literally destroy our earth . At uses up millions of gallons of water and if this continues we won't have any water in the next few years PLEASE dont let this happen. So many people deserve a future, and so do the animals. Have you noticed how many animals have gotten close to extinction since the start of AI? TOO MANY. Stop trying to expand AI its awful for the planet. This is our only planet we cant mess it up. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Minimal Document	1		No			Yes			Yes		8/27/2026					
Jade	Abrahamso n	Stop the building of the Jupiter data center! Only irreparable harm will occur due to the mass of carbon dioxide exposed annually and who is to disturb it? Those in the surrounding communities who will have to suffer the consequences. The climate crisis is suffering enough there is no need for more data centers! New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1		No			Yes			Yes		8/27/2026					
Paige	Sunset	Dear NMED staff, My name is Paige and I'd like to inform you about the risks I am concerned with regarding project Jupiter and the actions I will take upon commencement. I live close to New Mexico over in San Diego. I am submitting this public comment to urge the New Mexico Environment Department to reject the Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid in Doña Ana County. I live in california close to New Mexico and even closer to it in San Diego. Data Centers have been proven time and time again that they are negatively impact the environment, even the smaller ones. Meaning that building one at the scale of Project Jupiter's means that things like the wildlife will await circling around the area because of the scratch coming from it, as well as its mass amounts of usage of water to cool down its systems. There are communities that live near data centers that's been gone for weeks without water because the data center is leeching off so much of it. A data center of this size could mass residents near by most likely. Now the same time, I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Paige "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Mariano	Arn	Dear NMED staff, My name is Mariano Arn. I am a New Mexico resident, living in Rio Rancho, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid in Doña Ana County. Though my area of residence may not be directly impacted, I worry for the families and friends that I know that will be. The proposition is incredibly counterintuitive, putting us in a direction directly opposite to the goals of NMED. The project's proposed fuel cell powered grid is concerning for many reasons; it would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology at a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Mariano Arn	Minimal Document	1		No			Yes			Yes		8/27/2026					
Yessenia	Parsons	Please stop Project Jupiter. When will enough finally be enough? Parts of the Rio Grande have already run dry. Seeing a river that has sustained people, wildlife, and communities for generations disappear in places should break all of our hearts. That should be a wake-up call–but once a sign to keep pushing our robust resources to their limits. We cannot survive without clean water. We cannot survive without clean air. They are not political issues. They are human issues. They are the very foundation of life. I want my children, my grandchildren, and generations I'll never meet to inherit a world where rivers still flow, where the air is safe to breathe, and where cities water isn't a luxury or a memory. I don't want them asking why we stood by while the planet that gave us life slowly disappeared. No amount of money can replace a river. No amount of profit can create fresh water once it's gone. No corporation or government can bring back a healthy ecosystem overnight after it's been damaged. We are borrowing this Earth from our children. Every decision we make today becomes the world they inherit tomorrow. Please don't ask how much more we can take from this land. Ask how much we have left to save. Protect our water. Protect our air. Protect our wildlife. Protect our future. Because when the rivers stop flowing and the air is no longer clean, it won't matter how much money we made. It will only matter that we failed to protect the very things that keep us alive.	Minimal Document	1		No			Yes			Yes		8/27/2026					
Anonymous	Anonymous	A.I. data centers have very evidently, in the past, been harmful to the areas they are located in. With such conditions of disturbances to civilians and wildlife, residences having their bills go up due to the use of resources by these centers, and the fact that there are many people who now have a lack of sufficient resources required to live due to these data centers in their area, it is very clear that these constructions bring nothing but more difficulty to those around it. Our world is not for some scumming big corporation to destroy for their profits. In fact, there is a rather small majority of the world, excluding those who purpose these data centers, who actually believe the construction of such things will benefit us. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No			Yes			Yes		8/27/2026					
Pete	Bunker Ruiz	With the droughts and wildfires so prevalent in New Mexico, Project Jupiter will only exacerbate our problems. Instead of focusing on a data center that helps millionaires profit, let's focus on the well being of New Mexico residents. Let's prioritize keeping NM green. The government has proven time and time again that they do not care about New Mexico as a state and New Mexicans as people. The last thing we need is a giant data center that sucks up all of our water and perpetuates the cycle of insecurity regarding socioeconomic status. New Mexico is my home, I do not want to live in a dry, desolate, and depressing state that Project Jupiter is responsible for	Minimal Document	1		No			Yes			Yes		8/27/2026					
Kacper	Anonymous	Why must we aim to destroy what keeps us alive. The earth survived billions of years without us and once we are gone it will continue to live on. It is suffering under our hand. Climate change is moving faster than ever. We need water for food and drinking. There is no sane reason to have data centers, memories of greed will haunt all involved until they are dead, on your last days you will wonder why no one praises your life accomplishments and get the answer will lay with who cheered you on through what destroyed your image and the world you claimed to want to better. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1		No		Yes												
Laurie	Neufeld	There is absolutely no need or reason for a polluting, energy and water stealing entity in our area. The PI boondoggle is a money grab, pure and simple, for outside businesses (non-state). "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No		Yes	Yes			Yes		8/27/2026					
Liz	Muldenberg	As an 18 year old I am terrified about my future. The people of the world do NOT want AI data centers taking our water. We have more than enough means to create a better future, yet all big tech cares about is profit. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1		No			Yes			Yes		8/27/2026					
Marley	Lane	Why would you destroy such a beautiful ecosystem and life. It does not make sense. We have survived without generative AI and we will again. So don't you dare hurt huge amount of peoples lives and the whole ecosystem. We are people and we live on the earth we do not control the earth, so you should not dirty up the water just to cool down your data center. If you care about the environment and the people who live there you would not build this. This will show who you really are and how greedy you can get with AI. The loss of a developed ecosystem will live on your hands. Sit and think about it. Think some more. Think some extra for the public to be given almost NO additional days to review and comment on the air quality permit so community members can participate equally. This air quality permit should also be denied because of Bloom Energy's history of illegally dumping hazardous waste. If the permit is not denied then I also ask that a public hearing needs to be held in Santa Teresa, in both english and spanish with an option to participate virtually. How is it even legal to make this because it would become government sponsored environmental racism as residents of Doña Ana County are already disproportionately affected by environmental Pollution. Please sit and think about how this will ruin stuff. Maybe I will make a lot of money but destroying the way of life for the ecosystem and people around it is not worth any money and conservation efforts to fix damage will take more money and too much time to help the ecosystem. Have a great day	Minimal Document	1		No			Yes			Yes		8/27/2026					
Blaze	Albert	Im a teenager currently in immense distress with the state of the world. The future scares me, when it shouldn't. Its all moving too fast with global warming, wars, and more. Its doing what I can to save the earth, and making it available for all life on earth. Every action counts. And I know you would be unhappy to know that if Project Jupiter goes through, it will contribute to more extinction across America and entirely throughout New Mexico. You would have millions of blood on your hands, and contribute to the current CO2 emissions which ah! way out of hand. You would be harming everyone, including your own family. I hope you take these points and our future into consideration. Thank you. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No			Yes			Yes		8/27/2026					
Alyssa	Brawley	We do not need nor want this data center. With the current state of our earth: rising temperatures, pollution, poor air and water quality, and struggling communities, this data center will only be detetrious in many more ways that WILL set us back further and lessen our chance to fix what we have mistakenly destroyed. Choosing to continue Project Jupiter would be a willing choice to put the world in an early grave. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No			Yes			Yes		8/27/2026					
Libby	Markle	Dear Yucca Growth Infrastructure. Your project will cause harm to the earth we live on. Every season she'll just get hotter and hotter. I suffer from a heart condition that gets worse every time it gets very hot out. Because of the stress it puts on my I can't afford to keep the AC on all the time due to rising electricity bills. Not to mention the air quality will get even worse, I have small lungs as well. This alone will do so much damage that I'm sure everyone will suffer from your silly actions. I can't afford anymore stress to my body. Please take note of this.	Minimal Document	1		No			Yes			Yes		8/27/2026					
Liz	Thomas	I agree that project Jupiter should not continue, as it is extremely environmentally damaging and can have a significant impact on communities, which can lead to many other issues and furthermore creating more problems that can be detrimental. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Minimal Document	1		No			Yes			Yes		8/27/2026					
Jaiden	Miller	I am a resident of Colorado and still I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. Although not in the same area this will cause major issues around the globe. Have mercy, deny the permit.	Minimal Document	1		No			Yes			Yes		8/27/2026					
Eliza	Anonymous	I am a resident of Florida and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. As it pertains to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 30 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time-overstretched zone would be nothing short of blatant environmental racism. Our metro area is currently 38th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Me and My brother work outside everyday without shade or rest breaks. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and risking it for several years. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1		No			Yes			Yes		8/27/2026					

Anonymous	Anonymous	Our lands, water, and air should only be used for protecting our wildlife and agriculture not for a data center that will strip away all of our resources and damage all of us in the long run. I am extremely against Project Jupiter. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Catalia	wood	I Catalia wood do not propose to the idea of having the world's largest data center here in New Mexico. New Mexico is already in a drought and building another data center that large isn't gonna help it. We lived without data centers for centuries why do we have 10x the amount of data centers as china? Do yall know that methane gas will be pumped into New Mexico air quality? New Mexico air quality is already bad enough but to add more problems into it is inhumane to the people living there and to the people who actually have a heart. Methane gas is pumped into fuel cells where it is baked at extremely high temperatures (around 1,470 °F) to make hydrogen for energy generation Produces the same massive amount of energy (2.46 GW) The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Say no to data centers protect our Earth and listen to the people.	1	Merged Document	No		Yes	Yes	Yes	Yes		Yes	8/17/2026
Heidi	Zamora Tamayo	Project Jupiter will put the lives of civilians and the world at stake. It will pollute our atmosphere and contribute to the highly dangerous ground level ozone, which is known to cause a multitude of health problems and hazards. It will contribute significantly to a warming climate while using up our fresh drinking water resources, that are already in danger. No one needs data centers, and us citizens definitely do not want them in our communities. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	8/17/2026
Jose	Derell Lonkuta	We cannot allow Project Jupiter to gamble with the future of Doña Ana County just to feed the insatiable energy appetite of corporate AI. Despite the developers' greenwashed promises, this massive data center campus will still pump millions of tons of greenhouse gases into our air and threaten our critically depleted regional aquifers in the middle of an ongoing water crisis. Pushing this project forward through non-transparent backroom deals and deceptive corporate canvassing—without a truly independent, public review of its environmental toll—is an unacceptable risk to our public health and local resources. Our community's water, air, and future are not for sale.	1	Merged Document	No		Yes	Yes	Yes				8/17/2026
Kenneth	Reay	Listen to your community! You are sanctioning environmental violence on the a community that is already suffering. For what, a couple thousand dollars. You're greed will lead to people death. Do better for your community. Your life is worth no more than any other human, and to act otherwise makes you evil. 10 tons of pollution, that's what you want. Compromising the water source, the ozone, and the life of your fellow humans.	1	Merged Document	No		Yes		Yes				8/17/2026
Ruth	DeLong	A 15% "safety margin" was added to the numbers provided by the applicant. Safety margins are not usually added if a company is confident in the accuracy of their pollution estimates. Even small variations from this superficial test will result in massively different levels of pollution and given that the plant will be 37,000 bigger than the testing unit, a 15% safety margin is completely insufficient–it could work as a margin for a single unit, but not the entire plant.	1	Merged Document	No				Yes				8/17/2026
anonymous	anonymous	The west coast have severely dryer air and new york is filled with a putrid smell that's indescribable all because our ozone layer is being broken by us "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	8/17/2026
Kieran	Halferty	I am a resident of Ontario, Canada and I'm here to say that you should not accept Yucca Growth Infrastructure's air quality permit. While I may not be a person living in the states, that does not mean I don't care about the environmental impacts my American brothers and sisters will have to endure. Water is a non renewable resource and using up 11 million gallons is simply unacceptable; that's how much water a family of 3 uses in over 125 years. The amount of greenhouse gasses projected to be produced because of this data center will only worse global warming. Having 10.1 million tons of carbon dioxide going into our Earth every year is so damaging to our world, and our future generation would have to work very hard to reverse the impacts of this project. The impact of Artificial Intelligence on the people is also something that needs to be considered. The literacy crisis happening in the states is real, and 54% of the population read at only a 6th grade reading level. The lack of comprehension in everyday adults is frightening, and AI only makes this worse. When you consider how many students are using ChatGPT for their school work, or office workers using Gemini to write them a simple Email, it truly shows just how lazy the generation has gotten, and further enhancing AI will not help whatsoever. If the permit is not rejected, a public hearing must be held in Santa Teresa in both English and Spanish, with an online option available. It's clear the cons outweigh the pros, and this project should not follow through.	1	Merged Document	No		Yes	Yes	Yes			Yes	8/17/2026
Guenevere	McMahon	I am opposed to Project Jupiter. Their unethical behavior--including submitting falsified comments supporting their project and failing to honor their legal commitments to Dona Ana County is enough to know that this enterprise will greatly damage air and water quality in Southern NM. People's rights should always outweigh the demands of data centers. This application MUST be denied. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	8/17/2026
Michele	Chidester	Please don't let them build this. Please don't let them do this to us. They are already putting so much dust in the air and harming the desert. Please don't let them destroy our homes and steal our futures. They will do billions and billions of dollars worth of damage and theft. Please don't let them. The chemicals they will put in the air and water will make the land, animals and people very sick: miscarriages and cancers. A data center this size near people's homes is violent and hateful. It will cook us. Please stop them. Please don't let them destroy our homes and murder our wildlife and steal from us and make us sick. Please. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	8/17/2026
Caitlin	McKelvy	DO NOT DO THIS - AS A SPECIES WE ARE ACTIVELY ANNIHILATING THE PLANET ALONG WITH OURSELVES AND ALL THE CREATURES WE SHARE THIS BEAUTIFUL WORLD WITH THERE IS NO NEED FOR THIS NOR DO ANY OF US WANT THESE STUPID DATA CENTERS!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! THE WAY THINGS ARE IN THE WORLD PRESENTLY ONLY BENEFIT THE 1% - NO NORMAL WELL ADJUSTED HUMAN BEINGS WANT THESE EVIL ASS DATA CENTERS!!!!!!!!!!!!!!!!!!!!!!!!! "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
valerie	estrella	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Last summer, my 7 year old suffered a grand mal seizure while on the playground at school because the extreme heat led to electrolyte imbalances. My brother works outside everyday without shade or rest breaks and has nowhere to keep his insulin cool. I can barely pay my electricity bills in the summer as it is. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they have had a chance to grow up. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of.	1	Merged Document	No		Yes	Yes	Yes	Yes	Yes		8/17/2026
Sad'e	Henderson	Please reject the air quality permit for Project Jupiter. This data center is not what the people want nor need. Data centers have wreaked havoc across the country causing immense water, air, and noise pollution. Are lands have already been stripped of enough resources and are being stressed beyond repair. Please make do not contribute any further into the distraction of our future. The people of New Mexico deserve their right to peacefully life. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No		Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Leoh	Forsyth	Open AI severely raises carbon emissions and not only makes life harder for those already struggling, but all life on planet Earth. Even before Data Centers came into discussion, greenhouse gas emissions were already at an all time high from combustion, livestock, and overall human behavior. These greenhouse gases have increased the overall temperature in planet Earth, causing Glaciers to melt, the ocean levels to rise, and habitats to be destroyed. With the addition of data centers, we worry not only for animal populations, but human populations as well. Many cities are near sea level and could be flooded or completely swallowed by water. Many citizens may begin to worry about clean water or a normal supply of it. Increased temperatures can cause an increase of melted plastics and microplastics in food, water, and the human body. The change in temperature may also affect livelihood of plants and farms. Severe weather events like tornados or hurricanes may become more common and more severe, causing more damage and destruction than ever before. The increase in temperature is beginning to affect those without air conditioning, in Western Europe we see temperatures near an all-time high. In Detroit, many people without AC are becoming desperate for relief. Data centers will add to the already severe problem of Climate Change and Global Warming, I speak for the general population when i say that we do not want or need this. Stop thinking about money and ease of work and think of the people already struggling in poverty, homelessness, and a lack of ability to escape the heat or the storms that come with it. Soon enough, money will not be able to save you either.	1	Merged Document	No		Yes	Yes	Yes				8/17/2026
Gary	Reger	I am adamantly and completely opposed to the issuance of any air quality permit to Project Jupiter, for any cause whatsoever. We have more than enough air quality issues here without adding Jupiter's toxicity to the air we breathe. We face a climate emergency, but these people want to release 19 million tons/year of CO2. Bloom has been fined $1.6 billion for pollution crimes in the past—their claims cannot be believed. This outrage must stop now, for good. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
Kaelei	Smith	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste, if the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish for the locals. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Please, we urge you to listen to the peoples voices and vote NO on this data center. We already have limited resources, how long before we have none all for human greed?	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
Maddie	Anonymous	This needs to be stopped! We were perfectly fine without the use of A.I. it doesn't make you smarter, it doesn't make anything better these data centers just ruin our air, water, environment and more, my city has fallen victim to this. We bearly have any water left and we were told we would run out of last month, I haven't been told any updates but there is no reason cities should be RUNNING OUT OF WATER! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	The new data center is NOT what the community needs. It's what the billionares want so that they can profit from the suffering of the masses. People who live in Doña Ana Contry have to deal with improper waste disposal and pollution already, the new data center would only make teh situation worse. As if it wasn't enought, this building will not only affect the people who live nearby, but will also impact the already raising climate change and pollution in the whole world. AI was only created to destroy the place that we live, make the population dummer, destroy creativity and make billionares richer while they exploy the ones below them. WE DON'T NEED PROJECT JUPITER "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Chloe	Porter	We are one of the first generations that has felt the effects of climate change. Continuing on with Project Jupiter will add to climate change. If we want to do something about climate change. We have to act now. So stop Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
Carla	Krieger	These data centers are NOT fair to the people living in a vicinity of them, completely wreck havoc on our planet by releasing TONS of carbon and taking TONS of fresh water!! Project Jupiter is no exception, and would be an extreme example if it gets built!! It wouldn't have any positive effects on anybody, except the large corporations that are already making a high amount of money!!!	1	Merged Document	No		Yes						8/17/2026
Teresa	Mendoza	Project Jupiter should not receive an air quality permit to build a data center in the New Mexico southwest. The massive data center will increase air pollution causing health risks to residents in the region and the vulnerable water resource should be protected from residents and habitats to survive. New Mexico cannot allow big tech companies deplete local natural resources but instead look into ways to protect them for future generations.	1	Merged Document	No		Yes	Yes	Yes				8/17/2026
Fox	Quintero	Dear NMED staff, My name is Fox. I am an Arizona resident, living in Glendale, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. By accepting Yucca Growth, you will be doing a great offense to the land of New Mexico, fresh water supply, public health, and the very atmosphere that allows our planet to sustain itself. Toxic waste is far more detrimental than many can anticipate. With the hazardous components being used for this project (methane, sulfur, heavy metals, and plastic) that the very land this data center will be built upon. Constructing this data center will be stripping organic life of it's roots. Animals will be forced to migrate or even be killed at the loss of their home. Native plants that need that soil to grow will wither away. While plants are stubborn and are likely to grow back, the damage done to the soil by construction, leakage is bound to happen from using such a large amount of water that generates contaminated water with toxic chemicals and heavy metals. Contaminated water that is going to harm the dirt, mud, and soil that organisms need. About 97% of water on Earth is ocean water. 3% is fresh and usable water that we rely on. Factories already use a large portion of water and building more data centers, ESPECIALLY the water that the Yucca Growth Infrastructure will be consuming, will being irreparable damage to our source of water. Various communities will be harmed and possibly unable to heal from such a wound. Even the cycle of water will be shifted in a negative direction. Precipitation levels in rain clouds are more likely to be less than anticipated --- more likely to carry heavy pollution from the greenhouse gasses being emitted by this project. By even allowing such a project to commence, you'll insult the very residents of New Mexico. From such a large data center to be structured, it should raise so many health concerns. Cancerous materials, toxic chemicals, respiratory health issues being caused, workplace injuries during and after construction, and mental health being drastically damaged by the concerns of this infrastructure won't be able to be resolved or even avoided. The health impact this will cause needs to be avoided at all costs. There are schools and even care centers not too far from where this place is wrongly going to be. Children, who are susceptible to damage of health, will be at a great risk of developing health issues that can be life lasting. The people in Care Centers will be in even greater danger from their conditions or even developing new conditions caused by pollution and hazardous components being released. I am right to be concerned about such a drastic situation taking place. By no means can Project Jupiter be allowed to take place. One irreparable measure can lead to many other unjust damages. For the good of not only the environment, but the concerned residents of New Mexico, I sincerely hope you reject this project.	1	Merged Document	No		Yes	Yes	Yes		Yes		8/17/2026
Anonyme	Anonyme	I'd like to voice my concern about what's happening in the world. It's absolutely ridiculous how some people still don't understand the majority of issues that could end humanity and everything that comes with it. You're a person on this planet as well, you eat, drink, and take everyday and it's not a choice for you to not give anything in return, AT LEAST don't overstep the boundaries and know the limit. I deeply admire the people who actually try to speak up, they are truly one of a kind, (which is not normal I believe everyone should be able to do so) DO SOMETHING!!! "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
Reagan	Miller	boo data centers. no one wants them, they're horrible for the environment and communities surrounding them, and the only people profiting from them are the 1% whose money absolves them from all of the trouble data centers cause "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
Johan	Doane	I am a resident of Georgia and we have seen hundreds of these data centers go up and destroy communities in rural Georgia and southern Atlanta. This project will harm the communities and the environment if gone through. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
Kyannah	Tavares	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.	1	Merged Document	No			Yes			Yes	Yes	8/17/2026
Leah	N/A	How dare they think it's okay to build a data center WE DONT NEED at the end of the Rio grande. I pray everyone does everything to stop them from destroying our beautiful state. May god not have mercy on them, may they feel the greatest wrath of all time like the evil monsters they are. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No		Yes	Yes	Yes		Yes	Yes	8/17/2026
Audie	Ross	This will destroy our earth. Please give at least 60 more days so community members can review and comment on the air quality permit equitably. Bloom energy has a history of illegally dumping hazardous waste, so the air quality permit application should be denied. If the permit is not denied, there needs to be a public hearing in Santa Teresa, in english and spanish, including an option to attend virtually. If this permit is approved, it will be government sponsored environmental racism. Residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means that their air quality does not meet federal government rules. Plus, the health hazards that will occur from this are near deadly.	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
isaiah	kahn	we need to save the planet and this is not helping in any way we are going to destroy ecosystems and communities. STOP THIS "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	This project harms the environment. That's not the only thing, but basically it's a very harmful project that should not be taking place. We should cherish Earth, not destroy it. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Anonymous	Anonymous	AI data centers negatively affect communities within less than a year of their existence. Continuous implementation of them will no doubt result in resource fatigue as we put unneeded technology above human well-being. There is absolutely no need to establish more AI data centers. In fact, our efforts should be moving towards making current ones more sustainable for the human population. Please allow the community 60 days to review and comment on the air quality permit. The permit should be denied, but if it is not then a hearing should be held in Santa Teresa.	1	Merged Document	No			Yes	Yes			Yes	8/17/2026
Crista	Candelaria	The last thing we need in our beautiful state is a data center. Although it's purpose and funding may seem to be a viable resource for our community, we are not prepared for the consequences. Areas that were once open desert, housing local wildlife, will become concrete shoeboxes that pollute our air, drain our water, and set a precedent that we value data centers more than the word of the people living in these areas. To accept this project is to accept that we do not care for our planet or for one another. Please, keep New Mexico clean.	1	Merged Document	No		Yes		Yes				8/17/2026
Madison	Brown	AI data centers are going to destroy the environment. We already have enough, we dont need more. This project will ruin the planet we live on! We, the people, dont want you to build it! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No			Yes	Yes		Yes	Yes	8/17/2026
Keegan	Randel	We don't need an ai data center. We have as little water here as is, and we don't need a cancerous leech sucking away any more of our already scarce resources. There's nothing good that comes from ai, it gives no one jobs, makes garbage that any dimwit with an iPad can make better and more artistic. Flat out there is no reason for an ai center here, it does nothing but kill the ecosystem and produce slop that no one cares for. Just stop it. I know you got your $300 billion check from the gop, but you aren't even worth a penny of it. Fuck ai, let it die. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Faith	Anon	I am 17 years old and i have dreams about living in a world where we don't over consume and take land from other life forces for profit. Before we existed the world has been able to take care of itself and move with its own pace. Now that we've evolved and man has made the world run on money it's quite literally killing us softly. The earth has never needed us, we need the earth. Our bodies are 80% water, why profit off of something we can't live without? We aren't the only ones that need to survive, the animals have to survive too. You people with money and power have been nothing but greedy and parasitic and the thought of having money and power has you blind sighted so much to the point where you don't even take the next generations of life into consideration. take a minute to ask yourself, where does all the power and greed take you after death? I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Faith	1	Merged Document	No		Yes		Yes	Yes		Yes	8/17/2026
Mikki	Bore	My name is Mikki. I am a Florida resident, living in Orlando , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans and the effects it might have on the whole world. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Micro-grid in Doña Ana County. I am a 15 year old girl, in high school trying to graduate to pursue my future career, I am worried about this project because it can have many negative side effects. For example using up all our fresh waters, displacing many animals, and overall pollution to our atmosphere. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Mikki Bore	1	Merged Document	No		Yes		Yes	Yes		Yes	8/17/2026
Ace	Price	It is absolutely horrible to hear that a data centre will be built. this plan will one hundred percent destroy our entire worlds ecosystem and pollute not just our water, but also our air and people. Do not built this centre. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Anonymous	Anonymous	I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid in Doña Ana County. This project will cause great damage to both air quality and natural resources to the people of the area. The inhumane and unbelievable amount of carbon dioxide this massive database will exude will cause the area to become gradually hotter and cause the nearby water sources to dry up. To follow up on my previous statement, I am aware of the unfortunate amount of water that AI databases consume in order to cool down their systems, and this can heavily impact the lives of citizens by lowering their water pressure at home, immensely lowering the water recourses available to them. To conclude, I must once again repeat my point; this database will only lead to more problems and won't be of any benefit to New Mexicans or anyone else for that matter so please, think of the planet, not of pleasure. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero Counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."		1		No																
Savannah	Bowen	I am against project Jupiter I want it to be stopped in order to stop losing water, keep the water communities rely on , and make sure the future of citizens lives are economically sound. Without water, This No Goods drying up , and the people of project Jupiter building more data centers I am scared I won't be able to graduate high school or go to college and see to it that the future I wanted for my whole life happens. Project Jupiter is just one of the many roadblocks for me and kids my age who are also young and have a future ahead of them.	Mirsnd Document	1		No																
Elisa	Johnson	The world is already in a global water crisis, this big of a data center would definitely push us to breaking point.	Mirsnd Document	1		No		Yes													8/27/2026
Chloe	Poncho	Protecting and caring for our state while no one is speaking up. Caring for the future of our lives were taking action into caring for our future and our HEALTH. Building this project would not only harm us but our environment not making it safe with the new fumes and chemicals being released into our atmosphere. Take a look into the health section, health risks would be risen as our are would soon be polluted. Hospitals are going to do as much little as they can to help people getting sick with all the new pollutants soon going to be in our air, causing health risks. New Mexico is called Land of Enchantment because it's so full of life and natural beauty, with this new project we're going to start seeing changes within our environment.	Mirsnd Document	1		No		Yes														8/27/2026
Jaylen	Quinones	Project Jupiter is a climate disaster in an already changing climate, the longevity of the human act is more important than the money that can be made from AI now. The public should be given an additional 60 days to review and comment. The air quality permit should be denied.	Mirsnd Document	1		No								Yes				Yes			8/27/2026
Kennon	Woodrow	I signed this petition because my own state is having a debate over datacenters and the harm they can bring. Being in close proximity to Garden City, I voted against the construction of a data center earlier this year. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero Counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirsnd Document	1		No									Yes					Yes		8/27/2026
Kaia	Spencer	Our planet matters more than your profits. Building the largest data centers on Earth isn't progress & mdash; it's a reckless gamble with the ecosystems we all depend on. Every megawatt sucked from the grid, every gallon of water boiled for cooling, every acre of land cleared for concrete & mdash; it all adds up to a future we can't afford. We don't need more infrastructure designed to serve billion-dollar corporations at the expense of clean air, clean water, and stable climate. We need leaders who put the health of this planet ahead of expansion plans. Say no to the data center bulldozer. Protect our land, our water, and our future.	Mirsnd Document	1		No									Yes					Yes		8/27/2026
Noah	Greg	Please attempt to stop the building of data centers associated with "project Jupiter". Please do not forfeit the rights of the people and protection of the natural world for greed and destruction at the hands of those who will be unaffected by the changes brought about by data centers and ecological destruction. Let the people speak on their behalf, to advocate for their own communities and survival of the environment around them. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana and Otero County are already	Mirsnd Document	1		No

Peyton	Gray	I live in Fort Mitchell Kentucky, but just because I live so far away does not mean I do not care for the safety of the people of Southern Doña Ana County and under no circumstances do I want experimental technology deployed at an unprecedented scale in such an area where many people are in danger due to the air pollution that will spread due to this Data Center. Yucca Growth Infrastructure's gas-powered fuel cell plant is 1,300 times larger than Bloom Energy's biggest existing fuel cell plant. In fact, worldwide, Bloom Energy has developed 1.4 GW of fuel cell technology across more than a thousand locations, yet Yucca Growth Infrastructure is asking for nearly double that (2.4M GW of fuel cells) at a singular location. The largest fuel cell plant in the entire world is more than 30 times smaller than the fuel cell plant under consideration in Santa Teresa. There is absolutely no way to know, with certainty, what the actual pollution levels will be given the tremendous size differential, and that gap in data, between operational fuel cell plants and this theoretical plant proposed by Yucca Growth Infrastructure. Betting the livability of our county on this unpredictable and unproven plan would be a total cop/fuckation and betrayal of your so-called values "protects the public health of New Mexicans...by preventing the deterioration of air quality." "protect and restore the environment...fosters a healthy NM for present and future generations". Many people are afraid of diseases due to the air pollution that will spread across the county. Children attending Santa Teresa Elementary School will still innocently, every day, LEEB THEIN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks are within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete dishonor of the authority vested in you.	Mirsnd Document	1		No				Yes									Yes				8/27/2026

