**Subject:** Allow open burning at LANL

Mr. John E. Kieling,

Please permit open burning at LANL! Allow them to continue operating under their current permit.

Open burning is a necessary process at LANL to operate.  
People are spreading misinformation about what this really is and the consequences.  
The environmental effects are minimal.

LANL must have the capability to test and destroy high explosives.  
Otherwise the work must be sent out of state.

Sincerely,  
Thomas R. and Roberta M. Shelley
