MAY 14, 2026

Executive Summary

This report documents the methods, findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) performed by INTERA Incorporated (INTERA) for 105 East Water Street, Santa Fe, New Mexico 87501 (New Method Cleaners) (Site/Subject Property) (**Figure 1**). The New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) (User) contracted INTERA using its Professional Services Contract #24-667-2030-27724, Work Order Number INTE08-ROS-21, to perform a due diligence assessment of the Subject Property. The Phase I ESA was conducted to document current and former conditions relative to historical operations at the Site.

INTERA performed this Phase I ESA following ASTM International (ASTM) Standard Practive E1527-21, entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM, 2021). The objective of the Phase I ESA was (1) to identify, to the extent possible, any *recognized environmental conditions* (RECs) as defined by ASTM and (2) to collect reasonably ascertainable information about the environmental condition of the Subject Property. Additionally, based on reviews of the Subject Property, adjoining properties, and vicinity properties' findings within the default *area of concern* (AOC) as defined by ASTM Standard Guide E2600-22, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM, 2022), *vapor encroachment conditions* (VECs) were also assessed for the migration potential of hazardous substances and/or petroleum products within or near the Subject Property.

The Subject Property is a small storefront located in the southeast corner of a 0.33-acre parcel of land developed with shared commercial and retail space, primarily restaurants and retail. The Subject Property is currently occupied by a retail clothing and gifts store. Based on review of historical records, a dry cleaning facility operated at the Subject Property for approximately 60 years, between 1928 and 1988. The Subject Property has operated as various clothing and gift stores from 1993 to the present. The immediate vicinity of the Subject Property is depicted in **Figure 2**.

The Phase I ESA included:

- a review of the Subject Property and adjoining properties' historical and current land use records,
- review of standard environmental regulatory agency records,
- a site reconnaissance, and
- interviews with individuals having knowledge of past and/or present uses of the Subject Property.

These activities were performed to assess sources of surface and subsurface contamination that potentially exist at the Subject Property and within ASTM-specified distances from the Subject Property. This information was integrated with the physical setting data and future occupancy or development plans for the Subject Property to form an opinion concerning whether properties found to be a potential source of contamination may, in fact, be a REC regarding the Subject Property as defined by ASTM. The Phase I ESA was performed by environmental professional(s) as defined in 40 CFR §312.10 and as identified in this report.

INTERA has performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard E1527-21 for the Subject Property. Based on the completion of the scope of services provided in support of this Phase I ESA, several RECs and/or VECs were identified in connection with the Subject Property, as follows:

- Approximately 60 years (1928-1988) of dry cleaning operations conducted at the Subject Property, corroborated by documented contamination of groundwater and soil gas above health-protective levels in the immediate vicinity of the Subject Property, is considered a **REC/VEC.**
- Approximately 48 years (1902-1950) of electrical substation operations coinciding with the widespread commercial use of PCBs in electrical equipment, occurring at a facility that formerly adjoined the Subject Property to the southeast across East Water Street is considered a **REC**.
- Widespread petroleum product storage and use in the general vicinity of the Subject Property, corroborated by historical fire insurance maps (FIMs) and by documented elevated soil gas and indoor air analytical data collected from areas adjoining and in the immediate vicinity of the Subject Property, is considered a **REC**.

Based on the conclusions of this Phase I ESA, INTERA recommends the following:

- Perform a Phase II site investigation to assess the potential impacts to environmental media from the RECs identified in connection with the Subject Property.

1.0 Introduction

INTERA Incorporated (INTERA) under contract with the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) (User), was tasked to perform a Phase I Environmental Site Assessment (ESA) of the property located at 105 East Water Street, Santa Fe, New Mexico 87501 (formerly New Method Cleaners), hereafter referred to as the Site or Subject Property (SFCA, 2026). The location of the Subject Property is illustrated in **Figure 1**.

NMED secured INTERA's services using Professional Services Contract #24-667-2030-27724, Work Order Number INTE08-ROS-21, to document current and historical conditions relative to historical operations at the Site.

1.1 Purpose

This Phase I ESA was performed (1) to identify, to the extent possible, any recognized environmental conditions (RECs), defined below in **Section 1.2**, and (2) to collect reasonably ascertainable information about the environmental condition of the Subject Property. This was performed, consistent with good commercial and customary practice, to allow potential future redevelopment of the Subject Property and to qualify the User for statutory limitations of potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), a.k.a. Superfund.

This Phase I ESA was performed to meet the assessment and all appropriate inquiries (AAIs) requirements of American Society for Testing and Materials International (ASTM) Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM, 2021). In 2005, the United States Environmental Protection Agency (EPA) issued *Standards and Practices for All Appropriate Inquiries, Final Rule* (EPA final rule; EPA, 2005), and in 2021 ASTM issued ASTM Standard E1527-21 (ASTM, 2021). Both the EPA final rule and the 2021 ASTM Standard E1527-21 implement the CERCLA as amended by the Small Business Liability Relief and Brownfields Revitalization Act of 2002. Under the EPA final rule, effective November 1, 2006, satisfaction of the CERCLA AAI requirement for liability protection as an innocent landowner, a bona fide prospective purchaser, or a contiguous landowner is met by an assessment conducted in accordance with ASTM Standard E1527-21.

1.2 Detailed Scope of Services

In general, the Phase I ESA scope of services included the following four components:

- Records review;
- Site reconnaissance;
- Interviews; and
- Report.

INTERA has completed a Phase I ESA for the Subject Property in accordance with ASTM Standard E1527-21, apart from any deviations listed in **Section 1.4** or data gaps listed in **Section 7.5**. For the

purposes of this Phase I ESA report, the definition of the term "*Recognized Environmental Condition*" is as outlined in Section 3.2.73 of ASTM Standard E1527-21:

> "(1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to *release or likely release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release* to the *environment.*" (ASTM, 2021, p. 8)

For the purposes of this Phase I ESA report, the definition of the term "*Historical Recognized Environmental Condition*" is as outlined in Section 3.2.39 of ASTM Standard E1527-21:

> "A previous *release* of any *hazardous substances* or *petroleum products* affecting the *subject property* that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the *subject property* to any controls (for example, *activity and use limitations* or other *property use limitations*). A *historical recognized environmental condition* is not a *recognized environmental condition*." (ASTM, 2021, p. 6)

For the purposes of this Phase I ESA report, the definition of the term "*Controlled Recognized Environmental Condition*" is as outlined in Section 3.2.17 of ASTM Standard E1527-21:

> "*A recognized environmental condition* affecting the *subject property* that has been addressed to the satisfaction of the applicable regulatory authority or authorities with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations)." (ASTM, 2021, p. 4)

An additional term related to this Phase I ESA report is "*de minimis condition*". It is defined by Section 3.2.20 of ASTM Standard E1527-21 as:

> "a condition related to a *release* that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis condition* is not a *recognized environmental condition* nor a *controlled recognized environmental condition.*" (ASTM, 2021, p. 4-5)

1.2.1 Vapor Encroachment Considerations

ASTM Standard E1527-21 requires the assessment of the migration potential of hazardous substances and/or petroleum products within or near the Subject Property.

The definition of the term "*migrate/migration*" is outlined in Section 3.2.53 of ASTM Standard E1527-21:

> "…the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." (ASTM, 2021, p. 7)

Vapor migration in the subsurface is described in ASTM Standard E2600-22, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM, 2022); however, ASTM Standard E1527-21 does not require its application to achieve compliance with AAI (ASTM, 2021, p. 7).

In order to assess potential migration of hazardous substances and/or petroleum products that may migrate as vapors into the vadose zone as a result of contaminated soil and/or groundwater on or near the Subject Property, INTERA has completed a Tier 1 Vapor Encroachment Screening (VES) in accordance with ASTM Standard E2600-22 for the Subject Property. The objective of the VES is to determine if a vapor encroachment condition (VEC) exists at the Subject Property. For the purposes of this Phase I ESA report, the definition of the term "*Vapor Encroachment Condition*" is as outlined in Section 3.2.37 of ASTM Standard E2600-22:

> "[The] presence or likely presence of [chemical of concern (COC)] vapors in the vadose zone of the [Subject Property] caused by the release of vapors from contaminated soil and/or groundwater either on or near the [Subject Property]…" (ASTM, 2022, p. 4)

The results of the Tier 1 VES are presented in **Section 7.4**.

1.2.2 Non-Scope Environmental Considerations

Non-scope environmental considerations such as those identified in Section 13.1.5 of ASTM E1527-21 were not evaluated as part of this ESA. Non-scope considerations may include, but are not limited to: presence of potential asbestos-containing building materials unrelated to releases into the environment; biological agents; cultural and historic resources, ecological resources; endangered species; health and safety; indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment; industrial hygiene; presence of potential lead-based paint unrelated to releases into the environment; lead in drinking water; mold or microbial growth conditions; polychlorinated biphenyl (PCB)-containing building materials; naturally-occurring radon; regulatory compliance; substances not defined as hazardous substances (including some substances sometimes generally referred to as emerging contaminants) unless or until such substances are classified as a CERCLA hazardous substance; and wetlands (ASTM, 2021, p. 25).

1.3 Significant Assumptions

Significant assumptions pertaining to this Phase I ESA are briefly summarized as follows:

- Environmental database information (and facility locations) generated by Environmental Risk Information Services (ERIS) is accurate and complete;
- The User has provided INTERA with all the information in its possession that would help determine the presence of RECs;
- Interview information provided to INTERA by various parties and individuals is accurate and was provided without bias; and
- Publicly available reasonably ascertainable information accessed by INTERA is accurate and complete.

The significant assumptions underlying the preparation of any Phase I ESA are specified in the principles set forth by ASTM Standard E1527-21. The principles are presented in their entirety in Section 4.5 of ASTM Standard E1527-21 (ASTM, 2021, p. 10).

1.4 Limitations and Exceptions

Any Phase I ESA is by nature limited and qualitative in scope, being based predominantly on the examination of selected maps, agency records, interviews, and visual and/or physical observations made during the site reconnaissance. As such, this Phase I ESA should not be construed to be a complete characterization of environmental regulatory compliance of conditions above or below ground surface (bgs) at the Subject Property. Instead, the ESA process is designed to provide information regarding apparent existing or potential adverse environmental conditions related to the Subject Property in accordance with good commercial and customary practice. Any significant data gaps that would further limit the scope of the Phase I ESA are identified in **Section 7.5**.

This Phase I ESA is limited to the reasonably ascertainable information available or known to INTERA as of the date of this report. Consistent with ASTM Standard E1527-21, no intrusive testing or sampling of concealed or subsurface conditions was performed at the Subject Property as part of this Phase I ESA. The findings, opinions, and conclusions contained in this report are limited to those that could be identified during the Phase I ESA performed in accordance with ASTM Standard E1527-21. INTERA has accepted as true the information provided by interviewees on current and historical uses of the Subject Property and surrounding area. INTERA does not guarantee the accuracy or completeness of information provided by other sources.

INTERA represents that the Phase I ESA was performed in a competent manner by environmental professionals, consistent with the practices and procedures contemplated under ASTM E1527-21. However, even with proper application of the ASTM methodology, environmental conditions may be present that cannot be identified within the scope of the Phase I ESA or that may not be reasonably identifiable from the available information. As such, no warranty is expressed or implied as to the findings, conclusions, and/or recommendations presented in this Phase I ESA Report beyond matters amenable to empirical review and visual confirmation within the limits under ASTM E1527-21 and/or the specified scope of work.

1.5 Special Terms and Conditions

Since a property transaction was not part of the rationale for conducting the Phase I ESA, some of the discussion related to purpose, liability protection, and User reliance herein may not be relevant. This language is included for consistency and transparency of describing the intention of the Phase I ESA to meet the ASTM Standard.

1.6 User Reliance

This Phase I ESA has been prepared for the User. There are no third-party rights or benefits conferred under this report. Use of or reliance on this Phase I ESA report by any third party is at the sole risk of that party.

This Phase I ESA Report is valid for 180 days prior to acquisition of the Site and/or transactions not involving acquisition of the Site. In accordance with the ASTM Standard, if the Phase I ESA is to be used by a different user other than the intended user within the 180 days, then the new user must satisfy the requirements in Section 6 of ASTM E1527-21. The Phase I ESA can be valid for longer if the Phase I ESA has been updated within one year of the date of acquisition or intended transaction, provided that the following components have been completed within 180 days of the acquisition or transaction: interviews; searches for recorded environmental cleanup liens; review of federal, tribal, state, and local government records; visual inspection of the property and of adjoining properties; and the declaration by the environmental professional responsible for the assessment or update (ASTM, 2021, p. 11).

2.0 Site Description

As required by ASTM Standard E1527-21, INTERA gathered information concerning the location, characteristics, current land uses, and physical improvements of the Subject Property, adjoining properties, and vicinity properties. Sources for this information were United States Geological Survey (USGS) 7.5-minute historical topographic maps, geologic and hydrologic publications, aerial photographs, observations made during the site reconnaissance, interviews, and consulting other publicly available information.

The Subject Property is located on a 0.33-acre parcel of densely developed commercial land. The parcel is rectangular, approximately 250 feet (ft) long in the southwest to northeast direction, and approximately 60 ft long in the southeast to northwest direction. The parcel is situated immediately adjacent to the southwest corner of the Santa Fe Plaza, and extends from East San Francisco Street to Water Street in a densely developed urban setting and immediately surrounded by other commercial properties. The Subject Property (105 East Water Street) is in the southeast corner of the parcel with an entrance off East Water Street. Adjoining properties are described in **Section 2.4**. The Site and immediate vicinity thereof are depicted in **Figure 2**.

2.1 Location and Legal Description

The Subject Property is composed of one 0.33-acre parcel of land in Santa Fe, Santa Fe County, New Mexico. General real estate property tax information was gathered from the Santa Fe County Assessor's website for the Subject Property, summarized below in **Table 1** (SFCA, 2026).

Table 1. Summary of Subject Property Tax Parcel(s) Information

Physical Address	54 East Sas Francisco Street, Santa Fe, New Mexico 87501
Owner Name	54-56 E SAN FRANCISCO ST LLC
Parcel ID	12630912
Legal Description	COOPERS NEW METHOD CLNRS 54 E SAN FRANCISCO & 54 1/2,56 LOT 10 BLK 38 ZOOKS PHARMACY
Size (acres)	0.33030
Deed Date	Unknown
Instrument	1804/162 (plat book/page)

An Environmental Lien and Activity and Use Limitation (AUL) search was performed for the Subject Property parcel for the current owner. No environmental liens or AULs were identified for the Subject Property in the Lien Search Report (ERIS, 2026a – **Appendix A**).

2.2 Site Vicinity and General Characteristics

ASTM Standard E1527-21 specifies that the only standard physical setting source that must be checked during the Phase I ESA is the current USGS 7.5-minute topographic map (or equivalent). Other physical

setting sources used for this Phase I ESA were historical topographic maps (ERIS, 2025b – **Appendix B**) and historical aerial photographs (ERIS, 2025c – **Appendix C**), discussed in **Section 4**.

2.3 Physical Setting

Several sources were reviewed to determine the physical setting of the Subject Property. Information from published physical settings maps (ERIS, 2025d – **Appendix D**) are discussed in the following subsections.

2.3.1 Topography and Watershed

The most recent (2023) USGS 7.5-minute topographic map of the Site and surrounding area was obtained and reviewed as specified in ASTM Standard E1527-21 Section 8.2.1 (ASTM, 2021). The USGS Santa Fe, NM quadrangle provides coverage of the Subject Property and vicinity (USGS, 2023). Historical topographic maps were reviewed for surface topography and drainage information in the vicinity of the Subject Property, and are provided in **Appendix B**.

According to the topographic maps, the Subject Property is relatively flat, with a surface elevation of approximately 6,985 ft mean sea level. The topography in the vicinity of the Subject Property generally slopes from the east-northeast to the south-southwest. The site topography was confirmed during the site reconnaissance (**Section 5**). Surface drainage at the Subject Property follows the surface topography (**Figure 1**).

2.3.2 Average Precipitation and Temperature

The average annual precipitation in Santa Fe, New Mexico is approximately 13.69 inches per year. Most of the precipitation historically occurs in July. The highest average temperature historically is in July, at 72.2 degrees Fahrenheit (°F); the lowest average temperature historically is in January, at 31.6 °F (NOAA, 2026).

2.3.3 Flood Plain

The 100-year floodplain boundary runs along Water Street and covers most, if not all of the Subject Property. Only a portion of the overall Site parcel is in the floodplain. Approximately 90% of the Site parcel is outside of the FEMA 100- and 500-year floodplains (ERIS, 2025d – **Appendix D**).

2.3.4 Soil Characterization

The soil map provided by ERIS was reviewed to identify local surface soils underlying the Site. Soils underlying the Subject Property are solely composed of urban land, a miscellaneous categorization for highly developed areas (ERIS, 2025d).

2.3.5 Geology and Hydrogeology

The Subject Property is located near the base of the Sangre de Cristo Mountains, the southernmost subrange of the Rocky Mountains. Santa Fe is located on a large system of dissected alluvial fans stretching westward from the Sangre de Cristos to the bottom of the Rio Grande rift valley. The geologic map provided by ERIS (ERIS 2025d – **Appendix D**) was reviewed to determine the general geologic

setting at the Subject Property (ERIS 2025d – **Appendix D**). The geologic maps show that the Subject Property is underlain by older Quaternary alluvium (Qoa). In the immediate area, there are also Quaternary piedmont deposits and older (Quaternary to Oligocene) alluvial fan-type deposits of the Santa Fe Group. The hills to the north are made up of older Tertiary-aged Santa Fe Group. The source of the sediment that makes up this alluvial fan system is primarily the Mesoproterozoic and Paleoproterozoic plutonic bedrock that makes up the Sangre de Cristo Mountains directly to the east.

The primary source of groundwater around the Subject Property is the series of aquifers within the Santa Fe Group, which is primarily unconsolidated silts, sands, and gravels. ERIS reports a total of 607 water wells within a one-mile radius of the Subject Property. Sources queried included:

- Public Water Systems Violations and Enforcement Data
- Safe Drinking Water Information System
- USGS National Water Information System
- The New Mexico Office of the State Engineer Point of Diversion Database

Of the 18 wells listed within 1000 ft of the Subject Property, depth to water ranges from 26-100 ft bgs, where recorded (ERIS, 2025d).

The geology and hydrogeology, specifically with respect to shallow groundwater (e.g., occurrence, extent, localized flow direction(s), and connectivity relationship(s) to the Santa Fe River), is very complex due to localized discontinuities likely defined by the distribution of paleochannels associated with flow paths of the ancestral Santa Fe River, proximity to mountain front recharge areas, and contact with higher permeability faults, fractures, and bedding planes, and/or underlying weathered Tesuque Formation (INTERA, 2013).

In 2014, INTERA drilled several wells as part of the Targeted Brownfield Assessment for the Santa Fe River Assessment Site in an area immediately southwest of the Subject Property. Monitoring well "TBAMW-01", approximately 250 ft southwest of the Subject Property (**Figure 2**), was considered critical for verifying and refining the understanding of the complex shallow groundwater bearing unit in the area. During drilling, large cobble- to boulder-sized rocks distinctive of channel fill alluvium were noted to approximately 12 ft bgs. Below this was a moist sandy gravel to 14 ft bgs representative of older terrace fill, underlain by dry coarse sand with distinctive chloritized clasts of the top of the Tesuque Formation. The boring quickly accepted water from 24 ft to 29 ft bgs. The drilling rig hit refusal at 30 ft bgs. Groundwater in the well stabilized at 12 ft bgs. It is unclear if the alluvial aquifer is connected to the deeper Tesuque Formation, the principal aquifer for the City of Santa Fe. The Tesuque Aquifer is a semi-confined system containing layers of higher transmissivity beds consisting of coarser sands and gravels bound by less transmissive beds of finer silts and clays. Most groundwater produced from the Tesuque Aquifer is obtained at depths greater than 200 ft (INTERA, 2014).

2.4 Descriptions and Current Uses of Adjoining Properties

The Subject Property is bound by the various retail and restaurant properties to the north, east, and west, and to the south by Water Street and a paved parking area.

The Site and immediate vicinity thereof are depicted in **Figure 2**.

3.0 User-Provided Information

During project initiation, the User provided a summary of their knowledge of the Subject Property, summarized below in **Table 2**.

Table 2. User-Provided Information

Site Type	Dry cleaner
Site Name	New Method Dry Cleaner
Location	105 East Water Street, Santa Fe, New Mexico
Source of Identification	Historical City Directories between 1942 and 1994
Previous Investigations	Several investigations in the vicinity related to detections of tetrachloroethylene (PCE) with an unknown source
Major Contaminant Concern	PCE

Other than the information provided in **Table 2**, it is INTERA's understanding that the User has no additional knowledge of the Subject Property including those topics outlined in Section 6 of ASTM Standard E1527-21 as the User's responsibilities, summarized as follows:

- The User has no knowledge of any environmental liens or AULs for the Subject Property. However, INTERA has performed a review of land title records and performed a search for environmental liens and AULs on behalf of the User (**Section 4.1.1**).
- The User had no specialized knowledge or experience related to the Subject Property beyond the standard knowledge of an environmental regulatory agency relative to common contaminants associated with dry cleaning operations in general.
- Since a property transaction is not part of the rationale for this Phase I ESA, the User has no information about the purchase price or fair market value of the Subject Property (i.e., inquiry related to this topic is not applicable).
- The User was unaware of any commonly known or reasonably ascertainable information other than what is summarized in **Table 2**, including knowledge of any contamination, spills/releases, or cleanups that have taken place at the Subject Property.
- The User was unaware of any obvious indicators of the presence or likely presence of releases at the Subject Property.

Any supplemental information relative to the User's responsibilities as defined in Section 6 of ASTM Standard E1521-21 is provided in **Appendix E**.

4.0 Records Review

In accordance with ASTM requirements, INTERA reviewed historical topographic maps and aerial imagery, and standard federal, state, local, and tribal environmental regulatory agency documents. A discussion of records reviewed is provided in the following subsections.

4.1 Historical Use of the Site and Adjoining Properties

INTERA contracted ERIS to search for and provide historical topographic maps, historical aerial photographs, historical city directories, and historical fire insurance maps (FIMs) for the Subject Property and surrounding properties. ERIS also provided environmental lien and AUL search services. INTERA reviewed the historical sources of information to investigate the history of development and prior land uses associated with the Subject Property, adjoining properties, and surrounding area, and to identify past land uses that may indicate that hazardous substances or petroleum products were used. A summary of the historical records reviewed is provided below.

4.1.1 Chain of Title and Environmental Lien Search

INTERA contracted ERIS to perform historical chain of title and environmental lien and AUL search for the Subject Property. ERIS searched county, state, and federal records associated with the Subject Property address and parcel identifier back to 1932 for the chain of title and back to 1980 for the lien and AUL search.

The Chain of Title Report identified three deed conveyances, with the earliest recorded being in 1977. The conveyance details did not indicate any new information related to the use or activities at the Subject Property, including dry cleaning operations. No environmental liens and/or AULs were found (ERIS, 2025a). A copy of the combined Chain of Title Report and Environmental Lien Report is included in **Appendix A**.

4.1.2 Historical Topographic Maps

INTERA reviewed historical topographic maps provided by ERIS dated 1952, 1961, 1977, 1993, 2002, 2013, 2017, 2020, and 2023 (ERIS, 2025b), which are provided in **Appendix B**. A brief description of the Subject Property and the surrounding area derived from the review of historical and recent topographic maps is provided below.

- 1952:
  - The area around the Subject Property is developed as part of downtown Santa Fe. Other than some major roads coming in and out of downtown, the street grid is similar to its modern-day layout. There is a courthouse, post office, sanatorium, and the State Capitol building in the vicinity of the subject property.
- 1961:
  - The Subject Property and vicinity appear mostly unchanged since the previous map. U.S. Highway 64/84/285 has been built, leaving downtown Santa Fe to the north.
- 1977:

  - The Subject Property and vicinity appear relatively unchanged since the previous map. St. Francis Road is now built, bypassing downtown Santa Fe to the west. The Capitol building was moved further south, to its modern-day location.
- 1993:
  - The Subject Property and vicinity appear relatively unchanged since the previous map. Development around downtown continues to increase and infill vacant land. The hills to the north remain mostly undeveloped.
- 2002:
  - The Subject Property and vicinity appear relatively unchanged from the previous map.
- 2013:
  - The Subject Property and vicinity appear relatively unchanged from the previous map. The hills north of downtown are now infilled with residential development.
- 2020:
  - The Subject Property and vicinity appear relatively unchanged from the previous map.
- 2023:
  - The Subject Property and vicinity appear relatively unchanged since the previous map.

4.1.3 Historical Aerial Photographs

INTERA reviewed historical aerial photographs provided by ERIS dated 1935, 1948, 1951, 1960, 1967, 1975, 1981, 1991, 1996, 2005, 2009, 2011, 2014, 2016, 2018, 2020, and 2022 (ERIS, 2025c – **Appendix C**). A brief description of each historical aerial photograph reviewed is provided below**.**

- 1935: Image Resolution – Poor
  - The Subject Property is in downtown Santa Fe, surrounded by dense urban development. The Plaza is visible directly to the northeast. The area around downtown is lightly developed with what appears to be residences.
- 1948: Image Resolution – Fair
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 1951: Image Resolution – Good
  - The Subject Property and vicinity appear relatively unchanged since the previous image. Nearly all the vacant land surrounding downtown Santa Fe is now infilled with residential and/or commercial development.
- 1960: Image Resolution – Good
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 1967: Image Resolution – Good

  - The property across Water Street from the Subject Property now appears to be a parking lot. The new Capitol building is observed in the image, southeast of the older Capitol building.
- 1975: Image Resolution – Fair
  - The Subject Property and vicinity appear relatively unchanged since the previous image. The street layout in downtown and the surrounding area now resembles its current layout.
- 1981: Image Resolution – Poor
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 1991: Image Resolution – Good
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 1996: Image Resolution – Fair
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 2005: Image Resolution – Good
  - The Subject Property and vicinity appear relatively unchanged since the previous image. This is the first full color image.
- 2009: Image Resolution – Good
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 2011: Image Resolution – Good
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 2014: Image Resolution – Excellent
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 2016: Image Resolution – Excellent
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 2018: Image Resolution –Excellent
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 2020: Image Resolution – Excellent
  - The Subject Property and vicinity appear relatively unchanged since the previous image.
- 2022: Image Resolution – Excellent
  - The Subject Property and vicinity appear relatively unchanged since the previous image.

4.1.4 Fire Insurance Maps

Historical FIMs can be used to identify historical uses of a property including the presence of hazardous substances and petroleum products. INTERA reviewed historical FIMs provided by ERIS dated 1883, 1886, 1890, 1898, 1902, 1908, 1913, 1921, 1930, 1948, and 1970 (ERIS, 2025e – **Appendix F**).

- 1883:

  - The area around the Subject Property is developed as part of downtown Santa Fe. The Plaza appears directly northwest of the Subject Property. There is a hotel across the street (labeled Ortiz, now Don Gaspar Avenue) to the west and a lumber yard across the street (Water Street) to the south. In general, there are saloons, clothing and footwear retailers, grocery stores, hotels, and dwellings in the general vicinity.

- 1886:
  - The Subject Property and vicinity relatively similar since the previous map. The building across the street to the west is no longer labeled as a hotel, and instead includes a tailor, undertaker, and cobbler. The adjoining property to the west is also a tailor. The adjoining property on the southwest corner of Don Gaspar Avenue and Water Street is labeled as a paint retailer.
- 1890:
  - Don Gaspar Avenue, west of the Subject Property, is now constructed in its current alignment, cutting through the former lumber yard that was located across Water Street south of the Subject Property. A paint shop and a Chinese laundry are located across Don Gaspar to the west. A paint and oil warehouse is indicated northeast of the Subject Property, adjoining the Subject Property parcel.
- 1898:
  - Many of the buildings/businesses in the vicinity have the same labels as the previous map. A structure has been built for an electric light plant across Water Street to the southeast.
- 1902:
  - The Santa Fe Water & Light Company electric light plant is now located southeast of the Subject Property, next to a woodworker/carpentry business and a blacksmith. The light plant is indicated as having a dynamo/engine room (generator room). The property adjoining to the west is indicated as vacant. Buildings to the northwest are indicated as unusable due to fire. A hand laundry is indicated on the southwest corner of Don Gaspar and Water Street.
- 1908:
  - The light plant is indicated as having boilers and using coal as fuel, as well as still having an engine and dynamo. The facilities damaged by fire to the west and northwest have been reconstructed, mostly as food service and retail. Most of the business labels on this map are illegible. There are hotels across Don Gaspar Street to the west and across San Francisco Street to the north. There is a billiards/pool hall in the adjoining property to the east.
- 1913:
  - The Subject Property is indicated as being occupied by a blacksmith. A warehouse adjoins the Subject Property to the northeast. A machine shop and garage with a 150-gallon petroleum underground storage tank (UST) is located on the northwest corner of

Shelby Street and Water Street, approximately 325 ft east-southeast of the Subject Property (213 East Water Street).