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. government-sponsored environmental racism as residents of Doña Ana and Otero County are already disproportionately impacted by environmental pollution. If the permit is not denied, a public hearing needs to be held in Santa Teresa in both English and Spanish with an option to participate virtually	Mirsnd Document	1		No				Yes													8/27/2026
Nathaniel	Escosia	Fuck project Jupiter. I'm a resident of New Mexico and I want my state's governor to prioritize our health and our environment over some data center.	Mirsnd Document	1		No				Yes													8/27/2026
		"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero Counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Mirsnd Document																			
Isaac	Franklin	You are actively destroying the world, thats not an attention grabbing opinion, it's the open truth. Data centers poses more holes through our ozone layers than count stad the impulse posted holes through pescants. Please, please, swallow your greed and stop creating this black hole of resources. This data center will make the air quality plummet, it will unleash a low buzzing tone into the earth as if mother nature were constantly screaming mechanical noise from the damage this data center causes. This data center, due to its placement in lower income more restricted areas, in an active assault on the poor and exploited. It is an act of environmental racism classism, the construction of it, and the associated plumbering of most real estate prices in the area will leave families stuck within its area, within it's droning sounds and constant draining of the local water supply. Please, please do not make this data center. It has not even been planned properly, there should have been an additional 60 days to review.	Mirsnd Document	1		No																
Wyatt	Adams	Project Jupiter is a climate disaster. Releasing 22 million fuel cells of carbon dioxide annually. Developers want us to trust that building one of the largest data centers in the world wouldn't threaten the limited water our communities depend on to survive. Another attempt to sacrifice our communities.	Mirsnd Document	1		No		Yes		Yes								Yes			8/27/2026
Blanca	Marino	I am a resident of El Paso, Texas and I am asking that you deny Yucca Growth Infrastructure's air quality permit. Even though I live in El Paso, I and all the residents of our beloved city will be affected by this project. I want to stay here in my home, and start a family of my own, close to the older generations in my family and my husband's family. If this data center is built, that may no longer be an option for me. How can I raise children without clean water? Without clean air? How can I feel them it's a taxpayer, am expected to pay for the rising utility costs that I will cause? How am I supposed to send my kids to school knowing what they are breathing in? Knowing it can cause permanent brain damage or breathing complications before they ever had a chance to grow up. This project would push me to consider leaving this city for somewhere where our environment and the future of our children is a priority. That future is under threat with this proposed air quality permit. Our metro area is currently 34th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. We are tired of being neglected and lied to, and we will not stand for this abuse. The health and safety of all who live in this region should be worth more than the profits of out-of-state corporations who offer us nothing but destruction in return. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero Counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Mirsnd Document	1		No																
Alyssa	Holt	Please allow the public an additional 60 days to review and comment about the benefits of Project Jupiter and how it impacts the community. Emphasizing the Air quality/Water quality for the nearby community and for the state overall. The air quality permit needs to be denied, if/future to deny the permit. A public hearing needs to be held in Santa Teresa providing English and Spanish language/translations as well as an option to participate virtually for ALL communities. Shall the permit be approved, the government-willing admits to committing a government-sponsored environmental racism to residents living in Doña Ana & Otero County. The residents currently face disproportionate environmental discrimination due to the pollution impacting the county. Enforceable reminder that Bloom Energy does not have credible liability nor stable platform due to the company history of illegally dumping hazardous waste. Missing and opportunities would be hindered and conflicted. Please reconsider the permit. NMED entire mission is to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations. Future generations will not have a healthy environment should Project Jupiter commence. This is not helping the community, it will be dangerously damaging the environment leaving irreparable harm and cost more money in the long term sustain the plant. Project Jupiter is not needed. DO NOT approve the air quality permit. Residents of Doña Ana County is worth more.	Mirsnd Document	1		No		Yes		Yes		Yes							Yes				8/27/2026
Anonymous	Anonymous	STOP PROJECT JUPITER!!!!!!!!!! DONT need or want a giant data center polluting our already polluted earth!!! Global warming is already a big problem, and this will just make it so much worse. This is our ONLY planet that we can live on, so a mission of money can buy a new planet. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirsnd Document	1		No		Yes		Yes									Yes				8/27/2026
Anonymous	Anonymous	The project's proposed fuel cell powered grid is concerning for many reasons. It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely,	Mirsnd Document	1		No													Yes				8/27/2026
Eliza	Liz	We don't need AI or more data centers you soulless scumbags. It's insane that you'd rather jeopardize your and others lives all for an "innovation" that can generate pictures in seconds because your lazy asses can't pick up a pencil. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirsnd Document	1		No																
Julia	Hallberg	I am a resident of Sweden and I ask you to deny Yucca Growth Infrastructure's air quality permit. Our planet is enduring massive climate change and this will also disturb the animals and communities around. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirsnd Document	1		No																
Jaylin	Sanchez	I am a resident in hobbs nm . If this continues our air will become polluted and we are already suffering in a drought this will take more water. The heat will rise higher with the pollution when we are already experiencing heat of 108 increasing the pollution this heat will be as cold as it gets . Pure bone our water we loose our animals and we are loosing more than we are gaining. Wheat get carbon dioxide poisoning daily and these are powered by nuclear reactors conversing make or more our state will be gone . Our air will cause us to have seizures lung problems can you imagine how our children will suffer.	Mirsnd Document	1		No									Yes					Yes		8/27/2026
Idaly	Rivera	the health of the citizens in the area should be #1 priority. implementing an idea where you have to use so much water where there's an already existing scarcity isn't beneficial to anyone.	Mirsnd Document	1		No		Yes		Yes											8/27/2026
Jacob	Mirella	This micro grid will raise cancer rates in a highly impoverished area that already has higher than normal cancer rates. Other localities have reported suffocating fumes. I don't believe it's worth it for a center for an unproven technology.	Mirsnd Document	1		No		Yes		Yes											8/27/2026
Cadence	Petty	Dear NMED Staff, My name is Cadence. I am a resident of Colorado, living in Colorado Springs. I am writing this to address and bring awareness to my concerns regarding the environmental dangers that Project Jupiter presents to not only residents of New Mexico, but also the entirety of the United States as a whole. My intentions of submitting this comment are to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid in Doña Ana County. As I am not a resident of New Mexico, I understand my place of residency may produce skepticism within my statement on Project Jupiter. However, it is critical that I bring to light that the development of Project Jupiter would open harmful effects outside of the state of New Mexico. It poses a great concern to the lives of the American people, as it will make a detrimental impact to the climate and the ecosystem as a whole. The fuel cell powered grid proposed in Project Jupiter has accumulated a variety of evidence and reasoning behind many people's concerns. While the plant's fuel cells do run on hydrogen, which gives the impression of sustainability and protection against damaging the environment, it must interact with hydrogen gas in order to obtain pure hydrogen. When interacting with hydrogen gas, it must separate hydrogen from natural gases, thus emitting greenhouse gases as a byproduct of this process. So, the plant's use of hydrogen fuel cells is not as sustainable as it is presented to be. Considering this, the power plant will produce up to 30 million greenhouse gases emissions into the environment every year. This will have an impact on people even outside of New Mexico, as it further contributes to global warming and its consequential environmental impacts. Furthermore, fuel cells partake in generating hazardous waste. Fuel cells filter out any contaminants found during production into the methane stream, including contaminants like sulfur. As the contaminants are filtered out, they accumulate as hazardous waste. This waste further contributes to the toxic emissions that are produced by the power plant, since the gases from the hazardous waste settle into the ecosystem through parts and then emit into the environment through precipitation. With climate change continuing to be a pure detriment the ecosystem, it will soon be the cause of heat-related illnesses like heat stroke, heart attacks, strokes, and kidney problems; which, can even result in fatal outcomes. It also increases the spread of disease through species such as mosquitoes. As the temperature increases, the areas of where mosquitoes reside geographically will increase and will put people at risk of contracting diseases spread by these insects. It is evident that these fuel cells make a detrimental impact to the ecosystem, continuing to perpetuate irreversible damage and reverse years of actions that have been made to end climate change. I urge NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid. If NMED does not reject the application, I ask that the department holds a bilingual hybrid public hearing near the Santa Teresa community, in order to educate residents on the risks that are presented with fuel cell technology. I also ask that the department holds 60 days of additional time for the public to review and comment on the application to ensure that everyone is able to contribute their input on the matter. Sincerely, Cadence Petty	Mirsnd Document	1		No											Yes						8/27/2026
Melian	Kortel	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that escapes the Clean Air Act's mandate for continuous compliance.	Mirsnd Document	1		No										Yes		Yes		Yes		Yes	8/27/2026
Daniela	Seda	This is wrong. AI doesn't benefit us, what is wrong in your head? You're so for up in privilege you are blinded to how important it is to conserve what little nature we have and preserve water resources. Your future goons kids will not have any water to drink, not because you've lost privileges but because there isn't any water to drink. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero Counties. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirsnd Document	1		No										Yes		Yes					8/27/2026
Anon	Anon	Aica not something that we need. It's something that we want. We all know we can live without it. And we must because we will die with it. Our planet can't handle all of these data centers polluting our water. Please put an end to this for the sake of every living thing on the planet. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero Counties.	Mirsnd Document	1		No		Yes		Yes									Yes				8/27/2026
Adrianka	Sarma	The proposed design has an individual exhaust stack on each fuel cell, of which there will be 2,376. It would be inefficient to place monitors and controls on each individual stack and there are NO proposed pollution controls on any of these stacks. How, then, will this project know evidence of their compliance with emissions limit requirements under Title V? Has there been or will there ever be upstream fuel testing of methane gas to anticipate the composition of these fuel cells' emissions? How exactly will NMED enforce emissions standards without direct, long-term, continuous monitoring? Or routine finer detentious impact on air quality without an accurate assessment of localized pollution? A fuel cell can continue to generate electricity or maintain operating temperatures while experiencing catalyst degradation which causes a massive spike in the release of carbon monoxide or Volatile Organic Compounds (VOCs). This project would need to control for the 2.376 individual stack emissions rate on an essentially smaller number of exhaust systems so that Continuous Emissions Monitoring Systems (CEMS) installed on these central exhaust systems can provide real-time, accurate data about operational compliance. As it is, this design plan completely fails to provide monitoring provisions that are "practically enforceable" under 20.2.70.302.B NMAC: You state centers will run what little natural heating the earth is doing for itself. It's using all the water, pollute the atmosphere and ruin the land that'll be built on. It doesn't make any logical sense to even build it, we are fine without AI we have no need for it, and the fact that people are so for using it right there is how little they care about our planet and the living beings on it. It's appalling that this is even being considered, think about the animals, the places, the people whose lives will be completely destroyed including your own in a few years due to what this data centre will do. The consequences are unimaginable and they are NOT going to be reversed.	Mirsnd Document	1		No		Yes		Yes									Yes				8/27/2026
Anon	Anon	I do not want AI data centers because they ruin the environment, with this size of a data center, it will definitely hurt the environments lot. Me and others do not want data centers, we were fine without the overuse of Artificial Intelligence. I know AI has been around for longer than most people, but this is getting bad. I hope we will be okay. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero Counties.	Mirsnd Document	1		No		Yes		Yes		Yes							Yes				8/27/2026
Grace	M	I don't know what the data center is being built but I know what the effects will be on the people who do. I care too much about my fellow man to not speak out for them. Building this data center will harm vulnerable communities. People will lose health problems and water scarcity. Nobody should have to live without clean water, especially for the sake of something that doesn't benefit anyone except large corporations. Humans can live without AI data centers, they cannot live without clean air and fresh water. I beg of you not to build this data center and put innocent lives in jeopardy.	Mirsnd Document	1		No										Yes				Yes		8/27/2026
Anonymous	Anonymous	Dear NMED Staff, My name is V. I am NOT a New Mexico resident, but I am living in El Paso, and I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid in Doña Ana County. I am a 17 year old girl who is unaffected at the existence of a big 40 by all of the mega companies. It's simply unnecessary, especially generative AI. I was able to live without Google Gemini and its AI Overview throughout all of elementary middle school. That is when they actually taught us how to research on our own and not rely on any fake resources. People are just becoming lazy, and it's clear to me that YUCCA/DOES just want to be able to have reasons to control us. This is coming from a girl who lives in a "desert house," one where another AI Data Center will be built through the resources of the Rio Grande. That river is where we get all of our clean water, without it we will be living in shambles, I can guarantee it. I will not be living off of plastic water bottles. The projects proposed fuel cell powered grid is concerning for many reasons: it would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 100 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, V	Mirsnd Document	1		No										Yes		Yes					8/27/2026
Angie	Kaufman	Dear Air Quality Bureau Permitting Section Staff, Please accept this comment on Yucca Growth Infrastructure, LLC, (YGI), formerly known as Acoma, LLC, and its application for an air pollution permit to power Project Jupiter, the hyperscale data center campus proposed for Santa Teresa, New Mexico. Project Jupiter's backers, including YGI, own projections — and what they omit — will have deleterious impacts on our health here in Southern New Mexico's Western Texas. For this reason, I implore you to deny YGI's air permit application, and if not yet, hold a public hearing. 1. Emissions remain significant and include hazardous air pollutants with harmful health impacts. As the New Mexico Environment Department (the Department) is aware, YGI first submitted two air permits on behalf of Project Jupiter, one for an East natural gas-powered microgrid and one for a west natural gas-powered microgrid. This energy model is hardly different the previous microgrids and this solid oxide fuel cell technology both take in natural gas — comprised mostly of methane — to generate electricity. 1 That is, they are both fossil fuel power plants. YGI's Application will still emit over ten million tons of greenhouse gas emissions per year. 2 It is well documented that greenhouse gas emissions, including carbon dioxide, nitrous oxide, methane, and sulphur hexafluoride, harm human health. Moreover, greenhouse gas 2 Application at 138. 3 Initial NSR Application for the 100 Microgrid (hereinafter "Application"), at 122. emissions accelerate climate change, contributing to environmental changes like higher temperatures and ozone formation, which in turn harm human health. Such plumes of emissions thus violate the Department's duty to protect air quality for human welfare.3 But regardless, our ambient ozone has been the only pollutant in NM's air to ever exceed	Mirsnd Document	4		Yes										Yes		Yes		Yes			8/27/2026
Luci	Wittner-Kaufman	I live in Albuquerque and am asking that you deny Yucca Growth Infrastructure's air quality permit. It poses health risks due to air pollution and hazardous waste given Bloom Energy's history of illegal dumping hazardous waste. It is not safe for New Mexicans and we don't want it!!! Please hear us as the people and deny any attempt to move forward with these data centers.	Mirsnd Document	1		No		Yes		Yes									Yes				8/27/2026
Anon	Anon	I am only eighteen and scared for my future because of the pollution and contamination caused by these data centers. My family is scared to bring children into this world, fearing what they would have to go through in their lives. I am already compromised in my immune system and have gotten very ill just drinking the water at my house. It is terrifying to imagine what more data centers could cause and what the future holds. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero Counties.	Mirsnd Document	1		No																
		If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirsnd Document					Yes		Yes									Yes			8/27/2026

Avery	Hicks	WE DONT NEED AI TO LIVE WE WANT WATER FOR ALL. HUMANITY DEPENDS ON WATER FOR SURVIVAL WE SHOULDNT BE DYING OF THIRST BECAUSE THE GREEDY ELITES WANT MORE MONEY. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Sierra	Sorensen	I strongly oppose Project Jupiter and the continued expansion of large-scale data centers. We have reached a point where our planet cannot continue sacrificing more land, more water, and more energy to support endless digital growth. Instead of building more data centers, we should be reducing our dependence on them, improving the efficiency of existing technology, and beginning to restore the land that has already been developed. Every new data center consumes valuable resources and permanently changes the communities and ecosystems around it. As artificial intelligence and cloud computing continue to grow, so does the demand for electricity and water. At a time when we should be protecting our forests, wildlife, clean water, and climate, expanding this infrastructure moves us in the wrong direction. I believe we need to shift our priorities. Rather than continuing to construct massive data centers, we should invest in reducing unnecessary demand, restoring natural habitats where possible, and giving something back to the planet. Economic growth should never come at the cost of the health of our environment or the well-being of future generations. Please stop Project Jupiter. Choose a future that values clean air, clean water, thriving ecosystems, and healthy communities over unchecked technological expansion. Our planet deserves restoration, not more industrial development.	1	Merged Document	No	[redacted]	Yes		Yes	Yes			8/17/2026
AJ	Schinco	We've lived without AI for thousands of years. SAVE THE PLANET SO WE CAN CONTINUE LIVING. Stop killing our planet so some artificial being can thrive. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Anon	Anon	I am a resident of one of New Mexico's neighboring states and I ask you to please put an end to this new data center. Not only has AI scientifically been proven to be a climate change threat, but also a noisemaker and a significant threat of livelihood and wellbeing to those who live around it, as well as animals in that ecosystem. Data centers, especially ones as large as Project Jupiter, are infamous for disrupting daily life and even the sleep of many as they produce harmful amounts of light and noise to keep their systems running. These two things combined are sure to create an unhealthy and unsafe envoirnment for the people and creatures who live there. If you won't deny the permit, then atleast give a public hearing to those who will most definitely be affected, in English and Spanish (with the option to participate virtually too), so they can be made known of these plans of building a data center. I am a teenager, so my thoughts might not be the most well-written ones, nor that I am the most intelligent and enviornmentally-aware person, but I know and understand enough about this that I worry that approving this permit will be hazardous and life-threatening to so many people. Please, if you want to help care for NM and its ecosystems, its societies, PLEASE do not approve this permit. Thank you for reading.	1	Merged Document	No	[redacted]			Yes	Yes		Yes	8/17/2026
Rae	D	We do not need AI or data centers. I find it to be so disrespectful of these people to disregard all of the water they are using up, that of which we need to survive, on things that are not required. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Esther	Louis	"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably" i agree with this statement from the article. I feel like with the big scheming companies giving influencer money to promote Project Jupiter in a good light, not many people have gotten to see the other side, how Project Jupiter will affect Mexico and if it is a success it might affect the area around it (Ex: USA). In the article it also makes point to say that "If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually." This is totally a good idea because some people aren't allowed or able to go online and learn about this. There should be a public hearing so in English and Spanish and the option to attend virtually to create opportunities for everyone to be able to learn about the destruction that this might bring. There should be total truth so everyone knows whats going, so that the people of Mexico head's are not clouded by the lies that these companies want to spew about Project Jupiter being good for the community. I want to add in that i am a 12 yr child living in the USA and I am very aware of the Earth's deterioration, I am scared for the future of this world and hope that this data center is not made for the sake of my future, for the sake of everyone's future. Global warming is at an all time high and some people still think Artificial intelligence is a good thing. It makes me sad that I know that the Earth is just going to keep getting worse and that the last time to stop it is now. It's sad and disappointing that a young child like me has to speak up, has to worry about their future, has to submit this form just because millionaires want to become billionaires and that billionaires want to become trillionaires. Some people don't understand that to get money is to take away from someone else. PLEASE SAVE THE PLANET. :(	1	Merged Document	No	[redacted]		Yes				Yes	8/17/2026
Anna	Dias	WE DON'T NEED MORE AI DATA CENTERS. But we do need clean water and nature, if you really think that you are going to be safe when the consequences of this shit start to show, bad news, you're not that important for these companies nor the billionaires. Do your job and protect our environment and air quality. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Courtney	Jones	We as a society need our water more than we need ai, please stop the nonsense. Ai has no real life benefits, and it may seem like the world is full of water, but it's not. Please put an end to this ridiculous task. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
anonymous	anonymous	These things we do not need. All it's doing is destroying the world we have for greed and money. They sell our lands that we're free back to us for money, etc, quit letting them control us. STOP THE USE OF AI. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Kiana	Avila	I want to protect the environment from the data centers and to stop them from destroying our environment also to foster a healthy and prosperous NM for present and future generations. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Zoe	Tomaro	They are ruining counties, families, states. A data center went up overnight in Knoxville without anyone ever knowing, not even the government. If you are in office right now, working as a government worker, stop standing around and take action because you have the voice we don't. Nobody should want this, even if you're money hungry. You see these people at this time in this country are struggling to even make ends meet! Living paycheck to paycheck having to make the choice between feeding their kids or paying the electric bills. These data centers are targeting poor and low income areas to build on. Do we ever think about the impact that those data centers make on the communities? These data centers leave these communities with 24hr artificial light flooding across the skies making it harder for people to sleep, I've seen people's water come out of their faucets brown, pink, and other gross colors that should never be going into homes. Multiple communities have voiced their concerns on this matter and are enraged to say the least. So many people move to America for the American dream. This is not a dream, it's a nightmare that is coming alive more and more by the second. We should not allow investors that are in China to come in and create these extremely harmful data centers when they aren't even citizens of America. Isn't that funny? I thought that you had to be an American citizen to own land. But I guess it doesn't count for all of those illegal immigrants that come to America trying to build a suitable life for their families and get their papers because they never got that chance back in their country. Instead of helping them, we just throw them out like they're pests. It is so hard to get into the system and become a citizen. I know someone who has been trying for 6 years and still hasn't gotten in. But we allow these foreign investors to do this to our beautiful land. Project Jupiter, if taken into action, will be extremely harmful to the environment,releasing over 10 million tons of carbon dioxide annually, which can be harmful to humans because we breathe in oxygen that plants release, not carbon dioxide. Do you really think plants can keep up with these huge data centers? I always had the funny thought when I was younger, what if we run out of oxygen? Thinking it would never come true, but I'm 15 now and it seems as my life may be ending before it starts. This isn't all this data center is doing. The Rio Grande is drying up before summer has even started. Do we really think that this is okay? Right now, think about how you feel about this. There are so many negatives compared to the little little positives. Humanity was fine before AI, before the internet. We never needed any of this. AI, even though it's been around for such a small amount of time, has became extremely harmful to adults, and growing children. We are losing our critical thinking skills rapidly. I look at students around me in class, because they're always on their phone, they're struggling to complete simple questions and problems in class. Do we really need this expansion of AI that is doing more harm than good just because the government's eyes turn green at the thought of money? Look past your greed now, see how horrible this would be, open your eyes. We don't need AI generated videos or anything of the sorts when we have perfectly good man made videos. We don't need an AI overview every time we go to search something up. There are plenty of resources that we can look into for information. These data centers are so extremely unnecessary and that's why I fight, when I'm enraged every time I hear about a new data center, why I sign petitions and write comments. I fight because this is wrong to do to the people of America, treating the citizens worse than the illegals! This should be stopped, now. Through this, I have a voice. I will not let another data center go up. America is counting on you. Make the right choice.	1	Merged Document	No	[redacted]	Yes	Yes	Yes				8/17/2026
Mirren	Russ	Dear staff of the NMED, I write to you to in order to strongly urge you to reject "Project Jupiter," Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. This project poses extreme danger to the people, wildlife, and entire environment of New Mexico. New Mexico is a beautiful state, and this proposed data center will not make it more beautiful. It will mar the land, leech it dry of its health and resources, and leave it a shell of its former self. There is no worse deed than harming children, but this project, if accepted, will do just that without remorse. This proposed AI data center will be dangerously close to local schools and the residential areas in which they live, while continuously polluting the area and draining large amounts of water that New Mexico cannot afford to give away. This pollution is not just limited to air pollution, which in itself will be devastating to the health of the many children and adults who live in this area. AI data centers also impose extreme noise pollution, which is similarly extremely harmful to the health of residents and wildlife. Noise pollution can cause exponentially high risk of cardiovascular and metabolic health risks (including high blood pressure and heart attacks), extreme loss of sleep due to constant and extremely loud noise (which in itself leads to a multitude of health issues), and hearing loss, just to name a few. These dangers will be pressed upon adults and children, for no better reason than more money for those far up. It is imperative that Project Jupiter is rejected due to it placing the health and even the lives of all residents, including innocent children. Furthermore, the companies behind this project refuse to even acknowledge anything that paints this project in a poor light. They are ultimately dishonest and have been caught in the act of submitting false comments that claim to be in support of Project Jupiter, under the names of other individuals without their consent. They then refused to comment on the matter when questioned. These companies are facing lawsuits regarding this issue and a number of others. Any project that apparently "aids" the people should not be in such a position to begin with. Even still, Bloom Energy, one of the companies behind this project, has a history of illegal dumping of hazardous waste. Even now, the procedure of how the emissions from this project will be handled, should it be accepted, are unclear. It is clear that the companies leading this project do not have the better interest of the people in mind, no matter what they may say. The only thing that they have the better interest of is having deeper pockets. And for it, they are willing to sacrifice the health and possibly the lives of residents, including children, who will constantly be exposed to the pollutants produced by the proposed AI data center. For these reasons, myself and many others are writing to you to encourage you to completely reject Project Jupiter. If the permit is not denied outright, a hearing must be held in Santa Teresa, in both Spanish and English, with an option to participate virtually, so that all members of this community may participate equally.	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes	Yes		8/17/2026
Sebastian	Hernandez	I am Sebastian Hernandez and I would like to ask that you would deny the data center that will be made/"Project Jupiter". It will us up most of the clean drinking water that we don't have to spare. Please do not take this project any further for it will use up all clean water and course more air pollution. Thank you for your consideration - Sebastian Hernandez	1	Merged Document	No	[redacted]	Yes		Yes				8/17/2026
Akili	Smith	please ban project jupiter! we can live without ai. project jupiter shouldn't be allowed. it is only going to cause harm and damage to our world. there's already enough things going on that hurt our planet daily. project jupiter will not helpz New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Corey	Paylor	I don't support building AI data centers anywhere. The planet is already failing, we need to help it, not hurt it further. Data centers do nothing but ruin the environment and AI does nothing except make people stupid. Stop this madness. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	My family's health and safety should be worth more than the profits of out-of-state corporations. The only defensible options moving forward are to deny this air permit or you must hold a public hearing in-person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. We should be able to keep our earth and communities clean, families should not be affected by the installation of these centers. There is always different solutions to world problems and needs but by building large data centers it only hurts our health for the future.Hear our voices and deny this air permit or hold a public hearing.	1	Merged Document	No	[redacted]			Yes			Yes	8/17/2026
Chloe	Holdren	We do NOT need ai, we NEED water!! We NEED renewable energy, we do NOT need another nonrenewable energy source, especially on this scale! Please, stop! It's only june and our community itself is already in stave 3 drought, I can't imagine what a data center as large as project jupiter would do. The CO river is struggling to keep up, the demand something like this would caught will ripple to ask for states dependent on this river. It's beginning to eat up our planet. Please, I beg that you stop! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste!! If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. * Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	High schoolers in Texas and any of the 50 states learn in their biology classes (and even social/history classes) the utter importance of keeping the environment and local ecosystems well by acting in the name of sustainability. Project Jupiter is the antithesis of that cause. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Gillian	Taylor	There is no sustainable way for this project to be built. It is widely unpopular, and constituents know that this greenwashed rebrand is just another way to build industry on top of disadvantages populations, whose air quality is already below safe parameters. This project will cause immense damage to an ecosystem that is already deprived of water, and the lasting impact of this damage will be apparent in not just New Mexico, but in the neighboring states as well. The people do not want to be more victimized by billionaires than they already are. For the safety of those communities near the site of the project, the residents of the whole of New Mexico, and the prosperity of the children living in this state, please do not approve this air quality permit.	1	Merged Document	No	[redacted]	Yes	Yes	Yes				8/17/2026
Anonymous	Anonymous	STOP PROJECT JUPITER!! are you guys insane?? When the last tree dies, and the last drop of water runs out. YOU. will realize that we CANNOT. EAT. MONEY. Do you not see the climate change that is HEAVILY. affecting us?!?!??? Instead, if you were to put this much effort into fixing this climate change, MAYBE JUST MAYBE Europe wouldn't be 30C degrees right now. Which is NOT NORMAL for Europe and never has and it is regular CLIMATE is always and has been cold. You are truly disappointing and money hungry. I hope project Jupiter fails since your nasty, greedy, money hungry intentions are taking over the world. If you put this much effort to reversing climate change. You would make alot more money AND alot more support. Since money is all you care about you greedy disappointments. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Amirah	Lockett	Project Jupiter is another project that prioritizes the wealthy in a guise of "innovation" that will have a negative effect on the environment. Placing Project Jupiter in an area with already existing air quality issues will only exacerbate these problems. We have ro deny the air quality permit application. The public should have 60 days to review and comment on the air quality permit. If the permit is not denied, a public hearing must be held in Santa Teresa. If this permit is approved, it would be a government sponsored act of environmental racism. We do not need anymore data centers.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	8/17/2026
Angelica	Hernandez	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades.	1	Merged Document	No	[redacted]		Yes	Yes				8/17/2026
Ariel	Anonymous	We do not need this project, this project holds greater negatives than it does positives for the community and for the land, this is not a need or want it is something that is actively hurtful the environment around it and is speeding up the effects of global warming "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
C	G	I live in northern Georgia. There is already a data center that is being built about an hour from me. Hopefully this trend will not continue, but if it does, there will likely be a data center in every state in 50 years max. If the building of these data centers continues, there will be no water to drink, to shower, or to fulfill basic human necessities. According to the Office of the State Engineer, this data centers will require 1,000,000 gallons of water per day. Along with other data centers that are being built across the country who need similar amounts, the amount to go around for citizens decreases greatly. There will be no fresh air for people to breathe. It will all be replaced be carbon dioxide emissions. This type of plant, a fuel cell plant, has never been built before at this size. While it is also taking away our air and water, it is a literal risk the the community it neighbors, as the newness leaves new margins for error. THIS IS DANGEROUS FOR EVERYONE!!!!!!!!!!!!!!!!	1	Merged Document	No	[redacted]	Yes	Yes	Yes	Yes			8/17/2026
anon	anon	I believe that Project Jupiter is harmful to the planet and should not be done. The planet is already facing irreparable damage due to AI. If this project is continued, there will be effects on the land and those who inhabit. Some of these effects include a lack of clean/safe drinking water, health issues, and loss of biodiversity. People should not care about money/profits over human and animal life. Any sane human being can see that having these data centers in a burden on the planet. Therefore, there should be none, we have seen the effects, now we should act upon it to stop them. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Rosie	Walker	What about cases of catastrophic failure? Are we approving those deadly incidents of pollution in advance without any real data informing us of the risks at this scale? Highly flammable hydrogen under high pressure only needs a microscopic crack to leak out, ignite, explode, and level entire neighborhoods and schools while sending shockwaves into nearby counties. Assuming this risk, an act of gross negligence, at a scale that has never even remotely been demonstrated in practice would be unbelievably careless. These permits must be denied outright. If further deliberation is desired, a public hearing in Santa Teresa is non-negotiable.	1	Merged Document	No	[redacted]			Yes			Yes	8/17/2026
Anna	Moore	Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Maddison	Gines	I am a resident of Gorham, Maine. I am very lucky to live in a state where greenery is common everywhere I go. But, others are not. States like Missouri are suffering from loss of water or water pollution due to data centers being created. Billionaires are benefiting from this, but what will happen 10-20 years down the line when there is no land, no water, to create these data centers? What will citizens do? We have suffered enough from the consequences of higher up's actions. Us, our animals, our ecosystems, our whole entire Earth. This project will rapidly destroy the earth, more so than it already is. New Mexico's citizens should be allowed an extra 60 days to speak up and comment on their air quality permit so the community can act accordingly. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If then, the permit is not denied, a public hearing should be held in Santa Teresa in English and Spanish with a virtual option to participate. Approving this permit would be government sponsored environmental racism as the residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, anonymous	1	Merged Document	No	[redacted]		Yes	Yes	Yes		Yes	8/17/2026
Felicia	Sanchez	New Mexico does not need Project Jupiter!!! I want our children to have water not a data center. How will this data center affect air and water quality? What ground and air pollutants will NM be exposed to if Project Jupiter becomes a reality? How will it affect the wildlife in and around the area? What other natural resources will Project Jupiter consume/deplete? What actual benefits will this bring our state and for how long? How many permanent and temporary jobs will this produce? Do local and/or state officials receive any incentives from Planet Jupiter? I would rather not have a data center in or around NM. There are already enough data centers in our country. There are no long term benefits that are worth the damage that this will cause to our health, environment and society. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026

Coenraad	Adema	This developer and project jupiter are misrepresenting the real burdens on clean water, a precious resource in our state, and the actual energy management. Impact on our lives are too great to burden our state, environment and children	1	Merged Document	No				Yes		Yes					8/17/2026
Anonymous	Anonymous	AI is slowly killing everything we deem precious to us. Without protecting the valuable resources we already don't have a lot of, the earth will collapse. It's not a statement of "what if" it's a matter of time. Unfortunately Gen Z is left to clean up the mess that was left behind by older generations. If we don't start now, there will be nothing left to fix. We don't need AI, we need water and clean air. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Alex	boba	I am writing to express my strong opposition to Project Jupiter. The proposed AI data center poses a severe threat to both the environment and the local community in New Mexico. The estimated annual release of 10 million tons of CO2 is unacceptable and directly contradicts efforts to combat climate change. Furthermore, the immense water consumption—millions of gallons annually—is particularly alarming given New Mexico's arid climate and existing water scarcity issues. This project would place an unsustainable burden on a region already struggling with drought, jeopardizing the community's access to vital drinking water and potentially devastating local ecosystems. We must prioritize the well-being of our planet and its inhabitants over projects with such profound negative impacts. I strongly do not want this AI data centre and so does no one else, we are not ruining our planet just so already super rich billionaires can just get richer.	1	Merged Document	No				Yes		Yes					8/17/2026
Shayla	Menton	We can live without AI. AI uses up many of our natural resources that can be difficult or near impossible to replace if we run out. God did not create us for us to destroy his creations. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Adam	Anonymous	Dear NMED staff, My name is Adam Berman . I live in Albuquerque , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely Adam Berman "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Daphnée	Berard	Dear NMED staff, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. We are at a critical time to fight climate change and this would be an enormous step back. Not to mention the facility would also be producing a large amount of hazardous waste. Fuel cell technology has never before been deployed at this scale. This is 60 times larger than the largest existing Bloom fuel cell installation. The Application is based on pollution testing from a very small unit. The testing unit is only 65kw, while the power plant is 37,876 times that size. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. Sincerely, Daphnee "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No					Yes	Yes		Yes	Yes	Yes	8/17/2026
Elliott	bass	We don't have enough water in new Mexico for this data center, the Rio grande was never dry when i was a a kid but now it's empty every day. We as a state can not sustain a massive data center like this one "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	The people should matter more than the out-of-state profits going to already money gorged companies. There is already an illegal dumping epidemic and this will only worsen things. The right action is to deny this air permit and listen to people with an in-person hearing. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Grecia	Anonymous	We don't need any more data centers. AI is being handled and released at a faster rate than us knowing how far it can go against humanity. Not only that but the tragic risks it has against wildlife and our natural environments including resources we need to survive like water. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Aleisha	Thaxter	This will be become a disgusting use of land, the citizens of Mexico deserve better then to have their home treated as sacrificial land for an unnecessary product that won't help in the betterment of their lives. Project Jupiter will simply dry up water and spread contaminated water to the people causing health issues you can already see it happening in America—I don't wish to see it happen to more people "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Kat	Kemp	New Mexico is a beautiful state that needs to be protected and already suffers some of the lowest poverty rates in our nation. Do you understand that the effects of this data center alone can ruin the entire state. We cannot afford for the cost of living to increase, for the pollutants being released into the air to raise our temperature, for you to steal and poison waterways that have been used to tend the lands and keep people alive across our state for generations. I want to continue growing here, build a family, and have a secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities.	1	Merged Document	No				Yes	Yes	Yes		Yes			8/17/2026
Novain	Anonymous	Hello i live in Texas which is not to far away from where y'all are building "Project Jupiter".This project will release a lot of Carbon dioxide in the air.If your not aware our air will be polluted because of this data center.I have relatives who are children and i would love to see them grow up and go to college."Project Jupiter" might just make a drought , not only that we will have polluted air and water.We are human too and we don't deserve this.We all need clean air and water , not "Project Jupiter" or more data centers.We are hurting our earth each second of the day because of this.Plants that burn chemicals into our atmosphere are already destroying the environment and the planet.I hope that we can't stop this project now and continue to help our planet heal from all the damage we have caused. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Kiki	Todorovic	Dear NMED staff, My name is Kiki Todorovic. I live in Calgary, Alberta, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. AI data centres pose massive threats to the people that are forced to live near them, ruining drinking water quality, noise pollution, not to mention the contributions to global warming from the cooling needed to keep these centres running. They disproportionately affect communities of colour and low income areas, making them targeted attacks on people already at risk. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Kiki Todorovic "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Benjamin	Marquez	As a proud New Mexican, I say that Project Jupiter and Yucca Growth Infrastructure as a whole are not for New Mexico. They do not have a place in our state. If the Air Quality Bureau of NMED and NMED truly has the health of NM as their mission, they will not allow Project Jupiter to be permitted. This new plant will be harmful for New Mexicans health and breathing air. It will rob our fragile communities of water, electricity, and health. All while pumping tons of carbon dioxide (other pollutants) into our air. I ask for an additional 60 days for the public to be given in order to respond to and review this matter. The decision should be up to the New Mexicans at risk from such a dangerous project. This private gas plant will not benefit New Mexicans. This permit should be denied, I say once again this permit should be denied. Project Jupiter will poison NM for generations to come if allowed to continue. Furthermore a public hearing should be held, that is physically/virtually accessible and in English, Spanish, and ASL/Sign. The county of Doña Ana already suffers from inadequate air quality and health issues. Protect New Mexico! Protect New Mexicans! We don't need more pollution and costly poisonous projects. No to Yucca LLC and it's greed! No to Project Jupiter and it's plan to strip New Mexico of resources, vitality, and health. Protect people not corporate interests!	1	Merged Document	No				Yes	Yes	Yes		Yes		Yes	8/17/2026
Collin	King	I am a resident of Dona Ana county and I strongly oppose the development of any data center in the county. This is a resource scarce area. Data centers serve only disconnected billionaires and their AI fever dream; a solution without a problem. They have no legitimate purpose in economic development and provide no benefit to local infrastructure. In fact they are a risk to humanity and life on this planet. Additional consumption of limited water and other resources for this billionaires play thing should not occur. No amount of pollution whatsoever is acceptable for such a project and it should be shut down.	1	Merged Document	No				Yes		Yes					8/17/2026
Sophia	Anonymous	Project Jupiter initially applied for air permits to the New Mexico Environment Department (NMED) back in April, under the first name Acoma LLC. This original application sought to build two, separate gas power plants. After the public successfully submitted over 7,000 comments that were overwhelmingly in opposition to the gas plants, the developers have decided to completely scrap those applications and re-start the process proposing a new kind of fuel cell technology. They have re-named themselves Yucca Growth Infrastructure, LLC and have re-submitted new air permits to NMED. Meanwhile, there is an industry marketing effort to greenwash this change. The toxic pollutants are now under "acceptable" levels that make it harder for NMED to regulate, but the greenhouse gas emissions remain extremely high and the proposal is still significantly polluting. These companies are claiming that this shift to fuel cells is because they care about the community's concerns. In reality, this shift makes it easier for them to bypass outdated state regulation and advance their plan as quickly as possible. We need as many people to speak up again against this development! The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No					Yes	Yes		Yes	Yes	Yes	8/17/2026
Anonymous	Anonymous	AI will soon be eaten up by itself in the near future—destroying the environment and the natural habitats of countless animals and plants is going to be futile, and ruin the lives of everyone around the world. My friend almost passed out from heatstroke near these areas—collapsing to the ground from the severe temperatures. Data centers of this size will only exacerbate these challenges. Waste will be deployed into public waters and ruin communities, temperatures will rise and cause many more deaths. We do not need more data centers. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Anonymous	Anonymous	Hello, I am not a resident of New Mexico, but I am deeply concerned about the health of New Mexicans because of this project. AI data centers are not good for the environment and hurt not just the environment but also the people living there. What I have seen with the data centers is that they are noisy, take up a lot of water, and harm the environment in the areas. From what I have heard this data center is going to be very large. From what I have also seen is that data centers are very loud, which can harm younger children who are still developing. The average sound of a AI data center is 75 to 85 dBA from the research I have done. The average sound for children's hearing to be permanently damaged during development is an 85. This will not help the children in the area grow or improve, it will only improve the AI. Please don't let them build this	1	Merged Document	No				Yes		Yes					8/17/2026
Anonymous	Anonymous	This must not be approved in order to protect the health of the residents of Santa Teresa, Sunland Park and El Paso. The prevailing winds blow from west to east and all those toxic fumes will be carried down to these areas. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Phoenix	Stephens	I live in a small city in Pennsylvania and it's known as "a blackhole". If you are born here, it's unlikely you will be able to leave. A lot of people here think they won't be able to make a change but I want to prove statistics wrong. If this small involvement could potentially help save the little bit of our planet left, you best believe I will contribute to the cause. The greenhouse effect has been an underlying issue for decades and some people out there (including my own father, who is one of the smartest men I know) who do not belive in global warming. I won't sit here and pretend I am a scientist and know everything about this topic but I know enough to say this: we have been slowly killing our planet and people have been denying it for years. I don't understand why this is something we have to FIGHT for. There are holes in our atmosphere and if we don't start acting now or a few years into the future, not only will we kill our planet, but we will also kill us humans, every animal that walks this earth, and every plant that helps us breathe and provides us food. Some people might make the argument and say, "But that's such a stretch. And if that were to happen, it's gonna be years and years from now and I most likely will be dead by the time that happens so I don't really care." Those people may be right that it will take years for it to settle into place for it to be that extreme, but does that matter? You're telling me you don't want to preserve this beautiful place that gives us life not only for you but your family that WILL be here after you are gone? It's disgustingly selfish. I am 18 years old and even I might be around for the collapse of civilization and this planet but that is not my issue. My issue is that this is my home and I want to keep her safe. This place has given me the gift of beautiful experiences and I want to save that for myself and everyone else who will walk this earth. Some people will say this is "cheesy" or "corny" but that- doesn't make it any less true: there is no planet B. We have this earth and that is it. Why would you want to kill the only place we have called home? Just because you want to generate unoriginal videos and fictional characters saying horrible things, talk to a robot you think is your lover, or steal art from others just to call it your own, and then when you get caught you say, "Well it's because I can't draw" or "I have a disability". One of my favorite TikTokers and YouTubers is legally blind and he wrote and drew his own children's book. I know not everyone can do that but that is not my point. There are so many disabled artists and writers and creators. And if your argument is that you can't do it or you do not have the artistic ability to do it then there's a piece of advice I can give you: learn. Like everyone else on this planet. You do not get to sit back and steal others work just because you are to learn to learn and grow. You are killing our planet, plagiarizing, and not willing to work on yourself just because you "can't do it." You are lazy and ignorant. Grow up and look outside, read the news, look at current events, and SEE what your ignorance is doing to the planet, others, and YOURSELF.	1	Merged Document	No						Yes					8/17/2026
Finn	Kuna	Project Jupiter is a waste of resources our state needs. This plan needs to come to a full stop before more damage that cannot be undone happens. New Mexico needs affordable housing, jobs, and resources for the homeless & addicts. AI is not a magical tool, it's a scam and a lie being sold to us as something else. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Anonymous	Anonymous	Please do not do this it will be a climate disaster we the people are begging you to please not do this it will kill land and animals this will release 10 million tons of carbon dioxide annually, climate is already a depleting problem	1	Merged Document	No		No	Oppose Non-Substantive		Yes	Yes					8/17/2026
anonymous	anonymous	Students, like myself, spend around 12-16 years in school, gaining an education and understanding of the world around them. AI is an unnecessary tool if you are able to receive a proper education. AI will put a hindrance on human ability to learn, not to mention the many other aspects in which it will poorly affect the world around us. AI is marketed as a tool to make our lives easier. However, because of AI, I am unable to find a job in graphic design post-grad. Why are robots creating art and not working in factories? Climate change has reached a point where it is essentially irreversible. Why do more harm to the Earth? UNNECESSARY harm at that. All data centers do is use up our limited supply of freshwater and spit it out as unusable garbage. Data centers raise the temperatures of the cities around them. When you are in a relationship with another human, deciding if it is going to work out, what do you do? You weigh the pros in the cons. And in order to stay in that relationship, the pros should significantly outweigh the cons. Human relationships with AI are overwhelmed with more bad than good. So why would we continue that relationship, risking the integrity of young minds, jobs, and most of all, our environment. Movies and shows have been warning us of this robotic rise for too long, and we ignore it and continue blindly. Without laws. Without regulation. Think about this.	1	Merged Document	No				Yes	Yes	Yes					8/17/2026
Aubre	Erickson	Stop destroying people's ability to live comfortably with AI data centers. This will ruin not only animal life but human life as well. Constant droning noise is used as a military torture tactic. How is it fair to put innocent civilians and animals through that? This destroys the environment and local natural resources. Fuck ai, fuck data centers, and fuck you for being selfish money hungry dickwads. I hope you burn in hell for what you're planning on doing to these communities	1	Merged Document	No						Yes		Yes			8/17/2026
Pierce	Jones	This can effect so many town's climate and the over wellbeing of our earth, not to mention the wildlife that lives naturally nearby. This would be a climate DISASTER! It can actively cause the planet to get hotter, which causes much more extreme heated waves and do so much damage to crops and produce, not to mention the fact that this data center would effect the air around the area, and could be potentially hazardous, take our please into consideration.	1	Merged Document	No						Yes					8/17/2026
Elijah	Martinez	i've lived in Las Cruces, New Mexico my whole life. I was born raised here and I also plan on buying a home in the next two years, I know these AI data centers use tons of water. No, I use AI myself so I'm not opposed to AI as a whole, but I do not understand why we are putting a data center somewhere where there's already a limited supply of water. I'm genuinely concerned as a citizen then the next couple of years we may not have water which makes me not even wanna buy a house here and consider moving elsewhere. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	Greetings! In full disclosure, i am not a US citizen, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans the all of us. The use of AI, and furthermore the creation and establishment of data centers its not only a danger to the local population and ecosystem but also threatens the world by large. I have witnessed my friends, family and strangers fall pray to the dangers of AI, each use leaving them more reliant on a technology that preys upon them and their data, leaving them vulnerable to its dangers. But to me the greatest and most important thing about the use of AI is the cost it has on our planet. Data centers rely heavily on the use of water and have been known to release toxic chemicals to the environment, causing many health issues and generally negatively impacting nature. I ask that you take a stance, however taxing and limiting it may be. To stand silently on the face oh harm is to support it however it may be. As large as this project plans to be, and for all the money it can profit the companies behind and those who side with it, the cost will always be higher, especially for those who are vulnerable to it. Right now we don't need new data centers or even AI in its most common use, we need action, hope and the ever standing stance against what is wrong. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Humans need to believe in the future again, long for its creation and arrival. I am 20 years old. I should not have to fear living in the world, wary of the current politics and unwilling to accept that my only life will have to be this way. Project Jupiter has the capacity to be the death of us all, and i will not face it silently. Will you?	1	Merged Document	No				Yes		Yes		Yes	Yes	Yes	8/17/2026
Jordan	Gilliland	This is not ok to do we are spending so much money on a project that will just destroy and damage our earth even more. Global warming is not just something we can ignore and people may be trying but it's happening right in front of our eyes. The damage and harsh effects AI has caused to our world and animals is immense. Habitats destroyed, water supply diminished and people just sit back and decide that AI images is better than the lives of animals. This data center won't just affect animals but also the people in New Mexico. There is already low safe water supply in most parts of New Mexico and this data center will leave them with nothing eventually. This will have the poor side of New Mexico left fending for water and having to scrape up last bits of money to buy clean drinking water that's been shipped because of the low supply. This is not okay, this proposed data center would bring us one step closer to our earth dying. Think about our earth, the people, the animals. We need money to go to the struggling people in America not to AI	1	Merged Document	No				Yes		Yes					8/17/2026
Taisiia	Kozlova	My name is Taisiia Kozlova and I'm live in Canada, even if project Jupiter isn't on this land, it's going to cause a disaster to a people in New Mexico. This project going to take their land, land of people, animals, nature. And just for making Ai data centre? Our planet, our environment, our people means more than robots and Ai. If we not doing to protect what we have now, we are going to lose everything we ever had. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
C	Lipp	Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means that their air quality does not meet federal government rules.	1	Merged Document	No					Yes	Yes					8/17/2026
Katherine	Nelson	Hello, as a resident of New Mexico and a potential resident of Las Cruces I am extremely concerned about the environmental impacts of the proposed data center Project Jupiter. I have been watching other communities that have had data centers erected and the problems that these data centers create are enormous! Air quality is compromised greatly, heat index rises, water consumption is exorbitant and the noise generated is off the charts! All of these issues are greatly concerning & could dramatically impact the community of Las Cruces. Please take action to prevent this from happening. the air quality permit for this data center in Las Cruces should be denied! The public deserves a voice in this as well. We are asking for an additional 60 days to comment on this data center! The hearing for this needs to be in Santa Teresa. Approving this permit would be government sponsored environmental racism. Regards. Kat Nelson	1	Merged Document	No				Yes	Yes	Yes		Yes		Yes	8/17/2026

