Dear Mr. Knight,

The New Mexico Environment Department (NMED) hereby issues this approval of a modification to the June 2025 Resources Conservation and Recovery Act (RCRA) Hazardous Waste Permit (the Permit) issued to White Sands Missile Range (the Permittee). The modification consists of approval of Corrective Action Complete status for two SWMUs, based on permit modification request submitted by the Permittee on July 25, 2019. The status of the two SWMUs (86 & 87) has been changed from Corrective Action Required to Corrective Action Complete with Controls. The unit listings in Permit Attachment 8 have been moved from Permit Table 8-1 (SWMUs & AOCs Requiring Corrective Action) to a new Table 8-2-2 (SWMUs & AOCs Corrective Action Complete with Controls).

In accordance with 20.4.1.901 of the New Mexico Administrative Code (NMAC), NMED provided public notice and conducted a 60-day public comment period from January 30, 2026, through March 31, 2026. No comments were received during the public comment period.

The Permit, as modified, becomes effective thirty (30) days after the date of the approval of this Class 3 Permit Modification, and may be appealed under the provisions of 20.4.1.901.H NMAC and NMSA 1978, Section 74-4-14 of the Hazardous Waste Act.

The revised version of Permit Tables 8-1 and the new Table 8-2-2 are attached to this letter. Please update your copy of the Permit by replacing your tables with the revised tables. If, in the future, new information becomes available indicating a release of hazardous waste or
