Mr. Ray Montes
Mr. Chris Whitman
New Mexico Environment Department
Ground Water Quality Bureau
Remediation Oversight Section
1170 N. Solano, Ste. M
Las Cruces, NM 88001

Dear Mr. Montes and Whitman:

On behalf of Dona Ana Dairies, Inc., EA Engineering, Science, and Technology, Inc. is submitting this Quarterly Groundwater Monitoring Report for Dona Ana Dairies located in Mesquite, Vado and Anthony, New Mexico. The report discusses the quarterly groundwater sampling event conducted to fulfill requirements of the Stage 1 Abatement Plan for Dona Ana Dairies.

Please let me know if you have any questions regarding the information provided in this report.

Sincerely,

A handwritten signature in black ink that reads "Teri McMillan". The signature is fluid and cursive, with the first name being more prominent.

Teri McMillan
Project Manager

A handwritten signature in blue ink that reads "Jay Snyder". The signature is very fluid and cursive, with the first name being more prominent.

Jay Snyder

1.0 INTRODUCTION

On behalf of Dona Ana Dairies (Dairies), EA Engineering, Science, and Technology, Inc. (EA) has prepared this Quarterly Monitoring Report for Dona Ana Dairies located south of Las Cruces, New Mexico. The report was completed in accordance with the *Stage 1 and 2 Abatement Plan Proposal and Sampling and Analysis Plan, Dona Ana Dairies, Dona Ana County, New Mexico* dated December 11, 2006 and August 11, 2008, respectively and in addition a Conceptual Work Plan (CWP) dated February 1, 2008. All were prepared to satisfy requirements stated in the New Mexico Administrative Code (NMAC), Title 20, 6.2 §4106 through §4110. The Stage 1 and 2 Abatement Plan was approved on June 16, 2008 by the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB). The Sampling and Analysis Plan was approved by the NMED GWQB on September 25, 2008.

1.1 Objective

The objectives of this monitoring program is to satisfy the requirements set forth in NMAC 20.6.2 4106 C, Stage 1 Abatement Plan monitoring program.

The following work was performed to meet the objectives of the monitoring program, and included:

- On September 16, 2010, a representative from EA assisted D & H Petroleum and Environmental Services, Inc. (D & H) in locating and gauging all abatement plan (AP) monitoring wells and Mesquite Drain locations. The EA representative also helped D & H to locate some of the discharge plan (DP) monitoring well locations in addition to overseeing D & H's sampling and decontamination procedures.
- D & H continued to gauge water levels and collect groundwater samples from the ten (10) AP wells (DAD-01 through DAD-10) and each Dairy DP monitoring wells from September 16, 2010 through October 1, 2010. The samples collected were analyzed by TraceAnalysis Inc. for nitrate/nitrite and chloride using EPA Method 300.0, total dissolved solids (TDS) by Method SM 2540C, and total Kjeldhal nitrogen (TKN) by Method SM 4500 N org C;
- The most recent groundwater gauging and analytical results are compiled into this Quarterly Groundwater Monitoring Report.

1.2 Background

In April 7, 2006, correspondence, NMED required a Stage 1 Abatement Plan for 13 dairies in Dona Ana County, based on analytical results from DP monitoring of on-site compliance monitoring wells that showed concentrations of nitrate, chloride and TDS exceeding ground water standards promulgated in New Mexico Water Quality Control Commission (NMWQCC) Regulations (20 NMAC 6.2 §3103). On October 30, 2006, the Dairies notified NMED that they have reached agreement to work as a group and submit a joint response to NMED's request (Dona Ana Dairies, 2006).

On December 11, 2006, on behalf of the Dona Ana dairies, Golder Associates (Golder) submitted a Stage 1 and 2 Abatement Plan Proposal to address impacts to groundwater in the area of the Dairies (Golder 2006). The first major deliverable in the Abatement Plan Proposal was an Existing Data Report (EDR) to bring together in one document historical data and practices of the constituent dairies.

The EDR, submitted on February 1, 2008, (Golder 2008a) was intended to satisfy the Dairies commitment for compilation and submission of existing data identified in the Dona Ana Dairies response (2006) to the NMED requirement for Stage I Abatement Plans. Section 9 of the EDR outlined data gaps identified during the preparation of the report, as well as the actions recommended. To facilitate the discussion of the path forward after the submittal of the EDR and concurrent with the EDR submission, a conceptual work plan (CWP) (Golder 2008b).

