Hi Renee,

This email serves as a summary of work completed at the Former Y Station in Clovis, NM for remediation system installation January 24-28, 2022.

The following tasks were accomplished:

- Excavated approximately 300ft of conveyance trench.
- Used a chipping hammer to remove a large rebar reinforced concrete obstruction under the storm water drainage channel running through the parking lot.
- Placed conveyance piping and electrical conduits in 270ft of open excavated trench.
- Backfilled and compacted 250ft of open trench where conveyance pipe and conduit has been placed. Trenches were topped with base course.
- Placed well vault for MW-16. Routed conduit and installed junction boxes in the vault.
- Saw cut asphalt for MW-12 conveyance trench.
- Cleaned worksite with skid steer sweeper attachment.

The following work is planned for this week:

- Complete trench excavation to MW-12 and BW-7R and continue North.
- Place conveyance piping and conduit in open trenches, complete inspections, and backfill open trenches.
- Complete well vault placement for MW-11.
- McNeil Electric to set the pullbox at the corner where the conveyance trench heads West.
- Prep for installation of SVE sump.

I have attached photos of work at the site, which include comments to assist in interpretation. Please let me know if you have any questions.

Regards,

Grace Herrmann, EI