- 1921:
  - The Subject Property is still indicated as a blacksmith. A gas filling station is located on the southeast corner of Don Gaspar and Water Street (101 East Water Street), with a 500-gallon petroleum UST. An auto sales business is located north of the filling station. The United States Land Office is located on the northwest corner of Don Gaspar and Water Street. The electric light plant is still indicated to the east of the Land Office, with steam, fuel, and coal power sources. A 250-gallon petroleum UST is indicated approximately 275 ft west-southwest of the Subject Property on Ortiz Street, west of an automotive garage and repair shop (84 Ortiz Street). A 550-gallon petroleum UST is indicated approximately 330 ft southeast of the Subject Property on Don Gaspar, east of an automotive garage extending west from Don Gaspar to Ortiz Street (159 Don Gaspar Avenue). A filling station is depicted approximately 425 ft east-southeast of the Subject Property on the southeast corner of Shelby Street and Water Street, with two petroleum USTs of unknown volume (232 East Water Street). An automotive showroom is located approximately 475 ft north of the Subject Property on the northeast corner of West Palace Avenue and Lincoln Avenue.
- 1930:
  - The Subject Property is indicated as a general store, and there are three gas tanks depicted immediately off the northwest corner of the building. The gas filling station and UST at 101 East Water Street are no longer depicted, replaced by a general store. The electric light plant is now called the New Mexico Power Company Substation. The substation has a concrete coal bin, three boilers, and a transformer depicted. The USTs associated with the two automotive facilities at 84 Ortiz Street and 159 Don Gaspar Avenue are no longer depicted. Two filling stations adjoining one another at 130 and 138 West Water Street are depicted with at least four USTs total. A filling station is depicted on the corner of West Palace Avenue and Lincoln Avenue with four USTs. The Santa Fe Transportation Garage is depicted on the southwest corner of Water Street and Shelby Street, with a single UST.
- 1948:
  - The Subject Property is labeled as a dry cleaning facility and the three gas tanks on the northwest corner are no longer depicted. An automotive parking area with a gas tank is depicted at 121 East Water Street. The Union Bus Depot is depicted on the southwest corner of West Water Street and Ortiz Street.
- 1970:
  - There is a contrast issue limiting visibility of this FIM. Any use indicated for the Subject Property is not discernable. The adjoining property to the east is a parking lot. The substation across Water Street is now a parking lot.

4.1.5 Historical City Directories

Historical city directories provide a method for researching historical uses of property. INTERA reviewed historical city directories obtained from ERIS to determine current and historical uses of the Subject Property and adjoining properties (ERIS, 2025f – **Appendix G**). ERIS provided historical City Directory Reports for all of East San Francisco Street and East Water Street. Additional results may be provided if included on the historical directory pages for the ranges provided by ERIS. ERIS provided results for the years 1928-29, 1930-31, 1936-37, 1940, 1944, 1949, 1955, 1960, 1964, 1968, 1973, 1978, 1983, 1988, 1993, 1996, 2000, 2003, 2008, 2011, 2016, 2020, 2023, and 2024. The city directory listings that could be reasonably presumed to be commercial or retail properties that may be associated with historical operations utilizing petroleum products (e.g., filling stations, gas stations) or other hazardous substances (e.g., dry cleaners or manufacturing facilities) are as follows:

Table 3. City Directory Listings

Address	Property Listing(s) (Year(s))
200 East Water Street	One Hour Martinizing (2000, 1996, 1993, 1983, 1978, 1973, 1968, 1964)
411 West Water Street	Adobe Laundromat; Adobe Econ-O Wash (1996, 1993; 1978)
105 East Water Street	New Method Cleaners (1988, 1983, 1978, 1973, 1968, 1964, 1960, 1955, 1949, 1944, 1940, 1936-37, 1930-31, 1928-29)
129 East Water Street	Gonzales Chevron Station; Le Bow Tommie Chevron; Morris Motor Service; Santa Fe Motor Co. (1973; 1968, 1964, 1960, 1955; 1936-37; 1930-31, 1928-29)
246 West Water Street	Master Dry Cleaners; Master Dri-Sheen Cleaners (1964, 1955; 1949)
232 West Water Street	A-1 Auto Service Repair (1964)
318 West Water Street	Santa Fe Welding and Radiator Service; Capital Auto Works (1955, 1949; 1928-29)
128 West Water Street	LeBow Standard Station (1949)
323 West Water Street	Santa Fe Elec Laundry (1944, 1940, 1928-29)
309 West Water Street	Master Dri-Sheen Cleaners (1944)
215 West Water Street	El Torreon Bldrs Auto Repair; Nelson Motor Service; Andrews Garage (1944; 1940; 1928-29)
113 East Water Street	Tony's Super Tire Service (1940)
315 West Water Street	Coronado Service Station (1940)
218 West Water Street	Izard Bros Tire Store (1940)
126 West Water Street	Manker's Auto Service (1936-37)
228 West Water Street	White Swan Laundry & Dry Cleaning Co. (1930-31)

4.2 Environmental Database Records Review

ERIS was contracted to provide a listing of standard environmental records within the ASTM-specified approximate minimum search distance (AMSD) from the Subject Property. ERIS also provides results from non-standard databases that may be relevant with respect to the objective of a Phase I ESA (i.e., without a specified AMSD). ERIS provided results from 104 unique federal, state, and tribal databases using the ASTM-specified AMSD or otherwise relevant search distance for each database. The ASTM-compliant regulatory database report is included as **Appendix H**.

4.2.1 Mapped Locations

Based on 121 total results of the database search, ERIS identified 87 sites (mapped locations) within 1 mile of the Subject Property. Two of the results were identified for the Subject Property. Sites may be identified in multiple databases, some may be identified in the same database more than once, and some may be for former and/or current operations. Findings based on results of select databases that returned significant results that support the objective of the Phase I ESA and opinions of those findings are discussed in **Section 7**. The mapped locations are summarized in **Table 4**. The ERIS Database Report, which describes and shows these facility locations, is included in **Appendix H** (ERIS, 2025g).

Table 4. File Review Information

Database Record[1]	AMSD (miles)	Total Sites Identified	Within AMSD	On Site Property	Data Source
Standard ASTM Environmental Record Resources					
Federal – SEMS	0.5	1	1	0	ERIS
Federal – RCRA SQG	Subject Property and Adjoining Properties	1	0	0	ERIS
Federal – RCRA VSQG	Subject Property and Adjoining Properties	1	0	0	ERIS
Federal – RCRA Non-Generators	Subject Property and Adjoining Properties	3	0	0	ERIS
Federal – FED BROWNFIELDS	0.5	4	4	0	ERIS
State – SCS	1.0	6	6	0	ERIS
State – Delisted SCS	1.0	1	1	0	ERIS
State – SWF/LF	0.5	3[2]	3	0	ERIS
State – LST	0.5	9	9	0	ERIS
State – LUST HIST	0.5	7	7	0	ERIS
State – UST	Subject Property and Adjoining Properties	10	0	0	ERIS
State – UST HIST	Subject Property and Adjoining Properties	7	0	0	ERIS
State – TANKS	Subject Property and Adjoining Properties	7	0	0	ERIS

State – SPILLS	NA	1	NA	0	ERIS

Notes:

[1] Full descriptions of the database sources of information can be found in the ERIS Database Report (Appendix H)

[2] One or more mapped locations listed more than one time

4.3 Regulatory Agency and Supplemental Records Review

If the Subject Property or a property adjoining the Subject Property is identified in a review of standard ASTM environmental records resources, supplemental records review must be conducted (Section 8.2.3.1 of ASTM E1527-21). Neither the Subject Property nor adjoining properties were identified during review of standard ASTM environmental records resources and therefore mandatory supplemental review was not conducted.

If records review was required, relevant supplemental records obtained would be presented in **Appendix I**. Since no records were required/obtained, **Appendix I** is "reserved."

5.0 Site Reconnaissance

In general, the following was observed during the site reconnaissance to obtain information for the evaluation of RECs in connection with the Subject Property:

- Since access to conduct the Phase I ESA site reconnaissance was not obtained, the exterior of the Subject Property was observed from the public right-of-way.
- Adjoining properties from the Subject Property boundary and/or the public right-of-way.
- General topography and surface drainage in the vicinity of the Subject Property.

INTERA personnel conducted the site reconnaissance on February 12, 2026. Photographic documentation of the site visit is included in **Appendix J**. Findings documented during the site reconnaissance are summarized in **Section 7** of this report.

Conditions observed are presented below; a check mark in any box indicates that INTERA observed evidence of the item during the Site reconnaissance.

☐ Hazardous substances and/ or petroleum products	☐ Unidentified substance containers	☐ Stressed vegetation
☐ Storage tanks	☐ PCBs	☐ Solid waste
☐ Odors	☐ Drains and Sumps	☐ Utilities/Pipelines
☐ Pools of liquid	☐ Pits, ponds, or lagoons	☐ Wastewater
☐ Drums/Containers	☐ Stained soil or pavement	☐ Wells
☐ Hazardous substance and/or petroleum product containers	☐ Stains or Corrosion	☐ Septic systems

Relevant discussion of the conditions observed, including but not limited to the items identified above, is discussed in the following subsections.

5.1 Methodology and Limiting Conditions

The methodology for the site reconnaissance was based on ASTM Standard E1527-21 (ASTM, 2021). INTERA physically inspected the Subject Property and adjoining properties to the extent possible from the right-of-way, and the general site vicinity, to identify RECs or evidence of RECs as specified in Section 9 of ASTM Standard E1527-21 (ASTM, 2021).

5.2 Subject Property

The Subject Property is located on a 0.33-acre parcel of highly developed commercial land. The parcel is rectangular, approximately 250 ft long in the southwest to northeast direction, and approximately 60 ft long in the southeast to northwest direction. The parcel is situated immediately adjacent to the southwest corner of the Santa Fe Plaza and extends from East San Francisco Street to Water Street in a highly developed urban setting and surrounded by other commercial properties. The Subject Property

(105 East Water Street) is in the southeast corner of the parcel with an entrance off East Water Street. The Site and immediate vicinity thereof are depicted in **Figure 2**.

Generally, the site reconnaissance did not identify any obvious signs of contamination or hazardous substances as a result of chemicals used during former dry cleaning activities.

Photographs taken during the site reconnaissance are included in **Appendix J**.

5.3 Adjoining Properties

INTERA observed properties from the boundary of the Subject Property and from public rights-of-way to the extent possible. Evidence of contamination or hazardous substances was not directly observed. Descriptions of adjoining properties are provided in **Section 2.4**.

5.4 Surrounding Properties

Surrounding properties were generally commercial, primarily restaurants and retail properties.

6.0 Interviews

In accordance with requirements of Sections 10 and 11 of ASTM Standard E1527-21 (ASTM, 2021 p. 21-23), INTERA interviewed the *key site manager* and *local government officials* for knowledge of any past or present RECs in connection with the Subject Property.

Any findings associated with these interviews are indicated in **Section 7**.

6.1 Key Site Manager

Mr. Andrew Murphy of INTERA interviewed Josh, current partial business owner and Key Site Manager for the Subject Property, on February 12, 2026. Mr. Josh [unknown last name], co-owner of the business currently operating at the Subject Property stated that Mr. Robert Spitz is the building owner and uses a property management company. Josh indicated that to his knowledge, he was unaware of any environmental conditions of concern, i.e., no known incidents of releases of chemicals or petroleum products during his ownership Subject Property or knowledge of any incidents prior to his association with the Site. Josh stated that if hazardous chemicals were used onsite, it would have been during the 1970s when the dry cleaning business was active. Documentation of the interview with the Key Site Manager is provided in **Appendix K**.

6.2 Local Government Officials

NMED provided available information for the Subject Property during project initiation as described in **Section 3**. The information provided is considered satisfactory to meet the requirements of the Standard. No additional information from local government officials was obtained.

7.0 Findings and Opinions

This section presents the findings of the Phase I ESA Report for the Subject Property and summarizes the results of the Phase I ESA records review, site reconnaissance, and interviews as they relate to the potential presence of RECs. A discussion of Subject Property findings related to the use, storage, and disposal of hazardous substances and petroleum products is presented in **Section 7.1**. A discussion of the findings for adjoining and surrounding vicinity properties is included in **Sections 7.2** and **7.3**, respectively. **Section 7.4** discusses the results of the Tier 1 VES. This section also presents INTERA's opinions concerning the potential of the findings to contaminate Subject Property environmental media and whether the finding is considered a REC. The findings presented in this section are the basis for the Phase I ESA conclusions presented by INTERA in **Section 8** of this Phase I ESA Report.

7.1 Subject Property Findings and Opinions

The Subject Property is a small storefront located in the southeast corner of a 0.33-acre parcel of land developed with shared commercial and retail space, primarily restaurants and retail. The Subject Property is currently occupied by a retail clothing and gifts store. Based on review of historical records, a dry cleaning facility operated at the Subject Property for approximately 60 years, between 1928 and 1988. The 1930 FIM (**Section 4.1.4**) indicates three gas tanks (abbreviated "G.T") immediately behind the northwest corner of the Subject Property. Since the historical city directories (**Section 4.1.5**) indicate that the Subject Property was operating as the New Method Dry Cleaners 1930, it is unknown if these tanks could have been misidentified on the FIM as gas tanks or if petroleum fuel was also stored at the Subject Property for an unknown purpose or potentially part of operations conducted at an adjoining property. The Subject Property has operated as various clothing and gift stores from 1993 to the present.

Based on the information available including PCE contamination in the vicinity of the Subject Property with an unidentified source (**Section 7.3**), a REC exists in connection with the Subject Property due to the extensive history of dry cleaning operations over a 60 year period and the probability of the use of hazardous chemicals including chlorinated solvents during a time when regulations for the use, storage, and disposal of those chemicals was limited, and potentially the use and storage of petroleum products.

7.2 Adjoining Property Findings and Opinions

Based on review of historical FIMs (**Section 4.1.4**), in approximately 1902, an electric substation began operations adjoining the Subject Property to the southeast across East Water Street, operating dynamo(s)/generator(s) to produce electricity. By 1930 the facility had expanded and renamed, called the New Mexico Power Company Substation, and large transformer was installed, occupying approximately 625 square ft. The operations at this facility (approximately 1902 to 1950) coincided with the widespread production and commercial use of PCBs, including in generators and transformers. Based on the duration and time period of potential PCB use, this former facility is considered a REC in connection with the Subject Property.

7.3 Vicinity Findings and Opinions

Groundwater, soil vapor, and indoor air sampling have been conducted in the immediate vicinity of the Subject Property, notably in 2014 (INTERA, 2014) and 2017 (INTERA, 2017). A summary of select analytical results of chlorinated solvents (PCE and its primary breakdown products) detected in groundwater, soil vapor, and indoor air are provided in **Table 5**.

Table 5. Summary of Select Analytical Results (Chlorinated Solvents)

Sample Location[1]	Sample Date	Analyte			
		PCE	TCE	1,1-DCE	Vinyl Chloride
Groundwater (mg/L)					
NM WQCC Standard		**0.005**	**0.005**	**0.007**	**0.002**

IA-02-Arcade	6/29/2017	3.8	0.32	ND	0.098

Notes:

[1] Sample locations correspond to those depicted in Figure 2.

Bold results exceed an applicable health-protective value

1,1-DCE = 1,1-Dichloroethylene

µg/m³ = micrograms per cubic meter

mg/L = milligrams per liter

NM WQCC = New Mexico Water Quality Control Commission

PCE = tetrachloroethylene

TCE = trichloroethylene

VISL = Vapor Intrusion Screening Level

A significant amount of activity involving the storage and/or use of petroleum products in the vicinity of the Subject Property was also identified during the review of historical records (FIMs and city directories) and database results. Petroleum constituents were not detected in the groundwater samples that were reviewed in the immediate vicinity of the Subject Property, but benzene and ethylbenzene were detected in soil gas and indoor air samples. A summary of select analytical results detected in soil gas and indoor air are provided in **Table 6.**

Table 6. Summary of Select Analytical Results (Petroleum)

Sample Location[1]	Sample Date	Analyte	
		Benzene	Ethylbenzene
Soil Vapor (µg/m³)			
EPA Target Sub-Slab and Exterior Soil Gas VISL		**12**	**37**

NMED Indoor Air VISL (Residential/Industrial)		**3.6/17.6**	**11.2/55.1**
IA-01-Arcade	6/29/2017	**0.70**	**1.9**
IA-02-Arcade	6/29/2017	**0.58**	**2.6**

Notes:

[1] Sample locations correspond to those depicted in Figure 2.

Bold results exceed an applicable health-protective value

µg/m³ = micrograms per cubic meter

VISL = Vapor Intrusion Screening Level

Based on the proximity of documented contamination in groundwater and soil vapor above health-protective values (**Figure 2**), a **REC** exists in connection with the Subject Property.

7.4 Tier 1 Vapor Encroachment Screening

ASTM Standard E2600-22 defines the default area of concern (AOC) based on $^{1}/_{3}$-mile for hazardous substances and $^{1}/_{10}$-mile for petroleum hydrocarbon contaminants. The AOC is measured from the Subject Property boundary to a contaminated property with known or suspected contamination of soil and/or groundwater (ASTM, 2022).

Based on review of Subject Property, adjoining property, and vicinity property findings within the default AOC, the dry cleaning operations known to have occurred at the Subject Property and its vicinity are considered a VEC.

7.5 Data Gaps

A *data gap* exists in connection with the Subject Property due to the environmental professional not being able to observe all areas of the Subject Property because access to the Subject Property was not obtained. However, it is our professional opinion that this is not a *significant data gap* because the information available sufficiently constitutes a REC notwithstanding the limitations of the site reconnaissance.

8.0 Conclusions

INTERA has performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard E1527-21 for the Subject Property. Any exceptions to or deletions from this practice are described in **Section 7.5**. Based on the completion of the scope of services provided in support of this Phase I ESA, several RECs and/or VECs were identified in connection with the Subject Property, as follows:

- Approximately 60 years (1928-1988) of dry cleaning operations conducted at the Subject Property, corroborated by documented contamination of groundwater and soil gas above health-protective levels in the immediate vicinity of the Subject Property, is considered a **REC/VEC**.
- Approximately 48 years (1902-1950) of electrical substation operations coinciding with the widespread commercial use of PCBs in electrical equipment, occurring at a facility that formerly adjoined the Subject Property to the southeast across East Water Street is considered a **REC**.
- Widespread petroleum product storage and use in the general vicinity of the Subject Property, corroborated by historical FIMs and by documented elevated soil gas and indoor air analytical data collected from areas adjoining and in the immediate vicinity of the Subject Property, is considered a **REC**.

9.0 Recommendations

Based on the AAIs performed by the environmental professional in conformance with 40 CFR 312.31(a) and (b), this Phase I ESA has revealed evidence of one or more RECs/VECs or *significant data gaps* in connection with the Subject Property. Based on the conclusions of this Phase I ESA, INTERA recommends the following:

- Perform a Phase II site investigation to assess the potential impacts to environmental media from the RECs identified in connection with the Subject Property.

11.0 Disclaimer

The findings and conclusions contained in this report were derived using the methodologies provided in ASTM Standard E1527-21 (ASTM, 2021). The findings and conclusions contain all limitations inherent in these methodologies. There is the possibility that even with proper application of these methodologies, conditions may exist at the Subject Property that could not be identified within the scope of the Phase I ESA or that were not reasonably identifiable from the available information.

INTERA has prepared this report in accordance with the generally accepted environmental professional practices in use at the time of our study. This report may be used only by the User(s) and only for the purposes stated within a reasonable time from its issuance as outlined in ASTM Standard E1527-21 (ASTM, 2021). Land use, Site conditions (both onsite and offsite), or other factors may change over time, and additional work may be required with the passage of time. Any party other than the User(s) who wishes to use this report shall notify the User(s) of the intended use. Non-compliance with any of these requirements will release INTERA from any liability resulting from the use of this report.

INTERA does not warrant or guarantee in any manner, expressed or implied, that the conclusions and findings reported in this Phase I ESA, or the information obtained for this Phase I ESA from the records review or from other sources, including site reconnaissance observations, personal interviews, and correspondence, are accurate or complete beyond the limits of the methods applied. The methodologies of this Phase I ESA assessment are intended to meet the scope of a Phase I ESA in accordance with ASTM Standard E1527-21 (ASTM, 2021).

INTERA conducted this Phase I ESA and AAI into previous property ownership and uses in a manner consistent with ASTM Standard E1527-21 and the EPA AAI Final Rule (EPA, 2005) definitions of good commercial and customary ESA and AAI practices in the United States of America.

This Phase I ESA report is intended for use solely by the User(s). Any party other than the User(s) is explicitly denied any rights to rely on the findings, opinions, and conclusions of this Phase I ESA report.

12.0 Qualifications and Signatures of Environmental Professionals

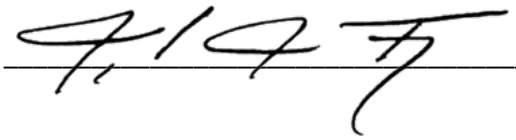

Complete copies of resumes outlining the qualifications of the individuals completing this Phase I ESA report are included as **Appendix L**.

"I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Matt Hubbard, Senior Environmental Scientist/Environmental Professional

Chain of Title Report and Environmental Lien and Activity and Use Limitation Search

CHAIN OF TITLE

Project Property: *105 EAST WATER STREET*
SANTA FE, NM 87501
Order No: *25121700729-COT1*
Date Completed: *01/05/2026*

ERIS – Environmental Risk Information Services hereby submits the following historical chain-of-title to the land described below.

Title to the estate or interest covered by this report appears to be vested in:

54-56 EAST SAN FRANCISCO STREET, LLC

The following is the current property legal description (See deed for full legal description):

COOPERS NEW METHOD CLNRS 54 E SAN FRANCISCO & 54 1/2,56 LOT 10 BLK 38 ZOOKS PHARMACY

Assessor's Parcel Number(s): 012630912 AND 1-054-099-227-155

CHAIN OF TITLE REPORT

Order No: *25121700729-COT1*

HISTORICAL CHAIN OF TITLE

Public Records were searched at the SANTA FE COUNTY Assessor's office and the SANTA FE COUNTY Clerk's office back to 1932. The following conveyances were found of record.

1.	Deed Type:	WARRANTY DEED
	Deed Date:	07/18/2000
	Recorded:	09/20/2000
	Grantor:	ROBERT M. SPITZ, FREDERICK L. SPITZ, SOLOMON S. SANTA FE CORPORATION
	Grantee:	54-56 EAST SAN FRANCISCO STREET, LLC
	Instrument:	BOOK 1804 / PAGE 164
	Notes:	NA
2.	Deed Type:	DEED
	Deed Date:	12/31/1997
	Recorded:	12/31/1997
	Grantor:	SPITZ BROTHERS
	Grantee:	ROBERT M. SPITZ, FREDERICK L. SPITZ, SOLOMON S. SANTA FE CORPORATION
	Instrument:	1007663
	Notes:	NA
3.	Deed Type:	DEED
	Deed Date:	02/18/1977
	Recorded:	02/18/1977
	Grantor:	ROBERT M. SPITZ
	Grantee:	SPITZ BROTHERS
	Instrument:	BOOK 344 / PAGE 358
	Notes:	NA

LEASES AND MISCELLANEOUS

Comments: NONE IDENTIFIED.

The ERIS Environmental Lien Search Report to 1980 provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:

- Search for parcel information and / or legal description
- Search for ownership information
- Research official land title documents recorded at jurisdictional agencies such as recorder's' office, registries of deeds, county clerks' offices, etc.
- Access copies of deeds to 1980
- Search for environmental encumbrance(s) associated with the deeds
- Provide a copy of any environmental encumbrance(s) based upon a review of keywords in the instrument(s) (title, parties involved and description)
- Provide a copy of the deeds or cite documents reviewed

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

0 0.125 0.25 Miles

ERIS

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Qoa

Unit Name:	Older alluvial deposits of upland plains and piedmont areas, and calcic soils and eolian cover sediments of High Plains region
Unit Age:	Middle to lower Pleistocene
Primary Rock Type:	Unconsolidated
Secondary Rock Type:	
Unit Description:	Includes scattered lacustrine, playa, and alluvial deposits of the Tahoka, Double Tanks, Tule, Blanco, Blackwater Draw, and Gatuna Formations, the latter of which may be Pliocene at base; outcrops, however, are basically of Quaternary deposits.

