Subject: LANL hazardous waste permit

Sir,

I strongly support the Los Alamos National Laboratory (LANL) hazardous waste permit applicaton. LANL's work with US service men, women, as well as allied troops in providing training on recognizing homemade explosive threats and developing tools for detecting and defeating IED threats is saving lives. LANL's work with the Department of Homeland Security is critical to the defense of the nation. LANL must be able to dispose of explosive waste in the safest and most environmentally friendly way - which is open burning of explosive residues.

Because of the sensitivity of these materials, transporting these materials over public roads raises other hazards for the public which can be easily addressed on LANL property. I strongly support the LANL hazardous waste permit application for disposal of explosives waste and residue.

Thanks,

Becky Olinger
