Safety Message (ICS 208)

1. Incident Name: Gold King Mine Blowout	2. Operational Period: Date From: 8/13/15 Time From: 7:00 am	Date To: 8/14/15 Time To: 7:00 am
--	--	--------------------------------------

Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

As you continue to increase field activities please remember to be observant of the weather and be watchful of any unstable ground, continue your awareness of slip, trips, and falls. Wear appropriate footwear.

Prior to the start of the day, please recheck your field PPE. Anyone visiting the mine site is required to wear at minimum safety shoes, a hard hat, safety vest, and protective eyewear. Review MSDS sheets prior to handling any hazardous material. Ensure you decon your PPE properly after use. If you need additional PPE see your supervisor or the safety officers.

The altitude makes the sun exposure more intense, continue to hydrate and use the buddy system. Use sunscreen, wear a hat, and take frequent breaks.

Fatigue will become an issue with the stress of the situation, long hours, etc. Please remember to take breaks, remember to eat, stay hydrated, and avoid the use of alcohol. A laugh here and there doesn't hurt either!

A portion of U.S. Highway 550 is listed alongside the "highway of death" in Iraq and the "Death Road" in Bolivia as one of the 12 most dangerous roads in the world. Only 12 roads in the world made the list.

In southwest Colorado you don't need a hunting license; you have a driver's license, please watch for wildlife, avoid distracted driving (texting and talking), wear your seatbelt, and obey all traffic laws.

4. Site Safety Plan Required? Yes
Approved Site Safety Plan(s) Located At: Gold King Mine (mine operations), Combined water & sediment sampling health and safety plan is under development (8/11/15-EPA IMT SO arrival pending continued work)

Incident Action Plan (ICS 215A)

1. Incident Name: Gold King Mine	2. Incident Number: A8K9
3. Date/Time Prepared: Date: 8/13/15 Time: 4:00pm	4. Operational Period: 8/13/15 thru 8/15/15 06:00-06:00
5. Incident Area 6. Hazards/Risks	7. Mitigations
5. Incident Area Operations:	
Mine Operations: Treatment of mine waste (settling ponds) also by adjusting ph by adding flocculants. Full Site HASP for Gold King Mine operations are detailed in the site specific health and safety plan located with the site OSC.	
Sample Teams: Three water sampling teams have been developed to sample the river water, river sediment, and private well water. CDPHE is performing municipal water sampling and not included in the EPA ops plan.	
River Sampling: START is collecting river water samples at seven locations, four in Durango and three in Silverton.	
Sediment Sampling: START is collecting composite 2" sample sediment cores along the river in Durango and at various public access points throughout the city. Two sampling teams are deployed for these activities during this operational period.	
Well Sampling: Well sampling is currently being performed with two START teams encompassing private water wells.	
Water distribution: Based on city and private citizen requests EPA START is providing water distribution services of both potable and non-potable water.	
6. Hazard/Risks – per operations & general hazard information	
Mine Operations: Hazards/Risks are identified in the site specific health and safety plan per the mine operations plan.	
Sample Teams: Some of the hazards and risks for the sample teams are severe weather, altitude, fatigue, heat stress/proper hydration, slip trips and falls, along with drivers safety.	
7. Mitigations:	
Mine Operations: Mitigations and PPE are specified in the site specific health and safety plan operations.	
Sample Teams: severe weather awareness, PPE including PFD's (if needed), basic field H&S awareness, drivers safety.	
8. Prepared by (Safety Officer): Name: Jason Nakatsu _____ Signature:
