Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.
Q	One or more quality control criteria failed.

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
Q	One or more quality control criteria failed.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-117359-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-117359-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

Following DoD QSM guidelines, manual integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure, Acceptable Manual Integration Practices, SOP No.: Q-S-002. The reason(s) for manual integration have been documented on the affected chromatogram(s), which is/are provided in the raw data package. The raw data also includes the original chromatogram(s) prior to any manual integration being performed. Manual integrations are detailed in the manual integration summary forms following this narrative.

It should be noted that samples with elevated Limits of Quantitation (LOQs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the LOQs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 11/27/2018 9:45 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.8º C.

Receipt Exceptions

One of Two Sodium Thiosulfate VOA vials for sample ID TB-S3-211118-01 was received containing a bubble greater than 6mm in diameter. Sufficient volume was available to proceed without using this vial for analysis.

The DI Water Terracores for sample V-S3-211118-492 (280-117359-2) and V-S3-211118-512 (280-117359-4) were received after the 48 hour hold time for freezing had expired. As instructed by the client, the laboratory proceeded with the standard analysis.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-S3-211118-492 (280-117359-2) and V-S3-211118-512 (280-117359-4) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 11/21/2018 and analyzed on 12/03/2018 and 12/04/2018.

cis-1,3-Dichloropropene failed the recovery criteria high for LCS 280-439682/2-A. All associated results have been flagged "Q". This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

1,1,2,2-Tetrachloroethane exceeded the RPD limit for LCSD 280-439682/3-A. All associated results have been flagged "Q". Refer to the QC report for details. The LCS and LCSD each recovered within control limits for this analyte.

Job ID: 280-117359-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

The continuing calibration verification (CCV) associated with batch 280-439624 recovered above the upper control limit for trans-1,3-Dichloropropene (+20.3%D). The bias was high and the samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Sample TB-S3-211118-01 (280-117359-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/03/2018.

Acetone, a common laboratory contaminant, was detected in method blank MB 280-439604/6 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Samples V-S3-211118-492 (280-117359-2) and V-S3-211118-512 (280-117359-4) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/03/2018 and analyzed on 12/09/2018 and 12/10/2018.

The continuing calibration verification (CCV) associated with batch 280-440502 recovered above the upper control limit for 1,2-Dibromopropane (surrogate). The samples associated with this CCV were within control for this surrogate; therefore, the data have been reported. (CCV 280-440502/50). The following sample is associated: V-S3-211118-492 (280-117359-2).

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-S3-211118-01 (280-117359-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 11/29/2018 and analyzed on 12/04/2018.

Compound 1,2-Dibromopropane, Ethylene Dibromide, 1,2-Dibromo-3-Chloropropane, and 1,2,3-Trichloropropane eluted outside the retention time window on the primary and secondary columns for the following sample: (LCSD 280-439245/2-A). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

1,2-Dibromopropane eluted outside the retention time window on the primary and secondary columns for the following sample: (CCV 280-439714/39). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-S3-211118-492 (280-117359-3) and P-S3-211118-512 (280-117359-5) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 11/21/2018 and analyzed on 12/03/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-S3-211118-01 (280-117359-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 11/29/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-S3-211118-492 (280-117359-3) and P-S3-211118-512 (280-117359-5) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/04/2018 and analyzed on 12/07/2018.

Job ID: 280-117359-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Diesel Range Organics [C10-C28] was detected in method blank MB 280-439845/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-S3-211118-492 (280-117359-2), P-S3-211118-492 (280-117359-3), V-S3-211118-512 (280-117359-4) and P-S3-211118-512 (280-117359-5) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 11/28/2018 and 11/29/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	False	Headspace larger than 1/4" in one or more vials, one vial with accpt. headspace
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.
M	Manual integrated compound.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-117391-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

Following DoD QSM guidelines, manual integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure, Acceptable Manual Integration Practices, SOP No.: Q-S-002. The reason(s) for manual integration have been documented on the affected chromatogram(s), which is/are provided in the raw data package. The raw data also includes the original chromatogram(s) prior to any manual integration being performed. Manual integrations are detailed in the manual integration summary forms following this narrative.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 11/28/2018 9:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.6° C.

GASOLINE RANGE ORGANICS (GRO) - Solid
Sample P-S1-271118-020 (280-117391-2) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 11/27/2018 and analyzed on 12/03/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water
Sample TB-S1-271118-01 (280-117391-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/04/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)
Sample P-S1-271118-020 (280-117391-2) was analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/01/2018 and analyzed on 12/05/2018 and 12/10/2018.

The following samples were silica gel cleaned (Silica Gel lot number 00007): P-S1-271118-020 (280-117391-2), (280-117391-A-2-B MS), (280-117391-A-2-D MS), (280-117391-A-2-C MSD) and (280-117391-A-2-E MSD). This is for preparation batch 280-439571 and analytical batch 280-440601.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-439571/1-A in analysis batch 440601 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to

Job ID: 280-117391-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

the QC report for details. This is considered acceptable because the detection is less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Sample P-S1-271118-020 (280-117391-2) was analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 11/29/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.

GC VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
Q	One or more quality control criteria failed.
M	Manual integrated compound.
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-117400-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-117400-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

Following DoD QSM guidelines, manual integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure, Acceptable Manual Integration Practices, SOP No.: Q-S-002. The reason(s) for manual integration have been documented on the affected chromatogram(s), which is/are provided in the raw data package. The raw data also includes the original chromatogram(s) prior to any manual integration being performed. Manual integrations are detailed in the manual integration summary forms following this narrative.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 11/28/2018 9:00 AM; the samples arrived in good condition (except as noted below), properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.6° C.

Receipt Exceptions

The containers listed below were received partially frozen. As instructed by the client, the laboratory proceeded with analysis.
1) RB-S3-271118-01: 2 of 3 VOA vials were received frozen for VOC analysis and GRO analysis. 1 of 3 VOA vials were received frozen for EDB analysis.

2) RB-S3-271118-02: 1 of 2 VOA vials were received frozen for VOC analysis. 3 of 3 VOA vials were received frozen for GRO analysis. 2 of 3 VOA vials were received frozen for EDB analysis, with the third VOA vial received with a compromised septum (not leaking but visibly bulging unevenly out of the cap).

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Samples RB-S3-271118-01 (280-117400-1) and RB-S3-271118-02 (280-117400-2) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/03/2018.

Acetone was detected in method blank MB 280-439604/6 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP

Samples RB-S3-271118-01 (280-117400-1) and RB-S3-271118-02 (280-117400-2) were analyzed for EDB and DBCP in accordance with

Job ID: 280-117400-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

8011. The samples were prepared on 11/29/2018 and analyzed on 12/04/2018.

Compound 1,2-Dibromopropane, Ethylene Dibromide, 1,2-Dibromo-3-Chloropropane, and 1,2,3-Trichloropropane eluted outside the retention time window on the primary and secondary columns for the following sample: (LCSD 280-439245/2-A). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

1,2-Dibromopropane eluted outside the retention time window on the primary and secondary columns for the following sample: (CCV 280-439714/39). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

Compound 1,2-Dibromo-3-Chloropropane eluted outside the retention time window on the primary and secondary columns for the following sample: (CCV 280-439714/43). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO)

Samples RB-S3-271118-01 (280-117400-1) and RB-S3-271118-02 (280-117400-2) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/04/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples RB-S3-271118-01 (280-117400-1) and RB-S3-271118-02 (280-117400-2) were analyzed for Diesel Range Organics (DRO) in accordance with 8015D DRO. The samples were prepared on 11/29/2018 and analyzed on 12/07/2018.

Motor Oil (C20-C38) failed the recovery criteria high for LCS 280-439312/4-A and LCSD 280-439312/5-A. Associated results have been flagged "Q". Refer to the QC report for details. The associated samples were either non-detect or <LOQ for this analyte; therefore, the data have been qualified and reported.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-439312. A duplicate LCS (:LCSD) was performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	False	Refer to Job Narrative for details.
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
Q	One or more quality control criteria failed.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.

GC Semi VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.
Q	One or more quality control criteria failed.
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-117531-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-117531-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 11/30/2018 at 9:15 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.3º C.

Receipt Exceptions

The DI water terracores for sample ID V-S1-271118-140 were collected 11/27 at 14:35, and received on 11/30 at 09:15. Samples have exceeded the 48 hour hold time required for freezing. The client was notified and directed the laboratory to proceed with the analysis.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Samples V-S1-271118-140 (280-117531-4), V-S1-291118-260 (280-117531-5) and V-S1-291118-279 (280-117531-6) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 11/27/2018 and 11/29/2018 and analyzed on 12/08/2018.

The initial calibration verification ((ICV 280-440313/20) recovery for Dichlorodifluoromethane (-23.0%D) in batch 280-440313 was outside the control limit. The failing compound is considered a poor performer and is allowed up to 30%D. Data was reported and flagged. Associated samples are V-S1-271118-140 (280-117531-4), V-S1-291118-260 (280-117531-5) and V-S1-291118-279 (280-117531-6) .

The recoveries for surrogates 1,2-Dichloroethane-d4, 4-Bromofluorobenzene, Dibromofluoromethane and Toluene-d8 failed the surrogate recovery criteria low for V-S1-291118-279 (280-117531-6). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed. Data was reported and flagged per DOD QSM.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Sample TB-S1-291118-01 (280-117531-7) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/13/2018.

Acetone was detected in method blank MB 280-441068/8 at a level that was less than one half the LOQ; therefore, corrective action was deemed unnecessary. The value should be considered an estimate, and has been flagged “J” in accordance with the DoD QSM.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 280-117531-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

EDB AND DBCP

Samples V-S1-271118-140 (280-117531-4), V-S1-291118-260 (280-117531-5) and V-S1-291118-279 (280-117531-6) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/03/2018 and analyzed on 12/09/2018 and 12/10/2018.

The continuing calibration verification (CCV 280-440502/50) associated with batch 280-440502 recovered above the upper control limit for surrogate 1,2-Dibromopropane. The samples associated with this CCV were within control for this surrogate; therefore, the data have been reported.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP

Sample TB-S1-291118-01 (280-117531-7) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared and analyzed on 12/11/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE PETROLEUM HYDROCARBONS (GC)

Samples P-S1-271118-140 (280-117531-1), P-S1-291118-260 (280-117531-2) and P-S1-291118-279 (280-117531-3) were analyzed for Volatile Petroleum Hydrocarbons (GC) in accordance with 8015D GRO. The samples were prepared on 11/27/2018 and 11/29/2018 and analyzed on 12/03/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO)

Sample) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/04/2018.

The continuing calibration verification (CCV) associated with batch 280-439783 recovered above the upper control limit for GRO (C6-C10) @ 38.2%D. Sample TB-S1-291118-01 (280-117531-7) associated with this CCV was non-detect for the affected analytes; therefore, the data have been reported with NCM and flags.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-S1-271118-140 (280-117531-1), P-S1-291118-260 (280-117531-2) and P-S1-291118-279 (280-117531-3) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/04/2018 and analyzed on 12/07/2018.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-439729/1-A at a level that was less than one half the LOQ; therefore, corrective action was deemed unnecessary. The value should be considered an estimate, and has been flagged “J” in accordance with the DoD QSM.

The recovery for surrogate o-Terphenyl was outside the surrogate recovery criteria low in sample P-S1-291118-279 (280-117531-3). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples P-S1-271118-140 (280-117531-1), P-S1-291118-260 (280-117531-2), P-S1-291118-279 (280-117531-3), V-S1-271118-140 (280-117531-4), V-S1-291118-260 (280-117531-5) and V-S1-291118-279 (280-117531-6) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/04/2018, 12/06/2018 and 12/07/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
Q	One or more quality control criteria failed.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-117650-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 12/4/2018 9:15 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.7° C.

Receipt Exceptions

The DI water terracores for sample ID V-S1-011218-400 were collected 12/01 at 1605, and received on 12/04 at 0915, after the 48 hour hold time required for freezing had been exceeded. The samples were frozen upon receipt. The client was notified, and the laboratory proceeded with analysis.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-S1-031218-414 (280-117650-2) and V-S1-011218-400 (280-117650-4) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 12/01/2018 and 12/03/2018 and analyzed on 12/13/2018 and 12/14/2018.

The following Q5 DoD sample was analyzed without a closing CCV in error: V-S1-011218-400 (280-117650-4). The 2nd vial for sample 117650-4 was cracked and the DI water had leaked out; therefore, reanaysis was not possible. As such, the data have been qualified and reported.

The initial calibration verification (ICV) result for batch 441097 was outside of the control limit for Dichlorodifluoromethane at -23.0%D. This compound is considered a poor performer. Sample results were non-detects, and have been reported as qualified data.

1,2,3-Trichloropropane failed the recovery criteria high for LCSD 280-441341/3-A. Associated results have been flagged "Q". Refer to the QC report for details. This analyte was biased high in the LCSD and was not detected in the associated samples; therefore, the data have been reported. trans-1,3-Dichloropropene exceeded the RPD limit for the LCS/LCSD. Associated results have been flagged "Q". Refer to the QC report for details. It was noted that the LCS and LCSD each recovered within control for this analyte.

The following compounds were outside control limits in the continuing calibration verification (CCV) associated with batch 280-441537: Acetone (-24.0%D) and n-Butylbenzene (+21.2%D). These compounds are not classified as Calibration Check Compounds (CCCs) in the reference method, and the laboratory defaults to in-house and/or project-specific criteria for evaluation. There was insufficient holding time remaining for re-analysis; therefore, the data have been qualified and reported. The associated samples contained detections for the following analyte: n-Butylbenzene.

Job ID: 280-117650-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water
Sample TB-S1-031218-01 (280-117650-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/17/2018.

Acetone was detected in method blank MB 280-441540/4 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid
Samples V-S1-031218-414 (280-117650-2) and V-S1-011218-400 (280-117650-4) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/07/2018 and analyzed on 12/09/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water
Sample TB-S1-031218-01 (280-117650-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared and analyzed on 12/11/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid
Samples P-S1-031218-414 (280-117650-3) and P-S1-011218-400 (280-117650-5) were analyzed for Volatile Petroleum Hydrocarbons (GC) in accordance with 8015D GRO. The samples were prepared on 12/13/2018 and analyzed on 12/14/2018.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-441160 and analytical batch 280-441189. A duplicate LCS (LCSD) was performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water
Sample TB-S1-031218-01 (280-117650-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/13/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)
Samples P-S1-031218-414 (280-117650-3) and P-S1-011218-400 (280-117650-5) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/13/2018 and analyzed on 12/17/2018.

Per the method comments, the following samples are reported from analysis of extracts that were silica gel cleaned: P-S1-031218-414 (280-117650-3), P-S1-011218-400 (280-117650-5), (LCS 280-441182/2-A), (LCS 280-441182/3-A), (MB 280-441182/1-A), (280-117650-A-3-B MS), (280-117650-A-3-D MS), (280-117650-A-3-C MSD) and (280-117650-A-3-E MSD). This is for preparation batch 280-441182 and analytical batch 280-441579.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-441182/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 280-117650-1 (Continued)

PERCENT SOLIDS

Samples V-S1-031218-414 (280-117650-2), P-S1-031218-414 (280-117650-3), V-S1-011218-400 (280-117650-4) and P-S1-011218-400 (280-117650-5) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/07/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

List Number: 1
Creator: Zimmerman, Steven M

List Source: TestAmerica Denver

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	False	See Case Narrative
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
M	Manual integrated compound.
D	The reported value is from a dilution.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
M	Manual integrated compound.
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-117710-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 12/5/2018 at 12:08 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.1° C.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Samples V-S1-041218-461 (280-117710-2) and V-S1-041218-459 (280-117710-4) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 12/11/2018 and analyzed on 12/13/2018.

4-Bromofluorobenzene (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for V-S1-041218-461 (280-117710-2). Because of the required dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information. Associated results are flagged "Q".

Hexachlorobutadiene exceeded the RPD limit for LCSD 280-440741/3-A. Percent recoveries were within control limits. Associated results are flagged "Q".

Samples V-S1-041218-461 (280-117710-2)[10X] and V-S1-041218-459 (280-117710-4)[10X] required dilution prior to analysis due to the nature of the sample matrix. The reporting limits have been adjusted accordingly.

The following compounds were outside control limits in the continuing calibration verification (CCV) associated with batch 280-441194: n-Butylbenzene, Acetone. These compounds are not classified as Calibration Check Compounds (CCCs) in the reference method. Associated results are flagged "Q".

Internal standard responses were outside of acceptance limits for the following samples: V-S1-041218-461 (280-117710-2). The samples shows evidence of matrix interference.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Sample TB-S1-041218-01 (280-117710-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/18/2018.

The continuing calibration verification (CCV) associated with batch 280-441787 recovered above the upper control limit for 2-Hexanone and 1,2,3-Trichlorobenzene. The samples associated with this CCV were non-detect for the affected analytes; therefore, the data have been reported. Associated results are flagged "Q".

Job ID: 280-117710-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP
Samples V-S1-041218-461 (280-117710-2) and V-S1-041218-459 (280-117710-4) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/07/2018 and analyzed on 12/10/2018.

1,2-Dibromopropane failed the surrogate recovery criteria low for V-S1-041218-461 (280-117710-2) and V-S1-041218-459 (280-117710-4). Because of the required dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information. Associated results are flagged "Q".

Samples V-S1-041218-461 (280-117710-2)[100X] and V-S1-041218-459 (280-117710-4)[50X] required dilution prior to analysis due to abundance of target analytes. The reporting limits have been adjusted accordingly.

Compound 1,2,3-Trichloropropane eluted outside the retention time window on the primary and secondary column for the following sample: (CCV 280-441016/30). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP
Sample TB-S1-041218-01 (280-117710-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/12/2018 and analyzed on 12/13/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE PETROLEUM HYDROCARBONS (GC)
Samples P-S1-041218-461 (280-117710-3) and P-S1-041218-459 (280-117710-5) were analyzed for Volatile Petroleum Hydrocarbons (GC) in accordance with 8015D GRO. The samples were prepared on 12/13/2018 and analyzed on 12/14/2018.

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-S1-041218-461 (280-117710-3). Because of the required dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information. Associated results are flagged "Q".

