PUBLIC NOTICE

Groundwater Discharge Permit Applications Submitted to the Department for Review

June 26, 2026

Dear Interested Party,

The New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) hereby provides notice pursuant to 20.6.2.3108 NMAC that the following Groundwater Discharge Permit applications have been submitted to NMED for review. Provided the applicant has met applicable requirements, NMED will propose for approval a Discharge Permit containing limitations, monitoring requirements, and other conditions intended to protect groundwater quality for present and potential future use.

NMED will accept comments and statements of interest regarding the application and will create a facility specific mailing list for persons who wish to receive future notices. NMED is developing a Public Involvement Plan (PIP) to provide public participation opportunities and information that may be needed for the community to participate in the permitting process. The PIP will be posted online at <https://www.env.nm.gov/public-notices/> and placed at the NMED field office nearest to the proposed permitted activity. To learn more about a Discharge Permit and the permitting process or to be placed on a facility-specific mailing list, please contact the NMED Permit Contact at the telephone number or email address provided or address correspondence to the GWQB, PO Box 5469, Santa Fe, NM 87502-5469.

In the future, NMED will publish a second public notice providing a draft permit and will seek public comment on the draft. You will be able to add the comment period to your calendar simply through our Events Calendar located at <https://www.env.nm.gov/events-calendar/>.

If you are a non-English speaker, do not speak English well, or if you have a disability, you may contact the NMED Permit Contact to request assistance, an interpreter, or an auxiliary aid in order to learn more about a Discharge Permit or the permitting process, or to participate in activities associated with the permitting process. To the extent possible, NMED will arrange for requested interpretation services and accommodations or services for persons with disabilities. Telephone conversation assistance is available through Relay New Mexico at no charge for people who are deaf, hard of hearing, or have difficulty speaking on the phone, by calling 1-800-659-1779; TTY users: 1-800-659-8331; Spanish: 1-800-327-1857. Telephone interpretation assistance for persons that are a non-English speaker or do not speak English well is available at no charge when calling NMED.

NMED does not discriminate on the basis of race, color, national origin, disability, age or sex in the administration of its programs or activities, as required by applicable laws and regulations. NMED is

responsible for coordination of compliance efforts and receipt of inquiries concerning non-discrimination requirements implemented by 40 C.F.R. Parts 5 and 7, including Title VI of the Civil Rights Act of 1964, as amended; Section 504 of the Rehabilitation Act of 1973; the Age Discrimination Act of 1975, Title IX of the Education Amendments of 1972, and Section 13 of the Federal Water Pollution Control Act Amendments of 1972. If you have any questions about this notice or any of NMED's non-discrimination programs, policies or procedures, you may contact: Kate Cardenas, Non-Discrimination Coordinator, New Mexico Environment Department, 1190 St. Francis Dr., Suite N4050, P.O. Box 5469, Santa Fe, NM 87502, (505) 827-2855, nd.coordinator@env.nm.gov. If you believe that you have been discriminated against with respect to a NMED program or activity, you may contact the Non-Discrimination Coordinator identified above or visit our website at <https://www.env.nm.gov/general/environmental-justice-in-new-mexico/> to learn how and where to file a complaint of discrimination.

Enclosure: Groundwater Discharge Permit Applications Submitted for Review

Discharge Permit: DP-1206, Bear Canyon Recharge Project

- County: Bernalillo | Closest City: Albuquerque
- Applicant: Albuquerque Bernalillo County Water Utility Authority, Danielle Shurn, Compliance Division Manager, P.O. Box 568 Albuquerque, New Mexico 87103
- NMED Permit Contact: Jennifer Fullam, Water Reuse Team Leader, (505) 670-2496 or (505) 827-2900, jennifer.fullam@env.nm.gov or pps.general@env.nm.gov

Notice: DP-1206, Bear Canyon Recharge Project: Albuquerque Bernalillo County Water Utility Authority proposes to renew the Discharge Permit for the discharge of up to 5.6 million gallons per day of treated surface water to Bear Canyon Arroyo for aquifer recharge. Potential contaminants from this type of discharge include organic and inorganic compounds. The facility is located in projected Sections 8, 11, 13, 24, Township 11 North, Range 03 East and projected Section 31, Township 11 North, Range 04 East, Bernalillo County. Groundwater most likely to be affected is at a depth of approximately 150 to 450 feet and had a pre-discharge total dissolved solids concentration of 210 to 707 milligrams per liter.

Discharge Permit: DP-227, Corrales Farm Queso Facility

- County: Chaves | Closest City: Roswell
- Applicant: Mike Marley, PO Box 1658, Roswell, NM 88202
- NMED Permit Contact: Amanda Otieno, Water Resource Professional, Amanda.Otieno@env.nm.gov or acs.general@env.nm.gov, Telephone: 505-819-1219 or 505-827-2900.

Notice: DP-227, Corrales Farms Queso Facility: Mike Marley proposes to renew and modify the Discharge Permit for the discharge of up to 218,000 gallons per day of wastewater from the production area of a dairy facility. Potential contaminants from this type of discharge include nitrogen compounds. The facility and discharge locations are located at 6173 Corrales Rd approximately 5 miles direction of Roswell, in Section 36, Township 11 South, Range 24 East, Chaves County. Groundwater most likely to be affected is at a depth of approximately 32 feet and had a pre-discharge total dissolved solids concentration of 530 milligrams per liter.

Discharge Permit: DP-1131, Chisum Trail Dairy

- County: Chaves | Closest City: Dexter
- Applicant: Jeffrey Leggett, President, 5151 Beltline Rd. Suite 455, Dallas, TX 75254
- NMED Permit Contact: Aracely Tellez, Senior Water Resource Professional, Aracely.Tellez@env.nm.gov or acs.general@env.nm.gov, Telephone: 505-629-8864 or 505-827-2900.

Notice: DP-1131, Chisum Trail Dairy: Jeffrey Leggett proposes to renew the Discharge Permit for the discharge of up to 160,000 gallons per day of wastewater from the production area of a dairy facility. Potential contaminants from this type of discharge include nitrogen compounds. The facility and discharge locations are located at 6839 Old Chisum Trail, approximately 4 miles northwest of Dexter, in Sections 35, 36, Township 12 South, Range 25 East, Chaves County. Groundwater most likely to be affected is at a depth of approximately 45.90 feet and had a pre-discharge total dissolved solids concentration of 1600 milligrams per liter.

Discharge Permit: DP-1803, Select Milk Producers, Inc.

- County: Chaves | Closest City: Dexter
- Applicant: Jeffrey Leggett, President, 5151 Beltline Rd, Suite 455, Dallas, TX 75254
- NMED Permit Contact: Aracely Tellez, Senior Water Resource Professional, Aracely.Tellez@env.nm.gov or acs.general@env.nm.gov, Telephone: 505-629-8864 or 505-827-2900.

Notice: DP-1803, Select Milk Producers, Inc.: Jeffrey Leggett proposes to renew the Discharge Permit for the discharge of up to 300,000 gallons per day of wastewater from the production area of a dairy facility. Potential contaminants from this type of discharge include nitrogen compounds. The facility and discharge locations are located at 6843 Old Chisum Trail, approximately 4 miles northwest of Dexter, in Section 32, Township 11, 12 South, Range 25 South, Chaves County. Groundwater most likely to be affected is at a depth of approximately 45.27 feet and had a pre-discharge total dissolved solids concentration of 1600 milligrams per liter.

Discharge Permit: DP-261, Vermejo Park Ranch

- County: Colfax | Closest City: Raton
- Applicant: Vermejo Park Ranch, Gus Holm, General Manager, P.O. Drawer E, Raton, NM 87740
- NMED Permit Contact: Andrew Romero, Senior Water Resource Professional, AndrewC.Romero@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-660-8624 or 505-827-2900.

Notice: DP-261, Vermejo Park Ranch: Gus Holm, General Manager, proposes to renew the Discharge Permit for the discharge of up to 42,640 gallons per day of domestic wastewater to a treatment and disposal system and industrial wastewater to a disposal system. Potential contaminants from this type of discharge include nitrogen compounds, total dissolved solids, and metals. The facility is located at P.O. Drawer E, 1000 Vermejo Park Ranch Road, Raton, NM 87740, approximately 40 miles West of Raton, NM, in Sections 23, 25, 26, and 36, Township 31 North, Range 18 East, Colfax County. Groundwater most likely to be affected is at a depth of approximately 7 feet and had a pre-discharge total dissolved solids concentration of 240 to 1,400 milligrams per liter.

Discharge Permit: DP-1288, Sunwest Dairy

- County: Curry | Closest City: Clovis
- Applicant: Ron Schaap, 1069 Curry Road 21, Clovis, NM 88101
- NMED Permit Contact: Amanda Otieno, Water Resource Professional, Amanda.Otieno@env.nm.gov or acs.general@env.nm.gov, Telephone: 505-819-1219 or 505-827-2900.

Notice: DP-1288, Sunwest Dairy: Ron Schaap proposes to renew and modify the Discharge Permit for the discharge of up to 60,000 gallons per day of wastewater from the production area of a dairy facility. Potential contaminants from this type of discharge include nitrogen compounds. The facility and discharge locations are located at 671 CR 8 approximately 3 miles southeast of Clovis, in Section 26, Township 2 North, Range 36 East, Curry County. Groundwater most likely to be affected is at a depth of approximately 320 feet and had a pre-discharge total dissolved solids concentration of 490 milligrams per liter.

Discharge Permit: DP-1508, Southwest Cheese Company, LLC

- County: Curry | Closest City: Clovis
- Applicant: Cormac O'Kelly, 1141 Curry Road 4, Clovis New Mexico 88101
- NMED Permit Contact: Sarah F. Schnell, Senior Water Resource Professional,
Sarah.Schnell@env.nm.gov or acs.general@env.nm.gov, Telephone: 505-660-8368 or 505-827-2900.

Notice: DP- 1508, Southwest Cheese Company, LLC: Southwest Cheese proposes to renew and modify the Discharge Permit for the discharge of up to 2,714,000 gallons per day of combined cheese processing and reverse osmosis wastewater from the facility. Potential contaminants from this type of discharge include nitrogen compounds. The facility and discharge locations are located at 1141 Curry Road 4, Clovis NM 88102, approximately 5 miles South of Clovis, in Sections 12 and 13, Township 01 North, Range 35 East, and in Sections 7 and 18, Township 01 North, Range 36 East, Curry County. Groundwater most likely to be affected is at a depth of approximately 295 feet and had a pre-discharge total dissolved solids concentration of 400 milligrams per liter.

Discharge Permit: DP-830, Hillside Haven Mobile Home Park

- County: Grant | Closest City: Silver City
- Applicant: Hillside Haven Mobile Home Park, Joe Matyk, Owner, 11072 Highway 180 West, Silver City, NM 88061
- NMED Permit Contact: Mingcheng Ren, Small System Domestic Waste Team Lead,
Mingcheng.Ren@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-490-5287 or 505-827-2900.

Notice: DP-830, Hillside Haven Mobile Home Park: Joe Matyk proposes to renew the Discharge Permit for the discharge of up to 9,500 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 11072 US Highway 180 West, Silver City, NM 88061, in Sections 08 and 09, Township 18 South, Range 14 West, Grant County. Groundwater most likely to be affected is at a depth of approximately 100 feet and had a pre-discharge total dissolved solids concentration of 200 milligrams per liter.

Discharge Permit: DP-1341, Tyrone Mine

- County: Grant | Closest City: Silver City
- Applicant: Randy Ellison, PO Drawer 571, Tyrone, NM 88065
- NMED Permit Contact: Sean Madden, Water Resources Professional, sean.madden@env.nm.gov or mecs.general@env.nm.gov, Telephone: 505-487-6637 or 505-827-2900.

Notice: DP-1341, Freeport-McMoRan Tyrone Mine copper mine facility, Randy Ellison, General Manager proposes to renew and modify the existing Supplemental Discharge Permit for Closure of the Tyrone copper mine facility. DP-1341 authorizes control of the discharge of water contaminants from the facility into ground and surface water following closure of the mine units. The modification includes updating the Closure/Closeout Plan and cost estimate to account for projected changes to the mine configuration. Potential contaminants from this type of discharge include metals, sulfate, and total dissolved solids. The facility is located at South Highway 90 and Tyrone Mine Road, approximately 12 miles south of Silver City, in Sections 34 and 35, Township 17 South, Range 16 West, Sections 1, 2, 11, 12, 13, and 24, Township 18 South, Range 16 West, Sections 17, 18, 19, 20, 21, 28, 29, 30, 33, and 34, Township 18 South, Range 15 West, Sections 19, 20, 29, and 30, Township 19 South, Range 14 West, Sections 3, 4, 5, 8, 9, 10, 14, 15, 16, 17, 20, 21, 22, 23, 25, 26, 27, 28, 35 and 36, Township 19 South, Range 15 West, Grant County. Groundwater most likely to be affected is at a depth of approximately 0 to 300 feet and had a pre-discharge total dissolved solids concentration of 200-1,500 milligrams per liter.

Discharge Permit: DP-1474, Lordsburg Generating Station

- County: Hidalgo | Closest City: Lordsburg
- Applicant: Public Service Company of New Mexico, Seth Frederick, Environmental Manager, 414 Silver Avenue, SW, Albuquerque, NM 87102
- NMED Permit Contact: Marchell Schuman, Senior Water Resource Professional, Marchell.Schuman@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-795-3275 or 505-827-2900.

Notice: DP-1474, Lordsburg Generating Station: Public Service Company of New Mexico proposes to renew and modify the Discharge Permit for the discharge of up to 47,500 gallons per day of industrial wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include dissolved solids, metals, organic and inorganic compounds. The facility is located at #2 Power Plant Road, Lordsburg, in Sections 33 and 34, Township 22 South, Range 18 West, Hidalgo County. Groundwater most likely to be affected is at a depth of approximately 93.3 feet and had a pre-discharge total dissolved solids concentration of 988 milligrams per liter.

Discharge Permit: DP-884, Lea County Septic Tank Service LLC

- County: Lea | Closest City: Hobbs
- Applicant: Patricia Taylor, Owner, P.O. Box 703, Hobbs, NM 88240
- NMED Permit Contact: Andrew Romero, Senior Water Resource Professional,
AndrewC.Romero@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-660-8624 or 505-827-2900.

Notice: DP-884, Lea County Septic Tank Service LLC, Patricia Taylor proposes to renew and modify the Discharge Permit for the discharge of up to 96,500 gallons per month of domestic septage and grease trap/interceptor waste to a disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located approximately eight miles south of Hobbs, in Section 14, Township 20 South, Range 38 East, and Section 11, Townships 20 East and South, Range 38 East, Lea County. Groundwater most likely to be affected is at a depth of approximately 200 feet and had an unknown pre-discharge total dissolved solids concentration.

Discharge Permit: DP-1865, Southwest Wines

- County: Luna | Closest City: Deming
- Applicant: Brandon Young, CEO, 1325 De Baca Rd. SE
- NMED Permit Contact: Aracely Tellez, Senior Water Resource Professional,
Aracely.Tellez@env.nm.gov or acs.general@env.nm.gov, Telephone: 505-629-8864 or 505-827-2900.

Notice: DP-1865, Southwest Wines: Brandon Young proposes to renew the Discharge Permit for the discharge of up to 25,000 gallons per day of wastewater from the production area of a wine production facility. Potential contaminants from this type of discharge include nitrogen compounds. The facility and discharge locations are located at 1325 De Baca Rd SE, approximately 6 miles East of Deming, in Section 34, Township 23 South, Range 8 West, Luna County. Groundwater most likely to be affected is at a depth of approximately 114 feet and had a pre-discharge total dissolved solids concentration of 10,000 milligrams per liter.

Discharge Permit: DP-2004, Church Rock Section 8 In Situ Recovery (ISR) Project

- County: McKinley | Closest City: Church Rock
- Applicant: NuFuels Inc., Josh Leftwich, 1315 Nelson St, Unit 7, Lakewood, CO, 80215
- NMED Permit Contact: Corey Dimond, Senior Water Resources Professional, corey.dimond@env.nm.gov or mecs.general@env.nm.gov, Telephone: 505-795-4216 or 505-827-2900.

