Subject: SUPPORT LANL Hazardous Waster Permit Application

Sir

I support the Los Alamos National Laboratory hazardous waste permit application. LANL's work with US Service men and woman providing training in improvised explosive device detection and recognition is saving lives today. In addition, work with the Department of Homeland Security is critical to the defense of the nation. LANL must be able to dispose of high explosive waste in the safest and most environmentally friendly way. This is gas fired open burning of explosive residue.

Furthermore, transporting these waste or excess materials through my neighborhood and on the public roads raises other hazards that can easily be handled on the LANL property.

I SUPPORT THE LANL HAZARDOUS WASTE PERMIT APPLICATION FOR DISPOSAL OF EXPLOSIVE WASTE AND RESIDUE! I vote and will exercise my right and obligation.