Gwen	Kloo	I am a resident of the north eastern united states. I am entirely against this project as it not only takes away water from those who desperately need it; but also takes it away from our natural environments. AI is a luxury, and a far from necessary one at that. Not only does it consume ungodly amounts of water, but it destroys habitats to make space for data centers and heavily pollutes the environment. My neighbor has a small child who last summer unfortunately passed away from heat stroke. She was barely even 3 but it was so hot our her body unfortunately just could not handle it. I hope you can take the time to consider just how many cases like this there have been or will be; all because of the pollution being poured into the environment and heating up this planet to unreal amounts. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Carol	Sassaman	YGI's air permit application must be denied because their application is based on incomplete data and flawed assumptions and would violate the New Mexico Air Quality Control Act and the federal Clean Air Act. Approval of the Application would also perpetuate environmental racism against the residents of Santa Teresa and Sunland Park. If the permit Application is not denied, then NMED must hold a public hearing in Santa Teresa in a hybrid format in both English and Spanish. Yucca Growth Infrastructures, LLC claims its new air permit application is Green, but the microgrid facility will essentially be a natural gas power plant. YGI's Microgrid will emit at least 124 tons of VOCs per year which will exacerbate already dangerous levels of ozone and likely violate ambient air quality standards The Environmental Improvement Board must create a comprehensive framework to regulate greenhouse gas emissions before such a massively polluting facility like the YGI plant which will emit more greenhouse gas pollution than NM's largest metro areas combined Despite being located in a drought-stricken region like Southern NM, YGI fails to provide a fire hazard plan or analysis for its high-risk facility YGI's microgrid emissions are likely much higher than claimed on the Application NMED must recognize all the community stakeholders who have been engaged on this proposed project, including community groups around the state who generated more than 7,000 comments to the project's first air permit application	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	8/17/2026
Anonymous	Anonymous	Please don't keep on contaminating our limited water supply. Building this data center will not only pollute the little water we have. But also release millions of carbon emissions yearly. This is extremely concerning and important to the United States. And surrounding countries. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Brittany	Fuentes-Nunez	This should stop because millions of people have family they care about and others have a future but AI is ruining that for others for example being an artist, actor, writer, singer, and way more that AI is ruining, i am still a student and minor but I do hope AI can stop because it is affecting our lives, people have an addiction to it or is just wasting water that people use to survive, and why use AI if we were managing perfectly fine without AI look at history it did good without AI we were good without AI as well. There's also many health risks this project Jupiter could cause us, and makes people less creative and give wrong answers to students that cheat using AI. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	The well being of my family, friends, pets, and natural resources should be more important than a few people that cannot think for themselves and use ai. The ai use is unnecessary and not needed with the improvement of human life. We have ai becoming apart of the education plans because kids in high school cannot read without an assistant, relying on ai to just do the work for them and not use their own minds. There are kids using ai to get to the top of their class and even graduate early. The work they do is not from them. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Ruben	garcia	We can survive without ai but can't survive without water ai will take up tons of water and land as well as releasing tons of carbon into the air we breathe	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Anonymous	Anonymous	The environmental impact of Project Jupiter would be devastating to the communities of New Mexico and the ecosystem. As we know, it'll release 10 million tons of greenhouse gases. Additionally, fuel cell technology has never been deployed at this large of a scale. Which ONE THOUSAND times larger. And the hazardous waste that fuel cells generate like sulfur contaminants? Bloom has already been fined for before, so why should we trust that they'll handle waste properly now? - NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Sincerely, Anonymous. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes	8/17/2026
Celine	Wallis	My name is Celine Wallis. I have many climate concerns for project Jupiter. Firstly, Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This does not represent NM's climate goals at all. Please save our environment and our community water. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Santina	Salavagione	Detengan el proyecto Jupiter por el bien del planeta! Los datacenter consumen cantidades meseanincas de agua para mantener sus servidores funcionando, no se les debería permitir construir más hasta que encuentren una alternativa sustentable que no implique grandes daños al medioambiente ni a reservas naturales, localidades, etcétera aledaños a su construcción	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive	Yes						8/17/2026
Tessa	Rodriguez	I think that this is an unnecessary and unethical advancement and many people agree with me I do not support the fact of this happening. If you decide to have AI data centers that release things into our atmosphere, carbon dioxide, which we know is a green house gas that traps the heat that we need to escape our atmosphere why not find a better solution to help you with your system than destroying our earth with it. This is the only planet we have that we live on and the more you harm it the faster it dies. This center is not good for the environment and we deserve to keep our beautiful green and blue earth the way it is instead of destroying it bit by bit for human consumption. We people have enough and more of whatever we need, we go above and beyond our needs which leave our earth to provide for those needs and wants. Because unlike animals the purest who's minds haven't become consumer driven like us only take what they need and if they have more than what they need they leave it to share which is not what us people do. Maybe we donate once a while and we try to give back. But giving back to the earth is the most important and taking care of it. And your part in that is to consider my opinion on this and the many others who don't want to speak up but have this feeling inside their heart that they want to help. And this data center is not the right move to a cleaner healthier earth and progressing a device that humans use does not develop us. I believe it even degrades us into not finding out ourselves and learning. Kids depend on ai for school and in which they in turn learn nothing useful and focus their time on all the bad things that they don't need to be doing. There are so many reasons to not build this but let's focus on our earth and keeping it safe and I hope you have something in whoever is reading this heart to help our earth actually become a better place and help the people and animal who inhabit this earth to live long and prosper. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Nyssa	Licari	Dear NMED staff, My name is Nyssa Licari. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County for the following reasons: Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The proposed "micro" grid has a 2,462 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana county near the site have not been properly notified of this air permit application request. NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. What happened to the public hearing the state Air Quality Bureau recommended on the previous applications that the industry has since redacted? NMED should not overlook the overwhelming community concern expressed in the last public comment period, which still applies to this same project.I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Sincerely, Nyssa Licari	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Kiona	Watkins	Dear NMED staff, My name is Kiona Watkins. I am writing to you because I am concerned about the risks and harms Project Jupiter poses to New Mexicans and the world as a whole. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As a graduating senior of the class of 2026 going into college, I am constantly stressed out about the state of our world. With climate change especially, the way we live today is at major risk. This is especially true for water scarcity and AI data centers. I remember being taught in school projects on how to save water, not waste because people around the world don't have the access to water that I do. Now, I see corporations wasting all the water that 13 year old me focused and challenged others to save. They use it to cool their AI data centers. The number of people, towns, city's, who experience water scarcity is growing. This is so much more prominent in the places where data centers have been built. Water is undrinkable, brown, and/or not even available. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Kiona Watkins	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes		Yes	8/17/2026
Therese	Thomas	I am a resident of Las Cruces and I am asking that you deny Yucca Growth Infrastructure's air quality permit. After the rejection of the previous air quality permit, a switch to Bloom fuel cell technology has been proposed, but according to one of Blooms' own representatives, whom I spoke with at the Project Jupiter Job Fair (which was disappointingly put in place of a real public hearing), the reduction in pollution will only be 21% over the rejected technology. It will still add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. This is a particular insult to the Santa Teresa community which is still suffering the multi-generational impacts of the ASARCO plant! The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. Our health and safety are worth more than the profits of out-of-state corporations, particularly at a time when so many other protections at the Federal Level are being stripped away in the unprecedented power grab and giveaway to powerful corporations by our current US Administration. And this says nothing about the still largely secret intended use for the AI the proposed center would serve (military, population surveillance, and efforts at mass control?) Our health and precious natural resources are not worth making billionaires into trillionaires while the rest of us suffer under the iron heel. Elected 'Democratic' leaders should be ashamed of themselves for allowing money to corrupt the public's will and well-being, once again. And this time it's deadly serious. Take this opportunity to make things right and deny these permits. If further deliberation is needed (it shouldn't be), a public hearing in Santa Teresa is non-negotiable.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Angela	Anonymous	Dear NMED Staff, My name is Angela, and I am a resident of Las Cruces, New Mexico. I am writing to express my opposition to Project Jupiter and to respectfully ask the New Mexico Environment Department to deny Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I believe projects of this size should only move forward when their environmental and public health impacts are fully understood. In this case, I do not believe enough information has been provided to demonstrate that nearby communities will be adequately protected. My concerns include: * The proposed fuel cell-powered microgrid would continue to produce greenhouse gas emissions and other harmful air pollutants. * The technology creates hazardous waste, and there is still uncertainty about how that waste will be managed over the long term. * A fuel cell system at this scale has not been widely tested, making its potential impacts difficult to predict. * Residents living near the project could experience poorer air quality and other environmental consequences. For these reasons, I respectfully urge the New Mexico Environment Department to reject the air permit application for the YGI Microgrid. I also ask that the department hold a bilingual public hearing near the Santa Teresa community so residents can better understand the project, ask questions, and provide meaningful public input before any decision is made. Thank you for your time and consideration. Sincerely, Angela.	1	Merged Document	No	[redacted]				Yes	Yes	Yes	Yes	Yes	8/17/2026
Evalynn	Kettering	The air quality permit should be denied. As Bloom Energy has had constant history of illegal dumping of hazardous waste. This does not include the impacts that Project Jupiter will have on the entire New Mexico population. The public should be given 60 days to review and comment. If the permit is denied a hearing needs to be held in Santa Teresa, in both English and Spanish. By approving this permit you are enacting government environmental racism. Perpetuating the notion that us New Mexicans and our land are for sale and expendable. Our lives the life and well being of our land and animals that depend on it, are never for sale! Project Jupiter is masked as bring more opportunities to New Mexico, but when our water supplies are depleted by the second and our air becomes poison, what happens then? What happens when your own people are in hospitals when cancer rates rise. You will leave a scar amongst the community the land and the overall health of New Mexico. A scar that will never heal a scar you created with your own greed. I am not just urging you to decline the Permit I am telling you to decline it. For the well being and safety of all New Mexicans, all including the land and all of its inhabitants.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Sabina	anonymous	project jupiter should stopped, they want us to trust in the project jupiter developers that building one of the largest data centers in the world, wouldn't threaten the limited water our communities depends on to survive. project jupiter will release 10 million tons of carbon dioxide annually affecting global warming. we were doing fine without AI and its massive carbon dioxide release along with water consumption, there is no need to add more carbon dioxide to this earth and water consumption communities need to survive. STOP PROJECT JUPITER FROM HAPPENING!!!	1	Merged Document	No	[redacted]			Yes	Yes					8/17/2026
Camryn	Walker	Project Jupiter is a completely unnecessary addition to our environment. Generative A.I is and will always be useless and only provides a lazy way in a world that claims to value hard work. The location in which this data center is to be built is already under federal recognition a nonattainment zone. Bloom Energy has a voluminous history of illegally dumping damaging waste. All these things should give reason to deny the air quality permit. Greed is one thing, but if we keep damaging the planet especially to this extent then all money these people think will be earned will mean absolutely nothing. The earth may be close to climate change beyond restoration but that does not mean we need to speed up the process. I urge you to deny this permit, allowing this to happen means the suffering of an already damaged community, as well as the earth itself. No good will come from this	1	Merged Document	No	[redacted]				Yes	Yes		Yes		8/17/2026
Anonymous	Anonymous	I am a resident of Santa Teresa, NM and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I have lived here with my family for many years this is my hometown and it will be the next generation's hometown as well. We need to protect our land and the earth's resources so that we can continue raising the next generations to come. We need to secure a safe and secure future for them. The future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time polluted zone would be nothing short of blatant environmental racism. This was all done without consideration of the people who own property in this area. These greedy corporations have been getting away with this all across America. Our cities are considered "Sacrifice Zones". Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. It is unacceptable to invite a new source of hyperscale air pollution into our communities. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills. How is that this company still moving forward with these plans? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. Not only am I worried about the air quality but also our water resources. I cannot remember the last time I drank water from our indoor faucet. A family member who use to work for the local water company tested our water and found it to be contaminated and ever since then we have NEVER drank water from the faucet. Now our air quality is something even more to think about. This is not normal and a huge threat to human life. Again these greedy companies see our people and the land as a "Sacrifice Zone" which gives the impression that we are considered below them. So with that said the community demands the following: - An additional 60 days to review and comment on the air quality permit so community members can participate equitably. - The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. - A public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually if the permit is not denied. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Paris	Williams	We don't want or need a data center, our water, our communities, and our animals are being harmed by this. The noise it produces is noise pollution and causing animals to produce stillborns. The community 60 more days to review and comment on the permit, so people can equitably participate. The permit needs to be denied, knowing Bloom energy's track record of illegally dumping hazardous material. And if it isn't denied, a public hearing needs to be held, in both Spanish and English, with virtual attendance as an option as well to be accessible to all. Approving the permit is government assisted systemic racism, targeting an already impacted community that doesn't have air quality meeting government rules.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Sydney	karnes	I live in santa fe new mexico, though most of the time I live in Albuquerque at the UNM campus where I attend college. It is absolutely unacceptable that a power plant of this size and hazard be built in New Mexico. I love this state because of its beautiful land and sky, and the Yucca Growth Infrastructure's gas-powered fuel cell plant would put at risk all that we enjoy and celebrate here. The plant would contaminate the air for which people for hundreds of years have flocked to New Mexico. I am scared of what may happen to our beautiful state if this plant is constructed. I wanted to raise my children here, but if things like this keep happening I dont believe I'll be able to do that. I'm too afraid for the health and wellbeing of myself, my children, and my children's children to subject them to the pollution and danger that has infected the land. Our families health and safety should be a priority over profit from out of state companies that are trying to drain the life out of our gorgeous state. These permits must be denied and you have to protect us and our state. Please.	1	Merged Document	No	[redacted]					Yes	Yes			8/17/2026
Anonymous	Anonymous	I am a resident of Michigan and I demand that you deny Yucca Growth Infrastructure's air quality permit. This permit will bring devastation to the environment, polluting at even greater levels than we already do. The gas plant's toxic emissions and carbon dioxide pollution will unleash suffering on the people, animals, plants, our entire planet. The residents of New Mexico will feel uneasy knowing that the stability of their lives depends on this. Their air quality has already been consistently sub-par and unsafe since 2000. It is unacceptable to invite a new source of hyper-scale air pollution into their communities. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	This "project Jupiter" will do irreversible damage to both communities, the environment, air quality and water quality. There is no such thing as a sustainable way to build this horrible horrible structure. Why are you allowing this to continue and erode our earth? Have you no compassion or empathy?! This should be stopped immediately for both the future of our planets health and the quality of life for everyday people. Please stop this horrendous projekt. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Mckenzie	frakes	Whilst they claim they will not use 'drinkable water' they are taking directly from the community water line still impacting the community water line by taking 11 Million gallons. And the data center will still use 20,000 a day, claimed to be office usage, this amounts to 167,000 gallons a year. They also claim they will reduce green house gases by 30% but even with that will still dump out 10 Million tons of green house gas. These circumstances will largely affect the surrounding communities health, and create an almost unlivable environment. I am a Fourteen year old girl writing this to try and save my future. If more of these data-centers are built by time im about 25-30 our earth will be ruined and this is the only one we have, please reconsider building this and using my future for your paycheck. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Chantel	Montoya	To protect and restore NM's environment and to foster a healthy and prosperous NM for future generations. More money should be poured into restoring the land and providing a more prosperous place to live for human and all living creatures. Money should also be poured in indigenous planting throughout the state, not into unwanted AI or new-world pollution. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Dilara	Okal	stop this project immediately. it's not okay. the earth is going to collapse, we need to care for our home that we live on. STOP IT NOW. it's not just us who live on earth, it's also innocent animals and species. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	Dont build this center the effect the the environment and the communities nearby or across the world will be detrimental and absolute. There will be no repairing available after this disaster. News such as this reaching and affecting the population of other countries from across the globe is enough of a reason to understand this isn't an isolated or 'selfish' concern, but a genuine one from humanity to those who can impact negatively much stronger than we can and have the ability to do positive much more right now than we can in out hands alone. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Abigail	Mcdaniel	There is no planet b, we dont have the technology to transfer to another planet, and even then no one would want to. This is our home and we have to protect it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026

Paulīne	Petrauska	DONT let this happen! Climate change will be IRREVERSIBLE after 3 years and this will speed it up tremendously they have caused enough damage to our planet already dont let them cause more. They dont need more money. We cant eat or drink money. STOP THEM BEFORE ITS TOO LATE. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I am not from New Mexico, but I don't need to be to know that the effects of building a data centre of such size as Project Jupiter will cause irreversible damage to our planet as a whole. There are already tons of issues from climate change all over the world: wildfires, rising sea levels, air pollution, animal extinction, even people dying from the heat or it's effects on the environment. What about a data centre is so important that we are willing to throw our quality of life away? Nothing. The Earth is only getting warmer. Scientists believe we only have three years to fix what climate change has done. A data centre will only push us past the point of repair. We should not have to beg for help to save our planet. It should be something everyone is willing to fight for, not throwing the chance away to make more money. Money means nothing if there is nothing left to even use it. The air quality permit should be denied- there is a history of illegal dumping of hazardous waste by Bloom Energy. If it is not denied, there should be a public hearing held in Saint Teresa, virtual and in-person, to allow the people's opinions to be heard. Doña Ana County is already affected enough by pollution, the air quality already does not meet standards. A data centre will only make it worse. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I am a resident in New Mexico and I highly am against this center being built as it harms local communities, and it will take so many things away from people as it will reduce quality of living. Why do we need AI if we have survived so long without it? Furthermore, the money spent on this center could be better spent to help people instead of harming, many people in New Mexico are suffering and this center only brings more of it. These centers being built that I have seen effect people around them with reduced water, pollution, and waste that this data center will create and I guarantee that the person/company building this center will not care about the environmental impacts this center has and not do anything to fix its issues. People will suffer the consequences of this center being built and I think everyone should be against this as it effects people, creates pollution, and effects the future. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Renee	P	I strongly oppose this data center and the irreparable damage it will do to our already struggling environment. Generative AI serves no purpose other than a waste of money, resources, and intellect. Do not build this center and instead put this money into keeping our planet habitable, not making it worse. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Gwen	Feisst	Please remember your goals of protecting New Mexico and New Mexicans and the environment we live in. Please give enough time and possibility for people to learn about the project in their language and comment. Please deny the air quality permit. People in Dona Ana County are already suffering from bad air quality. Don't allow a company with a bad reputation to bring more damage to our state. Thank you for protecting New Mexico!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Emily	Hernandez	Humans have lived without AI centers for thousands of years. We haven't been able to live without water though. So why take that away? In the end it affects the wildlife, you, and me. Your money won't be valuable when you're fighting to find droplets of water. When you die of dehydration you'll be wondering, why? Because it starts with one data center, then one becomes 10, then 10 to hundreds of thousands. End AI centers, save our planet, communities, and people. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Savannah	Steadman	For years now I've watched Ai tear down communities and overall the ecosystem of America.not only is Ai horrible it is mainly the "people" behind it, these "people" try and justify poisoning the air by 1.Ai is "helpful",2.there money ,there Choice. The whole idea of Ai was created for MONEY like everything else in this world. YES Ai can be helpful to people with disabilities,trouble speaking , hearing or even Ai that can help you cook food. But in no world should we have have a data center the size of half a football stadium. An estimated 10 million tons of carbon dixiode will be polluted in our air,I want you to really let that sit in 10 million tons of carbon dixiode.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive							8/17/2026
Makayla	Bishop	Fuel cells create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Victoria	Andrade	Youre hurting our environment and making our one and only planet a harder place to live with more problems to fix or that will be unfixable in the future. Youre not only affecting the communities that your putting these things up in and destroying them you are also destroying our wildlife and nature and destroying the planet we live on. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Juniper	Rennells	My name is Juniper, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. AI Data Centers have no place in our society, especially one as massive as this one. This Center will not bring opportunity and the promise of future, but devastation, destruction, and ruin the future of this community and our country as a whole. It will not lead to jobs, opportunity, or do any good for anyone but the elite that don't live like the normal population. It will be devastating to the local community, air, water, and noise pollution will ravage this community. Leaving them vulnerable and without adequate resources. Which is immensely concerning considering how close this proposed center is to schools and day cares. Which also is systemic racism, since this will be targeting a predominantly Hispanic population that has already been greatly impacted by environmental pollution. It will destroy any environmental efforts New Mexico has made. Furthermore, an AI Center on this grand of a scale will certain impact our entire country and its air and water quality (if not our entire planet). For the future, for the environment, for our people- reject Yucca Growth Infrastructure's permit! Thank you. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Jasiah	Anonymous	We only have one planet. Data centres are killing the earth. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. La misión del Departamento del Medio Ambiente de Nuevo México (NMED) es "proteger y restaurar el medio ambiente y fomentar un Nuevo México saludable y próspero para las generaciones presentes y futuras." La Oficina de Calidad del Aire del NMED "protege la salud pública de los neomexicanos y la belleza natural del estado al prevenir el deterioro de la calidad del aire." Lo que puedes incluir en tu comentario: Se debe otorgar al público un plazo adicional de 60 días para revisar y comentar sobre el permiso de calidad del aire, a fin de que los miembros de la comunidad puedan participar de manera equitativa. La solicitud del permiso de calidad del aire debe ser rechazada debido al historial de Bloom Energy de tirar desechos peligrosos de forma ilegal. Si el permiso no es rechazado, se debe hacer una audiencia pública en Santa Teresa, tanto en inglés como en español, y con la opción de participar por internet. Aprobar este permiso sería racismo ambiental apoyado por el gobierno, porque la gente del condado de Doña Ana ya sufre demasiado por la contaminación ambiental. Por años, el condado de Doña Ana ha sido llamado una zona de 'incumplimiento'— esto significa que la calidad de nuestro aire no cumple con las reglas del gobierno federal.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Holiday	Anonymous	I live in California and I don't know a lot about data centers but I know how harmful they are to our planet. We can live without AI but we can't live without water. These data centers will cause more climate change than we already experience. It will make summers hotter kill animals and eventually us. I hope that we will stop the usage of AI in the next few years before our actions become irreversible. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Sarah	Anonymous	Project Jupiter is a disgusting waste of community water that serves no real benefit to the people. We do not need AI and all these centers do is produce more carbon dioxide that heats up the earth and pollute communities with constant noise. Additionally they take up drinking water to cool. WE DO NOT NEED AI. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Anahí	Serrano	We are currently experiencing a global "heat wave". we do not need more heat and waste being thrown into the atmosphere. not to mention the damage this would cause to wildlife. we need to protect our planet. we do not want or need a data center. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Alaysia	Crooks	This dependancy on AI needs to stop. We've lived years without it, and now with projects such as Project Jupiter, we're only assuring people that AI is a needed tool when it is not at all. It's terribly harmful to our environment, and many communities are already suffering because of it. If we allow this big of a data center to be created, the effects on the environment and society would be irreversible. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Mackenzie	Loftus	I do not want this huge data center anywhere near New Mexico. Our water is meant for our citizens and not big tech. We need our water to live, we do not need AI and surveillance to live. We don't want this. Our river is already dry, it can't handle another source drinking up all our water. New Mexico already has enough issues we need to face, water should not be one. We've seen what data centers do to people's water, making it dirty and disgusting while the data center takes all the clean water to cool the servers. It's not fair, it's not right, and it's disgusting that they want to force this on us. This will not make our country better nor will it make our city better. Data centers are horrible for the environment as well, we don't want them here. Our land and water belong to New Mexicans, not big tech giants who don't care about us or our water or environment	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Max	Adelman	Currently I'm 16 when I grow up and be an entomologist but my dreams of working with bugs will be at risk due to these data centres every year they produce so much carbon emissions that are heating up our planet, bugs are a cold blooded species they need the heat but with the extra heat means the bug population won't be able to be kept in check that means invasive species will be able to breed more the invasive species will eat our crops and force other bugs out of their habitats. This isn't the only side effect of the data centers they use so much water and turn it into undrinkable water this water not only effects animals habits it also effects our day to day lives. When I look twords the future im no longer hopeful, im scared im scared The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Hallie	Thayer	Dear NMED staff, My name is Hallie Thayer. I am a New Mexico resident, living in Albuquerque, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. It would still produce a high level of greenhouse gas and toxic pollutants affecting surrounding communities. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Hallie Thayer	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
William	Lopez	Dear NMED staff, My name is William Lopez. I am a Colombian resident, living in Bogota, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am in the early stages of my life, and like many people of my age around the world, we are deeply concerned not only about our future, and therefore that of humanity, but also about the future of planet earth itself. We devote a large part of our time to learning about and taking action on this and other related issues, which is why we are aware of the social, economic, and, above all, environmental damage that Project Jupiter inflicts on nearby communities and the world. The project's proposed fuel cell powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants. - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology or a centralized waste system has never occurred at this scale. - Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, William L.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Emma	Sanders	As a young New Mexican born and raised I speak heavily against Project Jupiter. Yes it will bring few jobs to New Mexico however it will also take away jobs from New Mexicans as well. The environmental impacts will drastically affect our already low water supplies. My father works for the state specifically with water laws. So I have grown up knowing how important and limited our water sources are. I beg to prevent this project from going forward it will turn our gorgeous state into a truly dying desert	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Allison	Velazquez	Please, do not go through with this. Everyone in America (maybe even the world), will suffer. I live in a big city, and our air is already extremely contaminated! Late at night, almost 95% of the time, I cannot see the stars. This is because of how much pollution is in the air. Gases and toxins poison innocent people every single day, leaving people sick with diseases and pneumonia. What is the goal in building a new data center? We have about 4 HUGE ones soaking up energy, releasing gas, AND guzzling down our water supply. We need to think about the bigger picture. Technology is advancing, and many of us LOVE that. But will we love extreme thirst and dehydration? Will we love watching the people we love most suffer and die because we wanted to use AI? Will we love watching our world end right infront of us? Getting sucked up in some black hole, just because we wanted to create images? I don't think so.	1	Merged Document	No	[redacted]			Yes		Yes				8/17/2026
Lazare	Goderdzishvili	This project will be really bad for the enviorment and in about an year it will erase all of the climate change progress we have made for over two drcades. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Jasper	Estrella	This will affect so many people negatively. We need to protect the environment and not destroy it. It will affect people, animals and the environment as a whole in such a drastic and dangerous way. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Victor	Soto	While I am not from New Mexico, Oregon is facing similar challenges as a data center is planning to be built in Forest Grove. People need a healthy envrioment to stay healthy. Every person needs water to live. We dont need AI. Average day people were fine without it. It is an unwanted welcome in our lives. Protect the scarce land we have, protect our homes across the country. Children don't deserve the future being build. Dont build this data center The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Camila	Carrillo	Dear NMED staff, My name is Camila . I am a Colorado resident, living in just a state over, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. As a young woman, the fear of my future and anxiety takes over everyday. Not having a future with consistent resources and not being able to live a normal life just because of the danger of data centers taking resources for artificial intelligence. We can survive without AI, we will not survive without the earth. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	Merged Document	No	[redacted]				Yes	Yes	Yes		Yes	8/17/2026
Kätriin	Anonymous	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is a disaster waiting to happen and a nice quick way to kill us all. We do not want nor need AI. This a disaster waiting to happen and a horrible idea, a nice quick way to kill off all of us. We do not want nor need AI. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	We don't need Ai, We don't need more Data centers, what we need is a healthy planet to survive on, and by building more data centers we are actively taking that away. You won't care until we run out of water, food, and other resources completely. Don't ruin other peoples future because you think this is the best for yours. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	We are ruining our Earth. It won't stop until the last tree has been cut down, all the food sources will be gone, our clean water is polluted, and many more. So I'm using my voice and speak up so I can help before it's too late. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	8/17/2026
Anna	Vendrely	I am very concerned about the environmental impact of this data center. Specifically related to the impact on air quality. This company has been anything but transparent and at this point is not to be trusted. They are spending a lot of money to convince people to let them come into our community and cause harm. It's disgusting.	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026
Anonymous	Anonymous	We don't need this stupid data center what the hell is wrong with you guys don't we already have enough it's making the weather extremely hot and cold almost unpredictable and it's taking our resources, ruining animal habitats, and could permanentlh ruin cycles! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Kendra	Mumaw	We have made it so far without AI, we do not need it now. If you take a look outside there is life. Life is the most amazing thing to ever exist, from the smallest insect to the biggest tree, all is beautiful. Project Jupiter will destroy so many life forms and make the temperatures even more hotter than they are now. The air quality will decrease in safety for all or most life forms, who will use the data center if everyone is dead? Project Jupiter shouldn't pass. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	8/17/2026
Macie	Giffen	The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]				Yes	Yes		Yes		8/17/2026
Jessica	Hernandez	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. THINK ABOUT THE PEOPLE!	1	Merged Document	No	[redacted]				Yes	Yes				8/17/2026

