

New Mexico Environment Department  
Utility Operator Certification Program

**SMALL WATER ADVANCED (SWA)**

**Operator Guidebook with Need to Know Criteria**

March 2026<sup>1</sup>

The New Mexico Environment Department (NMED) administers the Utility Operator Certification Program to implement and enforce the rules of 20.7.4 NMAC (New Mexico Administrative Code) pursuant to the Utility Operators Certification Act [Chapter 61, Article 33 NMSA 1978].

**Small Water Advanced (SWA)**

According to Subsection A of 20.7.4.12 NMAC, the Small Water Advanced (SWA) certification is required to operate the various types of treatment processes at public water supply systems as listed below.

Type of Treatment Process	Population Served				
	25 to 500	501 to 5,000	5,001 to 10,000	10,001 to 20,000	20,000+
Filtration (sand, gravity)	SWA	----	----	----	----
Coagulation, sedimentation, filtration	SWA	----	----	----	----
Chemical precipitation (Mn, Fe, softening)	SWA	----	----	----	----
Pressure filtration	SWA	----	----	----	----
Ion exchange (softening, defluoridation)	SWA	----	----	----	----
Arsenic removal	SWA	----	----	----	----
Radionuclide removal	SWA	----	----	----	----
Special, such as desalinization	SWA	----	----	----	----

According to Subsection A of 20.7.4.14 NMAC, an operator holding a Small Water Advanced certification is also certified to perform any activity or function or make any process control or system integrity decision which requires:

- ✓ Small Water (SW) certification.

<sup>1</sup> This Guidebook was reviewed by the New Mexico Utility Operators Certification Advisory Board in January and February 2026.

### Certification Eligibility

To be eligible to take the Small Water Advanced exam, an applicant must meet the following criteria. However, some criteria substitutions may be allowed as listed in the table provided on the next page. [References: 20.7.4.21 NMAC, and 20.7.4.22 NMAC]

- Submit a complete application through the NMED Utility Operator Certification Program online platform and pay the nonrefundable examination application fee.
- Be at least 18 years of age.
- Have a High School diploma or general equivalency diploma.
- Have a minimum of one year of experience\*.

“**Experience**” means actual work experience, full or part-time, as an operator in the fields of public water supply or public wastewater treatment; work experience in a related field may be accepted at the discretion of the NMED.

[Reference: Subsection K of 20.7.4.7 NMAC]

- Complete a minimum of ten (10) training credits covering the topics listed in the need-to-know criteria of this document.

SWA Eligibility Criteria		Allowable Substitutions as set forth in Subsection B of 20.7.4.22 NMAC
<b>Application</b>	Completed application	No substitutions.
<b>Fee</b>	Payment of examination application fee	No substitutions.
<b>Age</b>	Evidence of Age of Majority (18 years of age)	No substitutions.
<b>Education</b>	High School or general equivalency diploma	1. In no case shall the actual experience be less than one year for any level except as in Subparagraph (d) of Paragraph (2) listed below.  2. Education may be substituted for the basic requirements or used for training credits as follows. In no case may the same education serve both as a substitute for experience and as training credits except as provided in the following paragraphs.  a) One (1) year of additional experience may be substituted for the high school graduation or general equivalency diploma requirement. b) No more than one year (30 semester hours) of successfully completed college education in a non-related field may be substituted for any additional six months of the required experience. c) One year of an approved vocational school in the water and/or wastewater field may be substituted for only one additional year of the required experience. d) An associate's degree for a two-year program in an approved school in the water and/or wastewater field and six months of actual experience in that field (which may be accrued before, during, or after the school program) may be substituted for the requirements of any level up to and including level 2. e) Completion of at least three years of actual experience in the water and/or wastewater field plus high school diploma or equivalent, plus 15 semester hours of successfully completed college education directly related to the water or wastewater field may be substituted for any level up to and including level 3. f) A bachelor's degree for a major directly related to the water or wastewater field plus two years of actual experience in that field may be substituted for any level up to and including level 3.  3. Full time water and wastewater laboratory experience may be substituted for operator experience in a respective field at a rate of 25 percent of the actual experience held.
<b>Experience*</b>	One (1) year	
<b>Training</b>	Ten (10) hours of approved training credits	
<b>Exam</b>	Pass the SWA exam	No substitutions.

\* “Experience” definition provided on previous page (page 2 of this document)

A supplemental **SWA Application Scenarios Pamphlet** may be available from NMED to help explain allowable substitution pathways.

Renewal Training Credits

SWA operator certification must be renewed at three-year intervals. Certification renewal requires the holder obtain thirty (30) training credits for approved training during the three-year period preceding the date on which the renewal application is due. The thirty training credits must be in support of the SWA operator's job and must include at least ten (10) training credits for approved training specifically in the operations and maintenance of public water supply systems. NMED Utility Operator Certification Program approval of training credits will be based on alignment with the topics listed in the need-to-know criteria of this document.

Exam Content

NMED and a panel of subject-matter experts developed the **Small Water Advanced (SWA)** operator certification exam. The SWA certification exam consists of 75 multiple-choice questions that cover the 18 main content areas listed below. This need-to-know criteria document provides a breakdown of the topics and subtopics within each main content area. A list of suggested study references is provided at the end of this document. The minimum passing score on the SWA exam is 70% (53/75).

Main Content Areas		Number of Exam Questions
1	Chemical Stabilization	2
2	Coagulation & Flocculation	4
3	Cross-Connection Control	3
4	Disinfection	6
5	Distribution	7
6	Filtration	6
7	General	7
8	Ion Exchange Softening	2
9	Laboratory Procedures	2
10	Mechanical Systems	7
11	Pressure Filtration	3
12	Regulations	4
13	Safety	6
14	Sampling & Reporting	4
15	Sedimentation	2
16	Storage	3
17	Taste and Odor	3
18	Wells	4

Total: 75 questions on exam