On July 15, 2008, the Dairies, Golder and NMED met (Golder 2008c). During that meeting, plume maps presented in the EDR (Golder 2008a), new monitoring data, and knowledge of well locations and groundwater chemistry results at adjacent DP-regulated facilities were used to identify data gaps with respect to ground water flow direction and plume delineation. The agreed upon data gaps yielded well locations (including contingency locations) recorded in the meeting minutes (Golder 2008c) and depicted in the Sampling and Analysis Plan (SAP) dated August 8, 2008 (Golder 2008d). The SAP outlined the details of the field operations to be implemented for completion of data gaps, such that a Site Investigation Report (§4106.C.6) and Stage 2 Abatement Plan (§4106.D) could be prepared.

Groundwater gauging was conducted concurrent to discussions with NMED at the Dairies for four quarters, February 2008, June 2008, September 2008, and December 2008, to determine the current and historical site groundwater gradient.

In May 2009, field work was conducted as outlined in the SAP and ten (10) AP monitoring wells (DAD-01 through DAD-10) were installed. In July 2009, the Site Investigation Report was submitted to the NMED. Quarterly groundwater monitoring is currently being conducted.

2.0 GROUNDWATER MONITORING ACTIVITIES

Groundwater monitoring activities conducted by D & H included gauging and sampling all DP and AP monitoring wells. D & H also gauged the Mesquite Drain locations. Groundwater samples were analyzed for nitrate/nitrite, chloride, TDS, and TKN. The resulting data from this groundwater monitoring event are compiled and presented herein.

2.1 Well Gauging

On September 14 through September 17, 2010, representatives from D& H and EA, gauged the DP and AP monitoring wells, and drain locations at the Dairies and Anthony Waste Water Treatment Plant with an electronic water level indicator. Tables 1 and 2 provide a summary of the groundwater gauging data collected from the monitoring network. Potentiometric surface maps were constructed based on the September 2010 gauging data (Figures 2, 3, 4, and 5).

2.2 Groundwater Sampling

On September 16 and 17, 2010, D & H sampled monitoring wells DAD-01 through DAD-10 with disposable bailers. Wells were sampled from clean to dirty to the extent possible to minimize cross-contamination. All non-dedicated or disposable equipment was decontaminated between wells with an Alconox™ solution to further ensure sample quality. The DP wells were sampled between September 17, 2010 and October 1, 2010. Prior to sampling, the DP wells were purged three well volumes by hand-bailing with a new disposable bailer per well. Likewise, monitoring wells were purged three well volumes prior to sample collection either by hand-bailing with a new disposable bailer or with a pump and new polyethylene tubing. Field parameters including specific conductance, pH, and temperature were monitored and recorded on all monitoring well sampling field forms. The meter was calibrated and/or checked standards in accordance with manufacturer's specifications prior to use. Purge water was ground discharged. Copies of the field forms are included in Appendix A.

All groundwater samples were collected immediately after purging. Sampling was either accomplished by carefully pouring groundwater from the bailer into the sample containers or by pumping groundwater through new polyethylene tubing into the sample container. Sample containers were provided by TraceAnalysis. Container size, type, sample preservatives, analytical methods, and holding times are specified in Table 3. All samples were preserved in accordance with method requirements, labeled, then immediately cooled to <6°C with ice and delivered under chain-of-custody to TraceAnalysis in El Paso, Texas. All analytical laboratory reports are provided in Appendix B.

3.0 GROUNDWATER MONITORING RESULTS

3.1 Hydraulic Gradient and Direction of Groundwater Flow

This quarter, groundwater was present beneath the site at depths from 9.26 to 127.38 feet below top of casing. Groundwater is encountered at shallower depths near the Mesquite Drain and at greater depths near I-10 where the topographic elevation increases.

Potentiometric surface maps were completed using the monitoring well gauging data for the northern, central, and southern portions of the Dairies and are provided as Figures 2, 3, 4, and 5. Hydrographs were completed for the monitoring well and drain network and are provided in Appendix C.

The groundwater flow direction throughout the northern, central portion and the southern regional aquifer of the Dairies was toward the east-southeast, whereas the gradient in the southern perched aquifer of the Dairies near Anthony, New Mexico flows south. The hydraulic gradient within the northern and central portions ranges from 0.5 to 1.0 feet per thousand (0.0005 to 0.001 foot per foot) and relatively flat, which is likely the result of local groundwater pumping in the Mesilla Valley. In the past, the regional aquifer groundwater flow direction has been generally south-southeast in the northern and central portions of the abatement plan area but increased groundwater pumping has resulted in a shift in the gradient. Groundwater flow direction in the perched aquifer at Del Oro Dairy is toward the south with a hydraulic gradient of approximately 2 feet per thousand and clearly differentiated from the regional aquifer (hydraulic gradient approximates 1.0 feet per thousand) for the southern portion of the abatement plan area (See hydrographs presented in Appendix C).