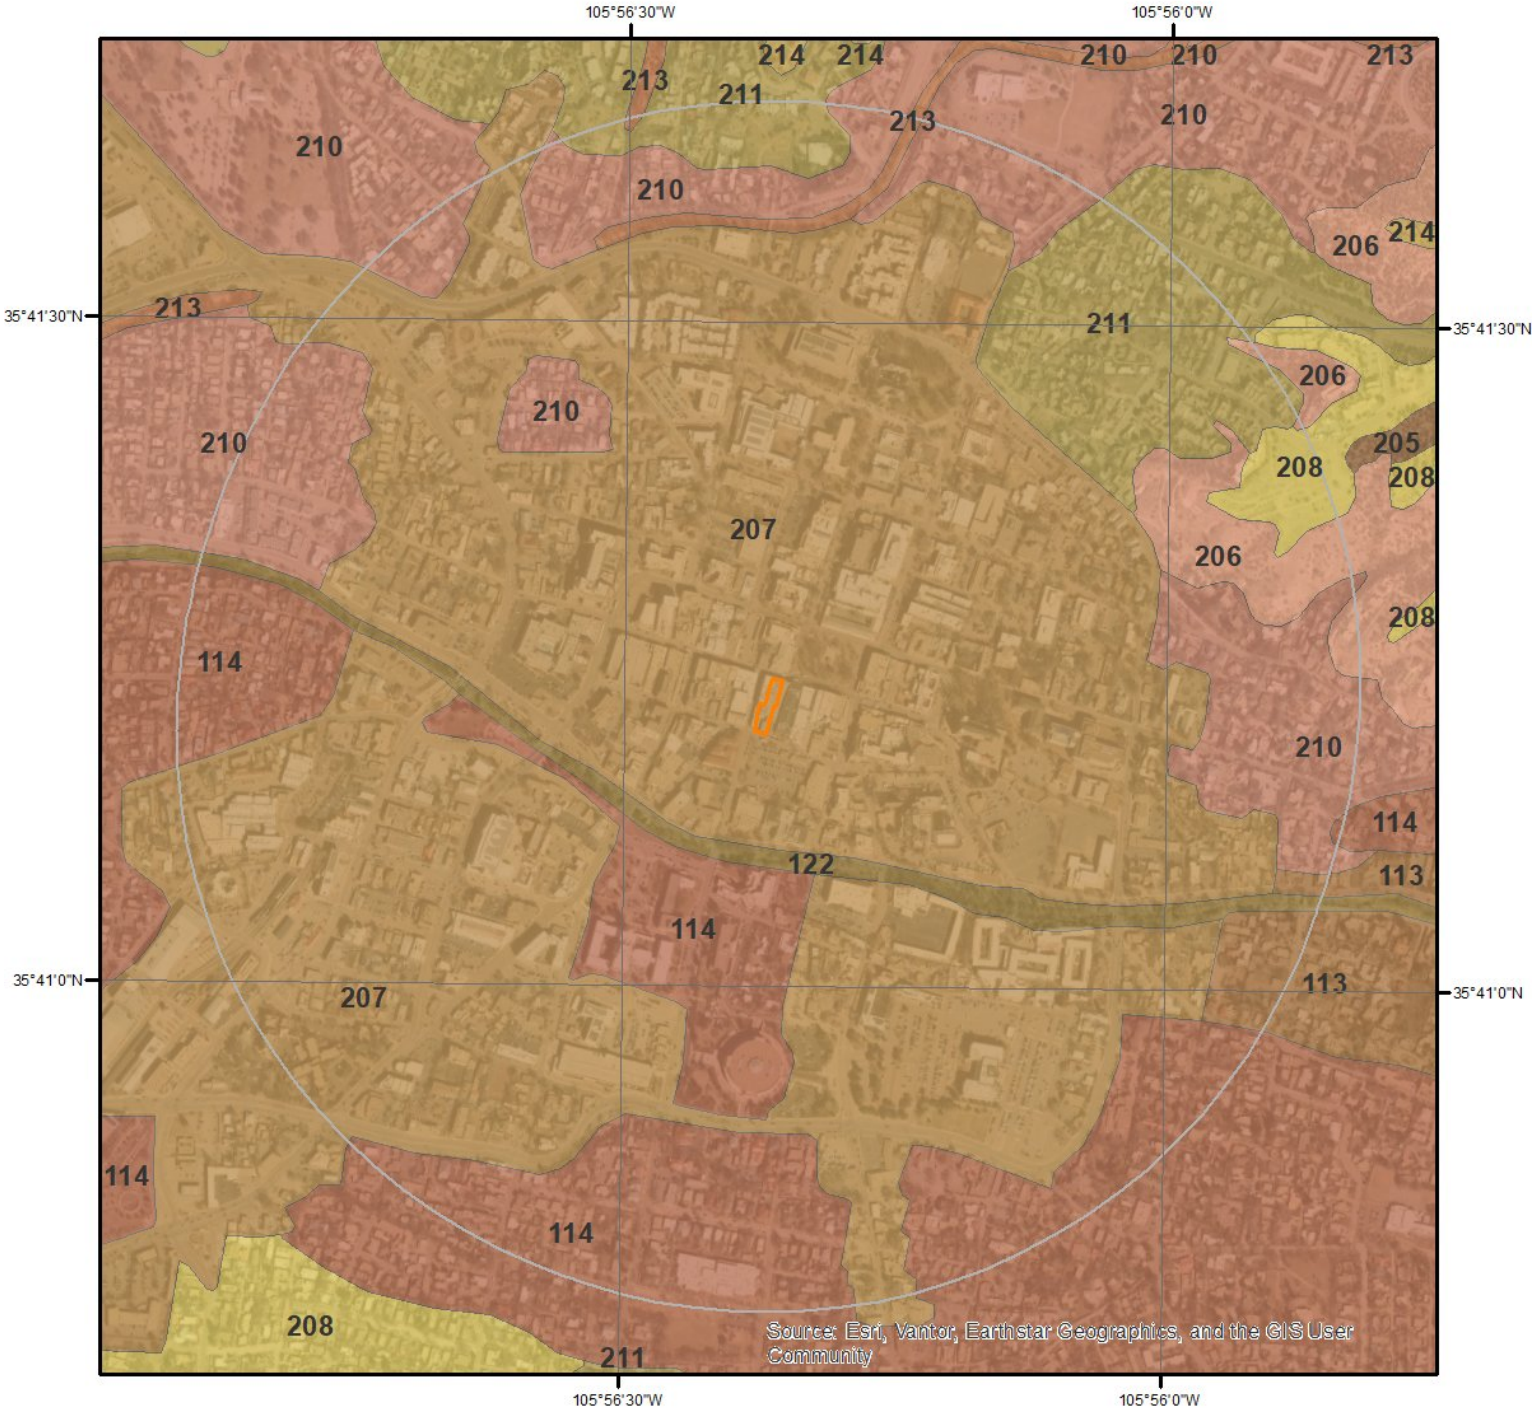

Geologic Unit Qp

Unit Name:	Piedmont alluvial deposits
Unit Age:	Holocene to lower Pleistocene
Primary Rock Type:	Unconsolidated
Secondary Rock Type:	
Unit Description:	Includes deposits of higher gradient tributaries bordering major stream valleys, alluvial veneers of the piedmont slope, and alluvial fans. May locally include uppermost Pliocene deposits.

Geologic Unit Tsf

Unit Name:	Lower Santa Fe Group
Unit Age:	Upper Miocene to uppermost Oligocene
Primary Rock Type:	Conglomerate-sandstone
Secondary Rock Type:	Coarse-detrital
Unit Description:	Includes Hayner Ranch, Rincon Valley, Popotosa, Cochiti, Tesuque, Chamita, Abiquiu, Zia, and other formations.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 113 (2.5%)

Map Unit Name:	Delvalle-Urban land complex, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.
Major components are printed below	
Delvalle(60%)	
horizon A(0cm to 8cm)	Fine sandy loam
horizon Bk1(8cm to 25cm)	Fine sandy loam
horizon Bk2(25cm to 48cm)	Fine sandy loam
horizon Bk3(48cm to 86cm)	Fine sandy loam
horizon Bk4(86cm to 137cm)	Sandy loam
horizon BCk1(137cm to 160cm)	Very gravelly sand
horizon BCk2(160cm to 183cm)	Extremely gravelly coarse sand
horizon C1(183cm to 234cm)	Very gravelly loamy coarse sand
horizon C2(234cm to 266cm)	Sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 113 - Delvalle-Urban land complex, 0 to 2 percent slopes

Component: Delvalle (60%)
The Delvalle component makes up 60 percent of the map unit. Slopes are 0 to 2 percent. This component is on stream terraces, valleys. The parent material consists of alluvium derived from granite, gneiss, and schist. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 3 percent. This component is in the R035XA112NM Loamy ecological site. Nonirrigated land capability classification is 6c. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 3 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 2 within 30 inches of the soil surface.

Component: Urban land (30%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Devargas (5%)
Generated brief soil descriptions are created for major soil components. The Devargas soil is a minor component.

Component: Riovista (3%)
Generated brief soil descriptions are created for major soil components. The Riovista soil is a minor component.

Component: Dumps (2%)
Generated brief soil descriptions are created for major soil components. The Dumps soil is a minor component.

Map Unit 114 (15.36%)

Map Unit Name:	Devargas-Urban land complex, 1 to 3 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	

Soil Information

Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Devargas(50%)

horizon A(0cm to 5cm)	Loam
horizon Bt1(5cm to 23cm)	Loam
horizon Bt2(23cm to 43cm)	Clay loam
horizon Btk1(43cm to 63cm)	Clay loam
horizon Btk2(63cm to 76cm)	Loam
horizon Bk(76cm to 84cm)	Very gravelly coarse sandy loam
horizon 2BCk(84cm to 107cm)	Extremely gravelly loamy coarse sand
horizon 2C1(107cm to 170cm)	Extremely cobbly coarse sand
horizon 2C2(170cm to 216cm)	Extremely gravelly loamy coarse sand
horizon 2C3(216cm to 239cm)	Very gravelly coarse sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 114 - Devargas-Urban land complex, 1 to 3 percent slopes

Component: Devargas (50%)
The Devargas component makes up 50 percent of the map unit. Slopes are 1 to 3 percent. This component is on high stream terraces, valleys. The parent material consists of alluvium derived from sandstone over alluvium derived from granite, gneiss, and schist. Depth to a root restrictive layer, strongly contrasting textural stratification, is 28 to 31 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R035XA112NM Loamy ecological site. Nonirrigated land capability classification is 6c. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 4 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 2 within 30 inches of the soil surface.

Component: Urban land (45%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Delvalle (3%)
Generated brief soil descriptions are created for major soil components. The Delvalle soil is a minor component.

Component: Panky (1%)
Generated brief soil descriptions are created for major soil components. The Panky soil is a minor component.

Component: Dumps (1%)
Generated brief soil descriptions are created for major soil components. The Dumps soil is a minor component.

Map Unit 122 (0.89%)

Map Unit Name:	Cuyamungue-Riverwash complex, 0 to 2 percent slopes, flooded
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Cuyamungue(60%)

horizon AC(0cm to 8cm)	Very gravelly coarse sand
horizon C1(8cm to 43cm)	Stratified gravelly coarse sand to very gravelly coarse sand
horizon C2(43cm to 61cm)	Stratified gravelly coarse sand to very gravelly coarse sand
horizon C3(61cm to 89cm)	Very gravelly coarse sand

horizon C4(89cm to 147cm)	Stratified gravelly coarse sand to extremely gravelly coarse sand
horizon C5(147cm to 218cm)	Stratified very gravelly coarse sand to extremely gravelly coarse sand
horizon C6(218cm to 254cm)	Extremely gravelly loamy coarse sand
Riverwash(30%)	
horizon C1(0cm to 25cm)	Gravelly coarse sand
horizon C2(25cm to 127cm)	Very gravelly coarse sand
horizon C3(127cm to 165cm)	Gravelly sandy loam
horizon C4(165cm to 216cm)	Gravelly coarse sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 122 - Cuyamungue-Riverwash complex, 0 to 2 percent slopes, flooded

Component: Cuyamungue (60%)
The Cuyamungue component makes up 60 percent of the map unit. Slopes are 0 to 2 percent. This component is on flood plains on valley floors, valleys. The parent material consists of alluvium derived from granite, gneiss, schist, and granitic sandstone. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is very high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is frequently flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 0 percent. This component is in the F036XA005NM Riverine Riparian ecological site. Nonirrigated land capability classification is 4w. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 1 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Riverwash (30%)
Generated brief soil descriptions are created for major soil components. The Riverwash is a miscellaneous area.

Component: Zia (4%)
Generated brief soil descriptions are created for major soil components. The Zia soil is a minor component.

Component: Bosquecito (3%)
Generated brief soil descriptions are created for major soil components. The Bosquecito soil is a minor component.

Component: Mirada (2%)
Generated brief soil descriptions are created for major soil components. The Mirada soil is a minor component.

Component: Scogg (1%)
Generated brief soil descriptions are created for major soil components. The Scogg soil is a minor component.

Map Unit 206 (1.66%)

Map Unit Name:	Encantado very cobbly sandy loam, 25 to 45 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Somewhat excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.
Major components are printed below	
Encantado(90%)	
horizon ABk(0cm to 5cm)	Very cobbly sandy loam
horizon Bk1(5cm to 20cm)	Gravelly sandy loam
horizon Bk2(20cm to 30cm)	Gravelly coarse sandy loam
horizon Bk3(30cm to 61cm)	Very gravelly coarse sandy loam
horizon BCk(61cm to 79cm)	Gravelly loamy sand
horizon BCk1(79cm to 142cm)	Very gravelly loamy coarse sand
horizon BCk2(142cm to 170cm)	Gravelly loamy sand
horizon C(170cm to 208cm)	Gravelly loamy coarse sand

Soil Information

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 206 - Encantado very cobbly sandy loam, 25 to 45 percent slopes

Component: Encantado (90%)
The Encantado component makes up 90 percent of the map unit. Slopes are 25 to 45 percent. This component is on eroded fan remnants, fan piedmonts. The parent material consists of colluvium derived from granite, gneiss, and schist over residuum weathered from granitic fanglomerate and sandstone. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the F036XA136NM Pinyon-juniper-apache Plume ecological site. Nonirrigated land capability classification is 7e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 23 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 2 within 30 inches of the soil surface.

Component: Nazario (4%)
Generated brief soil descriptions are created for major soil components. The Nazario soil is a minor component.

Component: Encantado (3%)
Generated brief soil descriptions are created for major soil components. The Encantado soil is a minor component.

Component: Urban land (2%)
Generated brief soil descriptions are created for major soil components. The Urban land soil is a minor component.

Component: Rock outcrop (1%)
Generated brief soil descriptions are created for major soil components. The Rock outcrop soil is a minor component.

Map Unit 207 (53.74%)

Map Unit Name: Urban land

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 207 - Urban land

Component: Urban land (85%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Alire (4%)
Generated brief soil descriptions are created for major soil components. The Alire soil is a minor component.

Component: Panky (3%)
Generated brief soil descriptions are created for major soil components. The Panky soil is a minor component.

Component: Altazano (2%)
Generated brief soil descriptions are created for major soil components. The Altazano soil is a minor component.

Component: Buckhorse (2%)
Generated brief soil descriptions are created for major soil components. The Buckhorse soil is a minor component.

Component: Predawn (2%)
Generated brief soil descriptions are created for major soil components. The Predawn soil is a minor component.

Component: Delvalle (1%)
Generated brief soil descriptions are created for major soil components. The Delvalle soil is a minor component.

Component: Tanoan (1%)
Generated brief soil descriptions are created for major soil components. The Tanoan soil is a minor component.

Soil Information

Map Unit 208 (0.59%)

Map Unit Name:	Alire-Urban land complex, 2 to 8 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Alire(50%)

horizon A(0cm to 10cm)	Loam
horizon Bt(10cm to 28cm)	Clay loam
horizon Btk1(28cm to 51cm)	Clay loam
horizon Btk2(51cm to 69cm)	Loam
horizon Bk1(69cm to 107cm)	Loam
horizon Bk2(107cm to 130cm)	Gravelly loam
horizon Bkq1(130cm to 175cm)	Gravelly loam
horizon Bkq2(175cm to 241cm)	Gravelly loam
horizon C(241cm to 251cm)	Gravelly sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 208 - Alire-Urban land complex, 2 to 8 percent slopes

Component: Alire (50%)
The Alire component makes up 50 percent of the map unit. Slopes are 2 to 8 percent. This component is on beveled eroded fan remnants, fan piedmonts. The parent material consists of alluvium derived from granite, gneiss, schist, and loess. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R035XA112NM Loamy ecological site. Nonirrigated land capability classification is 4c. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 23 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 9 within 30 inches of the soil surface.

Component: Urban land (40%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Predawn (4%)
Generated brief soil descriptions are created for major soil components. The Predawn soil is a minor component.

Component: Tanoan (3%)
Generated brief soil descriptions are created for major soil components. The Tanoan soil is a minor component.

Component: Altazano (2%)
Generated brief soil descriptions are created for major soil components. The Altazano soil is a minor component.

Component: Encantado (1%)
Generated brief soil descriptions are created for major soil components. The Encantado soil is a minor component.

horizon Btkb2(117cm to 165cm)	Loam
horizon BCkb(165cm to 188cm)	Gravelly coarse sandy loam
horizon Ckb(188cm to 229cm)	Gravelly loamy coarse sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 210 - Urban land-Buckhorse-Altazano complex, 2 to 8 percent slopes

Component: Urban land (60%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Buckhorse (20%)
The Buckhorse component makes up 20 percent of the map unit. Slopes are 2 to 8 percent. This component is on eroded fan remnants, fan piedmonts. The parent material consists of slope alluvium derived from granite, gneiss, schist, granitic sandstone, fanglomerate, and mudstone. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R035XA112NM Loamy ecological site. Nonirrigated land capability classification is 4c. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 10 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Altazano (10%)
The Altazano component makes up 10 percent of the map unit. Slopes are 2 to 8 percent. This component is on eroded fan remnants, fan piedmonts. The parent material consists of slope alluvium derived from granite, gneiss, schist, granitic sandstone, fanglomerate, and mudstone. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is frequently flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R035XG114NM Gravelly ecological site. Nonirrigated land capability classification is 4w. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 13 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Levante (7%)
Generated brief soil descriptions are created for major soil components. The Levante soil is a minor component.

Component: Riverwash (3%)
Generated brief soil descriptions are created for major soil components. The Riverwash soil is a minor component.

Map Unit 211 (14.98%)

Soil Information

Map Unit Name:	Tanoan-Encantado-Urban land complex, 5 to 25 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Somewhat excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Tanoan(35%)

horizon A(0cm to 8cm)	Gravelly sandy loam
horizon Bk1(8cm to 18cm)	Loam
horizon Bk2(18cm to 61cm)	Loam
horizon Bk3(61cm to 81cm)	Sandy loam
horizon Bkq(81cm to 145cm)	Loam
horizon BCk1(145cm to 178cm)	Gravelly loamy coarse sand
horizon BCk2(178cm to 213cm)	Gravelly coarse sandy loam

Encantado(30%)

horizon ABk(0cm to 8cm)	Very gravelly sandy loam
horizon Bk1(8cm to 23cm)	Very gravelly loam
horizon Bk2(23cm to 56cm)	Very gravelly coarse sandy loam
horizon BCk1(56cm to 84cm)	Gravelly loamy coarse sand
horizon BCk2(84cm to 114cm)	Very gravelly loamy coarse sand
horizon BCk3(114cm to 137cm)	Very gravelly loamy coarse sand
horizon C1(137cm to 160cm)	Gravelly loamy sand
horizon C2(160cm to 216cm)	Very gravelly loamy sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 211 - Tanoan-Encantado-Urban land complex, 5 to 25 percent slopes

Component: Tanoan (35%)
The Tanoan component makes up 35 percent of the map unit. Slopes are 5 to 15 percent. This component is on eroded fan remnants, fan piedmonts. The parent material consists of alluvium derived from granite, gneiss, schist, and loess over residuum weathered from basaltic tuff or granitic sandstone. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the F036XA136NM Pinyon-juniper-apache Plume ecological site. Nonirrigated land capability classification is 4c. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 15 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 2 within 30 inches of the soil surface.

Component: Encantado (30%)
The Encantado component makes up 30 percent of the map unit. Slopes are 10 to 25 percent. This component is on eroded fan remnants, fan piedmonts. The parent material consists of colluvium and slope alluvium derived from granite, gneiss, and schist over residuum weathered from granitic fanglomerate and sandstone. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the F036XA136NM Pinyon-juniper-apache Plume ecological site. Nonirrigated land capability classification is 4s. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 27 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 2 within 30 inches of the soil surface.

Component: Urban land (25%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Altazano (4%)
Generated brief soil descriptions are created for major soil components. The Altazano soil is a minor component.

Component: Junebee (3%)
Generated brief soil descriptions are created for major soil components. The Junebee soil is a minor component.

Soil Information

Component: Nazario (2%)
Generated brief soil descriptions are created for major soil components. The Nazario soil is a minor component.

Component: Alire (1%)
Generated brief soil descriptions are created for major soil components. The Alire soil is a minor component.

Map Unit 213 (1.57%)

Map Unit Name:	Levante-Riverwash complex, 1 to 3 percent slopes, flooded
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Levante(55%)	
horizon AC(0cm to 10cm)	Loamy sand
horizon C1(10cm to 43cm)	Coarse sand
horizon C2(43cm to 81cm)	Gravelly coarse sand
horizon C3(81cm to 114cm)	Stratified gravelly loamy coarse sand to gravelly coarse sand
horizon C4(114cm to 147cm)	Gravelly loamy coarse sand
horizon C5(147cm to 218cm)	Very gravelly coarse sand
horizon C6(218cm to 310cm)	Very gravelly coarse sand
Riverwash(35%)	
horizon C1(0cm to 25cm)	Gravelly coarse sand
horizon C2(25cm to 127cm)	Very gravelly coarse sand
horizon C3(127cm to 165cm)	Gravelly sandy clay loam
horizon C4(165cm to 216cm)	Gravelly coarse sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 213 - Levante-Riverwash complex, 1 to 3 percent slopes, flooded

Component: Levante (55%)
The Levante component makes up 55 percent of the map unit. Slopes are 1 to 3 percent. This component is on narrow flood plains on valley floors, valleys. The parent material consists of alluvium derived from granite, gneiss, schist, and granitic sandstone. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is occasionally flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R035XA113NM Sandy ecological site. Nonirrigated land capability classification is 4c. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 7 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

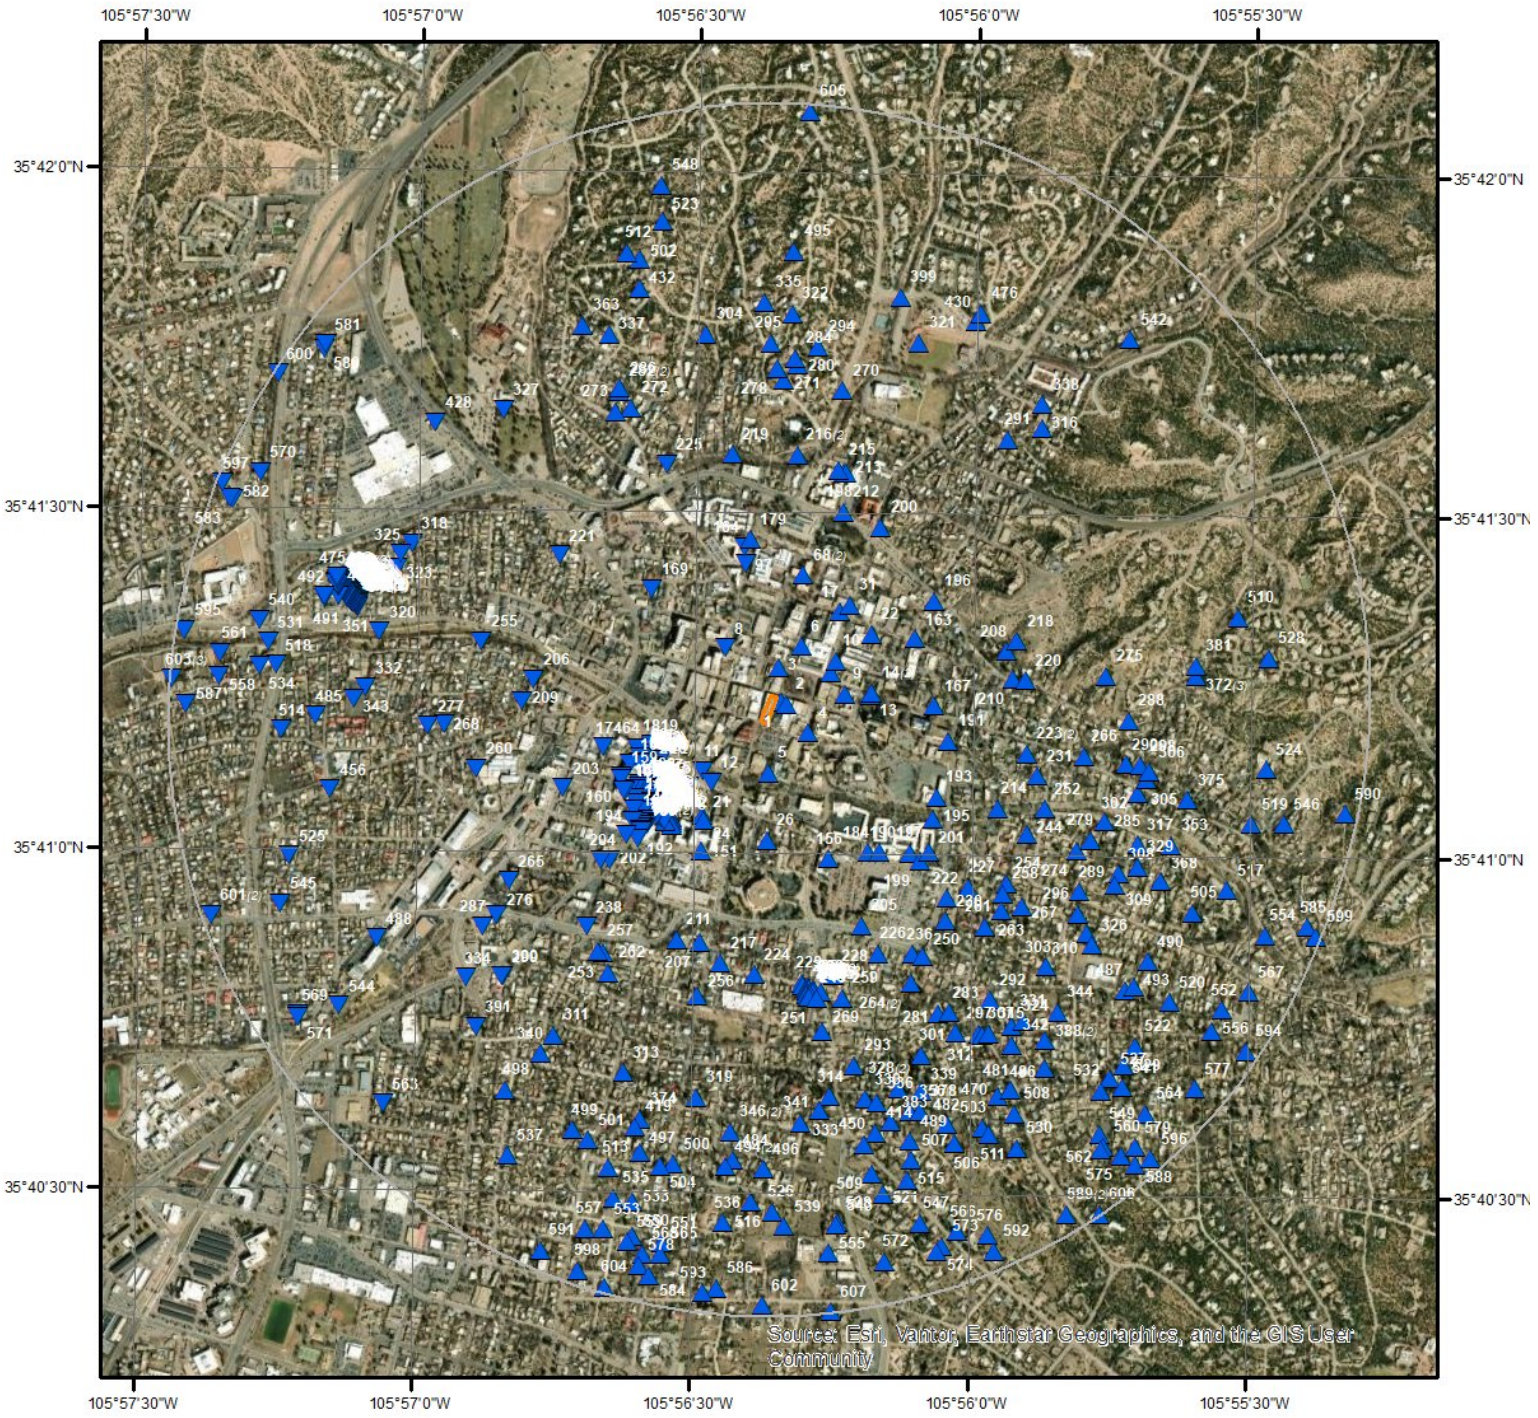

Component: Riverwash (35%)
Generated brief soil descriptions are created for major soil components. The Riverwash is a miscellaneous area.

Component: Altazano (5%)
Generated brief soil descriptions are created for major soil components. The Altazano soil is a minor component.

Component: Dondiego (3%)
Generated brief soil descriptions are created for major soil components. The Dondiego soil is a minor component.

Component: Urban land (2%)
Generated brief soil descriptions are created for major soil components. The Urban land soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SANTA FE* County: **1**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SANTA FE* County

No Measures/Homes:	73
Geometric Mean:	3.2
Arithmetic Mean:	4.6
Median:	3.5
Standard Deviation:	3.8
Maximum:	21.6
% >4 pCi/L:	41
% >20 pCi/L:	1
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of New Mexico conducted during 1988-89. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Oil and Gas Wells **OGW**

Oil and Gas Well Data collected by New Mexico Oil Conservation Division.

Point of Diversion Report **WATER WELLS**

Point of Diversion report provided by the New Mexico Office of the State Engineer (OSE). This data comes from the NM Water Rights Reporting System (NMWRRS). The report returns a summary of water rights use, owner, wells, point of diversion and location and other information. This list includes declared, complete, in-progress, and plugged wells.

Public Water Supply Wells **PWSW**

A list of public water supply systems maintained by the New Mexico Environment Department (NMED), Drinking Water Bureau (DWB). This database includes active and inactive public water systems.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Santa Fe,NM 87501

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
ALL of E San Francisco St
ALL of E Water St

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

This is an Express Preview Report - Details will be provided in the Final ERIS Report.

Unplottable Summary

Total: 0 Unplottable sites

DB	Company Name/Site Name	Address	City	Zip	ERIS ID

This is an Express Preview Report - Unplottables will be provided in the Final ERIS Report.

