**RE: WELL PLUGGING AND ABANDONMENT REPORT,  
RENTAL PROPERTY SITE, MURRAY ROAD,  
ALBUQUERQUE, NEW MEXICO**

Dear Mr. Reuter:

On December 5, 2006 Golder representatives provided oversight for the plugging and abandonment of the monitor wells MW-1, MW-2, MW-4 and vapor well VW-1 at the Rental Property Site located at 204 Murray Road, Albuquerque, New Mexico.

The wells were plugged and abandoned by removing the concrete pad and well vaults. The wells were then grouted to within one foot of the surface with bentonite/cement grout pumped through a tremmie pipe, followed by the removal of the top foot of casing. Finally, the remaining hole was filled with neat cement grout to the surface and soil placed on top. Attached is photographic documentation of the well abandonments.

If you have any questions please do not hesitate to call me at (505) 821-3043.

Sincerely,

**GOLDER ASSOCIATES INC.**
