We can already see the awful effects of climate change in New Mexico with hotter and more humid summers, plus higher danger of wild fires and subsequent flooding. We cannot afford to increase our risk of air	noreply@smartcor	noreply@smartcomment.co	SMTP	hart.katielouise@gmail.com	hart.katielouise@gmail.com	SMTP	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising temperatures, prolonged and severe droughts,	Mary Smith	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] My Pub	CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, The NMED has a leadership opportunity to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application contains the following flaws. * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest operating Bloom installation is a 40 MW facility -	Antoinette Sedillor	asedillolopez@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Yucca G	Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I do not want a data center in NM. I remember what ASARCO did to El Paso. If a data center can promise/prove that it will actually benefit the environment and leave no trace (not the same as buying credit like coal plants do), then the independent scientists should verify data center plans and assure the public it is safe. It is not safe in its current form at all. Permits should not be allowed in its current form.	noreply@smartcor	noreply@smartcomment.co	SMTP

Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Monica Duran	damselpaz@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising temperatures, prolonged and severe droughts,	Rebecca Kraimer	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am not against data centers BUT not at the expense of the health of our citizens. My late husband suffered terribly from asthma. My nephew died from parkinson's. There is@no quality of life without good air quality!! Don't sell us out! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands.	Marcia Gordon	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been	Leah Spatafore	noreply@adv.actionnetwork.	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please l	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, While the promoters of Project Jupiter promise jobs, infrastructure impovements, and a small carbon footprint, time and again, these promises have ended up being broken, unrealistic, or just false statements. In reality, Project Jupiter's jobs creation won't be nearly what its devlopers say. Data centers typically don't require the personnel that similarly sized facilities do. The infrastructure improvements will cost the community more, and the increased carbon footprint will only exacerbate the local, regional, and international effects of increased carbon emmisions. I ask the environment department to deny this project's application. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application

NO to project Jupiter. WE need that water they plan on wasting. AI is useless and wasteful and I'm beyond disappointed it's finding its way to my homeland and beyond disappointed in the corrupt people living in the borderland that are letting this happen. They only care about making a profit, hard to enjoy when you live in a wasteland. NO PROJECT JUPITER.

NMED Reviewer NMED Reviewer, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative	Sivan Gordon-Buxt	noreply@adv.actionnetwork. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Margaret Folks	annfolks@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The greedy billionaires that are going to make big money off these projects do not care about the rest of us or our resources. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:

At a time when climate disruptions are on the rise, including droughts and extreme weather events, what justification is there to allow such massive energy and water usage? Maybe these developers and technologists need to go back to the drawing board to create something that will not impose such severe harms on the	noreply@smartcor	noreply@smartcomment.co	SMTP	esilesky@gmail.com	esilesky@gmail.com	SMTP	Normal	Normal
[EXTERNAL] Yucca (	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am very concerned about the huge carbon footprint this project will make, too much pollution! Their proposed power source is untested. It's just another corporate attempt to take advantage of a poor, rural community. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands.	noreply@smartcor	noreply@smartcomment.co	SMTP	ash.informavore@gmail.com	ash.informavore@gmail.com	SMTP	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The residents of this area have been misled about this project. There are too many unknowns. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising	Juanita Stern	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

This system will cause many to suffer power surges, brown and blackouts and probably drive the cost of electric and water power to surge above reasonable and affordable levels. I disagree with this move.	noreply@smartcor	noreply@smartcomment.co	SMTP	christisonct@gmail.com	christisonct@gmail.com	SMTP	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been								
[EXTERNAL] My Pub	announced with much fanfare, the largest organization. Exercise caution prior to clicking on links or opening attachments. NMED Reviewer Julia Kuhn, We oppose this air pollution permit because it threatens the health of our communities and our environment while being presented as a clean energy solution. Yucca Growth Infrastructure's proposed microgrid would still rely on natural gas, producing millions of tons of greenhouse gas emissions each year along with harmful pollutants such as nitrogen oxides (NOx), carbon monoxide (CO), and volatile organic compounds (VOCs), which contribute to poor air quality and serious health risks. The proposal also includes Bloom Energy's solid oxide fuel cells, which generate hazardous solid waste despite claims that they are "green." We believe protecting clean air, clean water, and public health must come before expanding large data center infrastructure that increases pollution. We also oppose this permit because it would place an unfair environmental burden on the residents of Doña Ana County, a community that already experiences disproportionate levels of	L.L. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising temperatures, prolonged and severe droughts, increasingly frequent wildfires, deadly flash flooding, and decreasing freshwater availability to the livelihoods and futures of all who call this place home." For this reason, Gov. Lujan Grisham set a target to reduce the state's greenhouse-gas emissions 45% by 2030 compared to 2005 emissions. If this application were approved in its current form, there is no way	Tiana Rojas	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

NMED Reviewer Julia Kuhn, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising temperatures, prolonged and severe droughts,	Kuhn, Julia, ENV	/O=EXCHANGELABS/OU=EX	EX	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Good afternoon, My name is Dawn Martinez. There is a public comment on the NM Environmental Dept website that was submitted under my name and email address on June 23 in favor of the permit request for Project Jupiter. I did NOT submit this comment. Since it was submitted on my behalf without my consent, I demand that it be removed. I would like to receive a response confirming when this is done. Please let me know if you need any additional information from me. Thank you, Dawn	Dawn	dawnmartinez33@gmail.con	SMTP	Jones, Pamela, ENV;aqb-yucca-m	/o=ExchangeLabs/ou=Exchange	EX;EX;EX	Normal	Normal

Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been	Evangeline Chali C	evangelinechali12@gmail.co	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. Dear Air Quality Bureau, NMED, I submit this comment in strong opposition to Air Quality Construction Permit Applications 10732 (East Microgrid) and 10734 (West Microgrid) proposed by Acoma, LLC in southern Doña Ana County to power Project Jupiter. These applications are unlawfully and deceptively designed to evade public health protections and, if approved, would result in significant air pollution and destructive climate impacts that will harm all New Mexicans. NMED must reject both applications outright, and require Acoma LLC to submit a single, accurate permit that fully accounts for the Project's true pollution impacts because: 1. The Project Is a Single Pollution Source and Must Be Permitted as One	Gabrielle Aragon	droid.hazy-4d@icloud.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Dear Air Quality Bureau, NMED, I submit this comment in strong opposition to Air Quality Construction Permit Applications 10732 (East Microgrid) and 10734 (West Microgrid) proposed by Acoma, LLC in southern Doña Ana County to power Project Jupiter. These applications are unlawfully and deceptively designed to evade public health protections and, if approved, would result in significant air pollution and destructive climate impacts that will harm all New Mexicans. NMED must reject both applications outright, and require Acoma LLC to submit a single, accurate permit that fully accounts for the Project's true pollution impacts because: 1.The Project Is a Single Pollution Source and Must Be Permitted as One The Applicant has improperly divided a single gas-

Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. My wife and I have lived in Las Cruces for over 50 years. We both have respiratory issues and have noticed with dismay the deterioration of local air quality. As a scientist I recognize that the proposed system "fuel cell" will actually produce more CO2 pollution than previously rejected gas turbines. In our opinion the only way forward is to