Unplottable Report

This is an Express Preview Report - Unplottables will be provided in the Final ERIS Report.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS), and is limited to those sites where the NPL Status reflects the site is 'Currently on the Final NPL (F)' and/or the 'Site is Part of NPL Site (A)'. These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Sep 6, 2025

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Sep 6, 2025

Deleted NPL: DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Sep 6, 2025

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool. This data may also include applicable sites represented as polygons sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS), and is limited to those sites where the NPL Status reflects the site is 'Not on the NPL (N)' , 'Removed from Proposed (R)', and/or 'Pre-Proposal Site (S)'. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Aug 27, 2025

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file. This data may also include applicable sites represented as polygons sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS), and is limited to those sites where the NPL Status reflects the site is 'Not on the NPL (N)' , 'Removed from Proposed (R)', and/or 'Pre-Proposal Site (S)'. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Aug 27, 2025

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Sep 1, 2025

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Sep 1, 2025

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste. This list also includes RCRAInfo sites that have notified as LQGs that do not have a registered Site Manager or Certifier in RCRAInfo.

Government Publication Date: Sep 1, 2025

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month. This list also includes RCRAInfo sites that have notified as SQGs that do not have a registered Site Manager or Certifier in RCRAInfo.

Government Publication Date: Sep 1, 2025

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Sep 1, 2025

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Sep 1, 2025

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Sep 1, 2025

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made availabe by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Sep 29, 2025

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Sep 29, 2025

Land Use Controls Information System: LUCIS

The Land Use Controls Information System (LUCIS) database is sourced from the U.S. Department of the Navy (DON). This data contains information for former Base Realignment and Closure (BRAC) properties across the United States. DON's BRAC office was tasked with tracking certain base closures while requiring the prevention of risks to human health and the environment of those properties with LUCs in place. Regarding currently available LUC Sites data, the sites listing is limited to centroid point locations for the overall installation property boundaries. Formerly obtained LUC Sites data may reflect site details that applied previously for a BRAC property.

Government Publication Date: Jun 13, 2024

Institutional Control Boundaries at NPL sites: NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Sep 6, 2025

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Sep 7, 2025

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 8, 2025

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. The list includes FRP facilities sourced from the EPA FOIA office and from previously available Homeland Infrastructure Foundation-Level Data (HIFLD) file/s. Disclaimer: Per the EPA FOIA Office, the verification process for current requested FRP data is undergoing review and revision, and any similar reporting will be made public in Fiscal Year 2026. For this reason, the latest available FOIA file may be incomplete.

Government Publication Date: Jun 1, 2025

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jun 1, 2025

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Jun 5, 2025

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Aug 27, 2025

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Oct 30, 2025

State

State Cleanup Sites Listing: SCS

List of active and closed State Clean Up Sites made available by the Ground Water Quality Bureau's Remediation Oversight Section of the New Mexico Environment Department (NMED). The Remediation Oversight Section encourages and oversees voluntary efforts to clean up contaminated sites, and administers the Water Quality Control Commission Regulations that require responsible parties to clean up contaminated soil and ground water. This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Feb 4, 2025

Delisted State Cleanup Sites: DELISTED SCS

List of sites removed from State Clean Up Sites made available by the Ground Water Quality Bureau's Remediation Oversight Section of the New Mexico Environment Department (NMED).

Government Publication Date: Feb 4, 2025

Solid Waste Facilities: SWF/LF

List of currently or formerly permitted/registered facilities in New Mexico, including haulers, landfills, transfer stations, collection centers, generators, recycling facilities, and composting facilities. This list includes facilities that are currently open and reporting as well as facilities that are closed but previously held a permit. This list is made available by the New Mexico Environment Department (NMED)'s Solid Waste Bureau.

Government Publication Date: Oct 23, 2025

Historical Solid Waste Landfills: HIST LF

List of historical landfill sites provided by the New Mexico Environment Department (NMED) Solid Waste Bureau, and sites from the Bureau of Land Management which were closed prior to 1984. Public Land Survey System (PLSS) locations provided by the source are subject to accuracy limitations inherent to the PLSS system.

Government Publication Date: Aug 21, 2014

Recycling Centers: RECYCLING

List of registered recycling centers made available by the New Mexico Environment Department's (NMED) Solid Waste Bureau.

Government Publication Date: Jul 7, 2025

Leaking Petroleum Storage Tanks: LST

This list of Leaking Petroleum Storage Tank sites is made available by the New Mexico Environment Department's (NMED) Petroleum Storage Tank Bureau (PSTB). Includes records from PSTB listings, and records from the NMED Open Map Portal.

Government Publication Date: Sep 16, 2025

Delisted Active and No Further Action Leaking Tanks: DELISTED LST

This database contains a list of leaking storage tank sites that were removed from the New Mexico Environment Department (NMED)'s Petroleum Storage Tank Bureau.

Government Publication Date: Sep 16, 2025

Leaking Underground Storage Tanks: LUST HIST

Historical list of leaking underground leaking tanks provided by the New Mexico Environment Department (NMED). This list was last updated in August of 2006.

Government Publication Date: Aug 1, 2006

Underground Storage Tanks: UST

List of Underground Storage Tank sites made available by the New Mexico Environment Department (NMED)'s Petroleum Storage Tank Bureau (PSTB). Includes Underground Storage Tank Facilities from the NMED Open Data Portal.

Government Publication Date: Nov 3, 2025

Aboveground Storage Tanks: AST

List of Aboveground Storage Tank sites made available by the New Mexico Environment Department (NMED)'s Petroleum Storage Tank Bureau (PSTB). Includes Aboveground Storage Tank Facilities from the NMED Open Data Portal.

Government Publication Date: Nov 3, 2025

Petroleum Storage Tanks: TANKS

List of Storage Tank Sites made available by the New Mexico Environment Department (NMED)'s Petroleum Storage Tank Bureau. Includes sites with underground and aboveground tanks.

Government Publication Date: Jul 9, 2019

Underground Storage Tanks - Historical: UST HIST

Historical listing of underground storage tanks registered with the New Mexico Environment Department (NMED). This data was last updated in August 2006.

Government Publication Date: Aug 1, 2006

Aboveground Storage Tanks - Historical: AST HIST

Historical listing of aboveground storage tank facilities registered with the New Mexico Environment Department (NMED. This data was last updated in August 2006.

Government Publication Date: Aug 4, 2006

Delisted Tanks: DELISTED TANK

List of Storage Tank Sites removed from the New Mexico Environment Department (NMED)'s Petroleum Storage Tank Bureau's list of underground and aboveground tanks.

Government Publication Date: Nov 3, 2025

Sites with Institutional and Engineering Controls: INST

List of sites in the New Mexico Environment Department (NMED)'s Public Record of Voluntary Remediation Program (VRP) Sites with institutional and/or engineering controls.

Government Publication Date: Sep 30, 2025

Voluntary Remediation Program Sites: VCP

Public Record of Voluntary Remediation Program (VRP) Sites made available by the New Mexico Environment Department (NMED). New Mexico's Voluntary Remediation Program (VRP) provides incentives for the voluntary cleanup of contaminated properties and encourages their redevelopment. VRP participants that complete the program successfully will receive site closure documentation from the NMED including a Certificate of Completion or Conditional Certificate of Completion.

Government Publication Date: Sep 30, 2025

Targeted Brownfields Assessment Sites: BROWNFIELDS

List of Targeted Brownfields Assessment Sites made available by the New Mexico Environment Department (NMED). Brownfields are properties whose redevelopment is complicated by the presence or potential presence of hazardous substances or petroleum products. NMED provides no-cost environmental assessments of brownfield sites to local or tribal governments. NMED also manages a Brownfields Revolving Loan Fund providing low-interest loans for brownfield cleanups where redevelopment is planned.

Government Publication Date: Sep 30, 2025

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 6, which includes New Mexico, is provided by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 21, 2025

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 6, which includes New Mexico, is provided by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 21, 2025

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: May 22, 2025

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: May 22, 2025

County

No County databases were selected to be included in the search.

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data: PFAS GHG

The U.S. Environmental Protection Agency's (EPA) Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. This dataset is sourced from the EPA's PFAS Analytic Tools, and it includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified as PFAS based on EPA's CompTox Chemicals Dashboard lists of PFAS with defined and undefined structures. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time. Note that some regulatory programs have specified chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard.

Government Publication Date: Oct 7, 2025

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Oct 8, 2025

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Oct 10, 2025

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Sep 26, 2025

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2025 per agency entity dataset. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: May 30, 2025

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Aug 1, 2025

National Response Center PFAS Spills: PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Sep 1, 2025

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jul 21, 2025

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest: PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Oct 4, 2025

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Sep 1, 2025

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 28, 2025

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Sep 29, 2025

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: May 3, 2025

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jul 19, 2025

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites which once appeared on - and have since been removed from - the list of drycleaner facilities included in Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jul 19, 2025

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: Jul 10, 2025

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Aug 8, 2025

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: Oct 30, 2025

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). The intent of the site location is to provide a general reference point to the site on a national scale. The coordinates of each site point can be the location of a site monument, the centroid of the site boundary, or a general location of the site. This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Nov 6, 2025

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 1, 2025

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Sep 26, 2025

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants: POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Jun 5, 2025

Historical Business Activity Risk: HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this listing does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including Polks, Millers, Mullin Kille, Interstate Directory, and State Directory Co; spanning roughly 1920s through 1960 depending on information available by city.

Government Publication Date: Jan 1, 1960

State

Hazardous Waste Facilities: HAZ

List of hazardous waste generators and treatment, storage, and disposal facilities overseen by the Hazardous Waste Bureau (HWB), New Mexico Environment Department (NMED).

Government Publication Date: Apr 24, 2018

Spills: SPILLS

A listing of spills included in the New Mexico Environment Department's Environmental Notification Tracking System.

Government Publication Date: May 31, 2025

Spills and Incidents - Oil Conservation Division: SPILLS OIL

List of Spills and Incidents made available by the State of New Mexico Oil Conservation Division.

Government Publication Date: Oct 23, 2025

Clandestine Drug Lab Discoveries: CDL

List of addresses of locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. The sources of the entries are law enforcement agencies, and although the list is made available by the New Mexico Environment Department (NMED), NMED has not verified the data and does not guarantee its accuracy. Sites listed were seized prior to January 1, 2008, were not subject to the New Mexico Clandestine Drug Lab Cleanup Rule.

Government Publication Date: May 17, 2018

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of PFAS/PFOS sites of concern and sampling locations made available by the New Mexico Environment Department (NMED). Includes sites known to the NMED where PFAS/PFOS containing material may be of concern, as well as USGS PFAS groundwater sampling locations.

Government Publication Date: Feb 4, 2025

Ground Water Discharge Permits: GW DISCHARGE

The Ground Water Pollution Prevention Section of the New Mexico Environment Department reviews and approves discharges that have the potential to impact ground water quality pursuant to Subparts III and V of the Water Quality Control Commission (WQCC) regulations (20.6.2 NMAC). Ground water discharge permits address a wide variety of discharges including domestic wastewater treatment plants, commercial septic tank leach fields, power generating plants, commercial laundries not served by sanitary sewers, dairies, food processing plants, commercial land farms for treatment of contaminated soil, industrial discharges, injection wells and ground water remediation systems. This list does not include permits for mines or agricultural facilities.

Government Publication Date: Dec 20, 2024

Southwest Research and Information Center Uranium Sites: URANIUM

This database contains information on Northwestern New Mexico uranium projects located in Navajo Country and is maintained by the Southwest Research and Information Center. This organization was founded in 1971 for the purpose of providing information to the public on the effects of energy development and resource exploitation on the people and their cultures, lands, water, and air of New Mexico and the Southwest.

Government Publication Date: Oct 18, 2006

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX I

Supplemental Records

[RESERVED]

APPENDIX J

Photograph Log

Photograph 1. Intersection between Water St and Don Gaspar Ave, looking east towards the Subject Property.

Photograph 2. View looking west down Water St from the Water St/Don Gaspar intersection.

Photograph 3. View looking south down Don Gaspar Ave from the Water St/Don Gaspar intersection.

Photograph 4. View looking north up Don Gaspar Ave from the Water St/Don Gaspar intersection.

Photograph 5. Front façade of the subject property, view facing north.

Photograph 6. The adjoining property west of the Subject Property, currently occupied by a restaurant.

Photograph 7. View looking down the footpath immediately west of the Subject Property, facing north.

Photograph 8. The area behind the Subject Property, accessed by the footpath west of the building. View facing north.

Photograph 9. The area behind the Subject Property, accessed by the footpath west of the building. View facing east.

Photograph 10. View looking west down Water St towards the Subject Property.

Photograph 11. View looking south on Don Gaspar towards the Subject Property.

Photograph 12. View looking east down San Francisco St from the San Francisco/Don Gaspar intersection.

Photograph 13. View looking east down Water St towards the Subject Property from the Water St/ Galisteo St intersection.

Photograph 14. The Subject Property from Don Gaspar Ave. View looking northeast.

APPENDIX K

Interviews

1140 - P. Gutierrez & A. Murphy on site @ Lopez Cleaners
↳ 57°F/Sunny

objectives - Complete site recon/access for five former dry cleaner sites in SF w/ one site access recon @ New Method Dry Cleaner.

1143 - TGSM complete, take photos & begin

838 E Palace Ave/Lopez Cleaners
- Residential w/ 2nd structure in rear
- E adjoining = Palace Grocery (853-A E Palace)
- Left ltr/access package in entryway gate after knocking w/ no answer
- All other props = residential

1150 - Depart for 622 Canyon Rd.

1154 - @ 622 Canyon Rd/Universal Cleaners
- Access not granted, photos from dirt rd/alley way
- W adjoining = 622 residence
- N adjoining = 626 w/ const. permit displayed for addition
- S adjoining = residential through alley
- E adjoing = 630 Canyon Olive Rush Studios Art Center

1205 - Depart for 105 E. Water St.

1215 - @ E. Water St./New Method DC
- Josh owner of business w/ other partners
- Café Pasquel's Gallery = N adjoining
- Municipal PK Lot = S adj

E Water St./New Method DC
- E adj = The Chile Shop
- W adj = Tonic cocktails/Jazz Cafe
- Per Josh Robert Spitz of the Spitz Brothers owns the bldg, but he's in his 80s & uses prop mgmt co.
- If DC on site, likely 1970s
- He'll pass paperwork on

1236 - Depart for 328 E Sandoval

1240 @ 328 E Sandoval/Master Cleaners Sandoval
- Spoke w/ Greg & prop owners still in AZ for winters
- Drop off ltr/access packet for him to pass on
- 330 = S adj/physically contiguous SF Biscochito Co.
- N adj (across Aztec) = Rainbow Gate (home goods)
- E adj = SF Judical Complex
- W adj = residential/single family 310 Aztec

1251 - Depart for 1406 2nd St.

1302 @ 1406 2nd St./Danny's Cleaners
- Gave paperwk to Auto sales employee she'll pass to prop owner
- N adj = residental on N side 2nd St.
- E adj = SF Self Storage
- S adj = Dunn Edwards Paints
- W adj = All Tangled Up Salon

1307 - Depart 2nd St.
↳ @ 2nd St. to meet owner

1340 - 1956 Mova dug foundation. Dry cleaning fence & E. Used petroleum based cleaner. Waste hauler ABQ 1958 to 25 years ago. Sold all eqp (boilers, etc). No UST & ~~drums~~ 100 gal tank to sewer

AM

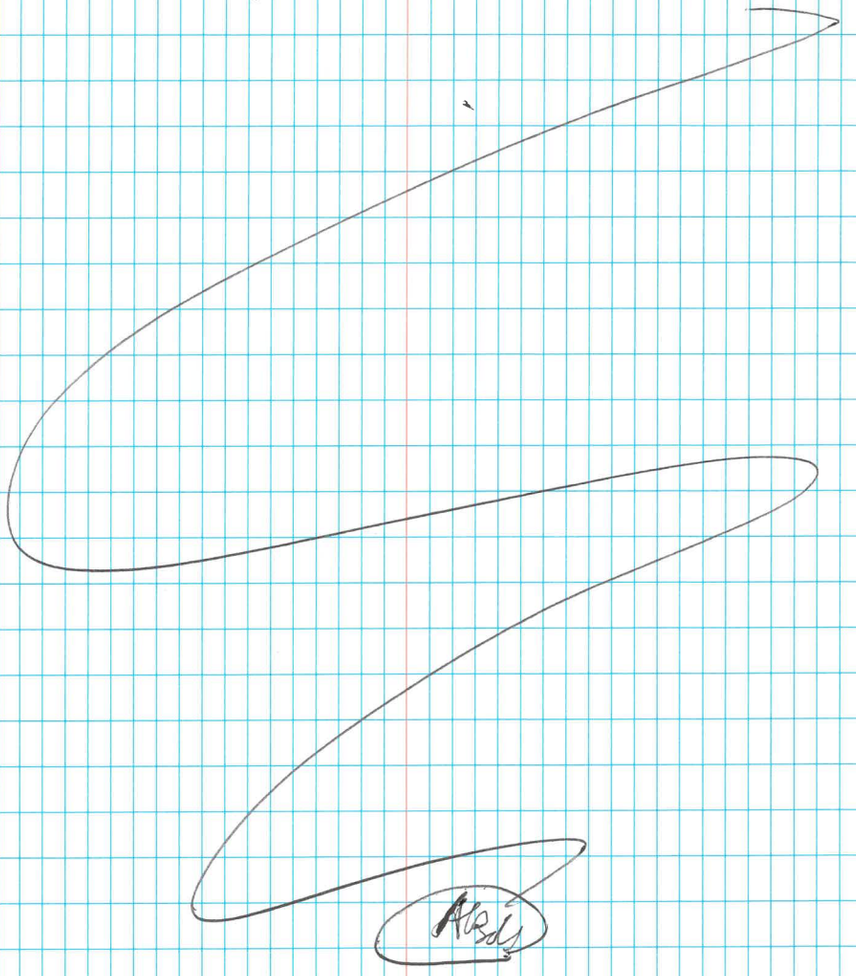

2nd St. Would fill. In gd H_2O drains. No PCE/TCE in solvents? Said shut down before "envt'l ppl". Commercial rentals since closed Accupunture, skin treatments, etc. Brother & sister own W adj. Hist. cleaner on Palace Ave closed 50 yrs ago. Walked interior w/ tenant - std bldg & H_2O heater

1412 - @ 1911 St. Mike's/New Method DC

- Bob ortega's 90 yr old mother owns the property & Lawerence Romero is tenant running business
- Romero took over business ~2000 & removed PERC machine & is on 3rd set of machinery currently
- Manufacturer = Union
- Solvent = Seitz Intense (see photo)
- Muck from unit hauled off 2x month by ABQ operator. Drum w/ lock ring outside. Evaporated ultimately
- Machine has fan, H_2O sep, still, & pumps
- 15 HP boiler (recently re-piped) in rear powers machines
- Air comp for small pneumatics on vacs for presses
- 8 yrs ago? sampling done along N prop boundary w "hoses out of ground" from spill next door Hyundai?
- vac system overhead for lint collection
- ortega owns entire strip mall & 5 unit tenant commercial prop.

1450 - Call w/ M. Hubbard (PM) re: status of all site visits. Head offsite.

Summary - Dropped 2nd copy of access agreement paperwork w/ tenants @ Water St & Sandoval sites to be delivered to prop. owners. E Palace Ave left paperwork in entryway gate. Photos taken @ 622 Canyon Rd. & 2nd St & St Mike's sites walked/met w/ owners & tenants.

APPENDIX L

Qualifications of Environmental Professionals

Matt Hubbard
Senior Environmental Scientist

Years of Experience: 14

Education:

- BS, Environmental Science, University of Texas at Austin

Professional Registrations/Affiliations:

- TCEQ Leaking Petroleum Storage Tank (LPST) Project Manager, License No. PM0000720, 2022

Professional History:

2026 – Present	Senior Environmental Scientist – INTERA Incorporated, Austin, TX
2018 – 2025	Environmental Scientist – INTERA Incorporated, Austin, TX
2017 – 2018	Environmental Specialist – City of Austin, Development Services Department, Austin, TX
2013 – 2017	Project Manager / Engineering and Corrective Action Specialist – Texas Commission on Environmental Quality, Remediation Division, Superfund Section, Austin, TX
2012 – 2013	Work Lead / Licensed Electrician – Wells Solar and Electrical Services, Austin, TX
2012	Field Research Assistant – University of Texas, Austin, TX

Training:

- MSHA Part 48 Surface New Miner Training, 2019-2023
- 40-Hour General Site Workers Training, OSHA 29 CFR 1910.120(e)(3), 2013
- 8-Hour Refresher, OSHA 29 CFR 1910.120, 2013 – 2025
- Hydrogen Sulfide (H2S) Training, 2018
- CPR, First Aid, and Bloodborne Pathogens Training, 29 CFR 1910.1030, 2024
- ArcGIS Pro, WinSitu, Strater®, Grapher™, Surfer®, PLog, LogPlot
- Land Science® Certified Vapor Barrier Inspector, 2020

Matt Hubbard is a Senior Environmental Scientist at INTERA with a BS degree in environmental science and 14 years of experience investigating and remediating contaminated sites. He serves in several capacities including Project Manager, Technical Lead, Field Lead, and Health and Safety Lead. Matt develops and implements highly technical work plans for complex technical projects and provides subject matter expertise to clients and senior leadership. His project experience includes state and federal Superfund, Brownfields, voluntary cleanup program (VCP), petroleum storage tank (PST), Phase I and Phase II Environmental Site Assessment (ESA), and imminent threat/removal assessments. Matt is an expert in field methods including sampling of surface and subsurface environmental media, field screening techniques, environmental drilling, and well construction. He has worked on contaminated sites associated with metals including hexavalent chromium, petroleum hydrocarbons, chlorinated solvents, polychlorinated biphenyls (PCBs), organochlorine and organophosphorus compounds (pesticides and herbicides), dioxins/furans, and per- and polyfluoroalkyl substances (PFAS). Matt has significant experience designing assessments and implementing innovative methods, including incremental sampling methodology (ISM), field portable x-ray fluorescence (XRF), passive soil gas (PSG), ground-penetrating radar (GPR), and electromagnetic mapping. He is also experienced in water resources development, including oversight and support of production well drilling and installation, aquifer performance analysis, dynamic flow profiling, and mass balance chemical analysis.

Project Experience – Environmental

ChemFab Phase I Environmental Site Assessment, ChemFab, LLC., Clute, TX. 2026. *Project Manager.* Conducted a Phase I ESA for a fabrication facility and an adjoining property in accordance with ASTM Standard Practice E1527-21.

Southside Storage Phase I Environmental Site Assessments, Southside Wrecker, Inc., Austin, TX. 2025 – 2026. *Project Manager.* Conducted two Phase I ESAs: one at a vacant property that was previously a sand and gravel mine and subsequently filled via unpermitted landfilling operations and another at an automotive repair and maintenance facility. The Phase I ESAs were conducted in accordance with ASTM Standard Practice E1527-21.

Hornsby Bend Biosolids Management Plant, City of Austin Water, TX. 2023 – 2026. *Project Manager.* Coordinated and led quarterly groundwater monitoring and annual soil sampling in support of the requirements of the Texas Commission on Environmental Quality (TCEQ) permit to process wastewater treatment plant sewer sludge, land apply wastewater treatment plant sewage sludge, and irrigate lagoon supernatant under provisions of Chapter 26 of the Texas Water Code, Chapter 361.121 of the Texas Health and Safety Code, and Chapter 312 of the Texas Administrative Code. Conducted independent data usability review for each quarterly groundwater event. Prepared quarterly updates to groundwater potentiometric elevation maps.

Prepared annual report for submittal to the TCEQ. Performed supplemental historical data review and assessment in support of additional reporting requested by special provision of the 2025 permit renewal and was the primary author of the supplemental report.

Jensen Drive Scrap State Superfund Site, 3603 Jensen Drive LLC, Harris County, TX. 2018 – 2026. *Environmental Scientist and Field Lead.* Drafted Annual Post Closure Care Report and Data Usability Summary for annual 2018, 2019, 2020, and 2025 site activities, which included groundwater monitoring, potentiometric mapping, and engineer's inspection of the site waste containment unit. Coordinated and conducted 2019, 2020, and 2025 groundwater monitoring events, including low-flow sampling for PCBs.

BAE TRACOR Phase I and Phase II Environmental Site Assessment, City of Austin Brownfields, TX. 2025. *Project Manager.* Conducted a Phase I ESA for the City of Austin (COA) Brownfields Program in accordance with ASTM Standard Practice E1527-21. The approximately 140-acre facility had 12 permanent structures and was formerly used for military research and development. Coordinated all aspects of project work to meet the City's expedited timeline within the 120-day due diligence period. Developed the rationale and scope of the Phase II ESA and designed the sampling plan. Soil and groundwater investigation included the installation of soil borings and monitor wells for sampling and analysis of soil and groundwater for contaminants including PFAS and nitroaromatics and nitramines. Directed the INTERA team and subcontractors for the multi-phased progressive tasks in support of the overall objective and made necessary and defensible modifications to the plan, as needed, to meet budget and scheduling restraints. Authored the Phase II ESA and provided support to the COA during negotiations leading up to and culminating with the acquisition of the property.

411 Chicon, City of Austin Brownfields, TX. 2024 – 2025. *Project Manager.* Conducted a Phase I ESA for the COA Brownfields Program in accordance with ASTM Standard Practice E1527-21. Oversaw a geophysical survey of the subsurface and an exploratory investigation to determine the presence or absence of underground storage tanks.

Former Travis County Landfill, Moo Moo Meadows, LLC., Austin, TX. 2024 – 2025. *Project Manager.* Reviewed available data to determine groundwater conditions and assess landfill permittee's responsibilities for management. Provided expert environmental support in a contested dispute for site development under 30 Texas Administrative Code (TAC) 330 Subchapter T – Use of Land Over Closed Municipal Solid Waste Landfills.

Austin Bergstrom International Airport Augmented Staff, City of Austin Aviation Department, TX. 2023 – 2025. *Environmental Scientist and Field Lead.* Provided as-needed consulting and field assistance in support of ongoing development at Austin Bergstrom International Airport. Conducted liquid and solid waste sampling for disposal and consulting for the remediation of bulk PFAS chemical and PFAS-containing water in emergency response vehicles. Provided oversight and project coordination for PFAS-contaminated stockpile relocation, monitor well drilling and installation, and soil and groundwater sampling for PFAS.

In-Situ Anaerobic Bioremediation Pilot Study, Chemical Waste Management, Corpus Christi, TX. 2024. *Environmental Scientist.* Conducted baseline groundwater monitoring in support of the pilot study that was performed to evaluate in-situ anaerobic bioremediation as a remedial method groundwater contamination.

Pollution Prevention Plan, Precise Hard Chrome, LLC., Waco, TX. 2024. *Environmental Scientist.* Authored the five-year Pollution Prevention Plan for the Precise Hard Chrome facility in Waco, Texas in accordance with 30 TAC Chapter 335, Subchapter Q (*Pollution Prevention: Source Reduction and Waste Management*). The plan identified all activities that generated hazardous waste or resulted in a release of Toxic Release Inventory reportable chemicals and a prioritized list of economically and technologically feasible source reduction and waste minimization projects.

Peaceful Hill, Graham Development, Austin, TX. 2024. *Project Manager.* Assessed the regulatory framework for proposed stormwater injection to aquifer recharge wells on a commercial development (Class V Injection Well). The assessment included siting and hydrogeologic analysis and provided recommendations for additional investigation in support of implementation.

Rio Grande Coop Phase I Environmental Site Assessment, City of Austin Brownfields, TX. 2024. *Project Manager.* Conducted a Phase I ESA for the COA Brownfields Program in accordance with ASTM Standard Practice E1527-21.

Anita Ferrales Coy Phase I Environmental Site Assessment and Asbestos/Lead Survey, City of Austin Brownfields, TX. 2024. *Project Manager.* Conducted a Phase I ESA for the COA Brownfields Program in accordance with ASTM Standard Practice

E1527-21. Facilitated asbestos containing material and lead-containing paint survey and preparation of project remediation specifications.

