[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I oppose Project Jupiter's air pollution permit. This huge data center is again asking to pollute more than Albuquerque, Santa Fe, and Los Cruses all together. They want to use an entirely untested technology too. We need to understand what does that imply? How many greenhouse gases? What are the impacts to our ground, water and air? What will be the water use? We need this done transparently and openly. The company is using paid push gatherers of comments making people think that they 're just evaluating the interaction in a conversation and suddenly they have a comment in the name of Councelor Tammy Feeblehorn supporting the project. She actually opposes the project. How can they be trusted? This need public comment and further evaluations before approving any permits. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Robert Nieto	hippiexrob@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange EX	Normal	Normal
[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Do everything that you can to stop or delay Project Jupiter. We need to wait and see how data centers effect the people and the natural environment of other states before projects like this are built in our state. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	Nancy Wilkes-Truji	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange EX	Normal	Normal

[EXTERNAL] Yucca G	repair, upgrade, and improve local water organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, No Data center, I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising	noreply@smartcor	noreply@smartcomment.co	SMTP	alicesmith36@gmail.com	alicesmith36@gmail.com	SMTP	Normal	Normal

[EXTERNAL] Please l	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, A missing piece of Project Jupiter is that the air quality where I live in El Paso, TX WILL BE negatively affected by the pollution generating power plant that they want to build. It doesn't seem fair for me, who lives in west El Paso, to have to suffer because Oracle wants to build and run Project Jupiter. I am horrified by the prospect of this project and the adverse affects to the air I have to breathe. My house is closer to the plant than people living in Las Cruces. El Pasoans will suffer without ANY benefit to us. Will Oracle pay for my asthma meds? Will they invest in charities in El Paso? I believe the answer to the questions is a big fat NO. I urge the Environment Dept to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. New Mexico's Climate Action Plan clearly indicates that the state must REDUCE its greenhouse gas emissions 45% by 2030. I urge you to take action to protect New Mexicans and Texans. Please! Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please l	CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, As a Registered Nurse/Certified Nurse Midwife, I am concerned about the effects of air pollution on the health if babies and children. The public needs protection from increased effects on climate change caused by industry and potentially Jupiter. We cannot allow this project without adequate safeguards. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. [EXTERNAL] Please l	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am writing to express my strongest opposition to the new Project Jupiter air permit. As you have likely heard from others, "Project Jupiter would still emit more carbon pollution than Albuquerque, Las Cruces, and Santa Fe combined. It would also release waste heat equivalent to the heat generated by six atomic bombs into a community that already struggles with dangerously high temperatures. The project would also release nitrogen oxide and volatile organic compounds that react to form deadly ozone pollution. Those reactions occur especially efficiently at high temperatures like those that will be present near the data center." This type of pollution is absolutely unacceptable at any price! I urge you to deny Project Jupiter's air permit and hold a public hearing before going forward with any aspect of this development. Thank you for the work you do and for your serious consideration of all of the reasons to oppose Project Jupiter. Respectfully,	Carolyn Simmons	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] Yucca G	Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water	noreply@smartcor	noreply@smartcomment.co	SMTP	karenalvardo40@yahoo.com	karenalvardo40@yahoo.com	SMTP	Normal	Normal

[EXTERNAL] My Pub	often get email from rischeluther.aizel@nmschoolforthearts.org. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been	Aizel Rische Luther	rischeluther.aizel@nmschoo	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous

Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been	Christine B Boss	christinesshopping@gmail.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water	noreply@smartcor	noreply@smartcomment.co	SMTP	fieldsnicole20@yahoo.com	fieldsnicole20@yahoo.com	SMTP	Normal	Normal

[EXTERNAL] My Pub	often get email from thepierre700@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I recently moved to NM and am extremely disappointed. Project Jupiter threatens not only my future but all New Mexicans and Americans' futures. I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design:	Pierce Jackson	thepierre700@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal
[EXTERNAL] My Pub	Some people who received this message don't often get email from nikapmm@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, NMED must deny the air quality construction permit application 10883 for Yucca Growth Infrastructure's microgrid in Doña Ana. This project does not serve our comminuty, and it would be a tasteless cashgrab to allow it to continue. We living here should not suffer the consequence of the proposed data center in any capacity. Shame on any who support this. Sincerely, anika marcus 7232 vuelta de la luz santa fe, NM 87507	anika marcus	nikapmm@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

[EXTERNAL] My Pub	CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, Please fully enforce your regulations, and don't let Project Jupiter proceed as proposed. I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes organization. Exercise caution prior to clicking on links or opening attachments.	Brooks White	broox57@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal
[EXTERNAL] DENY Y	NMED Reviewer NMED Reviewer, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative	Andre Walker	noreply@adv.actionnetwork. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I am a resident of New Mexico. I just ride a bicycle for transportation, and I can live and bicycle in Santa Fe because the air is fresh and clean! I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an inadequately tested design:

Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I submit this comment in strong opposition to Air Quality Construction Permit Applications 10732 (East Microgrid) and 10734 (West Microgrid) proposed by Acoma, LLC in southern Doña Ana County to power Project Jupiter. These applications are unlawfully and deceptively designed to evade public health protections and, if approved, would result in significant air pollution and destructive climate impacts that will harm all New Mexicans. NMED must reject both applications outright, and require Acoma LLC to submit a single, accurate permit that fully accounts for the Project's true pollution impacts because:	noreply@smartcor	noreply@smartcomment.co	SMTP	karenharris57@gmail.com	karenharris57@gmail.com	SMTP	Normal	Normal

Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I am deeply concerned that the community will be negatively impacted by this data center. A few people will get rich while ruining the air and sucking up all of our precious water. The downsides far outweigh any promised jobs. I strongly oppose this project. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. [EXTERNAL] My Pub	often get email from gottwald490@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, You know all the technical and specific reasons that this data center is a bad idea. You know the impact the data center will have on the people you share a community with. New Mexico's future only exists through renewable energy and clean, safe air, soil, and water. And you can make that happen!! You can, at any moment, choose the health and prosperity of our state over money and failing systems. I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration,	Eve Gottwald	gottwald490@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application

I am writing to express my non support for Project Jupiter,

I believe the project is being pushed forward too fast and without public approval.
I also think the water usage is a big issue that needs to be addressed.

Sincerely,

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, This is a beautiful county, home to several generations of New Mexico residents and to a vast influx of elderly people who have recently fled here from California. These residents are particularly vulnerable to air polution. The New Mexico Environment Department is legally and morally obligated to hold a public hearing on this second air quality application and to deny the current application to use untested “methane fuel cells” to supply power. This new plan would still produce as much carbon pollution as the cities of Albuquerque, Las Cruces, and Santa Fe combined. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:

Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I am asking the New Mexico Environment Department to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure Microgrid in southern Doña Ana County. This project would allow more than 10 million metric tons of carbon dioxide pollution every year. That is an enormous amount of climate pollution, and it goes against NMED's duty to protect public health and keep our air from getting worse. It would also place the greatest burden on communities that are already too often treated as sacrifice zones, including BIPOC families, low-income residents, children, elders, and people with health problems. The company is asking our community to accept a massive experiment, not a proven project. Its a waste of limited resources, especially water which is in short supply here								
[EXTERNAL] Yucca (	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, As an extremely concerned New Mexican, I must protest the establishment of the Project Jupiter data center in Doña Ana County. With two decades as a professor with NMSU based at the Agricultural Science Center in Farmington, I have seen during multiple trips to Las Cruces the drying of the Rio Grande and the adjoining lowlands of southern NM. There is not sufficient water for the necessary cooling for such a massive data center. I have also seen increased atmospheric pollution caused by deliberate methane venting, leakages, and flaring. Many other climate warming contaminants are also released, contributing to increased atmospheric ozone loads and subsequent heating. Mean annual temperature in Farmington has increased from 54.2° in 2000 to 55.0° in 2025, compared to a global increase from 57.0° in 2000 to 59.2° in 2025. Although not at the same magnitude and rate as the global contribution, none-the-less, New Mexico does not need another massive atmospheric heat	noreply@smartcor	noreply@smartcomment.co	SMTP	maxmorganfalk@gmail.com	maxmorganfalk@gmail.com	SMTP	Normal	Normal

Name: Leslie Giner Address: State: New Mexico Email: leslieginer595@gmail.com Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application Hi NMED staff, My name is Leslie. I have lived here all of my life, and throughout it I have come to love my city and my state. Although, it isn't always the best, it is home. As someone who's lived here their whole life, I've seen the decline of the city, especially Albuquerque and have acknowledged that severe changes need to be made in order to better it; building a power plant isn't one of them.	noreply@smartcor	noreply@smartcomment.co	SMTP	leslieginer595@gmail.com	leslieginer595@gmail.com	SMTP	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I find that allowing Project Jupiter to depend on methane fuels cells technology, which is relatively untested especially at the scale of the data center in question, is irresponsible without a public hearing to detail and consider its potential environmental and public health effects, and protection measures to be required of the developer. It would be bad for the NM borderlands and set a dangerous precedent for any future projects in the state. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed	Carol Toffaleti	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Name: Loney Lopez Address: null State: New Mexico Email: lopezloney4@gmail.com Phone: (202) 938-3278 Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community. Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed $50 million to help repair, upgrade, and improve local water	noreply@smartcor	noreply@smartcomment.co	SMTP	lopezloney4@gmail.com	lopezloney4@gmail.com	SMTP	Normal	Normal
[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, No loopholes no permits. Stand for and with New Mexicans, we don't want Data Centers buy and large. Removing 800+acres of ag water rights for Data air pullution is no way to treat generations of culture and heritage. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	Danie Salazar	kwautomail@phone2action.	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal
[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, New Mexicans access to clean air and water is of the highest importance. Project Jupiter and NMED are required to ensure this project complies with regulations. They are required to hold public meetings and weigh public comments and sentiments heavily in decisions. So far they have not done so. As our rivers dry up and our forests burn we must hold industry accountable and set higher standards of protection. They must convince us that their business will no accelerate the climate disaster that is already in progress. So far we remain unconvinced. Hold the meetings and show us the facts. People need to know the truth about Project Jupiter. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application:	Elaine Drees	kwautomail@phone2action.	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, New Mexico is already struggling with drought from climate change and bad air quality due to fires and other causes. This project needs to be vetted in detail to confirm it doesn't negatively impact the quality of life of New Mexicans. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands.

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Building a water dependent AI monster in a desert is ridiculous especially one that has been in a drought for years I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:

[EXTERNAL] DENY Y	bears a disproportionate share of negative organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I find it short sighted and wrong to allow the developers of data centers to be able to move ahead with development without considering the environmental impacts of such a huge data center. New Mexico is already a hot, dry place to live and we are experiencing an unprecedented snow drought and high temperatures. We should not be prioritizing computers and tech over living beings. Humans, wildlife and livestock need water to live. Data centers use a lot of water in addition to using more power than the biggest cities in NM combined. Ultimately, it is the tax payer who bears not only the long term financial costs of the damage done when data centers and corporations destroy the environment. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. 	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Please don't let a company come into New Mexico and pollute our air while they are only concerned with how much money they make! I don't want any kind of center that will make it harder for this land to thrive! They want to use an untested possibly dangerous fuel source, because they believe we don't matter and won't pitch a fit! I live with intense asthma and anytime there is ANY irritant in the air I have to turn off my air coolers/heat! I can't even handle one of my neighbors having a wood burning fire! It is not fair to subject children as well as adults to those conditions! Our environment is too delicate to gamble on for any reason! This company doesn't care about New Mexicans. If it did they would have suggested a solar or wind powered data center, NOT untested fuel rods!!! Say "No" New Mexicans won't stand for being poisoned or all of our water being used to cool this data center! We won't let them turn our state into a poisoned landfill!!

Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] My Pub	often get email from ketobiscochito@gmail.com. Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest	Erin Baragio	ketobiscochito@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

NMED Reviewer NMED Reviewer, I am submitting this comment to share my opposition to the Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application. Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people bears a disproportionate share of negative	Roan Shafo	noreply@adv.actionnetwork. Name: Brian Moffat Address: 7145 Western Skies Drive City: El Paso State: Texas ZIP Code: 79912 Email: bmmoffat@gmail.com Phone: 408-656-1168 Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I am not writing a prewritten support. But I do support the project. As an electrician I see the need is there for power and this is going to be the future. Project Jupiter uses what I feel is the best, in terms of least impactful to the environment, power generation. You dont have problems with solar or wind farms with the wildlife, and it takes up a relatively small foot print for ground wildlife.	noreply@smartcor	noreply@smartcomment.co	SMTP	bmmoffat@gmail.com	bmmoffat@gmail.com	SMTP	Normal	Normal

[EXTERNAL] Yucca G	organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells (SOFC). Though several projects have been announced with much fanfare, the largest operating Bloom installation is a 40 MW facility - 60 times smaller than what is proposed here. Scaling this technology to a mega-utility application remains entirely unproven.	noreply@smartcor	noreply@smartcomment.co	SMTP	alicia.walker@yahoo.com	alicia.walker@yahoo.com	SMTP	Normal	Normal

[EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Our resources are stretched too thin already. Nature and people need to live here. We can't have data centers using our resources and making it untenable to breathe and have water. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	Randy Ranaudo	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The amount of climate damage caused by this project due to the vast amounts of energy needed to run it are unconscionable. This is a bad deal for our state and for all New Mexicans. We should have the opportunity to say so in a public hearing. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands.

