**Subject:** Lanl proposal

Dear Mr. Kieling, Please let it be known that the extreme insanity of storing waste as planned by a decision on Monday October 24, 2011 should be under the title "completely insane" Weapons of mass destruction, their manufacturing, and the byproducts that are discarded later, should be ceased all together. Otherwise, the entire world is in utmost danger of annihilation, let alone the ruining of our entire water table bed here in Northern New Mexico. Please consider our future generations, and also the fact the political power in the world will have shifted by 2030, and as a super power, we are more than armed against any other power, as it is now about ALL of people's safety and existence. Please take this into account, as it is PARAMOUNT that LANL starts to see the truth of its mission. Thank you, Claudene James, Santa Fe (20 miles away as the crow flies)