McAlpine Lease Third Party Release Assessment Review, E&W Law, Stanton, TX. 2024. *Environmental Scientist and Data Reviewer.* Conducted data usability review of laboratory analytical results and senior review of the assessment review report for a crude oil and produced water release. Evaluated data relative to Railroad Commission of Texas (RRC) guidance.

Town Lake Metro Park Youth Hostel Phase I Environmental Site Assessment, City of Austin Parks and Recreation Department, TX. 2024. *Environmental Scientist.* Conducted a Phase I ESA in accordance with ASTM Standard Practice E1527-21 in support of planned redevelopment.

Environmental Impacts Assessment, Cooks Branch Conservancy, Montgomery, TX. 2024. *Environmental Scientist.* Oversaw drilling and installation of three monitoring wells. Lithologically logged each well in accordance with ASTM D2488-17e1 and Unified Soil Classification System (USCS). Conducted groundwater and surface water sampling and assessment for a range of analytes to determine impacts from a nearby mining operation. Provided technical support and senior review of data and deliverables.

Geotechnical Investigation for a Potential Compost Facility, Confidential Client, TX. 2024. *Environmental Scientist.* To determine a proposed site's suitability for TCEQ permitting of a compost facility, conducted a subsurface investigation focused on identifying shallow, low permeability clays suitable for use as an in-situ clay liner. Installed and lithologically logged 12 soil borings using the USCS. Collected soil samples from each boring at low permeability clay intervals based on field observations. Sent select samples to a geotechnical laboratory for analysis.

North Railroad Avenue Plume Superfund Site, New Mexico Environment Department, Española, NM. 2024. *Environmental Scientist and Field Lead.* Served as field lead for roto-sonic drilling and installation of a monitoring well in support of an New Mexico Environmental Department (NMED)-led cleanup at a former drycleaner site contaminated with tetrachloroethene (PCE) and its degradation products. Logged continuous core (ASTM D2488-17e1 / USCS) to 257 feet below ground surface (bgs), screened heated headspace soil samples with a photoionization detector, collected push-ahead groundwater samples at discrete depth intervals during drilling, and oversaw analysis of push-ahead groundwater samples via a FROG-5000 portable gas chromatograph. Identified the target hydrostratigraphic unit and informed the selection of the well screen interval. Assisted in work plan creation and annual reporting including software-based boring logs and potentiometric surface elevation mapping.

Per- and Polyfluorinated Substances Risk Assessment, California American Water, Duarte, CA. 2023 – 2024. *Environmental Scientist.* Assisted in the development of custom-built vadose-zone PFAS analytical solution tool to assess the vulnerability of existing and potential well sites to contamination. Identified potential contamination sources by evaluating records on former and current regulated facilities with current or former operations known to be or commonly associated with the use of PFAS. This information was used together with the spatial vulnerability analysis to assess the relative risk of PFAS contamination to existing and potential well sites. The analysis was used to develop recommendations for engineering and operational measures to mitigate the risk and impacts of future contamination. Measures could include changes in operation of existing wells, treatment, or replacement of wells that have reached the end of their service life. Prioritized recommendations for investigation and test drilling at new well sites based on operational benefits, cost, and risk of current or future contamination. The environmental data gathered for the study was provided for future use in permitting selected well sites.

JV DIRT, American AllWaste, Austin, TX. 2023 – 2024. *Environmental Scientist.* Conducted video well survey with a downhole camera. Conducted groundwater sampling. Prepared an update and revision to the site geologic/hydrogeologic report and groundwater protection plan in support of a permit renewal application for composting activities.

Remedial Investigation at Scrub-A-Dubb Barrel Company Site, Texas Commission on Environmental Quality, Lubbock, TX. 2020 – 2024. *Environmental Scientist.* Designed and conducted a remedial investigation, which was a targeted surface soil assessment in compliance with the site-specific field sampling plan (FSP) and the quality assurance program plan developed for the former drum recycling site utilizing ISM for the TCEQ Superfund Section. The primary contaminants of concern included volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals. Used direct-push methodology to collect over 700 soil increments (aliquots) to generate data to assess soils down to five feet bgs for the entirety of the five-acre site during one field mobilization. Collected replicate data to determine statistically if data generated for each ISM decision unit (DU) were representative and defensible. The field activity report was finalized and approved by the TCEQ in March 2022.

Data evaluation confirmed the success of the ISM approach. Authored an affected property assessment report for the TCEQ Remediation Division, compiling data from assessment over an approximately five-year span including soil, sediment, and groundwater.

Voluntary Cleanup Program Post-Response Assistance, Ice Man, Inc., Belton, TX. 2023. *Environmental Scientist.* Conducted on-site review and documentation of the condition of the side slope of an engineering control cap constructed and the adjacent creek bank at a TCEQ VCP site as part of the required post-response care actions. Prepared a memorandum describing the observations made and recommended future actions.

St. Johns Redevelopment Site, City of Austin Economic Development Department via the Austin Brownfield Revitalization Office, TX. 2023. *Project Manager.* Designed and implemented a Limited Phase II ESA for the assessment of a former industrial facility and TCEQ Leaking Petroleum Storage Tank site for planned redevelopment as residential multifamily affordable housing. The assessment included (1) third-party review and assessment of previous site investigation data to identify potential data gaps and areas of concern relative to potential contaminant impacts and (2) soil gas sampling and assessment to assess the potential vapor exposure risk to occupants of future site buildings. Installed a grid of 31 passive soil gas sampling devices over the former site operations area and assessed the laboratory analytical results after a 14-day uptake period, compared to United States Environmental Protection Agency (EPA) Vapor Intrusion Screening Levels. Prepared report documenting the assessment and recommended future actions and guidelines for the Austin Economic Development Department's agreement with the site developer.

Fairfield Lake State Park Environmental Assessment, Texas Parks and Wildlife Department, Freestone County, TX. 2023. *Environmental Scientist.* Provided technical support in discussions with client regarding conduct of Phase I and Phase II ESAs in aid of State of Texas eminent domain condemnation procedures for approximately 5,000 acres, including Fairfield Lake and the immediate surrounding property that was formerly designated as Fairfield Lake State Park. Of specific concern was possible impacts to surface water, sediments, and aquatic life from heavy metals and PCBs related to a former coal-fired power plant located along the northern end of the property. Conducted the site reconnaissance and prepared the Phase I ESA (ASTM Standard E1527-21), which identified several Recognized Environmental Conditions (RECs); however, additional work to address the RECs was halted when Texas Parks and Wildlife Department decided to end condemnation procedures.

Langford Elementary Phase I Environmental Site Assessment, City of Ausitn Brownfields Program, TX. 2023. *Environmental Scientist.* Conducted a Phase I ESA for the COA Brownfields Program in accordance with ASTM Standard Practice E1527-21.

Whisper Valley, City of Austin Brownfields Program, TX. 2023. *Environmental Scientist.* Conducted a Phase I ESA for the COA Brownfields Program in accordance with ASTM Standard Practice E1527-21.

Emergency Response Waste Sampling at the Mexican American Cultural Center, City of Austin, TX. 2023. *Environmental Scientist.* Conducted emergency sampling of uncovered landfill waste material during the redevelopment of the Mexican American Cultural Center in downtown Austin, Texas.

Limited Phase II Environmental Site Assessment, American AllWaste, Lake Charles, LA. 2023. *Environmental Scientist.* Developed and sampled groundwater for VOCs, SVOCs, metals, petroleum hydrocarbons, pesticides, herbicides, PCBs, and PFAS. Prepared the report documenting the analytical results including a data usability summary. Provided recommendations for additional assessment based on the client's proposed property transaction.

Austin Nature Science Center Outpost, Soil Assessment, City of Austin Parks Department, TX. 2022 – 2023. *Environmental Scientist.* Performed soil assessment to delineate polycyclic aromatic hydrocarbons and heavy metals to Texas Risk Reduction Program (TRRP) Tier 1 Residential Total-soil-combined protective concentrations levels (PCLs) related to former skeet and firing range operations. This work was conducted in support of the implementation of a forthcoming removal action to restore the site to residential standards. Sampling approaches included ISM and ex-situ XRF methods. Authored the work plan and assessment report for this project.

Limited Phase II Environmental Site Assessment for Shield Park, Texas Commission on Environmental Quality Brownfields Program, Galveston, TX. 2022 – 2023. *Project Manager*. Oversaw completion of a geophysical survey implementing GPR and electromagnetic mapping to assess the presence of suspected underground storage tanks (USTs). Provided technical review and implemented TCEQ's soil assessment strategy including installing, screening, and sampling 20 soil borings. Logged each

boring according to the USCS. Prepared the Limited Phase II ESA report documenting site activities and analytical results for VOCs, SVOCs, metals, PCBs, and total petroleum hydrocarbons (TPH). Conducted technical data review and usability assessment and prepared a memorandum in accordance with the TCEQ Quality Assurance Project Plan and applicable EPA guidance.

Limited Phase II Environmental Site Assessment for Hargrave Fleet Services Property, City of Austin Brownfields Program, TX. 2022 – 2023. *Environmental Scientist.* The scope of the Phase II ESA included a full asbestos and lead-containing paint inspection survey, soil gas, surface soil, and groundwater assessment. Contaminants of concern included heavy metals, VOCs, SVOCs, dioxins/furans, and PFAS. Authored the work plan and led the field event to install passive soil gas sampling devices, groundwater monitoring wells, and soil borings. Categorized the groundwater in the shallow groundwater bearing in accordance with TRRP guidelines.

Phase I and II Environmental Site Assessment, Foundation Communities Brownfields Redevelopment Project - Airport Boulevard, Austin, TX. 2022. *Environmental Scientist.* Performed Phase II ESA in preparation for the development of an affordable housing apartment complex by Foundation Communities. Activities assessed two vapor encroachment conditions and two RECs. Deployed a total of 20 PSGs to assess soil gas. Installed four soil borings to assess site soils and the shallow groundwater-bearing unit.

Phase I Environmental Site Assessment, Tract 1-B: Paseo del Pueblo Sur and Los Pandos Road, Taos Hotel Associates, LLC., Taos, NM. 2022. *Environmental Scientist.* Conducted and prepared a Phase I ESA report in accordance with ASTM Standard E1527-21 and resultant volume estimate for a proposed removal of identified petroleum-contaminated soil more than the NMED action level of 100 parts per million by volume.

Scrub-A-Dubb Barrell Company Proposed State Superfund Site, Texas Commission on Environmental Quality, Lubbock County, TX. 2019 – 2023. *Environmental Scientist.* Drafted the TCEQ State Superfund FSP to implement assessment of on- and off-site soils for metals and VOCs referencing Interstate Technology Regulatory Council ISM. The ISM protocol would be used to assess risk to nearby human health and sensitive environmental receptors and to support a potential removal action. Results were compared to TRRP action levels.

Groundwater Sampling & Reporting, Chemical Waste Management, Port Arthur, Texas. 2022. *Environmental Scientist*. Conducted quarterly groundwater monitoring activities for a closed hazardous waste landfill facility. Sampling included groundwater collection at approximately 30 site monitoring wells for VOCs and arsenic.

Gem Dandy 14 Phase I Environmental Site Assessment, Texas Commission on Environmental Quality Brownfields Program, Hamilton, TX. 2022 – 2023. *Project Manager.* Conducted a Phase I ESA for the TCEQ Brownfields Program in accordance with ASTM Standard Practice E1527-21. Oversaw completion of a geophysical survey implementing GPR and electromagnetic mapping to confirm the presence of a UST. Conducted removal of one 12,000-gallon UST and associated infrastructure. Prepared and submitted a report in accordance with TCEQ Regulatory Guidance (RG) 411 documenting removal and restoration activities.

IWC Winters Landfill, Texas Commission on Environmental Quality Superfund Site Discovery and Assessment Program, Orange, TX. 2022 – 2023. *Project Manager.* Designed and conducted initial assessment of this former industrial waste landfill that had become partially submerged and had a history of fires near Adams Bayou in Orange, TX. Sampling of soil, sediment, groundwater, and surface water was conducted for VOCs, SVOCs, organochlorine and organophosphorus pesticides, metals, PCBs, dioxins/furans, and PFAS. Prepared the assessment report including technical data review in accordance with the TCEQ Quality Assurance Project Plan and applicable EPA guidance for all media and analytes.

Former Frank Ortiz Landfill, City of Santa Fe Environmental Services Division, NM. 2021 – 2023. *Environmental Scientist*. Prepared Stage 1 Abatement Plan Quarterly Monitoring Reports detailing ongoing monitoring efforts at the site including soil vapor sampling, groundwater monitoring, and landfill gas monitoring.

Rockwool Industries Federal Superfund Site, Texas Commission on Environmental Quality, Bell County, TX. 2018 – 2023. *Project Manager.* Conducted annual groundwater monitoring and semi-annual site inspections, provided oversight for site maintenance, and drafted the annual reports including potentiometric surface and isoconcentration maps, documenting all site activities, and providing conclusions and recommendations for future site activities.

Calhoun and Griggs Soil Assessment, Texas Commission on Environmental Quality, Houston, TX. 2022. *Project Manager.* Designed and conducted a soils assessment for metals and prepared a report documenting the findings.

Magic Tunnel Geophysical Survey, Texas Commission on Environmental Quality Brownfields Program, Texarkana, TX. 2022. *Project Manager*. Oversaw the completion of a geophysical survey implementing GPR and electromagnetic mapping to determine the presence of suspected USTs.

Former Nursing Home Phase I Environmental Site Assessment, Texas Commission on Environmental Quality Brownfields Program, Hamilton, TX. 2022. *Project Manager.* Conducted a Phase I ESAs for the TCEQ Brownfields Program in accordance with ASTM Standard Practice E1527-21.

Kirtland Air Force Base Environmental Baseline Surveys, Albuquerque Bernalillo County Water Utility Authority, NM. 2020 – 2022. *Environmental Scientist.* Authored and certified two Environmental Baseline Survey (EBS) Reports to meet appropriate property due diligence practices for the easement between Albuquerque Bernalillo County Water Utility Authority (ABCWUA) and Kirtland Air Force Base (KAFB), in accordance with Air Force Instruction 32-7066. The property locations included a 5.29-mile-long easement and a 24-acre parcel, all located on KAFB and Department of Energy property. The project included installing an interceptor pipeline and booster station by ABCWUA, with INTERA responsible for all federal due diligence requirements associated with construction projects occurring on federal facilities. Air Force EBS reports are generally comparable to an environmental due diligence report (Phase I ESA) but also include National Environmental Policy Act review, including cultural natural/biological resource review. Updated the sewer interceptor line easement in February 2022. The EBS reports were approved by the ABCWUA and KAFB in 2022.

Former Santa Fe Generating Station, Public Service Company of New Mexico, Santa Fe County, NM. 2018 – 2022. *Environmental Scientist*. Provided data review services of laboratory analytical and field and laboratory quality assurance/quality control for periodic groundwater monitoring. Reviewed figures and tables and created contaminant trends time series data visualizations with Grapher™ software for quarterly progress reporting (2019-2022). Conducted groundwater monitoring (2021) for VOCs and nitrate/nitrite utilizing piston driven Bennett Pump. Conducted a detailed review of historical aerial photographs for evidence of potential sources to petroleum contamination at the site. Drafted a report including a detailed spatiotemporal summary of findings with correlation to historical documentation.

South State Highway 16, Texas Commission on Environmental Quality Superfund Site Discovery and Assessment Program, San Antonio, TX. 2021. *Project Manager.* Designed and conducted a Superfund Site Discovery and Assessment Program (SSDAP) Eligibility Sampling groundwater assessment in the vicinity of a former illegal dump site used by a pesticide applicator to assess impacts to nearby human health receptors at target sole source water wells.

Airline & Aldine, Texas Commission on Environmental Quality Superfund Site Discovery and Assessment Program, Houston, TX. 2021. *Project Manager.* Designed and conducted a State Screening groundwater assessment in the vicinity of a former public water supply well with chlorinated solvent contamination to assess impacts to human health receptors at target sole source water wells.

Elm Street Phase I Environmental Site Assessments, Texas Commission on Environmental Quality Brownfields Program, Texarkana, TX. 2021. *Environmental Scientist.* Conducted two Phase I ESAs for the TCEQ Brownfields Program in accordance with ASTM Standard Practice E1527-13.

Site Investigation of Former Drilling Fluids Disposal Pit, Mo-Vac Service Company, Alice, TX. 2021. *Environmental Scientist.* Conducted a site investigation of a former drilling fluids disposal pit pursuant to an RRC letter to INTERA's client. Conducted a pump test to properly classify the groundwater and conducted groundwater sampling.

Covenant Testing Technologies Railroad Commission of Texas Pit Closure, Covenant Testing Technologies, Midland, TX. 2021. *Environmental Scientist*. Conducted sampling event to close an in-ground steel tank and wash pads that were used to collect hydrocarbon contaminated equipment wash water. Assisted in preparing submittal to the RRC documenting that the site met RRC closure criteria.

Wally's Flying Service Superfund Site Discovery and Assessment Program Site, Texas Commission on Environmental Quality, Uvalde County, TX. 2020. *Environmental Scientist.* Prepared the site-specific health and safety plan (SSHASP) and FSP. Conducted field event including groundwater sampling for SVOCs by method 8270E, organochlorine pesticides by method 8081B, and organophosphorus pesticides by method 8141B. Target contaminants of concerns, glyphosate and endothall, were also sampled and analyzed via EPA drinking water methods 547 and 548.1, respectively. Prepared the final SSDAP Letter Report documenting sampling and comparing analytical results to TRRP PCLs.

G&L Spraying Superfund Site Discovery and Assessment Program Site, Texas Commission on Environmental Quality, Tom Green County, TX. 2020 – 2021. *Project Manager.* Designed and conducted a State Screening groundwater assessment in the vicinity of a former pesticide applicator with a history of releases to the ground surface to assess impacts to human health receptors at target sole source water wells. Conducted groundwater sampling for metals (primarily arsenic) and SVOC pesticides pendimethalin and trifluralin.

Jain Lane / Govalle Soil Vapor Assessment and Vapor Intrusion Mitigation Assistance, Cesar Chavez Foundation, Austin, TX. 2019 – 2021. *Environmental Scientist.* Prepared an updated FSP to conduct soil vapor assessment for a proposed multi-unit residential development. Conducted soil vapor sampling to assess soil vapor impacts from hydrocarbon-affected groundwater from an adjoining, upgradient site. Prepared a Limited Phase II Report for soil vapor assessment concluding potential risk of vapor intrusion to the proposed development and provided recommendations for a vapor barrier system to mitigate potential impacts. Provided mitigation design assistance during the planning stages for construction. Provided certified third party inspection during vapor barrier and venting system installation for a multi-tenant residential complex. Provided final report documenting mitigation effort to satisfy requirements to obtain financial assistance.

Former First Baptist Church, University of New Mexico, Albuquerque, NM. 2020. *Environmental Scientist.* Prepared and submitted a Phase I ESA Report in accordance with ASTM Standard Practice E1527-13. Reviewed available historical records evaluated site visit findings to identify, to the extent possible, any RECs, as defined by ASTM. The Subject Property consisted of mixed use educational, residential, and creative space development. The development is in a highly developed area of Albuquerque and is also immediately south of a chlorinated solvent groundwater plume that is part of a federal superfund site on the national priority list.

Hospital Drive, Anchorum St. Vincent c/o Colliers International, Santa Fe, NM. 2020. *Environmental Scientist.* Prepared and submitted a Phase I ESA Report in accordance with ASTM Standard Practice E1527-13. Reviewed available historical records evaluated site visit findings to identify, to the extent possible, any RECs, as defined by ASTM. The Subject Property consisted of an outpatient medical facility in a mixed commercial and residential area.

Oltorf Street Phase I Environmental Site Assessment, City of Austin, TX. 2020. *Environmental Scientist*. Prepared and submitted a Phase I ESA Report in accordance with ASTM Standard Practice E1527-13. Reviewed available historical records conducted site visit to identify, to the extent possible, any RECs, as defined by ASTM. The Subject Property consisted of a 2.57-mile corridor through commercial and residential areas for a proposed reclaimed water main project.

Loco Ocho Hydrogeologic Assessment, Confidential Client, Wimberly, TX. 2020. *Environmental Scientist*. Conducted groundwater sampling at a private water supply well to establish baseline water quality.

Frank's Conoco, New Mexico Environmental Department Petroleum Storage Tank Bureau, Las Cruces, NM. 2020.
Environmental Scientist. Prepared Groundwater Monitoring Report for a petroleum hydrocarbons release site where INTERA gauged depth to water/light non-aqueous phase liquid (LNAPL) collected groundwater samples. Groundwater was analyzed for VOCs. Reporting included calculating and graphically depicting the groundwater gradient and potentiometric surface. Analytical results were compared to New Mexico Water Quality Control Commission (NMWQCC) standards.

Highway Texaco, New Mexico Environmental Department Petroleum Storage Tank Bureau, Las Cruces, NM. 2020.
Environmental Scientist. Prepared a work plan and cost estimate to conduct a single groundwater monitoring event including monitoring well gauging, sampling, and analysis for dissolved iron and manganese, and VOCs. Analytical results were compared to NMWQCC standards. The sampling monitored petroleum hydrocarbon contaminants in groundwater associated with releases from a former gasoline service station.

Corrales Chevron, New Mexico Environmental Department Petroleum Storage Tank Bureau, Corrales, NM. 2020.
Environmental Scientist. Prepared a work plan and cost estimate to conduct a semi-annual groundwater monitoring at an active gasoline service station with historical releases from the former operations of a preceding service station. The scope of work for this project included monitoring petroleum hydrocarbon contamination in groundwater from a series of 10 monitoring wells and from six nearby water supply wells (i.e., wells with a sealed wellhead). Analytical results of sampling conducted for VOCs were compared to NMWQCC standards.

Caldwell Motor Company, New Mexico Environmental Department Petroleum Storage Tank Bureau, Belen, NM. 2020.
Environmental Scientist. Prepared a work plan and cost estimate to conduct a semi-annual groundwater monitoring at a

former gasoline service station with a historical presence of LNAPL and an undefined dissolved phase contaminant plume. The sampling monitored the contaminant plume from the existing four monitoring wells and compared analytical results to NMWQCC standards.

Old Exxon Jobber Site, Texas Commission on Environmental Quality, San Patricio County, TX. 2019 – 2020. *Environmental Scientist.* Conducted site reconnaissance and scoping meeting with TCEQ to facilitate preparation of the FSP for tank removal activities and release determination sampling. Prepared FSP in accordance with TCEQ Regulatory Guidance 411 (RG-411) to conduct permanent tank removal activities for two registered 22,000-gallon USTs, and all associated components, and to conduct confirmation and surface release assessment. Conducted field oversight for removal of the tanks and collected confirmation samples for petroleum hydrocarbon contaminants including benzene, toluene, ethylbenzene, xylenes (BTEX), methyl-tert butyl ether (MTBE) via EPA Method 8260/5035, polycyclic aromatic hydrocarbons (PAHs) via EPA Method 8270D, and TPH via TCEQ Method 1005. Prepared and submitted a Release Determination Report in accordance with applicable standard (TCEQ-00621)

Union Pacific Rail Yard, Texas Commission on Environmental Quality, Cameron County, TX. 2019. *Environmental Scientist*. Conducted a Phase I ESA and prepared and submitted a Phase I ESA Report in accordance with ASTM Standard Practice E1527-13. Reviewed available historical records and conducted a site visit to identify, to the extent possible, any RECs, as defined by ASTM. The Subject Property consisted of approximately 25.5 acres of land within an urban mixed residential and commercial industrial area that was formerly a train depot and railway switchyard.

Texaco Building, Texas Commission on Environmental Quality, Cameron County, TX. 2019. *Environmental Scientist.* Conducted a Limited Phase II ESA in which 8,000-gallon steel tank and one 12,000-gallon steel tank and associated piping and conducted sampling and analysis in accordance with TCEQ RG-411. Collected confirmation samples for petroleum hydrocarbon contaminants including BTEX, MTBE via EPA Method 8260/5035, PAHs via EPA Method 8270D, and TPH via TCEQ Method 1005. Prepared and submitted an Release Determination Report in accordance with applicable standard (TCEQ-00621).

City of Hondo Landfill Superfund Site Discovery and Assessment Program Site, Texas Commission on Environmental Quality, Medina County, TX. 2019. *Environmental Scientist.* Prepared the SSHASP and FSP. Conducted field event including groundwater sampling for metals, VOCs, SVOCs, and PCBs. Prepared the final SSDAP Letter Report documenting sampling and comparing analytical results to TRRP PCLs.

Russell Flying Service Superfund Site Discovery and Assessment Program Site, Texas Commission on Environmental Quality, Medina County, TX. 2019. *Environmental Scientist.* Prepared the SSHASP and FSP. Conducted field event including groundwater sampling for metals including hexavalent chromium, SVOCs, VOCs, pesticides, and herbicides. Prepared the final SSDAP Letter Report documenting sampling and comparing analytical results to TRRP PCLs.

The Word Church Phase II Environmental Site Assessment, Texas Commission on Environmental Quality, Bexar County, TX. 2019. *Environmental Scientist.* Provided oversight of drilling via solid stem auger and installation of a monitoring well. Conducted well development and collected a representative groundwater sample via low-flow technique.

Sand Hill Energy Center Release Assessment in Support of Affected Property Assessment Report, City of Austin, TX. 2019. *Environmental Scientist.* Provided oversight for hydro-vac to clear utilities down to six feet at the facility, drilling via hollow-stem auger, and installing and developing three monitoring wells. Collected soil and groundwater samples for analysis of TPH and PAHs. Assisted in preparing an affected property assessment report for submission to TCEQ.

Mineral Wool Insulation Manufacturing Company Proposed State Superfund Site Additional Offsite Evaluation in Support of Remediation, Texas Commission on Environmental Quality, Bell County, TX. 2018 – 2019. *Environmental Scientist.* Conducted detailed overland migration characterization and subsurface sediment sampling using a gravity core sampling device deployed from a boat. Drafted report documenting field activities and providing comprehensive descriptions of the migration pathway with estimation of anticipated volumes for removal based on impacted soils above site specific ecological PCLs. Also collected agricultural samples for nutrient analysis to determine the viability and practicality of repurposing on and offsite soils in the design of a containment cell cap with effective vegetative growth.

Schumann Property Petroleum Storage Tank Removal and Brownfields Site Assessment, Texas Commission on Environmental Quality, Concho County, TX. 2018. *Environmental Scientist.* Prepared the FSP based on TCEQ Regulatory Guidance RG-411. Implemented the FSP including oversight of PST removal (550-gallon "ghost tank"), conducted field screening and

confirmation sampling. Prepared the Release Determination Report documenting removal activities and analytical results with respect to PST Action Levels.

Hamlin Municipal Development District Phase I Environmental Site Assessment, Texas Commission on Environmental Quality, Jones County, TX. 2018. *Environmental Scientist.* Conducted the Phase I ESA site reconnaissance to identify and document RECs.

West Texas Phase I Environmental Site Assessment, Confidential Client, Loving County, TX. 2018. *Environmental Scientist.* Provided historical document review and drafted the historical portion of the Phase I ESA Report for approximately 50 square miles of property in accordance with Standard Practice E2247-16 of ASTM International.

Medical Drive Groundwater Plume Superfund Site Discovery and Assessment Program Site, Texas Commission on Environmental Quality, Bexar County, TX. 2018. *Environmental Scientist.* Conducted groundwater sampling at public and domestic drinking water wells for PCE on rapid 24-hour turnaround time (EPA Drinking Water Method 524.2) and drafted the report to document the release and impacts to receptors in the critical pathway of exposure to facilitate Hazard Ranking System scoring.

South Austin Regional Wastewater Treatment Plant Phase I Environmental Site Assessment, City of Austin Public Works, TX. 2018. *Environmental Scientist*. Conducted the Phase I ESA historical document review and site reconnaissance to identify and document RECs.

