APPENDIX A

Drinking Water Laboratory Certification Program Application

This application packet must be filled out completely to be considered for drinking water laboratory certification in New Mexico (NM). When completing the application do <u>NOT</u> change the format of the application, or insert any other documents, or it will be rejected.

Renewal applications must be submitted <u>at least</u> 90 days prior to certification expiration. <u>NOTE</u>: We will no longer be sending out reminders to submit your laboratory's renewal application.

All information requested within this application must be submitted <u>each time</u> a new application is submitted. Do not put "previously submitted" or "on file." If information required is enclosed within another document submitted, please state where it may be found.

Failure to meet the requirements to maintain certification may constitute grounds for downgrading or revoking certification. To re-establish certification, a new application packet should be filled out and submitted, along with all appropriate supporting documentation.

The Drinking Water Laboratory Certification Program (DWLCP) accepts national drinking water certification from A2LA, EPA, and TNI to process New Mexico reciprocity certifications. Reciprocity certifications are only established for the duration of the American Association for Laboratory Accreditation (A2LA), Environmental Protection Agency (EPA) or The NELAC Institute (TNI) accreditation.

If the DWLCP is your primary accrediting body for microbiological analyses, you must schedule your on-site audit with Erica Swanson at SLD when submitting your application; (505) 383-9120 <u>Erica.Swanson@state.nm.us</u> This should be scheduled well in advance for the on-site audit to occur <u>before</u> your certification expires. After you have requested an on-site audit from SLD you must notify the DWB Quality Assurance Coordinator and let them know the date it is scheduled for. Microbiological laboratory certifications may be good for up to three (3) years if successful PT studies results are reported annually and all other requirements for maintaining certification are met.

Electronic submission of applications is required. Completed electronic applications and any questions must be submitted to: <u>NMENV-DWBlabcert@state.nm.us</u>

The following are requirements by Drinking Water Laboratory Certification Program (DWLCP) to receive certification:

- 1. The DWLCP only certifies laboratories for analytes and methods that are identified as acceptable for meeting compliance under Safe Drinking Water Act (SDWA), state regulations NMAC 20.7.10 and federal regulations 40 CFR 141-143.
- 2. Laboratories must agree to accepting a Drinking Water Bureau (DWB) issued Chain of Custody (COC) or ensure their COC is approved by the DWLCP and contains the necessary information required by SDWA regulations to successfully upload information into the DWB database of record at the time of upload.
- 3. Laboratories must maintain capabilities or credentials necessary to provide data uploads as required by DWB. Failure to maintain upload capabilities may be grounds for downgrading or revoking certification.

PART ONE: Laboratory Identification

Date application sul	omitted:			
Type of Application	:			
□New	Renewal		ity	□Amendment
Legal Name of Labo	ratory:			
Laboratory ID#:	Pho	one:	Email:	
Mailing address:				
Physical address (if	different than mailin	g address):		
Billing address (if di	fferent than mailing	address):		
Owner of laboratory	/:		Phone:	
Laboratory Type (cl	noose all that apply)	:		
Public Water Syst	em D Public Wastev	vater System 🗖 Comm	ercial 🗖 Other:	
Primary Accrediting Date of last onsite a	Authority: udit:		Expiration	Date:
Secondary Accrediti Date of last onsite a	ng Authority: udit:		Expiration	Date:

<u>Note</u>: Access to all information collected or generated by the DWLCP is regulated by the Inspection of Public Records Act (NMSA 1978 Section 14-2-1 et seq. NMED Policy 05-02). Except under special circumstances, records must be made available to the public upon written request. No notification to the applicant laboratory will be made if records relating to it are requested.

PART TWO: Personnel Qualifications

Key personnel (Laboratory Director, QA Officer, and all Laboratory Supervisors) must submit a copy of their resumes with the enclosed signed certification statement. Attach additional information pertinent to your education, training, employment, etc.

Laboratory and Laboratory Supervisor Certification

I/We the undersigned certify that personnel listed in the technical personnel list have the appropriate educational and/or technical background to perform all tests for which the laboratory is seeking accreditation. (EPA 815-R-05-004; January 2005)

Laboratory Director (print name)	Phone Number
Signature and Date	Email
QA Officer/Manager (print name)	Phone Number
Signature and Date	Email
Laboratory Supervisor (Organics) (print name)	Phone Number
Signature and Date	Email
Laboratory Supervisor (Inorganics) (print name)	Phone Number
Signature and Date	Email
Laboratory Supervisor (Microbiological) (print name)	Phone Number
Signature and Date	Email
Laboratory Supervisor (Radiological) (print name)	Phone Number
Signature and Date	Email
Laboratory Supervisor (Asbestos) (print name)	Phone Number
Signature and Date	Email

All technical personnel must be listed below. Attach additional pages if more room is necessary.

Name	Positions/Titles	Methods Performed

Technical Personnel List

PART THREE: Test Method-Analyte Selection

The DWLCP is designed to fulfill the compliance needs of the NMED Drinking Water Bureau (DWB) and requires all NM certified laboratories to adhere to EPA approved drinking water methods.

The DWLCP requires that laboratories seeking certification for groups of analytes as outlined under the SDWA (see 40 CFR §141-National Primary Drinking Water Regulations, Subpart C-Monitoring and Analytical Requirements & 40 CFR §143-National Secondary Drinking Water Regulations), must be certified for all the parameters of a specific group covered under the rule; *no partial certifications will be issued* (See table below). Conversely, if a laboratory loses certification for a particular analyte, the whole group is removed from certification. For example, the lab must certify for all SOCs not just ones by a specific method. Water Systems are required to test for all analytes in a group at the same time, so labs must be certified for the entire

group. For reciprocity certifications methods and analytes must match scope of the primary certificate. All combinations of methods and analytes must have a passing PT test each. All methods must have a written SOP.

Indicate method(s) for which the laboratory is seeking certification. For methods with more than one version please specify the version. The method/version must match the method/version used for PT study results.

SDWIS CODE - Drinking Water Analytes	METHOD(S) TO BE NM CERTIFIED			
Heavy Metal	Heavy Metals Group (HM)			
1074 - ANTIMONY				
1005 - ARSENIC				
1010 - BARIUM

PART FOUR: Quality Assurance Documentation

A laboratory must submit copies of the following items for review:

- 1. Current copy of laboratory Quality Assurance Manual/Quality Assurance Plan (QAM/QAP).
- 2. Current copies of laboratory quality systems documentation including any administrative standard operating procedures (SOPs) referenced in the QAM/QAP.
- 3. Current copies of analytical SOPs for each requested method.
- 4. Current copies of Chain of Custody SOP, Sample Receipt SOP, and Subcontractor SOP.
- 5. Reciprocity certifications must also submit a copy of their EPA/TNI/A2LA certificate, scope of accreditation, last on-site audit, corrective action response, and audit closure letter.
- 6. Last two sets of PT study results for each analyte and method for which certification is being requested. Laboratories currently certified by DWLCP and requesting an amendment to their scope of accreditation must submit 2 successful sets of PT sample results for the new analytes and methods to be added to their scope.

NOTE: All chemical and microbiological laboratories must submit their QAM/QAP, SOPs, and PT results to the DWLCP annually at <u>NMENV-DWBlabcert@state.nm.us</u>. The PT study results must be submitted even if your PT provider is already sending results directly to the DWLCP as they become available.

Chemical laboratories may submit these documents along with their annual certification renewal application. They are also required to submit their annual Method Detection Limit (MDL) studies and the associated Minimum Reporting Levels (MRL) for each method and analyte for which they are seeking certification.

PART FIVE: Instrumentation Listing

Please complete the following chart for each piece of equipment used in your laboratory in the performance of the requested methods. A reference to your QAM may be substituted.

Type of Instrument, i.e. ICP, ICP-MS	Instrument ID#	Manufacturer	Model#	Methods Performed

PART SIX: Proficiency Testing Verification

Certified laboratories must successfully analyze proficiency testing (PT) studies at least annually for each analyte and method for which they are requesting continued certification. While PT studies from any accredited provider are permitted, DWLCP recommends PT providers accredited by The NELAC Institute (TNI). It is the laboratory's

responsibility to notify their PT provider that PT study results <u>must</u> be provided to DWLCP at <u>NMENV-</u> <u>DWBlabcert@state.nm.us</u>

I understand that continued participation in a PT program is essential to maintain the laboratory's continued certification. I understand that PT samples must be analyzed successfully in a drinking water matrix for each analyte and method for which the laboratory wishes to be certified. The methods listed on the laboratory's certificate must be the methods by which the PT samples were analyzed.

I am also aware that failure to participate in an accredited PT program could mean loss of approval for affected parameters. I further agree that all PT samples are handled (i.e. managed, analyzed, and reported) in the same manner as real drinking water samples utilizing the same staff, methods as used for routine analysis of that analyte, procedures, equipment, facilities, and frequency of analysis and that no additional quality control measures are utilized along with the PT samples. I further understand that failure to analyze PT samples as real drinking water samples could mean downgrade/loss of certification.

Laboratory Director (print name)	Signature	Date
QA Officer/Manager (print name)	Signature	Date

PART SEVEN: Certification by Applicant and Records Access

The applicant understands and acknowledges that the laboratory is required to be continually in compliance with NMAC 20.7.10.501 and shall be subject to suspension, revocation and denial of certification as specified therein. The applicant acknowledges that the department may make unannounced on-site audits and that a refusal to allow entry by the department's representatives is grounds for denial or revocation of certification. The applicant also understands and acknowledges that the laboratory is subject to the enforcement and penalty provisions of the primary and/or secondary accrediting authority. The applicant hereby certifies that all drinking water analyses performed are done in accordance with 40 CFR 141-143. The applicant will perform all proficiency testing according to the approved method and will report all SDWA compliance data to the NM Safe Drinking Water Information System (SDWIS), or current database of record at time of upload.

We hereby certify that we are authorized to sign this application on behalf of the applicant/owner and that there are no misrepresentations in my answer to the questions on this application.

Laboratory Supervisor (Asbestos) (print name)	Signature	Date

PART EIGHT: Data Reporting Capabilities

It is required that analytical data be uploaded to the DWB's database, which is currently SDWIS, so that compliance data may be shared quickly and accurately, internally, and externally. The DWLCP requires that all laboratories certified in NM demonstrate this ability by creating and uploading a test data set to SDWIS for each analyte which certification is requested prior to certification approval. Laboratories are required to maintain this data upload capability with SDWIS or current database of record at time of upload.

Failure to maintain upload capabilities may be grounds for downgrading or revoking certification.

Laboratory has successfully demonstrated capability to upload to SDWIS.

DATE: _____

Laboratory needs information on data packaging format to upload to SDWIS.
