EXECUTIVE SUMMARY

The Deming/Luna County Transfer Station (DLCTS) is owned and operated by Universal Waste Systems, Inc. (UWS) through a purchase agreement between UWS and the City of Deming. The DLCTS is located at 5470 NM-549 SE, Deming, New Mexico. The DLCTS provides transfer and disposal of non-hazardous, municipal solid waste (MSW) and recyclables to residents and businesses located throughout the City of Deming, Luna County, and surrounding areas.

The original permit was approved October 15, 2001 with the City of Deming as the permittee. Operation of the DLCTS began in April 2010 and has been operated by the City of Deming until July 1, 2020, at which time the City of Deming entered into a purchase agreement and operational responsibility was assumed by UWS. The City of Deming completed the mid-term review for the DLCTS in 2013.

The DLCTS is operated under the current permit that is in the process of being transferred to UWS from the City of Deming. The permit requirements include the acceptance and transfer of the following:

- Municipal Solid Waste (MSW) collected by government, private haulers, and the public
- Source sorted single-stream recyclables collected by government, private haulers, and the public

Universal Waste Systems, Inc. is submitting this permit renewal application for continued operations of the DLCTS. The DLCTS currently processes residential, commercial, and construction and demolition solid wastes. Solid waste is then transported for disposal at the Butterfield Trail Regional Landfill (BTRL) located 14 miles west of Deming. Currently, DLCTS processes approximately 44 tons of solid waste per day, based on data collected from January 2020 through June 2020. The waste received at the DLCTS originates from the City of Deming, Luna County, and Columbus, New Mexico.

In addition to solid waste, the DLCTS also accepts source-separated single stream recyclables, which are collected and delivered to the DLCTS by government, private haulers, and the public. Recyclables are delivered to the Deming/Luna County Recycling Hub facility, located on the west side of the DLCTS property. Market values determine disposition of the recyclables.

The Deming/Luna County Transfer Station will continue to operate under the current permit until such time when the New Mexico Environment Department Secretary determines to issue, issue with conditions, or deny the permit renewal.

This permit renewal application consists of explanatory responses to the regulatory requirements in 20.9.2 to 20.9.10 NMAC, supported by fourteen attachments. The regulatory requirements that do not apply to this application are not included and are shown below.

20.9.2.9	20.9.2.11	20.9.2.14	20.9.3.9-14	20.9.3.27-37
20.9.4.9-11	20.9.4.13-17	20.9.5.9-10	20.9.5.12-14	20.9.6.9-11
20.9.8 (all)	20.9.9 (all)	20.9.10.11-12	20.9.10.14-19	20.9.10.21-22
