Subject: RE: Request for an Extension of Time - S&R Septic

Good Afternoon Bill,

I have discussed the extension with Melanie and had a brief conversation with Michelle. We will provide a 15 day extension beyond the 15 day extension already provided previously. The new deadline for submission of the past monitoring requirements will be close of business (5:00 PM) October 25, 2018. This reflects the original due date of September 26th plus the 15 day extension requested by Loretta Rael on September 24, 2018.

This extension applies only to the monitoring report submissions and leaves the following compliance dates the same as found in the NONC letter dated August 27, 2018.

- Photographic evidence that the correct signs have been installed due by October 26, 2018
- Photographic evidence that the concrete pads have been installed in all cells due by November 25, 2018

I would like to remind Mr. Rael that during our inspection we requested the manifests for all waste pumped and hauled by S & R Septic on September 26, 27, 28 and 29, 2018.

Subject: RE: Request for an Extension of Time - S&R Septic

Hi Bill:

I will talk with Jason (and Melanie if she is around) and we will respond to your request when we are back in the office on Tuesday.

Best,
michelle

Subject: [EXT] Request for an Extension of Time - S&R Septic

Michelle:

This communication, submitted on behalf of S&R Septic, is to request a 30-day extension of time in which to submit to the Bureau past Monitoring report SDDS documentation for the S&R Septic facility. The Rael's are currently working diligently to locate and recover the needed data for 2017 & 2018 from a storage location. I believe that Loretta Rael has been in contact with Melanie on this task and the requirement (non-compliance letter of Aug 27) for past SDDS submissions has been revamped to require only 2017 and 2018 submittals. I will be out of town through Sunday, October 7 and I believe Melanie is on vacation leave next week as well. Therefore, in order for us to timely submit the documentation will require the additional time requested herein.

Thank you very much for your consideration of our request, and

Kindest regards,

Bill Mansker, Ph.D.
