2. Within 120 days after the effective date of this discharge permit, the permittee shall submit to NMED for approval an estimate of leakage from the liner system at the TSF, together with an analysis of the effects such leakage would have on groundwater. If NMED determines that the effects to groundwater would be significant, it will notify the permittee, and the permittee shall prepare and submit to NMED for approval an assessment of a range of mitigation measures. The permittee shall prepare the assessment, and implement any mitigation measures, according to schedules approved by NMED.

[Renumber Paragraphs 2 through 5 as 3 through 6.]
