Subject: LANL Open Burning

Mr. John E. Kieling
Program Manager
New Mexico Environment Department Hazardous Waste Bureau
2905 Rodeo Park Drive East, Building 1
Santa Fe, New Mexico 87505

Subject: Hazardous waste permit from the state of New Mexico for the storage and treatment of waste at Los Alamos National Laboratory
Dear Mr. Kieling,
Please reconsider renewing the hazardous waste permit so New Mexicans do not have to deal with it later at taxpayer's expense.
Open burning in remote Lab locations has been proven a safe way to destroy it in the past and nothing has changed.
Important national security work now conducted at LANL may be sacrificed and in this time of terrorism threats, that would be a mistake.
The Lab provides unique training and other services to our fighting armed forces that should not be jeopardized by limiting its ability to conduct such work because of waste reduction procedures that will end up having the waste transported to other locations on our public highways.

We are expressing our own views and are not representing the Laboratory in any manner.

Sincerely,
Concerned citizens of New Mexico

Dale J. Garcia and Sauni May-Garcia
