Subject: LANL Open Burn Permit

Dear Mr. Kieling,

I am concerned about the possibility that NMED may deny LANL's open burning permit. I am a resident of Los Alamos county. In reading about the environmental impact potentially caused by open burning, it appears very minor. Denial of the open burn permit will significantly impact LANL's ability to train soldiers to defend themselves against improvised explosive devices in other countries. A coworker of mine has a son serving in Afghanistan. He is concerned that his son be given the best tools and training to defend against the forces fighting against the U.S. We are at war against these forces. I ask that you make the right decision for the country and approve the open burn permit. This will allow LANL to continue with this training which supports our national security.

Thank You
