[EXTERNAL] My Pub	often get email from lilliewinterton0@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Lillie Winterton	lilliewinterton0@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, As a soldier in war, I witnessed massive ecological destruction that still has risks for both our troops and the local population. I am now witnessing risks from increasing climate change, like droughts, wildfires, and floods here in New Mexico. I am greatly concerned over the environmental damage caused by data centers like Project Jupiter when they are are powered by fossil fuels, particularly methane which is one of the most powerful greenhouse gases. Artificial intelligence has many promises, but not at the cost of increasing our health and well-being. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:								
[EXTERNAL] Please h	often get email from rgbhattar@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design:	Walter Barger	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Yucca G	1,500 project-supported jobs. Furthermore, organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, As a New Mexico State Representative, District 13, I urge you to deny Project Jupiter's air permit because this "new" application will still use harmful pollutants such as the yet untested, methane fuel cells. These methane fuel cells will pollute our air and cause many healthcare problems, which is problematic since they remain untested. The Department should, rather must, hold a public hearing for transparency and accountability to our public. The Department must hold these and other developer's to strict air, climate and health protections, and not just require "the minimum" compliance. Because of what we do know to be pollutants, damaging our air and harmful to our health, we must expect a higher level of strict compliance and not be caught up in the promotional hype of job development or other such media promos driven by the urgency to profit over attending to the urgency of the damages caused by such reckless data center development. Thank you. Representative Roybal Caballero	noreply@smartcor	noreply@smartcomment.co	SMTP	manuel.0830.soto@gmmail.com	manuel.0830.soto@gmmail.co	SMTP	Normal	Normal

[EXTERNAL] My Pub	often get email from hanamilani3@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Hana Milani	hanamilani3@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Please don't subject our state to more air pollution and water shortages his project will create. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New	David McGahey	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, This project will pollute our state. They claim that they won't use more than a little water, but will they be held accountable? Why can't they use solar? That wouldn't require water! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	Suzanne Stamatov	kwautomail@phone2action.	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The health threat alone should should deny Project Jupiter's hyper scale data center. Not to mention the lunacy of giving a permit to any project that increases air pollution far and wide in New Mexico's highly populated cities.. How can you even call yourselves the Environment Department to okay this project. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. [EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The basic problems with the Jupiter data center remain. They are still gaslighting the public and doing under-the-table deals. Their air permit is based on false information. The methane fuel cell idea is untested. We need public hearings and honesty with the public. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. Dear NMED Air Quality Project Jupiter Yucca, Many New Mexicans, including myself, are making substantial sacrifices in an effort to use less water, electricity, and fossil fuels. We want to do our part in a much larger fight against drought and climate change and all their consequences. It is nauseating to think how quickly and carelessly those sacrifices might be undone by Project Jupiter's immense consumption of energy, land, and water (even without evaporative cooling, the project's proposed water use would undo hard earned conservation and brackish water treatment efforts of nearby communities). The effects on air quality and emissions from proposed fuel cells would be more than concerning; they'd be an absolute slap in the face with health and environmental impacts for decades to come. New Mexicans oppose this project, because we stand to lose far more than we'd gain. The economic benefits will not reach most of us. They won't make up for the astronomical costs. We must be give every opportunity to voice our opposition.	Aidan Manning	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please l	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am very tired of companies attempting to ramrod their projects through in any way possible, including misleading, outright lying, attempting to use untested or unproven technologies, and after the fact changing plans to suit themselves. That behavior is a guaranteed NO vote from me. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). [EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The planned use of methane powered fuel cells for Project Jupiter is still highly flawed as it is still using tons of methane and therefore still producing tons of pollutants and warming the planet. Renewables provide cheaper kilowatt hours and less pollutants. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been	Honor Prochnow	honorprochnow@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal
[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, NM does not have enough water for Project Juputer. Stay out of NM! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising	Lucie Knight	kwautomail@phone2action. [EXTERNAL] DENY Y	organization. Exercise caution prior to clicking on links or opening attachments. NMED Reviewer NMED Reviewer, I am submitting this comment to voice my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI failed to include all relevant information about Bloom Energy's problematic history: Bloom has been cited by the United States Environmental Protection Agency for illegally dumping, in some cases, into the community's landfill, further contaminating the land. **The Sunland Park public landfill is the likely target of any solid waste generated. *Bloom Energy's Fuel Cells are not clean energy, period. **These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts. **Again,the resulting hazardous solid waste should not be ignored by NMED.	catherine heyne	noreply@adv.actionnetwork. [EXTERNAL] My Pub	often get email from gallegosalianna@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Alianna Gallegos	gallegosalianna@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

