SAN MATEO - EXHIBIT W

The image to the left corresponds to the preceding data-tagged image, which was reproduced in lower resolution. This photo depicts an area farther downstream from the alleged release location and is also corresponds to the second image depicted in Exhibit S taken during the kayak inspection on July 31, 2020. The sediment identified in this location consists of a light-tan, pudding-like mud that matches the sediments tested in core samples C2 and C3 using XRD/XRF analysis.
