

SAN MATEO - EXHIBIT Y

SAN MATEO - EXHIBIT Y

May 27, 2020 :
Streambed
sedimentation, located
approximately 25-75
yards upstream of
Boring Operations Site,
matching the color and
characteristics of
observed and
documented runoff.

SAN MATEO - EXHIBIT Y

May 27, 2020: Left, dried riparian sedimentation, located approximately 25-75 yards upstream of Boring Operations Site, matching the color and characteristics of observed and documented runoff.

Right, upper riparian stream bank, approximately 25-75 yards upstream of Boring Operations Site, evidencing erosion and loss of soil matching the color and characteristics of documented runoff and downstream streambed sedimentation.