NMED Reviewer Julia Kuhn, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people	Romero, Rhonda, E	/O=EXCHANGELABS/OU=EX	EX	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] My Pub	often get email from kacytaylor07@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Harrison Blushing	kacytaylor07@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please l	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, As a garden educator at Albuquerque Academy, I care deeply about New Mexico's land, water, and air quality and teach children to develop this care as well. Project Jupiter jeopardizes the beautiful landscape, drinkable water, and breathable air that children are developing relationship to, effecting the social, emotional, and physical health of all New Mexicans. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly	Marcela Morassi	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] My Pub	often get email from daniellesna123@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, New Mexicans deserve a public hearing, we deserve transparency on issues that will affect generations to come. Project Jupiter is lobbying officials and the public, we deserve the right to ask questions and hear all the facts. New Mexicans deserve a fair and transparent regulatory process. Deny the application, hold a public hearing! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:	noreply@smartcor	noreply@smartcomment.co	SMTP	drriiizz0@gmail.com	drriiizz0@gmail.com	SMTP	Normal	Normal
[EXTERNAL] Please	NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly organization. [EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising temperatures, prolonged and severe droughts,	Nora O'Shea	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. [EXTERNAL] DENY Y	NMED Reviewer Julia Kuhn, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative	Alex Kruse	noreply@adv.actionnetwork. [EXTERNAL] My Pub	often get email from carlybaca1010@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Carly Baca	carlybaca1010@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

NMED Reviewer NMED Reviewer, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people	Romero, Rhonda, E	/O=EXCHANGELABS/OU=EX	EX	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Everything about Project Jupiter makes me frightened for the future, for the quality of the air and water, for those who realize what is involved and for those who have been given misinformation - please don't continue with this project. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. [EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I don't believe New Mexico has the capacity to host Project Jupiter. There is no guarantee that the technologies for power and water will be sufficiently advanced to protect our resources of clean air, water, and land from the predation by this facility. The air pollution permit should not be granted. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Richelle Paoli	richellepaoli@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

I am a lifelong New Mexican and recent graduate of Yale University with a degree in Environmental Studies, and I am writing with deep concern for our air quality's future. I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities.	noreply@smartcor	noreply@smartcomment.co	SMTP	velbek52@gmail.com	velbek52@gmail.com	SMTP	Normal	Normal

Name: Sarah Hogland Address: City: Albuquerque State: New Mexico ZIP Code: 87108 Email: srhogland@gmail.com Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I oppose Project Jupiter to the fullest extent. This data center will devastate our land, water and communities. The Rio Grande is already dry in Albuquerque. The waters will be poisoned and depleted in Doña Ana county. The profit in the short term pales in comparison to the long term destruction of life itself, including you and everyone trying to push this project forward. Your children and grandchildren children will suffer								
[EXTERNAL] Yucca G	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Let's "clear the air" by rejecting this permit to pollute the air. Let us also point out that the data center's developers are signing people, including elected officials, as supporters without their knowledge or consent. This is a disingenuous use of people's identities to make a buck for the data center's developers. Trust is essential in order to do business. Data center developers have broken that trust.... (Probably with the help of AI.) Deny the Project Jupiter air-quality permit application. Let's clear the air for New Mexico! Sincerely, Kevin Kirby	noreply@smartcor	noreply@smartcomment.co	SMTP	srhogland@gmail.com	srhogland@gmail.com	SMTP	Normal	Normal
[EXTERNAL] Please I	I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, New Mexico deserves to know what we're leaping into - who pays and who benefits! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising	Kevin Kirby	kwautomail@phone2action. If nothing else, I ask that at minimum you give the public additional time to review and comment on the air quality permit. Given the past actions of those behind Project Jupiter, I am opposed to approval of the permit.	noreply@smartcor	noreply@smartcomment.co	SMTP	cdmjnk@hotmail.com	cdmjnk@hotmail.com	SMTP	Normal	Normal