Jacqueline	Bell	I am a born and raised New Mexican fourth generation, and when I was little, I found out we were in a drought. Every single time it rained I would ask my dad if we were finally out of the drought and one day I just stopped asking. we do not need a data center in New Mexico, I am an avid hiker and skier, and what we're seeing right now, empty creeks that I've never seen an empty before, the worst ski season, water restrictions on our communities, currently where I live there is a water restriction. How are we supposed to water our gardens in this time of war? When I was in middle school in New Mexico we learned water is vida, please respect the fact that allowing something to use as much power as the three largest cities in the state combined is not ok. I normally do not write this much, but please, this is important, New Mexico is one of the most beautiful states period, please give it a chance, please. Dying as I write this, please. I always brag about how we have the cleanest air, please realize that air and water and more important that anything you could get out of this "deal", what deal is it if we are left with nothing.	1		No																			
Emma	McClard	I value the environment, I value people. Such a large data center will lower air quality for the 9 year old struggling with lung cancer, it will ruin the water for the young family who just moved in, it will poison the soil and the plants that grow there killing birds and local river and lakes or any form of water nearby, it will ruin the water quality for the people living their. This will have global negative effects for nature by our earth, and animals but for us. Children will suffer, it will make the climate hotter and hotter until children can no longer go outside and people can no longer bike. It will make it so that the local kids playing tag can't drink out of their hose and the dog mom can't spray her dog. It will poison the water, the sun, the land, the air, the food. This will harm everyone, I care about people, and children, animals, trees, worms. At also has major negative effects on the physiological growth of children, adults, and the way society works. It makes people violent, and lonely, and isolated. It harms any form of growing community greatly. I care about people and nature and my planet so I don't think this project should go though because go be pro AI is to be Anti human and Anti earth. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Mirsad Purivatra	No			Yes																	
Victoria	Muse	Please, for once, just think about more than what is going to go into your bank account. 10 million tons of carbon dioxide annually for a data center? You know it's common for carbon dioxide to stay in our atmosphere for 300 to 1000 years. You know how much heat 10 million tons of carbon dioxide annually will produce on our planet, which is still trying to heal from the effects of the global warming surge back in the 2000s. You know how many waterways and rivers will dry out because of that heat. You know that New Mexico has the lowest water-to-land ratio in all the states and is already threatened by contaminants, both artificial and natural. You know that over 6 million people in Mexico and Texas live off of waterways like the Rio Grande. You know, there will be children forced somewhere to learn while a data center emits noise pollution so loud that the schools that are almost 5 miles away would still be able to hear it. You know how many native animals and plants will have to suffer as if the planet weren't their home too. You know all of this and still fight to make building a data center the right thing? What is the point of it when people get sick, injured, or even worse, die? Don't you already see the destruction and hurt data centers are causing, and your responses as someone who is promising to "invest in the environment" is to make the largest one of these centers. This planet, this floating rock, is all we have. I wouldn't be thinking of AI tools if I were fighting heat stroke, dying from dehydration because there was no water, or hearing about the next species that has gone extinct because it had lost its natural habitat. This all may seem like over exaggeration to you, but it's a life sentence to others. Just take a real look at who you are trusting. Bloom Energy was fined for improper hazardous waste handling in Pennsylvania and Maryland, and yet we are trusting them to build an "environmentally friendly" data center. Doesn't that just sound ridiculous? This isn't to shame anyone but to truly open your eyes. This is real and going to happen if we don't do something about it. We can no longer just sit and wait because this will affect our planet in a way we can never fully turn back when it is done. I'm sick and tired of hearing people point out these important issues as if they are something that is too late to fix, as if we are a lost cause, as if this one earth isn't our home, basically putting a finish line in the middle of the race. So I beg of you, fight, write more comments and posts, oppose the spread of misinformation, protest, learn and share, do whatever you may to make them wake up and understand this is our chance, that we are real voices, and we will not finish here.	1	Mirsad Purivatra	No			Yes	Yes	Yes			Yes	Yes	8/27/2026									
Solomon	Sledge	Who will benefit from the jobs they say this will bring when oracle wants ai to replace them all? This data center is projected to provide jobs. This data center is projected to kill our earth mightily slower than originally. Who will benefit when the land is trodden and sterile, the air and sun deadly, no peace or quarit to be had from the droning of machines powering computers that could log our every move. Machines built to ruin our world, an antithesis to all the life it infects. I am Solomon Sledge, a temp worker paid by Albuquerque Community Canvassing, which was given money by Oracle to link my neighbors, to Nationwide and force people to be against their lives. Do not let this data center exist. I resent all that the center stands for, and all that the companies that bred me does. Sincerely, Solomon Sledge	1	Mirsad Purivatra	No			Yes	Yes	Yes		Yes	Yes		8/27/2026									
CHLOE	GARDNAIR	"NO DATA CENTERS IN THE DESERT. THE FUTURE DOESN'T WANT DATA CENTERS.	1	Mirsad Purivatra	No	No	Oxzone Non-Substantive								8/27/2026							
		The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste & SOUND. THIS IS NOISE & AIR POLLUTION.																					
Abigail	Anderson	I moved to New Mexico in 2019. I have grown to love the desert and everything about southern NM. I am currently going to school at NMSU in Las Cruces to be a history major. I cannot stand idly by while project Jupiter threatens our environment even more. NM is the desert, we have limited water as is. This summer temperatures have already soared into the 100s and it is barely July. This data center is going to make problems NM unlivable. We do not have the water to support this. Even if we did, I wouldn't support it. We have sunrise without AI for hundreds of years. It does nothing to improve my quality of life. It honestly just makes it worse. I do not want to lose the home I have come to love. I do not want to see Southern New Mexico turn into an unlivable wasteland.	1	Mirsad Purivatra	No			Yes	Yes	Yes		Yes	Yes		8/27/2026									
Isabella	Bonura	I vehemently oppose this entire project, I truly feel our land is being taken advantage of. The little resources we have should go back to the communities here, not billionaires trying to profit from our land. This will put such a heavy burden on our state, they are dishonest about their agenda and are creating fraudulent support for it. We need to conserve what we have for us, and our future generations. The first step is by denying the air quality permit. If it is open information that Bloom Energy illegally dumps waste, we should not be burdened with it. Not only this, but the data shows it would create a massive amount of air pollution for this state. If you decide to go through with the permit, I am positive plenty of community members will have something to say about it.	1	Mirsad Purivatra	No			Yes	Yes						8/27/2026									
Mackenzie	L	We only have one Earth, constantly changing and evolving. With the rapid development of AI, it's begun to change for the worse. We are privileged to be able to live in the moment we are now, and it's unfortunate to having new, cutting it a privilege. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Mirsad Purivatra	No			Yes	Yes						8/27/2026									
Elizabeth	Chuclupez	I would like to formally ask to stop the construction of this data center that is not only not necessary but also could endanger fresh water resources while also destroying the environment. Other than the clear changes that this Open AI center brings to the environment, it is also important to consider the negative changes AI has to the community, an example being how dramatically the educational system has changed. As more students have access to AI technology, they begin to rely on not only what the AI responds (which at times is not correct) but also lower critical thinking skills as they are dependent on it. Think of these changes and STOP Project Jupiter.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Josetyne	Ruiz	I want to live in a future where I'm not worried about the air quality my future kids will be living in or if will have clean water to shower in. I want to live in a state where we have clean free water accessible and our animals and rivers are being protected. We all know it takes an immense amount of water to generate the heat and a.c a local we are struggling as it is already. I don't want our beautiful Rio Grand to be something from the past I want it to continue living and for my kids to grow up fishing in it. It killing our environment and it's killing us.	1	Mirsad Purivatra	No			Yes	Yes						8/27/2026									
Summer	Formstead	Why is it that we think this project will "thrive" the human population? The earth was healthier and thriving YEARS ago before these were invented. I will make sure my children have an earth where they grow up. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Mirsad Purivatra	No			Yes	Yes						8/27/2026									
Scarlett	Dooley	We are already in a drought and we are should be limiting water usage this data center will only make the problem worse, data centers do not need to be built in our communities at the risk of our land, water animals and people. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Rebecca	Dalton	I DO NOT WANT A DATA CENTER IN MY COMMUNITY DO NOT BUILD A DATA CENTER!! IT DOESN'T MATTER WHAT KIND OF ENERGY IT USES, IT WILL STILL USE THE COMMUNITIES RESOURCES AND PULLUTE THE AIR!!! DON'T RUIN OUR EARTH AND ENVIRONMENTS THAT WILL DIRECTLY AND INDIRECTLY AFFECT OUR COMMUNITIES!!! DO NOT BUILD THAT STUPID DATA CENTER!!!	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
		The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.																					
Chinaya	Fey	Despite not living in New Mexico where this is taking place, the effects of this data center will not just affect the people living so closely to where it's being built but the environment of NM as well. Those effects will certainly impact the rest of the nation and our climate as well. I specifically want to amplify the voices of the direct residents of New Mexico, in which the construction of this data center will harm by providing a comment of their own. A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scales is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED allows group testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and whatever were not told whether these stacks were even done on-site or during peak temperatures, we can safely assume the applicants cut corners (were sent in as drafts) to attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical inevitably of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within a mile of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you. Please heed the outrage of the average person so visibly in opposition to AI and the construction of data centers. We didn't ask for it and we don't need it.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Diana	Lehr	Fuel cell technology at the level needed for this size project has too many unknowns. What is known is that this use will release tons of carbon dioxide into the air as well as other toxic chemical pollutants and resulting health risks for neighboring communities. Please add 60 days to the review & comment phase! The public is already very unhappy how quickly Project Jupiter was approved by the Doña Ana County Commissioners. Please deny the air quality permission application given Bloom Energies history of regulatory issues. Please hold a public hearing in Santa Teresa.	1	Mirsad Purivatra	No			Yes	Yes						8/27/2026									
Shirline	B	Stop using AI. We don't need datacenters more than the air we breathe. More than the water we drink, more than the environment and all the inhabitants that occupy that space. It shouldn't be correct to see what will pass our scope of what we as the people should tolerate from money-hungry, selfish, egotistical monsters that only think of their "gain" without considering and accommodating for the MILLIONS of lives they are crippling. This is public land. We have the right to refuse. So we should band together and say NO to the corruption of our ONCE habitable place.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
		The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. Alex	vick	Project Jupiter will RUIN new Mexico and the world. The world is suffering and adding an AI data center in a desert town, and one that will use over 5 million gallons of water a DAY will forever ruin the world, please. I'm 17, I want to have a life and if project Jupiter gets signed off on I might not have one. Please do right, we need it to better, we don't need ai.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
		Please listen to me, hear me. I'm a real person, and I'm so scared. We will ruin our home, our children's home and our future. Please stop.		Mirsad Purivatra				Yes	Yes						8/27/2026								
Aliyn	Robbins	I am a resident of New Mexico and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I am still young but I do not want to see our safety taken away from us. Our future is under threat with this permit. I am young and don't know everything, but I do know I am not willing to risk my future for some project. We live in a desert and if you haven't noticed we already don't have water running in our river. By agreeing to this permit it will cause much more global heating. We have been at risk of unchangeable global warming. Our winter feel like summer and our summers just continue reaching extreme temperatures. It was also come to my attention that cracks is paying content creators to promote this project. This is a huge lack of transparency. I plead that you deny this permit for the safety of our residents and the future which are being stripped away from younger generations like myself. If we want to become better our actions most speak the same.	1	Mirsad Purivatra	No			Yes	Yes						8/27/2026									
Anonymous	Anonymous	Dear NMED staff, I feel that I must preface this by saying that I do not live in New Mexico, but as someone who lives quite close to it, I can't help but be concerned about project Jupiter, and the risks it poses not only to New Mexicans, but any residents of earth. And so implore you, New Mexico Environment Department, to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YDI Microgrid. If Project Jupiter were to go through, then, as I'm sure you already know, it would need a significant amount of water to keep from overheating, and considering that the planet is in a state of water bankruptcy, and that any rivers or lakes have already dried in New Mexico, this would only exacerbate water shortages. Next, climate change has been steadily, then rapidly worsening over the years, we, at the moment have already exceeded what use to be considered the "point of no return". If this data centre was to be built, then it would release 10 million tons of greenhouse gases per year, only heating our planet more. Also, this type of data centre is unlisted, there's none of the same size that it can be compared to, and with no certainty of its affects, the consequences of its existence could be much worse than previously anticipated. And, even if the rest of the world were to be unaffected, which isn't possible, this will negatively affect everyone in the area, children, adults, the elderly, the creation of this data centre would significantly impact their lives. So I ask of you, for the sake of New Mexico, the generations that will succeed us, the animals that roam the land, and the very planet itself, New Mexico Environment Department, reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YDI Microgrid.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Diane	Hauptegj	My main concern (of 2) about Project Jupiter is the water that would be used. There is a drought in our state the Southwest and we live in the desert! I'm also concerned about who would be getting jobs to work on this project? What is the plan for hiring local people? What targets do you have and how do you assure they are met? Lastly, the cost of electricity for individuals will skyrocket. Is there a plan to subsidize users? The project alone is using far more electricity than our largest cities combined. How much more will households pay and how will they afford that? Thank you.	1	Mirsad Purivatra	No			Yes	Yes			Yes			8/27/2026									
Raymond	Meyer	Like many of the other residents of Doña Ana County, I am dismayed at the manner in which Project Jupiter has been rapidly making its way past the necessary legal processes and governmental oversight with little transparency and minimal information for the public to observe. There is growing opposition to these data centers by many communities as the real implications of the industries' impacts become more clear. What is known is that the extremely large data center, Project Jupiter, will require a huge amount of energy. This massively large-scale energy production process will have severe environmental, public health and economic consequences but the full impacts are difficult to accurately quantify (https://hugh.harvard.edu/news/analyzing-air-pollution-health-economics-risks-from-ai-data-centers/). From what I have researched, it is known that the proposed fuel cell plant will produce a tremendous amount of air pollution. It will emit millions of tons of carbon dioxide and will release toxic chemical pollutants including cancer-causing chemicals (benzene), heavy metals (lead, arsenic, chromium) and other toxic compounds (e.g. sulfur). Given that the proposed location already suffers from poor air and water quality already, the addition of the proposed energy production will only worsen conditions for inhabitants and their environment. In addition, the energy company proposing the plant, Bloom Energy has a very poor history and is not to be trusted. It was guilty of illegally mishandling hazardous waste in several states and falsifying records. Therefore, Bloom Energy's air quality permit application should be denied. Thank you for considering my comments.	1	Mirsad Purivatra	No			Yes	Yes			Yes			8/27/2026									
Sylvia	Y	The area that we now call New Mexico (and especially southern New Mexico) has a history of being exploited, whether that be from Spanish colonialism, American westward expansion, or from the invention and testing of the atom bomb. Now we are seeing this happen with massive data centers being proposed and built all over the desert. The metro area that includes Doña Ana county, El Paso, and Juarez is currently the 18th worst in the nation for ozone pollution. It is insane to think that inviting a new source of hyper-scale air pollution into our communities would be at all beneficial to our community. We can all already see and feel the effects of human caused climate change. Adding even more carbon dioxide alone would be detrimental and would make our summers even hotter and our monsoon seasons even shorter. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping dangerous and undisclosed chemicals into our public landfills. Doña Ana's air, fuel and continues to face an illegal dumping epidemic so how can we be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Anonymous	Anonymous	The health and safety of the community that me and my family are apart of should be worth more than the profits of out-of-state corporations. The only option moving should be to deny this air permit, a public I am a resident of Rio Rancho and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I "live" here because I shouldn't that be enough? I want to continue living here and never raise my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 18th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2005. We are already breathing some of the most compromised air in the country. It is completely unacceptable to invite a new source of hyperscale air pollution into our communities. My family's health doesn't exist as a matter of fact, "EVERY NEW MEXICANS'" health doesn't, and safety should be worth more than the profits of out-of-state corporations! The only defensible options moving forward are to deny this air permit or you must hold a public hearing in person in Santa Teresa with a component for virtual participation. Materials and the hearing itself must be translated into Spanish and meet any other accessibility needs requested by community members.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Anonymous	Anonymous	Representatives are wasting taxpayer on supporting businesses that will not benefit local citizens. Representatives are especially showing that the environmental impacts are an after thought. Depleting local water resources and increasing local pollution, while claiming it will be powered by no cost "clean energy". Meanwhile the claims repeatedly fall short of their other claims.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Gloria L	Hacker	I am very concerned about Project Jupiter's proposal to use fuel cells for its generative power. I am concerned about the environmental effects of the emissions released, methane gas, & CO2, gases contributing to global warming & climate change, at a time when we should be curtailing our dependence on energy derived from extractive industries. We the people are concerned about the quality of the air we breath. there do not have this air quality permit. There are too many questions from remain unanswered. There are many types of fuel cells & the type that they proposed to use can make all the difference as to how effective they are in powering this giant facility & at what cost to our health & to the health of the environment.	1	Mirsad Purivatra	No			Yes	Yes						8/27/2026									
Anonymous	Anonymous	I believe this project is a threat to our environment and community. It will cause pollution that will impact our health. We need a couple more months to review the air quality permit application. The application should be denied given Bloom Energy's history of regulatory issues. If the permit is not denied, a public hearing needs to be held.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Katherine	Boer	The people do not want AI data centers, especially not in drought prone desert regions. Add 60 days to the review and comment period for the air quality permit application so the voices of the people can be heard on deny the applications outright. People over profit!	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
Anonymous	Anonymous	This is a horrific waste of time, energy, and money for something no one wants that will cause significantly more harm than good to the surrounding area. Stop killing the planet. You cannot not money.	1	Mirsad Purivatra	No			Yes	Yes			Yes	Yes		8/27/2026									
		The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.		Mirsad Purivatra				Yes	Yes			Yes	Yes		8/27/2026									

Bahamon	Grant	I am an out-of-state student at the University of New Mexico, and I strongly oppose this data center and the approval of the Yucca Growth Infrastructure's air quality permit application. The 12T carbon emissions are already a leading factor in the current climate crisis and the heatwaves globally killing vulnerable, and typically brown, populations. If this application is approved, I would only further rising temperatures. With the amount of energy needed to heat the fuel cells - one cell requiring 5,475 degrees Fahrenheit - and the project releasing an additional 30million tons of carbon dioxide into our air, the approval of this application would be simply foolish. This would not only be catastrophic for the poor and brown community members of Dona Ana county who cannot afford to move away from this dangerous plant, but the whole of New Mexico and the United States. Only a few hours away from Dona Ana county in Albuquerque, I worry that the new home and community I've built will be killed by the reckless and money-hungry property developers at Yucca Growth Infrastructure LLC, prioritizing their wallets over the people. Please help prevent the global climate catastrophe and rising temperatures by denying the air quality permit application!	1		No															
Anonymous	Anonymous	I am writing to formally submit my strongest opposition to the air quality permit application submitted by Yucca Growth Infrastructure, LLC for the "Project Jupiter" fuel cell facility planned for Doña Ana County. It is deeply concerning that outside corporate interests and high powered lobbyists appear to wield an unfair amount of influence over our state regulatory processes, pushing massive infrastructure developments forward without genuine equity, transparency, or regard for the local communities that will bear the heavy burden of their environmental footprint. We cannot continue to allow backroom corporate agendas to put New Mexico's precious and vulnerable natural resources at risk. We have seen this exact dynamic play out across the country such as the devastating strains placed on clean water supplies and local grid in states like Georgia where massive data centers were recently constructed. New Mexico cannot afford to repeat those disastrous, industry first mistakes. The New Mexico Environment Department's official mission is explicit: "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." The NMED Air Quality Bureau is specifically tasked to "protect the public health of New Mexicans and the natural beauty of the state by preventing the deterioration of air quality." To uphold this vital mandate, I urge NMED to reject corporate lobbying pressures and take the following actions: This permit should be denied outright, particularly given Bloom Energy's deeply troubling history of illegal dumping of hazardous waste. Our community should not be forced to trust a corporation with a track record of violating environmental safety laws. The public must be given an additional 60 days to thoroughly review and comment on this air quality permit. This extension is absolutely necessary so that everyday community members have the time and resources to participate equitably in a process that directly impacts their health. If the permit is not denied immediately, NMED must mandate a formal public hearing to be held directly in Santa Teresa. To ensure true equity and community inclusion, this hearing must be conducted in both English and Spanish, and must feature a robust option for residents to participate virtually. Approving this permit would be a direct act of government-sponsored environmental racism. The residents of Doña Ana County are already disproportionately impacted by systemic environmental pollution. For years, Doña Ana County has been designated a "nontattainment" zone, meaning our local air quality consistently fails to meet federal safety rules. Forcing a massive new industrial project into an already overburdened community is a profound injustice. New Mexico's air, water, and community health belong to its people-not to the multi billion dollar entities trying to bypass local well being for private profit. I implore NMED to stand with New Mexicans, reject this permit, and protect our future.	1	Minimal Document	No		Yes		Yes								8/27/2026
Gatto	Anna	As a New Mexico citizen, I am of the firm belief that AI data centers will pose risks to the environment as well as the people of our state. I ask that the air quality permit application be denied given Bloom Energy's history of illegally dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No		Yes	Yes		Yes	Yes	Yes			8/27/2026
Salta	Lopez	NM is already in a drought there are many places that barely have water for irrigation. Project Jupiter would take from the people who need this water to make a living, animals who live here and many other people. Air pollution would also harm many people especially people with existing respiratory problems. I would also pollute our environment and many plants could be in danger.	1	Minimal Document	No		Yes		Yes				Yes	Yes	8/27/2026
Kuchi	Flanagan	The Rio grande is already running dry early this year. We can't limit gif worse. We can't let companies pollute our air more, and noise pollution is also an issue. Bloom energy also has a history of illegal dumping. Lastly, the air quality in dona ana county is already not meeting federals standards. Please deny the permit for project Jupiter. Protect our public health. Lastly please give an additional 60 days for public comment so everyone has a chance to comment. Thank you.	1	Minimal Document	No		Yes		Yes						8/27/2026
Dominika	Rodriguez	I am against project Jupiter 100% think it is a disaster for our ecosystem, we are in the desert, water is already scarce as it and our rio grande is dried up there is barely water for our communities and we can afford to lose that water to a data center we do not need. Pulcsur people first!!!!!	1		No										
Carter	Anonymous	The use of fossil oxide fuel cells is a very good and worthwhile idea but the way the company plans to implement them is too costly to the environment. The carbon dioxide emissions by themselves are too great a toll and the subsoil given that would be used make it worse. The project could result in serious harm to the community around it and the ecosystems due to its massive negative environmental effects. The permit must be firmly denied and the project shut down unless the company improves it's ways and their A's management.	1	Minimal Document	No		Yes								
Robert	Tattarelli	I have lived in Las Cruces for the past 47 years. I seen many changes in those years and have been active in the community to make positive changes by staying informed. I have served on BLM and New Mexico Game and Fish committees as well NGO boards. I was disappointed to hear less than a year ago that our Governor and some of our State legislators had been working for some time laying the groundwork behind closed door to sneak in Project Jupiter. Even many of our Senators were caught off guard and misinformed. Since that time the communities in Doña Ana County have made it clear that they don't want this project. It has been presented as a shell game with most aspects of the project changing regularly. The promoters of the Project have knowingly withheld critical information especially concerning detrimental effects regarding air, water and energy needs. NMED is the governing body that protects the New Mexico Environment. The promoter of this project are constantly changing the degree and types of air pollutants that this project will produce. It is a huge project that will produce huge quantities of air pollutants that have yet to be identified by the promoters. The local citizens are already suffering poor air quality without this project. In addition, the project is adjacent to Organ Mountains-Desert Peaks National Monument Wilderness. Visitors to this area will be subject to the same unhealthy pollutants. That will discourage visitors from coming to the area fathers impoverishing an already impoverished area. There are hundred of other data centers around the country and all of them have over promised and under produced. We are told that this is an experimental project. The citizen of Doña Ana County do not want to be guinea pigs. Until the promoters can reliably commit to the real air quality impacts, use reliable, credible data and be held liable for it, this permit SHOULD NOT be granted at this time! Thank you. Sincerely,	1	Minimal Document	No		Yes		Yes								
Anonymous	Anonymous	Dear NMED staff, Hello, I come here to write this anonymously because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid in Doña Ana County. Given circumstances, a project of this scale has to be considered throughoutly. It's natural to be conservative of anything that relates to the environment our our day and age, but building a power plant who exceeds past known measures of what a fuel cell plant can be is simply irresponsible, given the current climatic changes, carbon emissions, hazardous waste of resources and other harmful pollutants into our air.... and also taking the goal margins that intended for us to lead a better world, a breathable, living world, in NMED's mission, it'd be inconsiderate to not at least review Yucca Growth Infrastructure's plan, as they'd need a minimum countermeasures for how they'd uphold and make up for the damage they'd certainly do to the environment, even if ours as enormous as it'd previously be. Doña Ana's Ana County's air quality should meet federal govern rules, their safety and education on the matter should be prioritized. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely,	1	Minimal Document	No		Yes	Yes	Yes		Yes	Yes	Yes		8/27/2026
anonymous	anonymous	As a U.S. resident I am completely against Yucca Growth Infrastructure's air quality permit. I'm still pretty young and would like my kids to see polar bears, not chest on a bed with an AI bot that you are persuading. This company will release 30 million tons of Carbon Dioxide into our air. Roughly 26-30% of added Carbon Dioxide is absorbed by oceans, causing localized ocean acidification. This reduces carbonate ions, stunting growth and dissolving the shells of calcifying marine animals like oysters, sea urchins, and coral polyps. Pelagic fish and sharks are highly vulnerable. Acidification lowers the pH of surrounding water, which impairs the neurological functions, sensory capabilities, and predator-avoidance behaviors of many fish species. That's not all though. Because atmospheric warming is amplified at the poles, localized temperature spikes would devastate animals dependent on sea ice. Polar bears, walruses, and ringed seals would lose their primary hunting grounds and breeding dens. Increased atmospheric carbon dioxide promotes fast plant growth but lowers the nutritional quality (less protein) in foliage. Herbivores like koalas would be forced to eat significantly more to meet their dietary needs, exposing them to higher risks of predation. We are causing all of that to happen just for some AI bot that every human is fully capable without. These present generations are getting lazy, and I don't want my kids to have to ask for me to pull up a picture of a polar bear for them to be able to see them. I think it's ridiculous and outrageous that we're going to kill all of these animals just so that we can find an answer in 5 minutes because it logic and doesn't even work half of the time. Please don't do this to our environment.	1	Minimal Document	No		Yes	Yes	Yes		Yes	Yes	Yes		8/27/2026
Patricia	Dalby	As a resident of Dona Ana County I am deeply concerned about the possible detrimental effect Project Jupiter may have on our environment and our and water quality. I urge those in the position to approve or disapprove this air quality permit to follow any bills that Senator Jeff Steinborn puts forth and that they listen to and carefully consider outcomes from the public discussion and listening session that will take place - there's the public - on August 13, 2026, at the NMSU Corbett Center from 4:00-6:30 p.m. There is a need for greater transparency as well as public input prior to approval of this air quality construction application.	1	Minimal Document	No		Yes	Yes	Yes				Yes		8/27/2026
John	Gilbert	This permit should not be granted. Recent wind rose maps indicate that Las Cruces, the city I intend to spend my life as a resident of, is downwind from Santa Teresa. I find the reporting that this campus will release up to 500 Mt of NOx a year deeply upsetting, and the loophole that this is technically two facilities will prevent triggering more stringent air quality monitoring since each facility will emit just under the cutoff for PSD reviews. Do not approve this permit, please.	1	Minimal Document	No		Yes	Yes					Yes		8/27/2026
Rosie	Worker	What about cases of catastrophic failure? Are we approving those deadly incidents of pollution in advance without any real data informing us of the risks of this scale? Highly flammable hydrogen under high pressure only needs a microscopic crack to leak out, ignite, explode, and level entire neighborhoods and schools while sending shockwaves into nearby counties. Assuming this risk, an act of gross negligence, at a scale that has never-remotely been demonstrated in practice would be unbelievably careless. These permits must be denied outright. Further deliberation is denial, a public hearing in Santa Teresa is non negotiable. "The public should be given an additional 60 days to review and commenton the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed atresidents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No					Yes						8/27/2026
Owen	anonymous	We have survived years and years without this heavy presence of AI and data centers. We do not need any of this. We certainly do not need a gigantic data center that is going to have disastrous effects on our planet and the people in our communities. I beg of you to prioritize life over greed. Air is not a necessity. It is not improving lives. It is doing nothing but destroying our planet, harming our intelligence, and isolating people further. Think about the children in your lives. Your kids, your nieces and nephews, your grandchildren. In this reality-world you want them to grow up in? In this reality-world you want to curse them with? Just please, think before you act. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed atresidents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No		Yes		Yes			Yes	Yes		8/27/2026

Anonymous	Anonymous	Project Jupiter is detrimental to the environment. New Mexico already has limited water. The rio grande river is actively drying up and will be even more so at risk due to project Jupiter. The people of New Mexico need water to survive and the communities depend on it. Project Jupiter has many negative effects on the climate. Project Jupiter will cause large amounts of air pollution, dry up the surrounding sources of water and will generate a large amount of hazardous waste and release greenhouse gas emissions greater than the largest 3 cities in New Mexico Combined. Project Jupiter is overall detrimental to the communities of New Mexico. If projects like this will continue eventually everyone will suffer. Everyone. We have never needed a before, we didn't need data centers of this size before, we don't need them now. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed atresidents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No		Yes	Yes			Yes	Yes			8/27/2026
Anonymous	Anonymous	Scientists have set themselves on fire in efforts to wake our world up to the realities of climate change. And projects like this pair at and insult the meaning of their sacrifices. There is no sin or crime humanity could commit that is more selfish, egotistical, and careless than the acceleration of global warming... and Project Jupiter is essentially going this looming threat a push forward. Please step them from exhausting our planet and our people in the name of money and dreams of masses of wealth. This is evil. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed atresidents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No		Yes	Yes			Yes	Yes			8/27/2026
Joshua	Crepeau	I strongly oppose the construction of Data Centers on New Mexico land. Our limited resources are already being stretched thin and now corporations want to make it significantly worse. It doesn't matter what kind of technology is used to power or cool data centers, it all adds pollutants to our environment and takes resources away from the citizens. Please do not allow this construction to move forward and put even greater strain on our state. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed atresidents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No		Yes	Yes			Yes	Yes			8/27/2026
Talya	Elymani	absolutely insane to believe we rely on AI as head/pre-prioritize it over our earth despite the fact the souls have died in the heatwaves. anyone who works on project jupiter should go fuck themselves The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed atresidents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No										
Anonymous	Anonymous	Please protect the future of New Mexico and especially the residents of Doña Ana County as they are already disproportionately impacted by environmental pollution. The air quality permit should be DENIED , given Bloom Energy's history of illegally dumping hazardous waste. The public should be given an additional 60 days to review and comment on the air quality permit so that our community members can participate equitably.	1	Minimal Document	No		Yes		Yes			Yes	Yes		8/27/2026
Zoey	Li	I would like to say that I think that this is a HORRIBLE idea. We already know that Bloom's dumbs hazardous waste and has a history of illegal dumping, and letting them build something of this scale is just a horrid idea. Furthermore, I'd like to point out we are already past the 1.5 C agreement of global warming (Paris agreement), dumping more carbon into the atmosphere would increase temperatures even further. This data center is a horrible idea to the people of New Mexico, making their air quality worse as well as the fact a data center this huge is bound to make a ton of noise. Straight noise pollution. As a concerned citizen, this just should not happen. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed atresidents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Minimal Document	No		Yes		Yes			Yes	Yes		8/27/2026
HAZE	Anonymous	My name is haze, I live near new Mexico, I am writing as I am concerned about the negative effects that project jupiter will have on new Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid in Doña Ana County. I care a great amount about the state of our environment, the growing concerns caused by climate change and it's effect on people. The project's proposed fuel cell powered grid is concerning for many reasons: The project would still produce alarmingly high levels of greenhouse gases and toxic pollutants, moreover there has been no clear or confirmed way to handle the toxic waste it will produce, granting this permit for this project despite this would be reckless. There are schools within 6 miles of this project, and the children who attend there will be left unfairly vulnerable to worrying health impacts of NOX, CO and VOCs. The air will be heavily effected and this serves as an injustice to them and the communities near the project who will be left to live in such undesirable conditions. This project will cause more air pollution than the two consumer electrical grids that power new Mexican families and businesses, and the effects will be nothing short of horrific to the environment and the people. Additionally, Approving this permit would be government-sponsored environmental racism - the residents of Doña Ana County are already negatively affected by environmental pollution, it would be a disservice to grant this permit for the project knowing this. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid, as it will obviously cause much harm.	1	Minimal Document	No		Yes	Yes		Yes					8/27/2026

Anonymous	Anonymous	I respectfully express my opposition to this project based on concerns regarding its environmental sustainability. The potential risks it poses could result in long-term damage to our ecosystem, which would ultimately impact not only our planet but also all living beings who depend on it for survival. It is important to consider that while Earth can thrive without human presence, humanity cannot endure without a healthy planet. Read that again.	1	Merged Document	No	[redacted]			Yes					8/17/2026
David	Bomse	I request that the New Mexico Environment Department reject air quality permit application 10883 from Yucca Growth Infrastructure, LLC to construct a methane-fueled power plant near Santa Teresa, New Mexico in southern Doña Ana County. The application skirts important issues described below including methane emissions, ozone concentration increases, and uncertainties in Bloom Energy fuel cell performance. In addition, people acting on behalf of Project Jupiter have submitting fraudulent comments supporting YGI's application. Those illegal acts cast doubt on any inferences drawn from the online comments and, therefore, now require open public hearings on YGI's application. Here are details about three major concerns. 1.Methane, the major component of natural gas, is a greenhouse gas with 28 times the global warming potential of carbon dioxide. Straightforward calculations based on YGI's stated carbon dioxide emissions of 10.1 million tons per year and the 1:1 stoichiometry of methane fuel cell oxidation, show that YGI's power plant will consume 200 lbs of methane per second all day every day. Yet, YGI's application states zero methane emissions. No methane will leak from pipes, fittings, compressors, and valves, and no unreacted methane will exit the fuel cells. That is beyond belief and is no minor omission. If only 1% of the methane escapes – a reasonable estimate – then carbon dioxide equivalent emissions will increase by 28% to 13 million ton-equivalents per year. As described in the application, YGI's global warming impact will exceed that from Albuquerque, Santa Fe, and Las Cruces combined. Methane emissions will further increase the global warming impact. 2.Ozone forms in the atmosphere when NOx reacts with volatile organic compounds (VOC) in the presence of sunlight. Ozone is a corrosive pollutant that irritates the lungs, constricts breathing, exacerbates asthma, and can cause a variety of serious respiratory and cardiovascular illnesses, even premature death. Consequently, EPA has established a national ambient air quality standard (NAAQS) for eight-hour ozone of 70 parts per billion (ppb). EPA has designated both Sunland Park and El Paso, Texas as nonattainment areas for the 2015 NAAQS for ozone, and monitors in both cities continue to report violations of the NAAQS. Although the Bloom Energy's fuel cells emit less NOx than the turbines originally proposed by Acoma, ozone pollution will continue to exceed NAAQS limits under YGI's new plan. The 37.20 tons of NOx that will be emitted will add to the existing excess ozone. Heat from the power plant will raise ozone concentrations by 1.1 to 1.7 ppb for every 1°C increase in temperature. Temperature changes well above 2 °C are feasible based on temperature measurements downwind of datacenters in Phoenix and on modeling of a proposed Utah datacenter. These expected elevated ozone levels will cause real harm to individuals living in the entire region. According to analysis by researchers at New York University and the American Thoracic Society, elevated ozone levels in the El Paso-Las Cruces area cause, on an annual basis, about 22 premature deaths, 110 emergency room visits, and over 224,000 missed work or school days.	2	Merged Document	No	[redacted]		Yes	Yes	Yes	Yes		Yes	8/17/2026
anonymous	anonymous	Dear NMED staff, I am writing this comment as I am deeply concerned about the negative impact of Project Jupiter. I am not from New Mexico, but it does not stop me from absorbing the information about what can happen if this project is not stopped immediately. I know that it is now harder to control the people responsible for Project Jupiter, but please, reconsider the effects this and many other initiatives of this sort can have on our planet in the next years. Sincerely, Anonymous, PL "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Christa D.	Slaton	I am 100% opposed to this project. I've read that it will consume excessive amounts of energy and water and be destructive to our quality of life. These billionaires care nothing about the damage to our quality of life. They have multiple homes and can live anywhere in the world they want. They believe they can purchase anything--our future, our quality of life, our souls. It is time to say NO MORE! We care about the future of our children and we cannot be bought. We do not believe in pipe dreams of greedy billionaire. Follow the laws and do not rush into agreements that can destroy the quality of life for those of us who live here. The fact that this construction is being rushed without adequate hearings only demonstrates that deal is shady. These billionaires are believing that everyone can be bought. Let's show them that EVERYONE is subject to the laws that were designed to protect all of us and EVERYONE is subject to the laws, no matter their wealth.	1	Merged Document	No	[redacted]	Yes							8/17/2026
Anonymous	Anonymous	Dear NMED staff, I am writing because I am concerned about the risks and harm Project Jupiter faces to our planet. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I may not be a resident of New Mexico, I actually live in a whole different continent, but I am still worried that this data center will seriously harm people living in New Mexico. The project's proposed fuel cell powered grid is concerning for many reasons: -It would still produce a high level of greenhouse gas and toxic pollutants -This technology generates toxic waste, and the process for handling this waste is still unclear. -Fuel cell technology or a centralized waste system has never occurred at this scale. -Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. I also believe that the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Sincerely, Anonymous.	1	Merged Document	No	[redacted]		Yes	Yes		Yes		Yes	8/17/2026
Jillia	Anonymous	I just found out what project Jupiter is, and it is horrifying. Cause, this will affect the global climate - not just that country, but all of us. I don't want this to happen. That is why I am here, writing and protesting against project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Phoebe	Walsh	It's selfish and greedy. We don't need this data centre, you're ruining our planet to build a center that's going to ruin it more. With the scale of this thing, I wouldn't be surprised if the whole of Mexico is going to be left with no sleep due to the noise and completely unclean water. You're also taking up alot of habitat space. This isn't a positive at all, you're ruining lives of animals and humans, just so you make people lazier in the world. It's you also ignoring thousands of requests to not build it, you're doing with pure greed. By building this, you may make new mexico unliveable. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026

Robin	Montoya	Dear NMED staff, My name is Robin Montoya. I am a New Mexico resident, living in Las Vegas NM, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. It is concerning to me due the amount of water this will use to build and maintain. Also I work with workers who have been affected by Los Alamos and Sandia labs, resulting in serious health issues some terminal. We have already been affected as a state by the contamination of water food and air. I am seriously concerned what this project will do to our resources. How will this contamination affect us long term? How will it affect our children? The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, NAME Robin Montoya	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes		Yes	8/17/2026
Jason	Varney	AI and data centers are NOT worth the destruction of the world we live in. We can clearly see the negative impact of these centers on the environments around them and we are already feeling the consequences. We are seeing more drought measures go into place, Colorado is facing increased wildfire risk, rivers are drying up. I went to a park the other day and the entire lake was dry. We do not need AI, we will never need AI, it is not worth it. (This isn't even to MENTION the negative impact of AI itself and the literacy crisis we are facing due to a dependency on artificial intelligence) You need to give the public an additional 60 days to review and comment on the air quality permit. Said air quality permit should be DENIED, considering Bloom Energy's history of illegal dumping. If the permit is NOT denied, a public hearing should be held in Santa Teresa, in both English and Spanish, with access to virtual participation. Approving this permit would be an act of government-sponsored environmental racism.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Angie	Velasquez	Dear NMED staff, My name is Angie Velasquez. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am currently a student with the hopes of living a cleaner future. The world is already facing multiple hardships that do not concern wildlife and climate. Adding a mega A.I. Data Center development will only cause more harm to our world, wild life, and future generations. Please consider the lives of millions of people who live on this earth. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Angie Velasquez	1	Merged Document	No	[redacted]		Yes	Yes		Yes		Yes	8/17/2026
Nathan	Moreno	The air quality in that area already isn't up to standard so why are you considering building a data center to make it worse? Along with using our water for a state that has been in a drought for over 10 years. Reject the permit and don't let this data center be built. It's disgusting and it only benefits the billionaires that don't have to live here. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Alexandrea	Thomas	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. This will affect billions including, my best friend who suffers from seizures when to hot. This is a very traumatic situation for her that could easily become an everyday thing for her ultimately forcing her to stay inside and miss out on opportunities that there's of our friend group can take. Allowing this to happen would bring the value of life for my friend and people like her to an all time low. Life reduced to seizures, isolation, little life experience, and severe mental health issues. Both of my brothers who are diagnosed with autism, one severe and one functioning would also be extremely affected by this. My severe brother has always had a love for being outdoors. It's been the only place that we have seen him noticeably deescalate from a serious breakdown due to overstimulation. This rise in heat may take away his one safe place due to the overwhelming and inescapable sensation of heat. This would prohibit him from experiencing the things that calm him down due to fear of seizures and heatstroke. My other brother is obsessed with boats and being on the water. This would also have to unfortunately stop due to the sun reflecting off of the water putting my brother and everyone else on the boat in immediate danger. The other toxic air pollutants are extremely dangerous–many of them at very low levels. This would immediately effect billions of people with chronic health issues and lead to a severe increase in of people in the hospital potentially taking up space from people with other emergency's including those caused by the heat, air pollutants on top of the preexisting issues. Where is my brother and best friend supposed to go when prompted by their health issues regarding seizures from the heat? How will we pay for these constant medical bills?	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Madison	Radike	CLIMATE CONCERNS Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The proposed "micro" grid has a 2,462 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. ENVIRONMENTAL JUSTICE Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. The Chihuahuan Desert borderlands are not a barren dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana county near the site have not been properly notified of this air permit application request. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026
Keely	Bieber	Data centers have no place in New Mexico! The rise of AI at the cost of our local environments is unacceptable. We do not want this project here. Not only do we not have the water to spare but we have no desire to see our land polluted by such a project. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. Now project Jupiter threatens that further. THIS NEW PLANT IS DANGEROUS. A fuel cell plant of this size has NEVER been constructed before. Project Jupiter's power plant would be 1,000 times larger than the biggest fuel cell plant Bloom Energy has ever built. This fuel cell gas plant will release toxic chemical pollutants and 10 million tons of carbon dioxide into our air (see tables below sourced directly from p. 150 of Air Permit)	2	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Aileen	Perez	Dear NMED staff, My name is Aileen Perez. I live in Albuquerque , and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am born and raised here in New Mexico, and I deeply love our land, wildlife, and the natural environment that makes our state so special. We are already experiencing severe drought and seeing the impacts on our wildlife and ecosystems and building a data center will only place additional strain on our limited natural resources and could create even more negative environmental impacts. A project of this scale comes with too many unknowns, and I am not willing to risk the land and environment that so many of us know and love. I am also concerned about the potential effects on local ranchers, whose livelihoods depend on healthy land and reliable water resources. The pollution and other environmental impacts associated with large industrial facilities could affect cattle, ranchers and their operations and the long term health of our communities. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology, Sincerely,Aileen Perez	1	Merged Document	No	[redacted]	Yes	Yes	Yes		Yes		Yes	8/17/2026
Melissa	Martinez	This project is not helpful in any way shape or form and no matter the change in fuel it will still lead to green house gas emissions and there are unacceptable consequences with water usage I urge you to put an end to this project for the safety of your community and the environment.	1	Merged Document	No	[redacted]	Yes	Yes	Yes					8/17/2026
Morgan	Taylor	My name is Morgan Taylor and as a resident of New Mexico (both Santa Fe and Albuquerque), I do not support project Jupiter in any shape or form. At 1,400 acres, this data center is expected to use around one million gallons of water a day. Gradually watching the Rio grand become more and more dry throughout my life is already disheartening in itself and to use so much of a resource that New Mexico is already in need of is simply insane. Much of southern New Mexico relies on farming and the construction of this data center across will devastate these families. As of June of this year over 90% of New Mexico has faced drought conditions. Considering this, in what possible universe would a monster data center requiring the use of one million gallons of water a day be placed at a higher priority than those simply trying to live in an already harsh climate?! Many living in Santa Theresa, NM are already spending hundreds of dollars a month on clean bottled water. Project Jupiter will only make clean water less accessible for those already struggling as families have to travel further and in turn spend more. The costs of this data center absolutely override any benefits. In producing about three times as many carbon dioxide emissions as the entire city of Las Cruces, this one data center can cause nothing but physical harm at the hopes of a virtual reward. To be able to support the wellbeing of Artificial Intelligence over the wellbeing of around 225,000 New Mexico residents would reflect a level of greed and apathy that I didn't even know a person could hold within. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]	Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	Despite claiming to build more data centers for the benefit of people, the ridiculous lack of acknowledgment or understanding for how data centers go on to negatively impact communities is apparent. There is a clear lack of confidence in the safety behind the fuel cells, adding a "15% safety margin" to numbers when that is not typical for a company that should be sure of its impact on the environment. Furthermore, the fuel cells are also expected to release 10 million tons of carbon dioxide, which not only impacts locals but even people far beyond that. On top of that, the fuel cell plant will also generate waste in the form of benzene, lead, arsenic, chromium, sulfur, xylenes, methanol, and overall hazardous air pollutants which are linked to irreversible health effects such as cardiovascular and reproductive damage. The most ignorant action taken by these developers is how their understanding of their own project and fuels cells were tested on a smaller power plant that's 37,000 times smaller than what the Project Jupiter is set to be. Not only is this not a benefit to humanity, in truth this will harm us and continue to decades down the line. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes		Yes	Yes	Yes	8/17/2026
Tyler	Henry	We have lived eons on this earth and have been perfectly fine WITHOUT AI. These data centers solely exist for the rich. They are poisoning communities and the environment. Nobody wants these data centers. Nobody NEEDS these data centers. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]		Yes	Yes			Yes	Yes	8/17/2026

Aiden	Swope	Seeing through the construction of Project Jupiter, even after countless complaints being submitted, would be an entirely outlandish thing to do. As of now, data centers—even the ones that will be small compared to the expected results of Project Jupiter—already deal massive damage to the ecosystem that it's planted around, alongside greatly hindering the lives of any people unlucky enough to have a data center built near the home could once effectively rely on. Seeing as such, the air quality permit application from Bloom Energy should be denied, due to their history of toxic waste mismanagement, as well as the blatant display of environmental racism if this permit were to be approved, due to Doña Ana County being disproportionately affected by pollutants and malicious corporations in search of an easy way to get what they want. However, if this permit is somehow not denied, a meeting is to be held in Santa Teresa, in both English and Spanish, and with virtual participation. People do not want to sit idly by as their lives are taken from them and replaced by a giant data center. Additionally, an extension of the allotted reviewing and commenting time should be put into place, in order to give residents of Doña Ana County a fighting chance to stand up for their home, their water, air, health, environment, and quality of living in at stake—it is only fair that they are given time to realize that they can make a change. Ultimately, the construction of Project Jupiter, in a poor, ignored country in New Mexico is nothing more to Yucca Growth Infrastructure than a cheap way to force people out of their homes, and damage the environment that they clearly do not care for. It is extremely important this air quality permit is denied, and that Project Jupiter is dismantled. Thank you. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.		No	[redacted]																				
Addison	Duke	I live in unincorporated west palm beach near the entrance of Corbett. And already near where I live we are having small drought every so often. I have lived here most my life (11-12) years and I am 19. This is my home, and many other families homes. We need the water utilities and if these data centers keep coming we are going to have no water left. We do not need a lil sunrise we need water. Please if there is anything I can do to help this data centers keep coming get em exposed and get signatures to shut down I will do it.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
		The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.																						
Madelyn	Reed	I am not a resident however this project will have a catastrophic effect on the environment as a whole. There are various wildfires, droughts and extreme heat advisory's in JUNE due to the rising heat and having mass amounts of carbon emissions will just add to the climate crisis. We are not even in the peak of summer and storms have been worse, earthquakes, and mass destruction due to climate change has already taken effect. Why is there snow in Idaho, mass flooding on the east and excessive heat in the midwest. If we do not take action to stop money hungry corporations from destroying the world as we know it there will be no future for humans to keep thriving as we once were, and that's my why.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026

Bethany	Ramirez	To accept a proposal such as Project Jupiter shows the negligence of citizens safety. If there is no attempt to assure that citizen health goes first, then this Bureau, as well as other departments of other organizations, will be considered complicit in taking part of supporting this action. The voices of the people living within these residences must be heard and therefore be used to take action against the implementation of data centers in the to up to you to decide the importance of human life and health in the support of a disastrous procedure meant to destroy the environment and living beings. This will determine the stance of NMED. What action will taken? If I can sway even a pinch of persuasion to this Bureau, deny the air quality permit application. If not denied, allow public hearings held at Santa Teresa and give the public an additional 45 days to evaluate the air quality permit so community members can participate equitably.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	Please consider what this will do to not only New Mexico, but the planet at large. We all have to live here, think about not only the animals and ecosystems this will devastate, but the human beings it will affect for years to come. Think about your family and the kind of world you want them to live in. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes				Yes	Yes	8/27/2026
Grey	Pendell Jones	Project Jupiter has no interest in bettering New Mexico, simple exploiting our beautiful desert for monetary gain. The only people benefiting from this data center are insufferable tech billionaires. I do not support the proposed motion to construct this data center. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	I am reaching out to ask that this project be denied. New Mexico is already a hot and dry state and the implementation of this data center will do irreparable damage to not only the areas directly surrounding the center, but to the state of New Mexico as a whole, and possibly even surrounding states. The usage of fresh water and the amount of energy it takes to run a data center is a complete waste of resources. Not only is it a waste, but also causes irreparable damage to the environment. There are case studies as well as reports of air, water, and noise pollution that affect the residents of the surrounding areas of data centers. Centers like these cause more harm to the environment than anything else, and this is quite literally no one for them. Approving a permit such as this one should be considered government sanctioned, environmental attack, that is fueled by racism and classism. Data centers are being purposely built in lower income areas across the United States. It is also a well known and well documented fact, they the vast majority of residents in a low income area are people of color. I ask that this complaint, as well as many others is heard, and that this permit is denied. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Jasmin	Anonymous	My name is Jasmin. Although I am not a New Mexico resident, I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid in Doña Ana County. Climate change has already impacted all of us and we only have 3 years left to fix it. Building these centers would greatly impact global warming and not only harm new mexico but other countries as well. You can see the impact global warming has on Europe. Streets are destroyed because of the heat. Parts of the Rhin have melted because of the heat and it's not even past summer yet. The project's proposed fuel cell powered grid is concerning for many reasons; it would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Jasmin	Minimal Document	1	No				Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/27/2026
Emma	Terry	I, a New Mexico citizen, firmly oppose Project Jupiter's entire campaign. I do not believe this data center should be permitted to be built at all. At a time when the water systems and ecosystems are already stressed, adding an enormous power and water consuming infrastructure will certainly have dire consequences and ultimately cause more harm than any of the temporary good Projects Jupiter is claiming to bring. Due to bloom energy's history of environmental negligence and illegal dumping, there is no reason to approve their air quality permit. Additionally, I request that the public be given an additional 45 days to review and comment on the air quality permit.	Minimal Document	1	No				Yes	Yes	Yes		Yes		Yes	8/27/2026
Amy	Figueroa	Just because you will not be alive a century from now does not mean that others won't exist. This is not your planet, this planet belongs to both the present and the future, for those who have been born decades ago and to those who will be born decades from now. The lack of self control is is alarming yourself and humanity in a brink of no return. Instead of dying out naturally, humanity is downfall will be inevitable if this deplorable evil gets carried out. Do not be the reason. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Abdel	Ahmad	We can live without air. Project Jupiter is not going to help our planet but rather will cause harm to us. We need water, which is what these data centers for or rely on, and building more and bigger data centers will require more usage of water, which is very harmful for our planet. Please reconsider this project. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	Stop AI data centers. These are unnecessary, capitalist machines dedicated to ruining the livelihoods of communities in the surrounding area both ecologically and economically. There is no gain to be found in funding these centers. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Isaiah	poblano	I am Native American and I don't not support project Jupiter. This land is sacred and the water it holds, having a data center will not help in any way possible with our limited water we have for our community. Our community is in a drought already especially with how limited rain we get. I locum poblano, grandson of former governor of Zuni Norman concepte, does not support this project. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. David	Daum	Please deny air quality permit for Project Jupiter. This project, as is currently stated, will substantially decrease the air quality of SW New Mexico and go against the goal of reducing air pollutants in NM. The data center project should be required to use renewable energy sources and follow NM's stated failures air pollution goals. Please do not except Yucca Infrastructure from these reduction goals. Thank you for listening	Minimal Document	1	No				Yes	Yes				Yes	Yes	8/27/2026
JIM	LYONS	PROJECT JUPITER NEEDS TO BE STOPPED!!!! THIS SHOULD HAVE BEEN STOPPED TO, PLEASE SEE ATTACHED	Minimal Document	3	Yes									Yes	Yes	8/27/2026
JIM	LYONS	PROJECT JUPITER NEEDS TO BE COMPLETELY SHUT DOWN. _____ THIS SHOULD HAVE BEEN STOPPED TOO, PLEASE SEE BELOW; _____ Legal Notice and Preliminary Determination for an Air Quality Permit for CLAIM Wind Coast Inc CLAIM Wind Coast Inc. at 1668 West Amador Avenue, Las Cruces, NM has submitted an air quality permit application to the Air Quality Bureau (AQB), New Mexico Environment Department (NMED) for an air quality permit to construct/modify CLAIM Spices and Vegetables Ingredients. The application file has been assigned Permit No. 174MM4 and TEMPO Agency Interest No. 138. The exact location of the facility is at latitude and longitude decimal degrees: 32.302962, -106.79988 Datum: WGS84. To visit or locating this facility, the approximate location is 1668 W Amador Avenue in Dona Ana County, NM. The proposed modification will consist of the installation of a new 2.0 MMBTU/hr boiler, the replacement of boiler BB-1(8.4 MMBTU/hr) with a 6.1 MMBTU/hr boiler, the replacement of boiler BB-2 with a 6.1 MMBTU/hr boiler, the replacement of boiler BB-3(4.2 MMBTU/hr) with a 6.1 MMBTU/hr boiler, the replacement of boiler BB-4 (7 also known as 30-1), the removal of boiler BB-5 (24.4 MMBTU/hr), BB-11(2.2 MMBTU/hr), and BB-9 (6.4 MMBTU/hr); Total air pollutant emissions to the atmosphere are estimated to be approximately Nitrogen Oxides (NOx) at 27.6 tons per year (tpy); Carbon Monoxide (CO) at 23.2 tpy; Volatile Organic Compounds (VOC) at 1.5 tpy; Sulfur Dioxide (SO2) at 1.4 tpy; Particulate Matter 10 microns or less (PM10) at 0.6 tpy; and Particulate Matter 2.5 microns or less (PM2.5) at 2.4 tpy; and greenhouse gas (CO2e) < 75,000 tpy These emission estimates could change slightly during the course of the Department's review of the application. The NMED has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's analysis of ambient air quality impacts indicates that the facility's air emissions will meet the air quality standards for Nitrogen Oxides (NOx), Carbon Monoxide (CO), Sulfur Oxides (SOx), Particulate Matter 10 (PM10), Particulate Matter 2.5 (PM2.5). VOCs are a pre-cursor to ozone and the NMED does not require an individual ozone ambient impact analysis for each application. To determine compliance with national ambient air quality standards for ozone, NMED uses air monitors to monitor ozone concentrations. A full review will evaluate the estimated emission rates for the pollutants listed in this public notice and determine compliance with ambient air quality requirements and standards. Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 2, 33, 61, 72, 73, and 78; 40 CFR60, and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before May 7, 2026. To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions, hours of operation, production rate, and conditions that will require record																						
Adeline	Ponciano	We do not need AI and this world would be better without this project going on. We need to focus on the environment instead of ruining our world and I don't wanna live in a world where it's destroyed by AI data centers. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	The wellbeing of our (PROJECT Jupiter must not go ahead. It will be an environmental disaster in a climate that is already struggling. The environmental impact will be devastating and goes directly against NMED's mission. The public should be given an additional 45 days to review and comment on the air quality permit. The air quality permit application should be denied given Bloom Energy's history of dumping hazardous waste. If the permit is not denied, a public hearing must be held in Santa Teresa in both English and Spanish, with an option for virtual participation. Approving this permit would be government sponsored environmental racism aspire and our environment matters more than whatever these data centers could possibly provide.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
JIM	LYONS	SHUT DOWN PROJECT JUPITER NOW!!! _____ WE ARE ALREADY SUFFERING IN DONA ANA COUNTY BECAUSE OF THE ATTACHED, PLEASE SEE BELOW; _____ THIRD FIVE-YEAR REVIEW REPORT GROSS AND VARIOUS* GROUNDWATER PLUME SUPERFUND SITE DOÑA ANA COUNTY, NM EPA ID#: NMD982372286 This memorandum documents the U.S. Environmental Protection Agency's (EPA's) performance, determinations, and approval of the third five-year review (FYR) for the Griggs and Walnut Ground Water Plume Superfund site (the Site) under Section 121(c) of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S. Code Section 9621(c), as provided in the attached Third Five-Year Review Report (FYR Report). The purpose of a five-year review (FYR) is to evaluate the implementation and performance of a remedy to determine if the remedy is and will continue to be protective of human health and the environment. Summary of the Third Five-Year Review Report The Site consists of a groundwater plume contaminated with dissolved perchloroethylene (PCE). The dissolved PCE plume was measured at an estimated 1.8 miles long by 0.9 miles wide and located within the City of Las Cruces (LCU or City), New Mexico. Perchloroethylene contamination has been detected in groundwater at depths ranging from more than 300 feet (ft) to 660 ft below ground surface (bgs). The PCE contamination impacted several City municipal water supply wells.	Minimal Document	2	Yes											Yes	Yes	8/27/2026
Lena	anonymous	No, this project will not just destroy america and damage the USA's environment, but it will affect the whole world which is why I am writing this. The world is not theirs to destroy, it has never been, and we need to take action now to stop this. The world belongs to over 8 million to 1.9 billion Different species, and one of them being 8.3 billion humans. Earth was made to give us life and security, and we are destroying the only thing we can call home. The only thing all species in the world can call home. There is no planet B and building a data center and destroying nature that can be used for animals and the ecosystem will damage and destroy more than we can even imagine. Stop this now or we are truly lost. Think about our future, our children's future and our grandchildrens future and beyond. Take action now to prevent bad. Stop fighting each other and try to be fabulous beasts" begin working together and helping one another to ensure a safer and more secure future, environment and safety for all. To whoever is reading this, please consider that this might be the start of an immense downfall and that having president trump in office will not ensure a stable future, but one who we cannot accept that climate change is real, and it IS real. European weather conferences are being proof. Thank you for caring for the planet, people and animals.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
		The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.																						
vanessa	miranda morales	WE DONT NEED MORE DATA CENTERS. our water sources are only so accessible because the smaller communities are now more limited. We have one earth. let's run run it. Think of the future. your children. they will NOT survive on a earth with limited to no water source. The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Angel	Peña Lorente	Project jupiter is endangering animals who are only trying to survive and reproduce, creating a massive data center out of what's basically? none? before taking action take consider of the environment and how it will affect our future especially the future of the young people! The public should be given an additional 45 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026
Madeline	Drake	Project Jupiter is a deplorable disservice to the community. With local elementary schools and daycares within five miles of this proposed data center, the children and adults who will represent our future will absorb all of the threats of toxic waste, noise pollution, air pollution, and water pollution. We can live without artificial intelligence; we cannot live without clean water and air. A project on this scale has not even been adequately tested. By following through with Project Jupiter, you are sacrificing the health of the American people in exchange for an experimental climate killer. You can't eat the money you earn when our planet can no longer harbor our food. Wealth won't protect you from the depletion of our only sources of life. Stop Project Jupiter.	Minimal Document	1	No				Yes	Yes	Yes			Yes	Yes	8/27/2026

First Name	Last Name	Comment	Attachment	Count		
Samantha	proctor	I oppose project Jupiter for its climate impact. We don't NEED AI. We NEED our earth. Allowing a huge data center to be built in New Mexico when current climate change action is failing or non existent is going to doom the people in New Mexico. People can only handle so much heat for so long until people will move elsewhere. The long term implications of this project are damning. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. New Mexico is a beautiful place and making it hotter and dryer will destroy New Mexico first and our earth later. The pro's of this project do NOT outweigh con's. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Merged Document	1	No	[redacted]
Anonymous	Anonymous	AI data centers are popping up everywhere. By our homes. By our favorite vacation spots. By our schools and jobs. It's inescapable and it's ruining millions of lives. I don't want to wake up to the sound of a data center every morning. I don't want to watch my neighbors and friends and animals suffer. I want to hear a river, a river that isn't being used to cool machines just so you can have some generated picture with too many fingers. Wouldn't you rather have human hands, human minds, thriving and creating? I want my little siblings to grow up in a world where they don't have to fear everything they see is fake, where I can hear their laughs over the earsplitting hum of a data center. I want their faces to not be hidden behind masks in order to breathe in less data center toxins. I want to feel and see things that are real. Not AI. The inhabitants of the area of the planned data center are already severely at risk in terms of environmental pollution. This center would harm what is already a struggling community, especially given the history of Bloom Energy to illegally dump toxic waste. Protect your people. Protect your land. No project Jupiter.	Merged Document	1	No	[redacted]
Anonymous	Anonymous	I do not support project Jupiter. The building of this data center will greatly affect the lives of those who live around it and their ability to access clean water. By building this data center, you are knowingly destroying the lives of thousands of people for the purpose of feeding your own greed and selfishness. The public should be given more time (60 days) to comment on the air quality in their area, so everyone has equal opportunity to participate. Bloom Energy should not receive an air quality permit, given its history of illegally dumping hazardous waste. Additionally, approval of this permit would be environmental racism on the part of the government. Doña Ana residents are already disproportionately affected by pollution. If the permit is granted, there should be a public hearing in Santa Teresa, conducted in both English and Spanish and with the option to participate virtually, so everyone is able to voice their opinion on a change that directly impacts them.	Merged Document	1	No	[redacted]
Anesa	Anonymous	Do people believe they can just use their free will to ruin what God has created for us? Do people want to destroy us before most of us get a chance to find what our purpose is? This project will destroy our already limited source of fresh water! This project is the reason why this summer is 10 times worse than past summers! This project is the reason innocent people might die! PEOPLE DO NOT WANT YOUR PROJECT! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]
JIM	LYONS	SHUT DOWN PROJECT JUPITER NOW. WE ARE JUST BEING EXPERIMENTED ON AGAIN!!!! NEWS RELEASE For Immediate Release January 14, 2026 Contact: Drew Goretzka, Director of Communications New Mexico Environment Department 505.670.8851 | drew.goretzka@env.nm.gov NMED launches online stories on uranium mine cleanup Initiative addresses legacy contamination across New Mexico SANTA FE — The New Mexico Environment Department has launched interactive online Geographic Information System (GIS) StoryMaps detailing cleanup progress at four abandoned uranium mine and mill sites in the Grants Mining District north of Milan. Backed by $12 million of a total $20 million appropriation from the New Mexico Legislature, the New Mexico Uranium Mine Cleanup Initiative targets abandoned uranium mine sites with no viable responsible party. New Mexico Environment Department (NMED), New Mexico Energy, Minerals, and Natural Resources Department (EMNRD), and contractors are conducting the work, which targets legacy abandoned uranium mine sites with no viable responsible party that are not covered by an active mining company or other cleanup programs. The first sites were chosen due to their proximity to residences, physical hazards, and readiness for cleanup partnership. "For decades, these abandoned uranium mines have posed serious health risks to nearby communities," said Environment Secretary James Kenney. "These StoryMaps give New Mexicans transparent, real-time view of our cleanup progress — so the public can see exactly how we're addressing this legacy contamination." Teams have begun working at the following sites: • Schmitt Decline mine in McKinley County, where living on-site for one year would result in two years of typical radiation exposure. • Mac No. 4 mine in McKinley County, where living on-site for one year would result in 13 years of typical radiation exposure.	Merged Document	5	Yes	[redacted]
Kaiya	Bruce	I strongly oppose Project Jupiter. This project is a disgusting proposition in and of itself. In a time where Earth is the most vulnerable and the working class's access to important resources is failing to be guaranteed, even the idea of this project is enough to make one sick to their stomach. A data center as large as Project Jupiter is building would release 10 MILLION TONS of carbon dioxide annually, suffocating ecosystems and destroying our atmosphere. It would consume millions of gallons of drinkable water, draining the surrounding communities of their water supply. Project Jupiter claims to be host to thousands of jobs and claims to be for the welfare of the working class, but in reality, it is literally draining the life out of the people of this country and the Earth itself. Stop Project Jupiter now. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]
Gabriella	Martinez	I have lived my whole life in New Mexico and we must as a state oppose the data center being built by Yucca Growth Infrastructure/Project Jupiter. This project will be detrimental to our community and ecosystem. These large corporations have shown time and time again they believe in using their money and influence to decimate communities to take advantage of their resources. The dangers of these fuel cells heating our planet will not only impact us long term, our local communities will feel the effects directly in their health, safety, and financially. Our Rio Grande River currently sits dried up with dying fish as Yucca Growth Infrastructure proposes a data center that will use up to 3mil gallons of water PER DAY. Their previous behavior regarding this project, including, making very minor changes to permitting, mass ad campaigns, and being deliberately vague about the pollution, does not instill hope that this would be a good decision for our state. Yucca Growth Infrastructure must be denied or a public forum must be held for comment with virtual comment options available. Please do not risk our citizens and beautiful state to these corporations.	Merged Document	1	No	[redacted]
Melyssa	Harrison	Project Jupiter is incredibly unnecessary and extremely destructive to our environment. Santa Teresa Elementary and High School are located within five miles of this project site, along with day care centers. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. I urge the NMED to outright reject YUCCA Growth Infrastructure, LLC's air permit application for the YGI Microgrid. Additionally, NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate.	Merged Document	1	No	[redacted]
Zyaire	Anonymous	Artificial Intelligence is notoriously known to destroy the environment. This includes with air quality, water quality, water quantity, and various other pollutant factors. The creation of the "largest AI data center" would be detrimental both globally and locally. This should be stopped and shouldn't have even been a considered project. The public should have a say so on whether or not the data center should be built and a public hearing should be held in both English and Spanish with option of a virtual attendance for those not in Santa Teresa. An additional sixty days for the public to comment on this matter would be splendid.	Merged Document	1	No	[redacted]
Leslie	Torres	The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Merged Document	1	No	[redacted]
Anonymous	Anonymous	Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. -- PLEASE STOP THIS! We have families and dreams that need to be achieved. How will we do that if you are killing our world. Take a second, look at your own family. Your own kind. How would it feel to see them in harms way. We should not be denied our free will and GOD'S GREEN EARTH because you are too selfish to know that you will kill us all. You cannot keep building this and think for a second that this is good. If you keep building then you will see the detrimental damage caused by project jupiter. Cherish what you have instead of filling the air with poison. Why? What does it do for YOU as a HUMAN. A PERSON. Do you not see that they are using EVERYONE? This isn't for you. It's for money. Greed. Nobody cares. Please stop this and change. Money perishes and you will too!!!!!! If your family were to die because of the poison and chemicals you are choosing to release into the world then what would happen then? Is it that hard to understand how it will affect EVERYONE?! Just make money by working hard. Instead you can HELP instead of HARMING. People would support you 10 fold if you were just willing to HELP. Do you believe that you are safe because you are the one helping to keep project jupiter alive? You're not. Keep everyone safe by saving the environment and maybe then you can be filled with the abundance of money AND joy as well as being supported. Don't take the shortcut of killing everyone off and saving yourself by building this. Please. Don't pollute everyone's one and only world. We only get one life. We all deserve a happy ending.	Merged Document	1	No	[redacted]
John	Price	As a resident of Santa Teresa and New Mexico, I am writing this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. This proposed AI data center places the health and well-being of the inhabitants of New Mexico at extreme risk. The air pollution and noise pollution produced by an AI data center will harm residents of all ages, including the children. Furthermore it will heavily damage our already suffering ecosystem. Overall, the project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants, which will be pumped out near schools where children are present hours at a time, unaware of the damage being done to them and their families. This technology generates toxic waste, and the process for handling this waste is still unclear. Considering Bloom Energy's history of being generally untrustworthy, controversial, and misleading, the public should be made aware of how exactly the waste will be managed before it is forced upon them. Fuel cell technology has never occurred at this scale. The residents of New Mexico should not be the guinea pigs for this. Surrounding communities' air will be negatively impacted by this development. Over all else this community and many others should not have to suffer so that large companies and their shareholders can get more money that they could never possibly use at all.	Merged Document	1	No	[redacted]
Anonymous	Anonymous	We do not need this AI center as a citizen living near the area, it is proven data centers put out a frequency high enough to cause miscarriages in animals, so what does that mean for us humans? We are all begging you to not go through with this, the amount of toxins and wasted water on top of this will be detrimental to our health and survival. We lived better lived before ai was a popularized thing, let's go back to that. Please seriously consider people's concerns and do not do this.	Merged Document	1	No	[redacted]
Abigail	Gonzalez	We need to help prevent climate change. Climate change will end up killing and bringing thousands of animal species towards extinction like polar bears. They're numbers are going down they can't adjust fast enough to become warm climate animals as their habitat is melting Which leaves them without habitat and without their sources of food brining them closer to the brink of extinction. We should all work together and stop climate change. (Anonymous) "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Merged Document	1	No	[redacted]
Kiana	morris	Dear NMED staff I am kiana and I am writing this because I am concerned about the risks and problems that project Jupiter poses to the community. I am submitting this to urge the New Mexico environment department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI micro grid in Dona Ana County. There is numerous concerns with project Jupiter including but not limited to; the release of 10 tons of greenhouse gases that will be released this is super bad for climate change and completely sets us back with what we have done for climate change in the past few years. The planet is already starting to see some of the effects that climate change brings and, this will only make things worse. Another major problem is the usage of water that towns, family's, and the wildlife all need to survive. Nobody owns the water and it is not up to one person what gets done with the water that all living organisms on the planet must utilize to survive. We cannot live without water but we can live without AI data centers. Unfortunately water is not the only valued recourse getting tampered with. The oxygen that we breath to live is getting more and more polluted and the data centers only speed up that process. This planet does not need us to survive, we need it. Family's who's homes are in nine radius from these data centers report constant loud noise and headaches from these centers. Approving this permit would be government-sponsored environmental racism. If this permit is not denied a public hearing should be held in Santa Teresa, in both English and Spanish with the option for people to virtually join. Thank you for your time sincerely kiana morris.	Merged Document	1	No	[redacted]
Ella	Fore	My Life has barely begun and it already seems like it's ending, I'm sick of constantly being afraid of my future so I'm begging and hoping that this does something. I hope that more people take action, I feel that even though I am still young I have more of a decent understanding how awful data centers are than GROWN people. I genuinely hope that these "Adults" even though they act like children, open up their eyes for once and see how much danger and risk we are putting our futures in, our planet in, and wildlife in. I hope to learn more about Data centers but until then I will sign every petition I can to stop idiotic people from ruining what could easily be protected. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Merged Document	1	No	[redacted]
Tojikhon	Isamutdinova	I want to object to the application in order to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations, and im also asking for additional 60 days to review and comment on the air quality permit so community members can participate equitably	Merged Document	1	No	[redacted]
River	cox	We can live without ai, ai will do nothing for us if we won't live to use it. I want to have children, I want to live a happy life, I want to enjoy the nature and the earth and her oceans. Project Jupiter will be catastrophic to our planet and its ecosystem. We have reached record temperatures and A large AI center that is going to be releasing TONS of carbon and green house gases a like is not something we need at all. Our planet still has a chance, but not if we don't work together to help it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Merged Document	1	No	[redacted]
Anonymous	Anonymous	I believe that the attending Santa Teresa Elementary School will be exposed to dangerous and unnecessary levels of pollution that do not aim to benefit the wellbeing of the town. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Thus permit should not be passed as it puts at risk the fragile health of our children and elders.	Merged Document	1	No	[redacted]
Anonymous	Anonymous	This project is a mission that will begin an ending to this place we call home. Theres little to no of the Rio left and our summers are getting hotter and hotter. Bloom Energy has a history of dumping hazardous waste and there is no guarantee they won't do it again, instead of risking the health and lives of the people in this community, the air quality permit application must be denied. If we go through with this, it will bring forth climate disaster, government sponsored environmental racism. Please don't destroy this beautiful place we all home with this project. The people who've grown to call this place their home should have a say in what happens to it, community member participation is extremely important to us. Please listen to us and help us save our home.	Merged Document	1	No	[redacted]
Grecia	Jaramillo	-The data center will emit 10 million metric tons of carbon dioxide annually more than the annual emissions of Albuquerque, Santa Fe, and Las Cruces combined. - The RioGrande is already going through an Environmental threat, in addition with this data center would only increase the drout, and pollution of the RioGrande. - The bloom fuel cells operate between 800 through 1,000 degrees and will contribute to heat island in the local Santa Teresa community, raising neighborhood temperatures by 3.6 degrees or more. -The data center will emit 10 million metric tons of carbon dioxide annually more than the annual emissions of Albuquerque, Santa Fe, and Las Cruces combined. - The RioGrande is already going through an Environmental threat, in addition with this data center would only increase the drout, and pollution of the RioGrande. - The bloom fuel cells operate between 800 through 1,000 degrees and will contribute to heat island in the local Santa Teresa community, raising neighborhood temperatures by 3.6 degrees or more.	Merged Document	1	No	[redacted]
Trinity	Johnson	Please don't build this it's super not beneficial for the environment and will only lead to more problems in the future. What's the point of having all these things if nobody will be around to see it and use it? The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]
Anon	Anon	I do not believe that project Jupiter is good for New Mexico. I do not believe that there will be long lasting jobs with the data center. Of course now, as they are in construction, there are people working but what happens to those people when they are done? Our those pouring concrete and laying brick be the same folks you need for technical support? In three years time, maybe more maybe less, ai will be far more advanced than what we are currently seeing, thereby making a data center obsolete. As of 2017 New Mexico has been in a drought, and in 2024 that drought was considered disaster level. What water do we have to cool the center? Water will be used and polluted. Project Jupiter is no good for New Mexico. Ai data centers kill land and water, all our natural resources are for humankind not for Ai. Sincerely, [illegible]	Merged Document	1	No	[redacted]
Lea	Carmichael	My name is Lea from the UK, and I have been aware and strongly against the usage of generative ai for a long time. The data centres use and destroy billions of gallons of drinking water to cool every year, reducing the water that humans and animals alike can access, which is already declining. They are also contributing to the warming of the planet with the carbon that they use. The impact on the climate alone is enough to be against Project Jupiter but generative ai also comes with its social injustices. Generative AI steals data and steals art to produce its prompts, this reduces jobs in many industries and invades the privacy of millions, if not, more. AI has been responsible for the increase in child porn, including the recent Grok AI scandal with Elon Musk's "X". I ask that: The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules Not comply with the environmental and social impacts that generative AI is involved in. Please consider this as you will be held responsible for what AI does to this world. Thank you for reading.	Merged Document	1	No	[redacted]
kylvis	dixon	Flowers, with their delicate petals and vibrant colors, have captivated human attention for centuries—not just for their beauty, but for the rich symbolism and complex biological purpose they carry. From the wild meadows bursting with untamed poppies to meticulously cultivated rose gardens, flowers seem to exist at the intersection of chance and control, nature and nurture. They are more than mere decoration; they are nature's intricate mechanisms of reproduction, attracting pollinators with their scent and symmetry in a quiet evolutionary dance. Yet beyond their ecological role, flowers have become messengers in nearly every culture—tokens of love, mourning, celebration, and apology. A single bloom can evoke memories, convey unspeakable emotions, or completely transform a space, however briefly. Even in decay, they remind us of the fragility of beauty and the constant cycle of life and death. There's something quietly profound about how a flower, fleeting as it is, can hold so much meaning in such a short time——like a soft rebellion against time itself. [illegible]	Merged Document	1	No	[redacted]
Anonymous	Anonymous	Dear NMED staff, My name is Anonymous. I am a Kentucky resident, living in West Point, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I am a 22-year-old preparing to enter college to obtain a degree in the Environmental Sciences and Conservation. As a young activist, I fear companies and funding partners for A.I. Data centers, more like this one, don't fully understand the gravity of the widespread damages that can be on our planet with these large compounds. The project's proposed fuel cell powered grid is concerning for many reasons (which include, but are not limited to): - It would still produce a high level of greenhouse gas and toxic pollutants. - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology or a centralized waste system has never occurred at this scale. - Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should provide the public with a 60 day grace period to review and comment on the Application to ensure everyone can meaningfully comment and participate. Sincerely, Anonymous	Merged Document	1	No	[redacted]
Dianamarie	Medina	To need AI is like needing someone to help you drink water when you can perfectly use YOUR hands to drink it yourself. You dont need Ai, you depend on it. Learn the difference and stop wasting water. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]
Danielle	Anonymous	Please cease work on and funding for Project Jupiter! There is already enough damage to the climate as it is! Also, please give the public an additional 60 days to review the air quality permit and provide additional comments, so as to appropriately involve the community. The permit should be denied, but if not, please hold a public hearing in Santa Teresa, in both English AND Spanish, with the option to participate virtually. Please take this into consideration, and cease with Project Jupiter!	Merged Document	1	No	[redacted]
Mezhlenaz	Bennett-Perez	I am against project Jupiter. This project will hurt our communities in New Mexico by taking our water and electricity and only giving us higher temperatures and emissions released. This project is not going forward in a proper way and needs to stop. If this project continues it shows that the lives and health of New Mexico citizens don't matter and neither does our environment. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]
anonymous	anonymous	Please do not destroy New Mexico. It's not worth it. In 3 years this will all be irreversible and climate change will destroy us all, please do not speed up this process. It will impact everyone not just locals. Moreover, it will severely impact the locals and could dramatically increase the air quality in their homes. Residents in Doña Ana County are already disproportionately affected by environmental pollution. How would you feel if you were unable to breathe air that's of adequate quality? The air quality permit application needs to be denied. You can make a positive impact by not going ahead with this. We already have too much methane gas in our environment. Money will not buy good quality air. Please reconsider.	Merged Document	1	No	[redacted]
Kimberly	anonymous	I am writing to express my opposition to the proposed AI data center in our community. While I recognize the importance of technological innovation and economic development, I believe this project raises significant concerns that deserve careful consideration. AI data centers require enormous amounts of electricity and water to operate and cool their equipment. This could place additional strain on local utilities, increase energy costs, and compete with the needs of residents, farmers, and businesses—especially during periods of drought or high electricity demand. The project may also have environmental consequences, including increased greenhouse gas emissions if powered by fossil fuels, noise from cooling systems and backup generators, and the loss of open land or wildlife habitat. These impacts could reduce the quality of life for nearby neighborhoods. Although developers often promise job creation, AI data centers typically provide relatively few permanent jobs once construction is complete. The long-term benefits to the local economy should be weighed carefully against the ongoing environmental and infrastructure costs. Before approving this project, I urge decision makers to require a comprehensive environmental review, transparent public engagement, and enforceable commitments regarding renewable energy use, water conservation, noise reduction, and community benefits. Our community deserves assurance that any development will be sustainable and serve the public interest. I respectfully ask you to reconsider this proposal or require stronger safeguards before moving forward. Thank you for taking the time to consider the concerns of local residents.	Merged Document	1	No	[redacted]

Uma	Anonymous	Dear NMED staff, I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90I Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: the cell still produces a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology is a centralized waste system has never occurred within scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 90I Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.		No

