

Review and Update of New Mexico's
Ground Water Protection Rules:
Kick-Off Meeting Comments

May 20, 2016

- WebEx participants, please submit comments through the chat feature.
 - Comments will be accepted on all areas of the regs

- Sites that already have financial assurance through MMD, will they be required to have additional assurance?
 - Not likely

- Why include vapor intrusion?
 - many other states have already included VI risk in their regs and guidance
 - VI issues are common in areas with previous industrial use throughout NM
- Other states have incorporated VI through guidance

- Make any changes due to changes to Waters of US designation?
 - we will look into if this is needed

- Any process changes? different notice?
General permits or similar?
 - not at this time
 - considering changing poster size requirements for public notice
 - added email notification as an option for PN

- Any other industry segment being considered for specific GW rules?
 - not at this time

- Types of financial assurance to be added to the regs?
 - may be similar to the requirements in the Copper Rule
- Envision linking the Rule to Risk Assessment Guidance?
 - We have been looking into that; as a legal matter incorporation by reference may be an issue
 - prefer to incorporate into rule itself
