

Proposed 20.2.50 NMAC: Oil and Gas Sector – Ozone Precursor Pollutants
The GCA's Proposed Amendments to 20.2.50.113.C(3) NMAC

The GCA's Proposed Amendments to 20.2.50.113.C(3) NMAC:

20.2.50.113 ENGINES AND TURBINES

C. Monitoring requirements:

(3) For equipment operated for 500 hours per year or more, compliance with the emission standards in Subsection B of 20.2.50.113 NMAC shall be demonstrated by performing an initial emissions test, followed by annual tests, for NO_x, CO, and non-methane non-ethane hydrocarbons (NMNEHC) using a portable analyzer or U.S. EPA reference method. For units with g/hp-hr emission standards, the engine load shall be calculated using the following equations:

* * *

(i) For emissions tests using a portable analyzer, the results of emissions testing demonstrating compliance with the emissions standards for CO may be used as a surrogate to demonstrate compliance with the emissions standards for NMNEHC.