3.2 Groundwater Analytical Results

Groundwater analyte concentrations were below the NMWQCC standards for nitrate in all DAD monitoring wells, except DAD-09. Chloride and TDS concentrations continue to exceed their respective NMWQCC standards in all ten abatement wells, except DAD-09. The nitrate concentration in DAD-09 decreased from 59.2 mg/l to 22.6 mg/l compared to the last sampling event and is more in line with concentrations measured for this well in past monitoring events. Compared to the last three monitoring events, levels in well DAD-06 decreased to just below the NMWQCC standard for nitrate with a concentration of 9.20 mg/l. Chloride concentrations ranged from 204 mg/l (below the NMWQCC standard) in DAD-09 to 1,370 mg/l in DAD-03 with corresponding TDS values ranging from 1,070 mg/l in DAD-09 to 4,320 mg/l in DAD-03. The TDS concentration decreased nearly 20 % in nine of the ten DAD wells sampled this quarter compared to last quarter with a near 50 % decrease in wells DAD-08 and DAD-09. Table 4 summarizes the analytical laboratory results found in Appendix B for the AP monitoring wells. Nitrate and chloride concentration trends for select DAD wells are presented in Appendix D.

Discharge plan groundwater analytical results are summarized in Table 5. Groundwater samples were obtained within a two week period at the end of September, 2010. These data were combined with the analytical data collected from the ten AP monitoring wells and are plotted on Figures 7, 8, 9 and 10. Analytical laboratory reports are included in Appendix B. The following

discussions summarize the results by area at the Dairies.

Northern Portion

The downgradient extent of the nitrate plume within the northern portion is defined by well DAD-02 with a nitrate concentration of 3.44 mg/l. The upgradient well (northern land application well 86/340-1) had a nitrate concentration of 11.8 mg/l, which just exceeds the NMWQCC standard for nitrate. Whereas, the eastern cross-gradient wells at former D&J Dairy lagoon (42-10, 42-11, and 42-12) and DAD-01 have nitrate concentrations below the standard. The western delineating cross-gradient well Dominguez 624-04 had nitrate concentrations of 6.0 mg/l.

The chloride and TDS concentrations are above standards in all wells sampled within the northern portion, except Dominguez well 624-08 where the chloride concentration remains below the standard. As in past monitoring events, both chloride and TDS concentrations upgradient (in well 86/340-1) of the Dairies are above NMWQCC standards at 331 mg/l and 2,060 mg/l, respectively.

Central Portion

The dissolved phase nitrate plume within the central portion of the site remains defined. Nitrate concentrations decreased slightly in most of the wells except for Big Sky wells (DP 833) whereby nitrate concentrations increased compared to the previous monitoring event in June 2010.

Again, chloride and TDS concentrations are above standards in all wells within the central portion. The highest chloride and TDS concentrations were observed near the up-gradient well DAD-03 and in Buena Vista Dairy II well 74-03 with concentrations of 1,490 mg/l and 4,840 mg/l, respectively.

Southern Portion

Nitrate is present within both the regional and perched aquifers in the southern portion of the Dairies. Del Oro Dairy well 692-07 appears to have been completed and screened across both aquifers, which may explain the elevated nitrate concentrations in this well. Wells completed within the regional aquifer downgradient of Del Oro well 692-07 are below NMWQCC standards for nitrate with the exception of well 692-09 which has a nitrate concentration of 15.0 mg/l. In the shallow perched aquifer the nitrate plume is not defined downgradient (southwest). Nitrate concentrations were similar to the last monitoring event. The highest nitrate concentration was observed in the perched aquifer Del Oro well 692-01 with a concentration of 222 mg/l and similar to the last monitoring event.

Chloride and TDS concentrations are above NMWQCC standards in the southern portion. Upgradient well Del Oro 692-08 has a chloride concentration of 386 mg/l and a TDS concentration of 1,390 mg/l. The highest chloride and TDS concentrations are reported, as in the past, in the two perched aquifer wells 692-01 and 692-02.

4.0 CONCLUSION AND RECOMMENDATIONS

The groundwater monitoring event included the gauging of all DP and DAD wells and drain crossings, and sampling of ten DAD wells in addition to the DP wells. Based on the data collected the following conclusions and recommendations are presented:

- The depth to groundwater at the site ranges from 9.26 to 127.38 feet below the top of casing.
- The groundwater flow direction at the Dairies within the regional groundwater aquifer is east-southeast. The hydraulic gradient is low.
- The perched groundwater aquifer at Del Oro Dairy has a groundwater flow direction toward the south.
- Nitrate was below the NMWQCC standard in groundwater samples collected from all the AP DAD wells, except DAD-09. The nitrate concentration decreased substantially in DAD-09 and are more in line with previous measurements.
- Chloride and TDS were above NMWQCC standards in all monitoring wells except Dominguez well 624-08 for chloride.
- Chloride and TDS are above standards in wells upgradient of the northern, central, and southern portions at the Dairies. Chloride and TDS are regionally elevated above standards and not necessarily attributed to by the Dairies.
- The northern and central nitrate plumes appear to be well delineated with nitrate concentrations trending slightly downward.
- The southern portion (Del Oro Dairy) still requires definition to the south-southwest for the perched or water table aquifer.