	often get email from biannca014@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Project Jupiter will produce as much carbon pollution as the cities of Albuquerque, Las Cruces, and Santa Fe combined. Therefore, I urge the Environmental Department to deny Project Jupiter's air-quality permit application and to hold a public hearing to assess the impact of Project Jupiter. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. Name: Jaime Gonzalez Address: State: New Mexico Email: jaimelq7@gmail.com Phone: 212-850-9622 Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water	noreply@smartcor	noreply@smartcomment.co	SMTP	jaimelq7@gmail.com	jaimelq7@gmail.com	SMTP	Normal	Normal

	often get email from stmikes88@hotmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I vehemently oppose Air Quality Construction Permit Applications 10732 (East Microgrid) and 10734 (West Microgrid) proposed by "Acoma, LLC" in southern Doña Ana Co. to power Project Jupiter. These applications unlawfully & deceptively evade public health protections and would result in significant air pollution and destructive climate impacts that will harm ALL New Mexicans. NMED *must* reject both applications outright, and require Acoma LLC to submit a single, accurate permit that *fully* accounts for the Project's true pollution impacts as 1. The Project Is a Single Pollution Source and Must Be Permitted as One

[EXTERNAL] My Pub	often get email from tayxanna7@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Tayanna Hernande	tayxanna7@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Air quality is linked to health. Poor air quality contributes to childhood asthma and the rate on NM has gone up. We already have too many days per year with air quality alerts. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	Marjorie Buck	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please l	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, It is foolish to add any contaminants to our New Mexico air at this time of Global scorching. We have the technical knowhow to transition to renewable energy in our sunny and windy state. Why compromise the health of our kids and grandkids? Why? Data is not nourishing the wellbeing of our people and environment. If this is still a democracy, listen to the people! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly	Penina Ballen	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Nabuli Daud	ndaud@unm.edu	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] In oppo	often get email from patriciaf.kontgis@messages.fwwatch.org. Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please	CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Nothing is more important than ensuring the safety of the air that we breathe to sustain our lives. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New	Edward Frank	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Comme	often get email from martina.filerio@messages.fwwatch.org. Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Comme	often get email from cherie.gaston@messages.fwwatch.org. Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. Dear NMED Air Quality Project Jupiter Yucca, no one wants a fuck ass data center in our beautiful home. our desert will stay ours. I am a born and raised NEW MEXICAN and I will fight for my home, I do not approve of this fuck ass data center, DO NOT give project jupiter the right to build nor the right to a permit your own fucking people are here. I want clean air I want a beautiful home, I wanna hear coyotes, and be afraid of bats, I want them here. I want my home to stay my home. I DO NOT APPROVE OF PROJECT JUPITER. I do not approve of project Jupiter. This data center will fuck us all over. Reject project Jupiter. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:								
