

Proposed 20.2.50 NMAC: Oil and Gas Sector – Ozone Precursor Pollutants
The GCA's Proposed Amendments to 20.2.50.112.B(2) NMAC

The GCA's Proposed Amendments to 20.2.50.112.B(2) NMAC:

20.2.50.112 GENERAL PROVISIONS:

B. Monitoring requirements:

(1) Sources subject to emission standards and monitoring (e.g. inspection, testing, parametric monitoring) requirements under this Part shall be inspected monthly to ensure proper maintenance and operation, unless a different schedule is specified in the Section applicable to that source type. If the equipment is shut down at the time of required periodic testing, monitoring, or inspection, the owner or operator shall not be required to restart the unit for the sole purpose of performing the testing, monitoring, or inspection, but shall note the shut down in the records kept for that equipment for that monitoring event.

(2) An owner or operator may submit for the department's review and approval an equally effective, enforceable, and equivalent alternative monitoring strategy. Such requests shall be made on an application form provided by the department. The department shall issue a letter approving or denying the requested alternative monitoring strategy within a reasonable time not more than 90 days after receipt of the request. An owner or operator shall comply with the default monitoring requirements required under the applicable Section and shall not operate under an alternative monitoring strategy until it has been approved by the department.