For this monitoring event, the Dairies procured a new single sampling service and a single analytical laboratory for all AP and DP monitoring to ensure consistency for all groundwater sampling, laboratory methodology and reporting, and a common schedule for AP and DP monitoring. Fewer errors and/or suspect data were identified in both the laboratory data and gauging measurements made this monitoring period compared to the last monitoring event yet timely dissemination of the data and consistency in data deliverables was somewhat problematic this quarter.

Notes:

^a Horizontal control to NM State Plane Coordinates Central NAD83 Grid Coordinates (in feet)

^b Vertical Control to NAVD88 Datum in feet above mean sea level

^c Measured in feet below the top of casing at survey point on north side of well

^d Measured in feet

Wells were gauged on a different date by Magee and Associates Inc.

Wells were gauged on a different date by EnviroCompliance Inc.

Measured data were suspect and corrected to reflect appropriate trends in accordance with surrounding wells

**APPENDIX A
SAMPLING FIELD FORMS**

**ATTACHMENT E
MONITOR WELL SAMPLING FIELD FORM**

FLUID LEVEL DATA

Well ID Northern LAA Dairy
70-03 Date gauged 9/22/10

Site 70-03 Time gauged 11:20

Depth to PSH Feet Well diameter 4" Inches

Depth to water 51.42 Feet Height of fluid column 13.5 Feet

Total depth 64.92 Feet Volume in well 8.91 Gallons

(3 well volumes = 26.7 gallons)

GROUNDWATER SAMPLING DATA

Time/date purged 11:32 9/22/10 Purge Method Low Flow

Time	Purge Volume (gal)	Temp (°C)	SpC (µs/cm)	pH	ORP (mV)	DO (mg/L)
<u>11:32</u>	<u>10</u>	<u>27.3</u>	<u>11.47</u>	<u>7.60</u>	<u>25</u>	<u>9727</u>
	<u>20</u>	<u>25.6</u>	<u>17.54</u>	<u>7.40</u>	<u>51</u>	<u>9792</u>
	<u>30</u>	<u>26.1</u>	<u>17.51</u>	<u>7.35</u>	<u>29</u>	<u>9804</u>

Actual purge volume 30 gal. Field measurements stabilized within ± 10%?

Time/date sampled 11:50 9/22/10 Purged/sampled by Loft

Sample method Low Flow

Requested analyses THN - Cl - NO₃ - TDS

Comments/observations 55' tubing

Well Casing Volumes
2" diameter = 0.17 gal/ft, 4" diameter = 0.66 gal/ft, 5" diameter = 1.02 gal/ft, 6" diameter = 1.50 gal/ft

**ATTACHMENT E
MONITOR WELL SAMPLING FIELD FORM**

Northwestern LATA **FLUID LEVEL DATA**

Well ID ~~70-86-340-1~~ 70-86-340-1 Date gauged 9/22/10
 Site 70-86-340-1 Time gauged 12:10
 Depth to PSH Feet Well diameter 4" Inches
 Depth to water 41.84 Feet Height of fluid column 25.95 Feet
 Total depth 67.79 Feet Volume in well 17.12 Gallons

(3 well volumes = 51.38 gallons)

GROUNDWATER SAMPLING DATA

Time/date purged 12:22 9/22/10 Purge Method Low Flow

Time	Purge Volume (gal)	Temp (°C)	SpC (µs/cm)	pH	ORP (mV)	DO (mg/L)
<u>12:22</u>	<u>17</u>	<u>26.0</u>	<u>6444</u>	<u>7.64</u>	<u>29</u>	<u>5144</u>
	<u>34</u>	<u>26.5</u>	<u>6403</u>	<u>7.48</u>	<u>51</u>	<u>5140</u>
	<u>51</u>	<u>25.7</u>	<u>6400</u>	<u>7.55</u>	<u>32</u>	<u>5136</u>

Actual purge volume 51 gal. Field measurements stabilized within ± 10%?

Time/date sampled 12:45 9/22/10 Purged/sampled by RA

Sample method Low Flow

Requested analyses TDS - TAN - NO₃ - CL

Comments/observations 50' tubing

Well Casing Volumes
 2" diameter = 0.17 gal/ft, 4" diameter = 0.66 gal/ft, 5" diameter = 1.02 gal/ft, 6" diameter = 1.50 gal/ft

Analytical and Quality Control Report

Victor Ayala
 D & H Petroleum and Environmental
 1221 Tower Trail
 P. O. Box 17969
 El Paso, TX, 79907

Report Date: October 21, 2010

Work Order: 10092817

DP: 833
Project Location: 17800 Stern Dr., Mesquite, NM
Project Name: Big Sky Dairy
Project Number: 334256

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
246035	833-1	water	2010-09-23	16:30	2010-09-24
246036	833-2	water	2010-09-23	14:00	2010-09-24
246037	833-3	water	2010-09-23	10:35	2010-09-24
246038	833-4	water	2010-09-24	09:20	2010-09-24
246039	833-5	water	2010-09-24	08:27	2010-09-24
246040	833-6	water	2010-09-23	09:36	2010-09-24
246041	833-7	water	2010-09-24	09:21	2010-09-24
246042	833-8	water	2010-09-23	11:20	2010-09-24

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
246043	833-9	water	2010-09-24	12:20	2010-09-24
246044	833-10	water	2010-09-24	00:00	2010-09-24
246045	Lagoon	water	2010-09-24	10:30	2010-09-24

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 26 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Big Sky Dairy were received by TraceAnalysis, Inc. on 2010-09-24 and assigned to work order 10092817. Samples for work order 10092817 were received intact at a temperature of 3.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63896	2010-10-06 at 23:35	74477	2010-10-06 at 23:35
Chloride (IC)	E 300.0	63900	2010-10-07 at 18:21	74482	2010-10-07 at 18:21
Chloride (IC)	E 300.0	63901	2010-10-07 at 22:34	74483	2010-10-07 at 22:34
Nitrate and Nitrite as N	SM 4500-NO3 E	63990	2010-10-21 at 08:11	74592	2010-10-21 at 08:12
Nitrate and Nitrite as N	SM 4500-NO3 E	63991	2010-10-21 at 08:24	74593	2010-10-21 at 08:24

TDS	SM 2540C	63513	2010-09-30 at 12:33	74022	2010-09-30 at 12:33
TKN	SM 4500-NH3 B,C	63579	2010-10-05 at 13:12	74153	2010-10-06 at 14:02
TKN	SM 4500-NH3 B,C	63613	2010-10-06 at 10:23	74154	2010-10-06 at 14:15

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092817 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Analytical and Quality Control Report

Victor Ayala
D & H Petroleum and Environmental
1221 Tower Trail
P. O. Box 17969
El Paso, TX, 79907

Report Date: October 19, 2010

Work Order: 10092325

DP: 340
Project Location: 13520 Stern Drive, Mesquite, NM
Project Name: Bright Star Dairy
Project Number: 334250

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
245594	340-1	water	2010-09-21	13:50	2010-09-21
245595	340-2	water	2010-09-21	14:50	2010-09-21
245596	Lagoon	water	2010-09-21	15:10	2010-09-21

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 13 pages and shall not be reproduced except in its entirety, without written approval of

TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Bright Star Dairy were received by TraceAnalysis, Inc. on 2010-09-21 and assigned to work order 10092325. Samples for work order 10092325 were received intact at a temperature of 2.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63762	2010-10-05 at 04:30	74315	2010-10-05 at 04:30
Chloride (IC)	E 300.0	63893	2010-10-06 at 19:22	74473	2010-10-06 at 19:22
Nitrate and Nitrite as N	SM 4500-NO3 E	63582	2010-10-05 at 13:47	74104	2010-10-05 at 13:50
Nitrate and Nitrite as N	SM 4500-NO3 E	63605	2010-10-05 at 17:14	74119	2010-10-05 at 17:14
TDS	SM 2540C	63393	2010-09-24 at 11:34	73895	2010-09-24 at 11:34
TKN	SM 4500-NH3 B,C	63536	2010-10-04 at 09:42	74058	2010-10-04 at 09:43

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092325 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Analytical and Quality Control Report

Victor Ayala
D & H Petroleum and Environmental
1221 Tower Trail
P. O. Box 17969
El Paso, TX, 79907

Report Date: October 6, 2010

Work Order: 10092211

DP: 86
Project Location: 13290 Stern Drive, Mesquite, NM
Project Name: Buena Vista Dairy #1
Project Number: 334257

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
245368	86-1	water	2010-09-20	10:48	2010-09-20
245369	86-2	water	2010-09-20	12:20	2010-09-20

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 10 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Michael Abel

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Buena Vista Dairy #1 were received by TraceAnalysis, Inc. on 2010-09-20 and assigned to work order 10092211. Samples for work order 10092211 were received intact at a temperature of 1.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63625	2010-10-05 at 20:04	74145	2010-10-05 at 20:04
Nitrate and Nitrite as N	SM 4500-NO3 E	63318	2010-09-24 at 11:58	73805	2010-09-24 at 11:58
TDS	SM 2540C	63250	2010-09-21 at 16:41	73735	2010-09-21 at 16:41
TKN	SM 4500-NH3 B,C	63517	2010-10-01 at 14:33	74071	2010-10-04 at 11:20

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092211 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 13 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Buena Vista Dairy #2 were received by TraceAnalysis, Inc. on 2010-09-20 and assigned to work order 10092209. Samples for work order 10092209 were received intact without headspace and at a temperature of 1.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63625	2010-10-05 at 20:04	74145	2010-10-05 at 20:04
Nitrate and Nitrite as N	SM 4500-NO3 E	63318	2010-09-24 at 11:58	73805	2010-09-24 at 11:58
TDS	SM 2540C	63250	2010-09-21 at 16:41	73735	2010-09-21 at 16:41
TKN	SM 4500-NH3 B,C	63517	2010-10-01 at 14:33	74071	2010-10-04 at 11:20

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092209 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 20 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Dona Ana Dairies Consortium were received by TraceAnalysis, Inc. on 2010-09-17 and assigned to work order 10092103. Samples for work order 10092103 were received intact at a temperature of 1.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63620	2010-09-20 at 15:11	74139	2010-09-20 at 15:11
Chloride (IC)	E 300.0	63622	2010-09-20 at 19:41	74142	2010-09-20 at 19:41
Nitrate and Nitrite as N	SM 4500-NO3 E	63317	2010-09-24 at 11:30	73803	2010-09-24 at 11:30
TDS	SM 2540C	63218	2010-09-20 at 10:51	73701	2010-09-20 at 10:51
TKN	E 351.3	63516	2010-10-01 at 14:32	74046	2010-10-01 at 18:14

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092103 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Analytical and Quality Control Report

Victor Ayala
 D & H Petroleum and Environmental
 1221 Tower Trail
 P. O. Box 17969
 El Paso, TX, 79907

Report Date: October 21, 2010

Work Order: 10092712

DP: 126
Project Location: Del Norte Dairy, 12560 Stern Drive, Mesquite, NM
Project Name: Daybreak Dairy
Project Number: 334247

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
245892	126-4	water	2010-09-21	14:10	2010-09-23
245893	126-5	water	2010-09-21	14:45	2010-09-23
245894	126-7	water	2010-09-21	15:35	2010-09-23
245895	126-9	water	2010-09-22	08:00	2010-09-23
245896	126-12	water	2010-09-22	10:15	2010-09-23
245897	126-13	water	2010-09-22	08:50	2010-09-23
245898	Lagoon	water	2010-09-22	08:40	2010-09-23

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 15 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Daybreak Dairy were received by TraceAnalysis, Inc. on 2010-09-23 and assigned to work order 10092712. Samples for work order 10092712 were received intact at a temperature of 1.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63896	2010-10-06 at 23:35	74477	2010-10-06 at 23:35
Nitrate and Nitrite as N	SM 4500-NO3 E	63989	2010-10-21 at 08:00	74591	2010-10-21 at 08:00
TDS	SM 2540C	63465	2010-09-28 at 16:20	73969	2010-09-28 at 16:20
TKN	SM 4500-NH3 B,C	63578	2010-10-05 at 13:11	74150	2010-10-06 at 13:51

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092712 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Report Date: October 12, 2010

Work Order: 10092324

DP: 624
Project Location: 13950 Stern Dr., Mesquite, NM
Project Name: Dominguez Dairy #1
Project Number: 334244

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
245586	624-01	water	2010-09-21	09:16	2010-09-20
245587	624-02	water	2010-09-20	16:40	2010-09-20
245588	624-04	water	2010-09-21	10:10	2010-09-20
245589	624-05	water	2010-09-21	11:30	2010-09-20
245590	624-06	water	2010-09-21	08:20	2010-09-20
245591	624-07	water	2010-09-21	13:00	2010-09-20
245592	624-08	water	2010-09-21	12:05	2010-09-20
245593	Lagoon 624	water	2010-09-21	11:00	2010-09-20

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 20 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Dominguez Dairy #1 were received by TraceAnalysis, Inc. on 2010-09-20 and assigned to work order 10092324. Samples for work order 10092324 were received intact at a temperature of 2.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63625	2010-10-05 at 20:04	74145	2010-10-05 at 20:04
Chloride (IC)	E 300.0	63762	2010-10-05 at 04:30	74315	2010-10-05 at 04:30
Nitrate and Nitrite as N	SM 4500-NO3 E	63582	2010-10-05 at 13:47	74104	2010-10-05 at 13:50
TDS	SM 2540C	63325	2010-09-23 at 15:01	73816	2010-09-23 at 15:01
TDS	SM 2540C	63393	2010-09-24 at 11:34	73895	2010-09-24 at 11:34
TKN	SM 4500-NH3 B,C	63517	2010-10-01 at 14:33	74071	2010-10-04 at 11:20
TKN	SM 4500-NH3 B,C	63536	2010-10-04 at 09:42	74058	2010-10-04 at 09:43

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092324 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Analytical and Quality Control Report

Victor Ayala
D & H Petroleum and Environmental
1221 Tower Trail
P. O. Box 17969
El Paso, TX, 79907

Report Date: November 18, 2010

Work Order: 10100509

DP: 42
Project Location: 13600 Stern Drive, Mesquite, NM
Project Name: Dominguez Dairy #2
Project Number: 334245

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
246590	42-2	water	2010-10-01	11:25	2010-10-01
246591	42-3	water	2010-10-01	09:40	2010-10-01
246592	42-6	water	2010-10-01	10:55	2010-10-01
246593	42-7	water	2010-10-01	10:22	2010-10-01
246594	42-8	water	2010-10-01	11:47	2010-10-01
246595	42-9	water	2010-09-28	14:45	2010-10-01
246596	42-10	water	2010-10-01	08:55	2010-10-01
246597	42-11	water	2010-10-01	07:40	2010-10-01

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
246598	42-12	water	2010-10-01	08:20	2010-10-01
246599	42-13	water	2010-09-29	14:25	2010-10-01
246600	Lagoon 42	water	2010-10-01	07:50	2010-10-01

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 29 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Dominguez Dairy #2 were received by TraceAnalysis, Inc. on 2010-10-01 and assigned to work order 10100509. Samples for work order 10100509 were received intact at a temperature of 3.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63936	2010-10-12 at 20:57	74516	2010-10-12 at 20:57

TKN	SM 4500-NH3 B,C	63698	2010-10-08 at 12:10	74240	2010-10-08 at 12:11

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10100509 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

1221 Tower Trail
P. O. Box 17969
El Paso, TX, 79907

Report Date: November 18, 2010

Work Order: 10100511

DP: 692
Project Location: 1025 East O'Hara, Anthony, NM
Project Name: Del Oro Dairy
Project Number: 334255

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
246602	692-01	water	2010-10-01	12:55	2010-10-01
246603	692-04	water	2010-09-28	17:00	2010-10-01
246604	692-05	water	2010-10-01	15:15	2010-10-01
246605	692-06	water	2010-10-01	14:45	2010-10-01
246606	692-07	water	2010-10-01	14:10	2010-10-01
246607	692-08	water	2010-10-01	13:35	2010-10-01
246608	692-09	water	2010-10-01	15:50	2010-10-01
246609	Lagoon 692	water	2010-10-01	16:15	2010-10-01

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 22 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Del Oro Dairy were received by TraceAnalysis, Inc. on 2010-10-01 and assigned to work order 10100511. Samples for work order 10100511 were received intact at a temperature of 3.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63937	2010-10-15 at 18:23	74517	2010-10-15 at 18:23
Chloride (IC)	E 300.0	63938	2010-10-15 at 22:36	74518	2010-10-15 at 22:36
Nitrate and Nitrite as N	SM 4500-NO3 E	64256	2010-11-01 at 12:09	74905	2010-11-01 at 12:10
Nitrate and Nitrite as N	SM 4500-NO3 E	64257	2010-11-01 at 12:12	74906	2010-11-01 at 12:12

TKN	SM 4500-NH3 B,C	63698	2010-10-08 at 12:10	74240	2010-10-08 at 12:11
TKN	SM 4500-NH3 B,C	63728	2010-10-11 at 09:27	74285	2010-10-11 at 11:17

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10100511 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 24 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Gonzalez Dairy were received by TraceAnalysis, Inc. on 2010-09-21 and assigned to work order 10092326. Samples for work order 10092326 were received intact at a temperature of 5.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63762	2010-10-05 at 04:30	74315	2010-10-05 at 04:30

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092326 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Analytical and Quality Control Report

Victor Ayala
D & H Petroleum and Environmental
1221 Tower Trail
P. O. Box 17969
El Paso, TX, 79907

Report Date: October 21, 2010

Work Order: 10092713

DP: 70
Project Location: 13090 Stern Dr., Mesquite, NM
Project Name: Mountain View Dairy
Project Number: 334253

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
245919	70-01	water	2010-09-22	09:36	2010-09-23
245920	70-02	water	2010-09-22	10:53	2010-09-23
245921	Lagoon	water	2010-09-22	10:25	2010-09-23

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 12 pages and shall not be reproduced except in its entirety, without written approval of

TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Mountain View Dairy were received by TraceAnalysis, Inc. on 2010-09-23 and assigned to work order 10092713. Samples for work order 10092713 were received intact at a temperature of 4.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63893	2010-10-06 at 19:22	74473	2010-10-06 at 19:22
Nitrate and Nitrite as N	SM 4500-NO3 E	63990	2010-10-21 at 08:11	74592	2010-10-21 at 08:12
TDS	SM 2540C	63445	2010-09-27 at 14:28	73936	2010-09-27 at 14:28
TKN	SM 4500-NH3 B,C	63578	2010-10-05 at 13:11	74150	2010-10-06 at 13:51
TKN	SM 4500-NH3 B,C	63579	2010-10-05 at 13:12	74153	2010-10-06 at 14:02

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092713 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Analytical and Quality Control Report

Victor Ayala
 D & H Petroleum and Environmental
 1221 Tower Trail
 P. O. Box 17969
 El Paso, TX, 79907

Report Date: October 26, 2010

Work Order: 10092710

DP: 70
 Project Location: Mesquite, NM
 Project Name: Northern LAA
 Project Number: 334253

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
245881	70/3	water	2010-09-22	11:50	2010-09-23

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 9 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Michael Abel

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Northern LAA were received by TraceAnalysis, Inc. on 2010-09-23 and assigned to work order 10092710. Samples for work order 10092710 were received intact at a temperature of 4.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63893	2010-10-06 at 19:22	74473	2010-10-06 at 19:22
Nitrate and Nitrite as N	SM 4500-NO3 E	63989	2010-10-21 at 08:00	74591	2010-10-21 at 08:00
TDS	SM 2540C	63445	2010-09-27 at 14:28	73936	2010-09-27 at 14:28
TKN	SM 4500-NH3 B,C	63578	2010-10-05 at 13:11	74150	2010-10-06 at 13:51

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092710 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

246163	Lagoon-167	water	2010-09-27	11:15	2010-09-27

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 25 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Notes:

For inorganic analyses, the term MQL should actually read PQL.

Standard Flags

- U** - Not detected. The analyte is not detected above the SDL.
- J** - Estimated. The analyte is positively identified and the value is approximated between the SDL and MQL.
- B** - The sample contains less than ten times the concentration found in the method blank.
- JB** - The analyte is positively identified and the value is approximated between the SDL and MQL.
The sample contains less than ten times the concentration found in the method blank.
The result should be considered non-detect to the SDL.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Case Narrative

Samples for project River Valley Dairy, LLC were received by TraceAnalysis, Inc. on 2010-09-27 and assigned to work order 10092911. Samples for work order 10092911 were received intact at a temperature of 4.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092911 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

Analytical and Quality Control Report

Victor Ayala
D & H Petroleum and Environmental
1221 Tower Trail
P. O. Box 17969
El Paso, TX, 79907

Report Date: November 18, 2010

Work Order: 10092916

DP: 257
Project Location: 17900 Stern Drive, Mesquite, NM
Project Name: Sunset Dairy
Project Number: 334254

Enclosed are the Analytical Report and Quality Control Report for the following sample(s) submitted to TraceAnalysis, Inc.

Sample	Description	Matrix	Date Taken	Time Taken	Date Received
246164	257-01	water	2010-09-24	11:15	2010-09-27
246165	257-02	water	2010-09-24	10:38	2010-09-27
246166	257-03	water	2010-09-24	13:00	2010-09-27
246167	257-260-01	water	2010-09-24	12:10	2010-09-27
246168	Lagoon-257	water	2010-09-24	13:40	2010-09-27

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 17 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director
Dr. Michael Abel, Project Manager

Standard Flags

B - The sample contains less than ten times the concentration found in the method blank.

Case Narrative

Samples for project Sunset Dairy were received by TraceAnalysis, Inc. on 2010-09-27 and assigned to work order 10092916. Samples for work order 10092916 were received intact at a temperature of 4.0 C.

Samples were analyzed for the following tests using their respective methods.

Test	Method	Prep Batch	Prep Date	QC Batch	Analysis Date
Chloride (IC)	E 300.0	63932	2010-10-08 at 17:44	74512	2010-10-08 at 17:44
Chloride (IC)	E 300.0	63933	2010-10-08 at 21:57	74513	2010-10-08 at 21:57
Nitrate and Nitrite as N	SM 4500-NO3 E	64252	2010-11-01 at 11:59	74901	2010-11-01 at 11:59
Nitrate and Nitrite as N	SM 4500-NO3 E	64253	2010-11-01 at 12:02	74902	2010-11-01 at 12:02
TDS	SM 2540C	63511	2010-09-29 at 10:35	74021	2010-09-29 at 10:35
TDS	SM 2540C	63513	2010-09-30 at 12:33	74022	2010-09-30 at 12:33
TDS	SM 2540C	63623	2010-10-04 at 10:44	74143	2010-10-04 at 10:44
TKN	E 351.3	63655	2010-10-07 at 10:58	74188	2010-10-07 at 12:45

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring, however, it may not pertain to the samples for work order 10092916 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.