Notice: DP-2004, Church Rock Section 8 ISR Project: Nufuels Inc., a subsidiary of Laramide Resources Ltd., has applied for a new Discharge Permit to develop an in-situ uranium recovery (ISR) solution mining operation. The proposed discharge is up to 4,000 gallons per minute (gpm), or 5,760,000 gallons per day (gpd), of a lixiviant leaching solution from an injection/extraction system. The lixiviant leaching solution has been proposed as a mixture of groundwater fortified with oxygen, carbon dioxide, and/or sodium bicarbonate to aid in extracting uranium from the geologic formation known as the Westwater Canyon Member of the Morrison Formation. The facility is located approximately 7 miles north of Church Rock, NM along New Mexico State Road 566. The site is situated at approximately 35.62957 N latitude and 108.552026 W longitude, within the SE/4 of section 8, Township 16 North (T16N), Range 16 West (R16W). The operational components will be in both New Mexico and in the Navajo Nation Eastern Agency. The shallowest water-bearing unit at the site is the Dakota Formation, with groundwater encountered at an approximate depth of 227 feet below ground surface (bgs) at monitoring well CR-1. Total dissolved solids (TDS) concentrations in the Dakota Formation range from approximately 812 to 875 mg/L. The ore-bearing zone, known as the Westwater Canyon Member of the Morrison Formation, has TDS concentrations ranging from approximately 322 to 435 mg/L with groundwater encountered at an approximate depth of 214 feet bgs at monitoring well CR-6.

Discharge Permit: DP-667, Hide-A-Way South

- County: Roosevelt | Closest City: Portales
- Applicant: Robert Vander Dussen, 2709 Wilhite Rd, Clovis, NM 88210
- NMED Permit Contact: Amanda Otieno, Water Resource Professional, Amanda.Otieno@env.nm.gov or acs.general@env.nm.gov, Telephone: 505-819-1219 or 505-827-2900.

Notice: DP-667, Hide-A-Way South: Robert Vander Dussen proposes to renew and modify the Discharge Permit for the discharge of up to 20,000 gallons per day of wastewater from the production area of a dairy facility. Potential contaminants from this type of discharge include nitrogen compounds. The facility and discharge locations are located at 1551 South RR 10 approximately 5 miles southeast of Portales in Section 21 and 29, Township 2 South, Range 35 East, Roosevelt County. Groundwater most likely to be affected is at a depth of approximately 5 1–67 feet and had a pre-discharge total dissolved solids concentration of 850 milligrams per liter.

Discharge Permit: DP-887, City of Portales Wastewater Treatment Plant

- County: Roosevelt | Closest City: Portales
- Applicant: Pat Gallegos, Public Works Director, City of Portales, 1028 Community Way, Portales, NM 88130
- NMED Permit Contact: Haylea Nisbet, Acting Large System Domestic Waste Team Lead, Haylea.Nisbet@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-795-2831 or 505-827-2900.

Notice: DP-887, City of Portales Wastewater Treatment Plant: City of Portales proposes to renew the Discharge Permit for the discharge of up to 2.5 million gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 683 South Roosevelt Road Q 1/2, approximately 0.5 miles south of Portales, in Section 01, Township 02 South, Range 34 East, and Sections 17 and 18, Township 02 South, Range 35 East, Roosevelt County. Reuse areas are located in Sections 25, 26, 33, 34, 35, and 36, Township 01 South, Range 34 East, and Sections 1, 3, 4, and 12, Township 02 South, Range 34 East, Roosevelt County. Groundwater most likely to be affected is at a depth of approximately 87 feet and had a pre-discharge total dissolved solids concentration of 565 milligrams per liter.

Discharge Permit: DP-1983, Portales Meat Processing

- County: Roosevelt | Closest City: Portales
- Applicant: Kevin Lujan, President, 42707 US Highway 70, Portales, NM 88130
- NMED Permit Contact: Melanie Sandoval, Industrial Team Lead, Melanie.Sandoval2@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-660-7892 or 505-827-2900.

Notice: DP-1983, Portales Meat Processing: SPR Custom Processing Inc. proposes to renew and modify the Discharge Permit for the discharge of up to 2,000 gallons per day of meat processing wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 42707 U.S. Highway 70, Portales, in Section 17, Township 01 South, Range 35 East, Roosevelt County. Groundwater most likely to be affected is at a depth of approximately 118 feet and had a pre-discharge total dissolved solids concentration of 302 milligrams per liter.

