RE: Request for a public hearing to protest Permit #465, S&R open lagoon sewage discharge

In 2015, I built my house on Tune Drive. Water is supplied through a private well I drilled. I look forward to staying here forever. This was a grand effort for me and the culmination of a *once-in-a-lifetime* investment. An architect designed my house and it appeared in featured articles in Dwell Magazine and in NM Magazine, as well as on internet sites.

If sewage discharge in this disgusting, unnecessary septic lagoon is allowed to continue, the water we drink and the air we breathe here will be threatened. My security, investment, and quality of life dream will inevitably be lost by a contaminated ground water aquifer.

I am requesting a public hearing to protest the S&R septic lagoon in my neighborhood, and to protest the renewal of the discharge permit #465.

Sincerely,

Lois Rodin