The Word Church Phase II Environmental Site Assessment, Texas Commission on Environmental Quality, Bexar County, TX. 2018. *Environmental Scientist*. Provided oversight of environmental borehole drilling with direct push technology for the collection of soil samples to a depth of 15 feet. Assisted in lithological logging, field screened and sampled for VOCs or petroleum products. Drafted the Phase II ESA Report. Work was conducted in accordance with Standard Practice E1903-11 of ASTM International. Provided oversight of drilling via solid stem auger and installation of a monitoring well. Conducted well development and collected a representative groundwater sample via low-flow technique.

Cass County Treating Company State Superfund Site Immediate Removal Action, Texas Commission on Environmental Quality, Cass County, TX. 2016 – 2017. *Project Manager*. Coordinated and provided oversight for removal of soils affected with pentachlorophenol and dioxins/furans at a residential property. The scope of the project included air sampling for the development of protective particulate monitoring action levels, confirmation sampling via ISM including development of a pentachlorophenol screening level concentration indicative of dioxins/furans concentrations as a screening tool, and site restoration.

North Andrews Highway Health and Safety Plan and Preliminary Assessment, U.S. Environmental Protection Agency, Ector County, TX. 2016 – 2017. *Project Manager*. Developed the site health and safety plan. Authored the preliminary assessment report based on research and available site information, including consolidating and analyzing historical site knowledge and analytical data, describing the geologic setting and aquifer characteristics, evaluating major migration and exposure pathways, and producing figures and tables.

Harvey Industries State Superfund Site, Texas Commission on Environmental Quality, Henderson County, TX. 2016 – 2017. *Project Manager*. Coordinated and oversaw operations and maintenance activities at the site including soil gas monitoring and cap inspection/maintenance.

First Quality Cylinders State Superfund Site, Texas Commission on Environmental Quality, Bexar County, TX. 2014 – 2017. *Assistant Project Manager and Project Manager.* Coordinated and provided oversight for the continuous removal of affected groundwater contained behind a slurry wall from on-site extraction wells. Reviewed engineering documents and assisted in project management for the implementation of the final remedy which included groundwater remediation via direct push in-situ chemical reduction of hexavalent chromium in the shallow groundwater bearing unit and the installation of a continuous onsite pump and treat system. Managed operations and maintenance activities for the on-site treatment system.

Jerrell B Thompson Battery State Superfund Site, Texas Commission on Environmental Quality, Van Zandt County, TX. 2013 – 2017. *Project Manager.* Conducted annual inspection to ensure site controls for waste remained undisturbed and in good condition as part of operations and maintenance activities.

JCS Company State Superfund Site, Texas Commission on Environmental Quality, Van Zandt County, TX. 2013 – 2017. *Project Manager.* Coordinated and provided oversight for annual operations and maintenance activities at the site including cap inspection and maintenance as well as groundwater monitoring activities.

Deepwater Horizon RESTORE Act Proposal Evaluations, Texas Commission on Environmental Quality Natural Resource Damage Assessment, Austin, TX. 2016. *Evaluator.* Was selected to be part of a six-member interdisciplinary committee that evaluated more than 200 proposals requesting funds allocated to the state by the RESTORE Act for the Deepwater Horizon oil spill.

Schaefer Road Drum Immediate Removal Action, Texas Commission on Environmental Quality, Bexar County, TX. 2016. *Project Manager.* Coordinated and provided oversight for HAZCAT classification, removal, and proper disposal of abandoned bulk and containerized wastes, and affected site soils. Authored legal documents for cost recovery.

Methodist Hospital Health and Safety Plan and Preliminary Assessment, U.S. Environmental Protection Agency, Bexar County, TX. 2016. *Project Manager*. Developed the site health and safety plan. Authored the preliminary assessment report based on site reconnaissance, research, and available site information including consolidating and analyzing historical site knowledge and analytical data, describing the geologic setting and aquifer characteristics, evaluating major migration/exposure pathways, and producing figures and tables.

Highway 18 Groundwater Plume Expanded Site Investigation, U.S. Environmental Protection Agency, Winkler County, TX. 2016. *Field Project Manager.* Responsible for the field event, which included coordination and sampling of soils at potential source locations and sampling sole source water wells for evaluation of impact to human health receptors in the groundwater migration pathway.

Lane Plating Works Site Investigation, U.S. Environmental Protection Agency, Dallas County, TX. 2016. *Field Project Manager*. Acted as Project Manager for the field event, which included identifying representative sampling locations in the field and sampling of soils, sediments, and surface water.

Southwestern Plating Works Immediate Removal 2015, Texas Commission on Environmental Quality, Lubbock County, TX. 2015 – 2016. *Project Manager*. Coordinated and provided oversight for the classification, removal, and proper disposal of abandoned plating vats and containerized wastes. Conducted SSDAP state screening activities, including soil and groundwater sampling and analysis and authored legal documents for cost recovery.

Ector Drum Site Investigation, U.S. Environmental Protection Agency, Ector County, TX. 2015 – 2016. *Project Manager*. Conducted the field effort, including sampling of residential and commercial sole source groundwater wells. Analyzed the collected groundwater data, compared data to EPA Maximum Concentration Levels, and authored the final technical report.

Absolute Fuels Superfund Site, Texas Commission on Environmental Quality, Lamb County, TX. 2015. *Project Manager*. Coordinated and provided oversight for the assessment and investigation of impact to human health receptors via the groundwater pathway and the completion of the final Removal Action Report. Authored legal documents, including a property lien for cost recovery.

Industrial Waste Control Superfund Site Discovery and Assessment Program Site, Texas Commission on Environmental Quality, Orange County, TX. 2015. *Project Manager*. Coordinated and provided oversight for the assessment and investigation of impact to human health receptors in the groundwater migration pathway. Analyzed and compared data to TRRP PCLs to provide conclusions and site recommendations.

Browning Ferris Industries Landfill Superfund Site Discovery and Assessment Program Site, Texas Commission on Environmental Quality, Orange County, TX. 2015. *Project Manager.* Coordinated and provided oversight for the assessment and investigation of impact to human health receptors in the groundwater migration pathway. Analyzed data, compared data to TRRP PCLs, and provided conclusions and site recommendations.

Lonesome Trail Site Investigation, U.S. Environmental Protection Agency, Bexar County, TX. 2014. *SI Team Member*. Conducted soil and groundwater sampling to assist in the completion of the Site Investigation.

River City Metal Finishing Superfund Site, Texas Commission on Environmental Quality, Bexar County, TX. 2014. *Project Manager.* Conducted closeout activities, including authoring legal documents and notices including a restrictive covenant and property lien.

Battery Recyclers of Houston Superfund Site, Texas Commission on Environmental Quality, Brazoria County, TX. 2014. *Project Manager.* Coordinated and provided oversight for the assessment and investigation of impact to human health receptors in the groundwater and soils migration pathways. Analyzed data, compared data to TRRP protective concentration levels, and provided conclusions and site recommendations.

Sampling of Vegetation Transects in the Okavango Delta, Dr. Kelley Crews and Dr. Thoralf Meyer, Undergraduate Research, Botswana, Africa. 2012. *Field Research Assistant.* Conducted sampling in remote parts of Botswana, Africa as part of a ground truthing effort for remotely sensed data. Responsibilities included gathering data using high resolution spectral imagery as well as identifying and measuring woody vegetation across ecological regimes. Applied data gathered for analyzing carbon sequestration in above ground woody biomass using the allometric relation of basal area to biomass.

Project Experience – Water Resources

Vertical Flow Profiling for Production Well, Porter Special Utility District, TX. 2021. *Environmental Scientist.* Provided oversight for "lift and shift" and ultimately the complete removal and reinstallation of a 560 ft, 10-inch pump column. Conducted vertical flow profiling utilizing BESST's upgraded and proprietary version of the U.S. Geological Survey tracer flowmeter and targeted depth interval groundwater sampling using the BESST HydroBooster sampling pump. Analytes included hydrogen sulfide (H2S), adenosine triphosphate (ATP), sulfate reducing bacteria (SRBs), iron reducing bacteria (IRBs), dissolved sulfide, total sulfides, total iron, total organic carbon, methane, chloride, sodium, oxidation/reduction potential (ORP), and specific conductivity. Field testing was also performed including H2S, ORP, dissolved oxygen (DO), pH, temperature, turbidity, and specific conductivity. Wellhead samples were also collected, representing blended composites of zonal chemical mass contribution from each contributing flow interval.

Evangeline Laguna Borehole Surveys and Pump Testing, Confidential Client, San Patricio County, TX. 2020. *Environmental Scientist*. Performed video surveys of wells to determine conditions and screened intervals. Conducted oversight of pump removal and installation and 36-hour pump tests in three wells with In-Situ Trolls and WinSitu software while obtaining manual water level and flow measurements. Collected water samples to analyze water chemistry before, during, and after pump tests.

Dynamic Flow and Water Chemistry Profiling, West Harris County Municipal Utility District, Houston and Katy, TX. 2020. *Environmental Scientist.* Conducted downhole investigation at two public water supply wells to: (1) measure zonal flow contribution within the well under steady-state pumping conditions; (2) characterize zonal chemical contribution of arsenic, iron, and exsolved methane; and (3) determine viable economical options to physically modify the well screen to reduce or eliminate treatment for arsenic and iron and to mitigate methane influx. Conducted dynamic flow profiling to calculate zonal flow contributions over hundreds of feet of intermittently perforated well screen by injecting rhodamine dye at discrete depth intervals and measuring peak return rates at the surface via fluorometer. Conducted depth-dependent groundwater sampling to characterize zonal chemical contribution.

New Braunfels Utilities Aquifer Storage and Recovery Monitoring, ARCADIS, New Braunfels, TX. 2020. *Environmental Scientist.* Provided oversight for drop pipe and transducer installation at monitoring wells supporting aquifer storage and recovery monitoring.

Constant Rate Test for Turtle Creek No. 3 Pump Station, San Antonio Water System, Bexar County, TX. 2019. *Environmental Scientist.* Provided oversight for the constant rate test at 7,000 gallons per minute.

El Dorado Sand Mine Water Supply Wells Development and Performance Analysis, Black Mountain Sand, Winkler County, TX. 2019. *Environmental Scientist.* Provided well development (bailing and airlifting) and pump installation oversight, including water quality monitoring; conducted step drawdown tests to assess supply well performance; and collected aquifer test data for four wells using water level meters and multiple transducers. Collected data using In-Situ Trolls and WinSitu software.

Observation Well Drilling Oversight and Sampling - Oversight for Vertical Flow Profiling for Production Well, Confidential Client, San Patricio County, TX. 2018 – 2019. *Environmental Scientist.* Provided oversight for well drilling activities of observation well to depth greater than 1,000 feet bgs and collected mud rotary cuttings samples for sieve analysis. Provided oversight for BESST, Inc. implementing their ambient flow profiling service using the DyeTracer system developed by the U.S. Geological Survey.

Bigfoot Sand Mine Water Supply Well Installation, Turnkey Processing Solutions, Atascosa County, TX. 2018. *Environmental Scientist.* Provided well drilling and installation oversight. Logged drilling cuttings, conducted step drawdown tests, and collected aquifer test data using water level meters and multiple transducers.

Joseph Tracy, PG

Principal Geologist | Senior Vice President

Years of Experience: 31

Education:

- BS, 1993, Environmental Geology, Ohio University

Professional Registrations/Affiliations:

- Professional Geologist, AZ, 2003, No. 38741
- Professional Geologist, TN, 1999, No. TN4417
- Professional Geologist, TX, 2013, No. 11588

Professional History:

2000 – Present	Senior Vice President, Principal Geologist – INTERA Incorporated, Albuquerque, NM
1999 – 2000	Environmental Specialist – GeoTek Insite, Albuquerque, NM
1997 – 1999	Staff Geologist – Professional Services Industries, Inc. (PSI), Cleveland, OH
1994 – 1997	Staff Geologist – Terranext, Inc., Denver, CO

Training:

- OSHA Health and Safety Training, 29 CFR 1910.120, (40-Hour), 1994
- OSHA Health and Safety Training, Annual Refresher, (8-Hour), current
- DOT HM 126 Hazardous Material Transportation Training, 49 CFR 172.700, 1996
- Confined Space Entry Training, 29 CFR 1910.140, 1995
- National Ground Water Association – Fate and Transport of Light Non-Aqueous Phase Liquids/Dense Non-Aqueous Phase Liquids (LNAPLs/DNAPLs) Training, 1995
- Asbestos Inspector and Management Planner (Toxic Substance Control Act Sec. 206, Title II) Training, 1997
- Asbestos Contractor Supervisor (Toxic Substance Control Act Title II and AHERA) Training, 2000
- Vapor Intrusion Training, 2011
- Red Cross First Aid/CPR Training, current
- Sulfuric Acid Handling Training, 2013
- Interstate Technology Regulatory Council (ITRC) Training – Vapor Intrusion Pathway: Investigative Approaches for Typical Scenarios (2008)

Joseph "Joe" Tracy is a Principal Geologist and Senior Vice President at INTERA with a BS degree in environmental geology and over three decades of consulting experience focused on environmental assessments, site investigations, remedial planning, and site remediation. He has evaluated the environmental impacts to soil and groundwater at leaking petroleum storage tank (PST) sites, Superfund sites, Brownfield sites, and a variety of operational and former industrial properties and facilities. Mr. Tracy leads multidisciplinary teams of scientists and engineers to complete investigations and remediation of contaminants that include petroleum hydrocarbons, heavy metals, chlorinated solvents, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substance (PFAS), and asbestos. He develops remedial plans under voluntary remediation and Superfund programs and prepares and implements work plans, quality assurance project plans, and remedial action plans for Brownfields and other redevelopment projects. Mr. Tracy's experience also includes performing investigations and related work at municipal landfills where activities have included the installation and monitoring of landfill gas (LFG) probes, preparing landfill management plans, operation and maintenance of LFG extraction/destruction systems, developing and implementing grading and drainage plans, and profiling the nature and extent of landfill wastes. Mr. Tracy is a Senior Vice President within INTERA's Southwest Region, where he oversees multi-site contracts with state, county, and municipal agencies, and is responsible for directing all environmental services marketing efforts within the INTERA Mining and Environmental Line of Business Unit.

Project Experience – Environmental

Santa Fe County Investigation of Per- and Polyfluoroalkyl Substance Contaminants in Domestic Wells, Santa Fe County, NM. 2024 – Present.

Project Manager. Santa Fe County The sampling and analysis of drinking water in October 2023 from six domestic wells within the communities of La Cienega and La Cieneguilla, Santa Fe County discovered PFAS at concentrations above the safe drinking water standards recently established by the USEPA. Driven by the health concerns related to this discovery, the County, in collaboration with the New Mexico Environment Department (NMED) Construction Programs Bureau (CPB) and the City of Santa Fe, successfully acted to obtain a USEPA grant to help fund the assessment of the potential PFAS impacts to area groundwater. Mr. Tracy is leading the INTERA Team to achieve the overarching project goals of determining the extent of the PFAS contamination in groundwater and developing alternatives for mitigation and/or remediation of the contamination. Mr. Tracy is currently assisting the County with the initial project activities including the development of a conceptual site model (CSM) and selecting additional domestic wells for PFAS sampling. In addition, Mr. Tracy is working with INTERA subcontractor, John Shomaker and Associates, Inc. (JSAI), in the development of a groundwater flow model, in an effort to determine preferential flow paths for underlying PFAS contamination in ground water.

Environmental Investigations, City of Albuquerque – Department of Municipal Development, Albuquerque, NM. 2005 – 2018 and 2023 – Present. *Contract Manager and Project Manager.* Contract Manager City of Albuquerque Department of Municipal Development Environmental On-Call Services contract. Performed Phase I and Phase II Environmental Site Assessments (ESAs) for the City of Albuquerque (COA) as part of this contract. In addition, provided environmental assistance to the COA Department of Municipal Development on an as-needed basis as project environmental issues develop. Environmental issues included extraction well evaluation at the former Los Angeles Landfill, maintenance and monitoring services at the former Los Angeles Landfill, geophysical investigations in the downtown Albuquerque area, micro-turbine analysis at the former Los Angeles Landfill, engineering evaluation/cost analysis (EE/CA) for the Hotel La Posada del Albuquerque, conducting a soil vapor survey at the City of Albuquerque 1st and Central Site which is located adjacent to the former BNSF East Bound Fueling Facility, ambient air monitoring within residential houses in the Albuquerque area, and asbestos and lead-based paint surveys at several city facilities (i.e., Los Duranes Community Center, Jeanne Bellamah Community Center, Holiday Park Community Center, Barelas Community Center, Mesa Verde Community Center, APD Education Building, Dennis Chavez Community Center, Rio Grande Fire House, Pino Yard Senior Games Building, North Valley Senior Center, Palo Duro Senior Center, Environmental Health Department offices), city-owned former historic hotels (El Vado and De Anza), and city-acquired properties (Brown Property, Caravan Building, Loan Pawn Shop). Facilitated on-call projects such as the development of a CSM for the Kirtland Air Force Base Fuel Spill, development of a voluntary remediation approach for at the Marble-Arno Property and the downtown Railyard, locating a new COA storm water facility, conducting an archaeological survey at the Singing Arrow Community Center, and several landfill maintenance projects for the COA Solid Waste Division Cerro Colorado landfill. Currently projects for the COA include the assessment of asbestos and lead-based paint in several buildings at the COA BioPark (Zoo), which is undergoing a full-scale remodeling and renovation, as well as continuing groundwater monitoring activities at the Marble-Arno Property under the Voluntary Remediation Program (VRP). Secured an additional environmental services on-call contract with the COA in late 2023 and work began in 2024. Mr. Tracy is currently leading the environmental surveys associated with the renovation of the COA Gibson Health Hub (GHH) and several COA community centers and libraries.

Santa Fe Well-S (Santa Fe Generating Station) Petroleum Storage Tank Investigation, Public Service Company of New Mexico, Santa Fe, NM. 2018 – Present. *Project Principal.* Providing contract support for the investigation of fuel and chlorinated solvent release at a former power generating station and other, off-site sources. The release(s) have impacted a City of Santa Fe municipal supply well, causing production of drinking water from this well to be discontinued. The investigation includes the installation of 25 monitoring wells to depths ranging from approximately 300 to over 400 feet using roto-sonic drilling and sampling techniques. Portable gas chromatography and a photoionization detector are being used to analyze soil and groundwater samples in the field so that contaminated zones can be identified, and real-time, informed decisions can be made concerning screen intervals. The results of the in-field screening have identified zones, some as thin as three feet, containing mobile light non-aqueous phase liquid (LNAPL) and conveying highly contaminated groundwater. Responsibilities have included contract and technical discussions with the client and project team as well as attending several scoping and status meetings with Public Service Company of New Mexico, the City, and NMED representatives. In addition to providing support of environmental services associated with the fuel plume, also reviewing efforts associated with State 1 abatement plan (S1AP) investigations regarding chlorinated solvents and nitrates contamination present in ground water at the site.

Hop Canyon/Waldo Mill Site Phase II Site Investigation and Voluntary Remediation Program Activities, ASARCO, Magdalena, NM. 2000 – 2002 and 2018 – Present. *Project Principal, Project Manager, and Staff Geologist.* Implemented a Work Plan to characterize an American former Smelting and Refining Company (ASARCO) mining mill tailings site in Magdalena, New Mexico. The voluntary remediation activities included characterization and removal of affected soil and construction of an onsite tailings impoundment capped with clean soil. Surface drainage issues included interfacing with the U.S. Army Corps of Engineers to present erosion of the impoundment cap and surrounding soils. Initiated additional work at this site on behalf of the ASARCO Trust in 2018. INTERA is currently responsible for Site Caretaker Operations, which are essentially weekly Site visits to make certain the tailings impoundment cover remains in good condition. INTERA will prepare a VRP Work Plan to guide the repair work of the tailing impoundment cover. NMED and/or the ASARCO Trust identified several areas of the tailings impoundment cover in 2017 that are recommended for repair. The remainder of the ASARCO property at the site was legally transferred into ASARCO Trust ownership in late 2023. Currently working with ASARCO Trust representatives and the INTERA Project Team to design and conduct cap repair activities and secure a VRP Conditional Certificate of Completion (CCOC).

Las Vegas Patrol Yard Groundwater Remediation System Operation and Maintenance, New Mexico Department of Transportation, Las Vegas, NM. 2017 – Present. *Project Principal.* Began operation and maintenance (O&M) activities of a groundwater remediation system associated with the two contaminant plumes: an inorganic (chloride and total dissolved solids [TDS]) plume and organic (petroleum and chlorinated compound) plume located at the New Mexico Department of Transportation (NMDOT) Las Vegas Patrol Yard. The groundwater remediation system was originally operated by another firm but due to performance issues INTERA was asked to conduct O&M activities at the site. The groundwater remediation system consists of five interceptor trenches (four of the trenches focus on capturing the inorganic and petroleum plume and one focuses on capturing the chlorinated solvent plume) which capture contaminated groundwater and convey the water to two treatment containers. The treatment system consists of a filter media capable of removing iron and manganese, an air stripper which targets volatile organic compounds (VOCs), and reverse osmosis (RO) membranes which removes TDS and chlorides. The treated groundwater is reinjected into the subsurface via three infiltration trenches. Monthly influent and effluent samples are collected from the groundwater remediation system to ensure the system is operating effectively and that the effluent water quality meets the approved discharge permit requirements. O&M activities include maintaining all parts (pumps, inline sensors, filters) of the system, monitoring the dosing rate of the system additives (sodium hypochlorite, sodium metabisulfite, caustic soda, and anti-scaling agent), analyzing field water quality parameters/compounds (pH, TDS, free chlorine, total iron, total manganese) using handheld meters or Hach kits, replacing filters, monitoring system pressures, maintaining adequate additive volumes in vessels, and performing high- and low-pH cleaning of the RO membranes when necessary. The data collected during O&M activities and recorded remotely using a programmable logic controller is tracked and analyzed on a weekly basis to make sure the system is operating as designed. Treatment system operation has been suspended in recent years due to a discharge permit issue, but are estimated to be re-started in 2024.

Investigation of the Former Frank Ortiz Landfill, City of Santa Fe, NM. 2016 – Present. *Project Manager.* The Frank Ortiz Landfill operated as a City of Santa Fe municipal landfill between 1954 to 1968. Since no solid waste management regulations were in place during this period of operation, the landfill is not regulated by the NMED Solid Waste Bureau. The landfill site was re-developed by the city with soccer fields from 1987 to 1993 and currently serves as a dog park. In April 1993, soil vapor samples were collected from the fill and soil cover areas. Laboratory analysis of the samples showed that they contained hydrocarbons, chlorinated solvents, and chlorinated solvent degradation products. Concentrations of some of the contaminants exceeded 1,000 parts per billion. A single groundwater monitoring well (Ortiz Park No. 1) was installed approximately 500 feet southwest of the landfill in 2004. A groundwater sample collected from the well indicated that groundwater had been impacted from VOCs, hydrocarbons, metals, and nitrogen believed to have originated at the landfill site. Periodic groundwater and soil vapor sampling have continued at the site since 2004. An S1AP was developed for the Site in 2010 and submitted to NMED for review and approval. In 2013, NMED issued a letter noting several deficiencies in the S1AP including: the lack of a plan for maintenance of a two-foot cap over the former landfill; inadequate definition of the nature and extent of the landfill waste; inadequate definition of contaminant concentrations in the vadose zone below the waste; inadequate definition of the potential contaminant impacts to groundwater; the lack of a long-term monitoring program; and the need for a quality assurance project plan, health and safety plan, and a schedule for implementing the additional investigation activities and analyses necessary to address the identified deficiencies.

In 2015, at the request of NMED, the City conducted a geophysical investigation to define the areal extent of buried waste at the landfill. INTERA was awarded a contract from the City in September 2016 to help address the remaining S1AP deficiencies. Helped develop and reviewed an integrated Sampling and Analysis Plan (SAP)/Quality Assurance Project Plan (QAPP) for the former landfill that was submitted to and approved by NMED. The SAP outlined several steps for the City to address the noted NMED concerns, including: installation of test pits to determine type and extent of waste; the collection of soil samples to determine the impact to soil immediately below the buried waste (extent of contamination in the vadose zone); installation of groundwater monitoring wells; groundwater sample collection; and an approach for a long-term groundwater monitoring program. Field sampling activities associated with the SAP/QAPP were completed in July 2017. Met with the NMED to go over the report findings and discuss recommendations for next steps. The investigation revealed the approximate extent and depth of buried waste, determined the extent of the vapor plume, and provided information on the landfill cover content and thickness. To address NMED's final concern, additional groundwater monitoring wells co-located with three soil vapor monitoring wells and an additional soil vapor monitoring well were recommended and the approximate locations were determined.

The additional wells were installed at the Ortiz Landfill in late 2019 and early 2020 and a final report was submitted to by INTERA to NMED in May 2020. The report findings indicated a direct impact to Site soil vapor likely from the presence of the buried waste, but it appears that Site groundwater is largely unimpacted. INTERA has successfully negotiated with NMED a period of monitoring work for the three years and includes the addition of Surface Emission Monitoring (SEM) on a quarterly basis of the entire Ortiz Landfill property (historic fill area and adjacent land within the property boundary). Once this period has expired, Mr. Tracy will work with City and NMED representatives to determine the need and location(s) for any future additional groundwater and soil vapor monitoring well installations.

The INTERA former Frank Ortiz Landfill work is being conducted in concert with additional investigation and monitoring activities at the adjacent Paseo de Vista (PDV) Landfill. The monitoring and maintenance of the PDV Landfill was added to the INTERA Ortiz Landfill contract by the City in 2019. The work at PDV has largely been conducted by personnel from INTERA's partner, Parkhill, under INTERA oversight. All PDV deliverables are prepared by Parkhill and reviewed by Mr. Tracy prior to submittal to the City and NMED. Mr. Tracy currently leads the long-term monitoring (LTM) activities at both landfills on behalf of the City and manages subcontractor Parkhill. The City of Santa Fe has requested that INTERA assist with NMED updated S1AP activities which are scheduled to begin in July 2025. This will consist of the installation of an additional ground water monitoring well, several LFG monitoring wells, and sampling ground water for PFAS in addition to the required analysis suite.

North Railroad Avenue Plume Superfund Project, New Mexico Environment Department - Groundwater Quality Bureau, Española, NM. 2016 – Present. *Project Principal*. A bio-amendment injection event was performed to remediate residual contamination (tetrachloroethene [PCE] and daughter products) in discrete intervals of fine-grained material identified in the source area (SA) and hot spot (HS) of the site. INTERA evaluated available data, identified six treatment areas, determined targeted treatment intervals, selected emulsified soybean oil as the carbon substrate, and devised an injection method to ensure that the substrate is delivered precisely. INTERA oversaw the bio-amendment substrate injection event which was conducted in two separate events: the first was completed in April 2017 via a direct-push injection tool within sonic casing and the second event was conducted with direct sonic injection in September 2017. INTERA conducted follow-up performance groundwater monitoring. Results of the performance monitoring events confirmed the successful distribution of the carbon substrate through the presence of the dye tracer (Rhodamine WT) and elevated total organic carbon (TOC) in monitoring wells within the anticipated radius of influence (ROI). Additionally, the groundwater analytical results from the first performance monitoring event provided evidence that in-situ reductive dichlorination was enhanced through the injection of the carbon substrate. Performance monitoring is currently ongoing. Serves as a Project Principal for INTERA's NMED contract, which includes INTERA's work at the NRAP site as well as INTERA's work at the Eagle Picher site in Socorro, New Mexico.