[EXTERNAL] Please	NMED regulations require holding a public organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I've spent months documenting New Mexico's data center buildout, from water use to grid strain to who actually benefits. Project Jupiter's pivot to "methane fuel cells" is not a clean fix. It is a rebrand. The technology is unproven at this scale. The emissions math still lands at roughly the combined carbon output of Albuquerque, Las Cruces, and Santa Fe. That is not a rounding error. That is a new fossil fuel plant wearing a different label. New Mexicans already carry the health burden of oil and gas development in the Permian and San Juan Basins. We should not also carry the burden of powering someone else's server farm with an untested technology that skipped rigorous review. I am asking NMED to deny this permit as submitted, require a full public hearing, and hold developers to the same air quality and health standards any other major industrial polluter would face. Approve this quietly and you set the precedent for every data center that follows.	Maria Barraza	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please I	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, In a state where drought and water supplies affect us all, a high-water usage data center is an unwise idea. I'm also concerned about their energy use and how this will affect electric rates for residents. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	Rebecca Longardn	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The Rio Grande River in Albuquerque is dry and has been for more than a month. The Middle Rio Grande must decrease ground water pumping to deliver water owed to Texas and Mexico. The states dependent on Colorado River water are facing a crisis thanks to low water levels throughout the entire region. No climate predictions forecast cooler temperatures, more snow and rain fall or easing regional drought. There is no justification for removing water essential to residential, agricultural and existing commercial uses for this project or any use which further decreases water resources in New Mexico. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public	Jane Baechle	kwautomail@phone2action.c SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange EX	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I've lived in NM all my life. I lived up in the east mountains and as a child I used to sit on my roof and watch the arroyo flood during big rainstorms. I think one of the most impactful events of my entire life was witnessing the change in my ecosystem. First, my arroyo went from flooding multiple times a year to one every 2 years, and then not at all. The bugs that filled my garden slowly died off as our vegetables failed to grow in the dry soil. No more tiny garden moats with my brother as the drought restricted my mom from watering the plants enough to have any runoff. No more catching snowflakes in the winter storms as the air became too polluted and my parents worried for my safety. Still, I am one of the lucky ones who still has safe running water and "clean" air. However my neighbors and loved ones who live in the plains that you suck water and energy from will lose everything. The co2 you pump and the water you pull will kill everything that makes our earth beautiful. Please.	noreply@smartcor	noreply@smartcomment.co	SMTP	rebeldean07@gmail.com	rebeldean07@gmail.com	SMTP	Normal	Normal

Name: Madison Selb Address: State: New Mexico Email: madisonselberg@gmail.com Phone: 575-640-2118 Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I believe that project Jupiter is setting to cause more harm to not only Las Cruces, but the planet as a whole. It disrupts ecosystems, social spaces, as well as ruining our air. Adding this to promote technology can be done in different ways that aren't going to harm the world that we live on. Instead of looking for economic boosts, think about the damage that will occur to our future.

[EXTERNAL] Please I	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am against Project Jupiter for MANY reasons, i including Giving Project Jupiter an air- quality permit. Why would we do such a thing when New Mexico has such good air quality that people choose NM to live in, vacation in, to experience our beautiful desert nature with its various forms of life and growth? Why are we cutting off the richness of our air purity by allowing Project Jupiter to hinder it? I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." We are in a drought as it is. Anyone who's is qualified for jobs is not gonna be from las cruces. No one could've guessed they would've built a high capacity, high qualification, degree. Yes It might bring up the economy. But it'll only last so long. Las Cruces is already over crowded. That's just my opinion. Hope it helps to whom it concerns.	noreply@smartcor	noreply@smartcomment.co	SMTP	mizcless92@icloud.com	mizcless92@icloud.com	SMTP	Normal	Normal
[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am concerned about the Project Jupiter air permit. The new version of this project will use 2,275 Bloom Energy Solid Oxide fuel cells. The biggest, operational Bloom installation appears to be a 40 MW facility. This is 60 times smaller that the proposed project. Will this hugely enlarged Bloom project function effectively? The emissions testing data available for this new Bloom project is based upon testing of a single 65 kW unit 4 times for 4 hours. Is this a realistic way to evaluate a proposed project which is 60 times larger? The design of the project is also problematic as there will be 2,275 separate cells with separate stacks with apparently no coordinated monitoring for VOCs, particulates, or CO2 emissions. The fuel cells will emit substantial quantities of toxic CO. There will also be a thermal plume and heat island effect increasing downwind temperatures as much as 3.6 degrees F. The proposed facility will also emit about 10 million tons of CO2 annually.	Ronald Parry	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal
[EXTERNAL] Please	I urge the Environment Department to hold a organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Project Jupiter was rammed down our throats with little opportunity to have any input. Dona Ana County doesn't need this. Air quality is so important as we're already near El Paso and Juarez with their air pollution. Please deny the air-quality permit. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. Name: Ur Mom Address: State: New Mexico Email: woopertrooper911@gmail.com Phone: 212-254-6440 Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application The pre written message is a sign of this stupid project being unwanted, anyhow i will not stand for a ai data senter in new mexico speciffically in the dryer and one of the worst air polluted parts of the state already. NO DATA CENTERS IN NEW MEXICO!!								
[EXTERNAL] Yucca G	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, We, the people of New Mexico don't need to sacrifice our water for big business profits, and we certainly don't need to enable the surveillance state. AI is being pushed down our throats at every turn and now it's being demanded that we give up our water and pay higher energy prices for the sake of data centers. We can't afford their data centers and we don't want their AI. Your choices will affect generations of New Mexicans. Either they will curse you for trading our water for Project Jupiter's magic beans or they will bless you for protecting out land and resources. The choice is yours. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:	noreply@smartcor	noreply@smartcomment.co	SMTP	woopertrooper911@gmail.com	woopertrooper911@gmail.com	SMTP	Normal	Normal
[EXTERNAL] Please I	NMED regulations require holding a public often get email from frank.lampe@messages.fwwatch.org. Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). They are hoping to obtain a permit to pollute our air by switching from two separate microgrid facilities for energy production to Bloom Energy's solid oxide fuel cells. Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions.	weyodi Wuratsaaki	kwautomail@phone2action.i	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am a PhD Chemical Engineer who has conducted specific research on methane/methanol fuel cells. The proposed energy system is not practical in an engineering sense. Nothing remotely close to the scale of the proposal has been attempted, and the potential for fire, explosion, contaminants, and massive heat increase to the local area is significant. The cooling system for the energy system alone will further burden the system itself as well as requiring a water/fire suppression system that will compromise water availability to the surrounding area. Local people should not be paying for their jobs by giving over their own water and safety. The proposal is simply another attempt to placate the adjacent oil & gas interest to garner their support. Please consider the interests of New Mexico rather than industry and deny this permit. Thank you. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality

Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please l	This reminds me of that one company (Pacific organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I've lived in New Mexico my entire life. I love it. Having lived in both Santa Fe and ABQ I can say it's much easier for people like me who are sensitive to air pollutants to be in less populated areas like the mountains near Santa Fe. But if Project Jupiter increases the air pollution in this state nearly twofold, even going out in nature won't be enjoyable anymore. I'm sure if you talk to any one of the many employees at Project Jupiter, even they would agree that living in a more polluted New Mexico would take a toll on their mental health. Which is something none of us need right now given what the federal government is doing right now. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:	Megan Menetrey	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Dear NMED Air Quality Project Jupiter Yucca, I am a Las Cruces citizen, I believe that this project will affect my personal way of life negatively. I urge you to stop this project. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I'm a multi-generation new Mexican and over the course of my life I've seen the landscape change dramatically. I was just visiting an old Hispano village and witnessed the changing of the life ways due to the persistent drying of the landscape. It is imperative that we more properly balance the desire for economic growth with caring for nature, tipping the scales to our natural world. Data centers do not particularly help the local economy and are like most extractive industries in that they privatize benefits while socializing the costs. New Mexico must take every opportunity to preserve its clean air. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:
