**Subject:** LANL Permit Hearings

Mr. Kieling:

I noticed the following schedule for the public hearings for the LANL permit. I noticed that there is only one meeting in Espanola and am wondering if there may be an opportunity for at least one other. I do not know the time frame for completing these forums, but our environmental science students are required to participate in community planning and outreach as part of our environmental science program. Is there any opportunity for a student run community meeting that can help NMED meet its objectives for garnering information from the community? My sense has been that those that have been held at Northern in the past have been over whelmed by activist groups and possibly we can affect a broader scope of community input with student coordination. I must disclose that some of our students work at LANL, but they are also members of their community. If there is a potential for something that could be meaningful in the Espanola valley, please let me know. Thank you.

-Camilla