Discharge Permit: DP-1467, Mariposa Water Reclamation Facility #5

- County: Sandoval | Closest City: Rio Rancho
- Applicant: City of Rio Rancho, Steve Gallegos, Director of Utilities, 3200 Civic Circle NE, Rio Rancho, New Mexico 87144
- NMED Permit Contact: Jennifer Fullam, Reuse Team Lead, Jennifer.Fullam@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-670-2496 or 505-827-2900.

Notice: DP-1467, Mariposa Water Reclamation Facility #5: City of Rio Rancho proposes to renew the Discharge Permit for the discharge of up to 667,000 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located in Section 7, Township 13 North, Range 03 East, Sandoval County. Groundwater most likely to be affected is at a depth of approximately 461 feet and had a pre-discharge total dissolved solids concentration of 494 milligrams per liter

Discharge Permit: DP-78, HIPICO Santa Fe

- County: Santa Fe | Closest City: Santa Fe
- Applicant: Grand Prix de Santa Fe, LLC., Brian K. Gonzales, P.O. Box 5353, Santa Fe, NM 87502
- NMED Permit Contact: Brad Jones, Senior Water Resource Professional, Brad.Jones@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-490-5283 or 505-827-2900.

Notice: DP-78, HIPICO Santa Fe: Grand Prix de Santa Fe, LLC proposes to renew the Discharge Permit for the discharge of up to 400,000 gallons per day of reclaimed domestic wastewater to re-use areas and a domestic wastewater treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 100 South Polo Drive, Santa Fe, approximately 2 miles south of Santa Fe, in projected Section 17, Township 16 North, Range 08 East, Santa Fe County. Groundwater most likely to be affected is at a depth of approximately 40 feet and had a pre-discharge total dissolved solids concentration of 241 milligrams per liter.

Discharge Permit: DP-1592, Vistas de Sangre Wastewater Treatment Facility

- County: Santa Fe | Closest City: Santa Fe
- Applicant: Vistas de Sangre Subdivision HOA, Katharine Fishman, President, 1302 N. Riverside Dr., Española, NM 87532
- NMED Permit Contact: Haylea Nisbet, Acting Large System Domestic Waste Team Lead, Haylea.Nisbet@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-795-2831 or 505-827-2900.

Notice: DP-1592, Vistas de Sangre Wastewater Treatment Facility: Vistas de Sangre Subdivision HOA, Katharine Fishman proposes to renew the Discharge Permit for the discharge of up to 8,625 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at Caja del Oro Grant Road and NM State Road 599, approximately 0.8 miles northwest of Agua Fria, NM, in Section 31, Township 17 North, Range 09 East, Santa Fe County. Groundwater most likely to be affected is at a depth of approximately 101 feet and had a pre-discharge total dissolved solids concentration of 540 milligrams per liter.

Discharge Permit: DP-469, Village of Magdalena Wastewater Treatment Facility

- County: Socorro | Closest City: Magdalena
- Applicant: Village of Magdalena, Michael Thompson, Mayor, P.O. Box 145. Magdalena, NM 87825
- NMED Permit Contact: Andrew Romero, Senior Water Resource Professional, AndrewC.Romero@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-660-8624 or 505-827-2900.

Notice: DP-469, Village of Magdalena Wastewater Treatment Facility: Village of Magdalena proposes to renew the Discharge Permit for the discharge of up to 50,000 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 300 Spear Street, Magdalena, approximately 0.5 miles northeast of Magdalena, in Section 22, Township 02 South, Range 04 West, Socorro County. Groundwater most likely to be affected is at a depth of approximately 83 feet and had a pre-discharge total dissolved solids concentration of 528 milligrams per liter.

Discharge Permit: DP-510, New Mexico Firefighters Training Academy

- County: Socorro | Closest City: Socorro
- Applicant: Federico Hernandez, Bureau Chief, 600 Aspen Road, Socorro, NM 87801
- NMED Permit Contact: Samantha Peterson, Water Resource Professional,
Samantha.Peterson@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-490-5282 or 505-827-2900.

Notice: DP-510, New Mexico Firefighters Training Academy proposes to renew the Discharge Permit for the discharge of up to 150,000 gallons per day of industrial wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen and organic compounds. The facility is located at 600 Aspen Road, Socorro, in Section 11, Township 03 South, Range 01 West, Socorro County. Groundwater most likely to be affected is at a depth of approximately 182 feet and had a pre-discharge total dissolved solids concentration of 367 milligrams per liter.

Discharge Permit: DP-51, Quail Ridge Inn

- County: Taos | Closest City: Taos
- Applicant: Peter French, 2 La Espia Court, Santa Fe, New Mexico 87508
- NMED Permit Contact: Andrew Romero, Senior Water Resource Professional,
AndrewC.Romero@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-660-8624 or 505-827-2900.

Notice: DP-51, Quail Ridge Inn: Peter French proposes to renew and modify the Discharge Permit for the discharge of up to 80,000 gallons per day of domestic wastewater to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at 18 Comanche Road, El Prado, approximately 4 miles northwest of Taos, in projected Section 19, Township 26 North, Range 13 East, Taos County. Groundwater most likely to be affected is at a depth of approximately 40 feet and had a pre-discharge total dissolved solids concentration of 300 milligrams per liter.

Discharge Permit: DP-229, Town of Clayton Wastewater Treatment Plant

- County: Union | Closest City: Clayton
- Applicant: Ferron Lucero, Manager, Town of Clayton, 1 Chestnut Street, Clayton, NM 88415.
- NMED Permit Contact: Haylea Nisbet, Acting Large System Domestic Waste Team Lead, Haylea.Nisbet@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-795-2831 or 505-827-2900.

Notice: DP-229, Town of Clayton Wastewater Treatment Plant: Town of Clayton proposes to renew and modify the Discharge Permit for the discharge of up to 250,000 gallons per day of domestic wastewater and domestic sludge to a treatment and disposal system. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located at the intersection of Dorsey Road and Princeton Avenue, approximately 1 mile southeast of Clayton, in Sections 1 and 2, Township 25 North, Range 35 East, and Section 6, Township 25 North, Range 36 East, Union County. Groundwater most likely to be affected is at a depth of approximately 52.4 feet and had a pre-discharge total dissolved solids concentration of 362 milligrams per liter.

Discharge Permit: DP-746, Belen National Guard Readiness Center

- County: Valencia | Closest City: Belen
- Applicant: New Mexico Army National Guard, Catherine Hamilton, Environmental Scientist and Specialist II, 47 Bataan Boulevard, Building 10, Santa Fe, NM 87508
- NMED Permit Contact: Madison Buechter, Senior Water Resource Professional, Madison.Buechter@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-699-4293 or 505-827-2900.

Notice: DP-746, Belen National Guard Readiness Center: New Mexico Army National Guard proposes to renew the Discharge Permit for the discharge of up to 2,000 gallons per day of domestic wastewater and up to 5,180 gallons per year of industrial wastewater to treatment and disposal systems. Potential contaminants from this type of discharge include nitrogen compounds, total dissolved solids, and metals. The facility is located at 21 General Baca Road, Belen, Valencia County. Groundwater most likely to be affected is at a depth of approximately 40 feet and had a pre-discharge total dissolved solids concentration of 1,400 milligrams per liter.

Discharge Permit: DP-1534, A & A Pumping Service, Inc.

- County: Valencia | Closest City: Belen
- Applicant: Tony F. Padilla, Owner, 415 North 4th Street, Belen, NM 87002
- NMED Permit Contact: Melanie Sandoval, Industrial Team Lead, Melanie.Sandoval2@env.nm.gov or pps.general@env.nm.gov, Telephone: 505-660-7892 or 505-827-2900.

Notice: DP-1534, A & A Pumping Service, Inc.: Tony F. Padilla proposes to renew the Discharge Permit for the discharge of up to 10,000 gallons per day of domestic septage, domestic sludge, grease trap/interceptor waste, and vehicle/equipment grit trap wastewater to treatment and disposal systems. Potential contaminants from this type of discharge include nitrogen compounds. The facility is located one mile north of Alexander Airport off Greer Road, approximately five miles west of Belen, in Section 10, Township 05 North, Range 01 East, Valencia County. Groundwater most likely to be affected is at a depth of approximately 400 feet and had a pre-discharge total dissolved solids concentration of 350 milligrams per liter.