Alannah	Medina	The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. We are already seeing real tangible damage from these venture and I see are moving water at a rapid rate. I cannot bring kids into this world knowing they have an unfair chance at a thriving earth and ecosystem. They are dumping this hazardous waste which is only further showing society that they do not care about us. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document							Yes	Yes		Yes	Yes	Yes	8/27/2026		
Jimena	Gomez	It's not fair to our future generations to grow up without clean water, we have the luxury of drinking clean water and they probably won't because of project Jupiter or even clean air The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County.	1	No															
				Minimal Document							Yes	Yes		Yes	Yes	Yes	8/27/2026		
Jess	Anon	STOP TAKING NATURAL HABITATS AND USING THEM FOR YOU OWN GAIN. Protect your own world this and lower class citizens before plundering the elite who only wants to profit off of the suffering of those who can't stand up for themselves The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County.	1	No															
				Minimal Document							Yes	Yes		Yes	Yes		8/27/2026		
Anonymous	Anonymous	Dear NMED, Here is a question I ask you today. If you were to travel to another planet what three things would you bring from Earth. You probably said water, right? That is how valuable it is. So valuable that you would put in your list of top three things you need to survive. Now, I want you to think about going to the bathroom and not having water in your sink, shower or toilet. Not having clean water to drink when you feel dehydrated. This may not be happening to you now, but it will happen. Think about the children of your children. Do you really want them to ask you when was the last time you saw clean water. Or when was the last time you've breathed fresh and pure air. When they ask you that you will stay silent because you decided to approve the Project Jupiter. But not only this, this project will also affect YOUR lungs and the way YOU breathe for how much it will affect our air and environment. This comment comes from a young girl in Europe who instead of worrying about her exams, is worrying about the planet. We need to protect our water and we need to protect our air in this time more than ever. I hope you take this message into consideration. Thank you "The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	No															
				Minimal Document							Yes	Yes		Yes	Yes		8/27/2026		
Anonymous	Anonymous	This cannot go on. The world is literally crumbling around us and this project is contributing more and more to the environmental collapse and public health. Have some humanity and respect for our planet, our people, our water. No money or power or technology will save us from all dying, including YOU. I am only 26 and I lead my entire life at the whim of people who want to destroy the future of humanity, for what, a paycheck? No one deserves to live without our basic human rights. Protect this ground for the sake of your families, children, future generations, and yourself - because whatever you sow with the decision to keep this project going will be coming for you too. My voice: The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document							Yes	Yes		Yes	Yes		8/27/2026		
Nina	Anonymous	I do not approve with the the construction of this Centre. It is detrimental to people's well-being and continuation on this earth and is only going to cause more harm than good. Please, do not make this Centre. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document							Yes	Yes		Yes	Yes		8/27/2026		
Lorraine	Brady-Spider	I am a resident of San Marcos California & I oppose Yucca Growth Infrastructure's Data Center. AI data centers use up far too much precious resources for human beings, plants, & animals. Along with that Data Centers create large amounts of pollution that contributes the destruction of our home. We do not need AI data centers, especially in a place as rare like these. We are sacrificing our trees, economy, and planet for a technology that barely does anything for anyone. Letting this data centers be built is wrong. There are far too many risks & damages that will be caused if they are allowed to build this. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document							Yes	Yes		Yes	Yes		8/27/2026		
Matthew	Rieder	Sometimes the price of "innovation" is too high. It cannot come at the expense of nature. We cannot ask the environment to pay that price. The things that will be lost are found in only one place in our unfathomably huge universe and both on our paradise amongst the stars. Whether it was by divine decree, or pure chance, we have been ordained to be the stewards of all life on our blessed Earth. It is imperative that we act accordingly, before there is nothing left to be the stewards of. We are often told that "life isn't fair." But when we have the power to make it so, as we do now, why shouldn't we? The public who will be most impacted by this should be given ample time to both review and comment on the permit. Decisions made by those who won't have to suffer the consequences of them have created enough misery. All this to say, the permit should be denied outright. Bloom Energy has already proven itself incapable of doing the right thing with its history of illegally dumping hazardous waste. Transgressions such as these cannot be allowed to happen again. In the event the permit is not denied, a public and bilingual hearing should be held in English and Spanish in Santa Teresa. Those who cannot attend in person should be given the option to attend virtually. Too often our brothers and sisters of less advantaged races are made to shoulder the burden of the consequences of "progress." Simply put, the granting of this permit would be no less than state-sponsored environmental racism. The past may not have been equitable, but the future can be. Doña Ana County's air is already below Federal standards. It cannot be made worse.	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
Ronin	Santesteba	I already see that the world is dying enough and I don't want any more of that and I feel like if this thing actually gets built it's going to get normalized and we're gonna see bigger and more data centers like that and it's just going to kill our world. The public should given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No

Daeshia	Velazquez Cotto	We want better things for our future yet, we don't realize we are sacrificing our future itself by contaminating and polluting our planet. This project could be not only the lives of every innocent animal on this earth but ever mankind as a whole. We cannot sacrifice our home. We cannot let capitalism and greed overtake us. The rich don't have the final say, the billions of us on this planet do. We need to fight for our earth, we need to fight for all the innocent creatures that are dying due to global warming, pollution, contamination of habitats and more. We need to fight for our children, our spouses, our parents, our friends. Our family. Please fight against the creation of data centers, pollution, global warming, littering and general contamination of our earth. This is the only chance we get, we do not have 9 lives. I am 23 years old and recently married. I looked forward to a whole life ahead of me, I deserve to age. I deserve to watch my future children age. I deserve to fulfill my life with my husband and die by his side when we reach old age. We all deserve that. Save OUR planet. Save YOUR planet. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
Hella	Anonymous	I am signing because Project Jupiter is a direct threat to New Mexico's future. Spending $14B billion on a massive AI data center that exploits our scarce water supply and relies on fossil fuels is incredibly irresponsible. Our desert communities cannot afford to sacrifice finite natural resources and clean air for corporate profits and tech infrastructure. We need sustainable development that protects our environment, not projects that drain it dry.	1	No															
				Minimal Document							Yes						8/27/2026		
NA	NA	The approval of this air permit would be a disastrous end to clean air, water and quality of life in New Mexico, especially those who would be living near the proposed site. Thousands of people being near data centers nationwide have already seen life-altering effects to their living situations. This includes pollution to the air and water in surrounding neighborhoods and businesses, and not to mention the noise pollution that many effects those who may live especially close to these giant centers, causing these residents and families to live their lives without clean water and resources in their homes, or having to relocate somewhere that provides said resources in their homes and businesses that they pay for. Please help your community and do your duty by listening to NM residents who are urging you, not to follow	1	No															
											Yes			Yes			8/27/2026		
CNYS	DAY	I will never stop advocating for keeping nature intact and it is a well-known fact by now that data centers destroy our earth. I want our environment to thrive, for the comfort of every person and creature who lives nearby. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish with an option to participate virtually	1	No															
				Minimal Document							Yes	Yes		Yes	Yes		8/27/2026		
Anonymous	Anonymous	I would like to say that Project Jupiter is a waste of resources that could be funneled to more beneficial things that help both people and the environment surrounding them, e.g conservation of environments like the desert, and efforts to stop climate change, instead of propagating #s that hurts the environment and the active public health and safety of people, and goes against NMED's core mission entirely- "To protect and restore the environment and to foster a healthy and prosperous NM for future generations." If NMED goes through with the permit, their credibility decreases, and people will trust them less because they're actively going against their core mission, which is just hypocritical of them in itself.	1	No															
				Minimal Document								Yes					8/27/2026		
Riley	smoothy	If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	1	No															
				Minimal Document										Yes			8/27/2026		
Tyler,	Campbell	As a 20-year old young woman growing up in the age of rapidly advancing technology such as AI, I firmly stand against the construction of this data center. Not only would it DESTROY the quality of life for the people who have to live near it, it would be making the world's already struggling atmosphere struggle even harder. Where I live, temperatures are already at record highs with the overuse of AI around the country and communities, namely those of color, are being displaced and destroyed so that these horrible data centers can be constructed. Why don't the rising bangs on this planet deserve to keep rising? Why in the world would you continue to build destructive technology that is poisonous and dangerous to everything in the world, including the earth itself??	1	No															
				Minimal Document											Yes		8/27/2026		
Keith	College	We do not need ai. We do not want ai. We do not want billionaires. We do not want project Jupiter. A stupid, destructive, and pointless endeavor that is a waste of intelligence and resources. Anyone willing to be part of such a impulsive project should be left on the streets with no aid and no kindness from any human ever again. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County.	1	No															
				Minimal Document							Yes	Yes		Yes	Yes		8/27/2026		
Keegan	Russ	To the NMED, As of July 8th, 2026, you have received over 30,000 comments regarding the Yucca Growth Infrastructure, LLC 90I Microgrid Air Quality Construction Permit Application for the 90I Microgrid in Doña Ana County. Out of these 30,000 comments, thousands upon thousands are from individuals of a strong community who are urging you to reject this project. Today I too write to you in order to strongly urge you to reject the proposed AI data center and everything associated with it and its proposal. This project poses extreme danger to the people, wildlife, and entire environment of New Mexico. It poses extreme harm to your own people and children. It poses extreme danger to your own plants and animals. It poses extreme danger to your own land that your own feet walk upon. This project will produce large amounts of greenhouse gasses and toxic waste directly adjacent to schools and residential areas. It will also create a large amount of noise pollution. Both of these will put the people of the Doña Ana Area community in extremely poor conditions for their health. It will harm everyone. It will harm the adults, the children, and the elderly. It cannot be more important that you realize that these companies are willing to put the health and even the LIVES of men, women, and children at risk, just so they may get more and more money for themselves and their shareholders. It will harm the wildlife, it will harm the ecosystem. Here still, Bloom Energy, one of the companies behind this project, has a history that is rife with dangerously illegal hazardous waste disposal methods, the truth about their work and what they are, and how they present themselves. These companies do not care about the wellbeing of the people, and the people clearly do not support this Data Center being built by a vast majority. Despite this, the companies behind this project, knowing that their proposal is not getting the support they want, must resort to playing dirty. They must resort to falsifying comments of support by soliciting the people of New Mexico for their opinion of the matter and their contact information, only to submit fake comments of support under said people's names without their consent. They have been caught doing so, reported on the news for doing so, faced a lawsuit for doing so (and for a number of other matters). They continue to refuse to speak on these matters when questioned, and continue to be desperate for the support they are not getting. It is no surprise that being people are not willing to put the health of themselves, their families, their friends, their community, and their environment at risk for the sake of the profit of rich people who would never do the same for them. At their core, these companies are dishonest. If this project was truly as good as they claim it out to seem, they would be straightforward about how they will manage the waste produced by the project. They would not need to falsify support for their project. They would not need to resort to paying Instagram influencers thousands to support them. They would not be facing lawsuits against their practices and how they are harming the people. They would not suddenly lose their voices when they are confronted with the hard questions. That is the simple truth. For these reasons, myself and thousands of others are sharing our voices with you to encourage you to reject Yucca Growth Infrastructure, LLC 90I Microgrid Air Quality Construction Permit Application. This is more than just the state at risk, and risks the health and futures of children. There is no true reason that would ever be worth that. The people of New Mexico are not guinea pigs to be tested on or tools to be lost to. We are a community beneath you to outright reject this project.	2	No															
				Minimal Document								Yes	Yes	Yes	Yes	Yes	8/27/2026		
Hugi	Brown	This project is absolutely unnecessary! We as humans have lived perfectly fine without AI but suddenly we need it?! This is not the needs of the people, but for the rich, egotistical, idiotic class who are incapable of doing anything they claim (one of the working class. This will not only destroy our environment further, but harm innocent communities as well. No one needs this project! STOP PROJECT JUPITER! The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
Akuoty	Kur	I am a resident of Phoenix in Arizona and I oppose Yucca Growth Infrastructure's air quality permit. The massive data center costs Americans their air quality and water. As an Arizonan, my state is currently facing the effects of data centers and I see we have more than enough issues for their residents. The public should get a two-mil more days to review the permit. There are not enough regulations to prevent climate destruction due to AI and giving Bloom Energy green light would be allowing more government-funded environmental racism towards the residents of the Doña Ana Area County. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
Lauren	Reyes	Dear NMED team, My name is Lauren Reyes and I am writing because I have concerns with the risk and harm with Jupiter project's to Mexican residence. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90I Microgrid in Doña Ana County. We do not need data centers to survive. building data centers can have an extreme effect on the environment which people that live on. It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. fuel cell technology or a centralized waste system has never occurred within scale. Surrounding communities' air will be negatively impacted by this development. We have lived without hundreds of data centers before why do we need to build them now? If that is something also has a chance of using water that we need or other animals that live there is extremely concerning. Or what about the air quality? We are building so many insignificant things like data centers and drilling in the western Arctic. Instead, we should be doing so many more things to be saving our environment wouldn't we wanna do that? Why wouldn't we live on this planet we should take care of it, so please reject this project to help many more on this earth. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
Anita	Anonymous	Project Jupiter's power plant will release up to 33 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The earth is already warming by a considerable amount, already the temperature is bleaching our reefs which are vital to the earth's ecosystem, in addition to this, it is now not uncommon to have several people die due to heatstroke during the summer, I am aware that the earth's temperature naturally fluctuates, however, it will eventually reach a point where crops fail and livestock die which will cause major food shortages, and that's assuming that the unusually high temperatures don't kill parts of the population. Keeping all of that in mind do you really think that it is appropriate to build yet another power plant, especially one that could cause the quality of life of vulnerable people to massively decrease?	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
Reina	Contreras-Canseco	I am a resident from DB. The further construction that will be happening when 700k+ people have commented against it. The preposterous the long game certification bad when a dying business asks in killing the earth. The construction will be inevitably be a waste since it will never sell in real state either. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. There are also no pollution controls in place by the developers to at least take preventative for the community and environment. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
Aoife	Drew	Dear NMED staff, My name is Aoife Drew, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90I Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: • The proposed "micro" grid has a 1,362 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PJM grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. • This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. • Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCS. • Fuel cell technology has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. • The Application is based on pollution testing from a very small unit. The testing unit is only 66kw, while the power plant is 27,000 times that size. • Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the desulf canisters is exempt from air permitting regulations. Stop killing the earth. we are all going to die because of you.	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
Heavenlee	esquivel	I am a resident of san Miguel county, as I watch video after video shows statistics of the rio grande drought with years upon years of constant heat waves the thought of having a large scale data center in a vulnerable part of our state is disheartening. be suffered through the horrendous wild fires that rained over the northern part of the State and to know that air quality is something that no one should go through Mom, woman or child. knowing that our own representative support, this is disheartening. Vote no on project Jupiter if you care for you citizens. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document								Yes			Yes		8/27/2026		
JI	AU	Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? The county has and continues to turn a blind eye to illegal dumping epidemics, so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation? A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana and Otero County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	No															
				Minimal Document								Yes	Yes		Yes	Yes	8/27/2026		

Aoife	Drew	Dear NMED staff, My name is Aoife Drew, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons. About: The proposed "micro" grid has a 2,460 MW Capacity. For comparison, the El Paso Electric grid is about 2,000 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. About: This is more greenhouse gas pollution than New Mexico's three largest cities combined Ardoisch, Albuquerque, Las Cruces, and Santa Fe. About: Santa Teresa Elementary and High School are located within five miles of this project site. 94% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. About: Fuel cell technology has not been deployed at this scale. This is 1000 times larger than the largest existing Bloom fuel cell installation. About: The Application is based on pollution testing from a very small unit. The testing unit is only 66kw, while the power plant is 37,000 times that size. About: Fuel cells generate hazardous waste. Fuel cells filter out the sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "desulf canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the desulf canisters is exempt from air permitting regulations * (because there is less than 1000 lbs/yr). * NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLCs air permit application for the 90s Microgrid. If NMED does not reject the permit, I ask the department to please hold a bilingual hybrid public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. NMED should give the public 60 days of additional time to review and comment on the Application to ensure everyone can meaningfully comment and participate. Sincerely, Aoife Drew	1		No															
Sandra	Williams	We don't need more data centers, its unnecessary and enough water is already being wasted am generative AI! No more unnecessary AI, it takes too much water and no one needs this amount of AI, stop enforcing it!!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No															
Mia	Winter	Building an ai center would be horribly devastating to the local and state ecosystems and disrupt the quality of life of any locals and state inhabitants, driving out many citizens. As such I urge you to completely cancel all construction progress for project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.	1		No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Natalie	Bruce	To whom it may concern, Hello. My name is Natalie Bruce, and I am wholeheartedly opposing the approval and continuance of Project Jupiter. I oppose the approval of the air quality permit that Bloom Energy has applied for. In order to give the public ample time to speak on this issue, I ask that the people be given 60 days in order to review and comment on this air quality permit. I also ask that this permit be denied altogether, since Bloom Energy has a lengthy history of illegally dumping hazardous waste and other materials. If this permit is approved, you will be directly contributing to environmental racism. Those in poor communities would no longer have access to clean drinking water, clean air, or the peace and quiet that they needs developed each, especially in the case of children. Doña Ana County is already affected by environmental pollution, the air quality in the surrounding area does not meet the federal standards of cleanliness. They cannot take any more atmospheric abuse. It is not safe. If said permit is not denied, I also ask for a hearing to be held in Santa Teresa, in both English and Spanish, with the opportunity to participate virtually. I urge the individuals in power to look inward, and find your humanity. This is wrong. It is morally, ethically, environmentally, wrong. I ask that you, all of you who read these comments, stop this project from going forward. For once, prioritize people over profit. There is no Planet B. It is our responsibility, as the "apex species", to protect our planet and to make it habitable for future generations. We needs do better as a collective. I am trying to be part of that "better", and I ask you to follow suit. Find your humanity. Find your soul. Stop Project Jupiter, and do not approve of this permit. Thank you for listening, and thank you for doing the right thing. We have hope. Sincerely, Natalie Bruce	1		No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
Anonymous	Anonymous	Project Jupiter should not be continued. If there completed, it would likely create water shortages in smaller communities and worsen climate change due to its high carbon emissions. I am personally already feeling the impacts of climate change—here, the heat index has exceeded 105°F, and the weather has been consistently severe. Additionally, the Rio Grande has already dried up before summer began, which is a clear sign of the strain on water resources. If Project Jupiter moves forward, both I and potentially thousands to billions of others could face even more extreme weather conditions and droughts.	1	Minimal Document	No					Yes	Yes			Yes	Yes	8/27/2026				
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Rosa	Soriano	I strongly oppose the proposed Yucca Growth Infrastructure (YGI) Microgrid Data Center project in Doña Ana County due to concerns about air pollution and public health impacts. This project could worsen local air quality through emissions, construction pollution, and increased industrial activity in our community. Residents deserve clean air and a healthy environment, and I urge the Department to deny this permit application.	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
Lia	Victoria Hernandez	I grew up in Tucson, constantly hearing about the importance of our water and our duty to care for our land. In order to understand both, one must be aware that our natural world does not care for state borders; that what happens in one state will affect another. As a proud citizen of Arizona, I am disgusted by the greed of those how have no understanding of the importance of our water and land. This power plant will harm countless lives, greed and small, for what? A measly profit? National security? Or some other buzz word to distract from the destruction? I can't help but scoff. How can one excuse a action that they are killing from the inside? Bloom Energy has a history of illegally dumping hazardous waste- they must never qualify for a permit. Most of the people most affected by this, are their voices to be silenced? The citizens of Santa Teresa deserve to have their concerns heard and heeded, both in English and Spanish, in accordance with our values as Americans. This plant is NOT needed, much less wanted. Our one-of-a-kind desert and all those who inhabit it deserve much better than this.	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026

CHLOE	O	Dear NMED staff, My name is Chloe. Although I am not a New Mexico resident, I am a resident of earth, and I am writing because I am very concerned about the risks and harms Project Jupiter poses to the world globally. I am submitting this comment to strongly urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid in Doña Ana County. The amount of toxic pollutants, water waste, and unsolicitedly about the real risks of an A.I. data centre this big, holds massive implications to not only New Mexico but the entire world. In the community alone, the quality of air, water and electricity WILL be negatively impacted on a scale we have not yet seen the consequences for. I strongly urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Chloe	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
Aggod	Alina	How would it be possible for a data center this big to cause no trouble? There is already global warming and much more things that are actively destroying our earth and we do not need another one. AI data centers already take away a lot of clean, drinkable water. But if we take another, even bigger data center it can and possibly will pursue future that already is not promised to be good in extreme risk, many people will not have access to clean water and many cities will be at risk, there are already many peoplewho have struggles with accessing drinkable water and one of the main reasons for that is AI data centers. This project is a really horrible idea and it would cause so much damage to this planet, especially to the people that are living in that area towards that area. What about cases of catastrophic failure? Areas opposing those deadly incidents of pollution in advance without any real data informing us of the risks at this scale? Highly flammable hydrogen under high pressure only needs a microscopic crack to leak out, ignite, explode, and even entire neighborhoods and schools while sending shockwaves into nearby counties. Assuming this risk, an act of gross negligence, at a scale that has never seen remotely been demonstrated in practice would be unbelievably careless. These permits must be denied outright. Further deliberation is decried, a public hearing in Santa Teresa is non-negotiable. We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these tests were even done on site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical mortality of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you.	1	Minimal Document	No					Yes		Yes			Yes	8/27/2026				
Anonymous	Anonymous	I am a citizen from the Philippines I do not live near the Project Jupiter or live in the same country. I am asking that you deny Yucca Growth Infrastructure's air quality permit. I care about our planet that have been taking care of our long before everything was discovered. The Earth is the planet that we only have so destroying her will only destroys us. It's like putting a bomb in your own home. The people's health will be in danger, maybe not now but someday. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. The people and Earth's life could be in danger. The public should be given an additional 60 days to review and comment on the air quality allowing community members to participate equitably.	1	Minimal Document	No					Yes		Yes			Yes	8/27/2026				
Shayna	Burkdoll	My name is Shayna Burkdoll, I am a New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid in Doña Ana County. I very strongly oppose the ongoing activity that is taking place in my state. I don't believe in fuel cell technology being deployed on such a massive level, the power plants that this project is implementing will be generating enormous amounts of hazardous waste, further contributing to the global destruction of our beloved planet, as well as the fact that it poses risk to nearby New Mexico citizens via toxic health impacts such as NOX, CO, and VOCs. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Shayna Burkdoll	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
Zuzanna	Zuzanna Olszewska	Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we won't just have to worry about it, we'll have to live with it. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Candela	Celeste Fernández Díaz	Dear NMED staff, My name is Candela. I am a New Mexico resident, living in Santa Fe, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid in Doña Ana County. Data centers are proven to be extremely detrimental for local communities of both humans and fauna and flora, who suffer from its noise, the pollution they produce and, most importantly, the massive amount of water they use in order to refrigerate its systems, in other words: The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Candela	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
Dan	Jacquez	Data centers are hazardous for the environment and only benefit the billion dollar company who selfishly make them. There are major concerns about the tremendous amount of water usage and pollution that comes with building these centers. Please do not make them anymore and stop the construction of ones in progress.	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
Miranda	Latorrera	Dear NMED staff,	1	Minimal Document	No					Yes	Yes					8/27/2026				
		My name is Miranda. I live in Manila, Philippines, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid in Doña Ana County.																	
		I am currently in highschool and I'm scared for the future and the harms of what this project can do to our environment. I wanna make an action to stop this, to stop the project from releasing toxic fuel and to stop it from consuming the water that we humans need along with other habitants to live. This project is unnecessary and harmful to our ecosystem. This bullshit needs to be stopped.																	
		The project's proposed fuel cell powered grid is concerning for many reasons:																	
		It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never been tried at this scale. Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 90A Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.																	
		Sincerely, Miranda																	
Anonymous	Anonymous	Hello, I don't think project Jupiter should be approved. I am against all AI. AI is killing are planet. Instead of spending billions of money on the Project Jupiter, we should use that money to save the animals going extinct, to plant more trees, and to clean are earth. If we stop this project, I believe we would have a better future for are people.	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.																	
anonymous	anonymous	New Mexicans are known because of our traditional values. That includes being good stewards of the land and taking care of it. This also includes the air we breathe and the water we drink. As a small local farmer, I rely on water to feed my crops and animals which will in turn feed my family. Unless if this data center goes through, then that means that the local temps will go up. The water pressure will go down as well as the quality of the remaining water. We all need to band together and stand up for our values and traditions as New Mexicans. We have been farmers since the 1600s and long before that, we cannot stop being who we are.	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Eli	Carter	Hello,	2	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
		I am writing to oppose granting this permit, I do not believe that Project Jupiter has any redeeming qualities when it comes to the environment or the well-being of the people of Las Cruces, Doña Ana County, or the surrounding areas.																	
		Data Centers such as this one cannot be environmentally friendly, it is in their best interest, and their standards, to remain online 99.999% of the time, to do so requires fossil fuels, as even the have the infrastructure to run such a project on renewables, and they have no interest in building any for themselves, as renewables are not able to keep up with their uptime.																	
		Let's do a calculation, the people behind Project Jupiter have previously stated that they would power the data center using natural gas, an abundant and cheap energy source, but also a polluting single use source. They plan on building a 750MW power station, according to a paper published by the New Mexico State Legislature, in that same paper they estimate 2.7 million tons of CO2 will be produced annually, roughly 3 times the pollution generated by the city of Las Cruces, New Mexicos' second largest city. 2.7 Million tons of CO2 a year is roughly the same amount of carbon emissions as the entire country of Chad, almost twice the entire emissions as the Bahamas, and 6 times the pollution of the country of Greenland, in only a fraction of the area, and only from one source, polluting an entire county and surrounding areas.																	
		Additionally, I would like to point out how telling the fact that they are forging signatures is to the popularity of this project. They can't find enough people that support this project, so they have to make up statements. This project has been littered with lies and falsehoods from day one, and we should not be rewarding those that attempt to pull the wool over our collective eyes. They lied about how many jobs it will create, they lied about it's support, they are actively trying to lie about it's environmental impact, and I would not be surprised if they were lying about both the budget, and where that money will go, because I'm willing to bet that only a fraction of the money they are spending will go into the state of New Mexico.																	
		I would like to leave you with this, Las Cruces is a college town, people walk to and from classes, people go to concerts downtown, or on the lawn behind Cobett Center. I go to school in Las Cruces, my sister is going to go to school in Las Cruces, my friends live there. This data center would make a lot of our lives measurably worse, as we enjoy breathing in pollution, no sovereign strong. I haven't been faulted on the water yet, YPPSD already has notoriously poor water, this would make it worse, in every conceivable way and this is a problem that would affect El Paso as well, as El Paso gets much of it's water from the Rio Grande, which Project Jupiter is conveniently taking water from. We can't afford the worse air quality, or the extra water usage, and this Microgrid goes against the states renewable energy goals.																	
		I would like to make it as clear as I possibly can, I am not in support of Project Jupiter, and I do not believe we should be letting them continue with this project.																	
		Deny this permit, thank you for your time.																	
anonymous	anonymous	The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Furthermore, the center itself should not be built. It is an UNNECESSARY project that will only cause more harm than good, especially to those in our community. There is no need for "extra funding" in our community. That funding will get used to solve problems that we KNOW will be created and/or exacerbated by the building of this project. We are furthering ourselves from supporting our community and environment, the whole reason that the NMED exists, and instead dragging them down for no rightminded reason. Money doesn't help people if they can't even breathe the air in their community. The air quality will be so negatively affected that you, the NMED, will be forcing them to choose between their health and their owned and maintained property. Project Jupiter is intending to forcibly kick these people off the land, which they have inhabited for generations. Please DENY their permit. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
Cinthia	prieto	The United States does not need more data center. They use drinking water from communities that already struggle and will harm the environment. The true question that must be posed is what will this giant project do for the communities other than fill the pockets of millionaires that do not care about the planet, animals, or people.	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.																	
Anna	Luige	I am someone who is concerned about residents' safety in a local capacity as well as a larger human community and general public well-being. Seeing this plan the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. An air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste and if the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Not to mention this would be a huge contributor to further pollution and worsening of public health.	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
		The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Kathleen	LeMoine	Don't poison our air!!! Deny these permits- or atleast extend the comment period and hold a PUBLIC hearing. It is ridiculous that project Jupiter hired canvassers to manufacture consent regarding these permits. Fix it!!!	1	Minimal Document	No					Yes	Yes	Yes		Yes	Yes	8/27/2026				
Rita	Zevallos	Although the data center has committed not to use potable drinking water, it is still using water that is necessary for the survival of the ecosystem that our independence relies on.	1	Minimal Document	No					Yes		Yes				8/27/2026				
		The Rio Grande River ran entirely dry last year, with dead fish in the riverbank. It is very low this year already (July 2026). The river sustains a structural part of the ecosystem (if you visit you will see) as well as provides sustainable independence for small farms and ranches especially in the reservations, we are talking about non-potable water here, drinking water is not the only concern, ... obviously.....																	
		Comparing the water usage to the water usage of 9 households seems logical on the surface, but is not actually comparable because human households and humans living also participate in the water cycle (returning), and data centers do not. This comparison also serves to make it sound like it is not that much being siphoned, but you really don't know how much siphoning is critical when we are talking about a desert.																	
		A few Weeks ago the aquifer in Santa Clara, a settlement in Doña Ana [illegible]		Minimal Document						Yes		Yes				8/27/2026				

McKinna	Berry	I ask you to NOT go through with project Jupiter. Project Jupiter is going to warm so many families, and wildlife. People are native to the land around them and they will be forced to leave that. Imagine how you would feel, knowing your own home is being taken over for an AI COMPANY. The public should be given an additional 60 days to review and comment on the air quality permit no community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.			1		No																
Oliver	NA	Data centers are a waste of space, hurt the environment and are a fucking waste of money, that could be spend helping our earth and not hurting it, they shouldn't exist, Donald Trump is a fucking stupid ass man who has no common sense or care for the only world we live in. If we kill this world we dont get a second chance, data centers should get turned off, stripped away and tossed out, they harm peoples water, they hurt animals with the noise and lights, they use so much water that could be used for the better.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Nawal	Haddad	We have no planets, we cannot be wasting our limited resources on data centers. Project Jupiter is going to do more harm than good to our planet and to us. Something that you aren't realizing is if we kill our planet we are killing ourselves, this has been one of the hottest summers yet and it's damaging building, the wildlife, and so much more. We never needed us in the past, so why do we need it now? The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirrored Document		1		No				Yes		Yes			Yes		8/27/2026
Tim	Keller	I strongly admonish the new construction of the Yucca Growth Infrastructure (LLC)(docket) 926 Microgrid data center in New Mexico and urge all parties to halt development until there is clear, transparent public review of environmental impacts, energy sourcing, water use, and local community effects, with meaningful mitigation and enforceable commitments to protect the land and people of the state.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Anonymous	Anonymous	All of us who care for the well-being of our nature and planet, our only home, should take part in helping save that environment. At has gone too far and industries don't care about the communities affected, the population has to scream for justice. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Patricia	Emerson	Please don't do this. I have Asthma and the air quality is really important to me because if it gets worse, which will 100% happen with this data center my asthma attacks will be more frequent and the risk of having COPD is also heighten. As an Air Quality Bureau the lung health of the citizens should be top priority and you should not give permits to anyone that risk damaging the air quality you are meant to protect.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
abby	anonymous	A proposal, such as this one, that relies on computer simulation modeling instead of actual, measured air pollution at scale is invalid, untrustworthy, and far from what residents of Doña Ana County and New Mexico deserve. What data was used to train these models? When and where was this data collected? What proportion of those involved in the development of this model have, at any time, received money from the corporations involved? How much? If NMED was giving testing for this project, 99% of the exhaust stacks at this facility will never be physically tested during the entire life of the Title V permit. This creates an unintentional loophole that escapes the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and will have even not told whether these stacks were even done on site or during peak temperatures, we can safely assume the applicants cut corners here as well as in an attempt to fast track this approval. As I write this, Project Jupiter is drawing on an estimated amount of water from the Mesilla Basin aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Anon	Anon	We do not need AI data centers, we have gone so long without them. These data centers do nothing for us other than mass the environment up even more. They cause more harm than they do good. They need to be shut down for good. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Mary	Lane	Dear NMED staff, My name is Mary Jane. I live far from New Mexico, but I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. I may not be a resident, but I do hold the safety of communities to a great extent, even those outside my own. I believe that Project Jupiter fails to address the real issues that the data centers exist to create for the community, especially to those who will be directly affected by it. Santa Teresa Elementary and High School are located within five miles of this project site. 94% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. Not only do they put children's health be at risk, they have also failed to inform the local government of their doings. Tribal governments like Tortugas Pueblo, Ysleta del Sur, and Pueblo communities with landholdings in Doña Ana County near the site have not been properly notified of this air permit application request. This is unacceptable. In Addition, the project's proposed fuel cell powered grid is concerning for many reasons: · It would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. · Fuel cell technology or a centralized waste system has never been tried at this scale. · Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026

Israel	Pleasant	Billionaire profits at the risk of resources and land that are already deprived is corrupt. The habitat destruction in New Mexico is already too much with urban construction taking over especially in rural areas like Rio Rancho and their too. add a useless data center is actually evil. Why tech houses for people to live here if we won't be able to breathe or drink. New Mexico has precious wildlife and flora, why destroy that for the most useless thing in this world. AI is garbage.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Lorenzo	De La O	This project completely undermines our entire community in Albuquerque and around like no cochos for example. A lot of these family depend on the little water we have as is and it's going to be taken away from us for some irrelevant companies that aren't even located in the state they want to build in. The POLLUTION of soil that will be released into the air from this fuel cell would completely destroy all of our agriculture and farm our people that have been living here for generations. It's in no way acceptable in any shape or form to allow this to further put our local areas and state at such a high risk for no gain in any way to the state. Money can not be such a blinding god that these ones and guddy money hungry bigots to see what irreversible damage it can cause to our home. Growing up I had to watch the families and communities around me struggle for the little water our state has and in the past few months I have never seen the Rio grande as dry as it is now in my entire life. If this data center is built will cripple us and destroy our ways of life and this company won't suffer any repercussions for it. WE need to be angry! WE need to speak out on this as a community! WE need to stop this!	Mirrored Document		1		No				Yes							
Ada	Hernandez	Honestly no reason to have this here, not only will it be taking water but it kills the wildlife.	Mirrored Document		1		No				Yes					Yes		8/27/2026
Kirana	Erlangga	Dear NMED staff, My name is Kirana, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. I am a student who recently graduated from middle school in Southeast Asia. As a student myself, I can recognize the hardships when learning in an environment that doesn't support it. No one should be able to have limitations to learning, but it should be even to all. My personal reason is that Santa Teresa Elementary and High School are located within five miles of this project site. 94% of students at the high school are Hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. And the fact that NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. The project's proposed fuel cell powered grid is concerning for many reasons: · It would still produce a high level of greenhouse gas and toxic pollutants. · This technology generates toxic waste, and the process for handling this waste is still unclear. · Fuel cell technology or a centralized waste system has never been tried at this scale. · Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Calls to action : I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid.	Mirrored Document		2		No				Yes		Yes					
Aria	Na	This data center is REALLY bad for the environment, please do better. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Angelique	Maestas	To the New Mexico Environment Department, As a lifelong resident of New Mexico living in Moriarty, I am writing to strongly urge NMED to deny the air quality permit applications for the Project Jupiter data center microgrids. While out-of-state advocates debate tech infrastructure, actual residents know this project poses severe risks to our water, air, and public health. Water and clean air are non-negotiable necessities for New Mexicans, and we cannot afford to jeopardize either. My concerns include, but are not limited to, the following critical issues: Water Security: Groundwater depletion is a reality right now; just 30 minutes down the road from me, the Town of Estancia is in a water emergency, hauling water by the truckload. Any heavy industrial draw on our aquifers—even for closed-loop cooling systems—threatens our long-term water security. Extreme Greenhouse Gases: Despite switching to fuel cells, public notices show this facility will still emit over 10 million tons of greenhouse gases annually—more than New Mexico's two largest cities combined. This accelerates climate change and actively degrades our environment. Local Toxic Air Pollution: The surrounding communities already struggle with unsafe levels of air pollution. Splitting this massive power source into two separate applications appears to be a tactic to evade "major source" air monitoring requirements while still dumping tons of nitrogen oxides and hazardous VOCs into local neighborhoods. Unproven Technology & Toxic Waste: Fuel cell microgrids have never been tested or managed at this massive scale. Furthermore, the process of filtering natural gas for these systems creates highly toxic hazardous waste, including benzene. The long-term handling and disposal plans for this waste remain completely unclear.	Mirrored Document		2		No				Yes		Yes			Yes		8/27/2026
Serenity	Stewart	Are we going to add ecological collapse to the list of things the government is pointedly ignoring and being ignorant about? What's the goal after pushing Earth to a point of irreversibility? Humans have thrived for centuries (decades more recently) without the existence of AI. The extremist, elitist, men in power are not spending the entirety of their wealth they are pursuing within their lifetimes. Every data center and factory planted is furthering the collapse of ecosystems, pollution, and the rapid decline of organisms that have fed or have been displaced because of the human settlement. Animals and humans alike are suffering. The same men who claim they are pro life, are ignoring the air and water pollution coursing through these children's homes and skies. Look up the rates of asthma in children where these centers and facilities are planted. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
SOPHIA	OSBOANA	Dear NMED staff, My name is [OSBOANA SOPHIA], I live in [NIGERIA], and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. (I AM CURRENTLY AN ARCHITECTURE STUDENT WHO UNDERSTANDS THE RISKS THIS PROJECT STANDS TO POSE TO THE ENVIRONMENT AND THE HEALTH OF THOSE AROUND IT) The project's proposed fuel cell-powered grid is concerning for many reasons: - It would still produce a high level of greenhouse gas and toxic pollutants. - This technology generates toxic waste, and the process for handling this waste is still unclear. - Fuel cell technology or a centralized waste system has never been tried at this scale. - Surrounding communities' air will be severely impacted by this development. I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology and to give an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Vashonie	Grosso	this is completely unfair to people who did not ask for this, the animals, nature, or even our own planet we live on. approving this permit would be government-sponsored environmental racism as residents of doña ana county already are disproportionately impacted by environmental pollution. the air quality permit application should be denied given bloom energy's history of illegal dumping hazardous waste. the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. if the permit not followed, a PUBLIC hearing needs to be held in Santa Teresa, in BOTH english & spanish. with an option to participate virtually aswell. for years, doña ana county has been called a non attainment zone, meaning that our air quality doesn't meet federal government rules. please do better. for yourselves, our community, for the people, for the earth, and your friends and family.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Anon	Anon	Dear NMED staff, I am writing anonymously as a New Mexico resident because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: The proposed "micro" grid has a 2,460 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PJM+ grid is about 2,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas production than just Project Jupiter's proposed power plant. The Chihuahuan Desert borderlands are not a human dump site for Bloom Technologies to test their experimental technologies. Santa Teresa should not serve as ground zero for Bloom Technologies to scale their toxic technologies. Fuel cells generate hazardous waste. Fuel cells filter out sulfur and other contaminants in the methane stream. These contaminants accumulate as hazardous waste in "diesel canisters." The power plant will be generating enormous amounts of hazardous waste. Jupiter claims that any pollution from opening and changing the filter media in the diesel canisters is exempt from air permitting regulations (because there is less than 1000 lbs/yr). NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 930 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anonymous	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Rocio	Martinez	As a resident of New Mexico I wholeheartedly disapprove of any data centers being built in this beautiful state. Though I live in northern New Mexico, the effects of air pollution and the mistreatment of our water supply affects our community greatly. I will not stand idly by while corporations try to taint our air and pollute our community with toxins. I believe in the preservation of our one and only plant earth. Our state is already known for it being almost dead land in education. Please don't let this be another negative thing we are known known for. We need to at least be educated on how to keep our beautiful state free of corporations that do not care about our desert climate and those that inhabit it.	Mirrored Document		1		No				Yes		Yes		Yes	Yes	Yes	8/27/2026
anonymous	anonymous	In a world where we should be fighting against climate change, things like this are happening and affecting all of us. We lived without ai before we could do it again but we cannot live without this planet. While selfish and selfless billionaires are ruining our chances for a better and stronger future. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Mirrored Document		1		No				Yes							
NA	NA	This project cannot, in good faith, be approved until all energy is created by renewable energy with no carbon or ind emissions. A project that will create more carbon emissions than MIQ and El Combinado is shameful and should not be considered. Its impact are severe, and creating heat domes in our local communities and contributing more locally to climate change is irresponsible. These companies have more than enough money and means to create completely sustainable grids. Bloom Energy can use Green Hydrogen tech, not this "Blue" hydrogen tech which is not remotely sustainable. This application, as is, is wildly harmful to our communities and it's your duty and responsibility to ask more of these companies, should they want approval to build and conduct business in our state and communities.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Shannon	Binning	This "project" is an example of the gross negligence on, as a world have toward the negative impacts climate change will do and already has done. Stop this ridiculous project for the sake of the planet we all call home. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Mirrored Document		1		No				Yes		Yes					
na	na	I ask you to deny Yucca's infrastructures air quality permit. Doing this permit can cause so much damage to the people and animals that live there. Pollution will also cause massive environmental changes to them with heatwaves already being a problem. Adding 30 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to an active and long-time residential zone would be basically turning a blind eye on the people and animals. Doing this can promote even more ground level ozone. Why pursue much effort into a huge data center that would ruin the environment and other people's lives? I ask you to deny Yucca's growth infrastructure air quality permit because trading lives for "building the better future" will end you in a future of contamination and regret.	Mirrored Document		1		No				Yes		Yes			Yes	Yes	8/27/2026
Andres,	Astorga	The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Mirrored Document		1		No				Yes		Yes					8/27/2026
DAVID	SUAREZ	As of today, June 1st, 2026, AI is constantly proving itself wrong. The heads of all these artificial intelligence companies give us false promises of AI helping us throughout our lives, but so far it has only made everything worse. All of these centers are taking our already short supply of water to cool their data centers, and leaving the rest of the world without anything. Please, help your community by stopping this project, so that the generations ahead of us can still see the water that runs through our country.	Mirrored Document		1		No				Yes		Yes			Yes		8/27/2026
			Mirrored Document								Yes							8/27/2026