[EXTERNAL] Reject A	often get email from lola.barb@messages.fwwatch.org. Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. 	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I just read in the Albuquerque Journal that the Doña Ana County Commission has serious fraud, waste, and abuse issues. Those must be addressed before a huge project such as Project Jupiter is approved. This permit application must be denied immediately. Most importantly, water is finite. This center will be placed in the middle of the desert. New Mexico is a water scarce state and we are experience hotter global temperatures due to climate change all over the world. A huge, water thirsty data center is the very last thing community members in our state need. We need to see leadership in this state. Approving this permit, this project--is the polar opposite of leadership. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the

[EXTERNAL] Yucca G	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, The public absolutely deserves to have a hearing and the right to have answers to the pressing questions being asked. Our water and air need protection. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:	noreply@smartcor	noreply@smartcomment.co	SMTP	amyrohr@ymail.com	amyrohr@ymail.com	SMTP	Normal	Normal

Dear NMED Air Quality Project Jupiter Yucca, We don't need another data center in the US and NM doesn't have any water I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising	Lynn Walker	kwautomail@phone2action.c	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people	Cheryl Tomlin	noreply@adv.actionnetwork. Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I submit this comment in strong opposition to Air Quality Construction Permit Applications 10732 (East Microgrid) and 10734 (West Microgrid) proposed by Acoma, LLC in southern Doña Ana County to power Project Jupiter. These applications are unlawfully and deceptively designed to evade public health protections and, if approved, would result in significant air pollution and destructive climate impacts that will harm all New Mexicans. NMED must reject both applications outright, and require Acoma LLC to submit a single, accurate permit that fully accounts for the Project's true pollution impacts because: 1. The Project Is a Single Pollution Source and Must Be Permitted as One	Ariana Marchan	arimarchan32@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I've seen the adds on tv about job creation and environmental impact. I know that this project will impact water, air and community in adverse ways which they will never be honest about. Please keep this out of NM.... I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands.

Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I submit this comment in strong opposition to Air Quality Construction Permit Applications 10732 (East Microgrid) and 10734 (West Microgrid) proposed by Acoma, LLC in southern Doña Ana County to power Project Jupiter. These applications are unlawfully and deceptively designed to evade public health protections and, if approved, would result in significant air pollution and destructive climate impacts that will harm all New Mexicans. NMED must reject both applications outright, and require Acoma LLC to submit a single, accurate permit that fully accounts for the Project's true pollution impacts because: 1. The Project Is a Single Pollution Source and Must Be Permitted as One	Kai Romo	kairomo2306@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal
[EXTERNAL] Please I	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals: New Mexico's Climate Action Plan states "New Mexicans recognize the threats posed by rising temperatures, prolonged and severe droughts,	Derek Mudd	kwautomail@phone2action.i	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Dear Air Quality Bureau, NMED, I urge the NMED to deny Air Quality Construction Permit Application 10883 for the Yucca Growth Infrastructure (YGI) Microgrid in southern Doña Ana County. Granting a permit to emit over 10 million metric tons of CO2 annually violates NMED's mission to protect public health and prevent air quality deterioration, disproportionately harming BIPOC and low-income communities. The application relies on an unproven, unregulatable, and inadequately tested design: * Unprecedented, Unproven Scale: YGI proposes using 2,275 Bloom Energy Solid Oxide Fuel Cells

Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. [EXTERNAL] Please	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Doña Ana County is in a drought, over a decade now. Ground water is dropping alarmingly. The Rio Grande is empty in the north and Elephant Butte reservoir is now at 2% capacity. We don't have the water to support a data center!!! We don't want our electric bills to rise! We are regular people and we DON'T WANT TO SUPPORT BILLIONAIRES!!!! Trump already cut their taxes, let them pay for the data centers themselves! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2	Lillian Beach	kwautomail@phone2action.(	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application

the data center is a big waste of time and ai is not the furure

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, As a resident of Dona Ana, every day I read about the Project Jupiter promises that have been broken, and most recently about the missed deadline to submit quarterly job reports and environmental assessments. The lack of oversight by county and state officials is an invitation to further abuse. The entire project, including the application for air permit, needs to be put on hold until Project Jupiter complies with agreed to reporting. If we don't start holding their feet to the fire somewhere, they will continue to move forward with blatant disregard for what they promised. I urge the I urge the Environment Department to hold a public hearing on Project Jupiter's air-quality permit application and to deny the current application. I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application.

Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, I submit this comment in strong opposition to Air Quality Construction Permit Applications 10732 (East Microgrid) and 10734 (West Microgrid) proposed by Acoma, LLC in southern Doña Ana County to power Project Jupiter. These applications are unlawfully and deceptively designed to evade public health protections and, if approved, would result in significant air pollution and destructive climate impacts that will harm all New Mexicans. NMED must reject both applications outright, and require Acoma LLC to submit a single, accurate permit that fully accounts for the Project's true pollution impacts because: 1. The Project Is a Single Pollution Source and Must Be Permitted as One	Logan Choneska	loganchoneska@gmail.com	SMTP	aqb-yucca-microgrid	/o=ExchangeLabs/ou=Exchange	EX	Normal	Normal

	organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Project Jupiter Yucca, Our planet is in a dire state. We must do everything possible to protect our environment. We cannot breathe, drink, or eat data! I urge the Environment Department to hold a public hearing on the Project Jupiter air-quality permit application and to deny the current application. NMED must hold a public hearing on the application: NMED regulations require holding a public hearing on an air-pollution permit application if "there is significant public interest." Such a hearing is essential here, given that the proposed power plant would be the largest source of CO2 pollution in the state and could significantly impact everyone living in the borderlands. NMED must enforce the state's climate goals:

Name: Olivia Saba Address: 10209 Coronado Ave NE City: Albuquerque State: New Mexico ZIP Code: 87122 Email: oliviasumaya@gmail.com Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application I am against the proposed data center because the effects of climate change are already placing significant stress on Albuquerque's natural resources and way of life. The Rio Grande has experienced low water levels due to ongoing water demands, including agricultural use, and a large data center would place even greater pressure on our limited water supply. As a result, the river could continue to decline, making it even	noreply@smartcor	noreply@smartcomment.co	SMTP	oliviasumaya@gmail.com	oliviasumaya@gmail.com	SMTP	Normal	Normal
[EXTERNAL] In oppo	often get email from joseph.cipro@messages.fwwatch.org. Learn why this is important at https://aka.ms/LearnAboutSenderIdentification] CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear NMED Air Quality Bureau, I urge you to deny the Air Quality Permit to construct the Yucca Growth Infrastructure (YGI) Microgrid in Dona Ana County (Permit No. 10883). Bloom Energy's solid oxide fuel cells are not clean energy. These cells still rely on natural gas and natural gas infrastructure, and this switch in technology does not address the underlying problems of air pollution and greenhouse gas emissions. These fuel cells generate significant air pollutants, including CO2 and VOCs, all of which contribute to negative health impacts. Along with air pollution, these fuel cells generate hazardous solid waste that cannot be ignored by NMED. Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application

This application needs to be withdrawn. The entire process from the beginning has been froth with double speak and half truths. Everyone involved who attempted to get the project by the communities should lose their privilege to hold office in Southern New Mexico. They clearly can not be trusted to be good stewards of the land and hold the best interests of the people first and foremost.

Please deny this application for the following reasons: *YGI's application should be denied by NMED because YGI failed to include all relevant information about Bloom Energy's problematic history. *Bloom Energy's Fuel Cells are not clean energy – no matter what YGI says. These fuel cells generate significant NOX, CO, and VOCs, all of which contribute to negative health impacts, as well as hazardous solid waste that cannot be ignored by NMED. *Permitting any microgrid facility will result in a clear example of environmental racism and NMED is required to ensure no group of people

Name: Rene Thompson Address: 12128 menaul ne City: Albuquerque State: New Mexico ZIP Code: 87112 Email: naenerdness@gmail.com Phone: 5057502509 Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit Application Permitting this project will ruin our state, land, watet and the environment if allowed. Please dont let this happen to New Mexico like its happened to other states already.										
[EXTERNAL] Yucca C	Learn why this is important <https://aka.ms/LearnAboutSenderIdentification> CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments. Dear Air Quality Bureau, NMED, Why is the NMED not also addressing the water issue. No matter what DRINKING WATER comes before data center cooling systems. The need to address the long term impact on the state citizens must be completed and resolved to the satisfaction of NEW MEXICO RESIDENTS. They can cash out and leave... We live here. Please inject some common sense and if you're feeling ambivalent go to an elementary school and explain how this will benefit those children. Sincerely, Carl Seider 4717 Trumbull Ave SE Albuquerque, NM 87108	noreply@smartcor	noreply@smartcomment.co	SMTP	naenerdness@gmail.com	naenerdness@gmail.com	SMTP	Normal	Normal
