Re: Rio Chama Chevron (Facility ID# 31988, NOV# 38 20240813 0049)
19698 N Hwy 84 285, Espanola, NM 87532

Date of NOD: April 22, 2025

Following an inspection on August 13, 2024 by the New Mexico Environment Department's ("Department") Petroleum Storage Tank Bureau ("PSTB"), the facility noted above has been cited with Class B violation(s) pursuant to section 20.5.116.1601.B(1) and (2) of the Petroleum Storage Tank Regulations, Title 20 Chapter 5 of the New Mexico Administrative Code ("NMAC"). The Department provided you with a Warning Letter – Class B Violations ("WLB") with the inspection report informing you of the violation(s) that were identified during the inspection. The Petroleum Storage Tank Section ("PSTS") of the Resource Protection Compliance Enforcement Bureau ("RPCEB") of the Compliance & Enforcement Division ("CED") subsequently issued a Notice of Violation ("NOV") allowing 30 days from the date of the NOV to correct them. Because the violation(s) that were outlined in the NOV and inspection report were not corrected within the required timeframe, the Department issued a Notice of Deficiency ("NOD") on the date noted above (see "Date of NOD") re-stating the violation(s) that were identified during the inspection and providing you with an additional 30 days from the date of the NOD to correct the violation(s).

If these violation(s) listed in the table below are not corrected, a release to the environment could occur or a release could go undetected. In order to correct the violation(s) and come into compliance, please ensure that any corrective actions taken remain in compliance with 20.5 NMAC regulations. **If the violation(s) in the table are not corrected within 30 days from the date of this Notice of Intent to Red Tag, the subject tank(s) noted in the table will be classified as ineligible for delivery, deposit or acceptance of product, in accordance with 20.5.116.1602.B(3) NMAC.**

SCIENCE | INNOVATION | COLLABORATION | COMPLIANCE

Violations included in this action:

Violation Code	Tank ID(s)	Violation Description
20.5.107.709.A(3) NMAC	33273	Failure to replace piping connected to a UST that was determined by the department inspector to have corrosion or signs of deterioration or failure.
20.5.118.1801.B NMAC	33273, 33274	Failure to investigate all suspected releases of regulated substances within seven days of discovery of the suspected release.

This means that, in accordance with 20.5.116.1603 NMAC, the following actions will occur:

- (a) The PSTS will physically place red tag(s) prohibiting the delivery, deposit or acceptance of product on the fill port(s) of the tank(s) with the continuing Class B violation(s). The red tag(s) must remain affixed on the tank(s) until the violation(s) are corrected.
- (b) The PSTS will post the name and address of this facility on the PSTB's website list of facilities that are ineligible for delivery, deposit or acceptance of product.
- (c) The PSTS will post a certificate, conspicuously displayed at the facility clearly prohibiting any delivery, deposit or acceptance of product at every storage tank at the facility to which the Department has affixed a red tag.

It is unlawful for any person, other than an authorized representative of the Department, to remove, tamper with, destroy or damage a red tag affixed to any storage tank or certificate posted at a storage tank facility by Department personnel (see 20.5.116.1603.C NMAC). Owners and operators shall continue to perform leak detection, corrosion protection, and monthly inspections, in addition to any other performance requirements in 20.5 NMAC, on the tanks that have a red tag (see 20.5.116.1603.D NMAC).

This facility is not located in a rural and remote area as defined in 20.5.101.7.R(14) NMAC and continued operation of the tank is not a matter of national security. If you believe that your facility is located in a rural and remote area as it is defined in the regulations and this Notice of Intent to Red Tag does not designate it as rural and remote, please contact the Department. If this facility is operated by the United States Department of Defense ("DOD"), DOD may notify the Department that continued operation of the tank(s) is a matter of national security. The PSTS will defer classifying this facility as ineligible for delivery for up to 180 days if it is designated as rural and remote or a matter of national security (see 20.5.116.1608 NMAC).

Please notify the PSTS Enforcement Officer, Philip Santana, at (505) 980-0398 if you do not understand the violation(s) cited, or to notify the PSTS of the schedule of when work is planned to be done in order to correct the violation(s). You are required to notify the PSTS of any equipment installation, replacement, repair or modification (see 20.5.116.1602.D NMAC). ***The PSTS will work with you to ensure the violation(s) are in compliance with 20.5 NMAC and are corrected as soon as possible.***

Unless the violation(s) cited in this Notice of Intent to Red Tag are corrected, the facility may not be in compliance with the requirements and provisions of the Petroleum Storage Tank Regulations as required for eligibility for reimbursement from the Corrective Action Fund if your facility has a release (see 20.5.123.2303 NMAC). **If you have corrected the violation(s) cited in this Notice of Intent to Red Tag, please contact the PSTS Enforcement Officer immediately.**

Thank you in advance for your attention to this matter.
