Current Employment:

1/90 – Present: Assistant/Associate/Full Professor, Department of Civil Engineering. Currently Professor and Associate Department Head, specializing in Civil (water resources) and Agricultural Engineering. Teaching includes graduate and undergraduate courses in computing, water resources engineering, irrigation and drainage, hydraulics, hydrology, geohydrology, hydraulic structures, construction, professional ethics, and engineering project management and economics. Research includes applied and basic projects on water use optimization, consumptive use, conservation, drought response, climate change adaptation, surface water-groundwater interaction, streamflow forecasting and river modeling, water resource planning and management, international development, and transboundary water issues. Director of New Mexico Alliance for Minority Participation (NMAMP), an NSF regional alliance for supporting Under Represented Minorities in STEM fields, 2015 to present. Principal Investigator for Reaching the Pinnacle, an NSF regional alliance aimed at recruiting and retaining students with disabilities in STEM fields, 2010-2013. Service includes university and professional society committee work, technical review of local water resources issues, curriculum development and administration, and advising graduate and undergraduate students. Sabbatical in 2009-2010 as Science & Technology Policy Fellow with the American Association for the Advancement of Science, posted with the National Science Foundation in Arlington, VA.

9/95 – Present: Principal Engineer, King Engineering & Associates, Inc., Las Cruces, New Mexico. Water Resources and Agricultural Engineering specialist. Clients include irrigation districts, the State of New Mexico, Indian tribes, the Bureau of Indian Affairs, Doña Ana County, World Wildlife Fund, and private individuals and companies. Projects include irrigation design, evaluation, and operation, evapotranspiration and crop water requirement estimation, canal instrumentation, water quality monitoring, design of hydraulic structures and systems, erosion/sedimentation analysis and control, groundwater modeling, flood modeling and analysis, nonpoint source pollution control, domestic water supply analysis, water conservation planning and evaluation, hydrologic analysis, training, and expert services in support of legislation, litigation, and negotiation. Experienced in litigation-related mediation as well as preparation of expert opinion reports, depositions, and testimony.

Education:

Ph.D., Agricultural Engineering, 1990, Colorado State University. Concentration: Soil and Water Engineering. Dissertation: *Knowledge based expert systems methods for irrigated barley crop management*. Funded by the Colorado Institute for Artificial Intelligence.

M.S., Agricultural Engineering, 1988, Colorado State University. Concentration: Soil and Water Engineering. Thesis: *Water induced soil erosion processes and modeling*. Funded by the National Science Foundation.

B.S., Civil Engineering, 1982, University of California at Berkeley. Concentration: Construction Engineering.

Professional Education:

Evaluation Practice, 2010, The Evaluators' Institute, George Washington University. Courses completed: *Informing Practice Using Evaluation Models and Theories, Qualitative Data Analysis, and Using Program Theory and Logic Models in Evaluation.*

MBA, 2003, New Mexico State University. Special project on modeling effects of leadership styles on organizational learning and performance.

Registration: Registered Professional Engineer, New Mexico, No. 12869, expires 12/2017.

Previous Work History:

9/09-8/10: Science & technology Policy Fellow, American Association for the Advancement of Science (AAAS), Washington, D.C. Fellow in the Energy, Environment, Agriculture, and Natural Resources division in the Science and Technology Policy program. Posted while on sabbatical from NMSU with the National Science Foundation's Engineering Directorate (ENG), Civil, Mechanical, and Manufacturing Innovation Division (CMMI), Arlington, Virginia.

- Represented NSF CMMI in Integrative Graduate Education and Research Traineeship (IGERT), Water, Sustainability and Climate (WSC), Interdisciplinary Research (IRD), and graduate Research Supplement (GRS) grant programs
- Organized and conducted four core program review panels in NSF Civil Infrastructure Systems (CIS)
- Served on ENG Assessment and Evaluation Work Group, developing and implementing evaluation of federal investment in research by ENG and NSF; Focused on logic model formulation, indicators, metrics, and organizational infrastructure for ongoing performance assessment
- Served on ENG diversity work group focusing on improving innovation in STEM workforce
- Session organizer for AAAS seminar on Federal Investments in Research Evaluation, April 2010
- Participated in AAAS Water Affinity Group, presented Critical Water Issues in Arid Regions, May 2010

1/86-12/89: Graduate/Teaching Research Assistant, Department of Agricultural and Chemical Engineering, Colorado State University. Left position upon completion of Ph.D. to take faculty position at NMSU.

- Secured \$58,000 of external funding for doctoral research
- Received Armand Blanc Award for doctoral dissertation work
- Received Mined Land Reclamation Group Award for Masters Thesis work
- Taught one graduate course in Hydraulic Structures

5/83-10/85: Peace Corps Volunteer/Irrigation Engineer, Ngabu Agricultural Development Division, Malawi, Africa. Left position upon completion of service to attend graduate school.

- Rehabilitated three small holder irrigation schemes totaling 790 hectares
- Designed irrigation systems for two research stations
- Taught two training courses for Malawian extension agents and Peace Corps Volunteers
- Chosen as Peace Corps Volunteer of the Year, Malawi, 1984

Teaching:

Computing for Engineers, 1990 -2012, undergraduate.
Engineering Economics, 1998, undergraduate.
Artist Books on the Rio Grande, 2009, undergraduate.
Construction/Engineering Project Management, 1999-2015, undergraduate.
Irrigation and Drainage Engineering Design, 1990 - 2012, graduate and undergraduate.
Hydraulic Structures, 1992 -2014, graduate and undergraduate.
Hydraulic Systems Engineering, 2002, undergraduate
Statistical Hydrology, 2000-2014, graduate.
Geohydrology, 2005-2011, undergraduate.
Water Resources Development, 2000, graduate.
Open Channel Hydraulics, 1999-2015, graduate.
Water Resources Technician Training, 1993 -2010, short courses.
Surface Water Hydrology, 1994 -1996, graduate and undergraduate.
Groundwater Hydrology and Modeling, 1990 -1999, graduate.
GIS/GPS Foundations and Applications, 1993, graduate and undergraduate.

Professional Development Workshops Developed and Conducted:

Ethics for Engineers and Surveyors, 2009-2015, New Mexico State University
HEC RAS and Sediment Transport, ASCE Regional Meeting, October 2010
GeoRAS and GIS Tools for Rainfall Runoff Modeling (with Noma Borde), ASCE Regional Meeting, October 2010
Reflections on Ethics in a Long Career (with John Hernandez), ASCE Regional Meeting, October 2010

Awards and Honors:

- John Clark Family Endowed Professor for Excellence in Civil Engineering, 2013 – present.
- Bill Daniels Fellowship for Ethics, 2011.
- American Association for the Advancement of Science & Technology Policy Fellowship, 2009-2010.
- First and second places in the Sixth Scientific Papers Competition in Xinjiang Water Resources Research, Xinjiang Water Conservancy Society, China, for co-authored papers, 2011.
- Daniel Rousch Award for Excellence in Teaching, New Mexico State University, 2008.
- American Society of Engineering Educators, Southwest Regional Meeting, 2nd Outstanding Conference Paper Award, Austin, Texas, 1993.
- Armand Blanc Prize for Outstanding Young Researcher for Dissertation, 11th Congress on International Agricultural Engineering, Dublin, Ireland, 1989.
- 1988 Mine Land Reclamation Group Award for Masters thesis.
- Peace Corps Volunteer of the Year, Malawi, 1984.

University Administrative and Committee Service:

Associate Department Head, Civil Engineering, NMSU, 1998-present.
Chair and member, Undergraduate Curriculum Committee, Department of Civil Engineering, NMSU 2010-2014.
Founding member, Steering Committee member, Interdisciplinary Water Science and Management Program, NMSU, 2009-present.
Member of Search Committee for Dean of Engineering, 2015-2016.
Member of Search Committee for Dean of Engineering, 2009-2010.
Associate Director for Water Resources, Institute for Energy and the Environment, NMSU, 2008-2009.
Director of Agricultural Engineering Program, NMSU, 1992-2000.
Member of NMSU Water Resources Research Cluster, 2005-2011.
Chairman of the International Programs Coordinating Committee, NMSU, 1992-1993.
Chairman of IPCC Faculty Implementation Subcommittee, NMSU, 1992-1994.
Member of NMSU Sustainable Technology for Urban Agriculture Research and Demonstration Site Committee, 2002.
Member of Search Committee for Surveying Engineering Dept. Head, 1990, 2001.
Member of Search Committee for Director of New Mexico Water Resources Research Institute, 1999.
Member of Curriculum and Accreditation Committee, Department of CAGE, 1992-1996.
Member of President's Internal Review Committee for Center for International Programs, 1993-1994.

Community Service Activities:

Chair, ASCE Subcommittee on Levee and Dam Assessment, New Mexico Infrastructure Report Card, 2011.
Governor's Designee, New Mexico Soil and Water Conservation Commission, 2007-2010.
Supervisor and Chair, Doña Ana Soil and Water Conservation District, New Mexico, 2006-2009.
Director, Leasburg Mutual Domestic Water Consumers Association, New Mexico, 2003-2010; President 2009-2010.

Professional Activities:

National/New Mexico Society of Professional Engineers member, 1990-1996, 2015-2016; Southwest New Mexico Chapter President, 1994-1995; Vice President, 1993-1994; Secretary/Treasurer, 1992-1993; Scholarship Committee Chair, 1993-1995. Education Committee, 2015.
Member/Science & Technology Policy Fellow, American Association for the Advancement of Science, 2009-2010.
Member, American Evaluation Association, 2009-2013.
American Society of Civil Engineers member; Reviewer for Journal of Irrigation and Drainage Engineering, 1990-present. Chair, Subcommittee on New Mexico's Infrastructure Report Card, Flood Control, 2011. Ethics, HEC RAS Sediment and GeoHMS Seminar organizer and presenter, Regional Meeting, 2010.
American Society of Agricultural and Biosystems Engineers member, 1988-1995; President of New Mexico Chapter, 1992; Vice President, 1991; Treasurer, 1990. Faculty Advisor to NMSU Student Chapter, 1990-93; Journal Reviewer, 1992-present.
Member of Chi Epsilon and Alpha Epsilon honor societies; President of AE Nu Chapter, 1989.
Soil and Water Conservation Society member, 1993-1995.

University Service Projects:

Reaching the Pinnacle (RTP) (2010-2011). PI on an NSF Regional Alliance for recruiting and retaining students with disabilities in Science, Technology, Mathematics, and Engineering fields. Funded by the National Science Foundation.

Nile River Basin under Extreme Conditions (2008). PI on a workshop in Addis Ababa, Ethiopia bringing scientists from the Nile Basin countries to present the state of knowledge in their countries and developing coordinated research and policy development efforts for the future. Funded by the National Science Foundation.

Bureau of Indian Affairs Water Resources Technician Training Program (1993-2010). Conducted four and six week training programs in water resources science and management to Native American Tribal hydrology technicians. Sponsored by BIA.

Cochran Program (1999-2002). Hosted professional water resources specialists from the Central Asian countries of Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Sponsored by the Cochran Foundation through the US Department of Agriculture Foreign Agriculture Service.

King, J.P. 2002: Current Technology related to Drought and Irrigation, invited presentation at the New Mexico Water Resources Research Institute's Annual Water Meeting, Ruidoso, NM, October 10.

King, J.P., 2002. Agricultural Drainage, invited presentation at the Effects of Soil and Water Salinity in Crop Production Workshop, Texas A&M Agricultural Experiment Station, El Paso, Texas September 4..

King, J.P., 2002. Agricultural – Municipal Water Transfers in Elephant Butte Irrigation District, presented to the American Water Works Association, Tri-State Chapter, Anthony, New Mexico, July 11.

King, J.P., 2002. Agricultural Drainage, invited presentation at the 2002 Improving Irrigation Efficiency in Agriculture Conference, Las Cruces, New Mexico, March 21.

King, J.P., 2001: Water and Information Management in Elephant Butte Irrigation District, presented to the Texas-New Mexico Water Commission Management Advisory Committee, Las Cruces, New Mexico, November 11.

King, J.P., 2001: Agricultural Water Conservation, invited presentation at Water Conservation and Planning: Dollars and Sense Public Forum, League of Women Voters, Las Cruces, New Mexico, September 19.

5 Mar 2001: EBID Water Conservation Plan, presented at the American Society of Agricultural Engineers State Meeting, Las Cruces, New Mexico.

19 Oct 1999: Water Issues in the Elephant Butte Irrigation District Area, presented to the Water and Natural Resources Committee of the New Mexico Legislature, Albuquerque, New Mexico.

- 26 Mar 1996: Pump/Well Efficiency Measurement, presented at the Clovis Growers Day, New Mexico Cooperative Extension Service.
- 15 May 1995: Appropriate Irrigation Technology in the American Southwest, presented at the United Nation's Symposium on Arid Land and Water Management, Jerusalem, Israel.
- 8 Jan 1995: Irrigation Potential and Planning in Panamá's Middle Provinces, presented at Primer Encuentro Nacional de Riego, Los Santos, Panamá.
- 22 Jun 1994: Unsaturated Flow Through a Textural Interface, Presented at the 1994 International Summer Meeting of the ASAE, Kansas City, Missouri.
- 20 Jun 1994: Pipe Network Pumping Strategy Optimization by Genetic Algorithm, Presented at the 1994 International Summer Meeting of the ASAE, Kansas City, Missouri (with Mark Wentzel).
- 20 Jun 1994: Economic Optimization of River Management Using Genetic Algorithms, Presented at the 1994 International Summer Meeting of the ASAE, Kansas City, Missouri (with Hazem Fahmy).
- 12 Mar 1993: GPS Applications in Agricultural Engineering, Presented at the State Meeting of the ASAE, Las Cruces, NM. Also served as chair for the conference.
- 2 Apr 1993: Developing Engineering Skills through Expressive Writing. Presented at American Society for Engineering Education Gulf-Southwest Section, at Austin, Texas. 2nd conference paper award.
- 23 Apr 1993: Abandoned Well inventory in Doña Ana County, Presented at the State Meeting of ASCE, Las Cruces, NM. Invited paper.
- 3 Nov 1992: Irrigation on New Mexico's Acequias , Fifth National Irrigation Symposium, Irrigation Association of America, New Orleans.
- 25 Jun 1992: Writing in Engineering at New Mexico State University, Presented at A Conference on Writing in Engineering Design, Michigan Technological University, Houghton, MI (with Julie Seton).
- 2 Mar 1992: Arid Land Agriculture in Northwestern China, Presented at the State Meeting of the ASAE, Albuquerque, NM. Invited paper.
- 30 Oct 1990: Uncertainty in a Malting barley Management Expert System. Presented at Visions of the Future: Third National Irrigation Symposium, ASAE/Irrigation Association, Phoenix.

University Research Projects:

Transboundary Aquifer Assessment (2008-2011). New Mexico PI on a collaborative project with Texas Water Research Center, US Geological Survey, and Mexican agencies aimed at characterizing the Mesilla Aquifer system shared by the US and Mexico. Funded by USGS.

E. Coli Occurrence, Sources, and Mitigation in the Rio Grande (2007-2012). PI on a project funded by the US Environmental Protection Agency through the New Mexico Department of Agriculture to characterize sources

and movement of E. coli in southern New Mexico's the Rio Grande, and to develop best management practices for control of the bacteria.

Conceptual Model Development of the Rio Grande Project (2004-2011). PI on a project aimed at developing a Riverware-based model of the Rio Grande between Caballo Dam and El Paso, Texas. Funded by the Army Corps of Engineers.

Dam Safety Research Center (2008-2011). PI on a project funded by the New Mexico legislature to perform breach analyses, inundation mapping, and development of emergency action plans in the state.

Water Quality Forecasting for the Rio Grande at El Paso (2007-2009). Co-PI on a project to determine the feasibility of membrane treatment of Rio Grande water during winter months for municipal supply in El Paso, Texas. Developed ARIMA, neural network, and transfer noise function models to forecast total dissolved solids of raw water. Funded by AWWARF through Texas A&M University.

Watershed Restoration Action Strategy for the Lower Rio Grande (2006-2007). PI on a project aimed at developing a plan for mitigating E. coli contamination of the Lower Rio Grande. Funded by the Environmental Protection Agency through the New Mexico Environment Department.

Alcalde Surface Water – Groundwater Interaction Study (2005-2009). Co-PI on a project examining the interaction of surface water and groundwater along the Rio Grande and the effects of irrigation on hydrologic processes in northern New Mexico.

Seepage Analysis in the Arch-Hurley Conservation District (2004-2005). PI on a project to evaluate canal lining as a water conservation measure in the area of Tucumcari, New Mexico. Funded by the Bureau of Reclamation through the New Mexico Water Resources Research Institute.

Canal Seepage Losses in the Rio Grande Project (2002-2005). Co-PI on a project to quantify and model seepage from unlined canals in Elephant Butte Irrigation District, New Mexico, and El Paso County Water Improvement District No. 1, Texas. Funded by the Texas Water Research Institute.

Doña Ana County Evapotranspiration Evaluation (2001-2004). PI on project to determine agricultural depletions in Doña Ana County, New Mexico. Funded by EPA and administered by NM Water Resources Research Institute.

Riparian Evapotranspiration Measurement in Middle Rio Grande Area (1998-Present). PI and Co-PI on projects to measure evapotranspiration from salt cedar, cottonwood, and Russian olive using eddy covariance and other methods. Goal is to develop coefficients for estimating consumptive use using Penman equation. Funded by Bureau of Reclamation and administered by NM Water Resources Research Institute.

Salinity Sources and Movement in the Rio Grande Project (1999-2002). PI on a project to identify sources and destinations of overall salt load and of specific ions in the Rio Grande Project area of New Mexico. Funded by the New Mexico Interstate Stream Commission and the Southwest Center for Environmental Research and Policy (SCERP).

Economic Impact of Severe and Sustained Droughts on the Rio Grande Basin (1996-2000). Investigator on a project to evaluate drought effects on the Rio Grande Basin under current institutional constraints and under various scenarios of water marketing. Specific responsibilities include development of an integrated hydrologic, economic, and institutional model of the basin, and statistical evaluation and modeling of the region's droughts. Multi-state project funded by USGS and administered by NM Water Resources Research Institute.

Groundwater Impacts of NMSU Landfill (1997). Evaluated groundwater quality monitoring and geohydrologic data to assess and defend NMSU's compliance with state environmental regulations at the closed landfill on main campus. Funded by NMSU.

Spaceport EIS Groundwater Study (1996-1998). Assessed impacts of planned Spaceport activities on groundwater resources in Sierra, Otero, Luna, Chaves, and Doña Ana Counties, New Mexico for the project's Environmental Impact Statement. Work included water use assessments, MODFLOW modeling of the northern Jornada aquifer, and evaluation of existing water quality. Subcontractor to Physical Sciences Laboratory.

Optimization of Multi-use Water Resource Systems using Genetic Algorithms (1993-1995). Directed research on optimization of multi-use water system models using genetic algorithms. Funded by the New Mexico Water Resources Research Institute.

Irrigation Development Project, Panamá (1994-1995). Worked with the Ministry of Agriculture in Panamá to develop irrigation capacity and water management infrastructure. Project includes training, design, and construction components. Funded by NMSU and the Panamanian Ministry of Agriculture.

Consumptive Use of Water by Crops in the Middle Rio Grande Project (1994). Developed crop coefficients for calculating evapotranspiration for consumptive use estimates and water rights determination. Funded by the US Bureau of Reclamation.

New Mexico Water Conservation Study (1993-1995). PI on survey of water conservation policies and water price structuring as part of a multi-state effort. Funded by the New Mexico Water Resources Research Institute and the American Water Works Association.

Doña Ana County Water Plan/Wellhead Protection (1992-1994). PI on a project to develop a regional water plan for Doña Ana County, New Mexico, to be included in the State Water Plan. Funded by the New Mexico Interstate Stream Commission.

Water Use on New Mexico's Acequias (1992-1994). Co-PI on a project to study production value as well as socio-cultural value of irrigation water on small traditional irrigation systems in New Mexico. Funded by USDA-Cooperative Research Service.

Unsaturated Flow through Textural Interfaces in Engineered (Capillary) Barriers (1992-1993). PI on research project that developed a finite difference model to evaluate cover designs for hazardous waste isolation systems. Funded by the Department of Energy.

Developing Criteria for Small On-site Sewage Treatment Systems: Two Case Studies (1991-1992). Acted as PI on a project to improve design procedures for small rural sewage treatment works. Evaluated two failed on-site

sewage systems to identify causes of failure and improve design criteria to avoid future failures. Funded by the Chino Mines Corporation.

China - USA Arid Land Agriculture Collaborative Research (June-July 1991). Served as Civil/Agricultural Engineer on an interdisciplinary study of arid land agriculture in China's Gansu Province and Xinjiang Autonomous Region. Funded by USDA-OICD.

Optimization of Pumping Strategies for Municipal Supplies (1990). Performed dynamic modeling analysis of pumped water systems to schedule off-peak power usage. Funded by New Mexico Department of Energy, Minerals, and Natural Resources.

Artificial Intelligence Applications in Irrigation Management (1988-1989). Developed an expert system for advising barley growers on irrigation and fertilizer management strategies. Wrote all project reports. Funded by the Colorado Institute for Artificial Intelligence.

Water-induced Erosion Processes and Modeling (1986-1988). Performed rainfall simulator experiments and sediment size analyses to identify and characterize erosion processes, and produced all project reports. Funded by the National Science Foundation.

Consulting Work:

Elephant Butte Irrigation District, New Mexico, 1995-Present: Technical expert in negotiation on water management issues; projects include water rights adjudication, and court-ordered mediation concerning development of an operating agreement among EBID, El Paso County Water Improvement District No. 1, and the U.S. Bureau of Reclamation

Elephant Butte Irrigation District, New Mexico, 1992-Present: Working with Elephant Butte Irrigation District's engineering and hydrology sections to maintain flow measurement stations, install new measurement stations, develop an internal water quality monitoring program, develop operating procedures, build and maintain hydraulic structures, and evaluate contract bids and designs. Produced District's Climate Change Plan, Water Plan and Drought Plan.

Middle Rio Grande Conservancy District, Albuquerque, New Mexico, 2004-2005: Performed hydrologic analysis to quantify amount of water made available for endangered species management through irrigation forbearance. Produced final report and presentation to MRGCD.

World Wildlife Fund, Las Cruces, New Mexico, 2001-2002: Conducted study to identify sources of water for river restoration efforts in the Rio Grande Project area of New Mexico and Texas. Produced final report to WWF.

Attorney General, New Mexico, 2003-present. Provide expert services for issues relating to potential litigation between New Mexico and Texas regarding the Rio Grande Project.

Bureau of Indian Affairs, Office of Trust Responsibilities, Washington, D.C., 2000-2001: Evaluated geohydrology studies of Fence Lake Coal Mine for potential impacts on Zuni Salt Lake; carried out geochemical and data analyses; produced final report of findings to BIA.

L. M. Stoller Corp., New Mexico, 1996, 2001-2002. Provided expert analysis of flooding frequency, magnitude, and stage through the town of Carlsbad, NM, for a successful appeal of the flood zoning in the Flood Insurance Rate Maps developed by FEMA. Analysis included HEC 1 and HEC 2 model implementation.

Jicarilla Apache Nation, New Mexico, 1998-2000. Developed irrigation alternatives for Nation as part of a water planning study by the Jicarilla Apache Nation Natural Resources Department, including evaluation of previous planning and existing sprinkler and surface irrigation facilities, preliminary design, cost estimation, and consumptive use determination, and training of Tribal Council on their Water Code. Funded by the Administration for Native Americans.

The Land Group, Inc., New Mexico, 1996-2000: Developed geohydrology studies for municipal water supply; Drainage studies and designs for highway structures; provided expert analysis in litigation regarding sedimentation problems on Rio Chama, New Mexico, and flooding and sediment control in Catron County, New Mexico.

Training on Erosion and Sediment Dynamics in New Mexico (1997). Trained personnel from New Mexico's Surface Water Bureau on quantitative methods in assessing erosion and sediment movement, focusing particularly on the Rio Grande and its watersheds. Worked as subcontractor for Tetra Tech, Inc.

Confederated Tribes of the Chehalis River, Washington, 1994-1995: Worked with Tribal Natural Resources Department to implement a groundwater monitoring program aimed at developing a computer model for risk assessment and management of the groundwater supply.

Contel Communications, Inc., Texas, 1993. Performed Global Positioning System (GPS) surveys of three sites for cellular telephone communications towers in the El Paso, Texas area.

Elephant Butte Irrigation District, New Mexico, 1993: Trained ditch riders and hydrology section personnel on basic hydraulics, flow measurement, water accounting, and remedial math.

El Paso County Water Improvement District #1, Texas, 1993: Trained ditch riders and hydrology section personnel on basic hydraulics, flow measurement, water accounting, and remedial math.

Tetra Tech, Inc., Reston, Virginia, 1991-1992: Compiled and reviewed literature relating to sediment delivery estimation methods and nonpoint-source pollution control for inclusion in EPA document *Guidance Specifying Management Measures for Sources of Nonpoint Pollution in Coastal Waters*, produced under the Coastal Zone Act of 1990.

Engineering Projects in Peace Corps, Malawi, Africa:

Soil Conservation and Sediment Control, Ngabu Agricultural Development Division, 1983-1985. Designed erosion control structures and sediment control practices for agricultural and range lands in Chikwawa and Nsanje Districts.

Bvumbwe Irrigation Scheme, Tyolo District, 1985: Carried out engineering analysis for installation of a Netafim drip irrigation system for 10 hectares of coffee and macadamia trees on an agricultural research station.

Kasinthula Irrigation Scheme, Chikwawa District, 1984-1985: Installed irrigation systems for research station, including surface and sprinkler systems, and subsurface drainage for upland crops and rice.

Muona Irrigation Scheme, Nsanje District, 1983-1984: Designed and supervised rehabilitation project on a gravity-fed small-holder rice irrigation scheme.

Nkhate Irrigation Scheme, Chikwawa District, 1983-1984: Evaluated gravity rice irrigation scheme built by Taiwanese foreign aid agency prior to handing over to the Government of Malawi. Designed modifications for sediment ejection, hydraulic control and flow measurement, and energy dissipation.