Former Central Works Equipment Facility Remediation Activities "COA Rail Yards," City of Albuquerque, NM. 2006 – Present. *Project Manager.* Managed the removal of contaminated soil at the former Central Works Equipment (CWE) facility in Albuquerque, New Mexico. The project included the removal of approximately 600 cubic yards of lead-contaminated soil previously stockpiled at the site. Developed a Work Plan to investigate petroleum-hydrocarbon and metals contamination at this site using Targeted Brownfields Assessment (TBA) funding. Led an additional Phase II investigation at the site in 2012. The Phase II investigation consisted of surface and subsurface soil sampling, building sub-slab vapor sampling, and groundwater sampling. This effort was conducted to determine what impacts (if any) the historical operations of the site as a railyard would have on future redevelopment. It was determined that a petroleum-hydrocarbon plume was present at the southwest corner of the site. Limited impacts were present in surface and subsurface soils. Developed several cost estimates for the remediation of soil and groundwater at the site for the city to use depending on the redevelopment scenario they selected. Further site investigation work was completed in 2012 as the city moved toward redevelopment of the site. Served as Project Manager for an Additional Site Investigation (ASI) that included completing a data evaluation/remediation options document to compile and analyze all existing contaminant data for the entire city railyard, which included former tank areas, oil/water separator, and a former locomotive roundhouse, among others. The evaluation resulted in identifying several data gaps which were investigated during the ASI. Contaminants of concern for this site included VOCs, TPH, PAHs, lead, and arsenic. The site investigation included (1) collecting surface soil samples from thirteen locations, (2) drilling oversight of 18 soil borings using direct push technology methods, (3) collection and screening of soils samples using a photoionization detector (PID) and Dexsil PetroFLAG field test kit to aid in selection of samples for laboratory analysis, (4) collection of eleven groundwater samples with the SP-16 sampler, temporary monitoring wells, and

existing monitoring wells, (5) installation of a soil vapor sample point, and (6) collection of a soil vapor sample using a Vapor PinTM. INTERA provided the client with a completed report, which included several remediation scenarios based on various redevelopment options.

Oversaw the remediation of the Blacksmith Shop building at the CWE facility in 2013. The remediation work consisted of the abatement of asbestos as well as the encapsulation of lead-based paint on the ceiling of the Blacksmith Shop. The Blacksmith Shop was redeveloped by COA into an open-air market following remediation activities. The redeveloped Blacksmith Shop opened in June 2013.

Worked with the COA selected developer, Samitaur, on a VRP approach for all portions of the Railyard property. This included a multi-option remediation approach as several redevelopment options (residential, commercial, open space) will be implemented at the site. Oversaw the development of a CSM for the site. INTERA compiled all available information related to environmental site conditions such as historical soil and groundwater data to help determine the nature and extent of the contamination across the site with regard to depth and COCs in the CSM to provide a foundation for remedial action decisions. Activities completed as part of the CSM included developing a database in Microsoft Access, connecting the database to ArcGIS to allow for visual data analysis, and identifying key data gaps. The CSM was also used as a foundation for development of a remediation work plan required to address data gaps at the site. The remediation work plan was developed in conjunction with potential redevelopment scenarios identified for the site. Implementation of the remediation work plan was completed early 2017 and included the collection of soil samples, soil vapor samples, groundwater samples, sub-slab soil vapor samples, and the completion of asbestos and lead-based paint surveys on all site buildings. The results of the data collection were compiled into ten different reports, one for each of the 10 railyard parcels. The intent of separate reporting for each of the 10 parcels was to allow phased development of the site over a lengthier time period than is customary under the VRP.

Contracted in late 2018 to develop a revised VRP Application and Preliminary Work Plan for the COA Rail Yards, splitting the COA Rail Yards into two VRP sites (COA Rail Yards North and COA Rail Yards South). Currently, the COA Rail Yards North has received conditional eligibility to enter the VRP and Public Notice and a Public Meeting was held in April 2019 to outline for the public the proposed remedial actions. Assisted with the Public Notice requirements for the COA Environmental Health Department personnel. The COA implemented soil removal activities within the COA Rail Yards North in May and June 2019.

Contracted in early 2020 to help the COA develop a VRCR for the COA Rail Yards North and to implement an off-Site groundwater monitoring well installation Preliminary Work Plan for the COA Rail Yards South. INTERA developed a VRCR for the COA Rail Yards North and submitted it to NMED in September 2020. INTERA also, as requested by the COA, developed, submitted to NMED, and received NMED approval for a Contaminated Soil Management Plan (SMP) in July 2020. This SMP will be followed as additional impacted soil is excavated at the COA Rail Yards. Either developed or provided final review of this documents. INTERA installed 5 ground water monitoring wells at off-site locations surrounding the COA Rail Yards South. These monitoring wells were installed in February 2021. Provided interface with the client during the field work and also provided daily direction to the INTERA field team. Finally, INTERA will work with the COA's Rail Yards management team to develop the remediation approaches for the COA Rail Yards South depending on the selected future development. Secured a VRP CCOC for the Rail Yards North in 2021. Currently leading the LTM activities associated with ground water and soil vapor at the Site and leading efforts to secure a CCOC for the Rail Yards South. In addition to LTM activities, currently providing quality assurance inspections for the installation of a soil vapor mitigation system in the Boiler Shop, prior to it's redevelopment as a movie studio for CNM (abqrailyards.com).

Technical Support Services for the Red Hill Bulk Fuel Storage Facility, Honolulu Board of Water Supply, Honolulu, HI. 2015 – Present.
Project Manager. Providing third-party technical review of technical documents and data produced and collected by the U.S. Navy and its contractors at the Red Hill Bulk Fuel Storage Facility (RHBFSF). The RHBFSF contains 20 large field-constructed underground storage tanks, each containing approximately 12.5 million gallons of fuel. These tanks are located at depths ranging from 120 to 175 feet below ground surface within the Koolau Basalt and lie 100 feet above the aquifer. Fuel leaks from the facility both historic and recent (January 2014 – 27,000-gallon release) have impacted the underlying EPA-designated Sole Source Southern Oahu Basal Aquifer and are potentially threatening the Honolulu Board of Water Supply (BWS) water supply wells and production shaft. The 2014 release resulted in the Navy, the EPA, and the Hawaii Department of Health (DOH) signing an Administrative Order on Consent (AOC) to assess the RHBFSF and determine what impact this release and previous releases have had on the environment and to determine what the appropriate tank

upgrade solution may be. Activities included reviewing technical reports and extracting and compiling data collected at the RHBFSF from these reports. Reviewed and provided over 135 comment letters to date to the DOH and the EPA on various Navy work plans and reports. Led the INTERA Team's development of a CSM that describes the processes and features controlling the migration of fuel contamination and identifies potential exposure pathways and receptors. Additionally, supported the development of a Monitoring Well Construction and Installation Plan, sampling plan, and quality assurance plan for several sentinel wells installed by INTERA for the BWS. The first monitoring well was completed in 2017, and quarterly groundwater monitoring was in 2017 and 2018. Semi-annual sampling of this monitoring well began in 2019 and continues in 2021. Hired Exponent as a subcontractor and oversee their technical work associated with tank infrastructure, release detection, corrosion and metal fatigue, risk assessment, and toxicology services. This expertise has been needed on various comment letters developed by INTERA for the BWS since the initiation of the contract. Representing BWS interest in numerous technical working meetings associated with the Red Hill AOC and the AOC Statement of Work (SOW) since contract initiation in 2015. Participates in Groundwater Modeling Working Group meetings to review the progress of the Navy's flow and transport groundwater model. Assists the BWS with the development of community meeting and BWS Board presentations and regularly attends all public meetings in California and/or Hawaii held by the EPA, DOH, and the Navy on the Red Hill matter. Negotiated a 2020 contract renewal with BWS that extended INTERA's work on this project for the next several years.

Led INTERA's efforts in 2021 and 2022 to support the BWS in response to the Red Hill Hawaii Department of Health (DOH) Emergency Order which requires the complete defueling of the facility by June 2024 (defueling was completed by the Navy in March 2024). These efforts have included reviewing and commenting on Navy deliverables (Defueling Plan, Closure Plan, Notice of Intent [NOI] data reports, groundwater flow model reports, etc.) and providing this information to BWS. In addition, because of the May and November 2021 fuel releases at Red Hill, the BWS has been forced to shut down several drinking water sources in the area. Mr. Tracy is currently focused on supporting the BWS with the identification of monitoring well and exploratory production well sites and working with the INTERA Project Team to design each monitoring and exploratory well and exploratory well pumping tests. INTERA has developed well designs for over ten monitoring wells and four exploratory well locations and is currently developing the drilling plans and testing plans associated with these wells. Assisting the BWS with the development of bid documents to procure drilling services for monitoring and exploratory well installations. Providing management and scheduling assistance for INTERA field teams overseeing well installation activities by BWS general and drilling contractors.

Sites Assessments, New Mexico Department of Transportation, Various Locations, NM. 2015 – Present. *Principal in Charge.* Provides senior technical review of Initial Site Assessments (ISAs), preliminary site investigations (PSIs) and Detailed Site Investigations (DSI) at several NMDOT construction project sites in New Mexico. These NMDOT projects involve the evaluation of properties either NMDOT-owned or NMDOT right-of-way (ROW) acquisitions as part of highway improvement projects. The ISAs completed generally follow the ASTM Standard E1527-13 and the NMDOT Handbook for site assessments. The PSIs and DSI include Phase II activities (investigative excavations, soil boring drilling, soil sampling, and geophysical surveys) for further evaluation of NMDOT property. Supervises the field teams conducting this work and provides senior technical review of all project deliverables. Manages overall contract issues and interfaces directly with the INTERA Project Manager and NMDOT management. Most of these assessments are completed in areas where NMDOT is going to expand their infrastructure with either additional traffic lanes or an upgrading of their maintenance yards.

Site Monitoring and Emergency Response Contract, New Mexico Environment Department - Petroleum Storage Tank Bureau, Various Locations, NM. 2014 – Present. *Project Principal.* Providing administrative and technical review of work conducted for contaminant characterization investigations and groundwater monitoring activities. These activities seek to determine the nature and extent of subsurface petroleum hydrocarbon contamination originating from above ground and underground storage tank sites. Investigations include the analysis of soil, groundwater, and soil vapor impacts to these various sites across New Mexico. Work includes the following partial listing of INTERA Petroleum Storage Tank Bureau (PSTB) state-led sites: Barelas Bridge Site in Albuquerque, New Mexico; Bell Gas Site in Truth or Consequences, New Mexico; Brewer Self-Serve Site in Roswell, New Mexico; City Market Site in San Miquel, New Mexico; Frank's Conoco Site in Bernalillo, New Mexico; Corrales Chevron in Corrales, New Mexico; Robinson Texaco in Taos, New Mexico; Rodgers Drilling Site in Albuquerque, New Mexico; Village Market and the Former Caldwell Motors sites in Belen, New Mexico; and the Montoya Well Site in El Prado, New Mexico.

Dry Cleaning Site Investigation and Remediation of Tetrachloroethene Contamination, Elite Laundry and Cleaning, Gallup, NM. 2013 – Present. *Project Manager.* Leading efforts to investigate and remediate groundwater impacted by PCE as a result of previous releases from this operating dry-cleaning facility. The impacted groundwater was discovered during a Phase II ESA conducted on an adjacent property. In response to a letter from NMED to address the contamination, efforts have included providing technical support and advice to Elite Laundry and Cleaners representatives to determine the most appropriate path forward. This included addressing the identified contamination under the NMED VRP. Prepared and submitted a VRP work plan and VRP application to NMED. The proposed VRP investigation activities include the installation of monitoring well on- and offsite to characterize and delineate the PCE in groundwater contamination. The field activities identified in the VRP Work Plan were initiated in late 2018 and early 2019, which included the installation of additional monitoring wells as well as subsurface soil and indoor air vapor sampling activities. Off-site passive vapor sampling activities were completed by INTERA under Mr. Tracy's oversight at the Site and within the area in 2020. Additional site characterization activities and preliminary design for a remediation system to prevent the off-site migration of contaminants in soil vapor and ground water are planned for 2025, including the installation of a soil vapor extraction system for the removal of VOCs in soil gas to prevent the potential for offsite migration.

Judge Steve Herrera Judicial Complex Site Investigation, Remediation, and Monitoring, Santa Fe County, NM. 2009 – Present. *Contract Manager and Project Manager.* Leads INTERA's efforts to develop a remedial solution for the Santa Fe County Judicial Complex which involves interfacing with both the NMED VRP and PSTB. INTERA was contracted by Santa Fe County in March 2009 to support their efforts to re-develop a Brownfields property comprising a three-story judicial complex and associated plaza and subsurface parking garage in downtown Santa Fe, New Mexico. A large excavation and steel/wood shoring system was constructed beginning in the fall of 2008. During shoring activities, a two-foot layer of LNAPL was discovered near the water table. INTERA performed additional site investigation activities and determined that the LNAPL plume was predominately present in the proposed location of a subsurface two-story parking garage. Construction of the garage and associated judicial complex was delayed, enabling the county and NMED's PSTB to develop an appropriate response action. PSTB subsequently designed and is operating a soil vapor extraction system for the areas outside of the judicial complex excavation to remediate the historic contamination. The county was responsible for the remediation of their property even though they were not a responsible party. Led the development of a petroleum contaminated soil (PCS) work plan including development of a dewatering plan, excavation and removal of over 20,000 tons of PCS, installation of a vapor intrusion/ground water barrier (liner) on all parts of the development located below grade, and development of a vapor monitoring system for the final development of the site. The Work Plan was approved by VRP and PSTB. The excavation work is complicated because of two primary factors: (1) soil must be excavated below the water table requiring dewatering for safe removal; and (2) construction activities are scheduled to take place immediately following soil remediation efforts, requiring that dewatering continue for several months until construction infrastructure can be put in place below the water table for the two-story parking garage. Helped initiate the development of a soil gas passive venting system around the subsurface parking garage and initiated the installation of this system in January 2012.

Additionally, prepared and submitted a VRP application to secure a certificate of completion for the remediation work; supervised risk assessors in the development of a document pertaining to future building occupancy and currently participates in numerous stakeholder meetings with the county and PSTB representatives. Either conducted or supervised INTERA staff employees or subcontractors in assessing, reviewing, and selecting mitigation measures for the complex; identifying and developing measures to isolate the proposed infrastructure from contacting LNAPL remaining in the plume around the building (i.e. liner selection process); LNAPL sampling and characterization; air emissions testing and permitting; waste profiling; preparation and submittal of a groundwater discharge permit application; LNAPL removal and disposal; LNAPL bail-down testing; a Phase I ESA of the site; slug testing to determine aquifer properties; weekly VRP update reporting, and subcontractor oversight of remediation activities. The PCS removal activities were completed at the site in February 2011. Continues to work with the county to develop a VRP Completion Report and secure a CCOC for the site. The judicial complex was completed in February 2013 and began operating in June 2013. Continues to oversee quarterly groundwater monitoring activities at the site as part of the county's VRP Work Plan. Secured a Voluntary Remediation Agreement (VRA) for the site on July 9, 2015. Completed the Voluntary Remediation Completion Report (VRCR) for the site in February 2016 and assisted the county in obtaining a VRP CCOC from NMED also in February 2016. Groundwater monitoring activities were completed by INTERA at the site in October 2016. Currently assisting the county by reviewing the work conducted by the PSTB at the site and providing status reports to the county. For example, observed multi-dual phase extraction activities conducted by PSTB and their contractor at the site in 2017. The final goal is to assist the county in

securing a VRP CCOC with only a land use restriction in 2024. Helped the County discontinue the NMED judicial complex discharge permit (NMED DP-1747) in late 2023 and currently negotiating on the County's behalf with NMED to modify the VRP CCOC in 2025.

SunZia Transmission Line Phase I Environmental Site Assessment, New Mexico and Arizona Approximate 550-Mile Corridor. 2021 – 2024. *Project Principal*. INTERA was retained by SunZia Transmission, LLC located in Albuquerque, New Mexico to perform a Phase I ESA for a 550-mile corridor starting southeast of Phoenix, Arizona and terminating in Corona, New Mexico. The proposed transmission line would ultimately aid in the transportation of wind farm produced electricity across New Mexico and into the Tucson area of Arizona. Provided Project Principal review and contract management duties for the project. Worked with the Project Team to develop Phase II site characterization goals for the recognized environmental conditions (RECs) identified during the Phase I ESA work. The Phase II recommendations included geophysical surveys for two former bombing ranges that the Project Corridor intersects in New Mexico and for soil cleanup of an above-ground storage tank release at a commercial agriculture operation at a property in Arizona. The geophysical investigations for the two former bombing ranges were completed in 2023 (no mitigation needed) and the soil cleanup for the Arizona commercial agriculture operation is scheduled to be conducted in 2024.

Data Gap Monitoring Well for the Albuquerque Bernalillo County Water Utility Authority, Albuquerque, NM. 2022 – 2023. *Project Manager.* The Albuquerque Bernalillo County Water Utility Authority (ABCWUA) received funding from the State of New Mexico CPB in 2021 to drill, install, and sample a monitoring well downgradient of the ethylene dibromide (EDB) and petroleum hydrocarbon plumes in groundwater migrating offsite from Kirtland Air Force Base (KAFB). Provided technical input on recommended location and design of a >500-ft deep monitoring well to address a potential data gap toward the distal end of the known EDB plume. Led the installation of the monitoring well (sonic drilling methods) and initial well development which was completed in April 2022. Led initial one-year long-term monitoring activities of the data gap monitoring well in late 2022 and early 2023 until the LTM duties were shifted from INTERA to an ABCWUA on-call contractor.

Kirtland Air Force Base Environmental Baseline Surveys, Albuquerque Bernalillo County Water Utility Authority, NM. 2018 – 2022. *Project Principal.* Provided technical oversight and review of final deliverables for the INTERA effort to conduct two Environmental Baseline Surveys (EBS) for the ABCWUA to meet appropriate property due diligence practices for the easement agreement between ABCWUA and KAFB. The property locations included a 5.29-mile-long easement and a 24-acre parcel, all located on KAFB and Department of Energy (DOE) property. The project includes the ABCWUA installing an interceptor pipeline and booster station and INTERA is responsible for all federal due diligence requirements associated with construction projects occurring on federal facilities. Responsible for internal team communications, client meetings, and final review of the two EBS reports. The EBS reports were completed and approved by the ABCWUA and KAFB in 2022.

Phase I Environmental Site Assessment of Mt. Chalchihuitl and Cerrillos Gravel Products Properties, Santa Fe County, Cerrillos, NM. 2004 – 2022. *Project Manager.* Project Manager for the Phase I ESA of the combined 745-acre Mt. Chalchihuitl and Cerrillos Gravel Products properties. Assessment activities are being conducted using the EPA's All Appropriate Inquiry (AAI) and ASTM Standard E1527-05 as guidance. Performed risk assessment and remediation alternative analysis activities at the Mt. Chalchihuitl portion of the site (545 acres) in 2004. The entire site was historically used for mining activities, located at the center of the Cerrillos Mining District South area. Santa Fe County plans to re-develop the site as open space by incorporating it into the Cerrillos Hills Historic Park, and INTERA continues to work with Santa Fe County to determine remediation options for the site. The development objective is to include these properties in the Cerrillos Hills Mining District Open Space Park.

Developed a VRP Work Plan for the site in 2012, which selected a previously determined remedial option and submitted the Work Plan to Santa Fe County for review. The selected remediation includes the construction of tailings impoundment and cap in a former gravel pit and long-term monitoring to make certain the cap integrity is secured. The remainder of the site will be used as a public open space, allowing the public to observe some of the oldest mines in North America. Completed and submitted the VRP Application and Preliminary VRP Work Plan for this Site in September 2017. The county would like to acquire the properties in 2018 and begin soil remediation as soon as possible after property acquisition. Currently assisting the county legal team with the development of a VRA between the county and NMED. Also, were recently awarded a contract to sample soils in the arroyo to the south of the Cerrillos Gravel Products property and to sample three area drinking water wells to determine any potential water quality impacts.

Responded to a Letter of Interest (LOI) released by the County in 2019 to assess ground water conditions at the Mt. Chal site. After selection by the County in response to the LOI, led the INTERA Team in sampling an upgradient private water well and a monitoring well at the Cerrillos Gravel Products property. Determined elevated metals concentrations are present in site groundwater and offered recommendation to the County for addition work at the site and the potential installation of a new monitoring well in a down gradient location. Due to a disagreement on overall value with the landowner (both property and mineral rights), the County passed a resolution and discontinued their Mt. Chalchihuitl acquisition initiatives in 2022.

Redevelopment of the Former First Baptist Church Site, Lobo Development, Albuquerque, NM. 2013 – 2021. *Project Manager.* Provided oversight for voluntary remediation activities associated with redevelopment of this property in downtown Albuquerque. Previously conducted Phase I and II ESAs and identified subsurface soil and groundwater contamination that was believed to be the result of a diesel fuel release at the adjacent Burlington Northern Santa Fe (BNSF) Railway Railyard. Evaluated site investigation data and determined that the property had been impacted by both off-site sources and historic site uses that required limited remediation prior to site redevelopment. The site was entered in the NMED VRP to secure a Certification of Completion (COC) to facilitate redevelopment. Activities included interaction with NMED to ensure the COC was issued in a timely manner and assisting in obtaining a Covenant Not to Sue (CNS). After receiving the COC and CNS, Lobo Development acquired the property in 2014 and the site was re-developed as part of the City of Albuquerque's "Innovate ABQ" development initiative. Worked with the Innovate ABQ development team to manage the environmental risks associated with the planned redevelopment of the Site. Assisted the Site developer (Signet) with renovation and demolition activities completed within the former First Baptist Church in 2016. Assisted the developer with VRP reporting activities in 2016, 2017, and 2018 associated with the construction of a three-story building at the site. VRP reporting activities are required in order to maintain the COC by guiding the developer to implement the proper engineering controls. The newly constructed three-story commercial building is known as the "Lobo Rainforest" and serves as an entrepreneur center for business associated with "Innovate ABQ," a downtown Albuquerque technology park. Led a team that updated the Phase I ESA in 2020 on behalf of the University of New Mexico (UNM). Also helped secure a U.S. Environmental Protection Agency (EPA) "Comfort Letter" for UNM and a CNS prior to the property transfer. UNM assumed ownership of the site in late December 2020.

Redevelopment of the Former Galles Chevrolet Automobile Dealership Property, University of New Mexico, Albuquerque, NM. 2018 – 2020. *Project Manager.* Provided oversight for voluntary remediation activities associated with redevelopment of this property in the UNM area of Albuquerque. Previously conducted Phase I and II ESAs identified subsurface soil and groundwater contamination that was believed to be the result of gasoline and diesel fuel releases from former underground storage tanks (USTs) located at the property. Additional environmental contamination was also identified by the operation of over 70 underground hydraulic lifts as well as five former oil/water separators (OWS) in use at the property. Evaluated site investigation data and determined that the property has been impacted by historic site uses that required limited remediation prior to site redevelopment. The site was entered in the NMED VRP to secure a COC to facilitate redevelopment. Activities included interaction with the NMED to ensure the COC was issued in a timely manner and assisting in obtaining a CNS. The issuance of the COC and CNS are still pending. Conducted an on-site soil vapor survey to determine areas of elevated soil vapor concentrations and developed a plan for the construction and use of vapor intrusion barriers for any newly constructed buildings at the Site. Evaluated the remediation activities conducted by the landowner (Sandia Corporation) to determine what impact, if any, the remedial work may have on future UNM activities at the site. Worked with subcontractor DC Environmental to prepare a cost estimate associated with the asbestos and lead-based paint abatement at current Site buildings prior to demolition and/or renovation. UNM leased the property in late 2019. Worked with UNM Medical Center personnel to assist with the development of short-term uses for the site prior to full-scale redevelopment.

Investigation of the Santa Fe River Targeted Brownfields Assessment Area, City of Santa Fe, NM. 2010 – 2019. *Project Manager.* Led an investigation in the downtown Santa Fe area to (1) develop a better understanding of groundwater flow within the area so that appropriate decisions can be made about remediation of petroleum hydrocarbons and other groundwater contaminants, (2) determine what impact, if any, will occur within the shallow groundwater aquifer if stream flow in the Santa Fe River is increased, and (3) determine the nature and extent of petroleum hydrocarbon contamination so engineering controls can be evaluated for future development within the TBA area. Activities included developing a geologic model and implementing a drilling program to confirm model accuracy. Field investigations showed that the

geologic model is accurate, and the City of Santa Fe and NMED used the geologic model to guide additional investigations being conducted by NMED and EPA in the downtown Santa Fe area. These investigations were completed to identify sources of petroleum hydrocarbon as well as chlorinated hydrocarbon contamination in ground water in the downtown Santa Fe area. Activities in 2016 and 2017 included the installation of additional groundwater monitoring wells, groundwater sampling, installation of soil vapor monitoring wells, soil vapor sampling, indoor air sampling, and groundwater sampling of additional monitoring wells owned by several different entities in the downtown Santa Fe area to determine groundwater characteristics and the potential sources of identified contamination. Subsurface soil gas sampling was conducted at this Site in June 2019 using "Waterloo Membrane Samplers" placed at several facilities within the TBA area that may have been sources of the underlying ground water contamination. Helped NMED develop a report for the 2019 sampling event and discussed the findings with NMED.

Proposed Belen Fire Station Property Investigation and Remediation, Molzen Corbin, Belen, NM. 2017 – 2018. *Project Manager.* Supervised Site investigation and remediation services at the proposed new Belen Fire Station property located in Belen, New Mexico. Prior to site redevelopment activities, Molzen Corbin Engineers contracted INTERA to conduct site investigation activities to determine if any impact from petroleum hydrocarbons occurred at the Site during historical activities (automobile repair activities) and to conduct geophysical investigation work to determine if any relic USTs were present at the site. INTERA advanced 15 soil borings at the site using geoprobe investigation methods to collect soil and groundwater samples. Investigation results determined that approximately 2,800 cubic yards of PCS were present at the site and one UST was in the northwest corner of the property. INTERA provided a map of the locations of the PCS and the UST. The PCS and UST were removed by City of Belen contractors in 2017. In addition, groundwater impacts by petroleum hydrocarbons were also verified, but no concentrations identified were above New Mexico Water Quality Control Commission (NMWQCC) standards or PSTB action levels. Continued to provide consulting services to Molzen Corbin at the Site as Fire Station building construction was initiated in 2017. INTERA recommended removal of the PCS and installation of a vapor intrusion barrier and sub-slab venting system to protect future building occupants and Site users. INTERA developed specification documents for both PCS removal and vapor intrusion barrier installation and provided to Molzen Corbin Engineers to include in the general contractor bid package. Construction of the Belen Fire Station was completed in 2018. The Belen Fire Station redevelopment project received the "Environmental" award from the New Mexico Chapter of the American Council of Engineering Companies in September 2020.

Investigation of Perchloroethylene Contamination at the Griggs and Walnut Superfund Site, Confidential Client, Las Cruces, NM. 2015 – 2018. *Senior Scientist.* Assisted the technical team evaluating the release timing and locations of PCE contamination in the area of the Griggs Street and Walnut Avenue intersection in the northern section of the City of Las Cruces. The timing information was critical in demonstrating occurrences for insurance reimbursement purposes. Assisted in the development of the CSM for the potential release sites in the area. The CSM would be used by Dona Ana County and the City to help further their understanding of the Superfund site.

Facility Environmental Audits and Stormwater Management Plans, Wood Group/TurboCare Generator Services/Ethos Energy, Farmington, NM. 2010 – 2018. *Project Manager.* Performed environmental audits of three electric generator parts manufacturing facilities, focused on determining volumes of hazardous waste generated at each facility. Reviewed information to calculate volumes to determine the correct generator status (conditionally exempt, small or large), obtain a correct hazardous waste generator identification number, and calculate and pay the associated hazardous waste fees to the NMED Hazardous Waste Bureau for each facility. After calculating these volumes, the Wood Group reported previous quantities of generated waste and paid current and past hazardous waste-generation fees, bringing the facilities back into regulatory compliance. Prepared stormwater pollution protection plans (SWPPPs) for each facility and provided ongoing support with stormwater issues. Due to facility operator transfer and the closing of the two of the facilities, worked with INTERA staff in 2017 and 2018 to update the SWPPP and file Notice of Termination of discharge and NOI to discharge for the new ownership group (Ethos Energy).

Reclamation of the San Vicente Mill Site, New Mexico Environment Department, Silver City, NM. 2013 – 2016. *Project Manager.* Led environmental investigation and remediation/reclamation activities to address an above-grade tailings pile, resulting from former milling and smelting operations for lead, silver, copper, and gold that operated from the 1880s to the 1940s. The tailings pile contained metals (e.g., arsenic and lead) at levels exceeding established human health standards. Water quality had been impacted by the erosion of the tailings pile and the subsequent transport of contaminated material to an adjacent creek. Groundwater also contains elevated concentrations of metals. Project activities included negotiating access

agreements, as portions of the site were on private property; determining the extent of tailings and contaminated soils on-site and offsite; organizing and holding a community meeting to inform property owners as well as Town of Silver City representatives and citizens of potential community impacts; providing contractor oversight for removal of contaminated materials (approximately 50,000 cubic yards); transporting and disposing of contaminated materials at a nearby operational mine site; restoring disturbed areas with placement of soil cover; and reseeding with a native seed mixture. Implemented a reclamation approach that included performing additional characterization efforts while removal of the main tailings area material was being conducted. The single mobilization resulted in cost savings and a project that was completed ahead of schedule. Responsible for developing the Final Removal Assessment Report which documented the quantity of tailings removed and the restoration activities including clean fill placement, grading, and institution of property engineering controls.

Environmental Site Assessments, Los Alamos County, NM. 2005 – 2016. *Contract Manager and Project Manager.* Served as Contract Manager for Los Alamos On-Call Services contract. Investigated and characterized the environmental conditions at several Los Alamos County and Los Alamos School District properties. These properties were formerly operated by Los Alamos National Laboratory. Currently managing this work, which includes Phase I and Phase II ESAs, asbestos and lead-based paint surveys, archaeological investigations, archaeological stabilization activities, surface water sampling, and other general environmental consulting activities. Special projects have included a hazardous materials survey at the Los Alamos County Golf Course, an Environmental Assessment (EA) of the Los Alamos County Canyon Dam site, and a NMED VRP application for the Los Alamos County Trinity Redevelopment site.

Designed and constructed a stormwater detention pond engineering controls at the Trinity Redevelopment site in 2012. The pond was constructed as a solution to an NMED action that required the county to control stormwater runoff into the canyon to the south of the site. Managed the project that included engineering design, construction, and reporting to NMED. Following the construction of the drainage improvement, Los Alamos County began redeveloping the site with a shopping center to include a grocery store, small businesses, and restaurants.

Provided oversight of the removal of a historic OWS from the Trinity Redevelopment Site in 2013. The OWS was discovered during redevelopment construction activities. Secured a subcontractor and provided the county with expedited services during the OWS removal and subsequent sampling so that the construction activities scheduled for the site were not compromised.

Former Eubank Landfill Assessment of Remediation Alternatives, City of Albuquerque/New Mexico Environment Department, NM. 2003 – 2016. *Project Manager.* Led an effort on behalf of the COA and NMED to characterize the nature and extent of landfill gas contamination at the former Eubank Landfill (northeast fill area). Also worked at this site on behalf of Albuquerque Public Schools, an owner of an adjacent property; Bernalillo County, a stakeholder related to the Eubank Landfill; the U.S. Army Corps of Engineers; and the New Mexico State Land Office. The northeast fill area of the former COA Eubank Landfill was operated between 1963 and 1973 on property leased from the New Mexico State Land Office. The Eubank Landfill northeast fill area was unlined and covered approximately 21 acres, with a waste depth in the range of approximately 30 to 40 feet. Material placed at the Eubank Landfill was reported to be mainly residential and commercial waste.

Conducted an assessment of the former Eubank Landfill southwest fill area in 2011 for the proposed future development as a solar panel system field. Worked for a private solar development company along with the COA to evaluate this use of the site and how this use may be impacted by the potential migration of landfill gas. Also worked with INTERA engineers in the development of a final landfill gas management plan as well as a surface grading and drainage plan. In 2012, managed the project, which included additional grading plans for several types of solar panel designs selected for the site. This included the development of a Waste Excavation Plan (WEP). The WEP included the use of waste as fill material, the first of its kind in the State of New Mexico.

Developed an approach for Emcore Solar Power to install and operate a solar panel field at the surface of the former Eubank Landfill southwest fill area. This included LFG investigation activities as well as a geotechnical investigation conducted in order to develop recommendations for landfill gas control measures as well as geotechnical foundation of the solar panel trackers. This work included communicating with civil engineers, architects, electricians, and others to facilitate the successful project. The solar field is currently online and provides power to the Emcore manufacturing facility located

adjacent to the former landfill. Responsible for final reporting and periodic site inspections concerning the condition of the landfill surface.

Hyder Property Site Investigation, City of Albuquerque, NM. 2003 – 2016. *Project Manager.* Developed the investigation work plan at this Brownfield redevelopment property which was the site of a former dry-cleaning facility. The work plan included the execution of a geophysical survey as well as investigative digging to find historic underground solvent storage tanks. Investigative excavations were constructed at the Hyder property, and six USTs were discovered. Conducted a Phase II site investigation at the Hyder property, which included the collection of surface soil, subsurface soil, soil gas, and groundwater samples. Wrote the VRP Completion Report for this site; property received a Certificate of Completion from the NMED VRP. Worked with the site developer, YES Housing, to oversee excavation of soils to determine if contamination was present during construction in late 2014. Site redevelopment as the Imperial Building began in early 2015. Worked with the construction contractor to address environmental contamination (removal of petroleum-contaminated soils and two underground storage tanks) during building excavation and construction work. Submitted the VRCR for the site to NMED in December 2015. Assisted the site developer in securing a CNS from the NMED VRP in early 2016. The Imperial Building includes residential housing on the two upper floors and a community garden on the roof, with commercial spaces (including a grocery store) on the first floor. One level of parking is included in a subsurface parking lot located below the building. The Imperial Building officially opened in September 2016.

500 Copper Square Property Soil Vapor Investigation, First Financial, Albuquerque, NM. 2014 – 2015. *Project Manager.* Led efforts to determine presence of VOCs in site soil vapor. Collected sub-slab soil gas samples at locations within the building basement and compared analytical results to EPA's recommended commercial and residential vapor intrusion screening levels (VISLs) to determine whether VOC contaminants were impacting air quality in the building. Tetrachloroethene (PERC)—a dry cleaning solvent—was present in several of the soil vapor samples, but concentrations did not exceed applicable VISLs for PERC. Entered site into the state VRP in order to obtain a COC to document that current conditions meet applicable environmental quality standards and provide liability protection for lenders. NMED issued at COC in 2015, and a CNS can be transferred to any lender or future owner of the property.

Former Sterling Manufactured Gas Plant Voluntary Cleanup Program Site, Centennial Mental Health Center, Sterling, CO. 2014 – 2015. *Senior Technical Advisor.* Assisted with additional site investigation activities within the VCP investigation and remediation activities at the former Sterling Manufactured Gas Plant site. This site was remediated through the Colorado Department of Public Health and the Environment (CDPHE) VCP for future development into a parking lot for use by the future landowner and neighboring facility, Centennial Mental Health Center. The initial site investigation and targeted brownfields assessment were completed by CDPHE and identified polyaromatic hydrocarbons (PAH) organics and metals contamination above the regulatory limits in the site soils. Project tasks have included potholing of site soils to define further the extent of soil contamination, sampling of an upgradient groundwater monitoring well to determine if metals contamination can be attributed to an off-site source, determination of the most cost-effective method to sample near and around a transformer on site, and completion of the work plan, cost estimate, and health and safety plan for the excavation of site contaminated soils. To accommodate funding schedules, the remediation activities, which consisted of excavation, hauling, and off-site disposal of 814.5 cubic yards of soils contaminated with PAHs, were performed using a phased approach and were completed in 2015. A No Action Determination (NAD) was submitted and formal acceptance of the NAD by CDPHE was received in December 2015.

Characterization and Remediation of the Former Bell Trading Post Property, City of Albuquerque, NM. 2001 – 2005 and 2015. *Project Manager.* Developed a Work Plan to characterize this facility adequately for ultimate inclusion into the VRP. The Bell Trading Post building was formerly a jewelry manufacturing facility as well as a photograph development facility. Heavy metals and solvents were in use at this historic facility. The Work Plan included Geoprobe soil boring installations, subsurface soil sampling, and groundwater sample collection. In addition, on behalf of the COA, supervised a subcontractor conducting a limited asbestos survey at the Bell Trading Post facility building. Completed the VRP Application for this site and developed a VRP Work Plan for the remedial work, which included an integrated QAPP. The remediation consisted of contaminated soil removal as well as the remediation of asbestos and lead-based paint. This was the first Work Plan/QAPP developed for asbestos/lead-based paint remediation in EPA Region VI. Provided oversight of the remediation work and documented the progress on behalf of the COA and its developer, Family Housing Development Corporation. Remediation work completed included the cleaning of a substantial amount of pigeon droppings, asbestos and lead-based paint abatement, lead-in-soil removal, and the removal of all light ballasts from the building. Wrote the VRCR for this facility and

helped the COA obtain a Certificate of Completion from the NMED VRP. This facility was later renovated and developed with residential housing units and commercial office space. Lead a soil vapor intrusion assessment of the renovated building on behalf of the NMED in 2015.

Municipal Separate Storm Sewer System Audit and Application, Santa Fe County, NM. 2012 – 2013. *Project Manager.* Led efforts to assist the county in submitting a municipal separate storm sewer system (MS4) application to the EPA. Reviewed and evaluated documents regarding the history of the MS4 and the NOI Plan; prepared summary report for the county to document current status of the EPA requirements for the MS4 Plan and NOI and define options, deliverables, action items, and schedules/timelines; and helped the county resubmit the MS4 Application to EPA. By working cooperatively with both the county and EPA, helped avoid financial penalties for the county.

Phase I and Phase II Assessments, Northwest New Mexico Council of Governments, Gallup, NM. 2010 – 2013. *Contract Manager and Project Manager.* Contract Manager for Northwest New Mexico Council of Governments (NWNMCOG) On-Call Services contract. This contract was established by the NWNMCOG to evaluate potential Brownfields within the NWNMCOG area (Gallup, San Juan, and Cibola counties). Performed Phase I and Phase II Assessments for the NWNMCOG as part of this contract. Brownfield site characterization activities are the general focus of the contract for those sites located within the NWNMCOG area. Phase II activities conducted under this contract included hollow-stem and air rotary drilling, geophysical survey using electromagnetic (EM) and ground-penetrating radar (GPR) equipment, surface and subsurface soil sampling, groundwater sampling, and investigative excavations using a backhoe.

An example of a NWNMCOG project is the Coal & Puerco Site in Gallup, New Mexico. This site is proposed to be redeveloped with a live/work facility by Community Area Resource Enterprise 66. A dry-cleaning facility is located immediately north of the site. Led INTERA's efforts to investigate the redevelopment site and determine what remedial actions or engineering controls would need to be implemented at the site to although for safe and cost-effective redevelopment. INTERA conducted surface and subsurface soil sampling, soil vapor sampling, and groundwater sampling at the site. PERC was identified in site groundwater and soil vapor. Based on findings of the investigation, recommended that a vapor intrusion barrier be placed below the proposed site building to prevent impacted soil vapor from entering building indoor air. Additionally, worked with the NWNMCOG and NMED to investigate impacts to groundwater in the immediate area surrounding the site and determined that PERC was present in several off-site areas. INTERA is currently working with NMED and the responsible party to determine the vertical and lateral extent of the PCE groundwater plume and determine remedial options.

4407 Lomas Boulevard Site Investigation, Parnell Lomas, Albuquerque, NM. 2012. *Project Manager.* Led a Phase II Site Investigation at this site to determine if former operations as a gasoline service station had negatively impacted soil, soil vapor, or groundwater. The site included an office building and the client was trying to decide whether to purchase the property. After the investigation, it was determined that the site had not been negatively impacted by former operation as a gasoline service station, but that soil vapor was impacted with PCE, most likely from off-site historical dry cleaners. It was concluded that PCE could enter the current office building at levels above EPA screening levels. A proposal was prepared for a vapor mitigation system. Client decided not to purchase the property due to the cost of implementing the vapor mitigation system and associated ongoing monitoring.

Former Tulip Drive Landfill Phase I ESA and Phase II Site Investigation Activities, Luna County, Deming, NM. 2010 – 2012. *Project Manager.* Served as INTERA's Project Manager for the performance of a Phase II ESA performed at the 75-acre tract of land, including the Former Tulip Drive Landfill, located in Deming, Luna County, New Mexico. The Phase II ESA was performed for the county and city using funds provided by the EPA Brownfields Assessment Grant Program. Responsible for the development of a site-specific SAP, which guided field activities. The site was a vacant tract of land owned by the city located southeast of the intersection of New Mexico Highway 26 and U.S. Highway 180, along the Mimbres River. It was the city's and county's intent to redevelop the site as recreational open space; therefore, the objective of the Phase II ESA was twofold: (1) obtain additional information regarding the character of the former Tulip Landfill, such as cover thickness, depths and types of waste, and the extent of the former Tulip Landfill area, and (2) determine if soil and/or groundwater impacts exist from the recognized environmental concerns identified as part of the Phase I ESA completed by INTERA in 2011. INTERA conducted the following Phase II ESA field activities in 2012: (1) investigative excavation of 15 test pits located within the footprint of the former Tulip Drive Landfill, (2) hollow-stem auger (HSA) drilling and sampling of eight shallow exploratory soil borings, (3) HSA drilling and sampling of three deep soil borings, (4) installation and development of three

groundwater monitoring wells (within the deep soil borings), and (5) a single groundwater sampling event. Due to only minimal exceedances of applicable standards in site soil and no exceedances in site groundwater, recommended proceeding with site development upon completion of the following additional remediation/characterization activities:

- Consolidation of the numerous surface litter and debris piles scattered through the vacant lot to within the confines of the former Tulip Drive Landfill
- Preparation of preliminary design and installation of an evapotranspirative cap over the consolidation area to (a) minimize exposure to potentially harmful waste and (b) stabilize waste to deter further offsite transport of site contaminants via surficial processes (i.e., storm water, wind)
- Provision of bank stabilization and erosion control of property land located along the Mimbres River to mitigate the negative effects of progressive undercutting by seasonal surficial processes and help minimize future transport of site contaminants off-site
- Securing the site to prevent future indiscriminate dumping
- Installation of at least one additional ground water monitoring well in the northeast corner of the site to confirm groundwater remained unimpacted by the presence of the landfill
- Completion of one or more additional groundwater sampling events to further assess and monitor groundwater site conditions
- Completion of all additional site remediation/characterization efforts through participation in the NMED VRP.

Hotel La Posada de Albuquerque Redevelopment, City of Albuquerque, NM. 2007 – 2011. *Project Manager.* Developed a QAPP and asbestos specifications for the removal of asbestos from the Hotel La Posada de Albuquerque. Also developed an EE/CA that evaluated the remediation options for the renovation of this historic hotel. Significant quantities of asbestos and lead-based paint were present within La Posada. The EE/CA was used to support the use of the COA Brownfields Cleanup Revolving Loan Fund for a portion of the remediation. Through the EE/CA report, documented the alternative selection process for a non-time-critical removal action that was completed in accordance with 40 CFR 300.415 of the National Oil and Hazardous Substances Pollution Contingency Plan. The Hotel La Posada de Albuquerque was successfully remediated, renovated, and reopened as the Andaluz Hotel in October 2009. Prepared a self-certification document in 2011 that was submitted to the EPA for the voluntary remediation conducted at this building. Site was renamed the "Hotel Andaluz."

Casa Grande Property/El Vado Hotel Phase I Environmental Site Assessment, and Phase II Site Investigation, City of Albuquerque, NM. 2009 – 2010. *Project Manager.* Led an environmental evaluation of the Casa Grande Property on behalf of the COA. The COA proposed redeveloping the Casa Grande Property/El Vado Hotel located at 2500 Central Avenue with mixed use development (residential/commercial) and contracted INTERA to perform a National Environmental Policy Act (NEPA) Environmental Assessment, a Phase I ESA, and a Phase II Site Investigation at the site. The Phase I ESA and Phase II Site Investigation were performed with support from other key INTERA staff members. The Phase I ESA identified a historical property use (gasoline pumps at the El Vado Hotel) and a historic gasoline release at the Casa Grande Chevron located across the street as potential recognized environmental conditions and recommended subsurface soil borings as well as a geophysical investigation be completed at the property. Eight subsurface soil borings were completed at the site in areas believed to have been potentially impacted by historical property and area uses. No impact from petroleum hydrocarbons in soils and/or groundwater was identified. In addition, the geophysical investigation, conducted by Sunbelt Geophysics, did not identify any evidence of abandoned USTs at the site.

Managed the completion of a NEPA Environmental Assessment at the site as prescribed by the lead federal agency, which in this case was the Department of Housing and Urban Development. The EA was completed with support from Parametrix (cultural and biological surveys). The ESA was required to release Community Development Block Grant funds for the property purchase and additional property redevelopment work.

New Mexico Rail Runner Site Assessments, Parsons Brinckerhoff Quade & Douglas, Santa Fe, NM. 2006 – 2009. *Project Manager.* INTERA was retained by Parsons Brinckerhoff Quade & Douglas (PB) in 2006 to perform ISAs for Phase 2 of the Mid-Region Council of Governments/ NMDOT Belen to Santa Fe New Mexico Rail Runner Express Commuter Rail Project. Performed an ISA for the existing BNSF railroad line from Bernalillo to Lamy, New Mexico, and an ISA for the proposed commuter rail line from La Bajada Hill to downtown Santa Fe, New Mexico. Acted as the designated INTERA Project Manager for each ISA

project. The ISA included the assessment of existing railroad lines and facilities (BNSF and Santa Fe Southern), as well as several miles of railroad tracks constructed on undeveloped ranch land to facilitate commuter rail service between Albuquerque and Santa Fe. Project management duties included developing and implementing the schedule for the records reviews, field reconnaissance, and report development. Led field activities for each ISA (the combined assessment length of the two ISA totals over 70 miles) and coordinated with the PB Project Manager, the NMDOT Environmental Geology Section representatives, and NMDOT legal counsel with the finals of each ISA Report. The New Mexico Rail Runner Express began operations in 2009.

Landfill Gas Assessment of Five Formerly City-Owned and/or Operated Landfills, New Mexico Environmental Health Department, Albuquerque, NM. 2003 – 2009. *Contract Manager and Project Manager.* Contract Manager for INTERA's COA landfill gas assessment project. Over 100 landfill gas monitoring wells have been installed to monitor landfill gas migration at five of the COA formerly owned and/or operated solid waste landfills under direction. Managed the landfill gas monitoring well installation and supervised landfill gas sample collection. Other duties conducted include contract budget tracking, future landfill gas monitoring well locating, and landfill gas sample results interpretation. Developed the current COA landfill gas well installation report format as well as the format used for the landfill gas monitoring reports. Also developed landfill management plans to guide development on and adjacent to the former Eubank and San Antonio landfills.

Former Peru Hill Mill Site Phase I Environmental Site Assessment and Phase II Site Investigation and Remediation, New Mexico Environment Department, Deming, NM. 2001 – 2008. *Project Manager.* Performed a Phase I ESA and Phase II Site Investigation of the former Peru Hill Mill mining mill facility in Deming, New Mexico. The Peru Hill Mill primarily processed zinc sulfide ore. Peru Mining Company, a subsidiary of Illinois Zinc Company, constructed the Peru Hill Mill and operated it from 1928 to 1967. Barite of America acquired the facility in 1979 and operated it intermittently until 1985, when the company filed for bankruptcy. Luna County acquired the property in 2001 and deeded it to the City of Deming. The major environmental concerns at the site were uncontained tailings in a 104-acre impoundment and redistributed tailings transported from the impoundment by wind erosion and surface water runoff. The tailings formed dunes around the impoundment that blanketed an area of approximately 161 acres. The total area of the tailings impoundment and redistributed tailings was approximately 265 acres.

Prior to initiating the site investigation, a Phase I ESA was completed at the site. Used the results of the Phase I efforts to complete a work plan and QAPP for the Phase II Site Investigation. Soil sampling results indicated lead, arsenic, and zinc concentrations in surficial soils were in excess of NMED soil screening levels (SSLs). Recommended that surficial soils containing metals concentrations above SSLs be placed within a site tailings impoundment area and that the tailings be capped with soil to prevent further migration by wind and/or water erosion. Secured an engineering firm to design the tailings impoundment cap and a soil consolidation plan. Prior to implementation, the City ultimately used the Phase I ESA report and the information in the site investigation report to submit a VRP application to NMED.

Excavation activities were completed by the City and the tailings were excavated and redistributed to the designated tailings impoundment area. Helped develop a confirmation soil sampling plan to assure that the tailings removal effort was successful. Directed Neptune and Company (subcontractor) in the development of a site-specific remedial action goal for arsenic at the site. Remediation efforts were completed according to plan at Peru Hill Mill and a VRP Completion Report was developed for this facility in 2008. The site received a Conditional Certificate of Completion from VRP in 2009.

Plaza Del Sol Property Site Investigation, City of Albuquerque, NM. 2001 – 2008. *Project Manager.* Led the investigation of this Brownfields redevelopment site, which was believed to be impacted by a historic petroleum hydrocarbon release in the local area. Investigation activities included the preparation of a Phase I ESA, installation of monitoring wells, and groundwater sample collection. Completed additional work at this site on behalf of the COA and private developers in 2008 and developed a VRP Completion Report for the site. The site received a Certificate of Completion from the NMED VRP in 2008 and has since been developed with residential housing.

City of Santa Fe Railyard (including Phillips Petroleum) Brownfields Investigation, City of Santa Fe/New Mexico Environment Department, NM. 2000 – 2008. *Project Manager.* Led several stages of work completed at the City of Santa Fe Railyard for either the City of Santa Fe or the NMED. The work included the development of a Phase I ESA for a 33-acre portion of the site, a preliminary evaluation of groundwater impacts, a subsurface soil clean-up of tar, and the development of a VRP Completion Report. The Phase I ESA focused on identifying more fully potential responsible parties so that the City could consider this information in its Brownfields redevelopment strategies. The City development plan was to redevelop the underutilized

railyard with a railyard park to include open space and trails, green space, and a farmer's market area. A VRP Application and Work Plan were developed by the City and the site was accepted into the VRP.

Construction at the site began in 2006, and tar was discovered in subsurface soils during archaeological excavation work being conducted at the site. Provided the planning and oversight of the removal of subsurface soil containing tar at the site in 2006 and 2007. Developed a report which was submitted to NMED documenting the tar removal activities completed on behalf of the City.

Performed a Phase I ESA at the Phillips Petroleum site, which is located within the Santa Fe Railyard. Completed a VRP application and developed a work plan to address petroleum hydrocarbon contamination in surface soils located at the Phillips Petroleum site. The work plan included additional groundwater monitoring, but no other work was recommended. The Phillips Petroleum site was incorporated into the Santa Fe Railyard Certificate of Completion once the VRP Completion Report was developed and submitted. After receiving a NMED VRP Certificate of Completion and Covenant Not to Sue, this site is now completely redeveloped.

Tender Loving Care Cleaners Phase I Environmental Site Assessment, New Mexico Department of Transportation, Belen, NM. 2006. *Project Manager.* Conducted a Phase I ESA at the former Tender Loving Care (TLC) Dry Cleaning facility located in Belen, New Mexico. Conducted the Phase I ESA to meet the assessment and EPA AAI requirements of the ASTM Standard E1527-05, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the reporting requirements of the NMDOT 1999 Hazardous Waste Assessment Handbook. The site operated as a dry cleaner under the name "Sunshine Cleaners" from 1987 to 1990 and as TLC Cleaners from approximately 1990 to 1997. NMED conducted a Phase II Site Investigation at the facility and determined that chlorinated solvent contamination was present in subsurface soils and groundwater. The Phase I ESA developed recommended additional sampling to delineate the extent of soil and groundwater contamination. NMDOT ultimately decided not to acquire the property for use as a New Mexico Rail Runner stop.

Former Hillcrest Hospital Facility Site Characterization, New Mexico Environment Department, Silver City, NM. 2004 – 2006. *Project Manager.* Managed the characterization of an abandoned hospital building proposed to be redeveloped as a library. The site characterization included the evaluation of the building for the presence of asbestos and lead-based paint. Additional work included the characterization of site soils for asbestos contamination as well as excavations completed to find an abandoned petroleum storage tank. Developed the QAPP to guide sampling to adequately characterize the facility. Prepared the integrated work plan for the remedial efforts and assisted the Town of Silver City in the selection of a remediation contractor. Managed the remediation work which included asbestos and lead-based paint abatement, as well as a clean-up for pigeon droppings. After successful remediation, the building was demolished and the site was considered ready for redevelopment.

Proposed Rio Grande Silvery Minnow Sanctuary, U.S. Department of Interior - Bureau of Reclamation, Albuquerque, NM. 2005. *Project Manager.* Served as the project manager for a Phase II site investigation evaluating a proposed site for use as a minnow sanctuary. Developed the work plan and provided oversight for the field work consisting of soil, subsurface soil, surface water, and groundwater sampling. Performed an additional site investigation using biological testing of fish to further evaluate the site for suitability as a minnow sanctuary. The site was ultimately selected by the Bureau of Reclamation for the location of the Rio Grande Silvery Minnow Sanctuary.

Phase II Site Investigation and Soil Remediation Activities at Former Araho Well Injection Disposal Facility, New Mexico Oil Conservation Division, Lovington, NM. 2003 – 2005. *Project Manager.* Managed a Phase II site investigation and subsequent soil remediation activities at a former well injection facility. Evaluated the site for the presence of petroleum hydrocarbons and chloride content in soil and then developed a work plan for remediation. Supervised the soil remediation efforts including soil excavation, transportation, and disposal and the subsequent placement of clean fill. Assisted engineers in the development of a cap for the site and provided oversight for the cap construction.

Former San Antonio Landfill Phase II Site Investigation, City of Albuquerque, NM. 2002 – 2003. *Project Manager.* Led a geophysical investigation at the former San Antonio Landfill on behalf of the COA and NMED to determine the volume of waste and thickness of cover at the site. The landfill consisted of approximately 42.5 acres in northeast Albuquerque in an area that was once on the outskirts of town but later became a residential and commercial area. Owned partially by the COA and partially by private landowners, the landfill reportedly accepted municipal waste from 1968 until 1970, at which time it was

capped and informally closed. Data from the geophysical survey provided enough evidence to conclude that the depth of soil cover across the San Antonio Landfill ranged from 2 to 6 feet. Based on the geophysical evidence of the thickness of the soil cover, it was determined it was very unlikely that landfill-related waste was present in surface soils at the site. The results of this investigation were subsequently used several times to help the COA guide development work on and near the former landfill.

Voluntary Remediation Program Assistance (Brownfields Awareness), New Mexico Environment Department, Santa Fe, NM. 2002. *Project Manager.* Managed a NMED project to increase awareness of the number of brownfields sites within New Mexico and the funding assistance available to New Mexico municipalities for brownfields site investigation and remediation. Project included extensive file review, database management, and coordination of a conference for public and private sector representatives. Consistent interaction with the VRP manager and VRP staff was essential to complete this task.

Historic Waterworks Property Site Investigation, New Mexico Environment Department, Silver City, NM. 2002. *Project Manager.* Led investigation to characterize site for inclusion in the state VRP. Site characterization activities included surface soil sampling, soil boring installation, subsurface soil sampling, and groundwater sample collection. In addition, asbestos and lead-based paint sampling were conducted in the historic building located on the site. Site characterization activities required interaction with NMED and the State Historic Preservation Officer.

Old Silver City Landfill Site Investigation, Town of Silver City, NM. 2000 – 2002. *Project Manager.* Led a Phase II Site Investigation of the closed municipal waste landfill known as the Old Silver City Landfill on behalf of the Town of Silver City and the NMED in 2000. The landfill operated from 1968 to 1993 and was historically used by the Town of Silver City and Grant County residents and businesses. The landfill was unlined and placed over arroyos and suspected to be serving as a source for methane gas and groundwater contaminants. Performed an evaluation of potential sources for chlorinated solvents in the vicinity of the landfill that might have been related to groundwater contamination in the area. This task was completed by collecting surface soil samples at an onsite machine shop; subsequent analysis of these samples showed the machine shop was not a source of the contamination.

In addition, the Town of Silver City and NMED asked for an evaluation of viability of harnessing the methane gas from the landfill for energy purposes to be conducted. As a first stage of this work, performed a site reconnaissance of the landfill with landfill engineers, collected landfill gas samples, and reviewed all the available existing records on disposal history and methane gas detection. This information was used to estimate the landfill gas volume and methane concentration using industry-accepted methods. It was determined that there was not enough landfill gas available to provide a viable energy source.