Sample P-S1-041218-461 (280-117710-3)[50X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO)
Sample TB-S1-041218-01 (280-117710-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/13/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)
Samples P-S1-041218-461 (280-117710-3) and P-S1-041218-459 (280-117710-5) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/13/2018 and analyzed on 12/17/2018 and 12/18/2018.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-441182/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. However, because the result concentration was less than ½ the reporting limit, no corrective action was necessary.

Sample P-S1-041218-461 (280-117710-3)[2X] required dilution prior to analysis to bring the concentration of target analyte within the calibration range. The reporting limits have been adjusted accordingly.

The following samples are reported from analysis of extracts that were silica gel cleaned: P-S1-041218-461 (280-117710-3),

Job ID: 280-117710-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

P-S1-041218-459 (280-117710-5), (LCS 280-441182/2-A), (LCS 280-441182/3-A), (MB 280-441182/1-A).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-S1-041218-461 (280-117710-2), P-S1-041218-461 (280-117710-3), V-S1-041218-459 (280-117710-4) and P-S1-041218-459 (280-117710-5) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/08/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
U	Undetected at the Limit of Detection.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
Q	One or more quality control criteria failed.
M	Manual integrated compound.

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-117794-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 12/6/2018 1:03 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.7° C.

Receipt Exceptions

Client provided a revised chain of custody (COC) indicating to not perform the MS/MSDs listed on the original COC. Both COCs are included in this report.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-S1-051218-510 (280-117794-2) and V-S1-051258-510 (280-117794-4) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 12/05/2018 and analyzed on 12/13/2018.

The initial calibration verification (ICV) result for batch 441097 was outside of the control limit for Dichlorodifluoromethane (-23.0%D). This compound is considered a "Poor Performer". Sample results were non-detects, and have been reported as qualified data.

The following Q5 DoD samples were analyzed without a closing CCV in error: V-S1-051218-510 (280-117794-2) and V-S1-051258-510 (280-117794-4). Holding time had long expired when this was realized; therefore, the data have been qualified and reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Sample TB-S1-051218-02 (280-117794-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/20/2018.

The following sample in analytical batch 280-441961 was analyzed outside of analytical holding time due to an excessive number of samples expiring by midnight: TB-S1-051218-02 (280-117794-1). The trip blank sample had a collection date of 12/5/2018 and was analyzed on 12/20/2018.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Job ID: 280-117794-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Samples V-S1-051218-510 (280-117794-2) and V-S1-051258-510 (280-117794-4) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/07/2018 and analyzed on 12/09/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-S1-051218-02 (280-117794-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/17/2018 and analyzed on 12/19/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-S1-051218-510 (280-117794-3) and P-S1-051258-510 (280-117794-5) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 12/13/2018 and analyzed on 12/14/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-S1-051218-02 (280-117794-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/13/2018. .

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-441160 and analytical batch 280-441189. A duplicate LCS (LCSD) was performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-S1-051218-510 (280-117794-3) and P-S1-051258-510 (280-117794-5) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/13/2018 and analyzed on 12/17/2018.

Per the method comments, the following samples are reported from analysis of extracts that were silica gel cleaned: P-S1-051218-510 (280-117794-3), P-S1-051258-510 (280-117794-5), (LCS 280-441182/2-A), (LCS 280-441182/3-A), (MB 280-441182/1-A), (280-117650-A-3-A), (280-117650-A-3-B MS), (280-117650-A-3-D MS), (280-117650-A-3-C MSD) and (280-117650-A-3-E MSD). This is for preparation batch 280-441182 and analytical batch 280-441579.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-441182/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". This is considered acceptable because the detection is less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-S1-051218-510 (280-117794-2), P-S1-051218-510 (280-117794-3), V-S1-051258-510 (280-117794-4) and P-S1-051258-510 (280-117794-5) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/11/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
M	Manual integrated compound.
D	The reported value is from a dilution.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
M	Manual integrated compound.
D	The reported value is from a dilution.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
J1	Estimated: The quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-117883-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-117883-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 12/7/2018 9:10 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.4° C.

Receipt Exceptions

The DI water terracores for sample ID V-S1-051218-475 were collected 12/05 at 0855, and received on 12/07 at 0910. Samples have exceeded the 48 hour hold time required for freezing. The samples were frozen upon receipt, and per prior project history, the lab proceeded with analysis.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-S1-051218-475 (280-117883-2), V-S1-051218-480 (280-117883-4) and V-S1-051218-489 (280-117883-6) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 12/05/2018 and analyzed on 12/19/2018.

Samples V-S1-051218-475 (280-117883-2)[10X], V-S1-051218-480 (280-117883-4)[10X] and V-S1-051218-489 (280-117883-6)[10X] required dilution prior to analysis. The reporting limits have been adjusted accordingly. Due to the required dilution, the surrogates were diluted to the point that recovery calculations do not provide useful information.

4-Bromofluorobenzene (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for LCSD 280-441584/3-A: 4-Bromofluorobenzene (Surr) 120%D (limits 79-119%D) and Toluene-d8 (Surr) 117%D (limits 85-116%D). Associated results have been flagged "Q". Refer to the QC report for details. The associated samples were all diluted to the point that the surrogate recoveries could not be reliably calculated. The CCV, LCS and MB surrogates were all in control. The LCS and LCSD each recovered within control limits; therefore, the data have been qualified and reported.

Bromomethane, Chloromethane, Dichlorodifluoromethane, Trichlorofluoromethane and Vinyl chloride exceeded the RPD limit for LCSD 280-441584/9-A. All associated results have been flagged "Q". Refer to the QC report for details. It is noted that the LCS and LCSD each recovered within control limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Sample TB-S1-051218-01 (280-117883-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The

Job ID: 280-117883-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

samples were analyzed on 12/20/2018.

Method(s) 8260B: The following samples in analytical batch 280-441961 were analyzed outside of analytical holding time due to an excessive number of samples expiring by midnight: TB-S1-051218-01 (280-117883-1).

1,2-Dichloroethane-d4 (Surr) and 4-Bromofluorobenzene (Surr) failed the surrogate recovery criteria high for TB-S1-051218-01 (280-117883-1). Refer to the QC report for details. This sample did not contain any target analytes; therefore, re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Samples V-S1-051218-475 (280-117883-2), V-S1-051218-480 (280-117883-4) and V-S1-051218-489 (280-117883-6) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/19/2018 and analyzed on 01/10/2019.

Samples V-S1-051218-475 (280-117883-2)[10X], V-S1-051218-480 (280-117883-4)[50X] and V-S1-051218-489 (280-117883-6)[100X] required dilution prior to analysis due to the nature of the sample matrix. Elevated reporting limits (RLs) are provided. Due to the required dilution, the surrogates were diluted to the point that recovery calculations do not provide useful information; surrogate recoveries cannot be reliably calculated in the MS/MSD either.

Ethylene Dibromide failed the recovery criteria high for the MS/MSD of sample V-S1-051218-489 (280-117883-6) in batch 280-443835. The MS for EDB was outside calibration range and has been flagged "J1". The parent sample was within calibration range; therefore, the data have been qualified and reported. In addition, the presence of the '4' qualifier indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount; therefore, the MS/MSD could not be evaluated for accuracy and precision for this analyte and control limits are not applicable. Refer to the QC report for details. The acceptable LCS data indicate that the analytical system was operating within control.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-S1-051218-01 (280-117883-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/17/2018 and analyzed on 12/19/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-S1-051218-475 (280-117883-3), P-S1-051218-480 (280-117883-5) and P-S1-051218-489 (280-117883-7) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 12/13/2018 and analyzed on 12/14/2018.

Samples P-S1-051218-475 (280-117883-3)[50X], P-S1-051218-480 (280-117883-5)[200X] and P-S1-051218-489 (280-117883-7)[200X] required dilution prior to analysis due to the nature of the sample matrix. The reporting limits have been adjusted accordingly.

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-S1-051218-475 (280-117883-3), P-S1-051218-480 (280-117883-5), and P-S1-051218-489 (280-117883-7). Refer to the QC report for details. Due to the required dilutions, the surrogates were diluted to the point that recovery calculations do not provide useful information.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-441160 and analytical batch 280-441189. A duplicate LCS (LCSD) was performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-S1-051218-01 (280-117883-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/13/2018.

Job ID: 280-117883-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-S1-051218-475 (280-117883-3), P-S1-051218-480 (280-117883-5) and P-S1-051218-489 (280-117883-7) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/13/2018 and analyzed on 12/17/2018 and 12/18/2018.

Per the method comments, the following samples are reported from analysis of extracts that were silica gel cleaned: P-S1-051218-475 (280-117883-3), P-S1-051218-480 (280-117883-5), P-S1-051218-489 (280-117883-7), (LCS 280-441182/2-A), (LCS 280-441182/3-A), (MB 280-441182/1-A), (280-117650-A-3-A), (280-117650-A-3-B MS), (280-117650-A-3-D MS), (280-117650-A-3-C MSD) and (280-117650-A-3-E MSD).

Sample P-S1-051218-489 (280-117883-7)[4X] required dilution prior to analysis in order to bring the concentration of target analyte Diesel Range Organics [C10-C28] within the calibration range. The reporting limits have been adjusted accordingly.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-441182/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-S1-051218-475 (280-117883-2), P-S1-051218-475 (280-117883-3), V-S1-051218-480 (280-117883-4), P-S1-051218-480 (280-117883-5), V-S1-051218-489 (280-117883-6) and P-S1-051218-489 (280-117883-7) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/11/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	False	TERRACORES SAMPLED ON 12/05/18 RECIEVED 12/07/18
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.

GC VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.
M	Manual integrated compound.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-118241-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-118241-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The sample was received on 12/14/2018 9:20 AM; the sample arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.3º C.

Receipt Exceptions

No sampling times were given on VOA vials for three of three sodium thiosulfate vials nor for three of three HCL VOA vials for 8015-GRO. Sampling times have been logged per the Chain of Custody.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Sample RB-V2-111218-01 (280-118241-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/21/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP

Sample RB-V2-111218-01 (280-118241-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/21/2018 and analyzed on 01/16/2019.

The continuing calibration verification (CCV) associated with batch 280-444011 recovered above the upper control limit for Ethylene Dibromide. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The MB is the only effected item, as all other samples and QC were reanalyzed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO)

Sample RB-V2-111218-01 (280-118241-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/31/2018.

Reanalysis of the following sample was performed outside of the analytical holding time due to failure of quality control parameters in the initial analysis: RB-V2-111218-01 (280-118241-1). The calibration failed due to contaminated vials in the initial analysis. The re-analysis batch had acceptable QC.

Job ID: 280-118241-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Sample RB-V2-111218-01 (280-118241-1) was analyzed for Diesel Range Organics (DRO) in accordance with 8015D DRO. The samples were prepared on 12/18/2018 and analyzed on 12/20/2018.

Per the method comments, the following samples are reported from analysis of extracts that were silica gel cleaned: RB-V2-111218-01 (280-118241-1), (LCS 280-441778/2-A), (LCS 280-441778/4-A), (LCSD 280-441778/3-A), (LCSD 280-441778/5-A) and (MB 280-441778/1-A). This is for preparation batch 280-441778 and analytical batch 280-442025.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-441778. A duplicate LCS (LCSD)was performed.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Creator: Paul, Amanda E

List Source: TestAmerica Denver

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	False	Refer to Job Narrative for details.
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
H	Sample was prepped or analyzed beyond the specified holding time
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.

GC VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.
Q	One or more quality control criteria failed.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-118266-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-118266-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 12/14/2018 9:20 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.0º C.

Receipt Exceptions

The DI water terracores for sample ID V-V2-121218-080 were collected 12/12 at 1153, and received on 12/14 at 0920, and for sample ID V-V2-121218-103, collected on 12/12 at 1600 and received 12/14 at 0920. Samples were received within the 48 hour holding time, but with less than half the hold time remaining. Due to high receipt volume, the laboratory was unable to freeze the containers within hold, and froze them at 2025 on 12/14/18. The samples have been frozen, and per prior project history, the lab proceeded with analysis.

No sampling times were given on the container label for one of one soil jar for sample ID P-V2-131218-159 and V-V2-131218-159.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-V2-121218-080 (280-118266-2), V-V2-121218-103 (280-118266-4), V-V2-131218-117 (280-118266-6) and V-V2-131218-159 (280-118266-8) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 12/12/2018 and 12/13/2018 and analyzed on 12/27/2018.

Reanalysis of the following samples was performed outside of the analytical holding time due to the CCVC failing the first analysis . The Internal Standard was high due to matrix in the previous samples: V-V2-121218-080 (280-118266-2) and V-V2-121218-103 (280-118266-4).

The following samples required a dilution due to the nature of the sample matrix: V-V2-121218-080 (280-118266-2), V-V2-121218-103 (280-118266-4), V-V2-131218-117 (280-118266-6) and V-V2-131218-159 (280-118266-8). Because of this dilution, the surrogate spike concentration in the samples was reduced to a level where the recovery calculation does not provide useful information.

Dichlorodifluoromethane, trans-1,3-Dichloropropene and Vinyl chloride exceeded the RPD limit for LCSD 280-441739/3-A. Associated results have been flagged "Q". Refer to the QC report for details. The LCS and LCSD each recovered within control limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Job ID: 280-118266-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Sample TB-V2-131218-01 (280-118266-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/27/2018.

Naphthalene was detected in method blank MB 280-442672/19 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Samples V-V2-121218-080 (280-118266-2), V-V2-121218-103 (280-118266-4), V-V2-131218-117 (280-118266-6) and V-V2-131218-159 (280-118266-8) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/20/2018 and 12/27/2018 and analyzed on 01/02/2019 and 01/15/2019.

Samples V-V2-121218-080 (280-118266-2)[500X], V-V2-121218-103 (280-118266-4)[500X], V-V2-131218-117 (280-118266-6)[50X] and V-V2-131218-159 (280-118266-8)[20X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

The following samples were diluted to bring the concentration of target analytes within the calibration range: V-V2-121218-080 (280-118266-2) and V-V2-121218-103 (280-118266-4). As such, surrogates were diluted beyond the ability to reliably calculate recoveries, and elevated reporting limits (RLs) are provided.

The following sample was diluted due to abundance of target analytes: V-V2-131218-117 (280-118266-6). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

The following sample was diluted due to the nature of the sample matrix: V-V2-131218-159 (280-118266-8). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

The 1,2-Dibromopropane surrogate recovery for the method blank (MB) and the following samples was outside acceptance limits (high biased) on the confirmation column: (MB 280-441971/4-A). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-V2-131218-01 (280-118266-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared and analyzed on 12/27/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-V2-121218-080 (280-118266-3), P-V2-121218-103 (280-118266-5), P-V2-131218-117 (280-118266-7) and P-V2-131218-159 (280-118266-9) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 12/12/2018 and 12/13/2018 and analyzed on 12/27/2018, 12/28/2018 and 12/31/2018.

Samples P-V2-131218-117 (280-118266-7)[200X] and P-V2-131218-159 (280-118266-9)[200X] required dilution prior to analysis due to the nature of the sample matrix. The reporting limits have been adjusted accordingly. Surrogate recoveries were outside control limit due to the required dilutions, and associated results have been flagged "Q".

Reanalysis of samples P-V2-121218-080 (280-118266-3) and P-V2-121218-103 (280-118266-5) was performed outside of the analytical holding time due to the samples' matrix. Additional dilutions had to be made to obtain data within the calibration curve. Surrogate recoveries were outside control limit due to the required dilutions, and associated results have been flagged "Q".

Gasoline Range Organics (GRO)-C6-C10 exceeded the RPD limit for LCSD 280-442492/2-A. Associated results have been flagged "Q". Refer to the QC report for details. The LCS and LCSD each recovered within control limits. The following samples are associated: P-V2-121218-080 (280-118266-3) and P-V2-121218-103 (280-118266-5).

Job ID: 280-118266-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-V2-131218-01 (280-118266-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/26/2018 and 12/31/2018.

Re-analysis of the following sample was performed outside of the analytical holding time due to failure of several quality control parameters in the initial analysis: TB-V2-131218-01 (280-118266-1). The calibration failed due to contaminated vials in the initial analysis. The re-analysis batch had acceptable calibration and QC; therefore, as instructed by the client, the re-analysis has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-V2-121218-080 (280-118266-3), P-V2-121218-103 (280-118266-5), P-V2-131218-117 (280-118266-7) and P-V2-131218-159 (280-118266-9) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/20/2018 and analyzed on 01/04/2019.

Samples P-V2-121218-080 (280-118266-3)[5X], P-V2-121218-103 (280-118266-5)[5X], P-V2-131218-117 (280-118266-7)[2X] and P-V2-131218-159 (280-118266-9)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: P-V2-121218-080 (280-118266-3), P-V2-121218-103 (280-118266-5), P-V2-131218-117 (280-118266-7), P-V2-131218-159 (280-118266-9), (LCS 280-442077/2-A), (LCS 280-442077/3-A), (MB 280-442077/1-A), (280-118290-A-3-A), (280-118290-A-3-B MS), (280-118290-A-3-D MS), (280-118290-A-3-C MSD) and (280-118290-A-3-E MSD). This is in preparation batch 280-442077 and analytical batch 280-443317.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-442077/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-V2-121218-080 (280-118266-2), P-V2-121218-080 (280-118266-3), V-V2-121218-103 (280-118266-4), P-V2-121218-103 (280-118266-5), V-V2-131218-117 (280-118266-6), P-V2-131218-117 (280-118266-7), V-V2-131218-159 (280-118266-8) and P-V2-131218-159 (280-118266-9) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/15/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	False	Refer to Job Narrative for details.
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
Q	One or more quality control criteria failed.
H	Sample was prepped or analyzed beyond the specified holding time
U	Undetected at the Limit of Detection.
D	The reported value is from a dilution.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.
M	Manual integrated compound.
Q	One or more quality control criteria failed.
J1	Estimated: The quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-118290-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-118290-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 12/15/2018 9:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.7º C.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid
Sample V-V2-141218-215 (280-118290-2) and V-V2-141218-254 (280-118290-4) were analyzed for volatile organic compounds (GC/MS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 12/14/2018 and analyzed on 12/27/2018.

The methanol vial for sample V-V2-141218-215 (280-118290-2) was dry and had no methanol in it. The sample was prepped from the jar instead. This is for prep method 5030B: Prep batch 441739 Analytical Batch 442694.

The following samples required a dilution due to the nature of the sample matrix: V-V2-141218-215 (280-118290-2) and V-V2-141218-254 (280-118290-4). Because of this dilution, the surrogate spike concentration in the samples was reduced to a level where the recovery calculation does not provide useful information.

Dichlorodifluoromethane, trans-1,3-Dichloropropene and Vinyl chloride exceeded the RPD limit for LCSD 280-441739/3-A. Associated results have been flagged "Q". Refer to the QC report for details. The LCS and LCSD each recovered within control limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water
Sample TB-V2-141218-01 (280-118290-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/28/2018.

The continuing calibration verification check (CCVC) associated with batch 280-442719 recovered above the upper control limit for 2-Butanone (50%) at 57.6%. The samples associated with this CCVC were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: TB-V2-141218-01 (280-118290-1) and (CCVC 280-442719/34).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid
Samples V-V2-141218-215 (280-118290-2) and V-V2-141218-254 (280-118290-4) were analyzed for EDB and DBCP in accordance with

Job ID: 280-118290-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

8011. The samples were prepared on 12/27/2018 and analyzed on 01/15/2019.

The following samples were diluted due to abundance of target analytes: V-V2-141218-215 (280-118290-2) and V-V2-141218-254 (280-118290-4). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-V2-141218-01 (280-118290-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/27/2018 and analyzed on 01/04/2019.

Compound 1,2-Dibromopropane, 1,2,3-Trichloropropane, 1,2-Dibromo-3-Chloropropane, and 1,2-Dibromoethane eluted outside the retention time window on the Restex 502.2 Volatiles column and Restek Rtx-VRX (30) column for the following sample: (CCV 280-443225/19). This retention time shift was taken into account when reviewing the sample(s) for target compounds. All analytes were within QC limits.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-V2-141218-215 (280-118290-3) and P-V2-141218-254 (280-118290-5) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 12/14/2018 and analyzed on 12/27/2018.

Samples P-V2-141218-215 (280-118290-3)[200X] and P-V2-141218-254 (280-118290-5)[250X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V2-141218-215 (280-118290-3). a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V2-141218-254 (280-118290-5). Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-V2-141218-01 (280-118290-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/26/2018 and 12/31/2018.

Re-analysis of the following sample was performed outside of the analytical holding time due to failure of several quality control parameters in the initial analysis: TB-V2-141218-01 (280-118290-1). The calibration failed due to contaminated vials in the initial analysis. The re-analysis batch had acceptable calibration and QC; therefore, as instructed by the client, the re-analysis has been reported.

Surrogate recovery for the following sample was outside the lower control limit: TB-V2-141218-01 (280-118290-1). Associated results have been flagged "Q". This sample was already reanalyzed outside of holding time and did not contain any target analytes; therefore, the data have been qualified and reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-V2-141218-215 (280-118290-3) and P-V2-141218-254 (280-118290-5) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/20/2018 and analyzed on 01/04/2019.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: P-V2-141218-215 (280-118290-3), P-V2-141218-254 (280-118290-5), (LCS 280-442077/2-A), (LCS 280-442077/3-A), (MB 280-442077/1-A), (280-118290-A-3-B MS), (280-118290-A-3-D MS), (280-118290-A-3-C MSD) and (280-118290-A-3-E MSD). This is for preparation batch 280-442077 and analytical batch 280-443317.

Job ID: 280-118290-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Samples P-V2-141218-215 (280-118290-3)[5X] and P-V2-141218-254 (280-118290-5)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-442077/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

Diesel Range Organics [C10-C28] failed the recovery criteria high for the MS of sample P-V2-141218-215MS (280-118290-3) in batch 280-443317. Diesel Range Organics [C10-C28] failed the recovery criteria low for the MSD of sample P-V2-141218-215MSD (280-118290-3) in batch 280-443317. The presence of the '4' qualifier indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount; therefore, control limits are not applicable. Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-V2-141218-215 (280-118290-2), P-V2-141218-215 (280-118290-3), V-V2-141218-254 (280-118290-4) and P-V2-141218-254 (280-118290-5) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/18/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: EA Engineering, Science, and Technology
Project/Site: Kirtland BFF Vadose Zone Coring

TestAmerica Job ID: 280-118290-1

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
A2LA	ISO/IEC 17025		2907.01	10-31-19

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
Moisture		Solid	Percent Moisture

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
M	Manual integrated compound.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
M	Manual integrated compound.
D	The reported value is from a dilution.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
Q	One or more quality control criteria failed.
H	Sample was prepped or analyzed beyond the specified holding time
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-118291-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 12/15/2018 9:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.7° C.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid
Samples V-V2-141218-270 (280-118291-2) and V-V2-141258-270 (280-118291-4) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 12/14/2018 and analyzed on 12/27/2018.

The following samples required a dilution due to the nature of the sample matrix: V-V2-141218-270 (280-118291-2) and V-V2-141258-270 (280-118291-4). Because of this dilution, the surrogate spike concentration in the samples was reduced to a level where the recovery calculation does not provide useful information.

Dichlorodifluoromethane, trans-1,3-Dichloropropene and Vinyl chloride exceeded the RPD limit for LCSD 280-441739/3-A. Refer to the QC report for details. The LCS and LCSD each recovered within control limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water
Sample TB-V2-141218-02 (280-118291-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/28/2018.

The continuing calibration verification check (CCVC) associated with batch 280-442719 recovered above the upper control limit for 2-Butanone (50%) at 57.6%. The samples associated with this CCVC were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: TB-V2-141218-02 (280-118291-1) and (CCVC 280-442719/34).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP
Samples V-V2-141218-270 (280-118291-2) and V-V2-141258-270 (280-118291-4) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/27/2018 and analyzed on 01/15/2019.

The following sample was diluted due to the nature of the sample matrix: V-V2-141218-270 (280-118291-2). As such, surrogate

Job ID: 280-118291-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-V2-141218-270 (280-118291-3) and P-V2-141258-270 (280-118291-5) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 12/14/2018 and analyzed on 12/27/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-V2-141218-02 (280-118291-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/26/2018 and 12/31/2018.

Re-analysis of the following sample was performed outside of the analytical holding time due to failure of several quality control parameters in the initial analysis: TB-V2-141218-02 (280-118291-1). The calibration failed due to contaminated vials in the initial analysis. The re-analysis batch had acceptable calibration and QC; therefore, as instructed by the client, the re-analysis has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-V2-141218-270 (280-118291-3) and P-V2-141258-270 (280-118291-5) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 01/03/2019 and analyzed on 01/07/2019.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: P-V2-141218-270 (280-118291-3), P-V2-141258-270 (280-118291-5), (LCS 280-443201/2-B), (LCS 280-443201/3-B), (MB 280-443201/1-B), (280-118291-A-5-F MS), (280-118291-A-5-H MS), (280-118291-A-5-G MSD) and (280-118291-A-5-I MSD). This is for preparation batch 280-443201 and analytical batch 280-443450.

Samples P-V2-141218-270 (280-118291-3), P-V2-141258-270 (280-118291-5), (280-118291-A-5 MS) and (280-118291-A-5 MSD) were re-extracted due to a large loss of analytes observed in previous extraction - the tube vented. It was re-prepared outside of holding time due to analyst error. The client was notified on January 3, 2019, and instructed the laboratory to re-extract the samples outside of the holding time, flag and narrate the deficiency.

The initial aliquot and surrogate aliquot used for extraction of the following samples were split between three extraction vessels with the routine volume of solvent added to each vessel: P-V2-141218-270 (280-118291-3), P-V2-141258-270 (280-118291-5), (280-118291-A-5 MS) and (280-118291-A-5 MSD). After the extraction, the extracts from all vessels were combined and concentrated. This was done due to first attempt at extraction in one tube causing the tube to vent. preparation batch 280-443201

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-V2-141218-270 (280-118291-2), P-V2-141218-270 (280-118291-3), V-V2-141258-270 (280-118291-4) and P-V2-141258-270 (280-118291-5) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/18/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
Q	One or more quality control criteria failed.
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
D	The reported value is from a dilution.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.
H	Sample was prepped or analyzed beyond the specified holding time

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.
Q	One or more quality control criteria failed.
J1	Estimated: The quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
M	Manual integrated compound.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-118336-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 12/18/2018 9:10 AM; the samples arrived in good condition, properly preserved and, where required, on ice.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-V1-161218-061 (280-118336-2), V-V1-161218-101 (280-118336-4), V-V1-161218-115 (280-118336-6) and V-V1-171218-147 (280-118336-8) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 12/16/2018 and 12/17/2018 and analyzed on 12/27/2018.

Samples V-V1-161218-061 (280-118336-2)[10X], V-V1-161218-101 (280-118336-4)[10X], V-V1-161218-115 (280-118336-6)[10X] and V-V1-171218-147 (280-118336-8)[10X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

1,2-Dichloroethane-d4 (Surr), 4-Bromofluorobenzene (Surr), Dibromofluoromethane (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for V-V1-161218-061 (280-118336-2). 4-Bromofluorobenzene (Surr) failed the surrogate recovery criteria low for V-V1-161218-101 (280-118336-4). 1,2-Dichloroethane-d4 (Surr), Dibromofluoromethane (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high. 1,2-Dichloroethane-d4 (Surr), 4-Bromofluorobenzene (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for V-V1-161218-115 (280-118336-6). 1,2-Dichloroethane-d4 (Surr) and Dibromofluoromethane (Surr) failed the surrogate recovery criteria low for V-V1-171218-147 (280-118336-8). Toluene-d8 (Surr) failed the surrogate recovery criteria high. Refer to the QC report for details. Because of the required dilutions, the surrogate spike concentration in the samples was reduced to a level where the recovery calculation does not provide useful information.

2-Butanone (MEK) and Bromobenzene exceeded the RPD limit for LCSD 280-442179/3-A. Refer to the QC report for details. The LCS and LCSD each recovered within control limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Sample TB-V1-171218-01 (280-118336-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 01/07/2019 and 12/31/2018.

Toluene-d8 (Surr) failed the surrogate recovery criteria low for TB-V1-171218-01 (280-118336-1) at 82% (limits 89-112%). Refer to the QC report for details. Re-analysis in batch 443477 was performed outside of holding time with acceptable QC and similar results. As

Job ID: 280-118336-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

requested by the client, the in hold data have been qualified and reported.

The laboratory control sample (LCS) for analytical batch 280-442892 recovered outside control limits for the following analytes: Methyl tert-butyl ether (limits 71%-124%) at 125%. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been qualified and reported.

The initial calibration verification (ICV) result for batch 280-442892 was above the upper control limit for Dichlorodifluoromethane (20%) at 20.8%. Sample results were non-detects, and have been reported as qualified data.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Samples V-V1-161218-061 (280-118336-2), V-V1-161218-101 (280-118336-4), V-V1-161218-115 (280-118336-6) and V-V1-171218-147 (280-118336-8) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/27/2018 and 12/30/2018 and analyzed on 01/14/2019 and 01/15/2019.

Samples V-V1-161218-061 (280-118336-2)[20X], V-V1-161218-101 (280-118336-4)[100X], V-V1-161218-115 (280-118336-6)[100X], V-V1-171218-147 (280-118336-8)[50X], (280-118336-B-6-B MS) and (280-118336-B-6-C MSD) required dilution prior to analysis due to abundance of target analytes. As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

Ethylene Dibromide failed the recovery criteria low for the MS of sample V-V1-161218-115 (280-118336-6) in batch 280-444201. Ethylene Dibromide failed the recovery criteria high for the MSD of sample V-V1-161218-115 (280-118336-6) in batch 280-444201. Ethylene Dibromide exceeded the RPD limit. Due to the high concentration of Ethylene Dibromide, the matrix spike / matrix spike duplicate (MS/MSD) for preparation batch 280-442668 and analytical batch 280-444201 could not be evaluated for accuracy and precision. The presence of the '4' qualifier indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount; therefore, control limits are not applicable. Refer to the QC report for details. The associated laboratory control sample (LCS) met acceptance criteria.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-V1-171218-01 (280-118336-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/30/2018 and analyzed on 01/08/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-V1-161218-061 (280-118336-3), P-V1-161218-101 (280-118336-5), P-V1-161218-115 (280-118336-7) and P-V1-171218-147 (280-118336-9) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 12/16/2018 and 12/17/2018 and analyzed on 01/02/2019, 01/03/2019 and 12/30/2018.

Reanalysis of the following samples was performed outside of the analytical holding time due to failure of quality control (CCVRT) parameters in the initial analysis in original analytical batch 442742: P-V1-161218-061 (280-118336-3), P-V1-161218-115 (280-118336-7), and P-V1-171218-147 (280-118336-9). Samples were reanalyzed 2-3 days after the holding time had expired. The reanalysis data have been qualified and reported.

Samples P-V1-161218-061 (280-118336-3)[200X], P-V1-161218-101 (280-118336-5)[200X], P-V1-161218-115 (280-118336-7)[200X] and P-V1-171218-147 (280-118336-9)[250X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V1-161218-101 (280-118336-5). a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V1-161218-115 (280-118336-7). a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V1-171218-147 (280-118336-9). Refer to the QC report for details. Because of the required dilutions, the surrogate spike concentration in the samples was reduced to a level where the recovery calculation does not provide useful information.

Job ID: 280-118336-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V1-161218-061 (280-118336-3) due to matrix interference. Re-extraction and/or re-analysis was performed with concurring results. The re-analysis has been reported.

The continuing calibration verification (CCV) associated with batch 280-442742 recovered above the upper control limit for Gasoline Range Organics (GRO)-C6-C10. The samples associated with this CCV were detects for the affected analytes; therefore, the samples have been reanalyzed and diluted properly. The reanalysis data have been qualified and reported, as instructed by the client. The following samples are associated: P-V1-161218-061 (280-118336-3), P-V1-161218-101 (280-118336-5), P-V1-161218-115 (280-118336-7) and P-V1-171218-147 (280-118336-9).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-V1-171218-01 (280-118336-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/31/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-V1-161218-061 (280-118336-3), P-V1-161218-101 (280-118336-5), P-V1-161218-115 (280-118336-7) and P-V1-171218-147 (280-118336-9) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/20/2018 and analyzed on 01/04/2019.

Samples P-V1-161218-061 (280-118336-3)[10X], P-V1-161218-101 (280-118336-5)[10X], P-V1-161218-115 (280-118336-7)[10X] and P-V1-171218-147 (280-118336-9)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: P-V1-161218-061 (280-118336-3), P-V1-161218-101 (280-118336-5), P-V1-161218-115 (280-118336-7), P-V1-171218-147 (280-118336-9), (LCS 280-442077/2-A), (LCS 280-442077/3-A), (MB 280-442077/1-A), (280-118290-A-3-A), (280-118290-A-3-B MS), (280-118290-A-3-D MS), (280-118290-A-3-C MSD) and (280-118290-A-3-E MSD). This is for preparation batch 280-442077 and analytical batch 280-443317.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-442077/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable since the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-V1-161218-061 (280-118336-2), P-V1-161218-061 (280-118336-3), V-V1-161218-101 (280-118336-4), P-V1-161218-101 (280-118336-5), V-V1-161218-115 (280-118336-6), P-V1-161218-115 (280-118336-7), V-V1-171218-147 (280-118336-8) and P-V1-171218-147 (280-118336-9) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/19/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: EA Engineering, Science, and Technology
Project/Site: Kirtland BFF Vadose Zone Coring

TestAmerica Job ID: 280-118336-1

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
A2LA	DoD ELAP		2907.01	10-31-19

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
Moisture		Solid	Percent Moisture

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.

GC VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-118337-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-118337-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 12/18/2018 9:10 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.2º C.

Receipt Exceptions

The DI water terracores for sample ID V-V2-151218-287 were collected 12/15 at 0908, and received on 12/18 at 0910. Samples have exceeded the 48 hour hold time required for freezing. The samples were frozen upon receipt. Per project history, the laboratory proceeded with analysis per the standard procedure.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Sample V-V2-151218-287 (280-118337-3) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 12/15/2018 and analyzed on 12/27/2018.

Naphthalene was detected in method blank MB 280-442674/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection is less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Samples RB-V1-151218-01 (280-118337-1) and TB-V2-171218-01 (280-118337-2) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 12/28/2018 and 12/31/2018.

1,2-Dichloroethane-d4 (Surr) failed the surrogate recovery criteria high for RB-V1-151218-01 (280-118337-1). Toluene-d8 (Surr) failed the surrogate recovery criteria low for TB-V2-171218-01 (280-118337-2). 1,2-Dichloroethane-d4 (Surr) and Dibromofluoromethane (Surr) failed the surrogate recovery criteria high. Refer to the QC report for details.

In batch 442892, surrogate recovery for the following sample was outside control limits for Toluene-d8 (89%-112%) at 87% in the original analysis: TB-V2-171218-01 (280-118337-2). Re-analysis was performed with acceptable results for Toluene-d8 at 90%. The compounds affected by Toluene-d8 in the original run were reported as Primary in the re-analysis and both sets showed the compounds were non-detect. The re-analysis had the surrogates 1,2-Dichloroethane-d4 (81%-118%) recovering at 121% and Dibromofluoromethane (80%

Job ID: 280-118337-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

-119%) at 122%, but the compounds associated with these surrogates were not reported as Primary.

Methyl tert-butyl ether failed the recovery criteria high for LCS 280-442892/5. Associated results have been flagged "Q". Refer to the QC report for details. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported. The following sample is associated: TB-V2-171218-01 (280-118337-2).

The initial calibration verification (ICV) result for batch 280-442892 was above the upper control limit for Dichlorodifluoromethane (20%) at 20.8%. Sample results were non-detects, and have been reported as qualified data. The following sample is associated: TB-V2-171218-01 (280-118337-2).

The continuing calibration verification check (CCVC) associated with batch 280-442719 recovered above the upper control limit for 2-Butanone (50%) at 57.6%. The samples associated with this CCVC were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: RB-V1-151218-01 (280-118337-1) and (CCVC 280-442719/34).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Sample V-V2-151218-287 (280-118337-3) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/27/2018 and analyzed on 01/15/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Samples RB-V1-151218-01 (280-118337-1) and TB-V2-171218-01 (280-118337-2) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/27/2018 and 12/30/2018 and analyzed on 01/08/2019 and 12/27/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Sample P-V2-151218-287 (280-118337-4) was analyzed for Volatile Petroleum Hydrocarbons (GC) in accordance with 8015D GRO. The samples were prepared on 12/15/2018 and analyzed on 01/02/2019.

Reanalysis of the following sample was performed outside of the analytical holding time due to CCVRT failure in original analytical batch 442742 : P-V2-151218-287 (280-118337-4). The continuing calibration verification (CCV) associated with batch 280-442742 recovered above the upper control limit for Gasoline Range Organics (GRO)-C6-C10. The samples associated with this CCV had detections for the affected analytes; therefore, the samples have been reanalyzed and diluted properly.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Samples RB-V1-151218-01 (280-118337-1) and TB-V2-171218-01 (280-118337-2) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/26/2018 and 12/31/2018.

Re-analysis of the following samples was performed outside of the analytical holding time due to failure of several quality control parameters in the initial analysis: RB-V1-151218-01 (280-118337-1) and TB-V2-171218-01 (280-118337-2). The calibration failed due to contaminated vials in the initial analysis. The re-analysis batch had acceptable calibration and QC; therefore, as instructed by the client, the re-analysis has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO) - Solid

Sample P-V2-151218-287 (280-118337-4) was analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/20/2018 and analyzed on 01/04/2019.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: P-V2-151218-287

Job ID: 280-118337-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

(280-118337-4), (LCS 280-442077/2-A), (LCS 280-442077/3-A), (MB 280-442077/1-A). This is for preparation batch 280-442077 and analytical batch 280-443317.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-442077/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". If Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO) - Water

Sample RB-V1-151218-01 (280-118337-1) was analyzed for Diesel Range Organics (DRO) in accordance with 8015D DRO. The samples were prepared on 12/18/2018 and analyzed on 12/20/2018.

Per the method comments, the following samples are reported from analysis of extracts that were silica gel cleaned: RB-V1-151218-01 (280-118337-1), (LCS 280-441778/2-A), (LCS 280-441778/4-A), (LCSD 280-441778/3-A), (LCSD 280-441778/5-A) and (MB 280-441778/1-A). This is for preparation batch 280-441778 and analytical batch 280-442025.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-441778. A duplicate LCS (LCSD) was performed.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-V2-151218-287 (280-118337-3) and P-V2-151218-287 (280-118337-4) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/19/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page..

Accreditation/Certification Summary

Client: EA Engineering, Science, and Technology
Project/Site: Kirtland BFF Vadose Zone Coring

TestAmerica Job ID: 280-118337-1

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
A2LA	ISO/IEC 17025		2907.01	10-31-19

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
Moisture		Solid	Percent Moisture

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
Q	One or more quality control criteria failed.
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	The reported value is from a dilution.
Q	One or more quality control criteria failed.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
M	Manual integrated compound.
D	The reported value is from a dilution.
H	Sample was prepped or analyzed beyond the specified holding time
J	Estimated: The analyte was positively identified; the quantitation is an estimation
Q	One or more quality control criteria failed.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-118390-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-118390-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 12/19/2018 10:10 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.8º C.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-V1-171218-161 (280-118390-2) and V-V1-181218-216 (280-118390-4) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared and analyzed on 12/28/2018.

Samples V-V1-171218-161 (280-118390-2)[10X], V-V1-171218-161 (280-118390-2)[50X] and V-V1-181218-216 (280-118390-4)[10X] required dilution prior to analysis due to the nature of the sample matrix. The reporting limits have been adjusted accordingly. Because of this dilution, the surrogate spike concentration in the samples was reduced to a level where the recovery calculation does not provide useful information.

The initial calibration verification (ICV) result for batch 443099280-443099 was above the upper control limit for 1,2,3-trichlorobenzene (20.87%, limit 20%) and cis-1,3-dichloropropene (20.2%, limit 20%). Sample results were non-detects, and have been reported as qualified data.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Sample TB-V1-181218-01 (280-118390-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 01/04/2019.

The following sample (batch 443292) was analyzed outside of analytical holding time due to instrument error on evening shift which did not allow for loading of sample: TB-V1-181218-01 (280-118390-1).

4-Bromofluorobenzene (Surr) and Toluene-d8 (Surr) failed the surrogate recovery criteria high for TB-V1-181218-01 (280-118390-1). Refer to the QC report for details. This sample did not contain any target analytes associated with these surrogates; therefore, re-extraction and/or re-analysis was not performed.

The presence of the '4' qualifier indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount. Refer to the QC report for details.

Job ID: 280-118390-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid
Samples V-V1-171218-161 (280-118390-2) and V-V1-181218-216 (280-118390-4) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/30/2018 and analyzed on 01/14/2019.

The following samples were diluted due to abundance of target analytes: V-V1-171218-161 (280-118390-2) and V-V1-181218-216 (280-118390-4). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water
Sample TB-V1-181218-01 (280-118390-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/30/2018 and analyzed on 01/08/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid
Samples P-V1-171218-161 (280-118390-3) and P-V1-181218-216 (280-118390-5) were analyzed for Volatile Petroleum Hydrocarbons (GC) in accordance with 8015D GRO. The samples were prepared on 12/17/2018 and 12/18/2018 and analyzed on 12/30/2018.

Samples P-V1-171218-161 (280-118390-3)[2X] and P-V1-181218-216 (280-118390-5)[250X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V1-181218-216 (280-118390-5). Refer to the QC report for details. Surrogate recovery was outside control limit due to the required dilution.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water
Sample TB-V1-181218-01 (280-118390-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/31/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)
Samples P-V1-171218-161 (280-118390-3) and P-V1-181218-216 (280-118390-5) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 01/03/2019 and 12/20/2018 and analyzed on 01/04/2019 and 01/07/2019.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: P-V1-181218-216 (280-118390-5), (LCS 280-442077/2-A), (LCS 280-442077/3-A), (MB 280-442077/1-A), (280-118290-A-3-A), (280-118290-A-3-B MS), (280-118290-A-3-D MS), (280-118290-A-3-C MSD) and (280-118290-A-3-E MSD). This is for preparation batch 280-442077 and analytical batch 280-443317.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: P-V1-171218-161 (280-118390-3), (LCS 280-443201/2-B), (LCS 280-443201/3-B), (MB 280-443201/1-B), (280-118291-A-5-E), (280-118291-A-5-F MS), (280-118291-A-5-H MS), (280-118291-A-5-G MSD) and (280-118291-A-5-I MSD). This is for preparation batch 280-443201 and analytical batch 280-443450.

Sample P-V1-181218-216 (280-118390-5)[2X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-442077/1-A at a level that was above the method detection limit

Job ID: 280-118390-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

Sample P-V1-171218-161 (280-118390-3) was re-extracted due to a large loss of analytes observed in previous extraction - the tube vented. It was re-prepared outside of holding time due to analyst error. The client was notified on January 3, 2019, and instructed the laboratory to re-extract the samples outside of the holding time, flag and narrate the deficiency.

The initial aliquot and surrogate aliquot used for extraction of the following sample was split between three extraction vessels with the routine volume of solvent added to each vessel: P-V1-171218-161 (280-118390-3). After the extraction, the extracts from all vessels were combined and concentrated. This was done due to first attempt at extraction in one tube causing the tube to vent. Preparation batch 280-443201 .

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-V1-171218-161 (280-118390-2), P-V1-171218-161 (280-118390-3), V-V1-181218-216 (280-118390-4) and P-V1-181218-216 (280-118390-5) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/22/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
M	Manual integrated compound.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.
Q	One or more quality control criteria failed.
J1	Estimated: The quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
M	Manual integrated compound.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)

Glossary (Continued)

Abbreviation	These commonly used abbreviations may or may not be present in this report.
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-118473-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-118473-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 12/20/2018 10:15 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.1° C.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid
Samples V-V1-191218-254 (280-118473-2), V-V1-191218-271 (280-118473-4), V-V1-191218-285 (280-118473-6) and V-V1-191258-285 (280-118473-8) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared and analyzed on 12/28/2018.

Samples V-V1-191218-254 (280-118473-2)[10X], V-V1-191218-254 (280-118473-2)[100X], V-V1-191218-271 (280-118473-4)[10X], V-V1-191218-285 (280-118473-6)[10X] and V-V1-191258-285 (280-118473-8)[10X] required dilution prior to analysis due to the nature of the sample matrix. The reporting limits have been adjusted accordingly. Because of the required dilutions, the surrogate spike concentration in the samples was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water
Sample TB-V1-191218-01 (280-118473-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 01/02/2019.

4-Bromofluorobenzene (Surr) failed the surrogate recovery criteria low for TB-V1-191218-01 (280-118473-1). Refer to the QC report for details. The sample was re-extracted and re-analyzed with similar results, therefore, the data have been qualified and reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid
Samples V-V1-191218-254 (280-118473-2), V-V1-191218-271 (280-118473-4), V-V1-191218-285 (280-118473-6) and V-V1-191258-285 (280-118473-8) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/30/2018 and analyzed on 01/14/2019 and 01/15/2019.

Samples V-V1-191218-254 (280-118473-2)[5000X], V-V1-191218-271 (280-118473-4)[20X], V-V1-191218-285 (280-118473-6)[10X], V-V1-191258-285 (280-118473-8)[20X], (280-118473-B-8-B MS) and (280-118473-B-8-C MSD) required dilution prior to analysis due to

Job ID: 280-118473-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

abundance of target analytes and the nature of the sample matrix. As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

Ethylene Dibromide failed the recovery criteria low for the MS/MSD of sample V-V1-191258-285 (280-118473-8) in batch 280-444292. Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-V1-191218-01 (280-118473-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 12/31/2018 and analyzed on 01/09/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-V1-191218-254 (280-118473-3), P-V1-191218-271 (280-118473-5), P-V1-191218-285 (280-118473-7) and P-V1-191258-285 (280-118473-9) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 12/19/2018 and analyzed on 01/02/2019, 12/28/2018 and 12/30/2018.

Samples P-V1-191218-254 (280-118473-3)[500X], P-V1-191218-271 (280-118473-5)[2X], P-V1-191218-285 (280-118473-7)[100X] and P-V1-191258-285 (280-118473-9)[2X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V1-191218-271 (280-118473-5) and P-V1-191258-285 (280-118473-9). Because of the required dilutions, the surrogate spike concentration in the samples was reduced to a level where the recovery calculation does not provide useful information.

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-V1-191218-254 (280-118473-3) and P-V1-191218-285 (280-118473-7). Matrix interference is suspected, as surrogates failed similarly in the initial analysis and reanalysis. The reanalysis data have been qualified and reported.

The continuing calibration verification (CCV) associated with batch 280-442742 recovered above the upper control limit for Gasoline Range Organics (GRO)-C6-C10. The samples associated with this CCV were detects for the affected analytes; therefore, the samples have been reanalyzed and diluted properly within hold time. The reanalysis data have been reported. The following samples are associated: P-V1-191218-254 (280-118473-3), P-V1-191218-271 (280-118473-5), P-V1-191218-285 (280-118473-7) and P-V1-191258-285 (280-118473-9).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-V1-191218-01 (280-118473-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 12/31/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-V1-191218-254 (280-118473-3), P-V1-191218-271 (280-118473-5), P-V1-191218-285 (280-118473-7) and P-V1-191258-285 (280-118473-9) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 12/28/2018 and analyzed on 01/08/2019.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: P-V1-191218-254 (280-118473-3), P-V1-191218-271 (280-118473-5), P-V1-191218-285 (280-118473-7), P-V1-191258-285 (280-118473-9), (LCS 280-442809/2-A), (LCS 280-442809/3-A), (MB 280-442809/1-A), (280-118473-A-3-B MS), (280-118473-A-3-D MS), (280-118473-A-3-C MSD) and (280-118473-A-3-E MSD). This is for preparation batch 280-442809 and analytical batch 280-443571.

The following sample and associated matrix spike/matrix spike duplicate (MS/MSD) were diluted 20X in order to bring the concentration of

Job ID: 280-118473-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

target analyte Diesel Range Organics [C10-C28] within the calibration range: P-V1-191218-254 (280-118473-3), (280-118473-A-3-B MS), (280-118473-A-3-D MS), (280-118473-A-3-C MSD) and (280-118473-A-3-E MSD). Elevated reporting limits (RLs) are provided. Because of this dilution, the surrogate and matrix spike concentrations were reduced to a level at which the recovery calculations do not provide useful information. The presence of the '4' qualifier indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount; therefore, control limits are not applicable. Refer to the QC report for details.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-442809/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than 1/2 the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-V1-191218-254 (280-118473-2), P-V1-191218-254 (280-118473-3), V-V1-191218-271 (280-118473-4), P-V1-191218-271 (280-118473-5), V-V1-191218-285 (280-118473-6), P-V1-191218-285 (280-118473-7), V-V1-191258-285 (280-118473-8) and P-V1-191258-285 (280-118473-9) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 12/22/2018.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-119077-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The sample was received on 1/11/2019 9:15 AM; the sample arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.3º C.

VOLATILE ORGANIC COMPOUNDS (GC/MS)
Sample RB-S8-060119-01 (280-119077-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 01/18/2019.

Dichlorodifluoromethane exceeded the RPD limit for LCSD 280-444778/4. Associated results have been flagged "Q". Refer to the QC report for details. The LCS and LCSD each recovered within control limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP
Sample RB-S8-060119-01 (280-119077-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared and analyzed on 01/17/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO)
Sample RB-S8-060119-01 (280-119077-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 01/14/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)
Sample RB-S8-060119-01 (280-119077-1) was analyzed for Diesel Range Organics (DRO) in accordance with 8015D DRO. The samples were prepared on 01/13/2019 and analyzed on 01/16/2019.

Per method comments, the analysis of the following samples was performed on silica gel cleaned extracts: RB-S8-060119-01 (280-119077-1), (LCS 280-444153/2-A), (LCS 280-444153/4-A), (LCSD 280-444153/11-A), (LCSD 280-444153/3-A) and (MB 280-444153/1-A). This is for preparation batch 280-444153 and analytical batch 280-444395.

Job ID: 280-119077-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-444153. A duplicate LCS (CLSD) was performed.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: EA Engineering, Science, and Technology
Project/Site: Kirtland BFF Vadose Zone Coring

TestAmerica Job ID: 280-119077-1

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
A2LA	DoD ELAP		2907.01	10-31-19

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
M	Manual integrated compound.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
M	Manual integrated compound.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-119255-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 1/17/2019 9:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.1º C.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid
Sample V-S8-160119-419 (280-119255-2) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 01/16/2019 and analyzed on 01/24/2019.

The continuing calibration verification (CCV) associated with batch 280-445306 recovered above the upper control limit for Acetone, 2-Butanone (MEK), 2-Hexanone, 4-Methyl-2-pentanone (MIBK). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.
Acetone +29.8%D, 2-Butanone (MEK) +25.6%D, 2-Hexanone +30.3%D, 4-Methyl-2-pentanone (MIBK +20.7%D

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water
Sample TB-S8-160119-01 (280-119255-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 01/25/2019.

The continuing calibration verification (CCV) associated with batch 280-445431 recovered above the upper control limit (20%) for Trichlorofluoromethane at 21.6%. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following samples are impacted: TB-S8-160119-01 (280-119255-1) and (CCV 280-445431/2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid
Sample V-S8-160119-419 (280-119255-2) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 01/21/2019 and analyzed on 01/29/2019.

The following sample was diluted due to the nature of the sample matrix: V-S8-160119-419 (280-119255-2). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

Job ID: 280-119255-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Compound 1,2,3-Trichloropropane, 1,2-Dibromo-3-Chloropropane, 1,2-Dibromopropane and 1,2-Dibromoethane eluted outside the retention time window on the Restex 502.2 Volatiles column and Restek Rtx-VRX (30) column for the following sample: (CCV 280-445839/17). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-S8-160119-01 (280-119255-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 01/23/2019 and analyzed on 01/29/2019.

Compound 1,2,3-Trichloropropane, 1,2-Dibromo-3-Chloropropane, 1,2-Dibromopropane and 1,2-Dibromoethane eluted outside the retention time window on the Restex 502.2 Volatiles column and Restek Rtx-VRX (30) column for the following sample: (CCV 280-445839/17). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Sample P-S8-160119-419 (280-119255-3) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 01/18/2019 and analyzed on 01/21/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-S8-160119-01 (280-119255-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 01/29/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Sample P-S8-160119-419 (280-119255-3) was analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 01/23/2019 and analyzed on 01/28/2019.

Per the method comments, 8015D_DRO_DOD5 analysis for the following samples was performed on extracts that were silica gel cleaned: P-S8-160119-419 (280-119255-3), (LCS 280-445176/2-A), (LCS 280-445176/3-A), (MB 280-445176/1-A), (280-119255-A-3-B MS), (280-119255-A-3-D MS), (280-119255-A-3-C MSD) and (280-119255-A-3-E MSD). This is for preparation batch 280-445176 and analytical batch 280-445704.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-445176/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-S8-160119-419 (280-119255-2) and P-S8-160119-419 (280-119255-3) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 01/18/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: EA Engineering, Science, and Technology
Project/Site: Kirtland BFF Vadose Zone Coring

TestAmerica Job ID: 280-119255-1

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
A2LA	DoD ELAP		2907.01	10-31-19

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
Moisture		Solid	Percent Moisture

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
Q	One or more quality control criteria failed.
U	Undetected at the Limit of Detection.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
J1	Estimated: The quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.
M	Manual integrated compound.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-119347-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-119347-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 1/19/2019 9:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.8º C.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-S8-180119-475 (280-119347-2), V-S8-180119-499 (280-119347-4), V-S8-180119-514 (280-119347-6) and V-S8-180159-514 (280-119347-8) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 01/18/2019 and analyzed on 01/29/2019 and 01/30/2019.

4-Bromofluorobenzene (Surr) failed the surrogate recovery criteria high for V-S8-180119-475 (280-119347-2) in preparation batch 280-445812 and analytical batch 280-445808 . Associated results have been flagged "Q". Refer to the QC report for details. Evidence of matrix interference was obvious by looking at the chromatogram. The sample was extracted and analyzed by medium level due to the high concentration of multiple target compounds. Different analytes from each set of data have been reported.

4-Bromofluorobenzene (Surr) @ 140%; upper control limit = 119%

The following samples required a dilution due to the nature of the sample matrix: V-S8-180119-475 (280-119347-2). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information. This is for analysis batch 280-445903.

Naphthalene and Toluene were detected in method blank MB 280-445812/3-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged "J". Refer to the QC report for details. This is considered acceptable because the detections were less than one-half the LOQ.

The following compounds were outside control limits in the continuing calibration verification (CCV) associated with batch 280-445808. Associated results have been flagged "Q". The failing compounds are considered poor performing compounds and standard variances allow up to 30%D. As such, the data have been qualified and reported. The following samples are associated: V-S8-180119-475 (280-119347-2), V-S8-180119-499 (280-119347-4), V-S8-180119-514 (280-119347-6), V-S8-180159-514 (280-119347-8) and (CCV 280-445808/2).

2-Butanone (MEK) @ -25.3%D
2-Hexanone @ -21.3%D
Acetone @ -28.4%D

Job ID: 280-119347-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Toluene was detected in method blank MB 280-445898/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.
This is for the MLE analysis of sample V-S8-180119-475 (280-119347-2).

Chloromethane failed the recovery criteria low for LCS 280-445898/2-A. Associated results have been flagged "Q". This is not indicative of a systematic control problem because this was a random marginal exceedance. As such, the results have been qualified and reported.
1,2,3-Trichlorobenzene, 2-Butanone (MEK), Chloromethane, Dichlorodifluoromethane, Trichlorofluoromethane and Vinyl chloride exceeded the RPD limit for LCSD 280-445898/3-A. Associated results have been flagged "Q". Refer to the QC report for details. This is for the MLE analysis of sample V-S8-180119-475 (280-119347-2).
Chloromethane 48%D (50-130)%D, Marginal Exceedance limits = 10-181%D.

The following compounds were outside control limits in the continuing calibration verification (CCV) associated with batch 280-445903: 2-Butanone (MEK) and Chloromethane. These two compounds are considered "poor performers". These compounds are not classified as Calibration Check Compounds (CCCs) in the reference method, and the laboratory defaults to in-house and/or project-specific criteria for evaluation. The associated samples were non-detect for the affected analytes. This is for the MLE analysis of sample V-S8-180119-475 (280-119347-2).
Chloromethane -21.0%D; 2-Butanone (MEK) -22.9%D

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Sample TB-S8-180119-01 (280-119347-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 01/28/2019.

Toluene-d8 (Surr) failed the surrogate recovery criteria high for TB-S8-180119-01 (280-119347-1). Associated results have been flagged "Q". Refer to the QC report for details. This sample did not contain any detections for target analytes associated to Toluene-d8 (Surr); therefore, re-extraction and/or re-analysis was not performed.

1,1,2-Trichloroethane failed the recovery criteria high for LCS 280-445631/5. Associated results have been flagged "Q". Refer to the QC report for details. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been qualified and reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Samples V-S8-180119-475 (280-119347-2), V-S8-180119-499 (280-119347-4), V-S8-180119-514 (280-119347-6) and V-S8-180159-514 (280-119347-8) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 01/21/2019 and analyzed on 01/29/2019.

The following sample was diluted due to the nature of the sample matrix: V-S8-180119-475 (280-119347-2). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

Compound 1,2,3-Trichloropropane, 1,2-Dibromo-3-Chloropropane, 1,2-Dibromopropane and 1,2-Dibromoethane eluted outside the retention time window on the Restex 502.2 Volatiles column and Restek Rtx-VRX (30) column for the following samples: (CCV 280-445839/17), (280-119347-A-8-B MS) and (280-119347-A-8-C MSD). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

Compound 1,2-Dibromopropane eluted outside the retention time window on the Restex 502.2 Volatiles column and Restek Rtx-VRX (30) column for the following sample: V-S8-180159-514 (280-119347-8). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Job ID: 280-119347-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Sample TB-S8-180119-01 (280-119347-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 01/31/2019 and analyzed on 02/01/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-S8-180119-475 (280-119347-3), P-S8-180119-499 (280-119347-5), P-S8-180119-514 (280-119347-7) and P-S8-180159-514 (280-119347-9) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 01/24/2019 and analyzed on 01/28/2019.

Gasoline Range Organics (GRO)-C6-C10 failed the recovery criteria high for the MSD of sample P-S8-180119-475 (280-119347-3) in batch 280-445732. Associated results have been flagged "J1". Refer to the QC report for details. The acceptable LCS data indicate that the analytical system was operating within control.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-S8-180119-01 (280-119347-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 01/29/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-S8-180119-475 (280-119347-3), P-S8-180119-499 (280-119347-5), P-S8-180119-514 (280-119347-7) and P-S8-180159-514 (280-119347-9) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 01/23/2019 and analyzed on 01/28/2019 and 01/29/2019.

Per the method comments, 8015D_DRO_DOD5 analysis for the following samples was performed on extracts that were silica gel cleaned: P-S8-180119-475 (280-119347-3), P-S8-180119-499 (280-119347-5), P-S8-180119-514 (280-119347-7), P-S8-180159-514 (280-119347-9), (LCS 280-445176/2-A), (LCS 280-445176/3-A), (MB 280-445176/1-A), (280-119255-A-3-A), (280-119255-A-3-B MS), (280-119255-A-3-D MS), (280-119255-A-3-C MSD) and (280-119255-A-3-E MSD). This is for preparation batch 280-445176 and analytical batch 280-445704

Diesel Range Organics [C10-C28] was detected in method blank MB 280-445176/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-S8-180119-475 (280-119347-2), P-S8-180119-475 (280-119347-3), V-S8-180119-499 (280-119347-4), P-S8-180119-499 (280-119347-5), V-S8-180119-514 (280-119347-6), P-S8-180119-514 (280-119347-7), V-S8-180159-514 (280-119347-8) and P-S8-180159-514 (280-119347-9) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 01/22/2019.

The initial oven temperature was not recorded for Percent Moisture analytical batch 280-445009. This did not affect the data, as the oven temperature doesn't vary much. The samples were placed in the oven by a day crew analyst and the batch was started at 15:33. The samples would have been put in the oven not long after that and were not taken out until the next day at 14:30, so the samples were in the oven well over the required 12 hours.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: EA Engineering, Science, and Technology
Project/Site: Kirtland BFF Vadose Zone Coring

TestAmerica Job ID: 280-119347-1

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
A2LA	DoD / DOE		2907.01	10-31-19

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
Moisture		Solid	Percent Moisture

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
M	Manual integrated compound.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-119377-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-119377-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 1/22/2019 at 9:15 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.7º C.

Receipt Exceptions

One of two Sodium Thiosulfate preserved Voa Vials requesting EDB analysis for sample TB-S7-210119-01 (280-119377-2) was received partially frozen and broken. Volume could not be salvaged from the broken container, therefore, the Voa Vial was disposed of. It can be noted that sufficient volume is available from the remaining Voa Vial and the laboratory will proceed with the analysis.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Sample V-S7-210119-420 (280-119377-3) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 01/21/2019 and analyzed on 01/29/2019.

Naphthalene and Toluene were detected in method blank MB 280-445812/3-A at levels that were less than one half the LOQ; therefore, corrective action was deemed unnecessary. The values should be considered estimates, and have been flagged “J” in accordance with the DoD QSM.

The initial calibration verification (ICV) result for Dichlorodifluoromethane (28.6%D) in batch 280-445655 was above the upper control limit. The associated sample (V-S7-210119-420 (280-119377-3) results were non-detects, and have been reported as qualified data.

The following compounds were outside control limits in the continuing calibration verification (CCV) associated with batch 280-445808. The failing compounds are considered poor performing compounds and standard variances allow up to 30%D. Report data with NCM and flags. Sample V-S7-210119-420 (280-119377-3) is associated with this CCV.

2-Butanone (MEK) @ -25.3%D
2-Hexanone @ -21.3%D
Acetone @ -28.4%D

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS)

Job ID: 280-119377-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Samples RB-S7-200119-01 (280-119377-1) and TB-S7-210119-01 (280-119377-2) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 02/02/2019.

The analytes 1,2,3-Trichlorobenzene, 1,2,4-Trichlorobenzene, Carbon disulfide and Naphthalene were detected in method blank MB 280-446338/5 at levels that were less than one half the LOQ; therefore, corrective action was deemed unnecessary. The values should be considered estimates, and have been flagged “J” in accordance with the DoD QSM.

The following compound was outside control limits in the continuing calibration verification (CCV) associated with batch 280-446338: 1,2-Dibromo-3-Chloropropane @ -27.1%D. The failing compound is considered a poor performing compound and standard variances allow for up to 30%D. Sample RB-S7-200119-01 (280-119377-1) is associated with this CCV and is "non-detect" for this analyte.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP

Sample V-S7-210119-420 (280-119377-3) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 02/04/2019 and analyzed on 02/26/2019.

The recovery for surrogate 1,2-Dibromopropane exceeded the surrogate recovery criteria in sample V-S7-210119-420 (280-119377-3). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP

Samples RB-S7-200119-01 (280-119377-1) and TB-S7-210119-01 (280-119377-2) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 01/31/2019 and analyzed on 02/01/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO)

Sample P-S7-210119-420 (280-119377-4) was analyzed for Volatile Petroleum Hydrocarbons (GC) in accordance with 8015D GRO. The samples were prepared on 01/24/2019 and analyzed on 01/29/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO)

Samples RB-S7-200119-01 (280-119377-1) and TB-S7-210119-01 (280-119377-2) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 01/29/2019 and 01/30/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Sample P-S7-210119-420 (280-119377-4) was analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 01/23/2019 and analyzed on 01/29/2019.

Per the method comments, 8015D_DRO_DOD5 analysis for the following samples was performed on extracts that were silica gel cleaned: RB-S7-200119-01 (280-119377-1), P-S7-210119-420 (280-119377-4), (LCS 280-445176/2-A), (LCS 280-445176/3-A), (LCS 280-445396/2-A), (LCS 280-445396/4-A), (LCSD 280-445396/3-A), (LCSD 280-445396/5-A), (MB 280-445176/1-A), (MB 280-445396/1-A), (280-119255-A-3-A), (280-119255-A-3-B MS), (280-119255-A-3-D MS), (280-119255-A-3-C MSD) and (280-119255-A-3-E MSD).

Diesel Range Organics [C10-C28] was detected in method blank MB 280-445176/1-A at a level that was less than one half the LOQ; therefore, corrective action was deemed unnecessary. The value should be considered an estimate, and has been flagged “J” in accordance with the DoD QSM.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 280-119377-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

DIESEL RANGE ORGANICS (DRO)

Sample RB-S7-200119-01 (280-119377-1) was analyzed for Diesel Range Organics (DRO) in accordance with 8015D DRO. The samples were prepared on 01/24/2019 and analyzed on 01/28/2019.

Diesel Range Organics [C10-C28] and Motor Oil (C20-C38) were detected in method blank MB 280-445396/1-A at levels that were less than one half the LOQ; therefore, corrective action was deemed unnecessary. The values should be considered estimates, and have been flagged “J” in accordance with the DoD QSM.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-S7-210119-420 (280-119377-3) and P-S7-210119-420 (280-119377-4) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 01/22/2019 and 02/04/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	False	See job narrative for details.
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
Q	One or more quality control criteria failed.
B	Blank contamination: The analyte was detected above one-half the reporting limit in an associated blank.
D	The reported value is from a dilution.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
D	The reported value is from a dilution.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
D	The reported value is from a dilution.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 280-119401-1

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-119401-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 1/23/2019 9:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.2º C.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Samples V-S7-220119-469 (280-119401-2), V-S7-220119-485 (280-119401-4), V-S7-220119-495 (280-119401-6), V-S7-220119-506 (280-119401-8) and V-S7-220159-506 (280-119401-10) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 01/22/2019 and 01/30/2019 and analyzed on 01/28/2019, 01/29/2019 and 01/30/2019.

Surrogate recovery for the following sample was outside control limits: V-S7-220119-495 (280-119401-6). Evidence of matrix interference is obvious by looking at the chromatogram therefore, re-extraction and/or re-analysis was not performed. The sample was re-analyzed by medium level due to the high concentration of some target compounds. This is for preparation batch 280-445812 and analytical batch 280-445808.

The following samples required a dilution for some compounds: V-S7-220119-495 (280-119401-6). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Internal standard responses were outside of acceptance limits for the following samples: V-S7-220119-485 (280-119401-4) and V-S7-220119-495 (280-119401-6). The samples show evidence of matrix interference by looking at the chromatogram; therefore, the data have been qualified and reported. This is for preparation batch 280-445812 and analytical batch 280-445808.

Acetone was detected in method blank MB 280-445697/3-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Associated sample were not re-extracted and/or re-analyzed because results were greater than 10X the value found in the method blank. The following samples are associated: V-S7-220119-485 (280-119401-4) and (MB 280-445697/3-A).

1,2,4-Trimethylbenzene, 2-Butanone (MEK), 2-Hexanone, Bromomethane and Naphthalene were detected in method blank MB 280-445697/3-A at levels that were above the method detection limit but below the reporting limit. Naphthalene and Toluene were detected in method blank MB 280-445812/3-A at levels that were above the method detection limit but below the reporting limit. Toluene was detected in method blank MB 280-445898/1-A at a level that was above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged "J". Refer to the QC report for details. This is considered acceptable because the detections were less than on-half the LOQ.

Job ID: 280-119401-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Chloromethane failed the recovery criteria low for LCS 280-445898/2-A. Associated results have been flagged "Q". This is not indicative of a systematic control problem because this was a random marginal exceedance. Qualified results have been reported.
Chloromethane 48%D (limits 50-130%D, Marginal Exceedance limits 10-181%D)

1,2,3-Trichlorobenzene, 2-Butanone (MEK), Chloromethane, Dichlorodifluoromethane, Trichlorofluoromethane and Vinyl chloride exceeded the RPD limit for LCSD 280-445898/3-A. Associated results have been flagged "Q". Refer to the QC report for details. The LCS and LCSD were each within control for 1,2,3-Trichlorobenzene, Dichlorodifluoromethane, Vinyl chloride, 2-Butanone (MEK), and Trichlorofluoromethane; and Chloromethane was within marginal exceedance limits.

The initial calibration verification (ICV) result for batch 280-445655 was above the upper control limit for Dichlorodifluoromethane at 28.6%D. Associated results have been flagged "Q". The bias was high, and sample results were non-detects; therefore, the data have been qualified and reported. The following samples are associated: V-S7-220119-469 (280-119401-2), V-S7-220119-485 (280-119401-4), V-S7-220119-495 (280-119401-6), V-S7-220119-506 (280-119401-8), V-S7-220159-506 (280-119401-10) and (ICV 280-445655/20).

The following compounds were outside control limits in the continuing calibration verification (CCV) associated with batch 280-445903: 2-Butanone (MEK) at -22.9%D and Chloromethane at -21.0%D. These two compounds are considered poor performers. These compounds are not classified as Calibration Check Compounds (CCCs) in the reference method, and the laboratory defaults to in-house and/or project-specific criteria for evaluation. The associated samples were non-detect for the affected analytes.

The following compounds were outside control limits in the continuing calibration verification (CCV) associated with batch 280-445808. the failing compounds are considered poor performing compounds, and standard variances allow up to 30%D. Report data with NCM and flags. The following samples are associated: V-S7-220119-469 (280-119401-2), V-S7-220119-485 (280-119401-4), V-S7-220119-495 (280-119401-6), V-S7-220119-506 (280-119401-8), V-S7-220159-506 (280-119401-10) and (CCV 280-445808/2).
2-Butanone (MEK) @ -25.3%D
2-Hexanone @ -21.3%D
Acetone @ -28.4%D

The closing continuing calibration verification (CCVC) associated with batch 280-445655 recovered outside the control limit for Hexachlorobutadiene at -59.9%D. The associated sample, V-S7-220119-485 (280-119401-4), was re-analyzed, but the reanalysis had a bad purge causing the internal standards to fail. As instructed by the client, the initial analysis has been qualified and reported.

The CCVC ran 7 minutes outside of the 12 hour tune time. The associated sample, V-S7-220119-485 (280-119401-4), was re-analyzed, but the reanalysis had a bad purge causing QC failures. As instructed by the client, the initial analysis has been qualified and reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Sample TB-S7-220119-01 (280-119401-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 02/02/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Samples V-S7-220119-469 (280-119401-2), V-S7-220119-485 (280-119401-4), V-S7-220119-495 (280-119401-6), V-S7-220119-506 (280-119401-8) and V-S7-220159-506 (280-119401-10) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 02/05/2019 and analyzed on 02/14/2019 and 02/18/2019.

The following sample was diluted due to abundance of target analytes: V-S7-220119-495 (280-119401-6). As such, surrogate recoveries are below the calibration range or are not reported, and associated results have been flagged "Q". Elevated reporting limits (RLs) are provided.

The continuing calibration verification (CCV) associated with batch 280-447717 recovered above the upper control limit for Ethylene Dibromide. Associated results have been flagged "Q". The samples associated with this CCV were non-detects for the affected analytes;

Job ID: 280-119401-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

therefore, the data have been reported. The following samples are impacted: V-S7-220119-469 (280-119401-2), V-S7-220119-485 (280-119401-4), V-S7-220119-495 (280-119401-6), V-S7-220119-506 (280-119401-8) and V-S7-220159-506 (280-119401-10).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-S7-220119-01 (280-119401-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared and analyzed on 02/05/2019.

Compound 1,2-Dibromo-3-Chloropropane eluted outside the retention time window on the Restex 502.2 Volatiles column and Restek Rtx-VRX (30) column for the following samples: (CCV 280-446579/27) and (CCV 280-446579/44). This retention time shift was taken into account when reviewing the sample(s) for target compounds.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-S7-220119-469 (280-119401-3), P-S7-220119-485 (280-119401-5), P-S7-220119-495 (280-119401-7), P-S7-220119-506 (280-119401-9) and P-S7-220159-506 (280-119401-11) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 01/24/2019 and analyzed on 01/29/2019.

Sample P-S7-220119-495 (280-119401-7)[250X] required dilution prior to analysis due to the nature of the sample matrix. The reporting limits have been adjusted accordingly.

a,a,a-Trifluorotoluene (Surr) failed the surrogate recovery criteria high for P-S7-220119-495 (280-119401-7) due to the required dilution. Associated results have been flagged "Q". Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-S7-220119-01 (280-119401-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 02/01/2019.

The LCS was re-analyzed due to low C6-C12 recoveries from the first analysis in analytical batch 445732. All other targets were within acceptable limits. Therefore only re-analysis of the LCS was preformed. In the reported re-analysis, all targets are within accepted criteria.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-S7-220119-469 (280-119401-3), P-S7-220119-485 (280-119401-5), P-S7-220119-495 (280-119401-7), P-S7-220119-506 (280-119401-9) and P-S7-220159-506 (280-119401-11) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 01/23/2019 and analyzed on 01/29/2019.

Diesel Range Organics [C10-C28] was detected in method blank MB 280-445176/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

Per the method comments, 8015D_DRO_DOD5 analysis for the following samples was performed on extracts that were silica gel cleaned: P-S7-220119-469 (280-119401-3), P-S7-220119-485 (280-119401-5), P-S7-220119-495 (280-119401-7), P-S7-220119-506 (280-119401-9), P-S7-220159-506 (280-119401-11), (LCS 280-445176/2-A), (LCS 280-445176/3-A), (MB 280-445176/1-A). This is for preparation batch 280-445176 and analytical batch 280-445704 .

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-S7-220119-469 (280-119401-2), P-S7-220119-469 (280-119401-3), V-S7-220119-485 (280-119401-4), P-S7-220119-485

Job ID: 280-119401-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

(280-119401-5), V-S7-220119-495 (280-119401-6), P-S7-220119-495 (280-119401-7), V-S7-220119-506 (280-119401-8), P-S7-220119-506 (280-119401-9), V-S7-220159-506 (280-119401-10) and P-S7-220159-506 (280-119401-11) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 01/24/2019 and 02/04/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
J	Estimated: The analyte was positively identified; the quantitation is an estimation
M	Manual integrated compound.

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
Q	One or more quality control criteria failed.
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-119694-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 1/31/2019 9:20 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.5º C.

Receipt Exceptions

1 of 5 Voa Vials submitted for sample RB-247-290119-01 (280-119694-1) were received frozen and broken. 1 x 40mL HCl preserved Voa Vial was the only container received intact. The client was contacted and instructed the laboratory to analyze for 8260B VOCs only.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid

Sample V-247-300119-120 (280-119694-3) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 01/30/2019 and analyzed on 02/13/2019.

1,2,4-Trimethylbenzene, Acetone, Chloroform and Naphthalene were detected in method blank MB 280-447467/3-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged "J". Refer to the QC report for details. This is considered acceptable because the detections were less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water

Samples RB-247-290119-01 (280-119694-1) and TB-247-300119-01 (280-119694-2) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 02/09/2019.

The continuing calibration verification (CCV) associated with batch 280-447129 recovered above the upper control limit for 4-Methyl-2-pentanone (MIBK). The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.
4-Methyl-2-pentanone (MIBK) +20.4%D

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid

Sample V-247-300119-120 (280-119694-3) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on

Job ID: 280-119694-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

02/13/2019 and analyzed on 02/18/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water
Sample TB-247-300119-01 (280-119694-2) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 02/13/2019 and analyzed on 02/15/2019.

1,2-Dibromopropane failed the surrogate recovery criteria high for TB-247-300119-01 (280-119694-2). Associated results have been flagged "Q". Refer to the QC report for details. This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid
Sample P-247-300119-120 (280-119694-4) was analyzed for Volatile Petroleum Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared and analyzed on 02/04/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water
Sample TB-247-300119-01 (280-119694-2) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 02/11/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)
Sample P-247-300119-120 (280-119694-4) was analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 02/06/2019 and analyzed on 02/12/2019.

Silica gel cleanup performed on following samples: P-247-300119-120 (280-119694-4), (LCS 280-446722/2-A), (LCS 280-446722/3-A), (MB 280-446722/1-A), (280-119694-A-4-E MS), (280-119694-A-4-G MS), (280-119694-A-4-F MSD) and (280-119694-A-4-H MSD). This is for preparation batch 280-446722 and analytical batch 280-447214.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS
Samples V-247-300119-120 (280-119694-3) and P-247-300119-120 (280-119694-4) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 01/31/2019 and 02/01/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	False	Refer to Job Narrative for details.
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	False	Refer to Job Narrative for details.
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
Q	One or more quality control criteria failed.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.

GC Semi VOA

Qualifier	Qualifier Description
J	Estimated: The analyte was positively identified; the quantitation is an estimation
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-119743-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 2/1/2019 at 9:20 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 2.4º C and 2.9º C.

Receipt Exceptions

One of Two Sodium Thiosulfate preserved VOA Vials requesting EDB analysis for sample TB-247-310119-01 (280-119743-2) was received partially frozen and broken. Volume could not be salvaged from the broken container, therefore, the Voa Vial was disposed of. The 2nd Sodium Thiosulfate Voa Vial was received frozen, but not broken. It can be noted that sufficient volume is available from the remaining Voa Vial and the laboratory proceeded with the analysis.

1 of 4 HCl preserved Voa Vials for sample TB-247-310119-01 (280-119743-2) was received with a headspace bubble >6mm in diameter. It can be noted that sufficient volume is available from the remaining Voa Vials to perform analysis without headspace.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - SOLID

Sample V-247-310119-164 (280-119743-3) was analyzed for volatile organic compounds (GC/MS) in accordance with EPA SW-846 Method 8260B. The samples were prepared and analyzed on 02/13/2019.

The analytes 1,2,4-Trimethylbenzene, Acetone, Chloroform and Naphthalene were detected in method blank MB 280-447510/3-A at levels that were less than one half the LOQ; therefore, corrective action was deemed unnecessary. The values should be considered estimates, and have been flagged “J” in accordance with the DoD QSM.

The initial attempt at running sample V-247-310119-164 (280-119743-3) for 8260B analyses had 2 compounds fail low in the closing CCV (n-Butylbenzene -54.4% and Hexachlorobutadiene at -62.9%). The second vial sent with this sample is cracked; therefore re-analyses can not be performed from the vials sent. The client was contacted on 2/13/2019 and directed the laboratory to reanalyze the sample from the soil jar sent in.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - SOLID

Sample V-247-310119-208 (280-119743-5) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B.

Job ID: 280-119743-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

The analytes 1,2,4-Trimethylbenzene, Acetone, Chloroform and Naphthalene were detected in method blank MB 280-447467/3-A at levels that were less than one half the LOQ; therefore, corrective action was deemed unnecessary. The values should be considered estimates, and have been flagged "J" in accordance with the DoD QSM.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - WATER

Samples RB-247-310119-01 (280-119743-1) and TB-247-310119-01 (280-119743-2) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 02/13/2019.

The continuing calibration verification (CCV) associated with batch 280-447447 recovered above the upper control limit for Dichlorodifluoromethane (80-120%) at 20.9%. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - SOLID

Samples V-247-310119-164 (280-119743-3) and V-247-310119-208 (280-119743-5) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 02/13/2019 and analyzed on 02/18/2019 and 02/26/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - WATER

Samples RB-247-310119-01 (280-119743-1) and TB-247-310119-01 (280-119743-2) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 02/13/2019 and analyzed on 02/15/2019.

The recovery for surrogate 1,2-Dibromopropane exceeded the surrogate recovery criteria in samples RB-247-310119-01 (280-119743-1) and TB-247-310119-01 (280-119743-2). These samples did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - SOLID

Samples P-247-310119-164 (280-119743-4) and P-247-310119-208 (280-119743-6) were analyzed for Volatile Petroleum Hydrocarbons (GC) in accordance with 8015D GRO. The samples were prepared on 01/31/2019 and analyzed on 02/12/2019.

The recovery for surrogate a,a,a-Trifluorotoluene exceeded the surrogate recovery criteria in sample P-247-310119-208 (280-119743-6). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - WATER

Samples RB-247-310119-01 (280-119743-1) and TB-247-310119-01 (280-119743-2) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 02/11/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO) - SOLID

Samples P-247-310119-164 (280-119743-4) and P-247-310119-208 (280-119743-6) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 02/06/2019 and analyzed on 02/12/2019.

Silica gel cleanup performed was performed on samples: P-247-310119-164 (280-119743-4), P-247-310119-208 (280-119743-6), (LCS 280-446722/2-A), (LCS 280-446722/3-A), (MB 280-446722/1-A), (280-119694-A-4-G MS) and (280-119694-A-4-H MSD).

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Job ID: 280-119743-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

DIESEL RANGE ORGANICS (DRO) - WATER

Sample RB-247-310119-01 (280-119743-1) was analyzed for Diesel Range Organics (DRO) in accordance with 8015D DRO. The samples were prepared on 02/06/2019 and analyzed on 02/07/2019.

The following sample was cleaned with silica gel: RB-247-310119-01 (280-119743-1) per method comments.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples V-247-310119-164 (280-119743-3), P-247-310119-164 (280-119743-4), V-247-310119-208 (280-119743-5) and P-247-310119-208 (280-119743-6) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 02/01/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: EA Engineering, Science, and Technology
Project/Site: Kirtland BFF Vadose Zone Coring

TestAmerica Job ID: 280-119743-1

Laboratory: TestAmerica Denver

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	EPA Region	Identification Number	Expiration Date
A2LA	DoD / DOE		2907.01	10-31-19

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
Moisture		Solid	Percent Moisture

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	False	Refer to Job Narrative for details.
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	False	Refer to Job Narrative for details.
Multiphasic samples are not present.	False	Refer to Job Narrative for details.
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
M	Manual integrated compound.
J	Estimated: The analyte was positively identified; the quantitation is an estimation

GC VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

GC Semi VOA

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.
Q	One or more quality control criteria failed.
M	Manual integrated compound.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Laboratory: TestAmerica Denver

Narrative

CASE NARRATIVE

Client: EA Engineering, Science, and Technology

Project: Kirtland BFF Vadose Zone Coring

Report Number: 280-119877-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT
The samples were received on 2/6/2019 9:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.9º C.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Solid
Samples V-247-050219-480 (280-119877-3), V-247-050219-489 (280-119877-5) and V-247-050219-499 (280-119877-7) were analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were prepared on 02/05/2019 and analyzed on 02/13/2019.

Chloroform was detected in method blank MB 280-447467/3-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". Refer to the QC report for details. This is considered acceptable because the detection was less than one-half the LOQ.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GC/MS) - Water
Sample TB-247-050219-01 (280-119877-1) was analyzed for volatile organic compounds (GC/MS) in accordance with 8260B. The samples were analyzed on 02/19/2019.

Internal standard (ISTD) response for TBA-IS for the following sample was outside acceptance criteria: (CCVC 280-448055/35). This ISTD does not correspond to any of the requested target compounds; therefore, the data have been reported.
analytical batch 280-448055

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Solid
Samples V-247-050219-480 (280-119877-3), V-247-050219-489 (280-119877-5) and V-247-050219-499 (280-119877-7) were analyzed for EDB and DBCP in accordance with 8011. The samples were prepared on 02/13/2019 and analyzed on 03/05/2019.

1,2-Dibromopropane failed the surrogate recovery criteria high for V-247-050219-480 (280-119877-3) and V-247-050219-489 (280-119877-5). Associated results have been flagged "Q". Refer to the QC report for details. These samples did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Job ID: 280-119877-1 (Continued)

Laboratory: TestAmerica Denver (Continued)

Compound 1,2-Dibromopropane and Ethylene Dibromide eluted outside the retention time window on front and back columns for the following sample: (280-119877-B-7-C MSD). This retention time shift was taken into account when reviewing the sample(s) for target compounds. All associated samples were non-detect.

Compound 1,2-Dibromopropane, 1,2,3-Trichloropropane, and Ethylene Dibromide eluted outside the retention time window on front and back columns for the following sample: (CCV 280-449748/17). This retention time shift was taken into account when reviewing the sample(s) for target compounds. All associated samples were non-detect.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

EDB AND DBCP - Water

Sample TB-247-050219-01 (280-119877-1) was analyzed for EDB and DBCP in accordance with 8011. The samples were prepared and analyzed on 02/16/2019.

Data have been reported from the secondary column. All QC is in control. The following samples are associated: TB-247-050219-01 (280-119877-1), (CCV 280-447906/19), (CCV 280-447906/30), (CCVRT 280-447906/5), (LCS 280-447894/2-A), (LCSD 280-447894/3-A) and (MB 280-447894/4-A)

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Solid

Samples P-247-050219-480 (280-119877-2), P-247-050219-489 (280-119877-4) and P-247-050219-499 (280-119877-6) were analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were prepared on 02/05/2019 and analyzed on 02/12/2019.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-447368 and analytical batch 280-447384.
LCS/LCSD used in lieu of MS/MSD.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GASOLINE RANGE ORGANICS (GRO) - Water

Sample TB-247-050219-01 (280-119877-1) was analyzed for Gasoline Range Organics (GRO) in accordance with 8015D GRO. The samples were analyzed on 02/11/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DIESEL RANGE ORGANICS (DRO)

Samples P-247-050219-480 (280-119877-2), P-247-050219-489 (280-119877-4) and P-247-050219-499 (280-119877-6) were analyzed for Diesel Range Organics (DRO) in accordance with SW846 8015D. The samples were prepared on 02/10/2019 and analyzed on 02/13/2019.

Silica gel clean-up was performed on the following samples: P-247-050219-480 (280-119877-2), P-247-050219-489 (280-119877-4), P-247-050219-499 (280-119877-6), (LCS 280-447167/2-A), (LCS 280-447167/3-A), (MB 280-447167/1-A), (280-119877-A-2-B MS), (280-119877-A-2-D MS), (280-119877-A-2-C MSD) and (280-119877-A-2-E MSD). This is for preparation batch 280-447167 and analytical batch 280-447317. Silica Gel ID: Active_silgel_00007

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERCENT SOLIDS

Samples P-247-050219-480 (280-119877-2), V-247-050219-480 (280-119877-3), P-247-050219-489 (280-119877-4), V-247-050219-489 (280-119877-5), P-247-050219-499 (280-119877-6) and V-247-050219-499 (280-119877-7) were analyzed for percent solids in accordance with ASTM D2216-90. The samples were analyzed on 02/07/2019 and 02/08/2019.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Subject: **Pore Fluid Saturation; A/W Drainage Capillarity Package; O/W Drainage Capillarity Package; O/W Imbibition Capillarity Package; Free Product Mobility; Residual Saturation by Water drive-(RSWD); NAPL Permeability; Grain Size Analysis-ASTM D422.)**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact me or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

Laboratory Test Program Notes

Contaminant identification:

Standard TAT for basic analysis is 10-15 business days.

Laboratory Test Program Notes

Standard TAT for basic analysis is 10-15 business days. Advanced tests require additional time.

Sample locations to be selected by EA Engineering, Science, and Technology, Inc., PBC personnel from core photography.

Grain Size Analysis: Laser or sieve method; includes tabular data, graphics and statistical sorting in Excel format.

Pore Fluid Saturation Package: API RP40 Dean-Stark Method: Includes initial pore fluid saturations, total porosity, air-filled porosity, grain density, dry bulk density and moisture content.

Air/Water Drainage Capillarity Package: Air/Water Drainage Capillary Pressure Curve (air displacing water) with Air Permeability and Hydraulic Conductivity: includes fluid production vs. capillary pressure, total and air-filled porosity, grain density, dry bulk density, moisture content and total (water only) pore fluid saturations.

Oil/Water Drainage or Imbibition Capillary Pressure Curve: Oil/Water Capillary Pressure Curve: includes fluid production vs. capillary pressure, total and air-filled porosity, grain density, dry bulk density, moisture content and total (water only) pore fluid saturations. Does not include hydraulic conductivity or oil permeability tests. Requires 500 ml of LNAPL per sample.

Free Product Mobility Package: Applied centrifugal force demonstrates product mobility; includes residual saturations by Dean-Stark, total porosity, grain and dry bulk density.

Residual Saturation by Water Drive: Sample driven to residual saturation by water/NAPL displacement. Residual saturations by Dean-Stark extraction, total porosity, bulk and grain density.

If no groundwater received, use filtered Houston tap water for testing.

PHYSICAL PROPERTIES DATA - Residual Saturation by Water Drive

(Methodology: API RP 40; EPA 9100)

Project Name: Kirtland Vadose Zone Coring
Project No: 62735DM02.1017

SAMPLE ID.	DEPTH, ft.	SAMPLE ORIENTATION (1)	ANALYSIS DATE	FLUID USED	FLUID VISCOSITY (CP)	TEST TEMPERATURE (oF)	25 PSI CONFINING STRESS		
							EFFECTIVE PERMEABILITY TO Water at Sor (2,3), millidarcy	HYDRAULIC CONDUCTIVITY (3), cm/s	INTRINSIC PERMEABILITY TO Fluid (3), cm^2
GUV-S9-171018-473 (474.10-474.20)	474.1-474.2	H	20190326	*Filtered Tap Water	0.9775	71.0	113.01	1.09E-04	1.12E-09
GUV-S9-181018-484 (484.20-484.40)	484.2-484.4	H	20190326	*Filtered Tap Water	1.0058	69.0	108.10	1.01E-04	1.07E-09

(1) Sample Orientation: H = horizontal; V = vertical; R = remold
(2) Effective (Native) = With as-received pore fluids in place.
(3)Effective Water Permeability at residual oil saturation.
*Filtered Tap Water was used for flood test. Its properties matched the GW 150-031218 received from EA Engineering.

PTS Laboratories

PTS File No: 48218
Client: EA Engineering, Science and Technology
Report Date: 03/27/19

ENDPOINT SATURATION WATER DRIVE TEST: INITIAL AND RESIDUAL SATURATIONS

Project Name: Kirtland Vadose Zone Coring
Project No: 62735DM02.1017

			METHODS:	API RP 40		API RP 40	API RP 40, DEAN-STARK			
							PORE FLUID SATURATIONS (3), % Pv			
				DENSITY			Initial Fluid Saturations		After Waterflood Test	
SAMPLE ID.	DEPTH, ft.	SAMPLE ORIENTATION (1)	ANALYSIS DATE	DRY BULK, g/cc	GRAIN, g/cc	TOTAL POROSITY (2), %Vb	WATER (Swi) SATURATION	NAPL (Soi) SATURATION	WATER (Srw) SATURATION	NAPL (Sor) SATURATION
GUV-S9-171018-473 (474.10-474.20)	474.1-474.2	H	20190326	1.62	2.63	38.5	65.4	4.1	65.4	4.1
NOTE: No visible NAPL produced; 10.62 pore volumes (250ml) of water injected. Produced water - clear yellow with moderate hydrocarbon odor. Sample intact, small spotted fluorescense on sample teflon tape but none on the screens.										
GUV-S9-181018-484 (484.20-484.40)	484.2-484.4	H	20190326	1.68	2.63	36.1	60.8	5.7	60.8	5.7
NOTE: No visible NAPL produced; 11.18 pore volumes (250ml) of water injected. Produced water - clear yellow with strong hydrocarbon odor. Sample intact, small spotted fluorescense on sample teflon tape but none on the screens.										

(1) Sample Orientation: H = horizontal; V = vertical; R = remold
(2) Total Porosity = all non & interconnected pore channels.
(3) Fluid density used to calculate pore fluid saturations: Water = 0.9992 g/cc, NAPL = 0.76009 g/cc.
Water drives conducted at 25 psi confining pressure and 70°F. Laboratory fresh water (tap) used as injection fluid.
Swi = Initial Water Saturation as received prior to waterflooding, Soi = Initial NAPL Saturation as received prior to waterflooding.
Srw = Residual Water Saturation after waterflooding, Sor = Residual NAPL Saturation after waterflooding.
Vb = Bulk Volume, cc; Pv = Pore Volume, cc; ND = Not Detected

Subject: **Pore Fluid Saturation (Dean Stark Method)**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact me or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

Laboratory Test Program Notes

Contaminant identification: _____

Standard TAT for basic analysis is 10-15 business days.

Laboratory Test Program Notes

Standard TAT for basic analysis is 10-15 business days. Advanced tests require additional time.

Sample locations to be selected by EA Engineering, Science, and Technology, Inc., PBC personnel from core photography.

Grain Size Analysis: Laser or sieve method; includes tabular data, graphics and statistical sorting in Excel format.

Pore Fluid Saturation Package: API RP40 Dean-Stark Method: Includes initial pore fluid saturations, total porosity, air-filled porosity, grain density, dry bulk density and moisture content.

Air/Water Drainage Capillarity Package: Air/Water Drainage Capillary Pressure Curve (air displacing water) with Air Permeability and Hydraulic Conductivity: includes fluid production vs. capillary pressure, total and air-filled porosity, grain density, dry bulk density, moisture content and total (water only) pore fluid saturations.

Oil/Water Drainage or Imbibition Capillary Pressure Curve: Oil/Water Capillary Pressure Curve: includes fluid production vs. capillary pressure, total and air-filled porosity, grain density, dry bulk density, moisture content and total (water only) pore fluid saturations. Does not include hydraulic conductivity or oil permeability tests. Requires 500 ml of LNAPL per sample.

Free Product Mobility Package: Applied centrifugal force demonstrates product mobility; includes residual saturations by Dean-Stark, total porosity, grain and dry bulk density.

Residual Saturation by Water Drive: Sample driven to residual saturation by water/NAPL displacement. Residual saturations by Dean-Stark extraction, total porosity, bulk and grain density.

If no groundwater received, use filtered Houston tap water for testing.

Subject: **Pore Fluid Saturation; A/W Drainage Capillarity Package; O/W Drainage Capillarity Package; O/W Imbibition Capillarity Package; Free Product Mobility; Residual Saturation by Water drive-(RSWD); NAPL Permeability; Grain Size Analysis-ASTM D422.**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact me or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

Laboratory Test Program Notes
Contaminant identification:
Standard TAT for basic analysis is 10-15 business days.

Laboratory Test Program Notes

Standard TAT for basic analysis is 10-15 business days. Advanced tests require additional time.
Sample locations to be selected by EA Engineering, Science, and Technology, Inc., PBC personnel from core photography.
Grain Size Analysis: Laser or sieve method; includes tabular data, graphics and statistical sorting in Excel format.
Pore Fluid Saturation Package: API RP40 Dean-Stark Method: Includes initial pore fluid saturations, total porosity, air-filled porosity, grain density, dry bulk density and moisture content.
Air/Water Drainage Capillarity Package: Air/Water Drainage Capillary Pressure Curve (air displacing water) with Air Permeability and Hydraulic Conductivity: includes fluid production vs. capillary pressure, total and air-filled porosity, grain density, dry bulk density, moisture content and total (water only) pore fluid saturations.
Oil/Water Drainage or Imbibition Capillary Pressure Curve: Oil/Water Capillary Pressure Curve: includes fluid production vs. capillary pressure, total and air-filled porosity, grain density, dry bulk density, moisture content and total (water only) pore fluid saturations. Does not include hydraulic conductivity or oil permeability tests. Requires 500 ml of LNAPL per sample.
Free Product Mobility Package: Applied centrifugal force demonstrates product mobility; includes residual saturations by Dean-Stark, total porosity, grain and dry bulk density.
Residual Saturation by Water Drive: Sample driven to residual saturation by water/NAPL displacement. Residual saturations by Dean-Stark extraction, total porosity, bulk and grain density.
If no groundwater received, use filtered SFS tap water for testing.

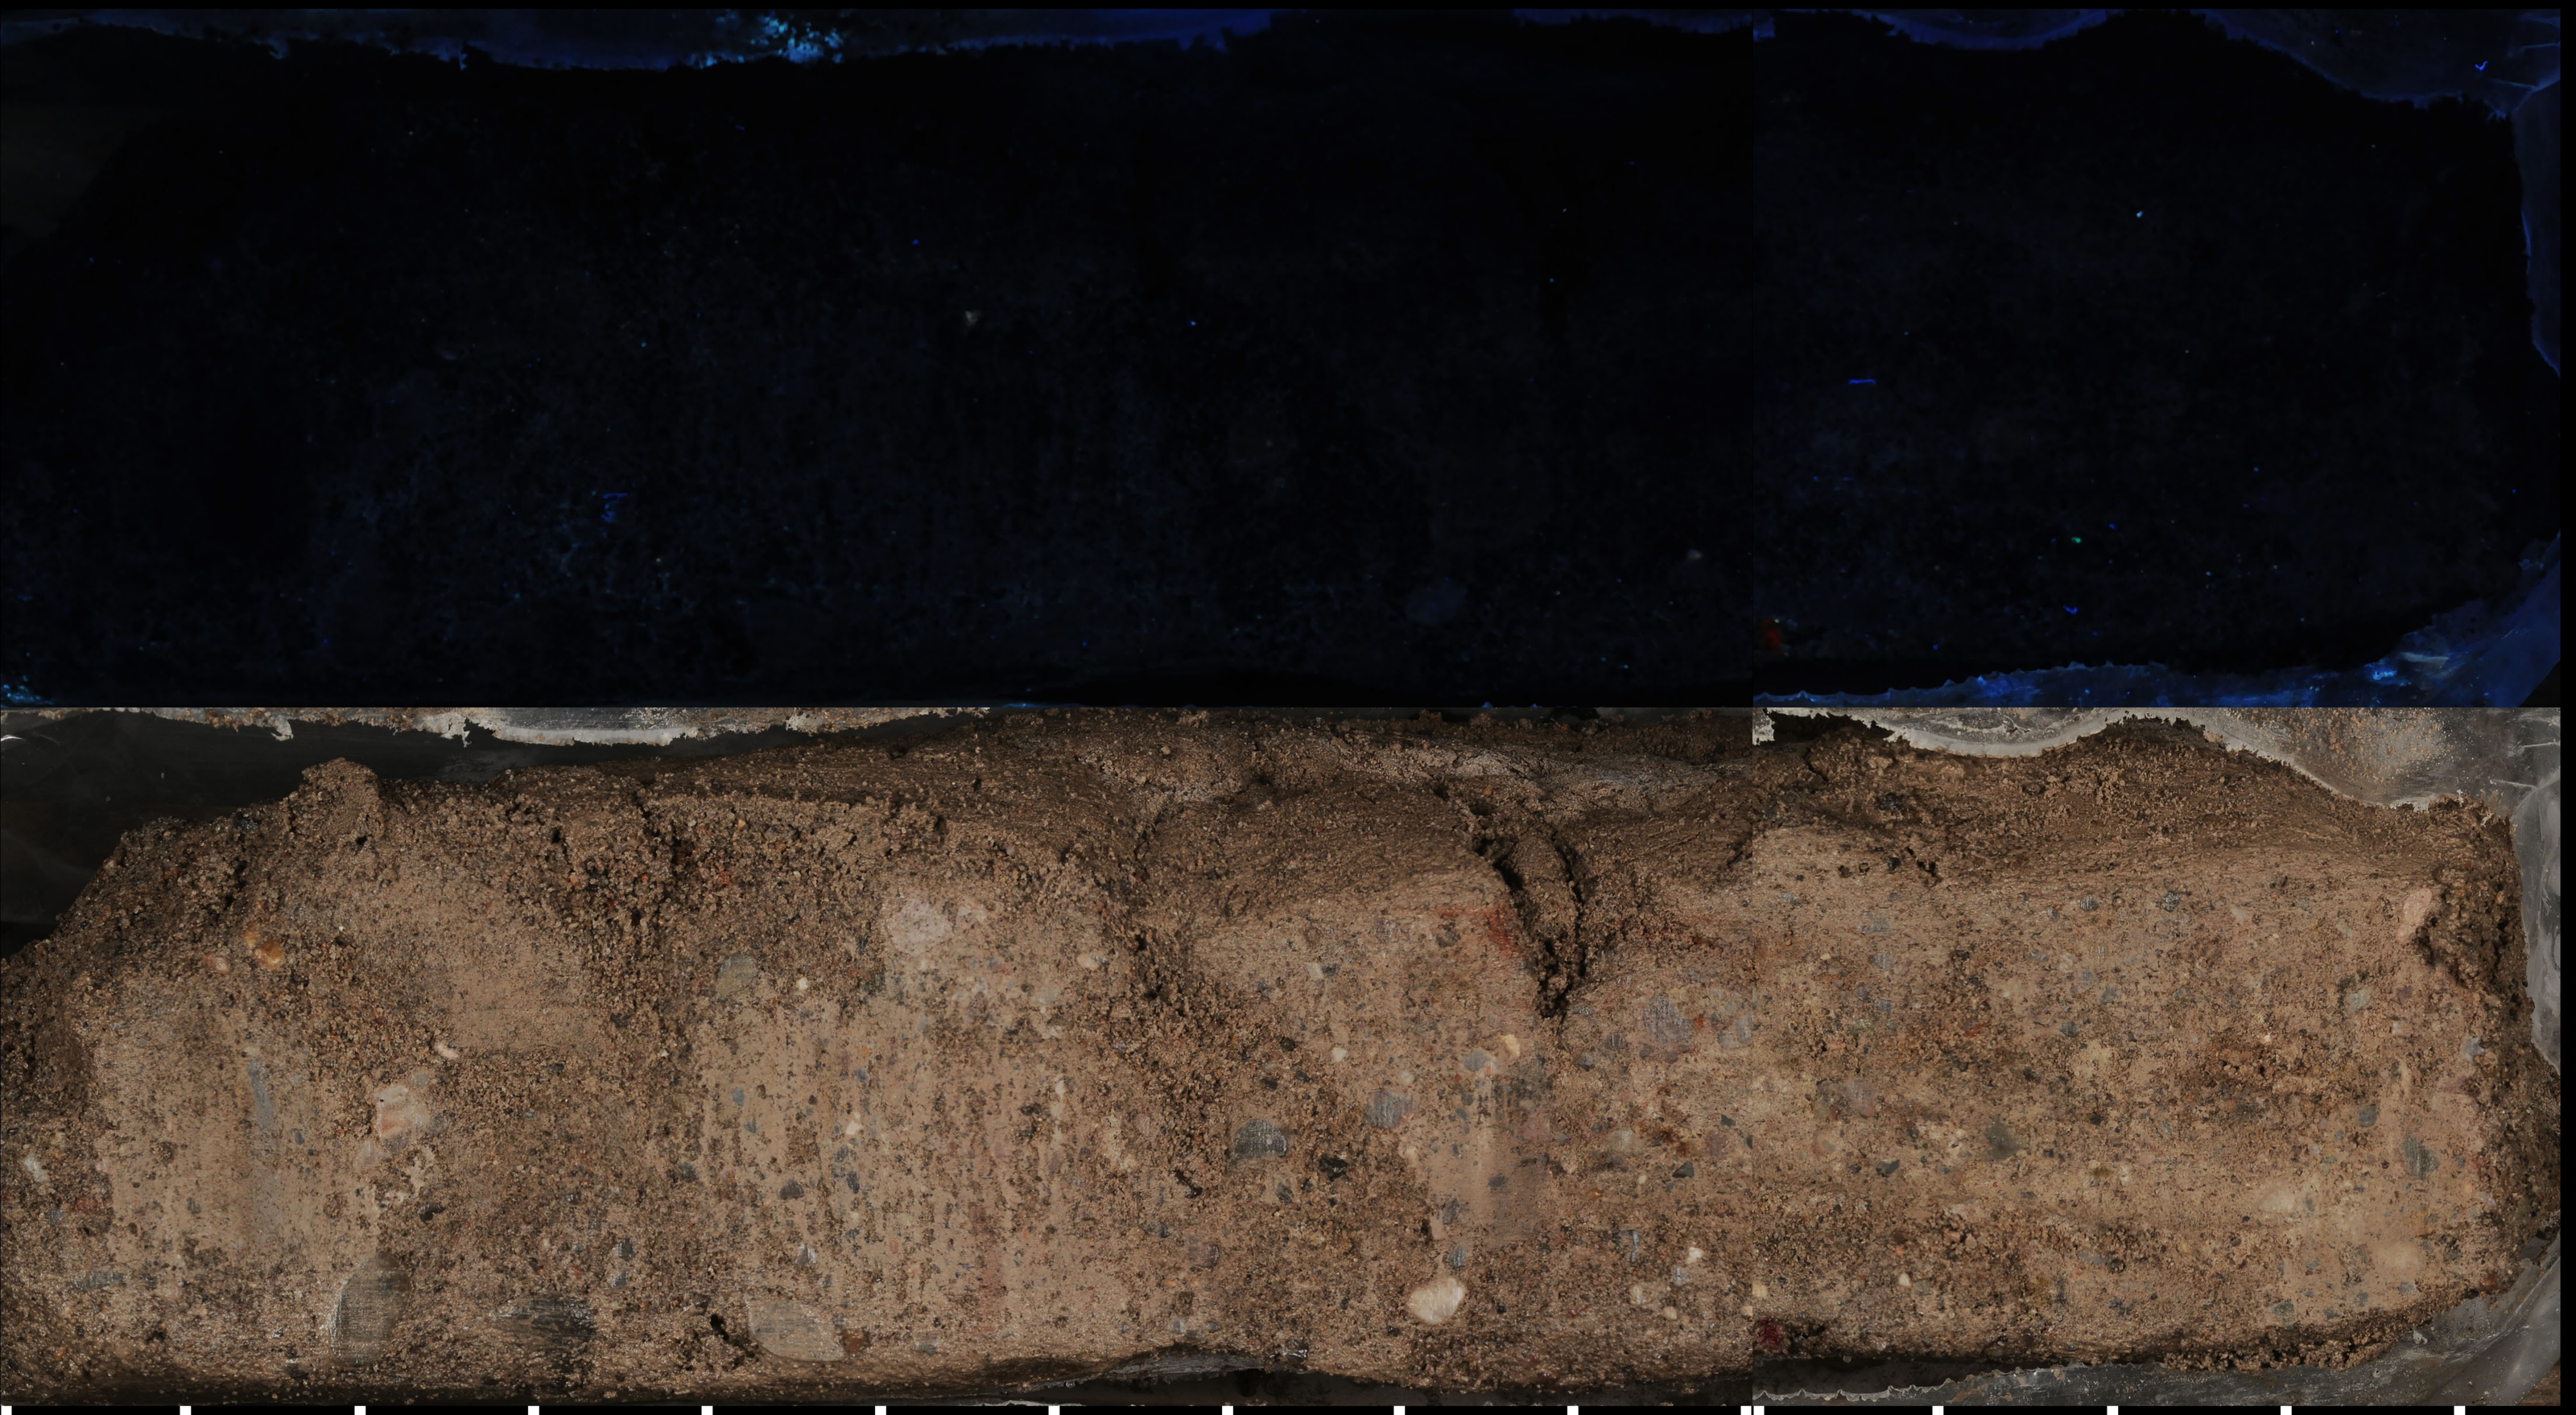
Laboratory Test Program Notes

Standard TAT for basic analysis is 10-15 business days.

Samples received cryogenically preserved will be stored frozen at standard core storage rates from sample date of receipt.

Sample locations to be selected by EA Engineering personnel from core photography.



Core Photo: white light and ultraviolet, low and high resolution, strip format.

Subject: **Pore Fluid Saturation; A/W Drainage Capillarity Package; O/W Drainage Capillarity Package; O/W Imbibition Capillarity Package; Free Product Mobility; Residual Saturation by Water drive-(RSWD); NAPL Permeability; Grain Size Analysis-ASTM D422.)**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact myself or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

PHYSICAL PROPERTIES DATA - PERMEABILITY TO PRODUCT

(Methodology: API RP 40)

Project Name: Kirtland Vadose Zone Coring
Project No: 62735DM02.1017

				25 PSI CONFINING STRESS	
SAMPLE ID.	DEPTH, ft.	SAMPLE ORIENTATION (1)	ANALYSIS DATE	EFFECTIVE PERMEABILITY TO PRODUCT, (2,3), millidarcy	NAPL CONDUCTIVITY (3), cm/s
GUV-S2-161118-489	490.85	V	20190128	140	1.20E-04

(1) Sample Orientation: H = horizontal; V = vertical; R = remold
(2) Effective (Native) = With as-received pore fluids in place.
(3) Permeability to NAPL and NAPL conductivity measured at saturated conditions.
NAPL properties used to calculate permeability to product at 67.1°F: Viscosity = 0.7878 cP; Density = 0.7265 g/cc.

Subject: **Pore Fluid Saturation; A/W Drainage Capillarity Package; O/W Drainage Capillarity Package; O/W Imbibition Capillarity Package; Free Product Mobility; Residual Saturation by Water drive-(RSWD); NAPL Permeability; Grain Size Analysis-ASTM D422.)**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact myself or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

Subject: **Fluid Properties Package – (Density; Specific Gravity; Viscosity & Interfacial Tension (IFT)**

Dear Bernie / Pamela,

Please find enclosed report for **Fluid Properties Package – (Density; Specific Gravity; Viscosity & Interfacial Tension (IFT)** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact myself or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

Client: EA Engineering, Science and Technology
Report Date: 07/08/19

ENDPOINT SATURATION WATER DRIVE TEST: INITIAL AND RESIDUAL SATURATIONS

Project Name: Kirtland Vadose Zone Coring
Project No: 62735DM02.1017

			METHODS:	API RP 40		API RP 40	API RP 40, DEAN-STARK			
							PORE FLUID SATURATIONS (3), % Pv			
				DENSITY			Initial Fluid Saturations		After Waterflood Test	
SAMPLE ID.	DEPTH, ft.	SAMPLE ORIENTATION (1)	ANALYSIS DATE	DRY BULK, g/cc	GRAIN, g/cc	TOTAL POROSITY (2), %Vb	WATER (Swi) SATURATION	NAPL (Soi) SATURATION	WATER (Srw) SATURATION	NAPL (Sor) SATURATION
GUV-S1-051218-478 (479.10-479.20)	479.10	H	20190702	1.69	2.61	35.3	54.7	2.6	54.8	2.6

NOTE: No visible NAPL produced; 16.89 pore volumes (370ml) of water injected. Produced water - clear dull yellow with strong hydrocarbon odor. Sample intact, strong spotted fluorescense on sample teflon tape but none on the screens.

(1) Sample Orientation: H = horizontal; V = vertical; R = remold
(2) Total Porosity = all non & interconnected pore channels.
(3) Fluid density used to calculate pore fluid saturations: Water = 0.9992 g/cc, NAPL = 0.76009 g/cc.
Water drives conducted at 25 psi confining pressure and 70°F. Laboratory fresh water (tap) used as injection fluid.
Swi = Initial Water Saturation as received prior to waterflooding, Soi = Initial NAPL Saturation as received prior to waterflooding.
Srw = Residual Water Saturation after waterflooding, Sor = Residual NAPL Saturation after waterflooding.
Vb = Bulk Volume, cc; Pv = Pore Volume, cc; ND = Not Detected

Laboratory Test Program Notes

Standard TAT for basic analysis is 10-15 business days.
Samples received cryogenically preserved will be stored frozen at standard core storage rates from sample date of receipt.
Sample locations to be selected by EA Engineering personnel from core photography.
Core Photo: white light and ultraviolet, low and high resolution, strip format.

Subject: **Pore Fluid Saturation; A/W Drainage Capillarity Package; O/W Drainage Capillarity Package; O/W Imbibition Capillarity Package; Free Product Mobility; Residual Saturation by Water drive-(RSWD); NAPL Permeability; Grain Size Analysis-ASTM D422.)**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact myself or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

C.A.Umeh

Laboratory Test Program Notes
Contaminant identification:
Standard TAT for basic analysis is 10-15 business days.

Laboratory Test Program Notes
Standard TAT for basic analysis is 10-15 business days. Advanced tests require additional time.
Sample locations to be selected by EA Engineering, Science, and Technology, Inc.
Grain Size Analysis: Laser or sieve method; includes tabular data, graphics and statistical sorting in Excel format.

GUV-V2-131218-194 (194.60-194.80)	194.7	H	345.25	78.75	7.48E-05

(1) Sample Orientation: H = horizontal; V = vertical; R = remold

(2) Specific = No pore fluids in place.

(3) Effective (Native) = With as-received pore fluids in place.

(4) Permeability to water and hydraulic conductivity measured at saturated conditions.

Air = Nitrogen gas, Water = filtered Laboratory Fresh (tap) or Site water.

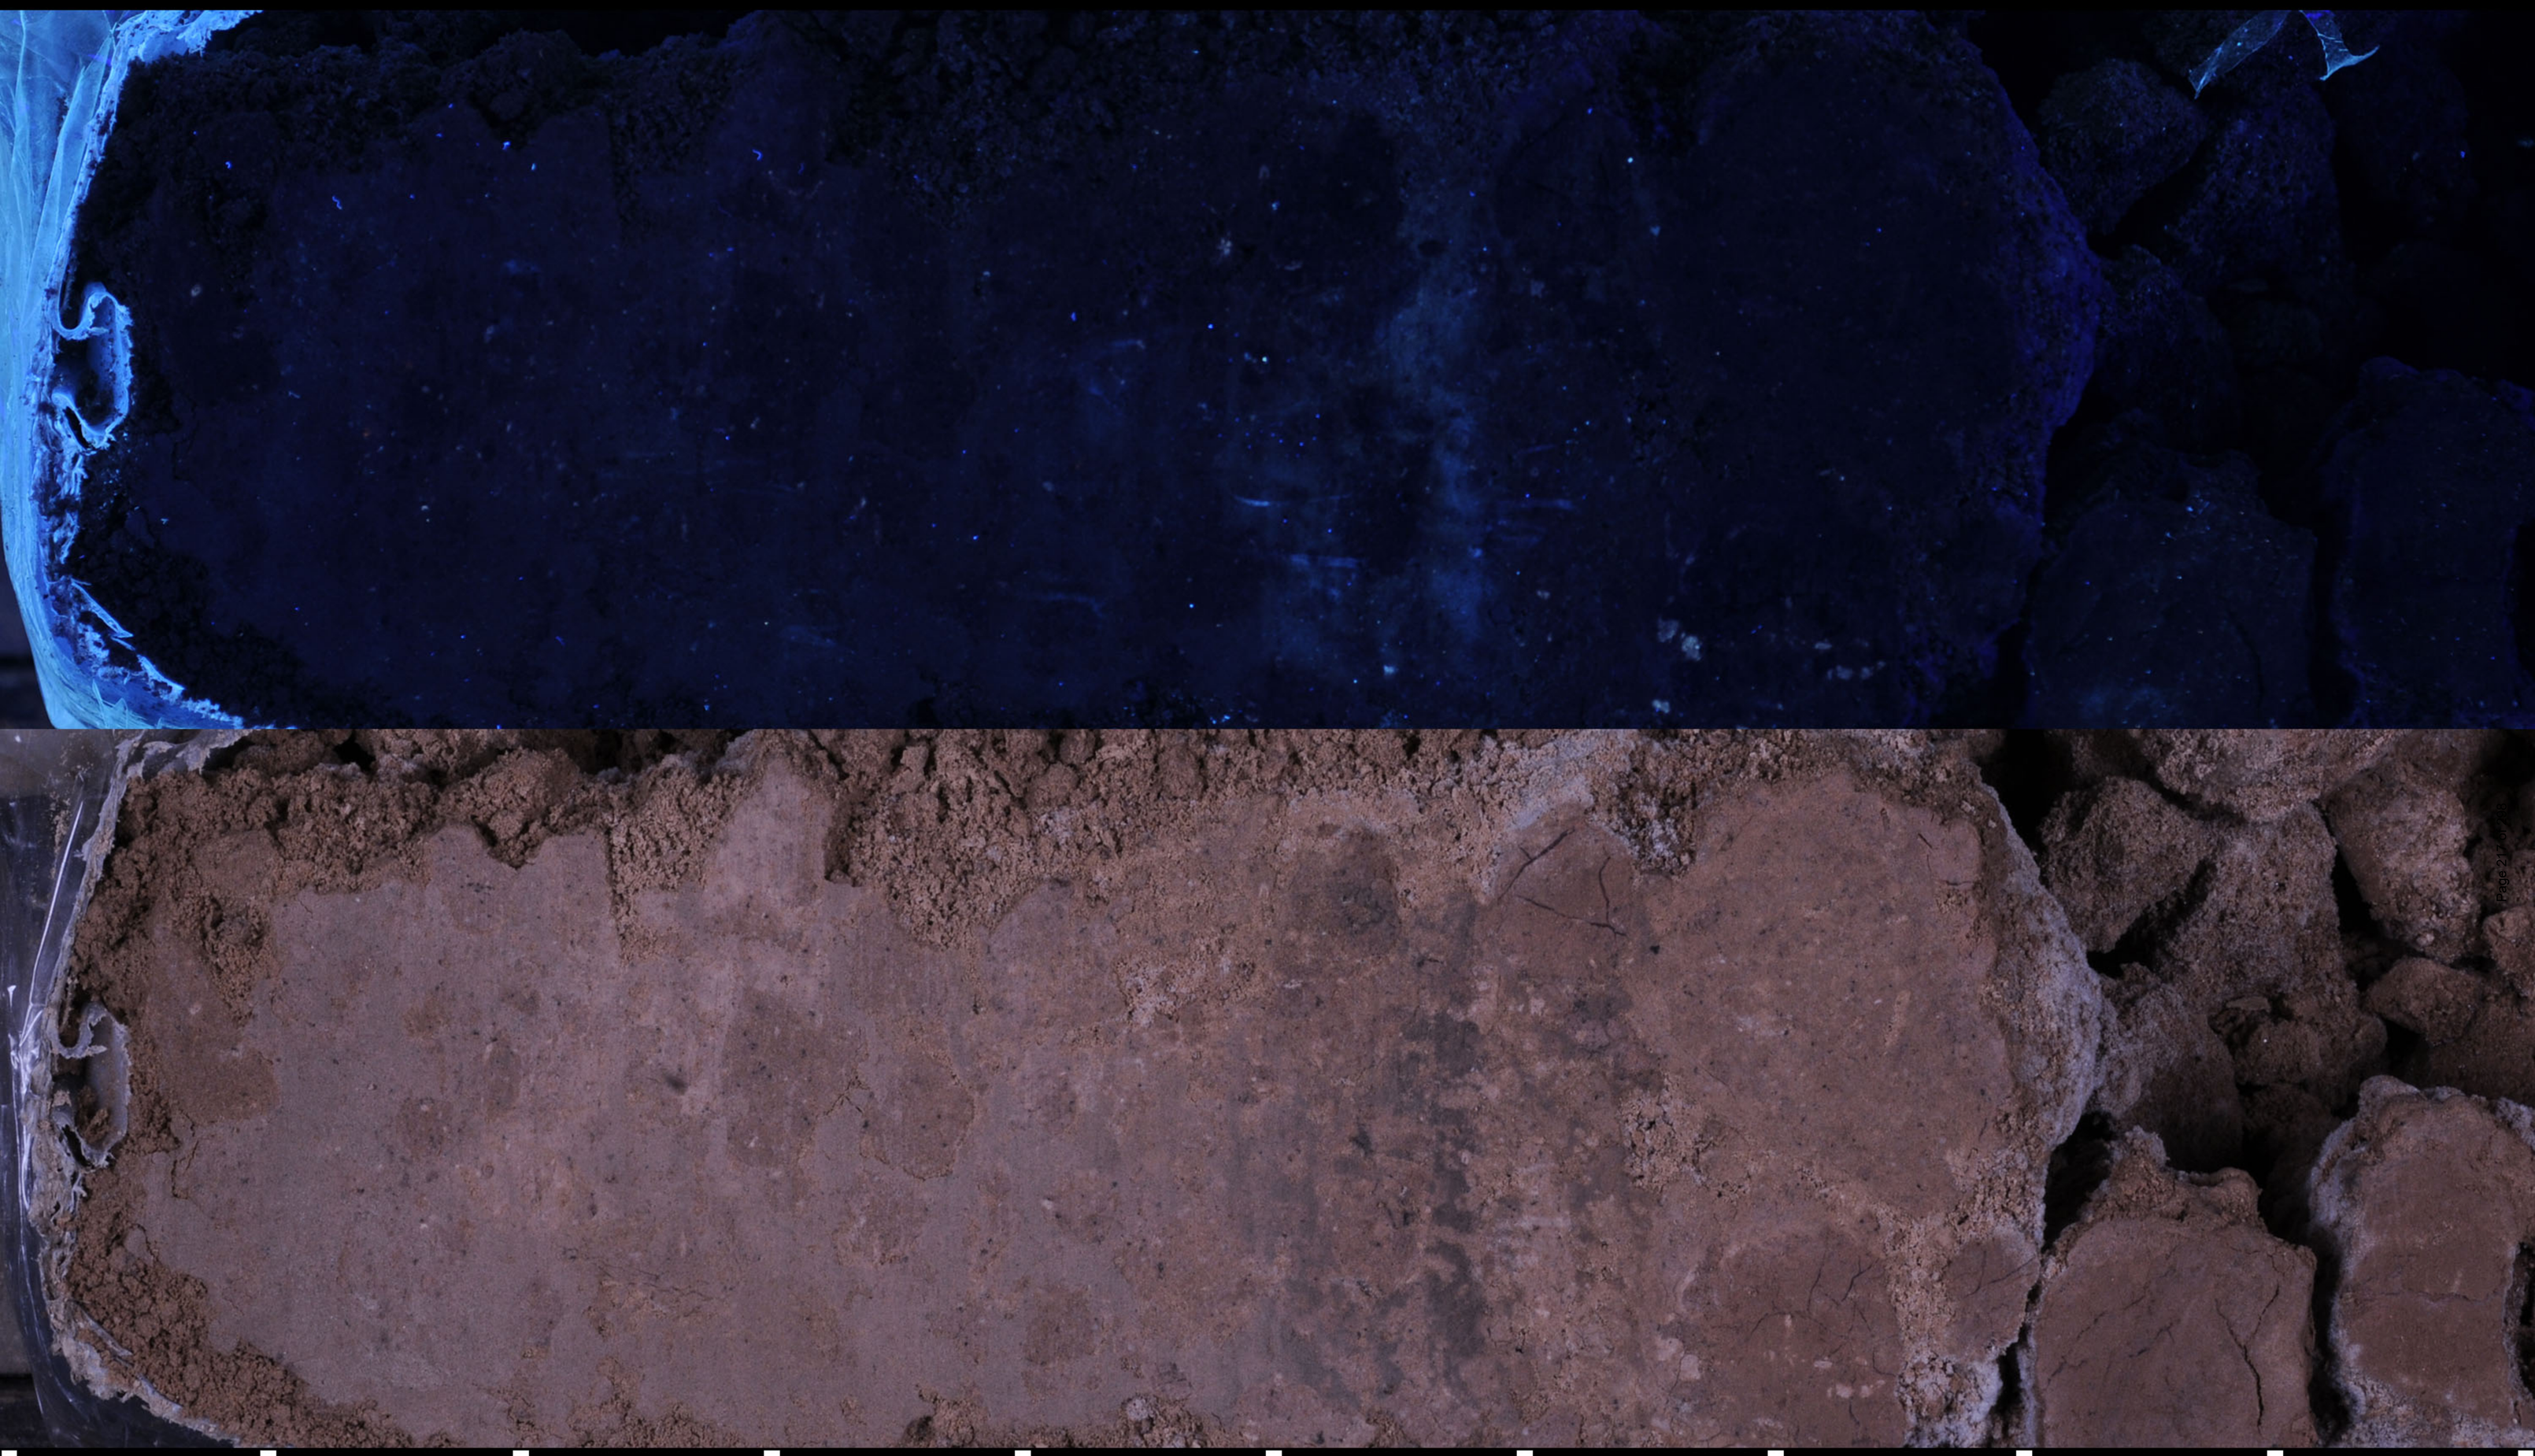
Laboratory Test Program Notes

Standard TAT for basic analysis is 10-15 business days.



Samples received cryogenically preserved will be stored frozen at standard core storage rates from sample date of receipt.

Sample locations to be selected by EA Engineering personnel from core photography.

Core Photo: white light and ultraviolet, low and high resolution, strip format.

Subject: **Pore Fluid Saturation; A/W Drainage Capillarity Package; O/W Drainage Capillarity Package; O/W Imbibition Capillarity Package; Free Product Mobility; Residual Saturation by Water drive-(RSWD); NAPL Permeability; Grain Size Analysis-ASTM D422.)**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact myself or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

Laboratory Test Program Notes

Standard TAT for basic analysis is 10-15 business days.

Samples received cryogenically preserved will be stored frozen at standard core storage rates from sample date of receipt.

Sample locations to be selected by EA Engineering personnel from core photography.

Core Photo: white light and ultraviolet, low and high resolution, strip format.

Site Location: Kirtland AFB
COC Nos: COC 1, 2, 3 & 4 – V1-PTS-20181220

Subject: **Pore Fluid Saturation; A/W Drainage Capillarity Package; O/W Drainage Capillarity Package; O/W Imbibition Capillarity Package; Free Product Mobility; Residual Saturation by Water drive-(RSWD); NAPL Permeability; Grain Size Analysis-ASTM D422.)**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact myself or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.

C.A.Umeh

Laboratory Test Program Notes
Contaminant identification:
Standard TAT for basic analysis is 10-15 business days.

Laboratory Test Program Notes
Standard TAT for basic analysis is 10-15 business days. Advanced tests require additional time.
Sample locations to be selected by EA Engineering, Science, and Technology, Inc.
Grain Size Analysis: Laser or sieve method; includes tabular data, graphics and statistical sorting in Excel format.

Subject: **Pore Fluid Saturation (Dean Stark Method)**

Dear Bernie / Pamela,

Please find enclosed final report for **Physical Properties** analyses conducted upon samples received from your **Kirtland Vadose Zone Coring** project. All analyses were performed by applicable ASTM, EPA, or API methodologies. The samples are currently in storage and will be retained for thirty days past the completion of testing at no charge. Please note that the samples will be disposed of at that time. You may contact me regarding storage, disposal, or return of the samples

PTS Laboratories appreciates the opportunity to be of service. If you have any questions or require additional information, please contact me or Emeka Anazodo at (713) 316-1800.

Sincerely,
PTS Laboratories, Inc.
