[EXTERNAL] Public C	often get email from rarebeatles45@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I submit this comment in strong opposition to Air Quality Construction Permit Applications 10732 (East Microgrid) and 10734 (West Microgrid) proposed by Acoma, LLC in southern Doña Ana County to power Project Jupiter. These applications are unlawfully and deceptively designed to evade public health protections and, if approved, would result in significant air pollution and destructive climate impacts that will harm all New Mexicans. NMED must reject both applications outright, and require Acoma LLC to submit a single, accurate permit that fully accounts for the Project's true pollution impacts because: 1. The Project Is a Single Pollution Source and Must Be Permitted as One	David Johnson	Rarebeatles45@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] DENY Y	NMED Reviewer Julia Kuhn, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative organization. Exercise caution prior to clicking on links or opening attachments.	Anthony Bernal	noreply@adv.actionnetwork.	SMTP	Kuhn, Julia, ENV	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Ai data center that will take up so much land. Harming animals and plants. But it's not just that. The pollution of water the data center uses has enough e-waster to give NM communities cancer. The air pollution is enough to kill. Enough is enough put an end to ai data centers that do more harm than good.

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Please fully review Project Jupiter which has no place in our drought ridden state! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising	May Goldenberg	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Yucca G	Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application Hello, I'd like to oppose the idea of 'project Jupiter', as i believe that this will most likely ruin the planet and our ecosystem even more than it is already. My first point is that the power plant will release up to 10 million tons of warming greenhouse gasses - this will contribute to climate change horribly and will singlehandedly erase all the progress we have done to reverse it up until now. Second, this is more greenhouse gas pollution than New Mexico's three largest cities combined - as you may know, that is an organization. Exercise caution prior to clicking on links or opening attachments. Thank you for your comments on the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. 	organization. Exercise caution prior to clicking on links or opening attachments. NMED Reviewer Julia Kuhn, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people

I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County. Obviously this project isn't something that most of the people dream about. It's scary how my future can be decided by someone who doesn't even know me.	noreply@smartcor	noreply@smartcomment.co	SMTP	lucafavaretto07@gmail.com	lucafavaretto07@gmail.com	SMTP	Normal	Normal

[EXTERNAL] My Pub	often get email from arlalbertabq@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Arl Albert	arlalbertABQ@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange EX		Normal	Normal

Name: Judith Gates Address: City: Royal Oak State: Michigan ZIP Code: 48067 Email: Jag036@gmail.com Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I oppose the Jupiter Data center. Too many environmental concerns, noise, etc. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored	noreply@smartcor	noreply@smartcomment.co	SMTP	Jag036@gmail.com	Jag036@gmail.com	SMTP	Normal	Normal

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am deeply concerned about the air quality permit as regarding Project Jupiter and I'm certain there is intense pressure. Please hold a public hearing and please deny the current application. Thank you. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands.

The future of not only New Mexico but of the whole country and the rest of the world is under threat with this proposed air quality permit. A change to fuel cells has minimal impacts on the suffering that will be endured as a result of the gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to the active and long-time nonattainment zone would be nothing short of blatant environmental racism.	noreply@smartcor	noreply@smartcomment.co	SMTP	mvcami04@gmail.com	mvcami04@gmail.com	SMTP	Normal	Normal

Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application

We already can't afford to lose good water to a data center, but the air pollution and threat to the area poses a second threat, we need to protect our air as the climate heats and we are more likely to experience changes in weather patterns or bad winds, this will affect not just rural populations but many.

Name: Robert Keatts Address: City: Bay area State: California Email: milky.moon.fox@gmail.com Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application Hello my name is Robert Keatts, I am commenting to show that I am against project Jupiter and I have a very strong distaste towards it. Here is why, Project Jupiter actively endangers the people not to mention the animals. This data center is being built only 5 miles away from 2 schools. The gases and smoke the data center would emit would directly put hundreds of children in danger. Project Jupiter is also actively dumping their waste into the Chihuahuan Desert.	noreply@smartcor	noreply@smartcomment.co	SMTP	milky.moon.fox@gmail.com	milky.moon.fox@gmail.com	SMTP	Normal	Normal

[EXTERNAL] My Pub	often get email from greta.smith111@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Greta Smith	greta.smith111@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] My Pub	CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, • Severe Public Health & Environmental Impacts: The microgrid will emit 161.2 tons/year of CO and 124 tons/year of VOCs near existing EPA non-attainment zones. It will generate a thermal plume and a "heat island" effect, raising downwind temperatures by up to 3.6°F in a sweltering desert climate, threatening vulnerable populations. The risk is not worth our community suffering from the possible outcomes. Furthermore, concentrating 10M metric tons of climate-warming CO2 into 275 acres - exceeding the combined emissions of Albuquerque, Santa Fe, and Las Cruces - creates localized health risks. While economic development is important, it should not come at the expense of our public health, our already strained natural resources, and the public's	noreply@smartcor	noreply@smartcomment.co	SMTP	joy.lightfoot@gmail.com	joy.lightfoot@gmail.com	SMTP	Normal	Normal
[EXTERNAL] Please I	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Billionaire oligarchs have no right to steamroll local communities in pursuit of their obscene profits. Energy costs going up for everyday consumers, potential negative impact on air quality,and depletion of scarce water resources in our desert southwest are absolutely negative side effects of this greed project. Slow it down so the truth can be established before rather than after the fact!! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2	Sarah Smith	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Violet Hay	violetmariahay@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

NMED Reviewer Julia Kuhn, I'm submitting this comment to voice my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. I'm asking that the reviewers deny this application for the following reasons: • YGI failed to include all relevant information about Bloom Energy's problematic history during the application process. • No matter what YGI's marketing materials say, Bloom Energy's Fuel Cells are not clean energy. These fuel cells generate significant Nitric oxides, Carbon Dioxide, and various volatile organic compounds, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. • Permitting any microgrid facility will result in a

[EXTERNAL] My Pub	often get email from perpinoodle@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Natalie Peavy	perpinoodle@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] My Pub	often get email from life.is.grand360@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. This project would emit more than 10 million metric tons of CO_2 annually, threatening public health, worsening air quality, disproportionately impacting nearby communities, and harming the fragile desert ecosystem. The proposal relies on an unproven design. It would deploy 2,275 Bloom Energy fuel cells at a scale far beyond existing operating facilities, while emissions estimates are based on limited testing of a single small unit. The design also lacks practical continuous monitoring and pollution controls, making meaningful organization. Exercise caution prior to clicking on links or opening attachments. [EXTERNAL] DENY Y	bears a disproportionate share of negative often get email from marylenemey@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been	Rey Magana	noreply@adv.actionnetwork.	SMTP	Kuhn, Julia, ENV	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Yucca G	Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I vehemently oppose the construction of this data center in Dona Ana County. The environmental impacts on air, water, and soil quality alone are enough to stop this construction. But evidence from data centers in other states has shown they only extract resources without adding any tangible value, drive up water and electricity costs, and negatively impact the health and quality of life of local communities. [EXTERNAL] My Pub	often get email from thosebeasts@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Cassidy Broska	thosebeasts@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

	often get email from khowell409@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been

[EXTERNAL] DENY Y	organization. Exercise caution prior to clicking on links or opening attachments. NMED Reviewer NMED Reviewer, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative organization. We don't need to pollution, we don't have the water, we have better uses for the land, the sacrifices for a few short term construction jobs and a longer employment	noreply@smartcor	noreply@smartcomment.co	SMTP	nogreenchile@gmail.com	nogreenchile@gmail.com	SMTP	Normal	Normal
[EXTERNAL] My Pub	CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Gene Ortega	geneortega104@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Reject A	often get email from jessie.tillmanorphey@messages.fwwatch.org. Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Project Jupiter will pollute the air of southern New Mexico with toxic carbon emissions and will delete our limited water supplies. The methane fuel cells will emit as much pollution as the population of our entire state. New Mexico is known for its clean air, wilderness area, and culture. Our tourism industry will be negatively affected by Project Jupiter. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly	Joe McVeigh	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange EX	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been	noreply@smartcor	noreply@smartcomment.co	SMTP	abanks@gmail.com	abanks@gmail.com	SMTP	Normal	Normal

[EXTERNAL] Yucca G	Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, We understand that need for data centers may be necessary but its impact on local resources is tremendous and hurts communities and animals on different levels. The in-depth research must be required and understood by the governing bodies before approving any permits. The TECH tendency has been that in spite of technological advances, they rely on public, subsidized resources but never share their profits with the communities. We must stop this "pubic risk, privatized profits" attitude that is increasing income disparity while hurting natural resources that most people rely upon. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:	noreply@smartcor	noreply@smartcomment.co	SMTP	wendym5798@gmail.com	wendym5798@gmail.com	SMTP	Normal	Normal
[EXTERNAL] Please l	NMED regulations require holding a public organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Project Jupiter is a terrible idea. Leave New Mexico's water and clean air alone! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	sunil sakhalkar	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Please l	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The risks to the health of the environment and the health of all of us in New Mexico are too great to take. Please, do the right thing and deny the current application. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	Susan Diaz	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal
