Subject: A Comment about the LANL Open Detonation Permit Modification

I would like to submit the following comment to NMED regarding LANL's Open Detonation permit modification:

Name: Gary McMath
Address: 93 Joya Loop
City: Los Alamos (white rock)
Zipcode: 87544
Email: gmmcmath@msn.com
Phone:

Comment: I work with explosives and support the continued use of open detonation for disposal of HE. It is by far the safest method to performing this task for all involved. The workers here take great care to ensure people, animals, and the environment are protected during these operations. Any other option is less safe for everyone and everything.