Anonymous	Anonymous	Was sent this from a friend and it's just awful stuff, I can't imagine a world where water just fully evaporates which leaves us completely screwed otherwise. Please don't let this happen. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana, Otero, Eddy, Lea, and Chaves County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No	[redacted]													
Kenneth	Elizabh	The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Stop fucking up the planet!!!	1		No		Yes	Yes	Yes		Yes	Yes		8/27/2026					
Samantha	Estrada	I am a resident of El Paso Texas. We do not want this data center. We're already in a drought, the prices keep going up and up with no help from our elected officials. The only reason they want this is to put money into THEIR pockets. It will end up coming to how it did in other states where we can't physically generate from the El Paso water company anymore. Or end up spending hundreds of dollars more just for the water to even be clean. All these promises of the area changing and benefiting the community when there's been nothing but bad news coming from these. Local dumping ruines to the people and the community, all use of the water they have, constant air pollution, and even electricity blackouts. We've survived thousands of years without it we don't need it now, especially when the money hungry people are just trying to get more and more. What good is money if no one has it?? there's no cents pay anymore!!! It's just useless by then.		Mirrored Document	No				Yes	Yes					8/27/2026					
Anezka	Barrera	I am a resident of Phoenix, Arizona, and I respectfully ask that Yucca Growth Infrastructure's air quality permit for Project Jupiter be denied. Arizona has been my home my entire life. My family and I live here, work here, and hope to continue building our future here. I want to know that when I eventually have children, they will be able to grow up breathing clean air instead of worrying about pollution getting worse every year. Right now, the air quality in our area is extremely poor. During the summer, the heat can be unbearable, and there are many days when people are warned to stay indoors because of unhealthy air. Adding another large source of pollution would only make those conditions worse. I worry not only about my own health but also about the health of my family, friends, neighbors, and everyone who lives in our community. Many people in Arizona already struggle with asthma, allergies, and other breathing problems. Higher levels of air pollution can make these conditions even more dangerous. The extreme heat we experience every summer is also becoming harder to handle, and more carbon emissions will only contribute to rising temperatures. Families are already dealing with expensive electricity bills just to stay safe during the hottest months. We should not make those challenges even greater. I am also concerned about the long-term environmental impacts of this project. If hazardous waste is not handled properly, it could contaminate our land and water. Once pollution spreads into our environment, the damage can last for years and cannot simply be reversed with a fine or apology. Future generations deserve clean water, healthy soil, and safe communities. I believe that every community deserves access to clean air, regardless of where they live or their income. Decisions like this should prioritize the health and well-being of residents over the profits of large corporations.	1	Mirrored Document	No				Yes	Yes		Yes			8/27/2026					
Stormie	Chemonis	As a tattoo artist Air is talking every our jobs, and our artistic work. So many people cannot get jobs because these employment systems are ran by us. Our environments health is declining due to data centers, its getting hotter, and the air doesn't feel clear and so many eco systems are at risk.	1		No														
Na	NA	Project Jupiter in Doña Ana County poses significant environmental and public health risks that warrant a denial of its air permit application. The proposed industrial activities are likely to introduce elevated levels of particulate matter, nitrogen oxides, and volatile organic compounds into the atmosphere, directly compromising air quality for residents and contributing to respiratory illnesses. Furthermore, the increased industrial footprint threatens the delicate desert ecosystem, disrupting habitats for indigenous wildlife and potentially contaminating vital water sources through atmospheric deposition. Granting this permit would not only undermine the health and well-being of the local community but also set a dangerous precedent for industrial development in environmentally sensitive areas, neglecting the long-term ecological and social costs.	1	Mirrored Document	No				Yes	Yes					8/27/2026					
Kiera	smith	I do not support the development of this data centre as it's outcome will further push the earth into its own demise. The heat is rising, and people are dying because of it. Such a large area could be benefitted by other things that aren't it's community rather than ruining the wildlife around it, destroying their habitats, the air quality, and adding pressure to the already struggling climate. We already face many issues, so with our earth, and exasperating the problem is the last thing we need. To continue with this project is to agree to the detriment of our planet, and acknowledge that you're allowing it's fall. This won't just affect the global population. Everything lives on earth and has a right to do so, or does not experience the world. We do.	1	Mirrored Document	No				Yes	Yes					8/27/2026					
Miranda	Jaquez	New Mexico already experiences severe drought, a data center would only increase problems like this. Our state has already been abused for its undefended lands. The people that live here do not want to deal with the problems that a data center will bring into our communities.	1	Mirrored Document	No				Yes	Yes					8/27/2026				
Anonymous	Anonymous	I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: theould still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana, Otero, Eddy, Lea, and Chaves County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No															
NA	NA	Dear NMED staff, My name is Anonymous. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: the would still produce a high level of greenhouse gas and toxic pollutants. This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. Destroying the environment in order to hire the pockets of billionaires is absolutely ridiculous. Humans have survived hundreds of years without this new technology. However, this new push will only leave the Earth starved of everything we require to survive. Please, I beg you all to reconsider this decision because I would like to live a long, healthy life and I'm sure you would too. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Anonymous	1	Mirrored Document	No				Yes	Yes	Yes	Yes	Yes		8/27/2026					
Maggie	McKay	The language of sustained development is nothing more than the language of sustained capitalistic growth. For Project Jupiter to freely advocate for the idealistic nature of Doña Ana County as a data center site, historically acknowledged as a "nourishment zone," is indicative of the power the language of sustained development to has as well as the true intentions of those who wield it. Data centers are antithetical to environmental preservation, and thusly, to human flourishing. Biospheric destruction and lucrative endeavors to sponsor An orchestrated passivity will not save us. There can be no data centers built in Doña Ana County, encroaching upon the community, resources, and water of that land. It is a great injustice that the residents of Doña Ana County have been repeatedly disregarded. Building the largest plant that Bloom Energy has ever presumed to build next to a heavily populated area blatantly spits upon and revokes the humanity of all those in the vicinity. For the government to sponsor and approve Bloom Energy's air quality permit is to claim that the residents in Doña Ana County are less deserving of life than other human beings. To permit Project Jupiter is government funded environmental racism, a reoccurring motif in the black-relations between #Black&Brown governments&Black/Those They are Sworn to Protect. For New Mexico's government, selling out would not only make selling their own souls but imagining themselves authority enough to condemn the lives of 229,000 others. Air quality and lethal emissions aside, Bloom Energy's history of illegally dumping hazardous waste, the failure of their developers to include pollution controls, and the convenience with/rule that this center would consume around 1 million gallons of water daily guarantee any tone nature that might be a good "investment" for Doña Ana County. The very real carnage Bloom Energy wrought can not hide behind the thin pallia of "green," and "sustainable" growth. The residents of Doña Ana County should hold the final sway, as lives directly affected and thusly infinitely more valuable than any wealth Project Jupiter can endlessly accumulate. New Mexico's government cannot purport to come to its citizenry while entertaining Bloom Energy. To do so would be to act as executioner. Let us not pretend that the plights of nature and human beings are not inextricably intertwined. The people say NO to Project Jupiter.	1	Mirrored Document	No				Yes	Yes	Yes		Yes		8/27/2026					
Grace	Glasgow	Bloom Energy has a dangerous history of illegal dumping of hazardous waste. Residents of Doña Ana County have already been disproportionately impacted by environmental pollution. With this in mind, imagine the potentially irreversible damage that they and this project will do to so many future generations and families in Santa Teresa and Doña Ana County. North's mention that approving this permit would be government-sponsored environmental RACISM. In order for community members to have equitable participation, the public should be given an additional 60 days to review and comment on this permit. And, if such permit is not denied, a public hearing needs to be held in Santa Teresa, in English and Spanish, and with an option to participate virtually. I have friends with family heritage in NM. If NMED's mission is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations," then they should know very well how much damage this will not only give to their reputation, but also to the community they've sworn to environmentally foster, "restore," and "protect."	1	Mirrored Document	No				Yes	Yes			Yes		8/27/2026					
SHAYLA	NUTT	Dear NMED staff, My name is Shayla Nutt. I am a New Mexico resident, living in Southeast New Mexico, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid in Doña Ana County. I believe the construction of this data center is going to be detrimental for the environment we have in New Mexico and also to all those who live here. We are residents of this amazing state have the right to clean uncontaminated air and water. All of the children in surrounding communities deserve the right to grow up and not worry about having clean water, clean air and only health risks from the pollutants from this data center can and WILL create. Your mission to "protect and restore the environment is absolutely why you should not allow the construction of this site. Please help us keep our state healthy, clean and enchanting. The project's proposed fuel cell powered grid is concerning for many reasons: it would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, S.N.	1		No															
Morena	Anonymous	Project Jupiter is a lousy excuse for the rich to get richer and for the poor to die off. Any rich man can get access to clean water and fresh food. Any poor person can't. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana, Otero, Eddy, Lea, and Chaves County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Mirrored Document	No				Yes	Yes		Yes			8/27/2026					
Miriam	Anonymous	We need to stop or we don't even need it!! I don't know why out of a sudden we need it!! Trump needs to stop putting loot cartoon in the air as global warming gets worse and animals starts dying then when animals die there won't be anything to eat! That's how we die and we can't eat money. Trump needs to get put out the office immediately! New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Mirrored Document	No				Yes	Yes			Yes	Yes	8/27/2026					
MELISSA	PETERS	We do not need this constructed. It will cause major health and environmental impacts to the nearby communities, and will only provide a minor increase in jobs.	1	Mirrored Document	No				Yes	Yes			Yes	Yes	8/27/2026				
Lara	Bittencourt	Dear NMED staff, My name is Lara, and while I live in Florianópolis-Santa Catarina, Brazil, I am deeply concerned about the environmental and social impacts of Project Jupiter, proposed by Yucca Growth Infrastructure, LLC in Doña Ana County, New Mexico. I understand that the company, formerly known as Aizono LLC, initially sought to build two gas-fired power plants. After receiving over 7,000 public comments in opposition, it shifted its strategy and now proposes a fuel cell technology project. However, this so-called "evolution" is merely an attempt to bypass outdated regulations and advance a plan that remains highly polluting. It is unacceptable for the company to frame this change as a reflection of community concern. In truth, the project would still emit up to 10 million tons of greenhouse gases annually—an amount equivalent to the combined emissions of New Mexico's three largest cities: Albuquerque, Las Cruces, and Santa Fe. Moreover, the proposed fuel cell technology has never been tested at this scale (21,000 times larger than the existing test units) and produces hazardous toxic waste, including "dead" canisters," improper handling of these waste products has already led to millions in fines for Bloom Technologies in other states. The project's location is equally troubling. Schools like Santa Teresa Elementary and High School—located just 1 mile (1.6 km) from the site. Children and vulnerable communities will disproportionately suffer from pollutants such as NOx, CO, and VOCs, making this a clear case of environmental injustice. Additionally, Indigenous communities, including those from Tortugas Pueblo, Nieto del Sur, and others, have not been adequately informed about the emissions license application. The NMED's mission is to "protect and restore the environment, fostering a healthy and prosperous New Mexico for present and future generations." Approving this license would directly undermine that mission. I urge the NMED to fully reject Yucca Growth Infrastructure, LLC's application for an emissions license for the 950 Microgrid. If the license is not rejected, I strongly request that the NMED hold a hybrid and bilingual public hearing in the Santa Teresa community, ensuring residents receive clear, accessible information about the risks of this technology. I also ask that the department extend the public comment period to 60 days, allowing for broader and more meaningful participation. New Mexico cannot be a testing ground for untested and hazardous technologies. The future of our planet and local communities hinges on courageous and responsible decision-making. Sincerely, Lara Florianópolis-Santa Catarina, Brazil	1	Mirrored Document	No					Yes						8/27/2026					
Mallory	Cavaletti	Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Every this air permit. Gambling with the fragile health of our children and elders would be a complete defilement of the authority vested in you. This is extremely dangerous and selfish and we hope you listen to the people or we will take action.	1	Mirrored Document	No				Yes	Yes		Yes		Yes	8/27/2026					
CAT	AUSMAN	Nobody asked for project jupiter and it would cause more harm than good. Drinking water is already being labeled as a "threatened resource". A data center of this size will ensure that access to clean drinking water will become a issue. Water bills will increase and people will therefore lose access to safe water. This will be the greatest use of resources we will have used as a society. Stop Project Jupiter.	1	Mirrored Document	No										8/27/2026					
Charlotte	Burton	Stop this project for the benefit of our future on Earth and our wildlife. We can live without AI. We can't live without water. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No					Yes					8/27/2026					
Konrad	Juengling	As the Air Quality Bureau, Project Jupiter falls directly under your purview as data centers significantly contribute to air pollution in the form of higher greenhouse gas emissions, and some centers build on-site gas turbines or even thousands of diesel backup generators. The project will pollute our breathing air, the water, and the land. We also don't have the water supply available to support this project. Please prioritize citizen's air quality, and thus their health, above profits for a large company that hasn't really contribute to NM's economy in any significant way.	1	Mirrored Document	No				Yes	Yes		Yes	Yes		8/27/2026					
Alexandria	Ma	We do not need to be making more data spaces when many communities are actively losing clean water, around 40Miles North where I live, the local lake has gone down by 4 feet of water and this is not normal. The government needs to stop being selfish and stop encouraging the development of data spaces just for a which will end up being a dying industry with in a few years. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Mirrored Document	No				Yes	Yes		Yes	Yes		8/27/2026					
Jaliyn	Perez	Please do not go through with this project as the air quality in Doña Ana county is already not the best. Going through with this project will only worsen the air quality which will risk the air and possibly the residents health. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually because the residents that need here have as much say in the project as the people willing to go through with it. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Mirrored Document	No				Yes	Yes		Yes	Yes		8/27/2026					
Serena	Stratos	Hi, My name Serena and I've come from NZ to help make changes so we can protect the wildlife of the globe. I am 18, I only just started my adult life and yet it's nearly already over. My job has been taken by ai, my career path I've wanted as a child has been taken by ai and yet I still push through. I adore animals, New Zealand's native animals are our nation. They are heavily protected and we tend to protect other wildlife too to prevent anymore deaths of the animals that were here before us. We killed their homes, abused their land for years, they were here first and yet humans have managed to reign them of their own needs. I fight for change for Animals to have better homes and to feel safe in their own environments without the greed of power and the love of it too. Thank you for reading, Kaeira x. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Mirrored Document	No				Yes	Yes		Yes	Yes		8/27/2026					
Ashley	Horton	I am writing to express my opposition to the Yucca Growth Infrastructure (YGI) Microgrid Air Quality Construction Permit Application for Project Jupiter. While I recognize the importance of economic development and job creation, I believe these benefits should not come at the expense of New Mexico's air quality, water resources, public health, or the long-term well-being of surrounding communities. I respectfully ask the New Mexico Environment Department to carefully evaluate the potential environmental impacts of this project before making a decision. My concerns include: - The potential for increased air pollution and greenhouse gas emissions. - Possible impacts on local water resources and long-term water availability. - Risks to wildlife, native habitats, and the surrounding ecosystem. - The cumulative effects of industrial development on nearby communities and future generations. - Whether the environmental mitigation measures proposed are sufficient to protect public health and the environment. Although the applicant has highlighted economic investments and community contributions, I do not believe financial commitments alone should outweigh the need to protect New Mexico's natural resources and the health of its residents. I respectfully urge the New Mexico Environment Department to deny the air quality construction permit, or at a minimum require a more comprehensive environmental review and stronger protections before allowing the project to move forward. Thank you for considering my comments and for your commitment to protecting New Mexico's environment.	1	Mirrored Document	No				Yes	Yes					8/27/2026					
Delilah	Anonymous	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gases every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. This is more greenhouse gas pollution than New Mexico's three largest cities combined – Albuquerque, Las Cruces, and Santa Fe. The proposed "micro" grid has a 2,362 MW Capacity. For comparison, the El Paso Electric grid is about 2,900 megawatts (which services NM's second largest city, Las Cruces) and the entire PNM grid is about 3,700 megawatts. Each of those grids include a substantial amount of renewable energy sources and each of those grids has lower total greenhouse gas pollution than just Project Jupiter's proposed power plant. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1		No															
Deanna	Mendiola	this act should never have even been a thing. I wish i was able to do something other then just sit on my couch scrolling through tiktoks about project jupiter and all of the bad things that are polluting the planet. The public should be given an additional 60 days to review and commentson the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1		No															
BETO	Nirk	nobody needs this much room other than ai which is already damaging enough. to build this data center means so many go without water, horrible turnout for the climate, and increases in cost of living as well as decreased standard of living for low income families in the area. stop project jupiter.	1	Mirrored Document	No				Yes	Yes		Yes	Yes		8/27/2026					
Catherine	Z	don't make climate change worse than it already is. These projects are going to be the cause of the end of the earth. Save our animals that we rely on to survive ourselves. Keep the air clean because we don't want a future where our younger generations are having to breath out of dense supply of oxygen tanks. New Mexico Environment Department should give the public an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana, Otero, Eddy, Lea, and Chaves County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Mirrored Document	No				Yes						8/27/2026					
Hannah	LaFleur	I am a resident of Ogden, Texas and I am asking that you deny Yucca Growth Infrastructure's air quality permit. Project Jupiter is entirely unnecessary and unwanted. It will pump 10 million tons of carbon dioxide into the atmosphere. How can that be considered clean? Bloom is known to be careless with their waste, so what about their toxic/oxygen anyone the impression they are to be trusted with this? Where will we have for AI when we are starving because we don't have enough water to feed the bush? Not to mention the environmental impact it will have on the environment and the welfare of the people in those communities. How does that enable them to lead a better life? We have not needed AI to come this far, we don't need it now. I ask that you use all that money and infrastructure to create something that actually helps PEOPLE live better lives. Not corporations trying to move down their bottom lines by firing all their workers because "AI does it just fine." AI is meaningless against all we stand to lose from its existence.	1	Mirrored Document	No				Yes	Yes					8/27/2026					
Apollo	Vallejos	Dear NMED staff, My name is Apollo. I am a New Mexico resident, living in Guadalajara, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: it would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 950 Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Sincerely, Apollo Vallejos. "The public should be given an additional 60days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	1	Mirrored Document	No															
Jaime	Luna	Stop killing the only planet we have, the insatiable greed won't get you more money anyway when there's nobody alive to give it to you. It is insidious to think anyone could be okay with ruining the world for incompetent technology in the first place, but knowing the risk vs reward and default of the populace for the sake of a ugly waste of time as a result. Deeply concerning and ugly behaviour. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana, Otero, Eddy, Lea, and Chaves County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a "nourishment" zone– this means our air quality does not meet federal government rules.	1	Mirrored Document	No				Yes	Yes		Yes	Yes	Yes	8/27/2026					
Ronald	White	In addition to the massive releases of CO2 and particulate matter, which should not be allowed in a Federally recognized air quality non-attainment area, please look at the impacts of the heat that will be generated as a result of the cooling required to run the Jupiter Project's computer network. Part of the region's non-attainment issue is that frequent and long-lasting temperature inversions occur in southern Doña Ana County. Adding more heat will increase the frequency and severity of those events.	1	Mirrored Document	No				Yes	Yes		Yes	Yes		8/27/2026					
									Yes	Yes									

Israel	Anonymous	I am deeply concerned with the affects on the climate project Jupiter is going to have. It's estimated that it will fill the air with 10 million tons of climate warming gasses a year. This not only disregards New Mexicos previously established climate goals but it's a higher amount of pollution than the states three largest cities combined. On top of that ai data centers have been proven around the country to affect the local water supplies. Given the struggle of all south western states to have adequate amounts of water this could have serious impacts on everyone living in the state. Finally various schools and daycares are close enough to the proposed location for the data center that they would be affected by the pollutants being poored into the air. This is an injustice to these children and could cause serious health affects. It also raises social concerns as these schools and daycares host primarily Hispanic children with 96% of the children at the nearby high school being Hispanic. This alone should be enough to get project Jupiter cancelled immediately. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
anonymous	anonymous	I think that this will really put everyone in a really bad state especially because idk if it is true but the Ai uses a lot of water just for the cooling which is also water that we need then also the air pollution will get worse because there's already fires that are making the air pollution bad pls stop for sake of the world	Merged Document	1	No	[redacted]	Yes		Yes				8/17/2026
Shaunasy	McCarty	New Mexico is a beautiful desert state with so many more things to offer it other than a giant data center taking our natural resources. We've been in a drought since the state was created, and with data centers using MILLIONS of gallons of fresh water, we would have practically no more left for the people who actually live here. NM residents should be given proper notice when companies try to bypass air quality laws (as this center would also deplete our already low air quality) and the proper hearings/meetings with the public should be held, as we are the ones being directly impacted by the actions these types of companies. Please do not allow this building to take water that we barely have now from people who need it.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	8/17/2026
Lyndon	Anonymous	I am turning 16 in a month and 25 days. I don't know if there's a point to grow older if this is my future. This project devastate the forest, ecosystems, animals and water supply. It'll release unprecedented amounts of CO2 into the air that we won't be able to take back. This project will directly lead to horrific consequences that we won't come back from. We're already in a climate disaster, this will push it to the edge. There is no need for Ai, humans have been here for 3 billion years, we survived and thrived for 3 billion years and never once needed Ai. And we don't need it now. All you care about is money, but you cannot eat money.	Merged Document	1	No	[redacted]	Yes		Yes				8/17/2026
Rey	Hibbard	A.I WILL destroy our planet. We DO NOT need A.I to live, but we do need clean air and water. Is it really worth it to doom the planet for this? New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Avery	Lykins	It's disgusting that there is even the possibility for this data center to be built. I can't believe the absolute disregard that people have for our fragile environment. All of this for money that won't be useable when the environment is too damaged. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	I'm writing to make absolutely clear how opposed I am to this project. I do not want another data centre much less one that will be one of "the biggest ones in the world" The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
A	Peterson	Please DO NOT APPROVE air quality permit #10883 FOR YUCCA Growth Infrastructure, LLC. The proposed "microgrid power generation facility" (Project Jupiter) will emit unhealthy amounts of greenhouse gases that will be harmful to the residents in the Santa Teresa, NM area. This project has been surreptitiously fast-tracked in its construction causing New Mexicans much skepticism about its safety and the potential harm it will cause to NEW MEXICANS. We need stronger safeguards put in place and much more oversight regarding environmental impact of this proposed data center. I am vehemently opposed to approval of any permits for Project Jupiter data center.	Merged Document	1	No	[redacted]		Yes	Yes				8/17/2026
Anonymous	Anonymous	It is important to have clean and fresh air for everybody, humans and animals. For us to have a good future, for our future generations we should have clean air. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Rachelle	Dragomir	Deny the air quality application permit for Jupiter Data Center Development in general and data centers specifically detrimentally impact the environment. The cost of massive development for data centers is too great for minimal long term job creation at the expense of loss of natural resources including air and water quality. The wealthy will continue to exploit resources while the state and its citizens (minority and majority alike) are left with degraded quality of resources, costs to repair damages (think of leaking gas and oil infrastructure in Farmington and elsewhere and mining damage), costs to off set the tax relief that goes along with the development, and less permanent job creation and economic opportunity than advertised. They are here to exploit NM for personal gain. The cost is too high and NM needs to take a stand against these pillagers. Be a leader! If the data center need is so great then choose options that will have less impact - be creative not destructive. Data center pods located in areas already developed powered by solar attached to existing infrastructure is a solution that would benefit home owners and big/small business while minimizing impacts to air quality and the environment. If you are unable to deny the permit outright then consider extending the comment period 60 days and hold a public hearing in Santa Theresa to allow public participation in both Spanish and English.	Merged Document	1	No	[redacted]	Yes	Yes	Yes			Yes	8/17/2026
JADA	KELLER	I am a resident of Ohio and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue living here knowing that we have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 16th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2000. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities. The carbon dioxide pollution alone will heat our atmosphere at a much faster pace and promote the formation of even more ground-level ozone. We cannot afford more intense heat. The other toxic air pollutants are extremely dangerous–many of them at very low levels. it can cause permanent brain damage or breathing complications. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and many other things of this continues.	Merged Document	1	No	[redacted]		Yes	Yes	Yes	Yes		8/17/2026
Neyeli	Anonymous	We do not need project Jupiter, as it is ai is taking large amounts water. We have lived without ai before we do not need ai taking up anymore space. New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]	Yes	Yes	Yes		Yes	Yes	8/17/2026
Anonymous	Anonymous	This is disgusting and harmful to our planet, our environment is polluted enough and this act will not only pollute our air but it will dry up our rivers, this is inhumane. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Robertrey	Jaramillo	I, Robertrey Jaramillo, am making my opinion known to denounce Project Jupiter. The actions of this center pose a threat to the community in its usage of utilities through electrical and water. Data Centers are shown on smaller scales to rival cities in usage of electricity, which can affect local grids and not allow usage of the community's own power. The water, already seen as an excessive amount to run a building, will heavily affect all of New Mexico. The state is in constant droughts, and a data center is always running non-stop. I use to work at the Meta center, so my knowledge on non-stop operating is known for all data centers. Another factor to take note is heavy noise pollution of the local area. Even if it's isolated, it affects all wildlife and the people around it. This data center is unnecessary for the community, as it will push our drought further than before, and will not be accepted by our community.	Merged Document	1	No	[redacted]	Yes		Yes	Yes			8/17/2026
Roberto	Reyes	Dear NMED staff, I am a resident of Austin Texas. Yes I am not a resident of New Mexico but I am a resident of the world we share. This is OUR WORLD, I write this letter to share my opposing view on the opening of your new data center / your project 'planet Jupiter' . Constructing this center you will release millions of green house gasses into our atmosphere causing a further pit into our already enormous pit of a problem we have known as global warming. This problem has already done more damage towards our earth such as the disruption of one of the largest eco systems we have known as the arctic. Sea levels are rising, glaciers are melting and our beloved polar bears are dying. If you conduct the opening of this AI facility our future will be in further more danger, nearly irreversible as we know it. Not only the arctic but our coral reefs, the tropical beautiful artifacts of the ocean that we love are now gone. Due to waste which is also greatly impacted by artificial intelligence. This will also be to blame if you further conduct the opening of the New Mexico project planet Jupiter. Toxic waste is real and your power plant fueling your AI facility center will produce enormous amounts of it which could very well be the demise of our environment furthermore our future. I sincerely write this letter in attempt at signaling my love for this earth and the beauty it carries. Sincerely, Roberto Reyes.	Merged Document	1	No	[redacted]			Yes				8/17/2026
NA	NA	"Project Jupiter" carries unavoidable, negative environmental changes, which will affect many communities. (E.g. less fresh drinking water)	Merged Document	1	No	[redacted]	Yes		Yes				8/17/2026
Delilah	Acosta	We cannot treat New Mexico as a dead land, these people don't know the life and loving memories made here, the same being connected with My rio grande that gives us most our warm showers and cold water to our fresh clothes and sheets. AI doesn't deserve the same dedication and "support" New Mexicans bring to our agriculture DAILY. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Paul	Bjorgan	Project Jupiter is a methane fueled power plant with too dangerous amounts of pollution. And it's expected to use one million gallons of water per day. Two reasons to not have this data center in our state! I and everyone I know is against Project Jupiter.	Merged Document	1	No	[redacted]	Yes		Yes				8/17/2026
Anonymous	Anonymous	There is no sustainable path for project Jupiter to continue. The air quality as it is, is not currently meeting air quality standards. The hazardous waste that will be generated from project Jupiter will devastate the land, and take New Mexico's precious resources. Please stop this	Merged Document	1	No	[redacted]		Yes			Yes	Yes	8/17/2026
Elena	Bunker Ryiz	New Mexico does not have the energy or water for this project it will have detrimental effect on people here.	Merged Document	1	No	[redacted]	Yes						8/17/2026
Anonymous	Anonymous	This is damaging to the environment. It is a climate catastrophe. We have already experienced record-high heatwaves across the globe. Doing this adds to the destruction of our planet and the eradication of life as we know it. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
anonymous	anonymous	Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs.	Merged Document	1	No	[redacted]		Yes	Yes				8/17/2026
Jenifer	Ontiveros Aguilar	Yucca Growth Infrastructure's gas-powered fuel cell plant is 1,000 times larger than Bloom Energy's biggest existing fuel cell plant. In fact, worldwide, Bloom Energy has developed 1.4 GW of fuel cell technology across more than a thousand locations, yet Yucca Growth Infrastructure is asking for nearly double that (2.46 GW of fuel cells) at a singular location. The largest fuel cell plant in the entire world is more than 30 times smaller than the fuel cell plant under consideration in Santa Teresa. There is absolutely no way to know, with certainty, what the actual pollution levels will be given the tremendous size differential, and thus gap in data, between operational fuel cell plants and this theoretical plant proposed by Yucca Growth Infrastructure. Betting the livability of our county on this unpredictable and unproven plan would be a total capitulation and betrayal of your so-called values: "protects the public health of New Mexicans...by preventing the deterioration of air quality;" "protect and restore the environment...foster a healthy NM for present and future generations" Though approximations of annual air pollution were provided, the testing used an extremely weak methodology leaving us, ultimately, with pseudoscientific guesses that have large margins of error. Estimated pollution levels for this gas-powered fuel cell plant are based on only three 4-hour pollution tests from a very small unit (only 65 kW). This is a far cry from thousands of sweltering fuel cells operating 24/7 at maximum output in close proximity, all in the scorching heat of our open desert. The lack of rigorous testing at even this small of a scale is lazy and very concerning, especially given that the gas power plant Yucca Growth Infrastructure wants to build is 37,000 times bigger than this unit. A 15% "safety margin" was added to the numbers provided by the applicant. Safety margins are not usually added if a company is confident in the accuracy of their pollution estimates. This creates an unmonitored loophole that violates the Clean Air Act's mandate for continuous compliance. We know the pollution approximations provided are based on an extremely lazy testing methodology and while we were not told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is draining an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical invalidity of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will sit innocently, every day, LESS THAN ONE MILE from this pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete defilment of the authority vested in you.	Merged Document	1	No	[redacted]	Yes	Yes	Yes	Yes			8/17/2026
Natalie	B	I want my children to grow up in a safe world, with bountiful nature and one that is full of resources! Just like past generations have gotten to. We (current young and future generations) should not have to pay for the detrimental mistakes that the people in power are making, solely to profit off of!!! New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes		Yes	Yes	8/17/2026
Ashley	Green	I live Exton Pennsylvania, and Project Jupiter disgusts me. I am asking that you deny the Yucca Growth Infrastructure's air quality permit. We do not need more fuel cells being built, we need to address the rising problem of climate change and reduce the greenhouse gas emissions from our atmosphere. This fuel cell would be detrimental for the surrounding ecosystems, and it is completely unnecessary. Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into New Mexicos public landfills, and they will just have to wait until somebody notices? That metro area is currently 16th worst in the nation for ozone pollution and they have received a failing grade on air quality standard every single year since 2000. They're already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyper scale air pollution into these communities, and it is environmental racism. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.	Merged Document	1	No	[redacted]		Yes	Yes	Yes	Yes	Yes	8/17/2026
Anónimo	Anónimo	Project Jupiter initially applied for air permits to the New Mexico Environment Department (NMED) back in April, under the first name Acoma LLC. This original application sought to build two, separate gas power plants. After the public successfully submitted over 7,000 comments that were overwhelmingly in opposition to the gas plants, the developers have decided to completely scrap those applications and re-start the process proposing a new kind of fuel cell technology. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	Merged Document	1	No	[redacted]		Yes	Yes	Yes	Yes	Yes	8/17/2026
Angelina	Villarreal	I am a resident of Las Cruces and I am asking that you deny Yucca Growth Infrastructure's air quality permit. I've lived here all my life and this is my home. I want to continue seeing my nieces and nephew grow up here knowing they have a safe and secure future. However, that future is under threat with this proposed air quality permit. Bloom Energy has a history of illegal dumping hazardous waste and a change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone, that has been noted by Doña Ana that our air quality does not meet federal government rules, would be nothing short of blatant environmental racism. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hyperscale air pollution into our communities.	Merged Document	1	No	[redacted]		Yes	Yes	Yes	Yes		8/17/2026

Lara	Hong	I'm only 16. I want to live in a world that is not dying. Our summers are already hotter than they ever should have been. I want to get married to my boyfriend one day and raise my kids on a planet where I don't have to see people dying because they have no water left to drink. Whit will All will bring us if we're all dead. What will it do if none of us can afford to live. Why spend billions of dollars on something that will benefit no one. Not even the rich people that are funding it. They might get richer and then what. You'll die just like everyone else, because you are a human/pain. Not human because a human would have empathy which is something you clearly lack. I dont imagine that the comments will actually reach the hearts of the people that want to build these data centers, partly because of the lack of care, mainly because they only really care about getting richer, or famous or whatever it is they want. Technology shouldn't be the source of our end. Humans are made from technology. Many philosophers are built on the hoins compensator, the idea that because we as a species lack any natural talents we created our own way of surviving. But building this data centers is a death sentence. We wastewater, we waste resources, we waste time and effort. If the people who are overseeing this want to actually help humanity as a whole, which includes them since we are all the same species no matter how poor or rich or whit ewe are, then they will stop and wasting resources and money on this and help save our planet from the disasters they are trying to make worse. This isn't just something that affects a small community. It is somethings that affects all of us. Every newborn baby, every teenager every adult every elderly every plant every animal every grain of sand that's makes up our beaches. If we want to achieve greatness as humanity then this is not the way. A data center shouldn't take away basic necessities we need to survive The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Dodd Ranch, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
Mckinlie	Hemming	Dear NMED Staff, My name is Mckinlie Hemming, and I am a concerned community member and new mexico resident, writing to urge you to reject Yucca Growth Infrastructure, LLC's air permit application for the 100 MW project in Doddenblock, Asia County. Project Jupiter's power plant would release up to 30 million tons of climate-warming greenhouse gases every year — more than the combined emissions of Albuquerque, Las Cruces, and Santa Fe. That alone would erase most of the climate progress New Mexico has made in the last two decades and make a mockery of our state's climate goals. The proposed "micro" grid has a 2,400 MW capacity — nearly the size of the entire El Paso Electric grid (2,800 MW) and comparable to the Salt PWR grid (2,700 MW). But unlike those grids, which include substantial renewable energy and produce far less total pollution, this single project would be a massive new source of greenhouse gas and toxic emissions. This is an environmental justice issue. Santa Teresa Elementary and High School is within five miles of the proposed site, where 98% of high school students are Hispanic. Daycare centers are nearby too. These children are especially vulnerable to NOx, CO, and VOCs. The 25 bus/train Diesel backbone is are not a dumping ground for experimental technology, and Santa Teresa should not be ground zero for Bloom Technologies to scale their toxic technologies. Tribal governments — including Tortuga Pueblo, Tinaha del Sur, and Peralta communities with landholdings in Doddenblock, Asia County — have not been properly notified of this application. The technology itself is unproven at this scale. This facility would be 1,000 times larger than the largest existing Bloom fuel cell installation, yetthe application relies on pollution testing from a single 60-kW unit — 37,000 times smaller than the proposed plant. fuel cells also generate hazardous waste in "default scenarios" and the claim that filter changes are exempt from us permitting (under 1,000 lbs/yr). The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
Abby,	Tattersall	This is an unlawful oversight of environmental protection, human safety standards, and fueling an industry that does NOT work for American citizens but rather makes them suffer. Give your communities and their neighbors the mandated 45 day vetting period. This is intentional harm to them, their families, and the future of where they live and the rest of their lives. Bloom Energy has a long history of proven, illegal dumping and thus will not abide by any law set for them. They should be denied the air quality permit. If it's not denied, a public hearing MUST follow for the residents in Santa Teresa in a language acceptable		No					Mirrored Document			Yes	Yes	Yes	Yes	8/27/2026
Anonymous	Anonymous	Given Bloom Energy's history of illegal dumping hazardous waste this permit should be denied. The people do not want this to go through, the people should be able to have a say on things that affect their own lives. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. For society to thrive you must always remember who you are really fighting for, who you swear to protect, you protect the people, you protect your citizens' duties to them! Given Bloom Energy's history of illegal dumping hazardous waste this permit should be denied. The people do not want this to go through, the people should be able to have a say on things that affect their own lives. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Saoirse	Clyne	I am asking that you deny Yucca Growth Infrastructure's air quality permit. The future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 30 million tons of carbon dioxide pollution and toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. The metro area is currently 38th worst in the nation for ozone pollution and has received a failing grade on this air quality standard every single year since 2005. The air quality is already some of the most compromised air in the country. this unacceptable to invite a new source of hypercaise air pollution into our communities. Five cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and unnoticed waste. The lives of everyone around you can not be worth a bit of money.		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
Miyah	Cole	Please stop Project Jupiter before it does irreversible damage to the communities surrounding it and the overall environment! We do not need data centers draining the Rio Grande or other water sources needed to survive. AI could be a useful, reliable tool used to save lives, however, the only thing it is doing now is pointing humanity into a direction of extinction. Humans do NOT need this live and resources like water, that are being threatened, should be priority. I beg to reevaluate Project Jupiter and in doing so, take into account the lives that will negatively be affected. People deserve clean and accessible water. Not to mention the air pollution and hazardous waste that will be a result of these plants. It is disgusting and inhumane to be cruel to this world. We don't have enough trees to absorb the CO2 because we keep cutting them down. We don't need new apartments, born food restaurants/ data centers. We need politicians to care about the longevity of humans, animal, and planet life. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.		No					Mirrored Document			Yes	Yes	Yes	Yes	8/27/2026
Sierra	Anonymous	We should not allow this data center to be built. Our ecosystem is more important than billionaires making money. We need clean air to breathe and clean water to drink more than AI.		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
		The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.															
Nida	n/a	I am asking that you deny Yucca Growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue raising my children here knowing they have a safe and secure future. That future is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering we will endure as a result of the gas plant's air pollution. To add 30 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long-time nonattainment zone would be nothing short of blatant environmental racism. Our metro area is currently 38th worst in the nation for ozone pollution and we have received a failing grade on this air quality standard every single year since 2005. We are already breathing some of the most compromised air in the country. It is unacceptable to invite a new source of hypercaise air pollution into our communities. Five cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed waste. The lives of everyone around you can not be worth a bit of money. Also, I am asking that you deny Yucca Growth Infrastructure's air quality permit because of the lack of transparency in the permitting process. Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage to its spread once our aquifer and soils are contaminated. It also will not re-capture the emissions chemicals that are released into the air when hazardous waste is improperly stored and disposed of. Though approximations of annual air pollution were provided, the testing used an extremely weak methodology/meaning an, ultimately, with a inadequate guesses that have large margins of error. Estimated pollution levels for this gas-powered fuel cell plant are based on only three 4-hour periods tests from a very small unit (only 60 kW). This is a far cry from thousands of sweltering fuel cells operating 24/7 at maximum output in close proximity, all in the scorching heat of our open desert. The lack of rigorous testing at even this small of a scale is icky and very concerning, especially given that the gas power plant Yucca Growth Infrastructure wants to build is 37,000 times bigger than this unit. We know the pollution approximations provided are based on an extremely icky testing methodology and while we were told whether these 4 tests were even done on-site or during peak temperatures, we can safely assume the applicants cut corners here as well in an attempt to fast track this approval. As I write this, Project Jupiter is showing an undisclosed amount of water from our shared aquifer on a daily basis. Given the statistical modeling of their pollution estimates, approving this air permit under any circumstance would be to allow this project to introduce unmitigated and undisclosed hazards into our air without consequence. Children attending Santa Teresa Elementary School will, in many days, inhale more pollution than a year's worth of pollution. Three other schools, an elder care center, and three public parks sit within around 4 miles of this project. Deny this air permit. Gambling with the fragile health of our children and elders would be a complete dethrement of the authority vested in you.		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
Haven	Boyd	Unfortunately I'm not an knowledged as I would like to pretend I am on the effects of AI data centers. However, I know enough. The pollution to the air and water in the surrounding area would be disastrous for the residents the data center would be built near. I'm worried for the families just trying to take care of each other with a data center near by. There's no doubt that the pollutant air is terrible to breath in. Especially for the small lungs that residents children and babies. I care about their health and future. There's no scale for how bad this data center will be since there's no data center like this size. I really do hope we keep it this way. I also ask for a public hearing involving the communities surrounding the data center. NMED should give the public 45 days of additional time to review and comment on the application to ensure everyone can meaningfully comment and participate. Their voices need to be heard since they'll be the ones dealing with the repercussions.		No					Mirrored Document			Yes	Yes	Yes	Yes	8/27/2026
Anonymous	Anonymous	I do not live in Southern Doddenblock,a Asia County, New Mexico nor in USA at all. I am not even an adult, not even the level up and yet I can guarantee you that Project Jupiter will be a big problem to not just people around there or people in the country but to the whole world. The fact that cells will release a big amount of carbon dioxide, anticipated that more than 30million tons of carbon dioxide. Can you see how much of the problem that already is? Just see the temperature of the world has risen from greenhouse effect. Even Europe where their temperatures rarely rose over 30 during the summer had now reached over 35°C in some countries it even reached 45°C. You cannot convince me that having ONE MORE of the largest data centers won't affect anything and won't hasten the world dying faster. We have over 30,000 data centers, NOT having one more won't kill us, we have been existing way longer than that. Why before these things even started. We can live without data centers and AI, human cannot live without clean water and the earth. This Project Jupiter is threaten the limited resources of water we depend on to keep living. If this project actually happens and continues, the developers and governments associate to sacrifice the lives of innocence for an uncertain future, it won't be just us or the lower classes that won't survive, it will be everyone. Including the plants, the animals, those who let this happen, the greed for power shall be the death of everyone including those who held the power. The fact that this project has more invest, the sum of 36billion US dollars while out there there is a school being shut up, families being separated just because they're 'illegal', children and women being violated and have no rights is very concerning. More surprisingly, no one bats care or bat an eye at these problems. You can try and tell me that this Project Jupiter will change life to the better, providing jobs, opportunities and benefits for the locals and putting the goods of what this will do to the world, but everyone knows the truth. Everything this will destroy even more of what we have. The world already dying enough, not even slowly anymore. We wanted to help stopping and slowing it down, not making it faster. I may be young, 'inexperienced in life' and my comment might seem to make no sense to you, but in this moment I am also just another human who wanted to live and see the world in future. With this project and many more projects coming for earth's resources, all the younger generations WILL have an uncertain future whether they will get to see the world tomorrow or will it be gone before they can even speak. The communities of people who do not even agree to this happening will have to pay their price for generations, even after the developers who created this are long gone. You might not see the problem now, but in near future my and many others complains won't be just another protest, it will be the problem everyone has to face, but no one dare to deal. We will not give up, even when we can see losing hope. We want and need this project to stop. I will not be trusting a word the developers of this project say, no matter how good the benefits sounded. We only have one earth, we cannot find new planet to replace this and we already destroyed our planet more than half of it. Now we have to pay the price and rebuild the earth together, not continuing to ignore and create whatever data center is.		No					Mirrored Document			Yes	Yes	Yes	Yes	8/27/2026
Abdul	Akinleye	Dear NMED Staff, My name is Abdul Akinleye and I may not be a resident of New Mexico but I find Project Jupiter incredibly concerning. We live in a day and age where artificial intelligence is prioritized over cultural life. This construct threatens what this planet has nurtured for millions of years. If Project Jupiter is carried out, it sets a precedent, a baseline, a record ready to be broken. Today it may be the largest data center but tomorrow it could be an old competitor to others. It may not be in my backyard now but that doesn't stop it from being an issue. Don't take change until it's in your backyard. Take change now! I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 100 MW project. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Take charge and take back control. This is our world, this is our resources, this is our responsibility.		No					Mirrored Document					Yes	Yes	8/27/2026
John	Doe	Ais the most unnecessary thing in the world. We do not need it. It's doing more harm than good. We can live without ai as we have done before, ai can not live without water.		No					Mirrored Document					Yes	Yes	8/27/2026
		The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.															
Leora	william	There IS NO second earth, we do not need to make tech billionaire any richer. look at the world though. the world is gonna collapse if this keep going. WE OWN LIVE WITHOUT AI. the water, the temperature, all human are gonna die if this keep continueing		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
		The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. Andrew	Stachniak	I'm vehemently against the construction and development of AI data centers like project Jupiter. They serve no purpose for the people, and only serve the purpose of taking much needed resources and land from the community that is being affected by this development. These AI data centers only purpose is to line the pockets of the rich, who have no care of the environmental impacts this development will cause to the environment and surrounding communities. This development will only add to the green house gas problem that people are dealing with all across the globe. The public should be given an additional 45 days to review and comment on this air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Sonny	Sherwood	Dear NMED staff, My name is Sonny Sherwood. I am a Las cruces New Mexico resident, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comments urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the 100 MW project in Doddenblock,a Asia County. I've lived here for 29 years and I would hate to see all of our beautiful water that our ancestors once need, be sucked up by corporate greed that only benefits big companies that don't care about human beings. I would still produce a high level of greenhouse gas and toxic pollutants This technology powercides toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never existed at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the 100 MW project. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely,Sonny		No					Mirrored Document			Yes		Yes	Yes	8/27/2026
Kirstin	Knight	As someone who lives NM and its environment, I'm appalled that this data center is being constructed. I am gravely concerned about the impact on the environment, including extraction of water and the harmful chemicals that will be emitted into the air. Please vote against this phase of the project. Please shut the project down completely. That is the will of the people.		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
Raymond	Hernandez	I believe that the world does not need AI and especially to this extent the many different things we've built up to AI have been by humans for humans and AI is nothing without humans and the fact they take the resources and prioritize the resources humans need to be put and used against humans shows how much they don't care, the ideas and people that can invest better things for the future all could be destroyed and their paths never have the chance to be taken on for a better world because of these greedy and selfish top class people The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
Anonymous	Anonymous	AI is ruining the environment, public health, and every individual's ability to think, create, and speak for themselves just to profit people with billions of dollars who don't care about anyone else. We don't need more data centers or AI. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County.		No					Mirrored Document			Yes	Yes	Yes	Yes	8/27/2026
Kylie	A	I think humanity will be the end of humanity. Why? AI companies are using up drinkable water for AI. Big things we do not need. We need our fresh water and no one cares, merbs and SHEIN are a problem as well, using up water and trashing our waters. We might have a future, but we won't have drinkable water, animals are going extinct and we only have 20,000 polar bears left. Data centers are causing global warming, releasing tons of green house gases. ChatGPT alone uses 39million gallons of water every single day. AI gives the choice can kill you. AI is also biased, and will try to hallucinate you. AI will ALWAYS lie to you. We have perfectly FINE without it. Now it's killing people. AI can and will tell you to kill people. It's trying to replace god as well. By next year, they will have already used over 1 billion gallons of water. Our world isn't dying, we are killing it. Some states and countries already have dirty water because of it. STOP AI.		No					Mirrored Document	Yes	Yes	Yes		Yes	Yes	8/27/2026
		The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.															
Jackie	A	Please don't build this. Data centers can be built vertically or in more sustainable ways and the laws need to exist that create guidelines on how they are built within communities. There needs to be a moratorium placed until these laws and regulations exist. Communities also don't want these centers in their backyards without better designs. Those can exist. They are currently being built in the cheapest way possible by most companies. There needs to be innovation in terms of design and energy use and again, laws in place that don't want pet. Listen to the people please. The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. Jay	Gallegos	I reside in Chicago Illinois where people are commuting daily and where thousands of homeless residents reside without regular access to air purifying systems. With additional data centers added to the world we push towns into the air poisoning our citizens who are forced under this economy to work more than ever before. Stop the production of these data centers. WE DO NOT NEED MORE.		No					Mirrored Document			Yes		Yes	Yes	8/27/2026
		The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County.															
Roxanne	Marquez	Hello, I am a native New Mexican and a community member invested in a healthy climate future for the coming generations. I do not support the air permit of Project Jupiter and believe it should be denied, particularly given Bloom Energy's history of illegally dumping hazardous waste. Additionally, the public has not been given enough time to comment on this issue, especially when going up against the mass coercion that Project Jupiter has ruled out to influence the public (i.e. paying influencers to promote the data center, harassing homeless people to fill out a comment in favor of the permit, etc). If this permit is approved —which would be an atrocious government sponsorship of environmental racism —we demand that a public hearing be held in Santa Teresa, NM in both English and Spanish with an option to comment remotely.		No					Mirrored Document			Yes		Yes	Yes	8/27/2026
Anonymous	anonymous	Project Jupiter will greatly impact our climate and use up water that is already limited in and of itself. We have no need for generative ai or use for it when it is already taking up jobs of artistic creators!! Having a data center in this degree is absolutely mind boggling to say the least!! NO ONE NEEDS DATA CENTERS!! NO ONE NEEDS GENERATIVE AI!! It is not a necessity like food and water!! The public should be given an additional 45 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doddenblock, a Asia County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.		No					Mirrored Document			Yes	Yes	Yes	Yes	8/27/2026

Anne	Kanim	I urge you to deny the air quality permit application for Yucca Growth Infrastructure. I am a third generation Dona Ana resident. My children deserve to grow up with clean air and drinking water in the same county. We are in the middle of an extreme heat wave due to climate change. It is unconscionable to approve a plan that would dwarf the CO2 emissions of the residents of the county. What pollution controls are in place? How did the developers arrive at the numbers on their permit if there has been no plant close to this size? What are the safeguards for our health and our children's health if these estimates are incorrect? The emission estimates of the plan as has been submitted are already unacceptable. There is too much at stake in the uncertainty of the reality of the project. The mission statement of your department says that your mission is to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations. How are you sure that this will ensure a healthy and prosperous New MExico for future generations? You cite four tenets to uphold this mission: Science: "Using the best available science to inform our decision-making in protecting public health and the environment." What rigorous, independent science has gone into the claims of this permit? Innovation: "Employing creative engineering and technological solutions to address environmental challenges." If Project Jupiter claims that its new permit reduces the carbon emissions by 67% and NOx emissions by 92 % as they claim, why can't a $1.65 Billion project fund a completely carbon neutral energy solution? Collaboration: "Engaging communities and interested stakeholders in environmental decision-making outcomes." How many letters have you received showing that the vast majority of the community does not want this project? How many letters that were not paid for by Project Jupiter have been submitted in support of this project? Compliance: "Ensuring meaningful compliance with state regulations and permits; leveling the playing field through enforcement." What assurances does the community have that this project will meet state regulations? What plan is in place if it doesn't?	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes				8/17/2026
Mia	Anonymous	Data centers are not whats important to humanity and the planet we live on. What's important is our water supplies drying for something so small. How are we going to have a future if there is isn't one?! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Layna	F.	Dear NMED staff, My name is Layna. I do not reside in New Mexico whatsoever I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. There's already enough happening to our air pollution and I'm sure nobody wants this unknown powered AI center in their backyard. Not to mention the land they're building on is struggling enough and if this experimental center goes on then it will harm the people near by it. AI data centers are already harmful as is and it's taking all our water. But it's not just AI it's also other companies and you need to realize that this isn't the greatest idea for the people. Everyone deserves to be heard no matter what so please reconsider this and choose the community instead. "The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. Miguel	Fonseca	Please reject the data center of projects Jupiter. It will cause environmental harm even if they propose "fuel cell technology" It will likely not matter and it cause more droughts and less pressure water for citizens in Donna ana county, please reconsider the drawbacks and environmental cost of this. If they do SUE Donna ana county for not letting them putting a data center here that is all that you need to sue them back because if they are willing to sue and just take it anyway. That is proof that they really don't care and it's just money and greed. I am also aware that New Mexicans are saying they find replies online that they support this but really they did not. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Laila	Gaines	We don't need AI to live we need Water to survive Stop building data centers! It's too hot to live there's no water to drink, AI takes away our survival these data centers aren't needed!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Lily	Dunning	I do not support project jupiter! this is not something we need and it will be harmful to our communites and the people we love. This will use up way more water then it needs to and will take that resource from other around the world and we are already struggling. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	I along with many other people believe that this data center is a complete and utter waste of time and New Mexico's land. This money used to fund the data center could be used for so many other purposes and more useful projects that could actually help the local community. This data center provides nothing to help residents of Doña Ana County. This could lead to restrictions of the usage of water imposed on the local residents and can/will pollute the local environment, potentially causing pulmonary issues and other illnesses. Please reconsider the construction of this data center and put the thoughts of the beautiful community before profit. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	Building Project Jupiter has no benefits to the people of the USA, especially those in New Mexico. Data centers contribute dangerous amounts of pollution, both air and sound included and waste our limited water sources. An AI data center is not worth the water usage, especially when the AI bubble pops and your department has to reevaluate the damage they've done if they let this project continue. Don't go through with Project Jupiter. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Victor	Mata	Let me be respectful but blunt: in my opinion, any support form you favoring Project Jupiter is a blatant betrayal of southern New Mexico. The risks to our air, water, and health far outweigh the benefits the developers are promising. My opposition is based on the project's own filings and on independent reporting: - The power plant would emit roughly 10 million tons of greenhouse gases every year — more than Albuquerque, Las Cruces, and Santa Fe combined. A single facility would erase much of the climate progress New Mexico has made over the last two decades. - The developers' switch from gas turbines to Bloom Energy fuel cells has been marketed as "cleaner," but the plant would still burn natural gas and still produce those emissions. The Center for Biological Diversity has called the change essentially greenwashing. - Bloom's fuel cells concentrate contaminants like benzene into filter canisters that become hazardous waste. The EPA has fined Bloom more than $1 million for mishandling this waste at other sites. - This plant escapes the renewable-energy requirements of New Mexico's Energy Transition Act only because state law exempts "microgrids" — even though this one would out-generate the state's largest utility. - Santa Teresa and Sunland Park already fail to meet federal air-quality standards. This is a predominantly Hispanic border community, with schools and day cares near the site, and in a desert already stretched thin on water. I understand that New Mexico is hungry for investment and needs to strengthen its economy — I don't dismiss that. But there are far better alternatives. New Mexico has abundant solar and wind resources, and solar and wind paired with battery storage are now the least expensive source of new electricity. We can attract investment without locking our region into decades of fossil-fueled pollution. I know several state senators have already raised concerns about this project. I respectfully ask you to (1) publicly oppose this air permit, (2) press NMED and the Governor to hold a bilingual, in-person public hearing here in the Santa Teresa/Sunland Park area and to extend the public comment period, and (3) support closing the "microgrid" loophole so facilities this large must meet the same clean-energy and pollution standards as utilities.	1	Merged Document	No	[redacted]			Yes	Yes	Yes	Yes	Yes	Yes	Yes	8/17/2026
Casey	Davis	I absolutely do not want Project Jupiter here. It does not make sense to have a data center in the desert. The drought risk is already so high and this would make it worse. I think New Mexico is such an amazing and special place and this has absolutely no place here.	1	Merged Document	No	[redacted]			Yes							8/17/2026
Angelia	Donnelly	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If not, you are taking away from the community unjustly and without their consent/knowledge. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. This would not be beneficial for the data center and there would most likely be plots to stop supporting AI and its uses, rendering it useless. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Stephen	Kanim	Project Jupiter seems to have been foisted on Dona Ana County with little opportunity for public input, and rushed in a manner to cause reasonable suspicion that the potential negative impacts have not been adequately considered. This behavior continues with this Air Quality Construction Permit Application. The claims made about air quality, how the estimates were reached, and how enforcement will work are not detailed enough for our community to make informed decisions about whether this is a good idea. The lack of effective outreach and dearth of information coming from Project Jupiter should be enough in and of themselves to prompt NMED to reject this application.	1	Merged Document	No	[redacted]				Yes	Yes	Yes				8/17/2026
Anonymous	Anonymous	Large data centers release carbon dioxide into our atmosphere, they use up clean drinkable water and destroy the homes of communities that live near them by emitting awful sounds and harmful chemicals near residents. We sencirely hope that Ai companies will either stop creating a harmful product all together, or create a new better product that doesn't destroy our living spaces, one that would be worth buying, that is. Otherwise it is our duty to fight against them and shut them down, for safety of ourselves and lives of future generations. We ask for public to be allowed to comment and review the air quality permit for additional 60 days so that community members can participate equitably, that the air quality permit should be denied due to Bloom Energy's history of illegal dumping of harmful waste, in case of permit not being denied there should be a public hearing at Saint Theresa in both English and Spanish with an option to participate virtually. Approving this permit would be environmental racism as citizens of Doña Ana county are disproportionately impacted by environmental pollution.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Gabriel	Martin	My personal opinion as one of our nations citizens is that Project Jupiter should be stopped as this will lead to our entire planets' ecosystem to slowly collapse far faster than it already is, therefore creating mass extinction, climate change, breathing issues, etc. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Kaelani	Russell	Fuck u fuck all of u I'm 14 and I'm losing hope I'm so scared we can live without ai or data but we cant live without animals or breathable air I don't get why do all of u only care about money the world is dying and none gives a rat ass u guy can make the most difference jet you decide to kill the plant then help I don't get it all of u are gonna be died in like 30 year then what what about all the money u had to have it's useless and future generations have to live with what u caused so please stop and start actually helping the people and the plant not just your wallets please. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Anónimo	Anónimo	Esto no puede ser posible. Nos quedamos sin agua potable y somos capaces de vivir sin IA. Se debe conceder al público un plazo adicional de 60 días para revisar y comentar sobre el permiso de calidad del aire, a fin de permitir que los miembros de la comunidad participen de manera equitativa. La solicitud de permiso de calidad del aire debe denegarse de plano, dado el historial de Bloom Energy de vertido ilegal de residuos peligrosos. Aprobar este permiso constituiría un acto de racismo ambiental auspiciado por el gobierno y dirigido a los residentes del condado de Doña Ana. Si no se deniega el permiso de plano, es necesario celebrar una audiencia pública en Santa Teresa —en inglés y español— que ofrezca la opción de participar virtualmente.	1	Merged Document	No	[redacted]	No	Oppose Non-Substantive	Yes							8/17/2026
Anonymous	Anonymous	Dear NMED staff, I'm from Austria and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Humanity lived many years without AI and I believe that we can live without it in the future. I think I can speak on behalf of many young people such as children and teenagers, who are afraid for their future because of the climate change, and this project and AI in general will make those feelings way worse. Not only will this project cause severe damage to our air and climate, but it will also take away the habitat of animals and residents of that Area. The project's proposed fuel cell powered grid is concerning for many reasons: • It would still produce a high level of greenhouse gas and toxic pollutants • This technology generates toxic waste, and the process for handling this waste is still unclear. • Fuel cell technology or a centralized waste system has never occurred at this scale. • Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, from Austria	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
HARRY	KENNEDY	There is far too much risk to proceed and I feel that NM needs to stop and evaluate for 1 year. Convene a board from various positions and provide all sides so the public can know what's happening. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes			Yes	Yes	8/17/2026
Brynn	Guillot	I am a young person aware of ai and its impacts, and from what i know, ai will destroy my future, and many other young people's futures. entry level jobs are taken by ai, lowering the chances for people to get into the workforce and gain experience. ai data centers are making people living around them sick from the noise pollution and the pollution of the water. ai steals from artists who haven't consented for their artistic work to be used in ai data training. ai has made people dependent and addicted to the technology, making people fall behind in school, work if tasked to not use ai. and finally, but not the last point in this overall discussion, there has been many cases of ai generated CSAM being created. my ask, is to reconsider, use this space to improve the environment. thank you for your time in reading this.	1	Merged Document	No	[redacted]			Yes		Yes		Yes			8/17/2026
Mackenzie	Anderson	This is the only planet we have and once the water is gone it's gone so we shouldn't waste it. Water is a precious source of life that needs to be preserved. We also need our air. It is the backbone of human life and our bodies can't survive without it and plants can't regenerate it that quickly. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Natasha	Zella	Dear NMED staff, My name is Natasha Zella. I am a New Mexico resident, living in Las Cruces, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. I was born and raised in las cruces and I'm deeply invested in our community's health and longevity. As someone who cares about the livability of our city far into the future, I have major concerns about this project's impact to our home. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Natasha	1	Merged Document	No	[redacted]				Yes	Yes		Yes		Yes	8/17/2026
Alfonso	Sandoval	I do not think having a data center like this will be beneficial to the communities within New Mexico. I've seen some promises of using only grey water and supposedly generating their own energy, but even if these were true there are no laws that would make them adhere to only doing this from opening to the future. The noise from datacenters has been known to cause physical discomfort and even illness to those around, even within a few miles. Its not good for wildlife. Any promise a company makes is nothing without laws and regulators to enforce them	1	Merged Document	No	[redacted]			Yes		Yes	Yes	Yes			8/17/2026
Michelle	Hernandez	New Mexico does not need another DATA CENTER. Please listen to our concerns, this is another trend that big billionaires are jumping on for a quick cash grab and you are letting it happen in front of your eyes. We don't need AI and we will continue to THRIVE without AI. Data centers create too much noise, threaten our environment and disrupt our security. There are more negatives to approving this new data center than positives. If AI is so good, then why are millions of people OPPOSED to this new project? Please take action to address our community concerns. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]				Yes	Yes		Yes	Yes	Yes	8/17/2026
Elliot	Albarran	My name is Elliot Albarran and I am very concerned with what the consequences would be if the Jupiter project were to be done to completion. AI data centers already have affected communities of people and environments of animals that work in the cycle or keeping our Earth healthy. If this center is built I genuinely believe the effects of that will be permanent unless we do something. Ai has never been necessary to this degree before, so we definitely don't need it to this degree now.	1	Merged Document	No	[redacted]					Yes					8/17/2026
anonymous	anonymous	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Several incredibly harmful chemicals would be released into the air here. The data center would also be consuming a ridiculous amount of water, depriving the people of freshwater as well as producing an atrocious amount of heat for the environment and people of the area. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. There has already been hazardous waste being dumped here and this would increase the amount of waste by millions. The people of Doña Ana County deserve to have fresh water and clean air without millions of additional hazardous waste and chemicals being added for a data center no one asked for. We've survived for centuries without AI. The amount of carbon emissions from this data center will heat our planet exponentially. Summers are already at record highs and people have been suffering from heat stroke and dying from the blazing temperatures. This will increase the amount of deaths and injury. With the additional hazardous waste and chemicals in the air, the future generations of children and the current generations will suffer from multiple organs failures, cancer, brain defects, and irreversible health issues. I want to be able to raise my children safely without hearing that they will end up being permanently disabled or dying young due to these data centers being built.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026

Ava	Penz-Gaudet	Data centers are known to add to the climate crisis, if we want a fighting chance to save our world and help future generations then we have to stop project jupiter immediately. Otherwise the current generation of children will suffer as adults due to immense temperature increases and lack of water. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No	[redacted]			Yes	Yes	Yes			Yes	Yes	8/17/2026
Isabella	Marchione	People are going to die from what will happen if this goes through. It will create irreversible damage and ruin the lives of millions and spread amongst the people, ending up ruining the lives of everyone on our planet due to their greedy and selfish disgusting actions. This capitalist mentality is the reason why people can't shower, can't drink water, and can't use water for their meals if needed. At the end of the day the people will win out over the pigs which are unfortunately given 'control'. But the real control lies within the people, and we will take back and destroy all that the money-hungry corporations and politicians have created out their own need to grow beyond their means. Deny the air quality permit application from Bloom Energy, they've never cared about the environment before when they dumped hazardous waste onto the land as if it were nothing to anybody. If you happen to not deny it then hold a public hearing in Santa Teresa so that the people might make a decision themselves, make it accessible by doing so in Spanish and English and offering a digital version for those hard of hearing. If you approve this hearing, you will be support government backed environmental racism, allowing the people of Doña Ana County to be further disproportionately affected by the lack of care of the land. They have been considered a 'nonattainment' zone because of the governments carelessness and this will only further prove it.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
George	Dipaolo	continuing the growth of data that only benefits the company behind these centers, and constantly affirming your users into thinking a prompt box cares. this technology only further damages our already fragile earth that is full of sprawl and greed. have any of you backing this ever considered touching grass??? or are you too addicted to greed to think about anyone other than yourself. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Anika	Tackitt	Project Jupiter would be disastrous for our climate and could drain the fresh water supply. Large AI data centers can use up to 5 million gallons of fresh water a day, and considering that Project Jupiter is proposed to be one of the largest data centers in the world, there is no doubt that it would likely exceed this already astonishingly large number. Furthermore, those living near AI data centers have reported unsanitary drinking water as well as loud, nonstop noise coming from the centers. We do not need AI data centers, we need clean water, a clean climate, and comfortable living conditions.	1	Merged Document	No				Yes			Yes	Yes			8/17/2026
Tiana	La	I am asking that you deny Yucca Growth Infrastructure's air quality permit due to the predicted health impacts of air pollution and hazardous waste. My asks: - The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. - The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. - If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. - Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. - For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Amber	Moore	I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants This technology generates toxic waste, and the process for handling this waste is still unclear. Fuel cell technology or a centralized waste system has never occurred at this scale. Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Together we can create a world where we all thrive with fresh clean water, wildlife and with an ecosystem that isn't being killed by AI development. This wont bring jobs in the long term, this won't benefit anyone only the rich. Us working class citizens need to stand together to stop such an outrageous attempt to defile our way of living. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Rebecca	Kightlinger	Dear NMED staff, My name is Rebecca Kightlinger. I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. Project Jupiter poses serious and irreversible harm to our planet. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year. This would make a mockery of NM's climate goals, and erase most of the climate progress we have made in the last two decades. The potential harm being done far out ways the benefits. The choice YOU make WILL seriously affect the future generations of this planet. Speaking of the future generations, Santa Teresa Elementary and High School are located within five miles of this project site. 96% of students at the high school are hispanic. There are also day care centers located within miles of this site. This is an environmental injustice to these children who are especially vulnerable to the health impacts of NOX, CO, and VOCs. We do NOT want Oracle and Open AI sacrificing our communities to make tech-billionaires richer. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County.	1	Merged Document	No					Yes	Yes					8/17/2026
Justin	Lambert	No to Project Jupiter! This community is struggling enough. I am deeply concerned regarding the emissions of this data center.	1	Merged Document	No					Yes						8/17/2026
anonymous	anonymous	project jupiter will destroy peoples lives. clean water is a BASIC RIGHT!! This is not necessary at all. what happened to the peoples government and country?? PEOPLE DONT WANT THIS!!! Americans drinking water is being stolen for something they don't want or support. STOP THIS!! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Hinepukohurangi	Tiuka Grant	Dear NMED staff, my name is Hinepukohurangi, although I live overseas, I can still see and understand the risks to living and health this would cause the residents of New Mexico if Project Jupiter is to go through. Aswell as risks to animals and the enviroment. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. This project would not only affect the people of New Mexico, the effects could damage the environment for the entire world. Mega AI data centres are completely unethical, the data centres consume large amounts of water daily, however, there are still HUMANS who are unable to access clean drinking water. The fuel cell power grid is concerning for many reasons: - it will produce massive volumes of greenhouse gas and toxic pollutants - this process makes toxic waste, the way of handling this waste is still unclear - the air in surrounding communities will be negatively impacted by this project. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology Sincerely, Hinepukohurangi Tiuka Grant	1	Merged Document	No				Yes	Yes	Yes		Yes		Yes	8/17/2026
Anonymous	Anonymous	I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. toxic waste is a concern as fuel cells generate hazardous waste, as well as a plethora of environmental and climate concerns.	1	Merged Document	No						Yes		Yes	Yes		8/17/2026
Brynn	Guillot	I am a young person aware of ai and its impacts, and from what i know, ai will destroy my future, and many other young people's futures. entry level jobs are taken by ai, lowering the chances for people to get into the workforce and gain experience. ai data centers are making people living around them sick from the noise pollution and the pollution of the water. ai steals from artists who haven't consented for their artistic work to be used in ai data training. ai has made people dependent and addicted to the technology, making people fall behind in school, work if tasked to not use ai. and finally, but not the last point in this overall discussion, there has been many cases of ai generated CSAM being created. my ask, is to reconsider, use this space to improve the environment. thank you for your time in reading this.	1	Merged Document	No				Yes		Yes		Yes			8/17/2026
anonymous	anonymous	The New Mexico Environment Department's mission statement is "to protect and restore the environment and to foster a healthy and prosperous NM for present and future generations." Project Jupiter flies in the face of this mission. Stop Project Jupiter and prevent this climate disaster that will have devastating effects on local communities, and that will needlessly waste our dwindling freshwater resources. Nobody needs AI. Everyone needs potable water.	1	Merged Document	No				Yes		Yes					8/17/2026
anonymous	anonymous	We do not need anymore data centers. It's honestly cute how the rich assume we're going to stay quiet while they destroy the world. No. We do not want AI. We do not want thousand degrees summers, we want water. We want four seasons. I do not want to live in a world where I work myself to literal death. Instead of building data centers, why don't you donate to people who actually need it. Give that money to people struggling under your power. And if you don't read this? At least my opinion is in someone's hands. Documented. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Natalie	Anonymous	My name is Natalie, and I am against the Yucca Growth infrastructure. I want to live in a safe, clean environment where I don't have to worry about clean air and pollution. What they're doing should not be tolerated, they're hurting our planet and destroying it. What they're doing will affect our future and ecosystems. I ask that you refuse Yucca growth's infrastructure air quality permit. If you allow them to put all this carbon dioxide in the air, we will have even more intense heat waves, causing millions to be hospitalized or killed. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No					Yes	Yes			Yes	Yes	8/17/2026
Caleb	Cooper	As a Christian, I do not approve of the native environment and already fragile communities of New Mexico to be further endangered and exploited by companies who do not have our best interests in mind, who only care about lining their pockets, and who have yet to prove that their businesses can even be profitable. In the event that these oligarchs do begin to generate revenue through AI, it is still imperative that we put the lives of plants, animals, and most importantly humans, before the idol of convenience. I cannot reconcile the greed and destruction showcased in recent years by the powerful and wealthy with the God I worship and have committed my life to. Our first commandment from The Lord was to steward all of creation, and countless studies and scientific evidence supports that Project Jupiter will be in direct opposition to that command. Please, stop. Listen to the people whose lives and surrounding environment will be most impacted by these short-sighted, money-hungry decisions.	1	Merged Document	No		No	Oppose Non-Substantive			Yes					8/17/2026
Melia	Coreea	Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes		Yes	Yes	Yes	8/17/2026
Roaa	Mohammed	please stop it, the world is dying because of AI and you want to destroy it faster, the earth is getting killed by the climate changes, we want to keep our clean water for us not AI i want the air, the trees, the bugs, the animals, and the water, the North artic ice is melting, please stop the jupiter project, please. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
Anonymous	Anonymous	The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Several incredibly harmful chemicals would be released into the air here. The data center would also be consuming a ridiculous amount of water, depriving the people of freshwater as well as producing an atrocious amount of heat for the environment and people of the area. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. There has already been hazardous waste being dumped here and this would increase the amount of waste by millions. The people of Doña Ana County deserve to have fresh water and clean air without millions of additional hazardous waste and chemicals being added for a data center no one asked for. We've survived for centuries without AI. The amount of carbon emissions from this data center will heat our planet exponentially. Summers are already at record highs and people have been suffering from heat stroke and dying from the blazing temperatures. This will increase the amount of deaths and injury. With the additional hazardous waste and chemicals in the air, the future generations of children and the current generations will suffer from multiple organs failures, cancer, brain defects, and irreversible health issues. I want to be able to raise my children safely without hearing that they will end up being permanently disabled or dying young due to these data centers being built.	1	Merged Document	No				Yes	Yes	Yes			Yes	Yes	8/17/2026
